WISCONSIN STATE FAIR.

The Wisconsin State Fair will be held at Milwaukee the second week in September, opening on Monday, Sept. 10th and closing Friday, Sept. 14th. All the preliminary arrangements for the great event have been completed by the Board of Managers. Special railroad rates of one fare for the round trip will prevail during the week and every provision has been made for the accommodation of the hundreds of thousands of Wisconsin people who will attend. Never before in the history of Wisconsin has such an attractive program been offered by the State Fair management. Twenty-five thousand dollars in premiums for live stock, agricultural, dairy and other state products has been offered. For the racing events the sum of \$30,000.00 is offered. More than three hundred entries have been made in the various speed classes which are to include two racing events for which purses of \$5,000 are offered, and three \$2,500 events. Wisconsin will lead all other states in the character of its races, the best horses from all parts of the country having been entered for various events. While every effort has been made to make the Fair the most complete exposition of the agricultural achievements of the State, special provision has also been made for startling and spectacular entertainment features. Wisconsin people will be given their first opportunity to witness the marvellous

maneuvers of an air ship. Early in the year the contract was made for ascensions by the Knabenshue Airship which is the only one in the country that has made successful trips in the air. Roy Knabenshue, the famous aerial operator, will make ascensions from the grounds and travel down to the heart of Milwaukee and back each afternoon the weather conditions being favorable. The Ladies' Relay Running Races, which were such a popular feature last year, will be repeated this year each afternoon. Four miles will be raced every half mile. The prizes will be awarded the losing day of the Fair for the best time made for the twenty miles. Elaborate preparations have been made for the evening entertainment. The Pain's Fire Works Company has been engaged to provide spectacular fireworks for four evenings of the week. Vaudeville acts will be given before the grandstand each afternoon and evening which may be witnessed free of charge. Many improvements have been made on the grounds, including several miles of new cement sidewalk and the erection and repairing of several buildings. The splendid stock judging pavilion, having a capacity of four thousand people, will be used for indoor judging events and free exhibitions of horsemanship and military maneuvers. Remember the date, Sept. 10-14, 1906.

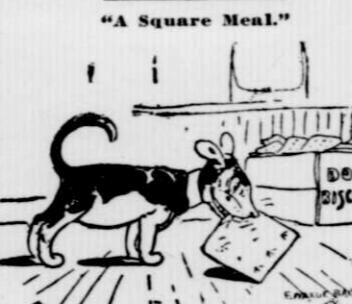

Weather for August.

A reactionary storm period is central on August the 2nd, 3rd and 4th, embracing the full moon at a total eclipse noon on the 4th. This period will culminate within four or eight hours of the 4th, in very marked electrical and seismic perturbations over many quarters of the globe. In our own country, a wave of intense warmth, attended by very low barometer readings, will start in the west at the opening of the month. As this wave advances eastward many violent summer gusts, with severe lightning and thunder, will sweep wide localities, being most general and violent from the northwestern states along paths lying between the central to extreme northern parts of the country. A regular storm period lies between the 7th and 12th. It is central on the 9th and will culminate from the 8th to the 11th. Great increase of temperature, with corresponding fall of the barometer, will pass like a wave from west to east during this period. Black, blustering clouds, thunder and high winds, with possibly cloudbursts in scattered localities may be expected, but we do not believe that a sufficiency of rain will be diffused generally over the country. This period leads into a mercury, and that, in turn, leads into the Earth's autumnal equinoctial period, all of which is illustrated in the diagram for August. Hence a prolonged threatening state of the weather will be very natural, with increased and positive reactionary storms on the 15th, 16th and 17th. A rapid, but temporary rise of the barometer will follow these storms, with brief respite from August heat. A regular storm period runs from the 19th to the 23rd, being at the culmination of the mercury period, and under the growing influence of the autumnal equinox. The new Moon at a solar eclipse node also falls on the 19th. The indications are that the heaviest and most general storms in August will occur during and next to Sunday the 19th to Wednesday the 22nd. We will name the 20th and 21st as the crisis. These dates will also be at the center of a seismic, hence a maximum of earthquake tendencies will be natural, centering on and about the 19th. We may say, also, with a degree of scientific certainty that equatorial and West India storms and hurricanes will originate about this period. They may not reach the immediate vicinity of our south coasts at this period, but they will be sighted and reported, and all concerned should carefully note all warnings and watch subsequent developments. The best outlook for rains over the great grain belts and other sections in August is during this period, or from about the 17th to the 23rd. Violent summer storms need not surprise any reader at this time, and in the northwestern, open parts of the country reasonable care should be exercised against violent hail storms. The focus of the solar energy is in high latitudes and about the beginning of its recession southward at this period. Hence the danger of hail storms and other severe atmospheric clashes and convulsions to the northward. If great equatorial storms and barometric depressions exist on or near the southern coast at this period, the counter-balancing disturbances that move out of the northwest and across the inland will be followed by phenomenally high barometer, northwesterly gales and unseasonable change to colder, with frost along the northern tier of states. A reactionary storm period is central on the 25th, 26th and 27th, with Moon in perigee, at first quarter and extreme south declination. If equatorial storms originate in the south seas during this period 19th to 23rd—a thing most probable—under the growing pressure of the autumnal equinox these disturbances will live and grow as they advance northward, most likely reaching the regions of the Gulf of Mexico about Friday the 24th to Tuesday the 28th. If West India hurricanes are sighted south of Cuba about the 19th to the 23rd, and reach our south coasts about Saturday, Sunday and Monday the 25th, 26th and 27th, we shall read of people being swept away, with all their worldly belongings, either through lack of proper warning and urging, or through carelessness or indifference to almost certain danger to property and life. We do not believe that this will apply to any reader of these forecasts.

