> Will You Let a Standpat Republican Sell You to the Special Interests?

ISSUES ARE CLEARLY DEFINED

Have you noticed that with the approach of election day a su-preme confidence in the reliability of the Democratic party as the party of the people, the party whose mission it is to right the wrongs perpetrated by the Re-publicans is taking hold of the voters? In these days of progress the voter does more thinking, and the result is that he cannot help but approve the stand which the the result is that he cannot help but approve the stand which the Democratic party has taken upon questions of national and state politics which are now pressing themselves upon the public for solution. Every thinking man must come to the conclusion that there can be no hope of relief from the can be no hope of relief from the domination of the Special Interests while the Republican party is in power. Is it reasonable to suppose that any faction of the Republican party will furnish relief from the burdens of that oppressive Payne-Aldrich tariff law, when the standpatters have sold themselves body and soul, to the Special Interests and the so called progressives led by the arch insurgent, Rooseled by the arch insurgent, Roose-velt, pat the standpatters on the back and indorse that law as "the best that gives." This is exactly what Mr. Roosevelt did at Sara-toga N. Y. The Democratic platform deals with the numerous questions that are now agitating the public mind in an open and straight forward

His integrity has never been questioned, and he is a man of sound judgment and good common sense, broad and liberal in his views on public questions, and if elected will represent his district ably in the state legislature. It is now sixteen years since a Washington county man has been elected to

Tuesday he was indicted by the grand jury. Wednesday morning he was ar-raigned before Judge Quarles and pleaded guilty.

MEN WEEP IN COURT

Then former Gov. Elrod ad iressed the court. He said that he hal come all the way from South Da-kota to plead for Mattes, whom he said he had known in Kewaskum as a boy. He told the court that Mattes was a young man with a clean record. He has a fami y of wife and child, and debts nave piled up, the credit has departed, and there was no food in th when Mattes opened the envelope. He added that Mattes had since that time sent the money he had taken to the Chicago house. In pleading for mercy, the .ormer

governor wept. Judge Backus then arose and in great emotion told Judge Ouarl-es that he also had known Mattes

as a boy. "I have known this boy and hi family for years," he said, and "I know that this is his first offense, and that it would not have been committed had the boy not leen in dire circumstances. Last Sunday morning while Mr. Henry Koenen and son William were attending mass in the Catho-lic church fire broke out in their barn just outside of the village limits burning it completely to the ground. How the fire started is a mystery, but it is supposed to have been caused by spontaneous com-bustion. It was first noticed about 10:15. once made an effort to save the horses but were only able to get them untied. The flames spread so rapidly that she had to leave the horses to be burned to death in order to save her own life. A quiet larm was given to Mr Keenen and alarm was given to Mr. Koenen and son in church, who were driven to their home in a carriage, only to see their hard earnings of many years work go to ruins. A number of neighbors and villagers hurried to the scene to render a helping hand, but which did little good. The hand pump and several hun-dred feet of hose and other fire fighting apparatus was also taken to the scene

Ignting apparatus was also taken to the scene. Mr. Koenen's loss is considerable Besides the barn being destroyed, he lost 3 horses, 20 tons of hay. 300 bushels of oats, 150 bushels of barley, 40 bushels of wheat, 30 bushels of rye, 6 loads of corn stalks and some farm implements. All told his loss is estimated at about \$2000, with about \$1000 insurance.

MEXICANS DON'T ADMIRE US

Any Condescension We May Feel Is Reciprocated With Interest by Our Southern Neighbors.

Few things, in all probability, would more surprise the large number of Americans who think they have reason to know a little of the republic directly to our southward than to be made aware of the estimation in which they are actually held by its inhabitants.

