## ARREST IRA SMITH: FRAUD IS CHARGED.

CLIMAX OF SENSATIONAL COLLAPSE OF ONCE PROSPEROUS GRO-CERY HOUSE.

O. C. MASON COMPLAINS.

Former President of Smith, Thorndike & Brown Accused of Making False Statements.

MILWAUKEE, Wis., June 19.—Ira B. Smith, late head of the wholesale grocery house of Smith, Thorndike & Brown, was arrested at 1 o'clock this afternoon, charged with obtaining money under false pretenses.

He was taken from his home, 612 Newberry boulevard, by a detective to the office of the clerk of the municipal court in the city hall, where he was given an opportunity of obtaining bonds-

Bail Fixed at \$6000. His bail bond was fixed at \$6000. An attempt was at once made to obtain signers for his bond but at the end of an hour was still in the office of Frank Woller, clerk of the court, waiting for bonds-

False Statements Charged. It is charged in the complaint against cerning his financial condition of the

firm of Smith, Thorndike & Brown, as its president, in negotiating various loans through O. C. Mason, a broker in the Camp building. Mason Handled Notes.

Mason handled the notes of the Smith, Thorndike & Brown Co. for some time, and in the course of his business trans-

and in the course of his business transactions with the concern bought and sold a large amount of the paper, his clients being bankers in Milwaukee and other parts of the state.

These notes, it is said, were negotiated by Mason upon a statement, as to their value, given him by the firm.

Upon the basis of these statements as to actual values of the paper sold, the charges against the late head of the grocery house are set forth, and the prosecution will be pushed along this line.

Mr. Mason was not in his office this afternoon, his stenographer stating, evasively, that he would probably not return until this evening. In his absence, she declined to say anything regarding the warrant sworn to by her employer.

Dates of Loans.

Dates of Loans. It is alleged in the complaint that the loans which Mr. Smith received from Mr. Mason were received on the following dates: February 13, \$4850; February 20, \$4850; May 4, \$4900; May 10, \$4900; February 13, \$4850; February 20, \$4850; May 4, \$4900 and May 10, \$4900. All of these loans, it is alleged, were received this year.

ceived this year. The complains: The complainant further alleges that the defendant unlawfully misrepresented the assets of the Smith, Thorndyke & Brown company, in order to negotiate the loans which he secured. On April 1, 1907, Mr. Mason declares in the complaint that Mr. Smith represented the assets to have been \$334,000.

What Creditors Found.

Under the recent statement to creditors by the late reorganization committee, the financial condition of the concern of Smith, Thorndike & Brown, were given as follows: Stocks in trade, \$105.831.40; accounts receivable, \$131, 171.73; bills receivable, \$3505.52; miscellaneous (cash), \$3995.13. Mr. Smith turned into the concern property to the value of \$10,000 to \$15,000. It was stated at the time of the collapse that he had drawn from the firm at various times a total of \$100,713. The actual value of the assets were given by the committee as being worth about \$353,-603. The committee found no less than \$76,675 in "bad" accounts among the accounts receivable, while \$37,891 were considered as "slow." The liabilities considered as "slow." were placed at \$508,348.

Henry Weber a Bondsman. Henry Weber, of Weber & Steuber, arrived at 2:15 o'clock at the clerk's office and offered to furnish the required bond but the clerk refused to accept one bondsman alone. Guy D. Goff, who represents the defendant, repaired to the district court in search of Judge Neelen, in the hope that the clerk's decision might be set aside.

A conference between Clerk Woller,

District Attorney McGovern and Guy D. Goff, Mr. Smith's attorney, was held at 2:30 o'clock, at which it was agreed to turn the defendant into Mr. Goff's keep-ing until 5 o'clock in order that he could secure another bondsmen.

The other railroads of the state that are parties to the action decided to await the outcome of the test suit brought by these two larger roads.

Sturdevant Started Suits. Sturdevant Started Suits.

The suits were started in the fall of 1905, Attorney General L. M. Sturdevant, assisted by H. W. Chynoweth, appearing for the state. At the beginning the railroads objected to the proceedings on the grounds that the complaints were not definite enough. Judge Stevens of the Dane county circuit court, in which the actions were started, overruled the objections, but it threw cases over for another term. Then the roads introduced demurrers attacking the constitutionality of the law and raising the question of of the law and raising the question of the statutes of limitations. Then they filed an affidavit of prejudice against Judge Stevens, who ten called in Judge W. D. Tarrant of Milwaukee.

