TURNS IN FALSE ALARM AND SHOOTS RESPONDING FIREMEN.

Insane Murderer Then Slays Wife and Babe-Dismissal From Fire Department Service Inspires Tragedy.

San Diego, Cal.-Bert S. Durham, a discharged member of the local fire department, ended a man hunt Monday by fatally shooting himself through the head after killing three jersons, including his wife and child, mortally wounding a fourth and severely injuring a fifth.

Durham, in a desire for revenge, turned in a false alarm and when his former fellow workmen responded he fired a volley of shots at them, killing one and probably fatally injuring two others.

Durham then ran to his home and with a piece of steel wrapped in a handkerchief beat his wife and baby about their heads as they lay asleep, killing both.

Durham, who had been hunted relentlessly for hours, dodged his pursuers, leaving them without a clue, boarded a car in the residence section and rode quickly to the plaza in the center of the business district. where he put a bullet into his brain. He recovered consciousness later, but the coroner says he will die.

Durham's victims were: Donald F. Grant, engineer engine company No. 3, San Diego fire depart-

Mrs. Bert S. Durham and child. Peter Sampsell, captain hose com-

Guy Elliott, driver hose company, may recover. At the first shot Grant fell from his

Durham then leveled his revolver at Captain Sampsell and fired twice, both bullets piercing Sampsell's lungs.

Two more shots, fired at other members of the crew, went wild, after which Durham drew another revolver and with it covered his retreat as he started to run from Assistant Chief Snedecor, who had driven up in answer to the alarm. As he disappeared in the darkness Durham shouted back to the assistant chief: "Tell my wife I am going to kill myself."

VERDICT, DECLARES RAILWAY MAN WAS SELF-SLAIN.

Jury's Open Finding May Make It Necessary for Heirs to Bring Suit to Obtain Accident and Life

Insurance.

Chicago.-Ira G. Rawn killed himself, according to the verdict returned by the coroner's jury Friday. The Monon president was shot with his own revolver, held in his own hand, the verdict reads, but whether accidentally or with suicidal intent is not specified. The jury said the former explanation was the less probable. The finding of the jurors is described

as "an open suicide verdict." The verdict was reached after a three hours' session and after much lively debate in the jury room.

Although none of the jurors would talk about their action, it was said that three held out for a verdict of suicide and the others for one of accidental shooting, and that the open verdict returned was a compromise, to break the deadlock. That the insurance companies will

contest the payment of policies is said to be assured, and it is declared that relatives of the slain railroad presicollect the insurance.

No representative of the Rawn family was present when the jury's findings were made public.

The general consensus of opinion among those present at the close of the inquest was that the jury had taken the only course open to it.

DIE IN TEXAS RACE RIOT

Eighteen Blacks and Three Whites Are Killed in Pitched Battle Near Slocum.

Palestine, Tex.-Following a pitched battle between the negro farmers of this section in which at least 300 blacks took part and three companies of state militia from Houston and Galveston and a detachment of state rangers fought for hours and, it is said, that 18 negroes have been killed and the bodies of three white men are dying in an improvised morgue in the little town awaiting the arrival of undertakers from Hous-

Beginning Friday afternoon the race riot between the negroes and whites waged continuously until Sunday night.

The rioting began near the village of Slocum. Several reasons are assigned as the cause of the racial feeling. First, the refusal of a negro to pay an obligation for which a white farmer stood sponsor.

Later came reports of secret meetings among the negroes and an alleged confession of a negro that the murder of the man in question, James Spurger, and his family was planned. The situation reached a climax, however, when a negro was discovered books showing a defalcation of over advancing on Spurger from the rear, \$25,000. It is not believed Rodgers armed with a shotgun. Injurious Little! Prairie Dog!

RAISED ON NATIONAL FOREST TO

tional forests on an extensive scale seem to have been highly successful in ridding selectplans are now being made to carry on the work much more widely next year.

The first experiments in this line were made in New Mexico by a stockman who has since entered the forest service. In 1901, Dr. C. Hart Merriam, chief of the division of biological survey of the department of agriculture, made a report upon "The Prairie Dog of the Great Plains," in which the damage done by the dogs was poisoning them were suggested. This report of Doctor Merriam's may be said to have blazed the way for practical work in prairie dog extermina-

Prairie dogs are very obnoxious to the stockmen, for they devour much grass and undermine the surface of giving every assistance to the forest the ground with their burrows. Where they establish themselves the destruction of the range is only a question

Range improvement in national forests is one of the chief objects of regutating the grazing. For this reason the forest service is leaving no stone unturned to prevent range deterioration. Stockmen who had suffered heavily from the prairie dog pest were solicitous to have the work taken up, and gladly offered to co-operate with There is a large white bird who travthe service in furnishing men and els with an irregular and heavy horses to distribute the poison.

of the Leadville and Pike national forthat more material had been used than was necessary.

wheat with a preparation of strych- sharp beak is firmly imbedded in the nine, cyanide of potassium, anise oil piece of timber, and his neck is and molasses. When a sufficient quan- broken.-London Telegraph. tity is ready, the poisoned wheat is carried to the field of operations. There the stockmen supply men and horses, the wheat is given out to the riders, and distribution begins.

