**SATURDAY, AUG. 25, 1900.**

**THE AKRON, Ohio, riot shows that the "white man's burden" has extended to the home state of our President.**

It is all off with the cigarette manufacturers, since the ban on their product has reached the Chicago stock yards.

Now that the allied troops have entered Pekin, they may peck out for a while, or until the Empress Dowager is located and peace declared.

The Milwaukee papers rather lead one to believe that the South Side Jah Market is to be the main show there during State fair week.

The saying that "divorce is hell" has again been recalled by the action of the Minnesota farmer whose wife's legal proceedings for a separation led him to kill her and four step-children.

Among other things it is said that the census work shows that the possible military force of the United States is 17,000,000—men between the ages of 18 and 45 years.

**SERGEANT JOHN R. CARROLL**, who recently joined the Warren post of the G. A. R. in Brooklyn, N. Y., is 100 years old. But then he soldiered before the time of such modern army food as "embalmed beef."

**CALEB POWERS**, ex-secretary of state in Kentucky, has been convicted of complicity in the Goebel murder and sentenced to life imprisonment. The conviction of Henry Youtsey and even ex-Gov. Taylor on the same charge may follow.

The traveling man who became too familiar, in conversing with a saleslady at Rhineland, apparently deserved to be driven out of the store, but the keeper got in a position to be fatally if not justifiably shot when he entered a hotel for the evident purpose of fulfilling a previous threat to trounce the drummer.

**BUFFALO BILL'S** cowboys seem to have imagined that their license to show at Prairie du Chien gave them the privilege to "shoot up the town." Hereafter the authorities of that city may grant no license to shows of the Wild West order, as the old place has not been so riled up since a resident physician and family proved to be a band of thieves and murderers.

**EIGHTEEN** postoffices have been abolished in Washington county, Pa., and similar results are expected in some counties of Wisconsin, owing to the introduction of free rural mail delivery. In South Dakota and like prairie-land states, a great number of postoffices undoubtedly will be eventually abolished, as it is figured that the automobile will enable the government to run the rural delivery system cheaper than the postoffices at off-the-railroad burgs.

**At the State Fair.**  
In the exhibits of cattle at the State Fair, C. L. Lane of La Crosse, who has the supervision of that department, expects to receive all previous lists of entries. In order to secure additional exhibits this year the State Board of Agriculture has announced the premium list in this department both in the amount of premiums and the amounts in each class. Entries of exhibitors' herds of four animals or more in each of the twelve classes will be about double what it has been heretofore, and the same is true of the short-horn herds. Entries in the Hereford and also the Aberdeen-Angus exhibits, with the Red-Polled, Devon and Galloway classes, will make a very complete show of cattle in the beef line.

In the dairy breeds Mr. Lane promises to have a most complete showing of Holstein, Guernsey, Jersey, Brown Swiss and Ayrshire. During the past few years Wisconsin farmers have added to their herds of prize-winning animals winners in the above classes, nearly all of which will be on hand. There is some special prize for the best dairy cow, bred and owned by an exhibitor, also prizes for fat steers and heifers, and the best dairy heifer under three years, bred and owned by an exhibitor. The latter classes will be confined to Wisconsin farmers, and all other animals shown in other classes by professional exhibitors will be barred.

The wolf in the fable put on sheep's clothing because if he traveled on his own reputation he couldn't accomplish his purpose. Counterfeiters of DeWitt's Witch Hazel Salve couldn't sell their worthless salves on their merits, so they put them in boxes and wrappers like DeWitt's. Look out for them. Take only DeWitt's Witch Hazel Salve. It cures piles and all skin diseases. All druggists.

The whaleback and cigar shaped steamboat is a success in navigation, and now comes the introduction of the cigar-shaped railroad train, which is expected to attain a speed of 100 miles an hour. The peculiar construction of the train is with the idea of overcoming the immense atmospheric pressure encountered at high speed. The train is to be drawn by a locomotive fitted with a wind-splitter ahead of it, and the end of the rear car is to be constructed on the same plan. This will offer the least resistance and so promote speed.—Exchange.

