The following guests were pleasantly entertained at the home of Mrs. A. Krueger Sunday: Mr. and Mrs. Peter Uelmen of New Prospect; Mr. and Mrs. Gust Utke and family, Mr. and Mrs. Rahling and Charles Rauch of Campbellsport and Dr. C. N. Trompen of Chicago.

Mrs. Ed. Glander might have met with a serious accident while returning home from Scott Sunday evening. The horse became frightened near the New Fane hill, the buggy was upset and Mrs. Glander and children were thrown out, but escaped injury. The only damage done was to the rig.

Many people gathered here last Sunday to view the Klein & Schiltz home, which was destroyed by an explosion of dynamite some time ago. The house has been left in the same condition as it was soon after the explosion, and those who have seen and heard the results of the accident, think it only miraculous that the occupants of the house at the time of the explosion should have escaped with such slight injuries. Jacob Schiltz and sister Theresa have recovered from the slight injuries which they received, while Mr. Klein is still confined to his bed, but is getting along nicely.

Large Blast Fired.

One of the largest blasts ever set off in this section of the country was fired by the Union Lime company at Hamilton late Tu-sday afternoon. It took between six and seven tons of dynamite and several thousand pounds of powder for the blast, which loosened about 45,000 cubic feet of rock from the ledge. The blast was set off by J. M. CONGRESS IN SESSION.

In the Senate.

An invitation, extended by Senator Hayner to the "insurgent" senators to join the Democratic party was spurned by Senator Dolliver on behalf of the "in-surgents," on the 27th. This suggestion by the Maryland senator followed a made the occasion of a friendly demon-speech by him in the Senate criticising as unconstitutional some of the features ernment school. Mr. Roosevelt asknowlof the administration railroad bill. The session was concluded with a speech by Senator Bristow, who arraigned the present system of railroad rate making.

A spirited debate on the provisions of the railroad bill authorizing the making of rates was engaged in on the 28th by Senators Clay, Bristow, Cummins, Craw-ford, Bailey, Aldrich, Borah, Root and Heyburn.

The first test vote on the railroad bill was had in the Senate and resulted in a victory for the administration members. on the 29th. The Cummins amendment, which would require all traffic agreements made between railroads, and all rates, fares and charges to be approved in advance by the interstate commerce commission, was defeated by a vote of 29 to 35. Eleven Republicans, most of them from the insurgent ranks, and eighteen Democrats, voted for the Cum-mins provision. All of the votes against it were east by Republicans.

The acceptance by Congress of a statue of Francis H. Pierpont from the state of West Virginia, for the perma-nent exhibition in statuary hall at the canited methods. capitol, was the occasion of eulogies in the Senate on the 30th.

In addition to considering the railroad bill for two hours, the Senate on the 2nd discussed at length and passed the bill creating a bureau of mines in the inte-rior department. The bill had received the sanction of the House and now only requires the signature of the President. The long and short haul amendment to the railroad bill prepared by Senator Dixon was the subject of lively debate.

In the Senate on the 3rd the traffic agreement provision and section 12, dealing with the combination of railroads. were stricken from the railroau bill. The Senate also passed a House bill creating an art commission for Washington.

In the House.

The entire day on the 27th was devoted to the consideration of bills relating to Indian lands. One of these meassabath of Illinois, so that in the disposi-tion of the lands of the Rosebud Indian reservation in South Dakota citizens could make application for such lands at their homes without the necessity of gocharge. the reservation. Sabath de clared that last year \$5,000,000 had been spent by disappointed homeseekers in their unsuccessful efforts to obtain public land. The small number of the Democratic members in attendance in the House on the 28th during most of the session made it uppossible for the insurgents to score victories over the regular Republicans. An amendment was adopted to include telegraph and telephone companies within the scope of the interstate commerce law. In the House the railroad bill was un der consideration also on the 29th, Nu-merous amendments were offered, most of which were voted down. An amend ment making provision that the physica valuation of railroad properties shall be ascertained was offered by Mr. Madden of Illinois and adopted after an extend-ed discussion. The provision adopted yesterday for the inclusion of telegraph and telephone companies within the scope of the interstate commerce lay was further amended so as to permit of different charges being made for press dispatches and for night messages than are made for commercial dispatches. The House accepted the Pierpont statue and heard eulogies. Several hours were also devoted to the passage several private claim bills. It was "suspension day" in the House on the 2nd, and numerous bills were passed. Among them were measures to increase the personnel of the engineer corps of the army, to provide for addi tional lighthouse equipment and to build a monument at Midway, Ga., to the memory of Gen Stewart of revolutionary fame, the great-great-grandfather of for mer President Roosevelt. The House also removed the traffic agreement provision from the rail bill on the 3rd. The House agreed to the long-and-short-haul clause of the House bill in the form that it came from the committee except that it provided for an investigation by the interstate commerce commission of data relating to that class of rates.