Each rider carries the wheat in a slung across his right shoulder and hanging at his left side. His left hand is free for the reins. With his right hand he uses a tablespoon to near the entrance of the holes. A little practise enables the men to drop the wheat while keeping their horses at a sharp trot. By crossing the town, to and fro, like a man sowing grain, they can cover a large area in a surprisingly short time.

The action of the poison is almost instantaneous. Most of the prairie dogs in a town are dead within an hour or two after the bait is dropped. er has gotten to be a great matinee

The work is considered to have dem- idol, Mr. Bones. onstrated the entire feasibility of fight-

TTEMPTS made last spring at | was found, however, that to be suc poisoning prairie dogs in na- cessful the poison must be scattered in the spring, when the dogs first come out from their winter quarters and before the green grass is offered ed areas of these small pests, and to appease their hungry appetites Next spring the poisoning will be un dertaken much more extensively. well-known stockman in northern Arizona writing to the forest service of his stock range on the great Canyon Diablo plateau, says: "Five years ago such a thing as a prairie dog was unknown here. Two years ago there were a few widely distributed over the range. Last year they became numerous, in fact, quite common. If didn't thank me. They laughed in my something is not promptly done to destroy them they will do great harm to the range."

It is expected that the campaign against the dogs in the Arizona and New Mexico forests will be most successful, as it has met with universal favor among the stockmen who are

Stockmen and others who wish to try the poisoning on their own account can obtain the formula for its preparation and direction for its use from the district forester at Albuquerque, New Mexico, or from the forest service, Washington.

Catching Sea Birds.

An ingenious way of catching birds is practised in the Orkney islands. flight, again and again rising and To ascertain what success could be taking a tremendous plunge into the had in ridding considerable areas of blue depths of the ocean, where it rethe pest, a selection was made of parts | mans out of sight for the space of 15 seconds or so. This bird is the ganests, which were badly infested. The net or solan goose, and it is the only region in these forests upon which the aquatic bird that takes its prey by dogs were located aggregated 300 headlong diving. The wily Orcadian square miles or more. In order to takes advantage of the bird's peculiar demonstrate the effectiveness of the plunging habit by painting the porwork, an area of some 60 or 70 thou- trait of a herring on a piece of plank sand acres of actual dogtown was seland weighting it just sufficiently to lected for the test. From 80 to 90 keep it the right distance under the per cent, of the dogs were killed with water. This ingenious counterfeit is the first distribution of the poison. It placed in a part of the sea infested by will be necessary to go over the ground gannets, and presently along comes a a second time and by "spotting" the bird whose sharp eye quickly detects occupied holes the remaining dogs will what he supposes to be a fine fat hereasily be killed with a very small ring. Away up he flies until he has amount of the poisoning material. The reached a sufficient altitude to enable average cost per acre for the poison- him to make a successful dive upon ing material was only one and one- his prey. Down, down he comes half cents, and even then it was found straight as a plummet, and the sea is churned into foam all around where he has entered it. But, alas! he The poison is prepared by coating never rises more, poor bird! His

Carrying Plague From Rats.

Egyptian or rat fleas had been spread all over the warm countries of the world by the rats which they wortin pail supported by a gunny sack ry and ride. It has been proved that man fleas and cat fleas can carry plague, but not so strong or deadly as the rat flea's plague. One flea's stomach and gizzard hold 5,000 plague measure out the poison and drop it germs, where germs can further grow and keep alive for 15 days, but after 15 days white blood cells in the rat's or flea's blood kill the plague germs. Fleas suck the rat's blood, and so get white cells from the rats. Both rats and fleas become so charged that the plague stops owing to immunity.

> Idle All the Time. Interlocutor-I hear that your broth-

Mr. Bones-Yes, indeed. He's idle ing the prairie dogs in this way. It all de time dese days.

WAS INVENTION OF A BOY

Steam Engine's Automatic Cut-Off Valve the Idea of a Boy Intent on Play.

Among the government's patent exhibits is a collection of miniature steam engines. Models of the engines of Hero, of Alexandria, of Newcomb and of Watt illustrate the successive steps in the development of what has become the giant of our modern industry. There may be seen a model of the early engine upon which boys were employed to turn the cocks that, alternating, let the steam on and shut it off. One of these boys, Humphrey Potter, by name, instead of settling down like a machine to the monotonous work, kept his eyes open. He discovered that a certain beam above his head worked in unison with the cocks that he opened and closed. He accordingly connected the two, and after seeing that the device worked properly, ran off to play. His employers began to notice a

much greater regularity in the movement of the engine than before; this led to the discovery of his secret, and to the subsequent adoption of his device everywhere. An examination of the model of the engine to which the scoggan was applied arouses in one the wonder, not that the boy thought of it, but that anybody before him should have failed to do so. This is, the "after thought" of a great many notable inventions. Opponents of the patent system often raise the point that all great inventions are "in the air," that the same suggestion sooner or later will come to a great many different men, and hence that the patent is simply a reward to the one who happens to arrive first.

Patent experts acknowledge considerable basis for this contention. They say also that the lament often seen in the newspapers, "His invention died with him," referring to a secret process, is rarely borne out by

AMERICANS ARE VERY RUDE

An Unsophisticated Englishman Tells How They Laughed in His Face When He Imparted Information.

