CRISIS OVER CHURCH-STATE DIS-PUTE COMES WHEN MOROCCO LOOKS DANGEROUS.

SURPRISE IN EUROPE

Death of a Butcher When Authorities Attempted to Make Inventories Is Immediate Cause.

ALGECIRAS, Spain, March 8.-The

The whole nation is excited over the dramatic overthrow of the Rouvier ministry. It is universally conceded that he alone averted war with Germany over Morocco last June, when he forced Delcasse to resign. Now, just as the Morocco affair has reached its critical point at the Algeciras conference, M. Rouvier and his entire ministry is forced out of office by a union of his own supporters with his enemies over a petty issue raised by the church and state separation law.

The lobbies of the chamber and all the political resorts in Paris were thronged by excited politicians until a late hour. Gossip at a late hour fixed on M. Poin-It is universally conceded that

J., today charged with attempting to wreck an eastbound Buffalo express train on the Delaware, Lackawanna and Western railroad early today, have confessed that this was their sixth attempt at train wrecking. All of the attempts were made in the vicinity of Passaic. They said the only reason for the acts was a desire to witness the excitement which would attend a wreck. The Buffalo express today escaped disaster by an exceedingly narrow margin. It was running nearly an hour late and at a high rate of speed when the engineer saw the obstructions on the track. He succeeded in bringing the train to a stop less than a car length from where a less than a car length from where a number of ties and iron fish plates were placed upon the track.

SHEBOYGAN, Wis., March 8 .- [Special.]-The franchise ordinance of the Milwaukee Northern road will be ready to go to the city council at its next meeting. Only a generation ago engineers were pronouncing Colorado hopeless from a railroading standpoint. Yet today there are several railroads making daily climbs of the main range in Colorado, and a brand-new road, built out of Denver toward Salt Lake City, has climbed the barrier at a point where ten years ago civil engineers said no roadbed could be successfully made.

Consulship.

WASHINGTON, D. C., March 8.—
David C. Owen's appointment as postmaster of Milwaukee, and that of Dr. Amos P. Wilder of Madison, as consult to Hong Kong, have been confirmed by the Senate.

Dr. Wilder arrived here Wednesday and is making plans to start for his new post on April 7. He will sail on the steamer Siberia from San Francisco. It is doubtful that he will be able to reach Hong Kong before the departure of Consul General Bragg.

D. C. Owen is still in the city and will leave on Friday night for Cincinnati on his way home.

In a vigorous speech Senator Spooner on Wednesday took a decided stand against the policy of the administration on the joint statehood bill. He favored a division of the pending bill and the admission of Oklahoma and Indian terri-

tory as one state at once because the people of those territories have agreed to joint statehood.

Is Open Publicity. Every bottle of Dr. Pierce's worldfamed medicines leaving the great laboratory at Buffalo, N. Y., has printed
upon its wrapper all the ingredients
entering into its composition. This fact
alone places Dr. Pierce's Family Medicines in a class all by themselves. They
cannot be classed with patent or secret
medicines because they are neither. This
is why so many unprejudiced physicians
prescribe them and recommend them to
their patients. They know what they
are composed of, and that the ingredients
are those endorsed by the most eminent
medical authorities.

are those endorsed by the most eminent medical authorities.

The further fact that neither Dr. Pierce's Golden Medical Discovery, the great stomach tonic, liver invigorator, heart regulator and blood purifier, nor his "Favorite Prescription" for weak, overworked, broken-down, nervous women, contains any alcohol, also entitles them to a place all by themselves.

Many years ago, Dr. Pierce discovered that chemically pure glycerine, of proper strength, is a better solvent and preservative of the medicinal principles residing in our indigenous, or native, medicinal plants than is alcohol; and, furthermore, that it possesses valuable medicinal properties of its own, being demulcent, nutritive, antiseptic, and a most efficient antiferment.

antiferment.

Neither of the above medicines contains alcohol, or any harmful, habit-forming drug, as will be seen from a glance at the formula printed on each bottle wrapper. They are safe to use and notent to cure.

Not only do physicians prescribe the above, non-secret medicines largely, but the most intelligent people employ them—people who would not think of using the ordinary patent, or secret medicines. Every ingredient entering into the composition of Dr. Pierce's medicines has the strongest kind of an endorsement from leading medical writers of the several schools of practice. No other medicines put up for like purposes has any such professional endorsement.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. ## Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

### SCOTT'S **EMULSION**

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

IMPRESSED WITH WESTERN CANADA.

Says Our Prairies Will Be Filled Up in Ten Years. L. A. Stockwell, of Indianapolis, a United States land man, who made an extensive tour of inspection in the

he had saved about \$3,000. Four years ago he landed near Hanley, Sask. He now owns 450 acres of land. Last fall (1905) he threshed 4,700 bushels of wheat and 3,100 bushels of barley oats. His wheat alone brought him over \$4,000, which would have paid for the acres that it grew on. He is to-day

worth \$15,000. This Is Making Money Fast. In February, 1902, J. G. Smith & Bro. were weavers in a big cotton mill in Lancashire, England. Coming here, they arrived in Wapella, Sask., with only \$750 between then. They were so "green" and inexperienced that all they ould earn the first summer was \$6.00 per month, and the first winter they had to work for their board. The next year, 1903, they took homesteads, and by working for neighbors they got a few acres broken out, upon which the next year they raised a few hundred bushels of wheat and oats. They also bought a team and broke out about sixty acres more. In 1905 they threshed 1,700 bushels of wheat from it, and 1,300 bushels of oats. Their success being then assured, they borrowed some noney, built a good house, barn and mplement shed, and bought a cream separator, etc. They now have a dozen cows, some full-blooded pigs and chickens, good teams and implements to match, and are on the high road to prosperity. Here are three cases seected from my note book from among a score of others. One a mine boss, one a farmer, and one a factory operator. With each of them I took tea and listened to their story. "I hoped to better my condition," said one. "I thought in time I might make a home,' said another. "I had high expecta-"I never dreamed it possible to succeed

Everywhere, on the trains, at the hotels and in family, I have been told of successes that reminded me more than of this matter-of-fact, workaday world. Yields of wheat from 35 to 53 bushels per acre, and of oats of from ery locality and well authenticated. At Moose Jaw, Lethbridge, Calgary, Edmonton, Regina, Brandon, Hanley and many intermediate places I saw cattle and young horses fat as your grain-fed animals of the "States" that had never tasted grain, and whose cost to their owners was almost nothing. Then if they followed the crowds as they emerged from the trains and hurried to the land offices, standing in line until their respective turns to be waited on came. and saw with what rapidity these lands are being taken, they would certainly catch the "disease" and want some of it too. If these lands are beautiful, in midwinter with their long stretches of vellow stubble standing high above the snow, what must they be in summer time when covered with growing or ripening grain? Speaking of winter reminds me that our Hoosier friends shrug their shoulders when they read in the Chicago and Minneapolis dailies of the temperature up here. Lightning Finds Honey Nest. Lightning Finds Honey Nest.

Lightning, striking a tree near the home of John A. Frobose, in Nutley, N. J., ripped open the trunk, spilling several buckets of honey upon the ground. The tree did not branch off until about twenty feet from the ground, and the hollow trunk, over three feet in diameter, was filled with honey, which had been accumulating for years. As soon as the store of honey was discovered, several persons made efforts to get some, but were kept away by the angry bees.
