SEIZED BY AN OCTOPUS

Terrible Battle of a Diver With a Monster Devil Fish.

Not long ago a Malay diver off the coast of New Guinea was drawn down with his boat by an enormous devil-fish. He was rescued, half dead, after a fight with the monster. The devil-fish is about the most lathesome monster of the deep, but has its counterpart in Catarrh, which seems to clutch with unseen arms at head, throat, stomach, lungs and bowels, and when its grip is secure it drags its victim down to death. It was slowly but surely destroying Robert S. Evans of Beverly, N. J., until he was rescued by Dr. King's New Discovery for Consumption. He writes: "I was a great sufferer for a long time from Catarrh of the head and stomach. I would almost choke at night with mucous matter falling into my throat. My bowels were badly constipated and my kidneys very much affected. Sometimes I was not able to stand on my feet. When I had paid nearly all my money to the best doctors I was no better than at first. At last I was advised to try Dr. King's New Discovery and New Life Pills; one bottle of the Discovery and one half box of the pills wholly cured me. I would not be without these grand medicines at any cost. The cleansing, soothing, healing virtues of this glorious remedy are felt at once in the most intractable mucous membranes. It's the grandest Throat and Lung cure in the world. Price 50c and \$1.00. At all druggists. A trial bottle free. Every bottle guaranteed.

Columbus and His Salary.

In the building known as the Lonja at Seville, Spain, are preserved the archives of the Indies—the early Spanish colonies in America—from the time of their discovery until a few years ago, writes Wm. E. Curtis in the Chicago Record-Herald. There is a mass of papers, books and correspondence which would fill a train of cars, and it is piled away upon the shelves without much order or system. A few indolent clerks are engaged in overhauling, arranging and indexing the papers, and the Society of the Americanists has been granted permission to publish any that have an important bearing upon history. Occasionally some interesting paper is discovered, copied and published in the reports of said society.

The latest discovery is the account of the payment of the crews of the caravels of Columbus upon his first voyage. The minister of finance in his report shows that there were 82 men under pay. Columbus himself, with the title of admiral, received a salary of \$320 a year. The captains of the three ships received respectively \$16, 18 and \$19 a month. The sailors received from \$2 to \$4 a month, including their subsistence and two suits of clothes a year.