"Americans are rude, extremely so," said the Englishman just four days over. "They don't want to be told anything; think they know it all. Yesterday three men who sat in double seats with me in an elevated train were arguing over a matter that none of them seemed to have definite information on. It happened to be some thing that I had read a long article about the night before, so I spoke up and told them what I knew. Now, in my country, we would thank a man who did that, but these Americans face, that is what they did."

'That is strange," said his Amenican friend. / "Americans are usually very grateful for every bit of information offered them. What did you tell them, anyhow?"

"Well, they were fussing about which city had the finest diamoond in the country. One said Philadelphia had, another Chicago, the other stuck out for Pittsburg. I said, 'Pardon me, gentlemen, you are all mistaken. Utica has the finest diamond in the United States. I read about it last night. It weighs I forget how many karats and was brought from London by a Mrs. Patterson about a year

"And then they laughed. Very rude Americans are, I think."

Use Your Own Cup.

Solemn enough warning cannot be given about the use of public drinking glasses and cups. Doctors have counted over twenty diseases that can be transmitted by this means, and most of them are serious and terrible ones. It is easy to carry around a small glass or a folding tincup of your own, or to purchase one of the many forms of antiseptic temporary receptacles, and the extra trouble is well worth your escape from danger. Above all, do not let the children drink from the rusty and germ-laden tincups at springs or fountains in the parks.

If ever it should for some reason be necessary to use any of these public cups; do not let your lips/touch the edge, but, after thoroughly cleansing the vessel, drink directly from the water contained in it. It is to be hoped that in time these antiquated relics will disappear, and all public recreation grounds will be equipped with fountains from which one can drink the water directly.

Rent for a Forge.

Harper's Weekly relates that more than five centuries ago the corporation of London acquired from the crown a forge for which it promised to pay an annual rent in its products. Although the forge was demolished in a riot during the reign of Richard II., 1377-1399, and was never restored, the rent is still punctually paid every Oc-

Last autumn, on the appointed day, the city solicitor went to the office of the king's remembrancer and made the following proclamation: "Oyez, oyez, oyez. Tenants and oc-

cupiers of a certain tenement called the Forge in the parish of St. Clement Danes in the county of Middlesex. come forth and do your service." The city solicitor then solemnly counted six horseshoes and 61 nails.

By SENATOR S. M. MARSH

"This question is often discussed as if county option and prohibition were the same thing.

"The fact is, the passage of the law would not close a single saloon in any county in the state. It would simply extend to each county the PRIVILEGE of CLOSING ITS SALOONS if a MAJOR-ITY SO VOTED.

"It is argued by the liquor interests that a county option law would infringe on the personal liberty of individualsthat even a majority has not the right to dictate the personal conduct of the day here with their parents.

"Neither the present local option law nor the proposed county option law does, or would dictate to a man as to whether he shall drink.

'IT GIVES A MAJORITY THE PRIVELEGE OF DETERMIN-ING whether the saloon shall exist in a given county-whether it is a desirable or an undesirable institution; whether or not it is an American institution that ought to be fostered.

"The present local option law does not, and the proposed county option law WOULD NOT, EVEN IN DRY COUNTIES, PROHIBIT a man from DRINKING ALL THE LIQUOR HE WANTED. Nor would it prohibit breweries from manufacturing and shipping their

Capt. Wm. Mitchell Lewis, the Republican county option candidate for governor, says:

'The county is the TAX UNIT.

"County option means A CHANCE TO VOTE.

"County option means MAJORITY RULE. "If a majority in a county WANTS saloons IT CAN HAVE

'If a majority in a county wants to ABOLISH the saloons IT CAN DO SO. 'The majority is entitled to what it wants.

"I favor the passage of a County Option Law, putting the license question IN THE HANDS OF ALL THE VOTERS IN EACH COUNTY."

DEATH IN HOT SAND BATTLE WITH LION

SURVIVOR TELLS OF DEATH FIGHTS VICIOUSLY WHEN KEEP-STRUGGLE ON THE DESERT.

Find Dead Rattlesnake in Well Containing Salty Water-One Man Dies and Others Are Rescued by Auto.

Berkeley, Cal.-His condition bordering on nervous collapse and hardly able to tell the story of his terrible experience, G. Herbert Masters, a young mining engineer, who was a member of a Borax lake expedition in which Charles Stracher Davidson, a graduate of the University of California Mining college, lost his life in the intense heat recently, has returned to his home in this city. He left five others of the party at Randsburg after the burial of Davidson in a rude desert away. grave on the shore of the lake, where he met his death. All of the others suffered terribly, but reached camp the broiling sun.

"We arrived at Randsburg and started on our trip across Borax lake," said Masters. "The lake is a mud deposit covered by a heavy crust. Our objective point was an old camp on the opposite shore, where we believed we would find prospectors. When we began drawing our line Davidson was prostrated with the heat, which was terrific. A little later he collapsed. Then he broke from us, and, running cages, lashed themselves into a fury about fifty feet, fell on his face. One of the boys went back to him. He died shortly afterward.

"One by one we followed a course toward the opposite shore. When I arrived I discovered that there was no water. After several hours we found an old well, but the water was sulphurous and salty and at the bottom was a dead rattlesnake. Two of the original party of seven had gone to Randsburg for batteries when we started on the trip across the lake and that left four of us huddled together-Thomas A. Graves, a mining expert of Olean, N. Y.; David Bunkers, Norman Stein and myself.

