Regarding the identity of the assassin and the cause of the crime, by some it is said the act was that of a Finn and by others that the murderer was a partisan of the zemstos, the curtailment of whose powers is attributed to the dead minister. Nothing however, has been definitely established as yet.

Whatever may have been the motive for the crime, nothing but the utmost in.

for the crime, nothing but the utmost in-dignation and condemnation of the as-sassin's act is voiced everywhere.

Viewed by Coroner.

Guarded by police the body remained in the street until the arrival of the official corresponding with an American coroner, even in the case of the most mational anarchist movement with which Gerschunin, the Russian revolutionary agitator, who was arrested at Kief in June, 1903, was connected.

Gerschunin, it is asserted, was the organizer of the murder of M. Bogoliepoff, formerly Russian minister of public instruction, and of M. Siplaguine, who was minister of the interior before M. von Plehve.

St. Petersburg, July 28.—It has been established by the police that the assassin is not a Jew as at first reported.

St. Petersburg, July 28.—10:55 a. m.—Minister of the Interior Von Plehve was assassinated this morning while driving to find the real from the case of the most powerful minister of the empire the law requiring that this formality had to be observed before the remains could be removed. After this official had viewed the body it was placed in a carriage, covered by a robe and was driven slowly to a little chapel adjoining the railroad station and then to the deceased's magnificent town residence, adjoining the ministry of the interior. The carriage, surrounded by mounted gendarmes, passed through the crowded streets, the side-walks being a solid mass of people. Even the cross streets were black with spectators for blocks. As if by magic every-body in the city sceemed to have suddenly become aware that a frightful catastrophe had occurred and to have hurried to the scene. As the carriage passed all leads were uncovered.

Coachman Also Killed.

The coachman was killed and the wounded and maddened horses dashed wildly away with the front wheels of the carriage, the only portion of the vehicle remaining intact, Immediately there ensued a scene of the wildest confusion. Police and gendarmes hurried up from every direction and vast crowds gathered about the spot where the mangled body almost to atoms, severing his head and every direction and vast crowds gathered about the spot where the mangled body of the minister lay, weltering in his blood.

Officially Announced.

Von Plehwe's assassination was officially announced at about 1 o'clock and was followed immediately by the issuance of extra editions of the papers. Although they contained only four lines referring to the tragedy, the newsboys situation is illustrated by the fact that they called water and the packers in meeting the second of the packers and to retail stores. The packers were afraid a teamster's strike would prevent its removal. The preparedness that the packers were afraid at teamster's strike would prevent its removal. Where the Crime Occurred.

The tragedy occurred on the Zalalkon-ski prospect, a broad thoroughfare leading up to the Warsaw depot, whence the road turns sharply to the left toward the Baltic railway station. The exact spot at which the outrage occurred is just before the bridge spanning the circular canal, on the other side of which both strong are situated.

The tragedy occurred to the tragedy, the newsboys were fairly mobbed by the crowds in the streets, so eager were all for details of the crime. Intense excitement reigned everywhere. Only the assassination of the emperor could have created more of a sensation, as next to his majesty himself the crime is illustrated by the fact that heavy sales were made under practically a guarantee that a tie-up would follow, the trade buying at the advice of representatives of the packers. In some instances the purchases were conditioned upon such an event.

It is reported that six men are implicated and that five of them fled into a little hotel adjoining the scene of the assassination, the only one who was wounded having been captured. The hotel was surrounded by the police and all its inmates were arrested.

The "ohs" could have been heard a rod away as the party threw up their hands. "Well, boys, you just wait and see. I'll send him to you directly I reach home," was Mr. Humphrey's comment. The conversation changed, none giving weight to Mr. Humphrey's statement beyond classing it with the mosquito exaggerations.

Yesterday morning Berry Brothers were called up on the telephone from the "Consolidated's" freight office and notified that a refrigerator car awaited their convenience. The morning's mail was opened at the moment and among the letters was one from Mr. Humphrey saying that he had shipped a "half-grown specimen of such turtles as we catch off our docks." Mr. Humphrey had chartered a special car for the turtle, and the big fellow was its only occupant.

Proved Beyond a Doubt.

Middlesex, N. Y., July 25 .- (Special.) -That Rheumatism can be cured has been proved beyond a doubt by Mrs. Betsey A. Clawson, well known here. That Mrs. Clawson had Rheumatism and had it bad, all her acquaintances know. They also know she is now cured. Dodd's Kidney Pills did it. Mrs. Clawson tells the story of her cure as

"I was an invalid for most five years caused by Inflammatory Rheumatism. helpless two-thirds of the time. The first year I could not do as much as a baby could do: then I rallied a little bit and then a relapse. Then a year ago the gout set in my hands and feet. I suffered untold agony and in August, 1903, when my husband died I could

not ride to the grave. "I only took two boxes of Dodd's Kidney Pills and in two weeks I could wait on myself and saw my own wood. I dug my own potatoes and gathered my own garden last fall. Dodd's Kiduey Pills cured me."

Rheumatism is caused by uric acid in the blood. Dodd's Kidney Pills put the Kidneys in shape to take all the uric acid out of the blood.

He sprang from heaven knows where, and why they allowed him to slip into that position I cannot think. It was madness—nothing less!"

The man he called Scott smiled as he took a pull at his drink.

The detective threw the end of his drink.

Mining Strikes in England. In some parts of England peculiar vhistling or yelping noises are heard in the air after dusk and early in the moruing before daylight during the winter

months. Sometimes, however, the noise is described as beautiful sounds like music high up in the air, which gradually die away. The general belief is that the "seven whistlers," as they are called, are the foretellers of bad luck, disaster or death to some one in the locality. It is death to some one in the locality. It is a very ancient suggestion. Both swifts and plovers have been suggested as the whistlers. It may be noted that plovers are traditionally supposed to contain the souls of those who assisted at the cruci-fixion and in consequence, were degreed to souls of those who assisted at the crucifixion and in consequence were doomed to
float in the air forever. Really the
"whistlers" are widgeon, or teal, as they
flit from their feeding grounds, a passage
always made under cover of darkness. In
Shropshire the sound is described as resembling that of many larks singing, and
the folklore of both Shropshire and
Worcestershire says: "They are seven
birds, and the six fly about continually
together looking for the seventh, and
when they find him, the world will come
to an end." Be sure to visit the Pike. The chances are you will return to the Pike

an end. to an end.'
Everywhere, without exception, the "seven whistlers" are believed to presage ill, but the superstition seems to be more particularly a miners' notion. If they hear the warning reject the particularly a miners' notion. If they hear the warning voice of the "seven "whistlers," birds sent, as they say, by Providence to warn them of an impending danger, not a man will descend into the pit until the following day. For example, in September, 1874, the following paragraph went the round of the papers: "On Monday morning large numbers of the miners employed at the Bedworth collieries, in North Warwickshire, giving way to a superstition which has long prevailed among their class, refused to descend into the pits in which they are employed. During Sunday night it was stated that the seven whistlers had been distinctly heard in the neighborhood of Dedworth, and the result was that on the following morning in the heighborhood of Browerth, and the result was that on the following morning many of the men positively refused to descend into the pits."
