two-story brick boarsing house at 1102 Union avenue. An explosion of gas was the cause of the fire.

Can't Identify Victims.

The seven victims of the disaster were burned beyond recognition and it is doubtful whether their identity will ever be established. The rooming house was patronized by transient white railroad borers and as the proprietor, Edward O'Connell, kept no register he knew neither the names of his guests nor the number of persons in the place. O'Connell said that his house would accommodate 200 men but he did not believe that there were more than fifty in the rooms when the explosion occurred. rooms when the explosion occurred.

Fire Too Hot to Fight. The explosion is believed to have been caused by a guest who lighted a match in a room where gas had been escaping. in a room where gas had been escaping. The fire alarm was turned by postal clerks at the Union railway station who heard the explosion although they were three blocks from the scene. When the firemen arrived the flames were burning go fiercely and the heat was so intense that they found the work of fire fighting very difficult. When the flames were sufficiently subdued to permit of the firemen entering the building there was so much smoke in the rooms that the firemen could not enter. When they finally gained entrance to the building they found the bodies of the victims piled together in a hall way on the second floor. It was evident that the men were overcome while seeking an exit. The lower floor of the building was occupied by a saloon and barber shop. The loss on the building was \$10,000.

NEW YORK, Nov. 28,-That the estimate that 50,000 emigrants will leave New York this week for European ports is far below the number that will probably sail, is the opinion expressed by Gustav H. Several steamers that have heretofore carried only freight are now carrying steerage passengers. This was the case with the Cambron of the Red Star line, which sailed yesterday with 1000 steer-

Neither one stopped after the accident, but continued on their course at a terrific rate of speed.