In the morning before sunrise we took a roundabout trail skirting the lake. When halfway across we met an automobile party and were carried the rest of the way in the machine.

"That afternoon we went on the seething mud lake again and got the body of Davidson. The boys made a rough pine box and we gave George the most decent burial we could give. His grave is out there in the sun, near the place where he died. The others of the party are used up, but they will recover. It was a terrible experience and I am through with the desert."

SAYS GHOST ATE A BISCUIT

of Spiritualists.

London.-Ghost stories of a highly ing of the City Temple Debating soci-

Spriggs, at one time a spiritualistic ing from the duke of Devonshire. medium, and now the president of the Psycho-Therapeutic society. Every story, he said, was well authenticated. WOMAN SAVES DETECTIVES His own conviction was "that spirit communion is not only a possibility, but an actual and realized fact."

On one occasion, he said a seance was held round a table at the residence of Rees Lewis of Cardiff. All the "sitters," including Father Butcher, a priest, and Rev. David Jones, kept their hands on the top of the taheard, and on looking under the table there were found small bunches of one from a pear tree, bunches of wheat and barley and some peas. One of the reverend gentlemen exclaimed: "This is as near a miracle as possi-

Describing some of his experiences in Melbourne, Mr. Spriggs said that at | Connors of the Desplaines street staone seance a spirit form, dressed in a white gown and red girdle, drank half

Weighing machines were used to ascertain the distinguishing features between the medium and the materialized forms, "and," said Mr. Spriggs, "I found that as a result of the seance I had lost about three pounds in like a cork and when O'Brien arose it weight." The first spirit form who turned turtle. The woman put out in stepped on the scales turned the beam a motor boat and saved the two in at 100 pounds, but subsided so rapidly the nick of time. in weight as to prevent a successive record being taken. Indeed, failing to turn the scale at 80 pounds, he hur- GIRL AND FIANCE KILLED riedly retreated. Returning again, his weight was registered at 104 pounds. Power Plant Superintendent Electrothen 102 pounds, and then under 100 pounds.

Doctor Mueller, who was present, distinctly felt the pulsation of the forms, the medium being shown sit- Roy Keller, superintendent of the ting on his chair immediately after- Delagua power plant, and Miss Elizawards. Doctor Motherwell also found the beating of the heart to be quite whom Keller is said to have been benatural.

One of the "sitters" contrived to smear his hands with printer's ink before grasping that of the materialized form. When the medium was examined, however, the skeptic was grievously disappointed to find no traces pressed upon the hand of the form.

A Tinge of Suspicion.

"That speaker always starts off," said Farmer Corntossel, "by tellin" what the country needs." "Naturally and properly."

"I s'pose so. Only I notice that when a man goes out of his way to tell boarders yet. me what I need it's always somethin' In his particular line o' goods."

ERS TRIED TO MOVE HIM.

Secretary Objected to Being Sold, But Finally Succumbed and Was Dragged Into a Transferring Cage.

New York.-The lion Secretary, a Cape buffalo and two bisons of the Central park menagerie were shipped to William Bartels of Newark recently, for a consideration, which included two eelands, two tapirs and a pair of

It was one of the busiest afternoons Headkeeper Snyder and his assistants ever put in, but finally all the animals, in their respective shipping cages, were loaded on wagons and carted

Everything went smoothly until the attempt was made to inveigle Secretary, who was born in the lion house after twenty-four hours of torture in about seven years ago, into his shipping cage. Secretary did not want to go, and it took an hour and a quarter of pushing, pulling and fighting to overcome the spirit of one of the meanest lions in the menagerie.

With all the doors and windows barred, and hundreds of persons surrounding the lion house, the work of getting Secretary from his cage was begun. Rose and Bismarck, the mother and father of Secretary, in adjoining while their big offspring was hurling himself against the bars of his cage in an endeavor to get at the keepers. The lion did not care to march into profitable here. the trap. He would put his head in the ope. door of the shifting cage, snuff once or twice, and with a great

After half an hour of prodding had shown that the animal could not be transferred that way into the cage, "Bill" Snyder decided to try a noose. By this time the lion had worn itself out, and was lying in a corner as docile as a cat.

The noose was slipped over Secretary's head, and then, while three men pulled and three men pushed, and "Bill" did the bossing, in went the lion, like a lump of lead, to the furthermost part of the transferring cage. The beast was so exhausted it could not move.

This lion, named Secretary because he seemed to have, an interest in everything transpiring in every other cage in the lion house, has been the first always to announce the daily rations and the last to subside when anything unusual had happened to mar the serenity of his surroundings. "Bill" said he was sorry to part with him, but there would soon have to be some room made for the three cubs. He weighs in the neighborhood of 400 Former Medium Tells Strange Stories pounds, and was considered one of the best specimens in the Central park collection. His value is said to be about \$1,700.

The two eelands were received at interesting nature to believers and the zoo earlier in the afternoon. They skeptics alike were related at a meet- are the only ones in the Central park collection. In the last ten days two of these animals have been received by The stories were told by George the New York Zoological society, com-

Purchase First Class Animal For Less Than \$80 Per Head.