You will never find any other pills so prompt and so pleasant as DeWitt's Little Early Risers. All druggists.

"Your greatest enemy is whisky," said the parson to an incorrigible member of his flock. "But," said the wayward one, "you have always told us to love our enemies." "Yes," answered the good man, "but not to swallow them."—X.

It will surprise you to experience the benefit obtained by using the dainty and famous little pills known as DeWitt's Little Early Risers. All druggists.

Wife (tenderly)—Do you remember, Charles, how embarrassed you were when you proposed to me? Mr. Hardy—No, dear; I've been so embarrassed since that I've forgotten the occasion you speak of.—X.

**WAYNE WAITINGS.**  
Mrs. Wendel Peltz has been rather seriously ill since Tuesday.

During the civil war, as well as in our late war with Spain, diarrhoea was one of the most troublesome diseases the army had to contend with. In many instances it became chronic and the old soldiers still suffer from it. Mr. David Taylor of Wind Ridge, Greene county, Pa., is one of these. He uses Chamberlain's Colic, Cholera and Diarrhoea Remedy and says he never found anything that would give him such quick relief. It is for sale by L. Rosenheimer.

**Seeds by the Acre.**  
A 60-acre seed farm adjoining Independence, Ia., is growing 12 acres of cucumbers, 20 of beans, 13 of sweet corn, 6 of onion sets, 2 of muskmelons, 4 of tomatoes, and the remaining 3 acres are divided between turnip, mustard, parsnip and squash. It has kept a corps of ten men steadily employed, and part of the time three times that number.—Bulletin-Journal.

**C. & N.-W. Refrigerator Service.**  
Tuesdays and Thursdays for the north at 8:40 a. m.; Wednesdays, 11:10 a. m., south; Fridays, 7 p. m., south.

**Cow At His Pocketbook.**  
The Memphis Commercial-Appeal says: "J. F. Hughey of Wayne county was in the city yesterday with a peculiar hand-luck story. He went into his field to drive out some cattle and hung his coat on the fence. In the coat was his pocketbook containing \$414 and \$400 in notes. When he came back the book no longer protruded from the inside pocket of the coat, but a neighbor's cow was quietly chewing her cud nearby. He at once surmised that she had chewed up his treasure, and in less than an hour he had bought the meek-eyed kine, killed and opened her. Finding the money all chewed up, he took the pieces from the cow's stomach and arranged for the Madison county bank to send them to Washington for redemption. As the denomination of the bills can be made out, Mr. Hughey will not lose much. But he says that, in addition to his money in the cow's stomach, he found ten penny nails, a piece of an old hat, a 3-b rock, and a piece of fence-rail."

Millions will be spent in politics this year. We can't keep the campaign going without money any more than we can keep the body vigorous without food. Dyspepsia Cure digests what you eat. It instantly relieves and radically cures all stomach troubles. All druggists.

**OBITUARY.**  
Mrs. Mary D. Ferber of the town of Auburn, Fond du Lac county, died on Aug. 16th, 1900, after a lingering illness of several months. Mrs. Ferber was born in the city of New York, on Feb. 7, 1840. The next year her parents moved to New Jersey, where they remained until 1846, when they came to Wisconsin and located at Milwaukee, in the schools of which city she received her education. In 1854 her parents moved into the backwoods of Fond du Lac county, and two years later she began teaching and followed the profession for several years. On July 29, 1860, she married Henry Ferber, and they established the home where she continuously lived up to the time of her demise. Her husband preceded her in death nearly 18 years ago.

The funeral of Mrs. Ferber was held last Sunday, with Rev. Nuss of Campbellsport officiating in the obsequies, and her remains were laid beside those of her husband, in the Riverside cemetery.

Six children were born to the couple, two of whom died several years ago. The survivors are W. H. of New London; Edward, George and Bertha, who reside at the old homestead. Mrs. Ferber is also survived by two sisters—Mrs. Fred. Heinemann of Milwaukee and Mrs. L. Koepnic of Lomira.