DETOUR, MICH., JUSTICE'S FAMILY ESCAPE CREMATION.

Oil Is Poured Over Floors and Ignited, Following Clash with Tough Element of City.

SAULT STE. MARIE, Mich., May 4.-[Special]. Assaults on the dry regime in the village of Detour have caused disorders that would do credit to a western town in the sixties and which have nearly resulted in fatalities. There was considerable drinking Saturday night and the rougher element painted the town a crimson hue. One man became more boisterous than the rest and finally was locked up. Friends endeavored to take him away from marshal Riley but were unable. Early Sunday morning the marshal heard noises about the house and on getting up to investi-gate found the jail broken open, his prisoner gone and the building on fire. Oil had been poured on the floor but the fire had not gained much headway and was easily extinguished. Returning home the marshal found the interior of a shed owned by the justice who sentenced the prisoner afire and the family sleeping, unaware of danger. Riley smashed in the door and put out

the fire. Oil had been poured all over the floor.

The offender was again taken into custody and given a stiffer sentence. County officials are making investigation and more arrests are likely. present all is quiet in the village but the better class of citizens, drys and wets, are up in arms over the outrage.

LESS LESE MAJESTE.

Or at Least Few Persons Are Punished Now for Speaking Ill of the Kaiser.

The offence of lese majesty bids fair to disappear from the criminal records of modern Germany. Until three years ago the newspapers published almost daily reports of persons who were fined or sent to prison for having allowed hasty expressions to escape about the Kaiser's most excellent majesty. The severity of the law was relaxed

three years ago, and the police instructed not to be too eager in bring forward persecutions for "Majestaetsbeleidigung" and the result has been that in 1907 the number of convictions fell from an an nual average of 600 to 120 and in 1908 the number fell still further to 39. Eastern Commercial Bodies Try to Avert Freight Trouble Between Various Railways.

NEW YORK, May 4.-Another effort to avert the impending freight rate war to avert the imperiang freight fate war due to differences between eastern rail-roads over the import differential to Chi-cago was made today when representa-tives of commercial bodies of Philadel-phia, Boston and Baltimore met officials of various railways at a conference in the offices of the trunk line association here

After failure of a similar conference held Thursday last to arrive at an agreement, the Pennsylvania railroad an best, and one which has caused many a nounced that, tiring of the fruitless ef-forts to bring about an amicable adjustment of the controversy, it would on June 11, cut the 69-cent import rate to Chi-cago to 61 cents, 6 cents below the present Boston rate. At the same time it was declared the Philadelphia & Read-ing and the Baltimore & Ohio would

join the Pennsylvania railway. Today's conference was held at the request of the Boston & Maine railway, which refused to advance its rate from 67 to 70 cents per 100 pounds to equalize the charge in comparison with the 69-cent rate from Philadelphia, which is 300 miles nearer Chicago than Boston.

STATE TO SELL LAND.

About 111,000 Acres, Located in Fourteen Counties, to Be Offered.

MADISON, Wis., May 4.-Wisconsin in July will offer at public sale 111,000 acres of timber, grazing and agricultural land in fourteen counties in the northern part of the state which is expected to bring about its appraised value of \$400,000.

Some of this land is considered excellent for grazing and tilling purposes, and most of it, being virgin soil, is expected to produce large crops of grasses and grains. This land is appraised at from \$1 to \$25 an acre, but will average about \$4 an acre. Inquiries have come from the Dakotas, Iowa, Nebraska, and other purely agricultural

states. The largest acreage of these lands lies in Price county, 21,000 acres, Burnett county, 20,000 acres, and Sawyer coun-ty, 14,000. Large tracts lie in other counties near these three.

THE RAZORBACK HOG.

Menace to Hunters-Destroys Eggs and Young of Game Birds.

A North Carolina correspondent says that through the enforcing of the stock laws in the mountains of that state the ravages of the razorback hog are being curtailed.

"In a number of the southern and middle western states hogs are permitted to roam at will through the woods and river bottoms of sparsely settled regions. An attempt is made to mark them by means of notching, slitting or clipping neighborhood feud and the spilling of

human blood. There is always a certain percentage of these hogs that cannot be claimed or taken up by any person, because proof of ownership is lacking, and as the prac-tice has been in vogue for a great many years there are plenty of genuine wild

Whether or not the progenitors of the razorback hog were fat, slow going beasts, such as prosperous farmers own, we do not know. The fact is that the present woods rangers are long of leg, swift of foot and so lean that the term "razorback" is fairly appropriate. Accustomed to encounters with other woods prowlers in defence of their young, they have developed courage of a sort, and while they will not attack men they often set upon hunting dogs, invade camps and despoil everything within their reach

In the regions infested by these scav-engers the loss in eggs and the young of game birds is very large. Where there are no fences the razorbacks scour the woods so garefully that nothing they will eat escapes. They travel fast and far and rake the country as with a fine tooth comb; their sense of smell is highly developed, and the eggs and young of ground nesting birds are never safe when they are abroad.—Forest and Stream.

