MR. & MRS. JACOB KUFEL.

#### Spring.

Spring has come. Ah! joyous spring! The air is soft and warm breezes blow. The sun gives down its tender glow. Giving the plants life below.

Spring has come. Listen! what stir in yonder bush? 'Tis robin-rebroad, wren and thrush. All bark to the song now tremulous and loud. All merry, and without a fear, for Spring is here.

What is it growing from under the leaf? Coming up, fresh, new life to breathe! May flower, dandelion and buttercup. All are ready and waking up. Spring is here.

Let us like flowers, birds and bees. Like ferns and mosses, and like trees. Send forth new life; and then some day When spring will come.

—Aurora E. Backhaus

## Crushing a Critic.

School superintendents in New York among their many duties are expected to report on the personality of the teachers in their district. It is not always easy to get "a line" on the quality of a teacher, so many are lenient in the work. One of the superintendents, however, is never satisfied until he has made the test for orderliness by asking the teacher to open his or her desk. One day he found one of his fair subordinates with things in great confusion. She was evidently violating heaven's first law.

"My dear," said he to the blushing delinquent, "I don't believe you would make a good housekeeper."

The desk closed with a bang. There were fire in her eye as she calmly replied:

"Oh! Are you looking for a housekeeper?"—New York Press.

## Falling Into Hole In Air.

One of the strange experiences of a balloonist is that of falling into "a hole in the air," which Mr. Rolker reports as follows: "So you continue sailing, enjoying the present with little thought of the startling surprises that may be before you. Ahead of you, unseen, may be what the balloonist calls a 'hole in the air,' resembling the vortex of a maelstrom, and down this you may literally fall at a rate which is terrifying until by sacrificing two or three bags of sand at once your pilot checks your downward flight. But these 'holes' are scarce, and as a rule the atmosphere is of uniform carrying power."—American Magazine.

## When Dogs Were Cooks.

"There was a time," said the antiquarian, "when dogs did our roasting for us—at least they kept the meat turning so it would not burn. 'Spit dogs' they were called, and we call their descendants 'split' to this day. Spit dogs were trained to turn the spits on which roasted chickens, beef, ducks and turkeys. The little fellows did their work well. They were never known to let a fowl burn or to snatch a mouthful or two from it. As late as 1876 spit dogs were employed in the old Philadelphia inns on Second and Third streets."

## The Servant Question.

The proud millionaire entered his garage haughtily. "Francis," he said, "you took out the new sixty horse-power again last night without permission. I'm afraid I'll have to get another chauffeur."

"I wish you would, sir," Francis answered. "With those four big cars there's quite enough work for two of us."—New York Press.

## Historic New York.

New York city has more points of historical interest than any other city on the continent, there being scores of them, extending from Fort Amsterdam, where the new custom house stands, at the Battery, on the south, to Fort George, Fort Washington and the Van Cortlandt manor house on the north.

## Equalized.

The larynx of man is twice the size on an average of the same organ in woman, although this disproportion is equalized by the fact that woman uses her larynx a little more than twice as much as man.

## Not Needed.

"I have here a neat and pretty little letter opener," began the agent.

"So have I at home," said the business man sadly. "I'm married."

## HOMES IN THE NORTHWEST.

Why not settle on the government lands, or low price farm lands that are improved, in South Dakota; thus staying near at hand instead of journeying to a distant region where the climatic conditions and social surroundings are widely different? Special low rates are in effect the first and third Tuesdays of each month to all South Dakota stations on the North-Western Line. It will pay you to investigate. New lines are opening up extensive territory to development, creating the chance of a lifetime. Answer your ticket agent to give you full particulars, with maps, pamphlets, and complete information regarding railroad rates and the steps necessary to secure government land free.

The Machine that Does it Right.

The great utility of this machine consists in the saving of time, labor and expense, and we set forth the following advantages over the old way of setting tires: No tires are taken off. No bolts are taken out and thrown away. Any degree of dish can be put in the wheel. Four tires can be set in one-half hour's time. No hammering or marring of fellos. No spooling of wheels by wadding the time too short. It does far more work than can be done by taking the tire off. No boring of the fellos for new bolt holes.

### What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or rancid taste in morning, "heartburn," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from biliousness, torpid liver with indigestion, and nervous prostration. Golden Medical Discovery is the only medicine of valuable medicinal principles known to scientific medicine for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomachic, purgative and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle wrapper and extended under oath. A glance at its formula will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine of proper strength, from the roots of the following native American forest plants, viz., Golden Seal root, Stone root, Black Cherry bark, Queen's root, Bloodroot, and Mandrake root.

The following leading medical authorities, among a host of others, extol the foregoing roots for the cure of biliousness, heartburn, indigestion, etc.: Prof. H. Bartholow, Chicago; Dr. J. C. Keen, St. Louis; Dr. W. C. Wood, M. D., of Univ. of Pa.; Prof. Edwin H. Cull, M. D., of Hahnemann Med. College, Chicago; Prof. John King, M. D., Author of Materia Medica and Prof. in Bennett Medical College, Chicago. Send name and address on Postal Card to Dr. R. V. Pierce, Buffalo, N. Y., and receive free booklet giving extracts from writings of all the most eminent authorities and many others endorsing, in the strongest possible terms, the use and ingredients of this "Golden Medical Discovery" as composed.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. They may be used in conjunction with "Golden Medical Discovery" if bowels are much constipated. They're tiny and sugar-coated.