Except in respect to things political or picturesque, it may as well be admitted that our own attitude toward Mexico is, for the most part, one of condescension, verging upon mild contempt, the Delineator says. We may, perhaps, find a certain interest in the fact that it is altogether reciprocal. Nor can we put it off with the thought that any criticism or disapproval meted out to ourselves is due to jealousy. Jealousy would be so disproportionate as to be absurd. To give it any reason for existence would seem to require at least some slight similarity in genius, proportions and aims. Envy might be probable, but not jealousy. And it is doubtful if the former sentiment to any extent obtains. There is, indeed, a strong general feeling of resentment against our encroachments in the financial world, a fear lest they may end in annexation, to which a wholly alien and intensely patriotic people would be bitterly opposed; but this may be looked upon as one of those political sentiments having little or nothing to do with personal relations or estimates.

The Mexican is sufficiently generous and sufficiently the creature of emotions to be able to admire even the members of a race which has already taken from him, under pretext, much of his northern territory; which has upon its records the unlovely incident of the storming of Chapultepec, defended by young boys; which is daily obtaining a stronger and stronger foothold by methods not always ethically admirable, and whose one dramatically magnanimous act-forcing the recall of Maximilian-was actuated, like most of the altruism of states, by very self-regarding motives. The fact, however, remains that the Mexican does not usually admire us

Plants in a Room

We cannot esteem too highly the value of plants about a room. They become in time real friends. Hardiest and best is the aspidistra, for neither draught nor gas affects it, and if a little neglected in the matter of watering, it shows no malice, and summer or winter its glossy green leaves bear witness to the care bestowed upon it. Palms, though graceful and very ornamental, are delicate and disappointing plants. Ferns need constant attention. but always repay care.

For the center of a springtime dining table nothing can be prettier than a china bowl painted with small ferns and tulips, and as the bulbs die off they can be drawn out, and the gaps can always be filled with cut daffodils. There is no limit to the delight given by flowers. In joy or sadness they are our constant friends.

city were legally issued and were due with accumulated interest amounting to nearly \$20,000.

The case was based on bonds issued for a water works plant at Pelican before Rhinelander was separated. Later, the company sold the plant to private parties, who in turn sold it to Pelican with the bonds aggregating \$83,000

Rhinelander later incorporated and assumed the plant and indebtedness, but later held the bond issue was excessive and refused to pay principal or interest.

The city has spent some \$25,000 in lawyers' fees and court costs, and now has to pay the full amount of short course in agriculture, which the bonds or lose the plant, which with the additions made by the city, is valued at aver \$100,000.

One night a rocket soars up over the city. It is the signal which every voliceman has been prepared to give. and it points the culprit's line of flight toward the west.

With a whir of angry engines one of the waiting machines swooped from aer perch. Swiftly she climbs upward, hunting for her quarry. Her :wo men see the shining double chain of Broadway lights wink out at one place and then flash back again. That was where the pirate craft went by. The pursuers swerve toward her trail, teaping in a terrific downward slide. The man in uniform sees her first and points her out to his taut-nerved companion. They have the upper plane of her, and as they follow her out above the silent river the man at the wheel coaxes his quivering mount higher and higher still.

At a word from him the man in uniform unfolds the wicked little fourfluked anchor. With a turn of its silken cord brought around the aluminum keelpost he lowers it until it is swinging 100 feet below them. The man at the wheel wheedles a few more revolutions a second out of his groaning engines. Then, gently, he turns down the forward rudder. The silken anchor cord trails whistling behind them like the tail of a kite. That sickening plunge overtakes the fugitive as if she were standing still.

A scared face looks up at them! The dark craft tries to swerve, but it is too late. The pursuer goes over her like a whirlwind. The man at the wheel ramps her upward to take the shock, and then the assailants hear the crunching of metal as the little anchor sets its teeth in the pirate's frame

The man in uniform cuts the line with one sweep of the knife he had laid beside him for the purpose. in a fluttering, broken spiral the wounded machine plunges down 400 feet and is wrecked. Just such a chase may never be seen in the skies of Manhattan. Certainly it will not until there are aeronauts of a different stamp from the fellows who take up the great flyers of to-day. A burglar alarm is a mighty good thing to bave on that roof door, anyway.

The Cow Due to Freshen. It is not an uncommon occur-

ency while nursing to bunt the udder, thus causing increased irri tation.

