CHAPTER I. "It is 3 o'clock, Nannie! They may be here in less than half an hour."

"Yes, ma'am," Nannie answered from the kitchen. "You're young enough to walk double that distance, she added, laughing, 'but I'll lend you a pony if you like—we've got half a dozen sure-footed creatures that can climb like goats."

"Oh, thank you!" Mrs. Gerrard said. "You are very good, but Mona and I have a great deal to say to each other. You must remember we've only spent a few weeks together since she left school. We've to unpack our books and things, and I think we might tidy the garden a little; and Mona must keep up her music."

"You must not forget what you have heard," Mrs. Gerrard said almost sternly. "You would not be happy if you idled away the whole day?"

"Wouldn't it?" Mona laughed, looking at her mother. "You're going to play golf; and one must play golf in the morning, mustn't one, Jean? And you'll play too, mother, when you reach home, when your disengaged arm round her mother's waist. 'Quite feeble old people play golf—quite ancient, dilapidated people—so would be better than nothing, my dear, and praise all your strokes.'"

"Like it, mummy? I love it! Why, it's been my dream and Jean's all last half. Our only dream was that, whatever her name is—wouldn't it let, and there's no place we could have got within miles and miles of Loch Linnhe."

"She turned to look up at the narrow two-story gray house with its little windows all ablink in the sun. 'I don't think you'll like this place, Mona?' Mrs. Gerrard asked almost wistfully.

"This morning," replied Poppleigh, "my little boy asked me why men were sent to congress, and I couldn't tell him."—Chicago News. "You never saw a man who understood women?" "Well, I knew a man once who claimed that he did." "And did he?" "Well, he never married one."—Hons-ton Post.

Her Chin. Dawson—"The facial features plainly indicate character and disposition. In selecting your wife, were you governed by her chin's span?—No, but I have been ever since we married. Her Ears In Danger. Susie had left her toys about the kitchen. Mother (picking them up)—Susie, if you leave these things about the kitchen again I'll box your ears, and throw them in the ash pit.

Blind Man's Buff In the Woods. Will tabbit—This is Johnny Hedgehog. I an tell him by his quills—Comie.

Another Way Out of It. Nobody had ever had reason to accuse Abel Pond of being dishonest, but he was as sharp a man in a bargain as could be found in the county. When the building committee applied to him for a site for the new library he was ready to sell them a desirable lot, but not at their price. "I couldn't feel to let it go under \$900," he said, with the mild obstinacy that characterized all his dealings with his fellow men. "It wouldn't be right." "You ought to be willing to contribute something for such an object," said the chairman of the committee. "If it's worth six hundred, why not let us have it for five hundred and call it you've given the other hundred?" "M'm—no, I couldn't do that," said Mr. Pond, stroking his chin, "but I tell you what I will do. I'll make out a check for a hundred and hand it over to you, so's you can head the list of subscribers with a good round sum and kind of wake up folks to their duty."—Youth's Companion.

A Real Apology.

"When the late Joel Chandler Harris was an editor here among us," said an Atlanta, "I called on him one day and found him very willing to express an apology about me that crept into his columns. "We talked about newspaper contradictions, public apologies and the like, and Uncle Remus' took down a scrapbook and read me an apology that was an apology indeed. It had happened, he said, in a Transval paper. I'll never forget it. I agreed with Mr. Harris that it was the finest specimen of the public apology and retraction extract. It said: "I, the undersigned, A. C. du Plessis, retract hereby everything I have said against the innocent Mr. G. P. Beaudinet, calling myself an infamous liar and striking my mouth with the exclamation: 'You malicious mouth! Why do you lie?' I declare, further, that I know nothing against the character of Mr. G. P. Beaudinet. I call myself, besides, a genuine liar of the first class. "A. C. DU PLESSIS."

His Cough Cure.

