BOMB FOR KING ALFONSO.

Dynamite Plot in Madrid Discovered in Time,

FOUND IN THE PALACE.

Enough Explosive to Destroy the Entire Building-Secret Service Is

Investigating.

Madrid, Jan. 28.-What is believed to have been an attempt to destroy the palace, and incidentally the King and leading members of the nobility, came to light when a soldier found a dynamite bomb in an obscure corner of the palace square. He was passing along by the side of the structure when he noticed the bomb, which had apparently been secreted un-

He at once notified the major commanding the guard, who hurried to the scene and gingerly conveyed the explosive to the guard house. There the bomb was examined and found to contain enough of the explosive to have wrecked the palace.

Strict orders were at once issued to secret service to find out how the bomb came where it was found and all concerned were notified to say nothing about the discovery.
It is not known what has been learned this attempt to destroy the palace that

concocted the scheme to have the King shot while hunting some months ago and around the attempt, some of the minis-ters going so far as to say that the game-keeper was accidentally shot, and declarthe King's life, even after a number of arrests had been made.

Annapolis, Md., Jan. 28.—The Demo-cratic legislators of Maryland held a caucus last night in an endeavor to agree on the contest for the United States senatorship. The Democratic can-didates for the office to succeed Senator John Walter Smith, Isidor Raynor and Bernard Carter of Baltimore, former Gov. Elihu E. Jackson and Joshua W. Miles. Each of the candidates has been "holding his own" since the balloting began ten days ago. Several unavailing efforts have been made to induce the members representing various factions to coalesce, but the action of the caucus indicates that the deadlock will be continued indefinitely.

Profitable Rings. At Shrewsbury, yesterday, a boy named Sidney Watkins was charged with stealing two gold wedding rings, the property of his employer, John Kent, pawnbroker. Mary Watkins, the mother of the boy, was charged with aiding and abetting. The evidence revealed a prolonged and daring fraud. During the stocktaking it was recently discovered that in a large number of instances where wedding rings appeared to have been pledged the rings were not in stock, and there was no trace of redemption. Suspicion eventually pointed to the boy, Suspicion eventually pointed to the boy, whereupon his mother went to the police and made a remarkable confession. She stated that, having several children to keep, she induced her son Sidney to steal two rings, which she had pawned with his employer. The rings were then repledged and restolen by the boy, time after time. Investigation showed that the same two rings had been pledged and stolen no less than eighty-three times during the present year, the amounts repeatedly received on each ring varying from 10s to £1. The boy was dealt with under the first offenders act, but Mrs. Watkins was sentenced to three months' Watkins was sentenced to three months' imprisonment, with hard labor. Take a Look at the Wind. Take a Look at the Wind.

Ever take a look at the wind? Can't see it, you say? Yes, you can. Some day when a gale is blowing and the atmosphere is cold, go out in your yard, taking a nice, bright handsaw. If the wind is blowing from the north hold the saw with its ends pointing, one to the east, the other to the west. Take the saw as if you were going to cut the air upward and let the teeth, which are on top, tilt it over till the flat part of the saw is on an angle of 45 degrees with the herizon.

Then if you look along the teeth of the saw you can see the wind pour over the teeth as plainly as the water over a waterfall.—Wilkesbarre (Pa.) Leader.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Game Promises Extinction of Other Card Stroudsburg, Pa., has gone crazy over the game of flinch. The game has become popular with the old as well as with the young, and progressive euchreparties, duplicate whist, and women's clubs are in danger of total eclipse.

The young people of the local Methodist church are enthusiastic over flinch and much of the popularity which the game has received is due to their efforts. The older members of the church give it a quiet indorsement, for it promises to wipe out contests with playing cards, to which the church is on record as being opposed.

as being opposed.

Society people are much concerned over the popularity of flinch. They are not in sympathy with those who would like to substitute it for whist and euchre and predict a short career for the new

game.

These pessimists see breakers ahead, claiming that in a short time plain flinch will give way to progressive flinch for prizes. It is then they expect to see the church indorsement taken away and its popularity gone.

The strongest advocates of flinch are married women, who make the startling announcement that it keeps their husbands at home in the evenings.

Ireland's Lost Population. Ireland is a country which still loses thousands of its natural increase of population by emigration, in which more boys are born than girls, and the most fatal are born than girls, and the most fatal epidemic is influenza.

The population of Ireland in 1902, according to the registrar general's return, was 4,482,274. The marriages, numbering 22,949, and the births, 101,863, show a slight increase on the average of ten years. The deaths, 77,676, were a trifle below the average. The excess of births over deaths being 24,187, and the loss by emigration amounting to 40,190, there was a decrease in the population during the year of 16,003, less whatever immigration there was, of which no record is kept.—London Mail.

DR. FED HIMSELF,

Found the Food that Saved His Life. A good old family physician with a lifetime experience in saving people finally found himself sick unto death. Medicines failed and-but let bim tell his own story: "For the first time in my life of 61 years I am impelled to publicly testify to the value of a largely advertised article and I certainly would not pen these lines except that, what seems to me a direct act of Providence, saved my life and I am impressed that it is a bounden duty to make it known.

