The Scottish element of the city was well represented last evening at the Presbyterian Church to celebrate the memory of the birth of Robert Burns. John Powrie gave a lecture and stereop-

Upon all these people, as well as upon others still at the hotel, Dr. Egerton pondered, and found no clue to the mystery.

A carriage was rattling over the stony roads of St. Cornely. Sheila sat within it, looking eagerly at the novel scenes around her. She was actually in Brittany, and almost at her journey's end, for now the quaintly dressed driver pointed with his whip to some gray turrets, and though his speech was in part unintelligible to her, she distinguished the words, "Chateau d'Auray."

Very long ago it seemed since she left London—a dream of trains, and boats strange faces, strange speech, strange scenery. She spoke French remarkably well. Rosamond (to whom some French story-books had recalled the language) had talked with her frequently, and the proficiency thus gained had been of inestimable value. She had reached her goal without any disagreeable experiences, and under any other circumstances she would have enjoyed herself immensely. So much has been said during the last three or four years about the outrageous way in which the railways escape taxation that a great many people now doubt whether the railways pay any taxes at all. "Fifty pounds," the man replied, and to his intense amazement and joy Mr. Carnegie there and then wrote him out a check for that amount. Going indoors, he told his wife the news.

The cottager journeyed up to the castle and was shown into Mr. Carnegie's study. He explained that he had been wrong about the cost, saying it would be £25 more. "After my first baby was born I did not seem to regain my strength although the doctor gave me a tonic which he considered very superior, but instead of getting better I grew weaker every day. My husband insisted that I take Wine of Cardul for a week and see what it would do for me. I did take the medicine and was very grateful to find my strength and health slowly returning. In two weeks I was out of bed and in a month I was able to take up my usual duties. I am very enthusiastic in its praise." Wine of Cardui reinforces the organs

An important development of the fruit industry is reported by the state commissioner which is destined to be of great financial help to the fruit growers of the state. The famous Blalock fruit farm of Walla Walla county has demonstrated the profitableness of making a highly salable jelly from the cull of apples. This season Manager McArthur imported a newly-invented machine which does all the work automatically. Apples fed in at work automatically. Apples fed in at one end come out at the other in three minutes by the watch as perfect jelly, and this without the use of any sugar at all. The jelly is all sold ahead at 10 cents a pound. It takes seven pounds of apples to make one pound of jelly, and the machine is making 2000 pounds of the stuff each day, and therefore is using 14 000 pounds of apples.