Mr. Major, the famous cement man of New York, explains some very interesting facts about Major's cement. The multitudes who use this standard article know that it is many hundred per cent. better than other cements for which similar claims are made, but a great many do not know why. The simple reason is that Mr. Major uses the best materials ever discovered and other manufacturers do not use them, because they are too expensive and do not show large profits. Mr. Major tells us that one of the elements of his cement costs \$1.75 a pound, and another costs \$2.25 a gallon, while a large share of the so-called cements and liquid glue upon the market are nothing more than the glue, dissolved in water or other acid, and in some cases, altered slightly in color and odor by the addition of cheap and useless materials.

Major's cement retails at 15c and 25c a bottle, and when a dealer tries to sell a substitute you can depend upon it that his only object is to make larger profit. The profit on Major's cement is as much as any dealer ought to make on any cement. And this is doubly true in view of the fact that each dealer gets his share of the benefit of Mr. Major's advertising, which now amounts to over \$2,000 a month, throughout the country. Established in 1876.

Be sure of having Major's. Don't accept any off-hand advice from a druggist. If you are all handy and you will be likely to find that you are a good deal more so than you imagine you can repair your rubber and leather articles with Major's Leather Cement. And you will be surprised at how many dollars a year you will thus save. If your druggist can't supply you, it will be forwarded by mail (either kind) free of postage.

Mrs. Scott Chilcott of Pueblo, Col., and Mrs. L. White of Rio, Wis., are guests of Dr. Wm. Hausmann and family this week. A. G. Koch has a patent preparation called Killly, which is highly recommended for keeping flies off horses and cattle.

FOR SALE—Blacksmith shop with dwelling house and barn, all buildings in good condition. Will also consider trade on other real estate.—J. W. BLACKMORE, West Prospect. FLITTINGS—On Monday last Louis Brandt moved into Chas. Weddig's residence on Fond du Lac avenue, and Geo. Heiser moved into Wm. Stark's house on the corner of Main and Water street.

David Rosenheim, John Witzig and Dr. Klumb witnessed the baseball game between the Hartford and Ft. Washington teams at West Bend last Sunday. The former club lost by a score of 10 to 3. The south-bound passenger train was delayed for an hour here Wednesday noon, by the breaking of a spring-support under the boiler of the engine, and another locomotive was sent up from West Bend.

Anton Grimm of Milwaukee, official organizer of the G. U. G. Germania of the state, spent a few days here this week, and succeeded in getting about 16 members, who will be duly organized in the near future. The engine-tender and baggage car of the Kaukauna wreck were sent south Monday, with the freight train which left here just after the noon passenger. The engine proper was sent down to the shops some time previous.

Our village and town supervisors, Philip Schmidt and Bernhard Hausfeld, attended a special session of the county board last Saturday. The meeting was called for the purpose of considering the question of appropriating money towards the erection of a new bridge in the town of Trenton, which was favorably acted upon.

The following young people from here spent last Sunday at Long lake, viz: Mathilda Lay, Meta Andrea, Jennie Hoening, Rosa Remmel, Agnes Schaefer, Mary Dricken, John Marx, Alex. Ebenreiter, Joe Schmidt, Oscar Groeschel, Ed. Miller, Carl Hausmann, Otto Lay and Wm. Ludwig. During the storm last Monday noon the barn on Aug. Wichmann's farm, in the town of Barton, was struck by lightning and burned to the ground, together with all of his grain. The loss is partially covered by \$1,000 insurance in the Ebelsville mutual company. We also learn that John Remmel's barn, south-west of here, was similarly struck but not much damaged, while the fairground buildings at West Bend were damaged by the wind to the extent of about \$1,000.

At the Democratic county convention at Cedar Creek last Saturday, the following delegates were elected to the state convention at Milwaukee last Wednesday, viz: B. S. Potter, H. Rohlf, A. J. Hemmy, H. A. Sawyer, Henry Low, Michael Salter, S. W. Bennett, O. F. Hoge, H. B. Roseoe and John P. Wheelan. The delegates were unanimous for Behrmich for governor, B. S. Potter for railroad commissioner, and J. W. Murphy for chairman of the Democratic state committee.

