Fond du Lac Happenings.

WILL BUILD A PARK. Fond du Lac, Wis., May 1 .- [Special.] -T. F. Grover, president of the Fond du Lac Street Railway and Light Company stated yesterday that his company had decided to subscribe \$300 toward the fund for fitting up a baseball park Baseball enthusiasts look upon this a guite a liberal proposition and anticipate but little trouble in raising sufficient additional funds to construct a park and building. Those who are interested in the project state that it will require some \$600 or \$700 to build and maintain a park beside \$200 or \$700 to build and maintain a park, beside \$300 or \$400 to maintain a good team for the season. This fund, it is expected, will be raised by subscription. Tom Dobyns, the old war horse of the diamond, holds the franchise from the State League and has a number of baseball men in view for positions upon the Fond du Lac team. He is confident that with sufficient support he will be able to put a team in the field that will held its own with any organization in the State League. It now rests with Tom and with the others who are de-sirous of seeing Fond du Lac represented in the State League to come forward and do their share in providing a team and grounds. Fond du Lac is an enthusigrounds. Fond du Lae is an enthusiastic baseball town and a great interest is taken in the game by the railroad men. Although the Wisconsin Central and North-Western employes both have teams of their own, there is little doubt but that they will be willing to contribute liberally toward the fund for a team that they will be willing to contribute liberally toward the fund for a team.

CONTROVERSY IS ENDED, YOUNG GIRL MEETS DEATH

Order to Sell Bayfield Road will Stop Conflict.

CHANGES TO BE MADE.

Latest Decree Does Not Effect Contempt Proceedings Against Sheriff and District Attorney.

Madison, Wis., May 1 .- [Special.]-The controversy over the Washburn, Bayfield & Iron River Railroad, which threatened to bring on a conflict between state and federal authority, through the order of Judge Bunn in the United States circuit court directing Receiver A. C. Frost to tear up the line and sell the material and the following injunction of the state supreme court restraining him from carrying this order into execution, was practically settled late yesuerday afternoon, when Judge Bunn, at the instance of all the parties interested, issued a new decree directing the receiver to give notice, by advertisement for four weeks, of the sale of the road as an entirety, for not less than \$125,000.

This way out of the trouble was brought about by the offer of the Northern Pacific company of \$125,000 for the line. With property not included in the public sale the total price paid will, it is understood, be about \$145,000. This is nearly the amount which was expected to be realized from the sale of the rails, rolling stock and equipment under the decree directing the tearing up of the material and the following injunction

fore, and everybody is satisfied.

The decree, however, does not affect the contempt proceedings against Sheriff Lien, District Aattorney McLeod, and other citizens of Bayfield counties, who are under conviction for contempt of court for interfering with the receiver when he attempted to carry the order for the tearing up of the road into execution. They were found guilty by Judge Jenkins, sitting for Judge Bunn, and a fine of \$250 imposed on each, while the sheriff and district attorney were in addition sentenced to serve time in jail. Execution of the sentence is held in Execution of the sentence is held in abeyance pending an appeal to the court of appeals, which has not yet acted on the case. WILL ASSESS TIMBER.

West Superior Supervisor Instructs His Assistants to Tax Lumber In County.

West Superior, Wis., May 1 .- [Special.]-The county assessors will assess all of the standing timber that there is to be found in the county. The county board recently appointed an assistant supervisor of assessments in order that the timber might be estimated and assess-ments made of it, and the result is that the taxes will be felt this year more than ever before by the lumbermen and tim-ber owners of this part of the state. It is estimated that there are about 750,-000,000 feet of standing timber in the county at the present time, and this will be assessed at a valuation of \$4 per 1000 feet, making the assessment for the county on that basis of about \$3,000,000. This will materially lower the rate of taxes on the property of those not own ing timber in the county and will raisesomewhat those of the lumbermen of the

The Health Department of New York has seized a quantity of so-called cheap baking powder, which it found in that city. Attention was attracted to it by the low price at which it was being sold in the department stores. Samples were taken and the chemist of the Health department reported the stuff to be "an alum powder," which analysis showed to be composed chiefly of alum and pulverized rock.

The powder was declared to be danger ous to health, and several thousand pounds were carted to the offal dock and destroyed.

It is unsafe to experiment with these so-called "cheap" articles of food. They are sure to be made from alum, rock, or other injurious matter. In baking powders, the high class, cream of tartar brands are the most economical, because they go farther in use and are beathful beyond question.