"Don't be a fool, Monkton! It's of no use, and you will only get yourself into a fearful hole. It will blow over. The fellows have paid up for the mess they made at old Pastyface's with chucking the things about. Stupid rot, I call it! said the other boy. "Pastyface is not a bad old sort, but they made him furious, or he would never have gone to the Head about it."

"I don't care; I will pay him out. All you have to do is to stop your eyes and ears. I have told no one but you."

"Well, old chap, I do wish you would leave it alone. We shall get no good out of him with riling the old beggar any more," said Laurence Harcourt lazily, a tall, good-looking lad, with a bright curly head, which had given him the nickname of "Girlie," combined with his indolent manner.

The two boys, though such a striking contrast, were great friends. They had been at the same preparatory, and had come to the famous old school the same term. Harcourt was a great favorite with all the masters; though naturally very lazy he had plenty of ability when he chose to exert it, and such a cheery, sunny disposition, it was difficult to be

angry with him for long. Monkton, on the other hand, was dark, with flashing eyes, and a quick, imper ious manner.

SPRINGFIELD TO HAVE INQUIRY.

CHICAGO, Ill., May 4.--I believe that 50 per cent. of the seats in the United States Senate can be said practically to have been purchased."

This statement was made here today by Former United States Senator William E. Mason in the course of an interview in which he urged the election of United States senators by direct vote of the people.

A morning paper quotes Senator Mason as saying that he had heard at Springfield before the election of Mr. Lorimer that the honor was for sale, and that the senatorial toga would go o the highest bidder. Mr. Mason, how ever, denied that he had made any such allegation.

Mr. Mason was a candidate for the senatorship, but withdrew his name be-fore the last vote, when Mr. Lorimer was chosen.

At his office today State's Attorney Wayman stated that he expected fifteen nesses today were Representative Charles

A. White, who alleges that he accepted \$1000 to cast his vote for Lorimer; Senator Albert E. Isley of Newton, Ill., who made the first speech in the Legislature denouncing Lorimer as a candidate, and Representative Henry A. Shephard of Jerseyville, Ill. or and Empress have their approach her-alded by three-noted horns, and those of the royal princes by two-noted horns. No infringement of this prerogative by ordinary motorists is tolerated.

"The fact that the royal cars, both in England and in Germany, may so easily be distinguished is an indication of the confidence which exists between the monarchs and their respective peoples," says The Gentlewoman. "In less happier times it would have been courting danger to have carried such marks of disinction, and even now in less fortunate ands the rulers dare not travel so openly.

The Lords Pass the Budget.

It was conceded by the Lords that they would make no further opposition to the Lloyd-George budget, though it was their throwing out of this budget that caused the termination of the last Parliament and the Liberal party's "appeal to the people." Very dubious was the victory which the Liberals secured. They hold their present power only by reason of aid from Redmond's Irish Nationalists, and Redmond is at the present moment nore influential to dictate than is Prime Minister Asquith. But however slight the fabric of their influence, the Liberals are the embodiment of what is the best approach to a reliable parliamentary ma-jority that can be marshaled at the monent. They have put through the Lloyd-George budget, and the Lords have fol-lowed them in passing it. If the Union-ist forces gain sufficient encouragement from the people at any future election they will be sure to revise the budget as one of their first contributions to practical governmental duties.

The land tax of the new budget is cer-tainl an innovation, for it places a tax on land and provides for a revaluation as a basis of future taxation. There has not been a valuation of land in England ince the reign of William and Mary, more than two hundred years ago. Unler William and Mary a small tax, based on that new valuation, was imposed on land, but not long thereafter the government needed ready money for war expenses, and landowners were given the privilege of forever freeing their land from taxation by making a single money payment equaling the amount of several years of tax. Practically all the land was thus freed from taxation.

What land has paid for the support of government in England has been enormous, but it is paid not in the form of taxes, but of "rates," and the in-cidence of the burden is not upon the owner of the land but upon the tenant. Ans Overlands are made by modern automatic machinery. And they are made in the fock is brought down to the minimum.

AN HEIRESS PLANS.

How to Spend an Income of One Hundred Thousand Dollars.

Miss Margaret Cornelia Hoffman, the New York manuscript reader, who was left a legacy of \$3,000,000 by her uncle, Charles Ferdinand Hoffman, a former Wall street clerk roted for his parsimony, has been interviewed as to her plans for the disposal of an annual income of approximately \$100,000.

