BORKHAUSER NOT GUILTY.

Woes of the Wealthy Worse than Poverty

When you are inclined to envy the rich, remember that John D. Rockefeller, multi-millionaire, one of the very wealthiest men the world has ever known, has troubles for which all his doctors pronounce incurable. Instead of being permitted to enjoy life to its full, to eat what he likes without distress, to partake of tempting viands and the delicious dainties of the epicure and the gourmet, Mr. Rockefeller is obliged to subsist on a diet of tepid milk and lime water, such as you would feed to a colicky baby. Is it much wonder that he offers a million dollars of his many millions for a new stomach that shall perform its duties without distress and

danger?
If Mr. Rockefeller would spend fifty cents for Camp's Curative Remedy, he might secure the relief he seeks, promptly and permanently. But the price is too small in the millionaire's eyes. He would spend a million, but would hesitate to spend half a dollar. Thus the price of wealth, in his case, is perpetual suffering, while those of us possessed of less money and greater perspicacity profit by the truth and take the road to health that thousands have traveled before us.

There is no question about the efficacy of Camp's Curative Remedy in all cases of stomach and digestive disorders. It is guaranteed to cure, and in any case offailure to do so the purchaser's money will be promptly refunded. All druggists sell it, giving you your choice of powder or tablet form at the low prices of 25 and 50 cents. Under such liberal terms and at such a small price, the man, woman or child who continues to suffer with any illness of the stomach has only himself to blame.

COCOANUT BUTTER. A Table Compound to Be Made of This

Vegetable Oil. A new butter is now being made from the milk of the coconnut. This milk, when subjected to a temperature of over 28 C., runs into a yellow oil, which is imported in great quantities from India and Africa. The better qualities of it are obtained from Ceylon, Cochin-China and Australia. The nut produces 60 per cent. of oil, and one acre of land planted with coconnut trees would produce over with cocoanut trees would produce over 00 pounds of oil. This has hitherto been used for fats for soap or for machinery oil and the better qualities employed in he manufacture of textile goods.

Dr. Henner, a German chemist, proposes to buy up all the cocoanut oils and transform them into what he terms "vezetable butter."

The cocoanut butter, like that made from cows milk, contains 7 per cent. of soluble acids. It will keep from fifteen to twenty days without showing any sign of acid reaction, and it contains from twenty-five to thirty times less water than ordinary butter, while its slowness in oxidizing makes it specially suitable for pastry and cakes, as they will not get stale so quickly when made with it as with other butter.

Another advantage claimed for cocoanut butter is that it seems to be an antiseptic medium, while milk is most favorable to the culture of microbes.
