PLAN A CAMPAIGN.

Executive Committee of the Coal Mine Workers in Session

at Wilkesbarre.

Wilkesbarre, Pa., May 21.—The three executive committees of the United Mine Workers of America today began their first formal session since the great coal strike was inaugurated. This is the same body that met in Scrapton two weeks ago and decided on the suspension. The ob-ject of the meeting is to go over the entire situation and outline and adopt new plans of campaign that may be found necessary. The most important matter Gov. l'Huerre is on board the French for consideration is the proposition to call out the engineers, firemen and pump men. This is looked upon by the mine workers' officials as an extreme measure and it will be most carefully considered before the step is taken. They do not care to antagonize the mine owners any

ore than is necessary.

From a talk with several of the mitteemen it seems likely that the pro-tectors of the mines will not be called out for the present.

The committee will also consider the matter of the calling out the bituminous miners, but in the absence of the peti-

tions from two other districts necessary to make up the five that are required to call a special convention, it is believed no action will be taken. There is a rumor current which cannot be confirmed, that the railroaders at a meeting here decided to refuse to han-dle bituminous coal destined for the anthracite market, and to cause a general strike. President Mitchell said this

morning that he knew nothing about such a meeting.

Reports received here by the Associated Press from all parts of the coal field show that everything was quiet. Fist fights among idle men, which rumors are usually exaggerated into riots, are of daily occurrence, but beyond these trifling disputes nothing has occurred to stir the ommunity.

President Mitchell said this morning

that he knew nothing of the meetings of operators in New York, nor move-ments of the Civic Federation officials beyond what was published in the morng papers. committee at noon took a reces until 2 o'clock. President Mitchell, the one person authorized to talk, said there was nothing to be given out at this time, but that he promised some information at the afternoon adjournment.

Strikers. New York, May 21.—Presidents of the coal-carrying railroads in secret session have discussed plans, says the Herald, to break the strike of the miners in Pennsylvania. Every railroad operating in the anthracite fields was represented.

adjourned it was said the railroads were prepared for a protracted struggle, in which every resource will be brought to bear upon the strikers. Arbitration has been abandoned, and the mine owners intend now to force the fighting.

Instructions embodying the plans of the coal operators will be forwarded to the mine superintendents. It is believed that the companies intend to send non-union men to the mines, sufficient in union men to the mines, sufficient in numbers to operate the properties one at

a time.

According to the World, the meeting was informal, but one of those present admitted it had been agreed that under no circumstances will the National Civic Federation be permitted to act between em and the miners. If any settlement is reached, he said, it will be with a committee of miners. He declared fur-ther that J. P. Morgan will not inter-

Mitchell Conditionally Orders En gineers, Firemen and Pump-

men Out June 2.

Wilkesbarre, Pa., May 22,-Important teps toward a national coal strike and other extreme measures on the part of the anthracite miners in an effort to force the operators to grant them some cessions has been taken.

President Mitchell has been notified that the Michigan district of the United Mine Workers of America had decided to join with the three Pennsylvania districts toward making up the five dis-tricts necessary to bring about a nationconvention to discuss the calling out the miners in the bituminous fields. This is significant as giving the first in-timation that President Mitchell has been quietly at work in carrying out the general strike plan decided upon by the Hazelton convention.

The action of the Michigan district

was taken at a meeting of the executive board held at Saginaw Monday, the relest for the conference being sent to resident Mitchell by telegraph. This fact has been kept secret.

A second and equally important development was an order from President Mitchell directing all employes actually

working for the preservation of mining property to guit their posts June 2 unless by that time the operators agree to pay them for eight hours' work the same wages they are now receiving for twelve

Some of the smaller companies it is known have been training their men to be foremented. their men to be firemen and pump men, and in some collieries they have already displaced that class of workmen. It is rumored that nonunion men will be imported to take the places of the engineers, firemen and pump men.

ADOPTS THE CREED.

