Appleton Saloonkeeper Held Up by Two Highwaymen.

Martin Cornelius Held the Money with Him, Intending to Close Real Estate Deal.

Appleton, Wis., Oct. 29.—[Special.]—Martin Cornelius, a wealthy saloonkeeper of this city, was held up and robbed of \$800 on 9 o'clock last night.

Cornelius was in Oakshok yesterday afternoon, where he intended purchasing some real estate, and this accounts for his having such a large sum of money on him at the time of the robbery.

He left the latter city about 6 o'clock and arrived at Appleton shortly before 7 o'clock. Leaving the interurban car near the downtown district, he immediately started for his home.

At the corner of Pacific and Bates streets he met two men who confronted him and asked him to throw up his hands. One of the men held Cornelius by the back while the other covered his pockets. The money, which was in a roll and consisted of bills ranging in denomination from \$10 to \$500, was carried in his inside vest pocket.

After securing the roll the robbers quietly warned Cornelius against making any outcry and then disappeared down Park side street. The matter was promptly reported to the police, but up to this morning no clue to the highwaymen had been found.

Coal Shipments. Reading, Pa., Oct. 30.—The run of coal through this city for yesterday ending at midnight was the largest since the mines of the Reading Railroad Company resumed operations. NEW MINING VENTURE. Organization of the Great Lakes Coal Company, Which is to Operate Fifteen Large Mines.

Pittsburg, Pa., Oct. 30.—Work has just been started on a most important mining venture in Western Pennsylvania. Guffey & Queen, the well known coal producers, associated with the old Carthage Steel Company, have formed the Great Lakes Coal Company, which has \$5,000,000 capital, have acquired 100,000 acres of coal lands near Brady's Bend; have begun the opening of large mines and will open five more, giving them a daily output of 100,000 tons. It is the intention of the great lakes enter aggressively into the coal trade, and has already begun preparing the road and ship it at the opening of navigation to Connetquot harbor on the coast of Ontario.

A Fishing Tournament. A fishing tournament was held at Avondale, Pa., recently. Three boats took part in it, and their anglers landed 1000 pounds of fish, few of which weighed less than 25 pounds. All 318 fish were brought in. The winning catch was 77.

INSPECTING THE MINES.

Strike Commission is Making a Tour of Anthracite Fields, DRESSED IN OVERALLS.

Make Descent Into Mine 410 Feet Deep—Bohemian Miner Killed in Adjacent Workings.

Scranton, Pa., Oct. 30.—The anthracite coal strike commissioners, who will make an inspection of the mines and the homes of the mine workers, arrived here last night. The commission headquarters are at the Hotel Jermy, where the party occupies four rooms.

Today will be spent in the country north of this city. At 9:15 a. m. the party is in Susquehanna county and is on the upper edge of the hard coal fields. The commission will make a tour of the mines and the homes of the mine workers, and will be in the country by 10 o'clock.

At Forest City the party will be lowered into one of the Erie Company's mines and is expected that the entire morning will be spent underground.

Mitchell's party will be had in Carbondale, four miles south of Forest City. A coal breaker will be visited at Carbondale, and then the return journey to Scranton will be made. The commissioners will stop at Olyphant for the purpose of visiting other collieries and to look at the homes and surroundings of the mine workers.

On Friday the commission will spend the day at the city of Scranton and view the mining schools. On Saturday the commission will go to Wilkes-Barre, where Watkins tells Anthracite Plans.

Commissioner Watkins said that the commission probably will not sit to take testimony until after the strike has been completed. It is possible, though, that a session will take place on Monday. The first hearing will be held at 10 o'clock, and will be presided over by President Mitchell of the mine workers, to which the operators will be invited to make an answer within three days. No testimony will be taken in this city this week.

The purpose of the commission, Mr. Watkins said, is to get a general view of the physical conditions of anthracite mining with the idea of giving the members of the commission unacquainted with the coal mines an opportunity of seeing what a mine is like, how the coal is worked and live, and how the product is handled.

Technicalities of Mining. Carbondale, Pa., Oct. 30.—On the run of the Lackawanna valley the commission will be at the top of the coal seam. In the car was a very large map showing the veins of coal between Scranton and the city of Philadelphia. The commissioners showed great interest in the map and asked the superintendent of the mine to explain the features of coal mining. In giving their explanations, the experts often used technical terms, which were explained to the commissioners by a local expert.

Inspect Mine 410 Feet Deep. Forest City, Pa., Oct. 30.—The commission arrived here at 11 o'clock. A small crowd, among them some mine workers, gathered to see the commission. The commission was driven three-quarters of a mile to No. 2 shaft of the Hillside Coal & Iron Company, which is operated by the Erie Railroad Company. The depth of the mine is 410 feet.

The shaft is one of the best in the upper region and is worked by the operators. The mine workers are also present to see the commission. The party left the carriages some distance from the shaft and was taken to the mine by a cable car. The mine is worked by a system of cables, and the shaft is 410 feet deep.

Two Hours Underground. It was 2:10 p. m. when the commission entered the mine. The commission was taken to the foot of the shaft and also went into the mine. The shaft is 410 feet deep, and the commission was taken to the bottom of the shaft. The shaft is worked by a system of cables, and the shaft is 410 feet deep.

MAKE THE PUBLIC PAY. Miners' Chief Has Little Confidence in Good Faith of Coal Operators.

Wilkes-Barre, Pa., Oct. 30.—The celebration of the anniversary of the coal strike was held here today. The miners' chief, James Mitchell, said that he had little confidence in the good faith of the coal operators.

Language is inadequate to express the gratitude of the miners to the commission. The miners are grateful to the commission for their interest in the coal industry.

In closing I wish to impress upon you the membership in the union is the only safeguard. The miners are grateful to the commission for their interest in the coal industry.

Seventy-Five Tons a Minute. Over 5000 Tons of Iron Ore Loaded in an Hour. All Ore Loading Records on the Great Lakes are Broken.

Iron ore was loaded yesterday at the Chicago & North-Western Docks at Ashland, Wis., at the tremendous rate of speed of 5000 tons an hour. The exact figures were 5,202 tons in one hour and eight minutes, the ore being loaded into the steamer James H. Hoyt, which is built with a special view to rapid loading and unloading.

The North-Western Line has two big ore docks at Ashland, each one of them about a mile long, and it was at the Hoyt record the load in record-breaking time. Supt. Sampson of the North-Western personally supervised the loading, and several newspaper men witnessed it and corroborated the correctness of the record. The last ore was cast into the hold, and the lines were cast off in record-breaking time, in fact, the engineer of the boat hardly found time to get the water ballast out of the vessel.

This rapid work is made possible by the exceptional facilities of the North-Western line. Large capacity cars and big docks with large capacity have made the handling of tremendous quantities of ore possible. The docks of the North-Western line at Ashland and Escanaba have a capacity exceeding that of any other line in the Lake Superior region, to which is to be added one new building, which, when completed, will increase their capacity almost 50 per cent. and be the largest ore dock on the Lakes.