Tarrant Overruled Demurrers. Afteh the hearing on the constitutionality Judge Tarrant took the questions under advisement and in the fall of 1906 gave his decision overruling all the degave his decision overruing all the de-murrers. From the order overruling the demurrers the two roads appealed to the supreme court. They held that all taxes prior to six years ago were barred by the statutes of limitations and that the law is unconstitutional and confiscatory.

Bechtner Makes Statement. Comptroller Bechtner said this afternoon that he was not sure of the amount supposed to be short, but he believed it was in the neighborhood of \$29,000.
"On Wednesday, F. Chandler, head accountant for Arthur Young & Co., which is making an audit of the city's books, came to my office and said: 'I find Mr. Woller's accounts are all right, except that he has avoided showing me the vouchers and bank book to prove that he has the amounts on hand that his statements show.'

"I replied that I would look into it.
"I went to the First National bank and asked how much Mr. Woller had on deposit there. The bank refused to give me the information, but intimated that the amount was less than I sup-posed it was."

Woller has not been in the office for two or three days, but has been in the city and at his home in Wauwatosa. Shortly after noon today, he was brought to the central police station by his brother, John Woller, and gave himself up to Inspector Riemer. He admitted his guilt frankly, but was retieent when asked by newspaper men concerning the affair.

Promises to the Dying.

A clergyman, discussing unhappy love affairs, said: "Many a love tragedy is caused by husband's promise to a dying wife that he will not marry again. He

that it will be easy to keep. Whether it is easy or hard to keep, it is a sional bubble that may come to the promise rarely if ever broken. Time and time again widowers have sought me out for advice on this subject, They are in love, but they promised their dead wives not to marry again. Shall they break or keep this promise? I can only advise them to do as their conscience dictates. At the same time I think it is selfish of dying wives to extract such promises from their broken hearted husbands. Such promises, by the way, are rarely extracted bred Holstein bull at Knowles last by dying husbands from broken hearthusband's will is read it is usually found that if the widow marries again the money is all taken from her. So it comes to the same thing in the end, doesn't it?"-New York Press.

Famous Collection of Antlers, Of the famous collections of antlers formed in the seventeenth century only two or three have escaped the general lage. One of these is in Moritzburg, the king of Saxony's historical hunting castle, near Dresden, while in the celebrated gun gallery in Dresden itself Dr. William Hausmann. At other times the imnense size of the machinery and the dials excites astonishment. This is the case with the celebrated clock in the tower of the Church of St. Rombaut at Mechlin. A writer in La Nature thinks this clock possesses the largest dials that exist in the world. There are four of them, one on each side of the great square tower, and their extreme diameter is nearly thirty-seven and one-half feet. NEW KIND OF BREAD.

Made in Italy of Olco Cafro, Developed by a Priest.

Italy has produced a new cereal for bread making purposes that is attracting a good deal of popular attention. A pub-lic test was made the other day at Mes-bring of baking bread from flour of the he test was made the other day at Mes-brino of baking bread from flour of the new grain, which is named Olco Cafro, and has been developed by a priest of the name of Candeo. The bread was pronounced to be palatable, light, and, mixed with one-third of wheaten flour, is declared to make a sustaining food at a very low price. Besides this the "inventor" says that its general use would do away with the pellagra in Italy.

People Tell Each Other About Good

Twelve years ago few people in the world knew of such a preparation as a Powder for the Feet. To-day after the genuine merit of Allen's Foot-Ease has been told year after year by one gratified person to another, there are millions who would as soon go without a dentifrice as without Allen's Foot-Ease. It is a cleanly, wholesome, healing, antiseptic powder to be shaken into the shoes, which has given rest and comfort to tired and aching feet in all parts of the world. It cures while you walk. Over 30,000 testimonials of cures of smarting, swollen, perspiring feet. It prevents friction and wear of the stockings and will save in your stocking bill ten times its cost each year. Imitations pay the dealer a larger profit, otherwise you would never be offered a substitute when you ask for Allen's Foot-Ease, the original powder for the feet. Imitations are not advertised because they are not permanent. For every genuine article there are many imitations. The imitator has no reputation to sustain—the advertised article is the best, otherwise the public would not buy it and the advertising could not be continued. When you ask for an article advertised in this publication, see that you get it. Refuse imitations. Things.

Explaining Size of an Atom.