"In my boyhood there came to our town," said a clergyman, "a gentle minister who, the very first Sunday of his incumbency, stopped effectually his coughing congregation. "It was a congregation, too, singularly addicted to coughing. Rattling volleys of coughs ran over it every few minutes. The minister, indeed, that first Sunday could hardly make himself heard. He had rather a weak voice. "Well, after his sermon had proceeded for ten or twelve minutes, now audible enough, now drowned under great waves of coughs, he took a resolution, and when the next outbreak was at its height he ceased preaching. "At once the coughing ceased. There was a profound silence. The minister smiled. "My friends," said he, "it seems that when I stop you stop." "From that day in that church they coughed no more."

Queer Wedding Effigy.

There is a curious custom still prevalent in the Bellary district of India in connection with the wedding ceremonies among certain Brahman families. Just prior to the close of the feasting a hideous effigy of a male figure, fantastically robed in rags, supposed to represent the bridegroom's father, is carried along the streets in procession under the shade of a sieve adorned with tassels of onions and mangoes leaves. Every few yards during the procession the feet of the effigy have to be reverently washed and its forehead decorated with a caste mark by its living spouse, the bridegroom's mother. The bridegroom's other female relatives have several mock attentions paid to them by the women of the bride's party.—St. James' Gazette.

Ice and Mice.

For horses suffering from inflammation of the lungs an old prescription was a mixture of shot and powder in milk. This has been applied to human beings. In "Idelhurst" mention is made of sparrows shot, five or six to the dose, to be taken twice a day, as a remedy for "brown kitters," which is believed by the English farm laborers to be caused by the "dights" (their term for lumps) rising up the windpipe. The shot is supposed to weight them down in their rightful place. Sussex, England, is the scene of "Idelhurst." It was a Sussex woman who was ordered by the doctor to put some ice in a bag and bind it on the temples of her sick boy. Inquiring after his patient the next day, the physician received the reply, "Oh, Tommy's better, but the mice are dead!"

Not So Blind.

"Miranda, I want to ask you to marry me and to tell me?" "Oh, George, this is so sudden!" "To tell me what date you and your mother have decided on for our wedding."—Brooklyn Life. "Puberty. "Twice in the newspaper, and all the world now knows it," is the motto of a leading advertising agency. The very truth hath a color from the disposition of the utterer.—Ellot. "Too Much For Him. "How true that old saying is about a child asking questions that a man cannot answer," remarked Poppleigh. "What's the trouble now?" queried his friend Singleton. "This morning," replied Poppleigh, "my little boy asked me why men were sent to congress, and I couldn't tell him."—Chicago News. "Did He? "You never saw a man who understood women?" The Closest Skimming Separator in the World THE IOWA DAIRY SEPARATOR. The Only Gold Medal for Cream Separators was awarded the New Iowa Dairy Separator at the Jamestown Exposition and International Fair. During the past ten years there has been phenomenal improvements in cream separators. It was at the last International Exposition and World's Fair that the NEW IOWA was awarded the only Gold Medal. THE ONLY TEST. It was made at Our Request. Official Test made at the Lewis & Clark Exposition: Portland, Ore., Oct. 21, 1893. Jury of Awards, Lewis & Clark Exposition, Portland, Ore. Gentlemen: As per your official report, I have made a test of the No. 3 Iowa Dairy Separator at the Jamestown Exposition, N. H. The separator was run according to the instructions, and the results are as follows: Cream, 99 percent buttermilk. Skim milk, 98 percent buttermilk. Rated capacity, 400 lbs. actual capacity, 400 lbs. per hour. Yours truly, G. K. MEANS, Asst. Prof. of Dairying, Iowa State University, Ames, Iowa. These records are only supplementary. We want to show the Separator. IOWA DAIRY SEPARATOR CO. Minneapolis, Minn. MICHAEL DEGENHARDT, AGENT.

