GEO. NUGENT, Editor.

The death of Horace Rublee, which occurred last Monday morning, closed the career of one of Wisconsin's oldest and ablest editors at the age of 67 years.

Now that all the committees which were sent to Mexico have reported, it might be as well to send them to India to see if there really is a failure of the wheat crop there.

The increase of diphtheria in the Cream City should prove a warning to all other state localities which suffered from lack of timely action towards preventing the spread of that disease last fall.

Those who, upon receiving Chicago Record postal-card ballots, simply write "I prefer the Australian ballot" thereon and then drop the card in the postoffice are doing better work than the Record in this campaign.

The discussion in the Trades and Labor assembly of West Superior is not surprising in view of the fact that a majority of that body voted out its constitution by agreeing to turn out in a political parade. As a disorganizer of labor politics are on a par with religion.

An exchange says "the Bryanites are reveling in the free coinage of lies." Well, they haven't got the best of the McKinleyites on the "ratio" in this respect, and neither have any advantage in the way of "protection" against such "foreign" matter in this campaign.

The people of a free country will hardly ever consent to allow our flag to be turned over to the exclusive use of any particular party as an emblem of political supremacy next Saturday. If it waves at all, let it wave over all—the north, the south, the east, the west, all states—demonstrating that the flag of this country is the flag of its people.

If all Catholic bishops should express their political belief so openly as Archbishop Ireland did, it would have a demoralizing effect upon Roman Catholic church organizations in this country. However, it is pleasing to note that most Catholic prelates are too attentive to their religious duties to meddle with politics.

An exchange says "We shall soon be able to perceive whether President Cleveland has the courage to refuse to appoint a free silver Democrat to any office within his gift." Well, we understand that Grover's run only extends to the 4th of March, so to speak, and then he will have to get off the train himself, bag and baggage.

The great interest which is being taken by the people (irrespective of sex) in the presidential campaign, is again shown by the Associated Press report that an Indiana Republican recently left his wife and family of grown children because his better-half is a free-silver advocate and insisted on hanging a Bryan picture in one of the windows of their home.

And now it turns out that a theatrical man has been attempting to gain notoriety through a report that W. J. Bryan once applied for the position of press agent for Charles E. Evans. As might be expected, however, the man whom Bryan is said to have applied to is now reported to be dead—the same as the main witness in matters trumped up against the governor of Illinois.

The New York Herald's correspondent at Chicago seems to think that a manufacturer is not intimidating his employees when he threatens to shut down his factory in case the candidate of such employer's choice fails to be elected president on the 3d of November. However, we have yet to hear of the Herald threatening to shut down in case the candidate of its choice should not be elected as our next president.

About the Age of a Horse.

"The popular idea that the age of a horse can always be told by looking at his teeth," said a veterinary surgeon, "is not exactly correct. After the eighth year the horse has no more new teeth, so that the tooth method is useless for telling the age of a horse which is more than eight years old. As soon as the set of teeth is complete, however, a wrinkle begins to appear on the upper edge of the lower eyelid, and a new wrinkle is added each year, so that to get at the age of a horse more than 8 years old, you must figure the teeth plus the wrinkles."—X.
