comic operas, has a representative now in the city presenting a plan. A prominent New York manager who controls theaters in that city, Michigan and Indiana has had a representative here for some time figuring with business men, and P. B. Haber and Harry Potter, owners of the Crescent are making an active canvass for the support in the construction of a new building on the site of the old structure.

Mr. Whitney is expected here Wednesday or Thursday. His plan is for the sale of \$10,000 worth of tickets for the first night performance. With Cambria, Wis., July 27.-[Special.]-With a loud crash, the city gas house blew up last night. The damage is probably over \$5500. Supt. R. O. Williams was blown out of the door of his office and slightly burned.

Exactly how the accident happened is for the sale of \$10,000 worth of tickets for the first night performance. With the groney secured he would buy the site and erect a house similar to the one at Appleton. The New York man has been talking with a well known and wealthy citizen who has an excellent site off Main street, and in the neighbor hood of Macy street. He is interested in the Dick syndicate. He also has his eyes on several other neighboring cities. not known. It is supposed, however, that the feed tank exploded from some cause. building was torn away by the force of the crash.

Then flames filled the whole building. Grave fears of an immediate and more severe explosion did not prevent an employe from turning in an alarm, calling the fire department, which fought until 9:30 o'clock before the flames could be put out. The explosion took place at 8:45 o'clock.

As a result of the accident, which is now being looked into more closely to ascertain the exact cause, the streets were left in darkness and in many houses the owners resorted to candles and other methods of lighting.

Supt. Williams' injuries today are shown not to be critical. He was hurled a considerable distance by the force of the explosion. Charles Fundy, who was taken back to Peru, Ind., on the charge of horse stealing, says he is innocent, and that the arrest is a case of mistaken identity. He got quite confidential with Sergt. Stevenson of the police station and declared he has never been in the Hoosier state, and has never stolen a horse in his life. He retained Attorney J. G. Hardgrove and there was some talk of fighting extradition, but the prisoner finally consented to go. He will demand a trial in Peru.

L. Busch of Seattle, Wash., who has arrived to help the police to make an investigation.

A brother of the missing man, she says, is secretary to the English ambassador in Paris, and married a near relative of Paderewski. A sister is a sculptor in England. Von Task had no relatives in this country.

The reward of \$225 offered by the Miami (Ind.) Horse Thief Detective association for the capture of Charles Fundy, has been received by the police department and will be divided between Chief Nolan and Desk Sergeant William Stayenson, whose clear work brought tives in this country.

It is difficult to find out what interest Mrs. Busch has. She says von Task was a roomer at her house while she lived in Marinette.

Soon afterward the patient went to Ireland, and in spite of a rough journey and the fact that he had been always liable to violent seasickness he was not on that occasion seasick. The medical man attributed his exemption from the dreaded malady to wearing the glasses. "The motion of the sea," says Mr. Pronger, "was not by itself sufficient to upset him, the additional influence of that slight error of refraction having been removed." The same subject was also a great sufferer from train nese and Russian peace envoys at Ovster Bay on August 5. Vladivostok the Price. Should this information prove correct, it will entirely change the view which has prevailed in official circles that the question of Vladivostok's neutralization could not reasonably be made a part of Japan's peace price. It is pointed out that while the war has demonstrated that Port Arthur was a military blunder, nevertheless this great fortification constitutes a tremendous political influence in the far eastern question and its abandonment as a stronghold is a concession of such magnitude that it is not felt Russia can refuse to meet it.

On the other hand, Japan's sacrifice would not be as great as seems at first glance, because her fortification of the Straits of Korea would offset the loss of Port Arthur as a strategic point. It is believed here that the expection of Vladivostok's neutralization could not reasonably be made a part of Japan's peace price. It is pointed out that while the war has demonstrated that the combined areas of all the Western States.

Military officials here attach importance to the episode only in connection with the Sakhalin campaign, and say that as the landing was effected where the Straits of Tartary, between Sakhalin and the mainland, are narrowest, it apparently is part of the strategy of the Japanese to prevent the escape of the Russian garrison in Sakhalin across the straits. They add that the landing is too far north to have any bearing on the main campaign or on operations against main campaign or on operations against

Battle Raging on the Tumen. London, July 27.—The correspondent of the Telegraph at Tokio sends a report received from Osaka, Japan, to the ef-fect that a Japanese army of many thousand men is attacking the Russian posi-tion on the Tumen river.

Important, Says London. The Japanese landing at Dekastries, the terminus of the only cable line con-necting the mainland with the island of Sakhalin, is regarded by the London morning newspapers as an attempt to seize the mouth of the Amur river, in order to enable the Japanese to dispatch an army up that great waterway for the purpose of threatening the Russian communications. Japanese gunboats and torpedo boats could thus reach Harbin and give effectual assistance to any attack on the Russian fortifications.

Send Expedition Up the River. Both the Ussuri and Sungari rivers are Both the Ussuri and Sungari rivers are navigable for vessels of light draft, and thus the Japanese could advance inland in three different directions for a considerable distance. If, as supposed, Japan has a river expedition in readiness, the mere threat of its existence may suffice to change the plans of the Russians and compel their retirement from the Kirin and Fenghwa districts upon Harbin.

Washington, D. C., July 27 .- Some doubt is expressed in official circles whether it will be possible to obtain China's consent to another treaty with the United States providing for even the exclusion of Chinese laborers from this country. The state department is aware of ill feeling throughout China on the whole subject and now that the immia province a year later, and navigation of the Red river improved, the attention of settlers to a limited extent was drawn that way; but it remained for the approach of the railway ten years later to ed in the country under government con-China's position appears to be that the exclusion of Chinese citizens from a friendly country is in itself a disgrace, and while she cannot ignore the laws of a foreign power providing for such ex-clusion, she can refuse to sanction it or become part of it by concluding a treaty to build structures for the care of milk become part of it by concluding a treaty involving such restrictions. A year ago, it is said, it would have been easy to conduct negotiations with China for the exclusion of Chinese laborers only. Now, however, it is understood, the Chinese officials are disposed to regard the signing of such a treaty beneath the dignity of their government.

The reason for the assumption at Pekin of this new attitude is not quite clear to the officials here, though in some circles it is attributed to the influence of foreign powers. As cattle double every third year, are

BIG LOSS TO UNITED STATES. Chinese Boycott Means Missing of \$20,-

000,000 Worth of Trade. San Francisco, Cal., July 27.-Local

San Francisco, Cal., July 27.—Local merchants interested in trade with China have been rather anxious over a rumor afloat that the Chinese boycott against American goods had gone into effect and that all the big milling and flour companies had received stop orders from their agents in the Orient, and that existing contracts had been cancelled.

China buys about \$220,000,000 worth of foreign goods annually. Of this amount, about \$20,000,000 comes from the United States, of which about \$4,000,000 comes from San Francisco. Of the latter amount, nearly one-third is flour, about 500,000 barrels being exported.
