A Million Dollars For a New Stomach is His Offer-Riches Cannot Always Buy Health

Wees of the Wealthy Worse than Poverty

When you are inclined to envy the rich, remember that John D. Rockefeller, multi-millionaire, one of the very wealthiest men the world has ever known, has troubles for which all his wealth cannot compensate. Mr. Rockefeller has a diseased stomach that the doctors prenounce incurable. doctors pronounce incurable. Instead of being permitted to enjoy life to its full, to eat what he likes without distress, to partake of tempting viands and the delicious dainties of the epicure and the gourmet, Mr. Rockefeller is obliged to subsist on a diet of tepid milk and lime water, such as you would feed to a colicky baby. Is it much wonder that he offers a million dollars of his many millions for a new stomach that shall

perform its duties without distress and danger? If Mr. Rockefeller would spend fifty cents for Camp's Curative Remedy, he might secure the relief he seeks, promptly and permanently. But the price is too small in the millionaire's eyes. He would spend a million, but would hesitate to spend half a dollar. Thus the price of wealth, in his case, is perpetual suffering, while those of us possessed of less money and greater possessed of less money and greater boat to sink her and I have advocated boat to sink her and I have advocated July 11. possessed of less money and greater perspicacity profit by the truth and take the road to health that thousands have traveled before us.

SUMMER BOWEL TROUBLE

Indigestion, Diseased Stomach, Impure Blood, Sores, Pimples and Bad

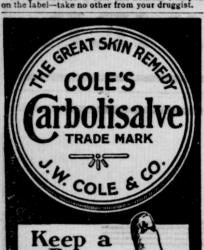

### CONSTIPATION

Poison in the intestines—Dysentery, Cholera and terrible griping pains are symptoms of typhoid fever and decaying intestines which are the result of Constipation. A Constipated person is liable to Heat Prostration or Sun Stroke. A physic won't cure Constipation, you know this from experience. Your intestines and digestive organs are practically dead or you would not be Constipated. Unless they are revived and strengthened serious Diseases of the Blood must follow, as no one can live and have health with decayed Stomach and Bowels. Physics don't revive or build up—they drain and weaken. Mull's Graph Toxic is a tissue builder, a food especially prepared for the intestines. We will prove to you at our own expense that it cures Constipation and Bowel Trouble because it revives the intestines, cleanses the system, heals the stomach and renews the blood. Until it was introduced in this country there was no cure for Constipation. A wonderful Tonic, a protection against hot weather dangers. WRITE FOR THIS FREE BOTTLE TODAY

"He walked home with me once; and, then, only because I couldn't prevent it," Muriel hotly retorted. "He has no right to say I encouraged him!"

Close to the President.

Elihu Root, who has been appointed secretary of state to succeed the late John Hay, has been a close friend and adviser of President Roosevelt for many years. This was prominently shown during Mr. Root's incumbency of the head of the war department. Mr. Root was also prominent during President McKinley's time in this capacity. In politics he has for years been one of the leading factors of his party.

Mr. Root was born in Clinton, N. Y., February 15, 1845. He graduated from Hamilton college in 1864, where his father, Oren Root, was for many years professor of mathematics. Profits of the Packers. There has been a great deal of dis appointment because the Garfield report shows that the profits of the packing industry only amount to about two per cent on the volume of business transacted. There is no doubt, however, that the report is cor-

rect.
The census reports compiled by the government in 1900, before the agita-tion regarding the "beef trust" began, throw considerable light on this question. It appears from the census that the packing industry is conducted on a smaller margin of gross profit than any other industry in America. The gross margin of profit of 871 flour and grist mills in Illinois, in the census year, was nearly seven per cent on the volume of business. The gross margin charge of stealing a pearl necklace worth of fifty-one wholesale slaughtering and meat packing establishments in Illinois was only about one-third as large,

or a little more than two per cent on the volume of business. The millers have not been accused of being in a "trust," and combina-tions would seem impossible in a business where there are several thousand mills in the United States competing actively for the flour trade, but it appears that the gross profits of the millers are larger than the gross profits of the packers. It may turn out that the agitation regarding the packing indus-try will show the same result as the devil found in shearing the pig: "All

squeal and no wool." Exact Hour of Death Decides. The result of a contest for \$2,500,000 which was begun in the New York supreme court the other day depends upon the determination of the exact time of the death of Wallace Green and his wife. Senator Deboe of Kentucky tells an interesting story concerning a school teacher in his state who was also a preacher. He loved horses and dogs and he was the owner of a trotter with a good record for speed. One Friday afternoon before dismissing the school he addressed the boys thus:

"Now, boys, I suppose you all know that there will be some horse racing tomorrow. Now, don't you go to the races. The race track is no place for boys. But, boys, if you go to the races. The race track is no place for boys. But, boys, if you go to the races don't do any betting. It is not right to wager money on horses. But, boys, if you do go and if you do bet, mind what I tell you—bet on Deacon Abernathy's mare. This is a straight tip."

And the mare won, too. She was the old preacher-school teacher's thoroughbred under another name.—Kansas City Ster.