(By J. E. PAYNE, Colorado Agricultural

College.) The great demand for dairy products has caused the price of good dairy cows to be very high. Reports from associations of dairymen show that it cows at even \$80 a head. With such a demand for cows in old dairy districts, there will be few good cows moved into new dairy territory. So, tion problem. the only way new districts can be supplied must be by breeding up the common stock by the use of good dairy Spillman, agriculturist in charge of down and favors younger men for Un-

If good dairy cows could be sold for \$40 to \$50, at least 5,000 could be sold in Colorado within the next year. But the prices as above quoted are prohibitive. So, only the culls from that intelligent and vigorous effort be the old dairy districts are likely to be sent here for sale.

When bringing cows into the country, tuberculosis and other diseases may also be introduced. The cows now in Colorado, especially the range cows, are free from tuberculosis. If good dairy bred bulls are mated with selected range cows, the heifers of the first cross will be good milch cows. Future crosses will still further improve the dairy herd, if accompanied by careful selection.

If this plan is carried out for a few generations of cattle. Colorado can not only produce all the dairy cows needed, but a supply can be sent to the eastern cities.

With cheap feed which is available. the raising of dairy cows may become

Colorado should be able to success fully compete with Connecticut and other eastern states, where it costs roar would lurch against the bars and \$60 to \$80 to raise a dairy heifer, and POTATO BUGS ARE AT WORK. feed her until she is two years old.

NEW LAW PROTECTS GROWERS

Measure Enacted by Wisconsin, If Generally Observed, Will Greatly Benefit Nurserymen.

The provisions of the Wisconsin state nursery law, which was passed in June, 1909, if generally observed, will greatly benefit the fruitgrowers of the state, according to Prof. J. G. Sanders, state nursery inspector of the over the potato plants when covered College of Agriculture of the University of Wisconsin. The law prohibits plication at least one pound of Paris the sale of uninspected plants or trees, or any other kind of nursery stock by an unlicensed person, whether the original owner or an agent. Shipments of uninspected stock into the state are prohibited, the law requiring that all such shipments be officially inspected.

All growers of trees and plants who desire to offer them for sale must se common sprinkler. Where the crop is for the present army. In time of war cure a certificate-license good for one large and it is possible to procure one, the army would be stripped." year, at a cost of \$10. Use of Drugs.

thing is wrong with their health. needed have a veterinarian prescribe tomed to stimulation, and when the follows.

Sand For Ducks.

Some people have a notion that ducks and geese do not need grit because they are not seen picking up large particles of stone. They do not need as large a size of grit as hens do, for they get sand when puddling in the bottom of the creek and streams where they forage for weeds and fish. Ducklings should be provided with plenty of sand, which takes the place of grit. So thoroughly do some duck raisers believe in grit that they mix sand in the feed that they give their young ducts.

Milking.

practise. The clean milker uses clean to private customers. hands and is sure before he begins that the cow's udder is clean and that no falling dirt can get into the milk. Using lard on the hands to make milking easy will aid in making hard milkers. It will also help to keep the cow's the corn belt is clover. The clover teat very tender. Dampening the teats with milk also has the same effect.

Food For Chicks. A handful of grain dug into an ant

hill will bring the chickens to it, and then good-by to the insects. A plant of Swiss chard sown adjoining the poultry yard will supply on the ground once every three or four are not allowed to eat it more than an it will supply sufficient nitrogen for ciations. hour a day.

Predicts Exhaustion of Farm Land of Western Prairies,

The agricultural department at Washington is concerned about the exhaustion of the soil of the United States. On the prairies of the west fertility is beginning to wane. In many of the older communities fertilis impossible to buy first-class dairy ity has been reduced below the point of profitable production. How to store and maintain productivity of soil is a most important phase of the conserva-

a farmers' bulletin prepared by W. J. the office of farm management of the cle Sam's fighting forces. agricultural department. Mr. Spillman says that in order that the prairie of the east and south it is necessary made to farm correctly.

Renting of land on short leases for the purpose of growing grain for the market is one of the surest means of reducing the productive power of the casional maneuvers is a mere matter soil. Well managed pastures and rational systems of crop rotation are necessary to the development of permanent systems of profitable farming.

Land owners must realize this, and must take steps to improve renting methods by stocking their farms with a full complement of domestic animals, in case the renter is not able to do this for himself, and by giving longer leases whereby the renter may reap the reward of intelligent management.

In view of the soil waste that has occurred, Mr. Spillman asserts, it is not surprising that values of farm products have risen to a marked degree in the last few years.

War Must Be Commenced Early and Continued With Vigilance-Paris Green Recommended.

Potato bugs are at work. They are an enemy to be poisoned by the potato grower. War must be commenced early and continued with vigilance. Paris green is the most highly recommended. It may be used as a spray, with a sprinkler, mixed with air slaked lime, flour, or fine, dry road dust, sifted with dew or rain. In any form of apgreen should be used per acre, but when the plants are large a greater amount may be required. The Minnesota Experiment station prefers to use Paris green mixed into a thin paste with water and then stirred in the larger volume of water to be used in a sprayer. Very good results, however, have been obtained by the use of a ate of lead may be used as a potato sent. These agent's licenses cost \$1. bug poison, but it is more expensive than Paris green. Paris green may lime need be added.

The Colony House.

The permanent colony house is not as good as the portable. The portable house is usually built upon runners Do not be constantly drugging your similar to the common stone boat. Gen. Wood Favors Smaller Period for Soldiers' Enlistment.