Too much stress cannot be laid upon the importance of caring for the udder, it being advisable to apply soothing applications in case same is unnaturally swollen or caked.

A mild tonic is often advisable where there is an unnatural swelling of the udder as it has a better effect than outward applications-Dr. David Roberts, Waukesha

Here is a puzzle that puzzles everybody: Take the number of your living brothers, double the amount, add to it three, multiply by five, add to it the number of your living sisters, multiply the result by ten, add the number of deaths of brothers and substract the middle will be the number of living sisters and the left will show

Quality--Service

These two words tell the whole story of our success. We've made this the leading store of its kind—a place where men can obtain clothes exactly to their liking. They like them when making their selection-like the way we wait

upon them and like the clothes until they are threadbare. That means quality-intrinsic value in every purchase and lasting satisfaction. We never give a man an opportunity to even feel

that he wants to trade elsewhere. The reason? Friend Made Clothes Make Friends.

The Spots Disappeared.

Mrs. Dolan lived in a district which was not as favorable for the outdoor household experiments recommended by the Ladies' Helper as it might have been. This fact Mrs. Dolan was rapidly assimilating, and in a manner not so uncommon as it might be she blamed the estimable periodical for her difficulties.

"I wisht I had a holt o' that woman that runs the 'Handy Hints' department," she remarked to her husband one morning after an early excursion into the back yard, whence she returned in high dudgeon.

"I fought you tought she was a grand wan," said Mr. Dolan, cautiously testing his cup of tea.

'Well, I've changed me mind, as I've the rights to do," replied his wife. She said to put sody on thim stains in the tablecloth, and l'ave it out overnight on the line, an' they'd be gone entirely whin morning come. During July and August the mushrooms in the fields are apt to be wormy. As the cooler nights come they begin again to be safe to eat and are good until the frost kills them. Nothing can be more delicious than a dish of fresh mushrooms served on toast. Peel the caps and saute in a little butter for five minutes, remove the mushrooms and add a tablespoonful of flour and a cupful of good cream. Serve hot with the mushrooms added to the last. Large mushrooms are a choice dish when broiled, serve with butter and salt.

WISE WORDS. A Physician on Food.

A physician, of Portland, Oregon, has views about food. He savs:

"I have always believed that the duty of the physician does not cease with treating the sick, but that we owe it to humanity to teach them how to protect their health, especially by hygienic and dietetic laws.

With such a feeling as to my duty 'I take great pleasure in saying to the public that in my own experience and also from personal observation I have found no food equal to Grape-Nuts. and that I find there is almost no limit to the great benefits this food will bring when used in all cases of sickness and convalescence.

"It is my experience that no physical condition forbids the use of Grape-Nuts. To persons in health there is nothing so nourishing and acceptable to the stomach, especially at breakfast, to start the machinery of the human system on the day's work.

"In cases of indigestion I know that a complete breakfast can be made of Grape-Nuts and cream and I think it is not advisable to overload the stomach at the morning meal. I also know the great value of Grape-Nuts when the stomach is too weak to digest other food

"This is written after an experience of more than 20 years, treating all manner of chronic and acute diseases, and the letter is written voluntarily on my part without any request for it." Read the little book, "The Road to "Wellville." in "There's a Resand."

Sliced Oil Pickles

Silce very thin 100 small pickles about the circumference of a quarter, and, if liked, six onions also sliced. Cover with salt and let stand overnight. In the morning rinse with cold water and put in a sack to drain. Mix three quarts cider vinegar, one-half cupful each white and black mustard seed, one cupful olive oil, one heaping tablespoonful celery seed. a half teaspoonful red pepper and a half teaspoonful white pepper. Pour cold over the cucumbers in an open jar. let stand a day or two, stirring occasion. ally, then seal in jars.

Grape Juice.

Use Concord grapes. Wash and bruise the grapes. Cook and strain one quart of juice, one quart of water. two cups sugar. Boil five or ten minutes. Put hot into bottles and seal. use a double cheese cloth bag. Do not squeeze, but turn the bag often around. From two small baskets of grapes I get three pints of juice. Small bottles are better to use, though the juice will keep several days in the ice chest after being opened.