Only Two Votes Against Report of the Revision Committee.

New York, May 22.-The general asembly of the Presbyterian Church today adopted the report of the committee on creed revision making changes in the Confession of Faith. Rev. Dr. James Moffitt then moved the adoption of the eleven overtures to be sent to the presbyteries.

Rev. Dr. Henry C. Minton, chairman Rev. Dr. Henry C. Minton, chairman of the Revision committee, spoke for the report. He would not, he said, argue the merits of the whole report, but would speak of the especial considerations which influenced the committee. They were guided in the first place by the work of the committee of 1892. The presumption, of course, was always in favor of the explicit orders of last year's assembly. There were two elements on the committee, he explained, those who preferred to make all amendments by verbal modifications and those who wished to make the changes by separate declaratory statements. Obviously there had to be some yielding and it was not all on one side.

"The misapprehensions as to the confession," continued Dr. Minton, "have come from two causes; first, the unguarded statements in the confession itself, and, second, unwarranted inferences from the confession. In the first cases verbal changes would be the remedy. In the second, declamatory statements were

points on which the committee had been asked to pass.

"Regarding the Pope of Rome," he said, "the confession distinctly says the Pope is the anti-Christ and the son of perdition. Now, if that was true, and if we want to say it, let it stand. If not

MANITOWOC MAN MET DEATH AT MUSKEGON.

Body of Joseph Meyer Found Floating in Lake Near a Michigan City. Muskegon, Mich., May 22.-[Special.] -The body of a man found floating in Muskegon lake has been identified as that of Joseph Meyer of Manitowoc. The man was about 50 years of age and was well dressed, though there was no money in his pockets. There is some suspicion of foul play, but a more reasonable theory is that he fell off the dock. Meyer came to Muskegon but a short time ago. He carried a prayer book bearing the inscription: "Joseph Meyer, aus Bieren, Germany."

The body later was identified as that of a man who introduced himself as Joseph Meyer of Manitowoc.

Sunday to celebrate the christening of their young son, who will here-

after be known as George William. The ball at Chas. Koch's last Mon day night was a very enjoyable affair, the music by the Arion band was good and the crowd danced until four o'clock. There were one hun-

dred and twenty-five numbers sold. The Beechwood gun club met for practice last Sunday and some very fine shooting was done by William and Julius Reinke, Herman Giese, Frank Baum and Ed. Stahl. They will make some of the senior clubs go some in the near future.

Arthur, the second oldest son o Wm. J. Backhaus and wife spent Mr. and Mrs. J. F. Drescher, was seriously injured by a horse last Thursday evening at about 7 o'clock. Boys when taking girls to church He was leading the horse into the barn when the animal frightened, reared up and struck him in the face with his front feet, cutting him so three hours to sew up the wounds. It is feared that he will lose one of his eyes from the effects.

"DEAR MRS. PINKHAM: - Inflammation and ulceration of the uterus laid me low and robbed life of its joys for me. For eight years I was in frequent pain and misery, and then Lydia E. Pinkham's Vegetable Compound came to me, the greatest boon I have known, for it brought new life and health to me. I used several bottles of Compound and your Sanative Wash. My improvement was slow, but from the first bottle I felt that I was better, and so I kept up courage and continued the treatment. None of my friends ever dreamed that I would be well again, but I have now enjoyed life to its fullest extent for three years." - MRS. MAMIE HERBERT.

They tell me that a great nation of exceeding strength and of wondrous size promises some day to rise up on the other side of the water. If this should indeed come to pass, it may perhaps happen that these young Saxons or their children may have a hand in the building of it. God grant that they may never let their hearts harden to the little isle of the sea which is and must ever be the cradle of their the King and of his ministers than before the outbreak. My father shook his head sadly as he marked his dusky face and labored breathing. "How of your soul?" he asked.
"Ay!" said Solomon, "that's a cargo that we carry under our hatches, though we can't see it and had no hand in the towing of it. I've been overhauling the ailing orders here, and the ten articles f war, but I can't find that I've gone

"So we are taught," my father answered.