Welcomed Two Priests. Rev. Father F. G. Grome, formerly pastor of the Holy Trinity church here, was given a royal welcome last Saturday evening upon returning from a European trip to the St. Joseph parish in Milwaukee. Four societies carrying torches and headed by two bands met him at the depot. At the paragon a reception was held and informal speeches were made.

Rev. Father Bertram, formerly pastor of the St. Matthew church at Newcasel, was similarly welcomed upon his return to Hartford from a European trip on the 14th inst., when he was met by the Wilson Park band and given a reception in the school house.

Arrested Near Barton. Joseph Barconius, an Italian employed in the gravel pit north of Barton, was arrested by Sheriff Shinners and Deputy Schlamer last Monday afternoon. Barconius is wanted in Chicago, where he is alleged to have killed a countryman last Saturday night. He arrived here Monday morning on the 6:10 passenger and immediately went to work in the gravel pit, where he was arrested by the officers upon advices from the Police department of Chicago. Barconius says the killing was accidental. An officer arrived from Chicago last evening, and left for there with the prisoner this morning.—West Bend Democrat, Aug. 22.

BIDS WANTED. The school board of Dist. No. 5 will meet at Koch's store next Monday, Aug. 27th, at 7:30 p. m., for the purpose of receiving bids for laying 500 feet of sewer; also for furnishing the necessary pipe. Plans and specifications may be seen at the aforesaid store. The board reserves the right to reject any or all bids. By order of the School Board.

BIDS WANTED. Open bids will be received on Saturday, Sept. 1, at 2 p. m., on the street in front of Doctor Hausmann's place, for hauling gravel there. The right to reject any and all bids is reserved. By order of the Village Board. Jos. SCHMIDT, Clerk.

Kewaskum Graded School.

The Kewaskum graded school will open on Monday morning, Sept. 3. The course of study, as outlined by the teachers and adopted by the board of education, covers all of the common school work and two years of the high school. All accredited high schools, and all indiscriminating non-accredited high schools in our state, doing honest, legitimate and creditable work, credit our graduates with all the branches studied in our school. In fact, several of our pupils, after having completed the two years' high school work in our school, and having received diplomas crediting them with the same, have in past years attended high schools, colleges and normal schools; and they were given full credit by those schools for all the work they did in our school and were not obliged to study the branches they studied here over again.

An urgent appeal, or rather request, is made to all who contemplate attending our school the coming year to enter on the first day, so as to be enabled to do all of the required work for the entire year. If pupils want to derive full benefit from the school and from the branches studied, it is essential for them to be present at the beginning to lay the foundation for their subsequent work, and to remain until the close of the school year. Pupils who enter the school after much of the work in their respective classes has been done for the year, fail to receive the beginning of their work; and the results are that they will not get an insight into their work, that their class work will be hampered for the remainder of the year, and that they will then lose interest in the school and in their work.

The tuition for non-resident pupils is as follows: Upper department, \$1.50; intermediate, \$1.25; and primary, \$1.00 per term. G. F. KOEPLKE, Principal.

The State crop bulletin for the week ending last Tuesday reports that frequent rains have generally placed the soil in good condition for fall ploughing, which has been commenced in many sections of the state. The weather during the past week has been especially favorable for corn, which is maturing very rapidly and promises an excellent crop. Further advices as to the probable date of maturity confirm the estimate made last week. Some fields of early corn have already been cut. The cutting and stacking of oats is about completed, but there is considerable complaint of mold, especially where plait in the barn early, and in some sections the mold is attributed to the fact that the straw was not matured at the same time as the berry, leaving the former green when cut; some also complain of damage due to excessive heat while the grain was in shock. In fact this crop has suffered from several causes, and the yield will be very unsatisfactory. The second crop of clover continues making excellent progress, and will be one of the most successful crops of the season. Pastures are growing splendidly and furnish an abundance of feed, having practically recovered from the effects of the heated period. Buckwheat is making excellent progress and promises a very good crop.