One-third cupful butter, two-thirds cupful of molasses, one-third cupful oiling water, one-quarter teaspoonful of salt, one teaspoonful of allspice, one tablespoontul of ginger, one-quarter teaspoonful of cinnamon, one teaspoonful of baking soda, flour. Pour boiling water over butter; add remaining ingredients, using sufficient flour to make a drop batter. Drop from a spoon on to a buttered tin. Bake in a moderate oven for 20 minutes.

Broiled Sweet Corn.

Boil the ears of corn two minutes, then drain and dry on a towel. Place on a broiler and toast over glowing coals or under gas flame until a good brown. Season with salt and send to the table in a napkin.

cut the material, again, three times the width of the fold when finished. Made a wide, plain fold, and then fold this through the center, with the stitches all on the upper edge. Place the upper fold so that it forms a cord or ridge through the center, and slipstitch this so as to hold it firmly in place. Be sure that all your stitches are out of sight.

Chic Hat for a Child.

Among the new display of fall hats for the little ones was a fine French felt, white, and in the new droopy mushroom shape. The trimming was a soft ribbon passed around the crown and held down with trim little rosettes of the ribbon, one over each ear. The left rosette was encircled by a dainty wreath of holly of the variegated kind, the soft creamy white and pale green leaves, with tiny crimson berries. The ties were of soft white ribbon, and altogether it was a most attractive bit of millinery.

A Workbasket Hint.

Keep in your workbasket several large-size safety pins, and use them to string loose buttons, hooks, eves, etc. Keep those of the same size on the same pin, black hooks on black pins, white eyes on white pins, etc. Thus you never will have an untidy workbasket, or be delayed by not being able to find instantly what you are looking for.

Fasten the safety pins to one side of the lining of your basket-and your method of securing neatness will be complete.

To Starch Linens.

In starching linens and similar goods too light for mourning starch and too dark for the white, put in the boiling starch a large piece of tissue paper in shade to match as nearly as possible the dress material. This will dissolve, and when the starch is strainare of chiffon, plain or embroidered; ed, nothing but the dye will remain. making a starch of the exact color desheer fabric. Proposed amendment to section 21 of article 4 of the constitution, relating to the Proposed amendment to Section 3 of Article IV of the Constitution, relating to ap-					

compensation of members of the legislature.

Resolved by the assembly, the senate concurring, that section 21 of article IV of the constitution be amended by striking out the word "five," being the twentieth word in the body thereof, and by inserting in lieu thereof the word "ten" so that the same when amended shall read as follows:

Section 21. Each member of the legislature shall receive for his services for and during a regular session the sum of ten hundred dollars, and ten cents for every mile he shall travel in going to and returning from the place of meeting of the legislature on the most usual route. In case of an extra session of the legislature no additional compensation shall be allowed to any member thereof, either directly or indirectly, except for mileage, to be computed at the same rate as for a regular session. No stationery, newspapers, post-age or other perquisites, except the salary and mileage above provided shall be received from the state by any member of the legislature for his services or in any other manner as such member.

city dwellers who have in the natural love of the country a love for a home with grounds and gardens are unable to have what they desire for various that all smoke and steam from the reasons, principally because of a lack of means.

City dwellers are compelled for the most part to live in flats or apartments with never a look at trees or grass. Privacy, so much to be desired, is shut off by a common hallway, and the tramping of feet overhead is a constant reminder that the place is not a home but merely a place to stay.

The whole idea of the builders of city "homes" is to economize space and get all the rooms possible on a given piece of ground in order to gain revenue. All sight is lost of the artistic, and everything must bend to the one purpose of income. The occupants live along and constantly dream of a little cottage with a few vines and a garden place in the back yard, and a place for the children to play where they will not be under the constant espionage of a janitor with grouch.