The last storm period for the month, 25th to 28th, will culminate in higher temperature, low barometer, cloudiness and more or less storms and rain over the country in general. August promises to come to an end with fair and cooler weather spreading eastwardly over the country. Upon the whole we fear that the month will bring an end of warmth, and that the rainfall, if diffused as it would have to be, to be available to the general needs, will be hurtfully below the average. Most gladly would we see this forecast fall, and instead an abundance of timely and fruitful rains; but the remainder of this season, and the season of 1907 is the time for a general Jupiter drought, of minimum of rainfall, and unless the blebbing of the Saturn period with that of Jupiter works a radical change from the natural order, a drought of greater or less severity will be encountered, affecting the late crops of the present season and running through through the season of 1907.

POMPEIAN MASSAGE CREAM. Particular men know that summer dust, the stain of vacation travel, combined with the grease of perspiration, clog and stifle the pores. Keep them clear and healthy, so that you may look roddy, fresh, and cool these Summer days. POMPEIAN MASSAGE CREAM withdraws every particle of impurity from the pores—all the way through—and by gently exercising the facial muscles rounds them out to perfect development; blackheads and wrinkles immediately disappear, leaving nothing but the natural glow of health and cleanliness.

Reduced Prices On Summer Goods. In order to make room in time for my large new Fall Stock I will sell the remainder of my summer stock at greatly reduced prices. I still have a nice line of MEN'S SUITS, SINGLE PANTS and furnishing goods. Come and get some of these bargains.

IMPORTANCE OF BUYING CREAM SEPARATORS THROUGH LOCAL AGENTS. This heading voices a most important consideration in the purchase of a Cream Separator, and points a most serious objection to the purchase of such a machine by the "mail order" method, even if good separators were sold in that way. While the Cream Separator is a simple machine when once understood, it is nevertheless of the greatest possible importance that it be set up and started just right, and that the user have the brief, personal use instruction necessary in its handling and operation. If not it may mean several years of difference in the life of the machine and a good many dollars of difference in the results from its use. Then, no matter how carefully used, things do happen even to the best of separators. It makes a lot of difference if you have a competent man near at hand to tell you just what is wrong and how to fix it. It makes even more difference to be able to get necessary repair parts right and quickly instead of having to send off to some distant concern for them which only sells machines somebody else makes and whose employees would not know a separator if they saw it and the parts for which are more likely to be wrong than right when you do finally get them. All this is the business of the local agent for DE LAVAL machines. It is just what he is expected to do for users. Of course he makes a small commission out of it, but the user can hardly afford to pay that commission and it would be a big mistake to try to save it even in the purchase of a good separator. It is still more so in the purchase of the kind which is sold in the "mail order" way. The buyer of a Cream Separator should never lose sight of the big DAILY difference in dollars-and-cents results between the good machine and the poor one. A DE LAVAL catalogue to be had for the asking helps to make plain these differences. GRELL & WOLLENSAK, SPECIAL SELLING AGENTS. Kewaskum, Wisconsin.

