> "Trying on" Furniture. When you go to buy a suit of furniture nowadays in one of our depart ment stores you don't have to specu late as to how it will look in your room nor whether it will fit, in or not. As soon as the salesman sees that a particular suit has met your fancy he calls for a porter or two and turns them loose in one of several rooms fitted up around the main showroom, setting them at work removing all the furniture in it. Then the suit that you seem to be hankering after is placed in appropriate positions in this room, and you can see at a glance just how the bedroom or parlor or dining room will look if you buy that particular suit. There are a dozen of these smaller rooms around the main showroom, and as each one is decorated in a different manner it is easy to pick one out that selling goods it is expensive in the be-

### ECZEMA COVERED BABY Worst Case Doctors Ever Saw-Saffered Untold Misery-Perfect Cure

"My son, who is now twenty-two years of age, when four months old began to have eczema on his face, spreading quite rapidly until he was nearly covered. The eczema was something terrible, and the doctors said it was the worst case they ever saw. At times his whole body and face were covered, all but his feet. I used many kinds of patent medicines, to no avail. A friend teased me to try Cuticura. At last I decided to try Cuticura when my boy was three years and four months old, having had eczema all that time and suffering untold misery. I began to use all three of the Cuticura Remedies. He was better in two months; in six months he was well. Mrs. R. L. Risley, Piermont, N. H., Oct. 24, 1905."

Where Snails Are Eaten.

France is the premier snail producing nation, although Austria, Bavaria and Switzerland have thousands of snail farms, where the famous escargots are raised and fattened on vine leaves. The demand for snails in France is far too great for the supply to be left to chance, and thus it comes about that snail farm ing is an important industry. Paris alone mes millions between September and May, when these little creatures are t their best. In great cities of Europe are stores

Huge tubs of snails in the rough are displayed, and there are be-sides dishes of carefully prepared mol-lusks ali ready for eating. These have been cooked, extracted from their shells and minced. The most popular snails today come from Dijon and Macon, in Burgundy, where they are fed on vine leaves, and the parks, as the local snail farms are called, open their gates in the month of August, when the little creatures bestir themselves actively.-Chicago News.

"Now she is fat and well and has gained 40 pounds. We never have indigestion any more and seldom feel the desire for meat. A neighbor of ours, 68 years old, was troubled with indigestion for years; was a heavy meat eater, and now since he has been eating Grape-Nuts regularly, he are neating the neating formula in the senator, you point out all sorts of mistakes that it is wise for a young man to avoid."

OKLAHOMA AS A COTTON STATE. One of Its Chief Products the Result of

Oklahoma very nearly overlooked cotton, too. The northern men who came in with the rush didn't think of it as a cotton country, didn't think of it as much of anything, in fact, when they saw the red soil, red as a clay bank where a log pile has been burned. It remained for a band of obscure Georgia negroes, in dire mis-fortune, to discover its cotton qualities and give it one of its chief sources of

It was along about 1890 that a negro, E. P. McCabe, ex-auditor of Kansas, with two associates, acquired 320 acres with two associates, acquired 320 acres of land near Guthrie, laid out a town site, and induced some 2000 negroes from the south to settle there. But the town, having nothing to support it, was a failure; the inhabitants were scattered. Still, a few remained, some of them even acquiring land which the white man had passed over as worthless. One day in the fall of 1892, a committee of these negroes visited Guthrie and laid before the business men of that city a wonderful story of cotton. Recognizing in the ful story of cotton.