This is all wrong and it is unnecessary. You may be a salaried man. You may think you cannot do any different. You have not the money to lighted and every room will be bright buy the ground it is true and authorize a builder to put you up a house such as you want. To remain for three days and two hights on the desert keeping weird vigil beside her dead was the pathetic lot of Ulalia Boniface, whose brave was accidentally killed by the discharge of a shotgun. The accident occurred far out on the desert. Miners, attracted by the squaw's wailing, found her standing beside the body, her two small children asleep near by. A long ride was made to the nearest telephone point and Coroner C. D. Van Wie notified. The long, rough ride over the mountains and desert occupied three days and nights. At some stages it required three hours

to cover a mile, so steep were the grades or so deep the desert sands. Long before he arrived in sight of

from prisons are by no means a rarity, and will not be until plucky and energetic criminals have passed from the earth; but there probably never was a more daring and romantic escape than

that of William Green from Sing Sing a short time ago.

that of William Green, it is not forgotten that four other convicts escaped with him. But it was Green's delivery and not theirs. His was the conception, his the execution; the other men simply accepted his invitation to go along with him when he had made the way, beaten down the keepers, and, in the presence of 195 convicts, spent 20 minutes in leisurely carrying out his plan.

But for the crowded condition of Sing Sing prison he could not have done it-at least, not in just this way. A man of his determination and ingenuity would probably have found some other. For, as a well-known prison official said to a New York Times reporter:

"Well, the Brooklyn bridge was opened in 1883, wasn't it? And after that the transit conditions in New York had to get to the point of unendurability before another bridge was opened, didn't they? And your Subway was opened only when the elevated railroads were absolutely unable to carry the passengers, wasn't it? And your subsequent subway and other transit improvements have come only when the patience of the public was taxed to the last notch, haven't they?

"That's the answer. You can't get a reform in New York state until conditions have become positively unbearable. It's no use to point out the advisability of a reform; you've got to prove that not a wheel can be turned until the reform is enacted. Otherwise you won't get it."

Had it not been for the fact that residents of Ossining who had been attracted by the excitement in the prison yard and out of it saw the prisoner swing in between two freight cars he probably would have succeeded in getting away. The attention of the warden's force had been concentrated on the land lying close to the river, and they were still scurrying over it when the news about the freight train reached them. Six guards were immediately hustled into an automobile, and, with an extra supply of ammunition, were sent south under orders to overhaul the freight train and cut off retreat into the hills along its left flank.

Another squad was sent directly down the track on foot to see that nobody wearing a prisoner's gray escaped in that direction, while a passenger train was commandeered to rush a squad past the freight and form an advance guard for it.

One morning, just before the President left Washington for his summer vacation, Curtis saw the watchman going on his way to his post across the street, and sang out: You blasted bondholder! Why don't you come across with some of the money you are hoarding up? There are plenty of people who need it, and I am one of them." "What's that?" asked the watchman, turning to Curtis very suddenly.. It was then that Custis, much abashed, saw he had been talking to the real Carnegie.

its affairs. He came armed with letters of introduction that opened the most exclusive homes of the aristocratic English families to him. Among the many young girls that he met was the village belle, the affianced of the young Scotch-American. It was another variation of that old triangle, the woman and two men. From the first the friends of young Thompson could see that his cause was hopeless. His affianced wife and the young stranger spent more and more of their time together. Little rumors began to find their way about the village. The gossips, ever ready in a small town, were soon Thompson, moody and hurt by her sysbusy. tematic neglect, was the last to hear and the last to countenance the whispered talk that was going the round of the village loafing places.

