An election is a public affair. If man, pecuniarily interested in "concentrating the control of the railroads in one management." subscribes a large sum to aid in carrying the election, why should his part in the campaign be concealed until he has nut the officials un der obligation to him? If a trust magnate contributes \$100,000 to elect political friends to office, with a view preventing hostile legislation, why should that fact be concealed until his friends are securely seated in their offi-

cial positions? Why were these "known abuses" per mitted to develop? Why have they not been corrected? If existing laws are sufficient, why have they not been enforced? All of the executive machinery of the federal government is in the hands of the Republican party. Are new laws necessary? Why have they not been enacted? With a Republican President to recommend, with a Re publican Senate and House to carry out his recommendations, why does the Re-publican candidate plead for further time in which to do what should have been done long ago? Can Mr. Taft promise to be more strenuous in the prosecution of wrong-doers than the present executive? Can be ask for a larger majority in the Senate than his

party now has? Does he need more Republicans in the House of Representatives or a speaker with more unlimited authority? There is a divine law of rewards

When the Creator gave us the earth, with its fruitful soil, the sunshine with its warmth, and the rains with them moisture, He proclaimed, as clearly as if His voice had thundered from the clouds, "Go work, and according to your industry and your intelligence, so shall be your reward." Only where might has overthrown, cunning undermined or government suspended this law, has a different law prevailed. To conform the government to this law ought to be the ambition of the statesman; and no party can have a higher mission than to make it a reality wherever governments can legitimately operate.

Martian Life Dying.

Martian Life Dying. A sadder interest attaches to such ex-istence; that it is, cosmically speaking, soon to pass away. To our eventual descendants life on Mars will no longer be something to scan and interpret. It will have lapsed beyond the hope of an added glamour from the fact that it has not long to last. For the process that brought it to its present pass musit spark of Martian life goes out. The drying up of the planet is certain to proceed until its surface can support no life at all. Slowly but surely time will shus extinguished, the planet will roll a dead world through space, its evolution-ary career forever ended.—The Cen-tury.

THE COME AND SEE SIGN RETIRED MATADOR A SAILOR. Left Spain When He Lost Reputation as Bullfighter.

One man who has killed more bulls and probably seen more gore and death in the bull ring than any other man who has ever visited the Pacific coast is Senor Gaviac, a Spanish matador of distinction, now a common sailor on board the big Kosmos liner Alexandria, which arrived in port today. Gaviao was signed at one of the South American sailor of the south

Gaviao was signed at one of the South American ports, where for some time past he had been making his living as a longshoreman. Not pleased with the work, he quit to come north. The man is past the prime of life, but still has the whipped muscle of the ath-lete and the quick, sure movement so necessary to the man whose occupation is to gamble daily with death. There is said to be a romance about his quitting the ring in the way of a love passion the man conceived for a high-born Spanish lady who rejected his ad-vances. He is also reported to have quit the ring and his native land on ac-count of losing his nerve at a critical time when killing an infuriated bull, tak-ing to his heels in a panic, thus losing