"For 3 years I kept failing with stomach and liver disorders until I was reduced 70 lbs. from my normal weight. When I got too low to treat myself, 3 of my associate physicians advised me to 'put my house in order,' for I would be quickly going the way of all mankind. Just about that time I was put on a diet of Grape-Nuts predigested food. Curiously enough it quickly began to build me up, appetite returned, and in 15 days I gained 6 lbs. That started my return to health and really saved my life. "A physician is naturally prejudiced

against writing such a letter, but in this case I am willing to declare it from the housetops that the multiplied thousands who are now suffering as I did can find relief and health as easily and promptly by Grape-Nuts. If they only knew what to do. Sincerely and fraternally yours." Name of this prominent physician furnished by Postum Co., Battle Creek, Mich. Look in each package for a copy of

"This legal training at Annapolis stood Admiral Dewey in good stead at Manila, and when the adequate biography of the conqueror of Montojo shall be written, a prominent place will be given to his knowledge of the law. His skillful his knowledge of the law. His skillful treatment of the rather strained relations with the German commander exhibits the highest knowledge of the law governing such cases, and in all the long months of waiting, after the fall of Manila, when he was constantly beset with vexatious problems, he showed a knowledge of in-ternational law that would be remarkable in a man who devoted his whole time and in a man who devoted his whole time and energy to the study of that one branch.

"Lawyers have just as much of a right to be proud of Dewey for his legal achievements as naval officers have for his victory over the ships of Spain."—

How to Grow Ugly. The natives of the Upper Zambesi have a most disfiguring habit of removing the upper front teeth at the ages of from 10 to 12 years. The only reason for following such an absurd and barfor following such an absurd and bar-barous practice is that by so doing they imitate their oxen, which they look upon as sacred, and also are unlike the zebra, or quagga, which they view in a less favorable light, hating them with an in-tensity based on some hereditary tradi-tion. The women pierce their upper lip to insert a stud or a small piece of ivory, which, as they grow older, is increased to insert a stud or a small piece of ivory, which, as they grow older, is increased in size. They smear their hair with ochre and clay, training it out in numerous pigtails about two inches long. These are encouraged and lubricated by the fat of oxen, which is especially favored if rancid—in fact, they lose no conceivable opportunity of making themselves grotesque and hideous as possible.—Golden Penny. gain," he said, when the first greetings

The Bacillus of Dysentery.

Some years ago Shiga, a great Jap-anese doctor, proved that there was a bacillus of dysentery, and that that dis-ease could be cured by the administering of a serum in the same manner as ty-phoid. A year ago Drs. Duval and Bas-sett, while working at the etiology of cholera infantum, reported that they had found in forty-two cases of the summer diarrhoea of infants in the city of Baltimore the bacillus of Shiga. This bacillus, known as the cause of tropical dysentery, had been thought not to exist in the United States.—Current Literature.

TO KEEP NEGRO BABY WHITE. South Bend Physician Will Experiment on Child with Red Light.

South Bend, Ind., Jan. 28.—Because of an experiment of Dr. J. W. Hill, who seeks to prevent an infant born of negro parents from reverting back to the old type of the colored race, the attention of the scientific world is expected to be fixed on South Pend during the next few months. A colored woman has consented to act as the patient, and she will enter the benefited as consented to act as the patient, and she will enter the benefited as consented to act as the patient, and she will enter the benefited as consented to act as the patient. the hospital as soon as the rooms are made ready.

By preventing pigmentation, Dr. Hill believes the child of colored parents, which is generally born white, turning darker under the sun's rays, will become whiter than the Caucasian race.

For this reason red light as actime rays will be employed in making the experiments. A room in a hospital will be provided which will be completely furnished in red walls, ceiling, flooring and furniture. Attorney Clare stated in court that he had been misled into the belief that Tilbury had received certain letters from Mrs. Thurston of an incriminating character. Owing to Tilbury's in inating character. Owing to Tilbury's in ability to produce these letters he had decided to withdraw from the case.

A Bull \$10,000 Wen't Buy.

What is now pretty generally conceded by stockmen to be the best Shorthorn bull in the world is the property of a Missourian. He is Hampton's Best, owned by Charles D. Bellows of Maryville. Hampton's Best is a son of Merry Hampton, the great Shorthorn bull that sold once for \$10,000, and a grandson of William Orange and Field Marshal, the two best bulls of their day in Scotland. Field Marshal belonged to Queen Victoria, and was the favorite bull of her herd. Hampton's Best won prizes at the American Royal Cattle show in Kansas City, both as a caif and as a yearling. The show season this year, however, was his period of triumph, for his calves won more coveted prizes at the American Royal show in Kansas City, at the International Live Stock show in Chicago and at leading cattle exhibitions in other places than any other Shorthorn bull living. Mr. Bellows' winnings on five of his calves at Chicago and Kansas City alone amounted to \$775. Stockmen estimate that Merry Hampton, in view of the number of great prize winning calves be bas got, is worth at least \$10,000. the number of great prize winning calves he has got, is worth at least \$10,000, but Mr. Bellows, who is a young breeder of unlimited ambition, refuses to put any price whatever on him.—Kansas City

Most animals are afraid of fire, and

will fly from it in terror. To others there is a fascination about a flame, and they will walk into it even though tor-tured by the heat. A horse in a burning stable goes mad with fear, but a dog is as cool in a fire as at any time. He keeps his nose down to the floor, where the air is purest, and sets himself calmily to finding his way out. Cats in fires howl piteously. They hide their faces from the light and crouch in corners. When their rescuer lifts them they are, as a rule, quite docile and subdued, never hiting or scratching. Birds seem to be stable goes mad with fear, but a dog as a rule, quite docile and subdued, never biting or scratching. Birds seem to be hypnotized by fire and keep perfectly still; even the loquacious parrot in a fire has nothing to say. Sows, like dogs, do not show alarm. They are easy to lead forth, and often find their way out themselves. Evaluate