Complimentary to a Kewaskum Lady. Miss Hannah, daughter of Mr. and Mrs. Chas. Hillenberg, recently attended a B. Y. P. U. rally at Dixon, Ill., and the Evening Telegraph of that place speaks thus flatteringly of the part she took in it: "Rev. Spencer introduced Miss Hannah Hillenberg, a student of the Northern Illinois normal school and a member of the Young Woman's Christian association and of the Baptist Young People's Union, who occupied the time usually devoted to the evening sermon. Miss Hillenberg is a young lady of pleasing address, frank and self-possessed, but very modest and unassuming in her demeanor, of rare intellectual ability and deep Christian piety. For fully half an hour she spoke without notes, slowly and in a somewhat low but distinct and very sympathetic voice, and held the enrapt attention of her hearers to the close of her remarks. She commenced by speaking of mission work in general, of its importance and necessity at home and abroad. By an ingenious display of ribbons of various lengths and colors she gave an object lesson of the comparative number of inhabitants of the earth comprised in the various great religious divisions—Jews, Protestant Christians, Catholics, Greek church, Mohammedans and heathen or idol worshippers. Of these the heathens outnumber the protestants more than 6 to 1. Then she related the story of a young Hindu woman of high caste, whom she recently met while a delegate to the Y. W. C. A. convention at Lake Geneva, Wis., and the story of whose life and conversion she heard from the lips of Miss Stevenson, a returned missionary there. The story was a thrilling one, but simply and unaffectedly told, and clearly showed the sacrifices which a Hindu convert to Christianity has to make—how she literally gave up father and mother, brothers and sisters, home and great wealth in some cases, and social position in all cases, and becomes as one dead to all her former associates for the love of Christ. The story, while but one of thousands, was invested by the narrator with all the interest it could receive from local coloring, and made a deep impression on many of her hearers."

### THE USE OF PUBLIC GARDENS.

They Would Tend to Decrease the Inmates of the Reformatories.

Children often become criminals because they have no outlet for doing what they like and what is proper for them to do. All children love to work in gardens, and if there were public gardens where children could voluntarily work they would be less likely to become inmates of the reformatories to half their present extent.

None know better than those who have interested themselves in reformatory work what are their weak points. However well treated, the inmates feel as prisoners, and there is the difficulty of placing them for a start in the world when the reformatory term expires—difficulty growing more serious every day. Aside from this is the enormous tax on the community in the way of private benevolence or public charges. None would welcome an improved method of lessening these expenses more than reformatory managers.

Public gardens, as suggested, would help to some extent—but they would not be found in large cities, from whence most of the population of reformatories come. Mechanics' Monthly.

### A LIFE'S REMORSE.

BY THE DUCHESS

CHAPTER XVII.—(Continued.)

"The best summer we have had for years," says she in her exuberant fashion, leaning on Crawford. Unlike other folk, she always begins with the weather. "The condition of the atmosphere is therefore a marked feature in her conversation. 'What a sun! I don't believe India can be warmer.' This is a stock phrase. In winter she always says, 'The weather is so cold, the North Pole can be colder.'"

"It means rain," says Mr. Blount, "and it is, or at least should be, a damper, but duchesses are never damp."

"You really think so? I don't know. No, those clouds over there mean nothing but rain. In winter she always says, 'The weather is so cold, the North Pole can be colder.'"

"It means rain," says Mr. Blount, "and it is, or at least should be, a damper, but duchesses are never damp."

### DEPOTS ARE WRECKED.

Robbers Break Into Railway Stations at Platteville.

SECURE LITTLE CASH.

They Do Not Attempt to Crack the Safe—Two Tramps Arrested on Suspicion.

Platteville, Wis., Aug. 22.—[Special.]—The city was thrown into much excitement this morning by the discovery that both the Chicago, Milwaukee & St. Paul and Chicago & North-Western railroad stations here had been broken into and robbed some time during the night. The robbers, who were armed with revolvers, the thieves having destroyed all the furniture, broken the lamps and destroyed the cash drawers in each case. About \$12 in cash was secured at each place. No other valuables were taken. The robbers secured but little booty. The ticket cases were opened and the tickets scattered all over the place. The stations are about sixty feet apart. About half way between them a crew of men were working all night long, the men being called by the depot men. They were arrested and are now in jail, being held on suspicion.