There was a great hue and cry along the quiet old streets one summer morning. Thompson's bride to be had disappeared. Her mother had gone to her room to awaken h her gone. She had gone with the young manager of Albion's latest business house, and from that day to this neither of them have been heard from Young Thompson changed in a day from a cheerful, happy lad to a grim-faced man. He became moody and silent. He neglected his work and never went near the home to which he had expected to lead his bride. Less than a month after the flight of the elopers there was more excitement in Albion. It was reported that Edward Thompson had disappeared. The strain and the shame of living in a town where every man, woman and child knew the story of his filting had proven too much for his sensitive, high-strung

story of danger and distress. The rival claimant of the throne had demanded her hand in marriage, and had promised to spare the life of her father if she would consent to become his queen. It was but a matter of weeks, possibly of days, till his force would be strong enough to back his arrogant demands. In the end the white man knew that the island beauty had fallen in love with him. She pleaded with him to stay and help

her escape from the clutches of the oppressor. It is possible that Thompson would have lingered for a time if his companions had not been eager to get away from the island before the civil war began. They were traders, and as such they did not care to take sides in the dispute. might hurt their business chances in case they ever made another trip to the island. The anchor was lifted, the brown sails spread and the ugly little schooner slipped out of the harbor of Naikeva while Thompson stood on her deck and waved a farewell to the imperious little island beauty. At the very last she had reminded him of his promise to return to Naikeva. It was weeks after the departure of the ship from Naikeva that Thompson was dramatically reminded of his promise to the Princess Lakanita. The sup had just set one night and Thompson was lying on deck smoking and watching the swift tropic dark come up out of the east. A native canoe scraped against the schooner's side and a native was heard calling for "the white man with the blue eyes." He was brought aboard and proved to be the faithful messenger of the distressed princess. He had followed the schooner across leagues of unknown seas in his open cance searching for the only man upon whom she could rely for aid. The end was at hand in Naikeva, and Laka nita and her father were about to be put to death Help must come quickly, and it was more than possible that it was now too late. That night the stanch itttle trading vessel pointed her prow toward Naikeva. In the final melee along the sands, the old king and his rival were both slain and Thompson was stunned by a blow from a war club in the hands of a savage fighting man. When he revived he and his men began a hunt of extermination for all the revolters. They were wiped out and their villages fired before the party returned to the king's village, where the schooner lay anchored. Then the white hero was stricken by one of the malignant island fevers, brought on by his injury on the beach. It was many days before he was able to rec ognize his free-trading companions. The princess had been his devoted nurse through his dangerous attack of tropical fever. Now that he was about to leave the island forever she grew sorrowful and listless. She drooped like a dying flower as the ship's preparations for sailing were being made. All his promises to return brought on fits of passionate weeping on the part of the little princess. She wanted him to stay. "I fought that fever when it tried to take you away from me, and it was all for nothing." was her constant reply, "and now that you are well the white men are taking you away where Lakanita can never hope to see you again."

CAMELS THRIVE IN ARIZONA Circus Animals Run Wild on Western

Desert-Brought Over to Make Caravan Path.

Camels live in the African deserts and in circus tents and-where else Where but in Arizona, a rather out-of the-way place, as far as most persons are concerned, but nevertheless a part of the United States. There are about sixty of the circus beasts running wild, it is said, and they keep pretty well out of the way of mankind. That is not hard to do. There are great plains in Arizona where men may tramp or ride for days without find ing water. It is a desert place, with no growing thing but hard, dry shrubs that keep the earth from blowing into mountains.

Sixty years ago a herd of 15 camels was brought to Arizona. The United States government brought them here from Egypt to make a caravan path Neat Little Device, Especially for Laacross the desert. This was before the time of railroads. The camels were good enough on the plains, but as soon as they struck the rising ground they were of no value. Rough ing the mouth of a fish open while retravel made their feet sore. Finally they were all turned loose and forgot ten. Nobody except a few frightened Indians ever saw them, and they lived quietly in the desert. Probably most of the original herd are dead now, but their children are left in plenty. As long as the camels stay in the desert and do not come to inhabited regions where there are horses to frighten, there is no reason why they should not live undisturbed.

A disappointment in love started him out upon the long road of adventure when he was a youth of nineteen or twenty years. One of these unfortunates who run to extremes in matters of sentiment, he fell in love with one of the pretty village girls of old Albion. Things move slowly in this, one of the oldest and proudest towns of Illinois. In the natural course of events it was to be expected that the two would marry in the fullness of time. There was a home to be built and preparations made for a start in life. Something of the methodical slowness of their English an cestors clung then, and still clings, to the everyday life of the citizens of Albion. The town has changed but little in the years that have flown since Thompson left under cover of nightfall. The same houses line the spacious public square. The same homesteads that sheltered the pioneers now shelter their descendants of the third and fourth generations. Red brick homes, low-eaved and with wide doorsteps, still line the older streets of the little southern Illinois town.

