Want Indemnity of \$1,000,000,000 and Russia Is Willing to Pay and Also Quit Manchuria.

St. Petersburg, Aug. 10.-Dispatches received here from Portsmouth, N. H., indicate that Minister Pokotiloff's arrival has resulted in an important modification in Mr. Witte's views. Mr. Witte is now willing to make terms with Japan conditioned on the surrender of the Chinese Eastern railway between Harbin and Port Arthur, and to satisfy the financial demands of Japan, if reasonable, provided Russia is permitted to

Portsmouth, N. H., Aug. 10.—The Japanese have handed the Russians the conditions of peace in writing.

Navy Yard, Portsmouth, N. H., Aug. 10.—The morning conference of the peace envoys ended at 12:45 o'clock, when the envoys adjourned and immediately repaired to the lunch rooms in the naval stores building. These rooms are directly across the corridor from the conference rooms. The next meeting, according to the schedule of busiarranged yesterday, is to begin at

Vladivostok also will be demanded. The indemnity, Mr. Takasugi said, might be reduced if peace can be brought about in no other way.

Mr. Takasugi said: "The Portsmouth conference will end in a treaty of peace."

Note to Japanese. Portsmouth, N. H., Aug. 10.—Immediately after the plenipotentiaries and their secretaries gathered in the conference room and exchanged complimentary words, partly in Japanese, Mr. Witte produced a diplomatic note addressed to the Japanese plenipotentiaries in connect the Japanese plenipotentiaries in conne tion with their failure to present their credentials at yesterday's meeting.

Russia Takes Exception. Russia Takes Exception.

It was the understanding of the Russian envoys that Baron Komura would decline to even open negotiations of the most informal character unless he had assured himself of the validity of the full powers of Mr. Witte. Historical precedents are quoted in the note to show the irregularity of yesterday's proceedings. The purpose of the Russian note was to make the permanent record complete and make it show clearly the attitude of the plenipotentiaries from the beginning of the conference.

The following official statement was made by Mr. Korostevetz, on behalf of the Russian plenipotentiaries after the meeting this morning:

"In the meeting of August 10 the question of full powers has been regulated so that there will be no more difficulties on that subject. After this the

# WIFE SLAYER'S LIFE SAVED

### Portage Man Jumps Into Canal After She Is Killed.

GIVES UP AND CONFESSES

Says Was Untrue, to a Lonely

Portage, Wis., Aug. 10.-[Special.]-Carl Boeck, aged 22 years, after killing his wife, according to his confession to the police, with a large knife he had been using while employed as a butcher, and after leaping into the canal here from which he was rescued by passersby, gave himself up at the jail last

Neighbors Say They Quarreled.

Boeck and his wife, who was only 19 years old, had been married three years, it is said. Neighbors declare that they had not been happy since the marriage and that clashes between the two were frequent. Recently Boeck accused his wife of being untrue to him, aggravating the troubles of the pair.

A knife was picked up beside the body of the dead girl-wife by the police, which bore evidence of a brutal crime. She had been staying with her grandmother, Mrs. Jules Holstein, and, it is alleged by the latter, Boeck enticed his wife to a lonely spot north of the United Cigar Manufacturing company's warehouses on the Milwaukee road tracks.

Evidence of Struggle for Life. There the body was found later. The hands were badly lacerated and the throat and back were slashed.

Boeck was recently employed as a fireman on the Milwaukee railway. He is sullen in his cell and refuses to discuss the case. A coroner's jury has been called and will probably hold Boeck for the death of his wife, on his own confession.

Dan Crawford, a well-known resident of this city, says that last evening while he was walking near the canal, he observed Boeck sitting on a dock. Suddenly the latter said "good-bye" and jumped into the river.

Crawford by crying loudly for several moment brought William Bates, Tom Mahoney and Otto Meyer to the scene and together they succeeded in getting Boeck out of the water.

He immediately started to run and was lost to his pursuers. It develops that after Boeck ran to his home, he immediately turned and went to the police station to give himself up.

The money, which was in a pocket book which is also missing, was hidden by Mr. Scharf behind a picture frame in the home. This forence on he discovered his loss through finding the screening of a summer window cut out from the frame.

