## Trentanove's Fine Work.

CHEVALIER TRENTANOVE. (Distinguished Artist Who Designed the Hicks' Soldiers' Monument.)

In size the monument is a huge affair. It consists of a bronze group ten feet high and weighing four tons, surmounting a massive stone pedestal fifteen feet high and weighing twenty-five tons. There are three figures in the bronze group or monument proper and the figures are of heroic dimensions and wonderfully true to life in the minutest detail. The cento life in the inducest detail. The central figure is that of an officer with sword upraised and head turned as if urging on

### The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing houe to the public a parallel fact; that the somach is the most vulnerable organ out of the price ring as well as in it. We protect bur heads, throats, feet and lungs, but the somach we are utterly indiffer-ent to, until disease finds the solar plexus and knocks us out. ## Pig That Selected Church Site.

Most Lancashire cyclists are familiar with Winwick, a village on the way be-tween Leigh and Warrington, surround-ed by good roads, and no doubt many of these wheelers have been struck with the

curious effigy of a pig carved in the tow-er of Winwick church. It is said that when the church was being built a pig moved the foundation some three times, and at last allowed stone to remain on the spot where the church now stands. An effigy was therefore placed in the church tower. The word "Winwick" uttered with a The word "Winwick" uttered with a nasal twang resembles the grunt of a pig, and this is also said to give the village its name.—Baltimore American.

# Save the Babies.

NFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twentytwo per cent., or nearly one-quarter, die before they reach one year; thirtyseven per cent., or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.

COULDN'T KEEP IT.

Kept It Hid from the Children. "We cannot keep Grape-Nuts food in the house. It goes so fast I have to hide it, because the children love it so. It is just the food I have been looking for ever so long; something that I do not have to stop to prepare and still is nourishing." Grape-Nuts is the most scientifically made food on the market. It is perfectly and completely cooked at the factory and can be served at an instant's notice, either with rich cold cream, or with hot milk if a hot dish is desired. When milk or water is used, a little sugar should be added, but when cold cream is used alone the natural grapesugar, which can be seen glistening on the granules, is sufficiently sweet to satisfy the palate. This grape-sugar is not poured over the granules, as some people think, but exudes from the granules in the process of manufacture, when the starch of the grains is chang-

ed from starch to grape-sugar by the process of manufacture. This, in effect, is the first act of digestion; therefore, Grape-Nuts food is pre-digested and is most perfectly assimilated by the very weakest stomach. "There's a Reason." # **Letters from Prominent Physicians** addressed to Chas. H. Fletcher.

Dr. A. F. Peeler, of St. Louis, Mo., says: "I have prescribed your Castoria in many cases and have always found it an efficient and speedy remedy." Dr. E. Down, of Philadelphia, Pa., says: "I have prescribed your Castoria in my practice for many years with great satisfaction to myself and benefit to my patients."

Dr. Edward Parrish, of Brooklyn, N. Y., says: "I have used your Castoria in my own household with good results, and have advised several patients to use it for its mild laxative effect and freedom from harm." Dr. J. B. Elliott, of New York City, says: "Having during the past six

years prescribed your Castoria for infantile stomach disorders, I most heartily commend its use. The formula contains nothing deleterious to the most delicate of children."

Dr. C. G. Sprague, of Omaha, Neb., says: "Your Castoria is an ideal medicine for children, and I frequently prescribe it. While I do not advocate the indiscriminate use of proprietary medicines, yet Castoria is an exception for conditions which arise in the care of children."

Dr. J. A. Parker, of Kansas City, Mo., says: "Your Castoria holds the esteem of the medical profession in a manner held by no other proprietary preparation. I. is a sure and reliable medicine for infants and children. In fact, it is the universal household remedy for infantile aliments."

Dr. H. F. Merrill, of Augusta, Me., says: "Castoria is one of the very finest and most remarkable remedies for infants and children. In my opinion your Castoria has saved thousands from an early grave. I can furnish hundreds of testimonials from this locality as to its efficiency, and merits."

Dr. Norman M. Geer, of Cleveland, Ohio, says: "During the last twelve years I have frequently recommended your Castoria as one of the best preparations of the kind, being safe in the hands of parents and very effective in relieving children's disorders, while the ease with which such