New Head of the United States Army Talks of Air Machines as War Craft-Prefers Dirigible Balloons.

New York.-Maj. Gen. Leonard Wood, the new chief of staff of the These observations are set forth in United States army, thinks the term of enlistment of regulars should be cut

formal reports, that the term of enlist- ney Pills not come to my attention, I country may not follow the descent ment should be cut down," said he. "This would serve to turn back into civil life a larger proportion of men failed." who in emergency could be called upon. They would constitute a reserve. How to arrange that they would be N. Y. subject to a call to the colors for ocof detail

Further than this General Wood would not comment upon what he would advocate when once he has taken up work as chief of staff of the United States army.

His recommendations of a shorter enlistment would send back to the population 20,000 to 30,000 men a year. The plan would cut off a greater part of the "retired pay" and a greater part of the pensions. The United States standing army is now practically a

veteran army. It appears to be General Wood's idea that it should not be an army of men of ten to fifteen years' or twentyfive years' service. Younger sinews are required for spirit, dash and efficiency, he believes.

"We need extra officers." the general said. "There are just officers enough

Germans, who have been frequently H. Kiernan, 663 Quincy St., Brooklyn, reported as unsympathetic toward the N. Y., Sept. 27, 1909." United States policy regarding European ambitions in this hemisphere, are now instructors of the Argentine army, and Germany, next to England, holds the largest share of the Argentine trade.

"Would you," General Wood was asked, "go that far into army questions as to say what you think of flying machines as an adjunct in war?"

"Yes, I will say that I think the smallest dirigible, one that can carry the engineer and four or five men, is going to be important, especially when we can get them with a reinforced envelope able to withstand the required pressures. Their utility is already assured for reconnoitering.

"Our army's front is now twenty or thirty miles long. If we can put up men who can swiftly skip along over that and see the enemy's lines of communication, his field works, bridges, etc., obviously the information would

"I don't think the aeroplane will be as useful as the small dirigible until it is made large enough to carry at least one man besides the driver. They snould also have a duplicate engine. much better than selling milk. We But they are improving aeroplanes so fast that I don't predict-I only speak once a week, while, if we sold our of the present moment, when I say I prefer the small dirigible."

> Trial by Ordeal in Japan. Tokio.-Trial by ordeal still exists in some parts of Japan. If a theft takes place in a household, all the servants are required to write a certain word with the same brush. The conscience is supposed to betray its workings in the waves of the ideographs written. Tracing an ideograph involves such an effort of muscular directness and undivided attention that the service often leads to the discovery of the guilty party. The test is, at all events, more humane than the ordeal by boiling water, to which accused persons were formerly submitted in Japan.

Purchase Expensive Snuffboxes. Insurance Commission Outlines Desired Legislation.

LIKES THE NEW YORK LAW

Mutual Insurance Companies Are Ordinarily Organized With a View to Furnishing Insurance at the Least Possible Cost.

Madison.—That the commissioner of Wisconsin should be given power to surance corporations within the state, in a manner similar to that provided by the New York law, is a measure recommended by Insurance Commissioner George E. Beedle, in his annual report on local mutuals, issued.

Similar provisions are in force in other states, and their operation is declared to have been very successful and satisfactory alike to the interests of the policy holders and stockholders. The law relating to banks in this state contains similar authority to the commissioner of banking.

The temptation in the management of mutual companies to eliminate as many members as possible in order to divide up a large mutual surplus, which under the present law belongs only to the members who at the time have insurance policies in force, is emphasized by the commissioner, who urges legislation to remedy such a sit-

"Mutual insurance companies are ordinarily organized with a view to furnishing insurance to the community at the least possible cost. For this purpart of the savings and gain of the business to remain with the company to enable it to withstand excessive ly praiseworthy. losses. Almost every policy holder is willing to make this contribution provided there be reasonable assurance that it shall be maintained for that purpose and not go to fatten the pockets of such as might secure the control of the company only for the purpose of wrecking it and distributing the accumulated assets among themselves. This would be effectually prevented by the law which before received the favorable consideration of the legislature and the enactment of such a law will inevitably benefit not only all mutual companies but sound insurance in general," says the re-

number of mutual companies doing business in Wisconsin: Mutual town insurance companies, 204; city and village mutual companies, 59; mutual church insurance companies, 4; mutual hall insurance companies, 15; retail lumber dealers' mutuals, 2; millers and manufacturers' mutuals, 1; hardware dealers' mutuals, 1; jewelers' mutuals, 1.

Weed Survey Shows Big Loss.

On account of noxious weeds the Wisconsin farmers are sustaining annual losses which are much greater than most farmers suspect. A weed survey of several counties is being made by the agronomy department of the college of agriculture under the direction of Prof. A. L. Stone, state seed inspector. In some sections size, 55 acres of each farm were reported to be seriously infested with schools of Wisconsin. noxious weeds.

The most troublesome weeds are mustard, sow thistle, burdock, yellow weed, cockel burr and pigeon grass. Wild mustard is most widely distributed in the western counties, while Canada thistles, sow dock and the others are largely found in eastcentral Wisconsin.

Dr. Harper a Candidate.

Dr. C. A. Harper of Madison, secretary of the state board of health, announced his candidacy for the Republican nomination for assemblyman in the Madison district. Dr. Frank Smith of Madison, Republican, present assemblyman, is a candidate for renomination.