"Raise a drop of water to the size of the earth and raise an atom in the same proportion, and the atom will then be in some place between the size of a marble and a cricket ball." Thus said Lord Kelvin in trying to explain to the in-erudite world how little are things

proof. The robberies committed from pillar boxes have caused a good deal of uneasiness in Paris. A high official of the department declares that the new box, when finally adopted, will offer every guarantee. Two boxes are now in experimental use, in which certain improvements will have to be introduced, but the main outlines are definitely fixed, and it will be on the principle adopted in some photographic apparatus for moving the plates about. Another type of French post box—the pneumatic—has been the subject of rumor, but it is officially declared that not one of these boxes has been successfully tampered with. es has been successfully tampered with.

WENT TO TEA

And It Wound Her Bobbin.

Tea drinking frequently affects peo ple as badly as coffee. A lady in Salisbury, Md., says that she was compelled to abandon the use of coffee a good many years ago, because it threatened to ruin her health and that she went over to tea drinking, but finally, she had dyspepsia so bad that she had lost twenty-five pounds and no food seemed to agree with her.

She further says: "At this time I was induced to take up the famous food drink, Postum, and was so much pleased with the results that I have never been without it since. I commenced to improve at once, regained my twenty-five pounds of flesh and went some beyond my usual weight.

"I know Postum to be good, pure, and healthful, and there never was an article, and never will be, I believe, that does so surely take the place of coffee as Postum Food Coffee. The beauty o it all is that it is satisfying and wonderfully nourishing. I feel as if could not sing its praises too loud. Read "The Road to Wellville," in pkgs. "There's a Reason."

#### RUSSIAN COTTAGE FACTORIES. Village of Which the Chief Industry Is Manufacture of Padlocks

Russian cottage factories are passing. Russian cottage factories are passing. Politico-economic tumults have driven railors, joiners, grocers, bakers and candle-stick makers to lumbering, stoneicking and other labors more remunerative. Pavlovo is a typical industrial village of the old style. The chief employment of the village, says the Chicago Tribune, is the production of articles of metal, the manufacture of locks alone giving and the control of the chief employment. is the production of articles of metal, the manufacture of locks alone giving employment to 1400 cottages, with 1500 male artificers. The pet object of manufacture is the padlock. With the exception of the bows and springs all the parts of the padlock are made by the artificer and the members of his family of 10 years old and upward. The employment of outsiders is the exception.

One family manufactures weekly from 10 to 150 locks, according to size and kind. Latterly an industrial school with model workshops has been opened in the village and box and door locks have been attempted. Barring the products of the larger factories, which find their way direct to Moscow and the larger cities, the rect to Moscow and the larger cities, the entire trade of the district is in the hands of the local middlemen. Many steps already have been taken with a view of ameliorating the lot of the cottager and of giving him a larger share of the product of his industry.

#### PARIS FOND OF HORSE.

Said to Have Eaten 40,000 Horses Last Year Because Beef Is Dear. The consumption of horse meat for food has greatly increased in France since the present increase in the price of foodstuffs set in. A Parisian news-paper says that out of 28,937 horses sold at the market on the Boulevard de l'Hos-pital, Paris, in 1906, 22,792, or about 80 per cent., went direct to the Vaugirard abattoir, not to speak of hundreds of horses that were taken there directly. It is estimated that last year Paris ate altogether 40,000 horses or more than 22,000,000 pounds of horseflesh. In 1899 he consumption was less than 10,000.

000 pounds.

Besides the low price there has been a demand for horse meat because it is supposed to be wholesome in cases of tuberculosis and tuberculous tendency. Many people regard it as in general more healthful than beef. Its alimentary val-ue is regarded as much lower than that of beef, and it is said to be much more liable to produce toxic effects if the ani mal was not in prime condition when slaughtered or if the meat has been kept

TATHILE ROYAL VELVET FINISH costs a little more than some other finishes, the difference in price is so little and the difference in quality so great that the trifling difference in price is not worthy of consideration. The cheaper stains lose their luster, become sticky in warm weather and cause general dissatisfaction. ROYAL VELVET FINISH retains indefinitely its color and luster.

## Royal Velvet Finish

THESE are selling arguments that can not be successfully met: ROYAL VELVET FINISH flows easy, covering from ½ to ½ more surface than inferior grades, making ROYAL VELVET FINISH really cheaper in price. Further-more it takes just as much time and labor to put on a poor finish as a good finish. Consumers will gladly pay the little difference to get the satisfaction that ROYAL VELVET FINISH insures.

ROYAL VELVET FINISH makes old furniture new, and old floors lustrous.

It is tough, elastic, brilliant and durable. Dries very hard and smooth, and put on at night, is the only finish that can be safely walked on next morning. There is a permanence to the colors that is abso-solutely guaranteed. Walls and ceilings covered with ROYAL VELVET FINISH—can be washed like porcelain—and lessen the possibility of disease.