THE IOWA WINS. In a public contest held Nov. 17, 1908, at the Creamery of the Door County Creamery Co., on Cedar St., Sturgeon Bay, Wis., the Iowa Separator won a decisive victory over the DeLaval Separator. Wulf & Co., Messrs. Evans and Alexander, two DeLaval experts, conducted and directed the skimming operations of the DeLaval Separator. OUR CHALLENGE. We stand ready to test the "IOWA" Separator against any other make of separator and will deposit in the Bank of Campbellsport ONE HUNDRED DOLLARS to any other separator company's FIFTY that the Iowa will skim closer on the average runs at temperatures of 50, 60, 70, 80 and 90 degrees, and a cream of not less than 25 to 50 per cent than any other separator, all machines to be run exactly as printed instruction book sent out with such machine. Furthermore, if five machines enter the contest we will contribute towards St. Matthews Church, Campbellsport, one hundred dollars if two out of the five do not leave an average of five times as much butterfat in the skim milk as the Iowa, tests to be made by a competent person subscribed to the Dairy School at Madison. We to use in these tests No. 2 or 3 Iowa Separators, this being the size in general use by our farmers. There are no Wulf tricks in this challenge, and we have deposited Fifty Dollars in the bank as a forfeit if we refuse to enter the contest. I will give any farmer \$25 who will bring this contest about, no machine in the world barred. This is no bluff, try us and find out. Signed, Michael Degenhardt, Campbellsport, Wis. Mr. Degenhardt is the agent for the Iowa in Fond du Lac county and by purchasing separators in car load lots he is able to quote prices exceedingly low and which appeal to the farmers. These cream separators can be seen at his headquarters in Campbellsport or Mr. Degenhardt will be pleased to call on a prospective buyer. Write today to Mr. Degenhardt if you are interested. Among the purchasers of the last few days are the following: Anthony Bowers, Wm. Kitter, Campbellsport; Wm. Gibbons, Eden; John O'Brien, Oseola; Edward Graham, Oseola; A. Schueneman, Ashford; Poole Bros., Armstrong; Charles Peterson, Patrick Fitzgerald, Wm. Berg, Charles H. Schwartz, C. D. Klautz, John Blackman, John M. Mance, John Feuerhammer, Auburn; John Kueckel, James Cahill, Oseola; Aug. C. Luedke of Lomira and John McCarty each purchased a No. 5, 1000 lb., per hour, for \$125. Remember that these Cream Separators are the best in the world and Degenhardt stands back of every sale he makes and the company stands back of him.

What are Bucket Bowls? They are big diameter bowls, filled with complicated parts to help them ski decently. They are dangerous—expensive—hard to wash. Tubular Dairy Separators. Have no inside contraptions. Just a simple tubular bowl—with one small piece to take out. It is, by test—the closest skimmer known to science. Can be washed clean in five minutes. Examine the Tubular—look into the bowl—read the catalog we will give you. Kleinhaus & Boegel, Elmore, Wis.

100 PER CENT A YEAR FOR TWENTY YEARS TO COW OWNERS. That's the marvelously good investment that more than ONE MILLION satisfied users are finding the DE LAVAL CREAM SEPARATOR. With three or more cows a DE LAVAL separator saves its cost the first year, in more and better product, and it may be depended upon to go on doing so for twenty years, as there are already thousands of instances to prove. There's half this much saving in the use of a DE LAVAL over inferior separators, while other separators last but for six months to five years instead of twenty years. They lose half that might be saved while they do last. That's the whole separator story in a "nut shell" and the reason for the now nearly universal sale of DE LAVAL separators. A DE LAVAL catalogue may be had for the asking. Likewise the trial of a DE LAVAL machine. GRELL & WOLLENSAK, SPECIAL SELLING AGENTS Kewaskum, - Wisconsin

The American navy on the land employs 25 to 50 per cent more men than the navy on the sea. Directly and indirectly it pays nearly twice as much in wages. It costs as much to maintain in force a stroke of work is done as to maintain the whole fleet at sea.

Where a Miser Hid Her Coins.

A death in a poor part of Budapest has just brought to light an extraordinary story of a woman's double life. She had lived apparently in poverty and charity, but a search of her rooms, which were in a terrible state of neglect, revealed that she was worth more than a million kronen, chiefly in house property. A number of stuffed cats in her room were full of gold.