Banks After Postal Funds.

The following Wisconsin banks funds: First National of Marinette, United States National of Superior, County of Merrill.

Arrange for W. C. T. U. Convention. Mrs. Lillian Stevens of Portland, kesha. Ore., president of the National W. C. T. U., will attend the state convention here in October, as will also Miss gating in the northern part of the Anna Gordon of Evanston. Dr. Samuel Dickie of Albion college will also be versity are examining the samples among the speakers.

La Crosse Asks Convention.

At the suggestion of President A. A. Johnson of the Onalaska agricultural in the office of Secretary of State school, Secretary J. L. Utermoehl of Frear as follows: the board of trade has written a letter inviting the state buttermakers' con-, of Waushara filed a notice of dissoluvention, which meets soon after the tion. holidays, to meet next time in La Crosse.

Professor Johnson has just returned from Madison and declares appointment of C. A. Arden as its Wis-Secretary Benkendorf gave him every | consin representative in place of Len encouragement and that he believes the convention can be brought to La Btuh, August Bruss, John Dewane, A.

Postmen Re-elect W. H. Froelich.

Madison.—The Wisconsin branch of the National League of Postmasters of the third and fourth class, in con-LARGER POWERS vention at Milwaukee, re-elected President W. H. Froelich, Jackson, and Vice-President E. A. Lagrandeur, Somerset. William R. Brown, Waupaca, present secretary, was made treasurer, and Alexander Archie, Waterloo, present treasurer, elected to Mr. Broven's place. The present executive committee, consisting of W. H. Froelich, Alexander Archie, A. Maburg, Amherst, and J. E. Johnson, Dallas, was re-elected.

George P. Reidenbach, post office inspector, Green Bay, in speaking of "The Model Post Office," urged postmasters to post their accounts and take inventory of their stock of stamps daily, in order to facilitate a settlement with the post office department at Washington in case of robsupervise, control, and take charge of bery or fire. He also spoke of the the liquidation of all delinquent in necessity of extreme care in preserving envelopes of registered letters and packages in cases where the envelopes or packages had been robbed or tampered with.

"In justification of the quarterly form of voucher for salaries of rural mail carriers," he said, "I will say that the new system not only lessens the work of the state inspectors and the Milwaukee post office in checking up the vouchers by two-thirds, but also facilitates the work of the post office department in Washington. In checking up now there is only one voucher to handle instead of three monthly vouchers as before."

In speaking before the Wisconsin branch of the National League of Postmasters of the third and fourth class offices at the Republican house, Congressman W. H. Stafford predicted that the postal savings bank bill, as rectntly passed by congress, is destined to become one of the most popular on the books.

The provisions requiring that 30 per cent. of the deposits in banks to be at the call of the board of trustees pose members are willing to allow a for investment in government bonds and 65 per cent. at the call of the president, Mr. Stafford deemed as especial-

The address of welcome was delivered by Mayor Emil Seidel, W. H. Froehlich, Jackson, president of the league, responding. Papers were read by E. A. Lagrandeur, Somerset; Alexander Archie, Waterloo; Ole Erickson, Grantsburg, and Ralph Bird, representative of the post office department at the convention.

Will Discuss Fruit Farms.

The summer meeting of the State Horticultural society to be held in Oconomowoc, August 17 promises to The report shows the following several well-known Wisconsin people, including C. B. Whitnall, city treasurer of Milwaukee; Ernest Gonzenbach, large holdings of hemlock and hardpresident of the Sheboygan Light & Power company, are on the program | pine has been logged. for addresses.

Lest these men, city bred with a longing for the fruits of toil, should paint the joys of life on a fruit farm in too bright colors, Secretary Cranefield has arranged for discussions by practical fruit men who will show the other side of the picture.

In addition to the papers and discussions on the possibilities for a citybred man in fruit raising, a gardening session will be held when cultural problems will be discussed.

State Grade Schools to Get \$100,300.

State Superintendent of Schools C. where the farms average 215 acres in P. Cary announced the apportionment of the state aid fund for the graded

The total amount to be distributed is \$100,300. Schools of the higher quack grass, Canadian thistle, wild class draw \$300 each and those of the lower class \$200 each. The total to be dock, snap dragon, ox-eye-daisy, rag distributed among first class schools is \$44,500 and among second class schools \$55,800.

Fifteen schools of the state will receive no money because of required reports not having being received by the superintendent in the time stipulated by law. - Several other schools were disqualified because they did not comply with requirements regarding sanitation and teachers' work.

Rush State Soil Survey.

The work of the state soil survey is being actively prosecuted during the summer months by representatives of the University of Wisconsin and the United States department of soils. Waukesha, Fond du Lac, La Crosse and Juneau counties are at present made application to be designated as the fields of operation. Guy Conrey depositories for postal savings banks and Leroy Schoenmann are the government and university experts respectively in Fond du Lac county; Citizens' State of Wausau, Lincoln Clarence Bounsbury and Theodore Dunnewald in La Crosse; E. B. Watson and Carl Le Clair in Juneau, and W. J. Gibe and Lewis Mayer in Wau-

In addition, F. L. Mussbach and C. Bergh of the university are investistate, and four chemists at the unisent in by these investigators.

New Corporations.