Not another thing was disturbed or stolen. How the thief knew that the money was behind the picture frame is the puzzle. The fact that nothing else was touched, together with the theft of the money hidden as it was, leads the police to think it has a hard knot to intended.

Scharf put the money behind the pic-ture during the evening, while the room was lighted up and the interior plainly visible to anyone peering through the window from the outside.

A Million Dollars For a New Stomach Is His Offer-Riches Cannot

## Woes of the Wealthy Worse than Poverty

When you are inclined to envy the rich, remember that John D. Rockefeller, multi-millionaire, one of the very wealthiest men the world has ever lime water, such as you would feed to a colicky baby. Is it much wonder that he offers a million dollars of his many millions for a new stomach that shall perform its duties without distress and

danger?

If Mr. Rockefeller would spend fifty cents for Camp's Curative Remedy, he might secure the relief he seeks, promptly and permanently. But the price is too small in the millionaire's eyes. He would spend a million, but would hesitate to spend half a dollar. Thus the price of wealth, in his case, is perpetual suffering, while those of us possessed of less money and greater perspicacity profit by the truth and take the road to health that thousands have

traveled before us.

There is no question about the efficacy of Camp's Curative Remedy in all cases of stomach and digestive disorders. It is guaranteed to cure, and in any case this process of the control of the con of failure to do so the purchaser's money will be promptly refunded. All drug-glsts sell it, giving you your choice of powder or tablet form at the low prices of 25 and 50 cents. ## Thousands of Women ARE MADE WELL AND STRONG

Success of Lydla E. Pinkham's Vegetable Compound Rests Upon the Fact that It Really Does Make Sick Women Well

Thousands upon thousands of American women have been restored to health by Lydia E. Pinkham's Vegetable Compound. Their letters are on file in Mrs. Pinkham's office, and prove this statement to be a fact and not a mere

Overshadowing indeed is the success of this great medicine, and compared with it all other medicines and treatment for women are experiments. Why has Lydia E. Pinkham's Vegetable Compound accomplished its widespread results for good?

Why has it lived and thrived and done its glorious work for a quarter of a century?

Simply and surely because of its sterling worth. The reason no other medicine has even approached its success is plainly and positively because there

is no other medicine in the world so good for women's ills.

The wonderful power of Lydia E.
Pinkham's Vegetable Compound over
the diseases of womankind is not because it is a stimulant-not because it is palliative, but simply because it is the most wonderful tonic and reconstructor ever discovered to act directly upon the uterine system, positively

URING disease and displacements and restoring health and vigor. Marvelous cures are reported from all parts of the country by women who have been cured, trained nurses who have witnessed cures, and physicians have recognized the virtue in Lydia E. Pinkham's Vegetable Compound, and are fair enough to give credit where it is due. If physicians dared to be frank and open, hundreds of them would acknowledge that they constantly prescribe Lydia E. CHAPTER V.

It took a whole week before Miss Smith recovered her temper sufficiently to come downstairs again and resume her ordinary habits, and even then, so far as

Sir Halco could hardly fail to guess something of the real cause of her all. something of the real cause of her absence, although his share in her expecta-tions had been of the vaguest—that is to say the girl's own hopes, ambitions and vanity had misled her, fed as they had been by Mrs. Rochester's invented or expected by Mrs. Rochester's invented by Mrs. Rochester's in aggerated compliments. Still, that, coupled by Violet's asking, half-shyly, half-earnestly, that the public announced days, or take a year. A strange find was made recently by Alfred Parker of Cochetopa fame, who out of a supposedly harmless pond near Littleton produced a hog nosed viper, whose bite is instant death, six other whose bite is instant death, six other venomous reptiles and a water dog.
Out of curiosity Parker proceeded to drag the pond, supposing it contained nothing more harmful than frogs.

Bear Tries to Lift Deer from Water. Still no one but they two guessed of the dangerous current underlying the apparently innocent remarks, and Alice Smith's utter silence and failure to force her pale, quivering lips to any reply at all was put down to her "sulking," as she had done before.

And so the subject went on, was discussed openly, and the date of the wedding fixed for an early day.

Bear Tries to Lift Deer from Water.