The railway stations of several surrounding villages have been broken into and robbed lately.

### PROFITABLE DAIRYING.

Singular Natural Phenomena that Are the Wonder of Travelers.

The singing sands of Arabia are stretches of sand, sometimes on a hillside of the interior, which, when trodden, produce a distinct musical note. Walking through them, stirring them with a stick, or in any way agitating their particles will cause the sound, which continues some seconds. Scientific men have been quite at a loss to account for so singular a phenomenon, and have suggested many explanations. The problem is complicated by several curious circumstances in connection with it. It has been ascertained, for instance, that if carried away in bags the sand loses its musical power, but retains it if transported in glass vessels. Wetting the sand while in an artificial receptacle destroys its power of producing tone, but rain has no such effect, since as soon as the sand is dry it is as musical as before. The singing sand is found in no less than twenty-six places on the eastern coast of the United States and in at least two on the Pacific.

In Honor of Gutenberg.

It has been decided to establish at Mayence a permanent museum in connection with the Gutenberg printing press, to mark the 500th anniversary of the birth of printing. In addition to this an international museum is being organized at Mayence to be a success. The grand dual government of Hesse-Darmstadt at Mayence has already done much toward making the establishment of the Gutenberg museum a certainty. The constitutions of the museum and the government of the city only require to be widely known to secure the hearty cooperation of the last five centuries.—Philadelphia Public Ledger.

### THE GROWTH OF LANGUAGE.

Language is being made so fast in these days that it is unsafe for parents to furnish lists of words for their children to learn. A writer in the London Academy contends that many words rejected by the dictionaries are necessary to fill the gaps in the language, and that the children who would be ignorant of his calling. William Cullen Bryant's long list, published many years ago and widely consulted ever since, the Academy critic objects to as a bag filled with bones of contention and a list of words which it is touched—New York Commercial Advertiser.

The Origin of Greenhouses.

William Watson of Rome says that the first greenhouse erected in England was in the Apothecary's Garden, at Chelsea, in 1548. It merely had glass sides, and was heated by a furnace. A greenhouse of a glass-roofed house was built by the Duke of Rutland at Belvoir Castle for the purpose of growing plants in the open air. Steam was first used in 1789, and a small house in the Jardin des Plantes at Paris—Mechanics' Monthly.

Try Grain-O! Try Grain-O!

Ask your grocer today to show you a package of GRAIN-O, the new drink that takes the place of coffee. The children may drink it without injury and it is a strength-giving tonic. GRAIN-O has that rich smell of Mocha or Java, but it is made from pure grains, and the most delicate stomachs receive it without distress. One-fourth the price of coffee. 15c and 25c per package. Sold by all grocers.

### THE MISSISSIPPI JETTIES.

The Mississippi jetties are among the most gigantic engineering feats of the world, costing in the neighborhood of \$5,000,000, and making a 25-foot channel out of a stream which was formerly but eight feet of water. This has made New Orleans a port for the largest among ocean-going vessels.

Crosby Transportation Co. and Grand Trunk Ry. system, Grand Haven Route. Shortest, cheapest and most popular line to all points in Michigan, Canada and the East. Steamers leave Milwaukee every night at 10:30 p. m. Write or call at ticket office, 400 East Water St.

A Considerate Woman.

At Grant City, Mo., recently, a man beat his wife and was arrested on a warrant issued by the sheriff. He was sentenced to the rock pile, and the next morning the people were astonished to see the wife patiently holding a noose over her husband as he hammered away at the rock.

Dragon Flies Eat Mosquitoes.

Recent observation has revealed the dragon fly, known as the dragon, which feeds on mosquitoes, and experiments are under way for breeding dragon flies in great numbers and releasing them in localities where mosquitoes abound.

No Lieutenant-governor of New York has served more than two terms since the adoption of the present constitution.