CHAPTER IV.—(Continued.) "My dear cousin, we are living in a matter-of-fact England, not in a land over-run by outlaws."

"We didn't hear her scream last night." "Mrs. Brown is quite recovered by now. She is waiting for you young ladies at breakfast with Sir Keith."

"At least, they would have entered if Sir Keith's fall from his cot barred the way. He took no notice of Gertrude, but clasped Ella's hands in his."

"My mother had no right to send you here, Sir Keith. I have already given you my answer," replied the girl.

"No!" He strove to look pleasant. "With Lady Medlicott's sanction, your cousin is my affianced wife, and in a few days the ceremony will be performed."

"I will make you love me; though, even if you hate me, I shall marry you. I will make you love me; though, even if you hate me, I shall marry you."

"I have been given out that he is in New-York; but that may be only a ruse. Let us go off without another moment's delay."

"Gertrude, it rains." "Here you don't say so." "Here you are awakening indeed from blissful dreams."

"I don't understand you." "No, miss? Well, there is company to-day; yesterday we were quite alone."

"Which I don't care the gent that's here, Miss Gertrude, care for seeing you. He's a lover of Miss Ella's."

"I don't know how to answer you, miss. I am sure you need not look at me so unkindly."

EVER TASTE CHIRSCHMUS?

Last summer I ate genuine Swiss chirschmus twenty years ago, says a writer in the Ladies' World. It tasted like a combination of the richness and sweetness of the most perfect cherries.

On inquiry I learned how this cherry concoction with its wonderful preserving qualities is made. The cherries used must be perfect—very large, ripe, juicy black ones, and above all, very sweet."

BULLETS PROVE CRIME.

JOSEPH BARDEHNEUER SHOT IN RIGHT SIDE AND IN BACK OF HIS HEAD.

MURDERER FROM CHICAGO. Belief of Police Because Illinois City Lad Accompanied Suspected Farmer Who Lured Jeweler to His Death.

MADISON, Wis., July 31.—[Special.]—Two bullets found in the head of Joseph Bardehneuer, the Madison jeweler whose body was discovered in the woods near this city yesterday, prove murder.

It is inferred that the murderer came from Chicago, as two men were once sent to jail on his testimony. Bardehneuer, who was a large man, weighing 247 pounds, evidently had put up a hard struggle before being slain.

On Saturday, July 21, a man dressed in farmer's clothes called at Bardehneuer's jewelry store, in Madison, and requested that he be taken to his home and repair an old clock, fixing Monday as the date, and asking the jeweler take a Fair Oaks car to the end of the line, where a boy would meet him with a buggy. This plan would have brought Bardehneuer near the place where his body was found.

On Monday morning, putting the tools to work, Bardehneuer was taking \$2 in money, Bardehneuer boarded the street car. This was the last seen of him.

Clara Bardehneuer said her father had been the victim of a robbery in Chicago, about Christmas, 1904.

REING MAKES DENIAL.

FILES HIS ANSWER IN BREACH OF PROMISE CASE.

Wealthy Young Fond du Lac Man Sued by Miss Mary Sallchert, Who Wants Damages of \$25,000.

FOND DU LAC, Wis., July 31.—[Special.]—William C. Reing, against whom complaint in an action for breach of promise was filed yesterday afternoon, today filed an answer denying all of the allegations of Miss Mary Sallchert, who asks damages of \$25,000.

The answer declares that no attempt has been made to settle the case out of court. The case will come up for trial in the November term of the circuit court.

Mr. Reing was married on April 18 to Miss Clara Kieffert of Mayville, and is about to begin the construction of a residence on Division street. The plaintiff is a tailor who has been employed in an establishment in the Reing block.

She avers that she became acquainted with the defendant four years ago and about August 1 last, after having left one company with her until that time, she married him.