W. M. Kennedy, who has been in the lumbering business for a number of years past, tells of seeing a bear try to lift a live deer from the Magalloway river. When he discovered them, the bear had hold of the young buck's head with his teeth and was hanging on hard with the aid of his claws. The deer swam for the shore, carrying the weight of the bear, but he swam directly into a trap in the crotch that was made by the The bear made frantic efforts to get anto the logs and pull the deer after him.

At a recent meeting of the International Tuberculosis society Dr. Georges Petit showed that bread is capable of being an important factor in the propagation of tuberculosis. When the various processes through which flour passon its way to become bread are considered, it is easy to understand that the successive manipulations which the dough undersees can easily favor the introduction of the germs of tuberculosis.

Moreover, when the bread is baked, it does not attain a temperature of overflooding and the successive manipulations which the dough undersees can easily favor the introduction of the germs of tuberculosis.

It is above all during the kneading process that the danger is most patent. The workman heaves up a large lump of dough and lets it fall, grunting as he

When Workmen Remove Iron Pillar Supporting Main Floor All Upper Floors Tumble Into Basement.

Albany, N. Y., Aug. 8 .- More than a hundred persons, a large majority of them girls were buried beneath a mass of brick, wood and plaster today, when the central portion of the large department store of the John G. Myers company collapsed from roof to cellar. The wrecked portion includes nearly one-half of the store. Scores of rescuers toiling among the Sun.

ruins up to half past 1 had brought out only twenty-five injured. Three of these died after reaching the hospitals. At that time 110 were unaccounted for and it is certain that at least half of these are still beneath the mound of debris. About 400 persons are on the firm's pay-roll, but some fifty of these are on their

vacations.

The known dead are: BURNS, NELLIE. CUNNINGHAM, BERTHA. M'EVOY, MISS.

Robert M. Chalmers, a member of the firm, was caught on one of the upper floors and went down with the debris. He was dug out from beneath a mass of plaster, beams and broken timbers. His right leg was broken and he was badly

bruised.

Those employed in the store of John G. Myers' estate at 39-41 NoNrth Pearl street had just gone to work this morning when the building collapsed from roof to cellar. The catastrophe, which is the worst of its kind in the city's history, occurred shortly before 9 o'clock.

The Myers estate had been making extensive repairs on its building. This morning a gang of Italian workmen started to represent the property of the started to remove an iron pillar that supported the main floor. Evidently they had failed to brace the floor properly, for scarcely had they loosened the post when down came all three upper floors within a radius of fifty feet from the fatal pillar.

STRAWBERRIES FOR RHEUMATISM. Despite the Tradition, Some Say That Preacher Attacks Lodges; Men Interfere first miracle

They Are Curative. That strawberries are injurious to

That strawberries are Injurious to rheumatic persons is as old a tradition as that tomatoes (love apples) are conducive to love. But against science no tradition is safe. It is now asserted that the strawberry is the 'real thing' in food for rheumatics. Linnaeus, it is said, kept himself free from rheumatism by eating strawberries. Fontenelli, another naturalist, attributed his longevity to strawberries. He resorted to them as a medicine and would frequently say: "If I can but reach the season of strawberries."

Borheave is said to have classed the strawberry with the principal red fruit remedics containing iron as well as phosphorous, salt, sulphur and sugar. It has long been a tradition that the chief demand for horse chestnuts has come from persons who believe in their efficacy as a cure for rheumatism, or at least a palliative in rheumatic affections. Strawberries have heretofore been barred, but if they have all the merits now claimed for them, or indeed any of the merits, the bars will be down and will stay down permanently.—New York Sun.

The most remarkable accident that ever occurred in the history of the Andrews & Peck shop, Hartford, Conn., happened when a 26-foot band saw split from end to end and wound itself about from end to end and wound itself about Joseph Dubrule, who was working on it. Dubrule had been working on the machine and had just stepped around it to a position directly in front of the saw blade. He bent forward to move the adjuster and at that instant the blade broke and coiled its entire length about the man's body. The saw was moving at great speed when it split and the other workmen stood aghast. Dubrule at great speed when it split and the other workmen stood aghast. Dubrule disentangled himself from the glittering band and, stepping around to his machine, shut it down himself. Then he seized a bunch of cotton waste and began tying it about his right arm, which had been cut through to the bone. He was a mass of cuts. The little finger of his left hand was cut off and there were bad cuts on both legs.