"I'd know it anywhere from the tatoo marks," said Solomon. "They was done when I was with Sir Christopher in the West Indies, and I'd be sorry to part with them. For myself, d'ye see, I've never borne ill-will to anyone, not even to the Dutch lubbers, though I fought three wars wi' them, and they carried off one of my spars, and be hanged to them! If I've let daylight into a few of them, d'ye see, it's all in good part and by way of duty. I've drunk my share—enough to sweeten my bilge water—but there are few that have seen me cranky in the upper rigging or refusing to answer to my helm. I never drew pay or prize money that my mate drew pay or hand, and descended into the fishing boat.
The rope that held us was cast off, the sail mounted up, and the boat shot out across the bay. Onward she went and on though the gathering gleen. n, through the gathering gloom-a gloom on, through the gathering gloom—a gloom as dark and impenetrable as the future towards which my life's bark was driving. As I gazed backward a cloud trailed off from the moon, and I say the hard lines. water—but there are few that have seen me cranky in the upper rigging or refusing to answer to my helm. I never drew pay or prize money that my mate in distress was not welcome to the half of it. As to the Polls, the less said the better. I've been a true consort to my Phoebe since she agreed to look to me for signals. Those are my papers, all clear and aboveboard. If I'm summoned aft this very night by the great Lord High Admiral of all, I ain't afeard that he'll clap me into the bilboes, for though I'm only a poor sailorman I've got His promise in this here book, and I'm not afraid of His going back from it."

My father sat with the old man for some hours, and did all that he could to comfort and assist him, for it was clear that he was sinking rapidly. When he at last left him, with his faithful wife beside him, he grasped the brown but wasted hand which lay above the clothes. from the moon, and I saw the hard lines of the brig's rigging stand out against the white cold disk. By the shrouds stood the veteran, holding to a rope with one hand, and waving the other in fare-well and appears to the same than the same transfer of the same well and encouragement. Another great cloud blurred out the light, and that lean, sinewy figure, with its long extended arm, was the last which I saw for a weary time of the dear country where I was born and bred.

Growth of German Socialism It must be borne in mind that Ger-nany is the birthplace of socialism, and that it has attained a higher develop-ment there than anywhere else. In 1877 the Socialists cast 493,000 votes at the Reichstag elections, as against the Cen-ter's 1,341,000 and against the National Liberals' 1,468,000. In 1878 and 1879, owing to Bismarch's recognition measures owing to Bismarck's repressive measures, the Socialist vote dropped to 312,000. Destruction of the Vessel.

In his interesting address in this city Monday evening Gen. Fitzhugh Lee gave Monday evening Gen. Fitzhugh Lee gave his theory regarding the destruction of the battleship Maine. After relating the circumstances of the explosion and describing the scene of fire and carnage he witnessed on visiting the locality a few minutes after the event, he said:

"My theory is that it was done by young officers who had been attached to Weyler. After the catastrophe they disappeared. Young officers of the [Spanish] army did not take the trouble to hide their pleasure over the horrible affair. ish] army did not take the trouble to hide their pleasure over the horrible affair. Many of them dropped their usual potations of red wine and opened bottles of champagne in the cafes. The government of Cuba immediately tried to forestall European opinion by sending a dispatch which stated that the explosion had been caused by the carelessness of the Americans themselves. As to that I want to say that the keys to the magazine of every American man-of-war are brought to the captain and are hung on hooks at the head of his bed so that brought to the captain and are hung on hooks at the head of his bed so that he can know where they are all the time. When the divers went to work on the Maine Capt. Sigsbee said to them: 'Go into my cabin and see if the keys to the magazine are hanging where they ought to be.' The divers came up with the keys. They had found them hanging by the side of the captain's bed. Furthermore, the investigation brought out that the plates of the fore part of the ship were bent upward, showing clearly that the plates of the fore part of the ship were bent upward, showing clearly that the force of the explosion had been directed from the bottom. The court of inquiry heard plenty of testimony which showed that there had been two explosions; one when the torpedo went off and tore its way to the ship's magazine, and the other when the magazine itself exploded with a roar."