The Waushara Telephone company

Libby, McNeil & Libby, a West Virginia corporation, licensed to do business in the state, filed notice of the capital, \$7.300; incorporators, William J. Kempert, J. A. Kellner.

SEEN AND HEARD IN WISCONSIN

Evansville. - Among this year's crop of natural euriosities, three-legged calf on the farm of Gilford Peebles, near this city, holds a place. The calf is a grade Jersey, now two months old. An inspection shows it to be a fine calf, except that it lacks a left front leg, and the left shoulder blade. The beating of its heart may be plainly seen through the skin at the shoulder, which in everyday calves is covered by about four inches of 20-cent veal. It is healthy, growing rapidly, and though it hobbles instead of walking, when it decides on an evening gambol, it easily outdistances any dog in the neighborhood. The farm has been visited by hundreds of interested people.

Manitowoc .- Mrs. Schweitzer, an aged lady residing all alone on South Tenth street, near the city limits, did not know that her home had been struck by lightning until neighbors hearing the crash and seeing the roof burning, woke her up and sent in a call for the fire department. The crash came at an early hour in the morning during the terrific gale, rain and electrical storm that raged for several hours. The bolt struck the roof, knocked off the gable, broke the plaster and did other damage. Mrs. Schweitzer slept through it all and was not aroused until the neighbors came over. The fire was easily controlled.

Waukesha.-Harry Berger pleaded guilty to a charge of grand larceny and was sentenced to serve of smaller cities, who have combined and pointing a revolver at Operator ciation of New York. H. J. Moore's head, commanded him to throw up his hands. Moore did so and kept them up while Berger and his pal, Harry Carney, took \$50 from by exclusive contracts with the railthe till and relieved the operator of roads. his watch. Shortly afterward Carney shot Berger in the arm for refusing to were sent up to Joliet prison. On the expiration of Berger's term two weeks ago he was arrested and brought here for trial.

Chippewa Falls.-The last train first class freight charge. load of logs from the camps north of Stanley arrived and were dumped into the Chippewa Lumber and Boom company's boom on the river here. There were six carloads, all that remained of the 7,000,000 feet that was burned in the recent forest fires. It is unofficially stated that this railroad. season will be the last for the big other sawmill in Wisconsin, Michigan or Minnesota. The company has woods in the state, but all the white

Madison. - A search is being made for Miss Amelia Johnson, aged nineteen, who went to Chicago about a year and a half ago, and for a few months wrote regularly to her mother Then the letters ceased. For a year she has not been heard from. She is the daughter of Mrs. Peter Johnson who has appealed to the Chicago po

Manitowoc.-Struck by lightning her clothing set on fire and picked up as dead, Martha Flentje, a Mishicott girl, lives to tell the tale. Miss Flentje' was rendered unconscious by a bolt of lightning during a severe storm. Physicians wonder that the girl was not killed outright. She is recovering and aside from partial paralysis of the left side suffers no ill effects from her experience.

Appleton.-At a session of the Wisconsin Retail Liquor Dealers' Protective association convention about 200 delegates were present. M. H. Deacon, Kaukauna, has announced his candidacy for re-election as state secretary. President John A. Langan, Kenosha, will not again accept the presidency. Milwaukee, Wausau, Oshkosh and Ashland are in the field for the 1911 convention.

Chippewa Falls.-At noon an interurban car on the Chippewa Valley electric railway struck a big seven-passenger Stoddard Dayton touring car, driven and owned by D. the back of his head. Birkholz of New Auburn, demolishing the car. The fender of the interurban pushed into the machine and threw him out, thereby saving his life. He was the only passenger in the auto.

Appleton.-Leo Jones, aged twenty, died from ptomaine poisoning. He had been spending the afternoon on a launch on the river where a lunch of canned goods had been served. While seated at the supper table he suddenly became unconscious and died three hours later without regaining consciousness.

Madison. - Farmers in southern Visconsin are satisfied with the showing of small cereals, threshing of which is now in progress. Oats and barley are running finely and there is a fair har crop. Pastures are very poor. One farmer in this county reports oats on his farm threshing from 40 to 50 bushels to the acre.

Eau Claire.-J. W. Henning, a Clear Creek farmer, lies in a hospital here in a serious condition bull. While leading the animal it barbed wire fence. His head and chest were cut open and he was terribly bruised.

Plainfield.-John Mitcher, an old soldier and pioneer of this vicinity, committed suicide by cutting his throat with a pocket knife. He was about seventy-four years old and lived with his son-in-law, George Parks.

WISCONSIN VOTERS

Wisconsin workingmen will never favor County Option. They do not want a law that proposes to regulate only one class.

COUNTY OPTION MEANS COUNTY PROHIBITION-AND EXPERIENCE PROVES THAT THE RICH MAN'S CLUB AND THE RICH MAN'S HOME ARE NEVER MOLESTED BY PROHIBITIVE LAWS.

This is un-American, and is neither fair nor just-it is the rankest kind of class legislation.

IT IS IMPOSSIBLE TO ENFORCE A LAW THAT IS INTENDED TO MAKE ONE CLASS OF CITIZENS ADJUST THEIR LIVES THE WAY ANOTHER CLASS THINKS WOULD BE BEST FOR THEM.

SUPPORT ONLY LEGISLATIVE CANDIDATES WHO ARE AGAINST COUNTY OPTION.