Miss Hoffman is a very pretty brunette, with a soft, melodious voice. She is just 20 years old, and comes here from Louisiana. She retains her room in the boarding house at 134 State street, Brooklyn, where her uncle lived for twenty years, but she is at present stay-

Thomas C. Shotwell, one of the greatest market reporters in America, writes from New York, under date of March 20th, and says:

"The tariff tangle with Canada which President Taft has taken in hand is of importance chiefly because of the multitude of American farmers that are crossing into the Canadian northwest. Most conservative estimates of their number place it at 150,000 for 1910. Some say as many as 250,000 will cross. These are all fered from kid- expert farmers and their places in the ney trouble for United States are being filled by unthirty years. I trained men from Europe and from often passed the cities. Canada is gaining rapidly in agricultural importance and within a few years the United States will have to call on the Dominion for wheat. Production of wheat in the United States is not keeping pace with the population. A tariff war would

feature imaginable. You want it, because it will cook any dinner and not heat the room. No heat, no smell, no smoke, no coal to bring in, no ashes to carry out. It does away with the drudgery of cooking, and makes it a pleasure. Women with the light touch for pastry especially appreciate it, because they can immediately have a quick fire, simply by turning a handle. No half-hour preparation. It not only is less trouble than coal, but it costs less. Absolutely no smell, no smoke; and it doesn't heat the kitchen.

owners begin to pay a share of national ex-pense that led to the introduction in the Budget of what is called the "uncarned in-crement" clause, under which land-owners were to pay as a tax, on land leased or sold, twenty per cent of its increased value over what it was set down as being worth under the valuation system provided for by the Rudget by the Budget. The Lords have done a shrewd thing

in bowing before the tempest and permitting the Budget to pass. Another issue, which has grown out of their rejection of the Budget when first presented, will give rise to a fierce contest before the electorate. It will decide whether the Lords shall preserve or lose the veto power which they at present possess. Strange though it may seem, the English electorate may not be ready to give up the bi-cameral system of legislation. 'ine House of Lords has its virtues as well as its defects.

A Dangerous Phase of College Life. It is not an outside critic, but a member of the faculty of an institution of

makes this serious, but, as everyone knows, truthful statement concerning the motive of some of those who seek enrollment as college students and the countenance which they receive from the powers that be:

An increasingly large number of young people go to college openly and avowedly for a so-called good time. They and their parents talk as if the years in college from eighteen to twenty-five were a respite from eighteen to twenty-live were a respite granted to a convict before entering upon a term of penal servitude. The college is largely to blame that there is a growing doubt in the public mind as to the value of this great educational machinery which turns out so many weakings and incom-petents. The college has allowed amuse-ment in the form of dissipation to flourish, while amusements which micht serve as while anusements which might serve as recreation have been neglected.

Ostensibly college are for education, not for recreation. Where sports and social functions are permitted to engross a large share of the attention of stu-dents, education is lost sight of by many of those who need it most. Unfortunate-ly the atmosphere which is permitted to be created by the element in the student body that deliberately goes in for a good time is breathed by young men and young women who have entered with earnest purpose, and it exhilarates them to their undoing. For the vast majority who enter college, life is bound to be a struggle, and if they pass through their college experience without acquiring education experience without acquiring education that will fit them to enter the struggle better equipped for it because they have attended college, the college manage-ment is to blame. No one will dispute the old saw that "all work and no play makes Jeck a dull boy," but all play and no work has made many a Jack an idle and vanid boy and a necless man idle and vapid boy and a useless man and will continue to do so in the case of future Jacks and in the case of future Jills as well, unless the people in charge of colleges where there is an overplus of athletics and of fraternal association mend their ways.

How Weasels Carry Eggs.

One morning recently a weasel was surprised crossing the public highway leading from Jedburgh into Oxnam Wa ter. It was observed to be carryin something under its chin and presse ter. close against its slender neck, and when a collie dog belonging to one of the onlookers made a dash at the little creature it dropped its burden—a hen's egg—and glid'ng under the roadside hedge disapared in the woodland.

On being picked up the egg was found to be without a crack. The nearest poultry run is about three hundred yards dis tant from the place where the weasel was intercepted.-The Scotsman .

take as candy. "There is a bill in Congress to make a quart a quart." A quart of what?-Richmond (Va.) Virginian.

A Clean Man

Outside cleanliness is less than half the battle. A man may scrub himself a dozen times a day, and still be unclean. Good health means cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it and act it. He will work with energy and think clean, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stomachs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

Dr. Pierce's Golden Medical Discovery

prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and clean, healthy flesh.

It restores tone to the nervous system, and cures nervous exhaustion and prostration. It contains no alcohol or habit-forming drugs. Constipation is the most unclean uncleanliness. Dr. Pierce's Pleasant Pellets cure it. They never gripe. Easy to take as candy.
