Mexican dollars and American dimes and quarters are the current coin of Porto Rico. Nearly all the coins in circulation have holes in them, or are otherwise defaced. Shopkeepers suspect fresh coins as being counterfeit but rarely doubt the genuineness of worn and battered silver, its condition being taken as a guarantee that it has long been in service and is therefore good.—N. Outlook for Enterprises in Cuba.

Gen. Bradley T. Johnson sums up an interesting letter to the Manufacturers' Record of Baltimore by saying:

The 1,000 miles of railroad will be expanded to 10,000 miles, for each great plantation will have its own system of railroads. Telephones will net the country. In two years the population of Cuba will double. Its area is about equal to that of Pennsylvania. The yellow fever will be abolished. The great mountain ranges will be cleared and cultivated. Silver, gold and iron will be dug out of them; mahogany, rosewood—the most valuable timber in the world—will be rushed into Baltimore, and the epoch of the Argonauts in 1849 will be repeated.

I have answered your question when I tell you that a fair mechanic can earn \$8 per day, and will be able to do so for years after this mine of agricultural, mineral and forest wealth is open to the energy, enterprise and industry of free Americans.

A. C. Wolfe of Dundee, Mo., who travels for the Mansur & Tibbets Implement Co. of St. Louis, gives traveling men and travelers in general some good advice. Being a Knight of the Grip," he says, "I have for the past three years made it a rule to keep myself supplied with Chamberlain's Colic, Cholera and Diarrhoea Remedy, and have found numerous occasions to test its merits, not only on myself but on others as well. I can truly say that I never, in a single instance, have known it to fail. I consider it one of the best remedies travelers can carry and could relate many instances where I have used the remedy on skeptics, much to their surprise and relief. I hope every traveling man in the U. S. will carry a bottle of this remedy in his grip." For sale by L. Rosenheimer.

**A Fortune From a Seare.** An inventive genius, who suffered from attacks by stray dogs when riding his wheel, set his wits to work to devise something which would be an efficacious, and yet comparatively harmless means of defense. As a result he has brought out and patented a pocket-pistol, which will shoot ammonia water or other liquids. The most vicious dog cannot withstand a few drops of it in his eyes, and yet there is no danger of actually injuring a valuable animal that might playfully annoy a rider. The weapon has proven such a success that the lucky inventor is realizing considerable money from his device.—X.

A coalng station and dock yard in the Hawaiian islands will be considered, now that they have become annexed to the United States, but this means an expenditure of at least \$1,500,000.

**REMMEL'S**

**NEW IMPROVED, VILLAGE FIRE ENGINE.**

This cut represents my new improved, village Hand Fire-Engine, with folding brakes and automatic locks—room for 12 to 14 men to work. It has two 5-inch Brass Cylinders and Brass Valve Seats, and the valves are so arranged as to be easily taken apart should it become necessary. The tank is lined with heavy, galvanized iron and has a capacity of about 3 barrels. The suction is arranged with a heavy 3-way brass valve, so that the water can be taken from the tank or suction-hose by simply moving a lever, without stopping. It is a strong, durable machine, and is fitted with air-cocks to prevent freezing. WRITE FOR PRICES!

Facts About the Hawaiian Islands, Over Which Our Flag Now Flies.

Hawaii is of small area, being less than that of a single Congressional district.

For several years the people of Hawaii have been living under the influence of American civilization, speaking and studying our language, recognizing the stars and stripes as familiarly as their own flag.

The essential public interest attaching to Hawaii grows out of its central position in the route between the Pacific and Atlantic Oceans.