The real cause of the destruction of the Maine is still a mystery, though there is strong reason for accepting Gen.

there is strong reason for accepting Gen. Lee's view. The report of the United States court of naval inquiry sustained the theory of an outside explosion, but said "the court has been unable to obtain any evidence fixing the responsibility for the destruction of the Maine new ty for the destruction of the Maine upon any person or persons." The solution of such mysteries comes in time, and prob-ably this one will be solved when those who are in possession of the secret think the right time has come.—Indianapolis Journal.

Blow at the Kilts

It will, perhaps, surprise enthusiastic dvocates for the retention of the kilt in advocates for the retention of the kilt in Highland regiments to learn that the kilt, as at present worn, is only a modern fancy costume, and is not of Scottish origin at all. The honor of the invention is due to two Englishmen—an army tailor who accompanied Gen. Wade's forces to Scotaccompanied Gen. Wade's forces to Scot-land in 1719, and Thomas Rawlinson, overseer of some iron works in Glen-garry's country. This is a BONANZA Mine.

The mine is located in Guerrero, the richest state, in minerals, in all the Republic of Mexico. We have worked the property in an experimental way, and though only the most primitive methods and appliances were employed, the returns have been sufficient to pay all expenses and accumulate a surplus fund. Ore running as high as \$500 a ton in silver, besides carrying rich lead values and considerable gold has been taken out and the vein grows wider as depth is gained. Every expert who has examined the property has reported favorably upon it and predicts that it will pay dividends of 100 per cent. on the par value of the

stock. It is truly a bonanza mine. The new company will have the benefit of the same management that has been conspicuously successful in handling other Mexican enterprises. Mr. A. S. Witherbee, who is financing the project, has a wide and complete knowledge of mining affairs in that country, and those who invested in other companies which he formed have had the satisfaction of receiving most

handsome returns on their investment. Ten Cents a Share on Installments.

We offer for subscription 1,000,000 shares of stock at 10 cents a share, par value \$1. This stock may be had on the following favorable terms: 500 shares, \$5 down and \$5 per month until paid for; 1000 shares, \$10 down and \$10 per month, and

other amounts in proportion. Bear in mind that in taking this stock you really become one of the organizers of the company and that you will share to the fullest degree in the profits which will be realized from the valuable mine of which we have obtained control. The small investor will in this way go into the company on the best terms possible. The mine is really one of the richest in Mexico and will pay exceptionally large dividends, which will of course mean a great rise in the value of the stock.

The subscription books are now open. Send to the undersigned \$1 as first payment on each 100 shares that you desire to subscribe for. You will be putting your money into a legitimate enterprise under honest and expert management. Order at once for the stock will not be offered at this price

A new process of a Frankfort company makes possible the production of a horse-hair of any length from cellulose or its derivatives. There was one difficulty—namely, that when the cellulose mass was pressed through an opening, so as to form a hair, the hair was very weak, when dry, and so brittle that it broke if it was attempted to tie a knot in it. The difficulty was overcome by spinning The difficulty was overcome by spinning the hair from two or more openings of suitable size at the same time. These very fine threads unite into one as soon as they leave the perforated plate, and form a single hair of the proper thick-ness, which has the necessary strength The manufacture of sugar in Italy now suffices for two-thirds of the national consumption.

The manufacture of sugar in Italy is then denitrated and dyed like armous silk. The hair shows under the micro scope that is is composed of several ly ing side by side.—London Family Documents and pliability. The nitrate of cellulose is then denitrated and dyed like artificial

A comparison has been drawn in Norway as to the profit of the fisheries in the sea and in the rivers, which shows that the former are three times as re-munerative as the latter.