The Alta Has the Ore

THERE IS NO DANGER that the resources of ore which the Alta mine possesses will be exhausted. For years to come there are vast unexplored regions in the Alta mine and the contiguous claims which the Alta Mines Co. owns which may hold great bonanzas. And, although at the present time the shipments of ore from the mine are taking away nearly one hundred tons of high and low grade ore every day, the work of development which at the same moment progresses discovers to the miner and the stockholders in the company half as much ore again, which becomes a further substantial asset increasing the company's collateral resources thousands of

lollars a week. On the contrary THERE IS GREAT DANGER of the exhaustion of the mount of stock which the company prein a short time the price of shares will be officially advanced to higher figures and a similar procedure recurring often during the coming spring and summer will undoubtedly advance the selling price of these shares to the vicinity of

The Alta mine is now earning dividends at the rate of about 20 per cent. upon stock sold at 30c a share. We renew our suggestion to intending investors that by buying now they will obtain stock in this company at the least price become interested in proportion to their holding in a property whose actual known assets equal several times the total value of stock which could be dis

posed of at this price. In addition to these absolutely tangible assets the Alta, as these advertisements often have recounted, owns twenty other mining claims, any one of which may prove far richer than is the Alta itself. We will gladly respond by letter or in person to any inquiries made of us re garding this great property.

If you would make an investment in stock which is SURE to earn TWENTY PER CENT. DIVIDENDS, and probably will do much better within six months, buy some shares in The Alta Mines Company, now, at 30c a share.

AMBASSADORS AT PLAY. They Beat Tambourine and Drum at

Constantinople. A few days ago there took place in the Turkish capital a great "internationai bazaar," under the patronage of the German ambassadress, in and of the "Union des Amies de la Jeune Fille." The ladies one of the embassies assisted, and it was one of the most brilliant and successful metings of the sort ever held in Constantinople. In spite of a heavy snow storm that raged all day the rooms were full both in the afternoon and evening. A few days ago there took place in the full both in the afternoon and evening. The first receipt was a donation of £100 from the Sultan, and money poured in from all directions, the total results being for them I wouldn't say a word of

about £600.

An amusing incident occurred in the evening. M. Zinovief, the Russian ambassador, having purchased a tambourine, began playing on it in the real Circassian way, upon which M. Constans, the French ambassador, discovered a drum and joined in. Unfortunately, contrary to usual expectations of Russo-French alliances, there was no harmony, and the duet only produced mirth among the visitors. The other powers did not assist, so this grand opportunity of resistance. assist, so this grand opportunity of re-newing the concert of Europe was lost. -- probably endeavored to drink the water, London Telegraph.

A new company is being formed to operate a very rich Silver and Lead mine in Mexico under a very favorable plan. We have secured a six months' working bond on same at \$50,000, with the right to sell all ores and products during the life of said bond, provided we take the property at the end of the six months' period, at which time we have to pay one-half the purchase price, or \$25,000. We have another six months in which to determine whether we want to make the final payment. We have had this property examined by the very best experts obtainable, and they pronounce it a BONANZA MINE. We have also had our men working the property for two months before we would take the bond referred to, and the development shows up wonderfully. We have taken out very high grade ore, running as high as \$500 per ton in Silver, bereferred to, and the development shows up wonderfully. We have taken out very high grade ore, running as high as \$500 per ton in Silver, besides being rich in Lead and showing good Gold values. The opinion of all of the experts is that the mine should more than pay for itself in a year. Our plan is to sell fifty shares of one thousand dollars each on the following plan, \$50.00 cash, and \$50.00 each month for five consecutive months. This will provide a fund of \$15,000, for the working of the mine for six months. If at the end of six months we find it to our interest to purchase, each stockholder will be obliged to put up \$500.00 per share to make the first payment of \$25,000, and if at the end of a very we cannot pay ourselves back all monies previously advanced or per snare to make the first payment of \$25,000, and if at the end of a year we cannot pay ourselves back all monies previously advanced, or any part thereof, by the proceeds of the mine, each shareholder will put up his or her proportionate amount towards making the final payment. Under this plan we can easily determine during the six months' period if we want to purchase. If we lose at all, it is a very small amount (\$300.00), especially on a mining deal, but WE WON'T LOSE.
