London's Last Private Garden.

It is sad to hear that the last of the vate gardens in the city of London is coming to an end. No. 4 Crosby square, with its beautiful old staircase and pleasant rooms, is to be pulled down. Ripeligs were gathered in the summer of 1893 from the fig tree on the wall, and other trees grew near the fountain in the middle of the garden. An 1850 edition of Murray's "London," states that the present houses in Crosby square were built in 1677. This was the year in which the Lady Mary was married to William of Orange.—Pall Mall Gazette.

People Tell Each Other About Good

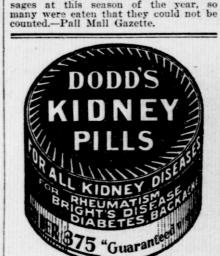

Things. Twelve years ago few people in the world knew of such a preparation as a Powder for the Feet. To-day after the genuine merit of Allen's Foot-Ease has been told year after year by one gratified person to another, there are millions who would as soon go without a dentifrice as without Allen's Foot-Ease. It is a cleanly, wholesome, healing, antiseptic powder to be shaken into the shoes, which has given rest and comfort to tired and aching feet in all parts of the world. It cures while you walk. Over 30,000 testimonials of cures of smarting, swollen, perspiring feet. It prevents friction and wear of the stockings and will save in your stocking bill ten times its cost each year. Imitations pay the dealer a larger profit, otherwise, you would never be of-fered a substitute when you ask for Allen's Foot-Ease, the original powder for the feet. Imitations are not advertised because they are not permanent. For every genuine article there are many imitations. The imitator has no reputation to sustain—the advertiser has. It stands to reason that the advertised article is the best, otherwise the public would not buy it and the advertising could not be continued. ALIVE IN CAPSIZED VESSELS.

A striking example of one among the many strange accidents that befall sail-ors was reported the other day from Newcastle, New South Wales.

The barkentine Kate Tatham turned turtle in a gale, and one of her crew was shut up in her hold. The survivors, who had climbed on her keel as she heeled over, naturally took it for granted that he was drowned. What was their surprise therefore presently to hear faint knockings from beneath their feet, evidently made by their im-

prisoned comrade.

Help was at hand, and a hole was cut through the ship's bottom, when the man was hauled out, little worse for his terrible experience. He had, it appeared, been keept alive by the air which had ov Rev. G. E. Bergemann at the home of been imprisoned in the hull when the vessel capsized and which, becoming compressed as the water rose, had event-ually stopped its further encroachment. He had used a balk of floating timber