Outwardly the town has changed but little. and in spirit not at all, since the days when young Thompson waited for his girlish sweetheart at the half-lighted corner of the court house square. The Albion of the Flowers, the Thompsons, the Hulmes, the Birkbecks, of "Park House" and "Wanborough Place" still remains. Had the white monarch of the savage isle of Naikeva come back to the place of his birth in the last year of his life he would have found "Little Britnin," as the region is known, much as he left it. It is the same little city of schools and churches, of quiet homes and quieter streets that it was when he was a barefoot lad stealing away to fish and loaf along Bonpas creek. The future ruler of Naikeva spent many an idle hour with hook and line along the shallows of old Banpas, if the traditions of the folk of "Little Britain" are true. He was fond of making long trips to the shores of the Wabash with his chums, but he seemed to lack the ambition dear to every boyish heart, the hope of getting out and seeing the big. round world. There was nothing to set him apart from his fellows as one who would taste of strange adventures before his death in the antipodes. The prosy, uneventful life of a farmer, a storekeeper or at the most a humdrum professional man in a country town was all to which he could look forward.

There came an interruption, an awakening to his love's young dream that drove him out of his home town between sundown and sunrise one summer's night. This spur to his pride, this wound to his self-love sent him adventuring among the spicy isles of the south seas and made him a king in his own right before he was twentyfive. He was of that shy, retiring, loyal type of the Scotch who love deeply when they love at all. He had become engaged to the village beauty. The day had been set for the ceremony and the unmarried youth of the town looked upon him as one already lost to the fun and frolics of the single state.

About this time a new business house was opened in the little town and a youthful eastern manager was sent on by the owners to look after

While life flowed on in the same uneven current in the village of his nativity he was wandering here and there among the emerald islands. the lagoons and the coral reefs of the seas that behold the Southern Cross.

All the islands that lie off the familiar track of the steamers knew him first and last in the three or four years that he spent with the traders and copra buyers. The Philippines, the Ladrones, the Solomons and a dozen other island groups of the southern Pacific were visited by him in the epic years of his Odyssey. Finally he and his trading companions touched at the island of Naikeva in the Fijis. One of the eternal civil wars that are always disrupting the peace of the little island kingdoms was brewing in Naikeva when the tramp schooner dropped anchor inside the reef of coral that formed the harbor breakwater. A new claimant had risen for the throne and he and his followers were demanding the scepter and the head of the old king.

Thompson had left Illinois, had put the states behind him to escape the constant reminder of his lost love that he saw in every woman. The wandering life of three or four years had cleansed his heart of but little bitterness against womankind. He had put the old life behind him and dreamed only of adventure and never of bright eyes and loving lips. It was a mixed crew of Kanakas, Malaysians and half-castes aboard the little trading schooner. They cared but little for the kings and chieftains of the islands, but it was a part of their policy to be polite to the native rulers. An audience was arranged with the native sovereign and a part of the ship's company attended laden with calicoes, mirrors and brass rods as gifts. It was in the royal hut Thompson first sow the Princess Lakanita. She stood at the side of her father's throne when the white men entered the palm hut for their talk with the old king.

Some indefinite attraction seemed to draw the white adventurer and the brown-skinned princess to each other. In the end her pleadings won. After all there was nothing in the outer world to which he cared to go back

The good news spread quickly over the little kingdom. "The Child of the Sun" was to wed their princess and rule them in the wise ways of the white man.

After twenty-five years of idyllic happiness. Thompson, the iove-lorn youth who fled from the covert jeers of the town of his birth, died a king in far-off Naikeva. The princess still lives and his two sons will reign in his place. The silence of twenty-five years has been broken by the news of his passing away surrounded to the last by his dusky retainers.
