one for the city, especially in real estate circles. The output from manufacturing plants and all lines of industry was larger than ever before and from present indications this year the results will be larger than the past one. Some of the new buildings erected during the past year and their costs follow: Baptist church, \$23,000; Masonic temple, \$25,000; Y. M. C. A., \$50,000; jail, repairs, \$14,000; Watson block, \$25,000; Franklin school, \$25,000; Anderson Vebicle company, \$6000, and Hastings' livery, \$10,000.

Many citizens, who paid 15 cents for poor set of shirt buttons last week a order to assist two deaf and dumb called mutes were able to converse with their vocal organs as well as their fingers. The two boys were heard talking in their room at a local hostelry and when ordered to pay up and leave, it is said, they did not wait to have the order written down so they could read it, but paid their bill and departed on the first train.

MRS. W. REINHARDT & CHILDREN. The Joy of Living. Every once in a while some cheer ful individual remarks to us. "Well, now that paper is out I suppose you can take it easy for three or four days.' Yes, how delightful it is that a coun try editor has practically nothing to lo between press days. Business run along automatically. When paper bills come due money drops off the rees with which to pay them. Subcribers vie with each other to see who can pay the farthest in advance, Advertisers beg for additional space, And the day the news hunts up the editor is also pleasant to contemplate There is something really strange about the way news items act. When the paper is out the editor simply goes to his desk and leans back in hi asy chair and looks wise and waits or next week's press day. The day before press day the people line up it front of the office door and then they file past his desk and tell him all the iews of the week. He writes it up in ifteen or twenty minutes, takes it back and hangs it on the hook. The head night porter confessed to thirtyempositors take the copy, shake it ver the type cases, say a few mystic vords, the type flies into place, and fter a few passes by the foreman the rms are ready for the press again. And the editor goes down and deosits some more money in the bank t is the greatest snap in the catague. Now if the editor could only away with press day, his joy would

e complete.-Ex. - We notice in the Postmaster Genral's report a suggestion that peole writing letters should sign their ull names and addresses to their letrs, and there would never be a leter but what could be returned if it tiled to reach the person it was inended for. The report suggests a etter way than that, too, but one which is a little more expensive. This s to have a small card printed on the orner of the envelope. This will cost nly a trifle, and if the letter cannot e delivered to the address, or the ddress should be wrong, the letter yould come back in the course of five seven days, instead of going through he dead letter office, and finally beng returned to the writer after a ose of two weeks or more. An African hunter tells the strange story of seeing a lion in the midst of the antelopes, forced to join the march. It is supposed that the lion had sprung too far for his prey, that those upon whom he alighted recoiled sufficiently to allow him to reach the ground, and then the pressure from both flanks and the rear prevent ed him from escaping from his strange captivity. A Source of Contagion. It has been proved by abundant in vestigation that one prolific source of epidemic diseases is found in the lis bility of the germs of such diseases to lodge in the mouth around the teeth and gums. A physician examined the teeth of the children of a certain school. He found disease germs present in almost every case. By careful watching he discovered that those children whose teeth were kept cleanest suffered less from epidemic diseases. The neglected condition of the teeth is. therefore, a common cause of illness Indeed, if one takes the trouble to observe with what rapidity the tartar and cheesy matter accumulate around the teeth of people who are out of health they will not be long in making up their minds that a thorough and ju-

Prescription, directed to the cause would have entirely removed the disease, there by dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured."

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its effects in any condition of the female system.

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

SOME "EXHIBITS" IN LAW.

Motor Cars, Cabs and Boilers Inspected by Judges.

What are known as "exhibits" in law cases range from sheets of paper to boilers and other large articles. At various times an omnibus, a motor car and a cab have been on view in the private roadway by the side of the London law courts, and as they could not be brought into the witness box the judge and jury have had to go out and inspect them in the open. One of the most ponderous, "exhibits" of this kind was a large ship's boiler furnace which was conveyed from Swansea for inspection.

University of Illinois Has Added Lin-

The University of Illinois has lately added a number of relics to its Abraham Lincoln collection. Among other treasures in the university's possession is an ox yoke made by Lincoln at New Salem, Ill., in 1830, when he was 21 years old. It remained there until 1849, just after Lincoln's return from the later of the sending and receiving apparatus. It remained there until 1849, just after Lincoln's return from his only term in Congress. Then Lincoln and his brotherin-law, Clark M. Smith, visited New Salem together. While there the two attended an auction sale of farm chattels, among which was the ox yoke. When the yoke was offered for sale it was treated as a novelty, because made by a Congressman. Lincoln acknowl-edged having made the yoke, and Mr. Smith bid it off, saying "it was worth taking home as a souvenir because made by his brother-in-law and a member of

Keep Your Blood Pure. No one can be happy, light-hearted and healthy with a body full of blood that cannot do its duty to every part because of its impurity, therefore, the first and most important work in hand is to purify the blood so that every organ will get the full benefit of a healthy circulation. There is no remedy we know of so good as that old family remedy, Brandreth's Pills Each pill contains one grain of the solid extract of sarsaparilla blended with two grains of a combination of pure and mile vegetable products, making it a blood purifier unexcelled in character. One or two taken every night for awhile will pro-

THE LAXATIVE OF KNOWN QUALITY

There are two classes of remedies; those of known qual-

ity and which are permanently beneficial in effect, acting

gently, in harmony with nature, when nature needs assist-

ance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with

the favor of many millions of well informed persons who know

of their own personal knowledge and from actual experience

that it is a most excellent laxative remedy. We do not claim that

it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character. There are two classes of purchasers; those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know. and who allow themselves to be imposed upon. They cannot expect

its beneficial effects if they do not get the genuine remedy. To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer
