WASHINGTON CO. FARM NOTES

CLUB WORK PROGRESSING NICELY

Prof. J. B. Sims from the University of Wisconsin and Milton H. Button County Agent spent April 28, 29 and 30 visiting various schools of the county in the interest of the pig, calf and corn club. The corn club now has 60 entries, with several applications for entry. For 30 members were purchased there may be some wanting to join who will not get corn. It will be a case of first come—first served. The following are the entries by township: Clinton, George Keding, Arnold Schlagenhaft, Anna Martin, Florence Heilman, Clarence Wenning, Felix Heilman, Clarence Scharf, Barton, Marvin Siegfried, Erin Helen Fass, Charlien Fass, James Russell, Charles Mountain, Maurice D. Mountain, Farmington, Herbert Hagner, Otto Hagner, Oscar Hagner, Edward Goldammer, Wilbert Fickler, Marcella and Earl Cass, Elda Grube, Bernice Grube, Germantown: Edw. Endlich, Arthur G. Bast, Val Konrad, Dorothy Arnold, Oliver A. H. Rosen, Triller, Edwin Proefrock, Harvey Triller, Gilbert Arnold, Milton W. Harold Schaezel, Jackson: Hilda Butzke, Edgar Carlitz, Walter Bentz, Gladys Tesch, Carl J. Otto, Ruth Kurta, Kewaskum: Clarence Brunzel, Armond Schaefer, Herbert Brunzel, Polk: Lester G. Lied, Marvian Eckhart, Evelyn Eckhart, Paul J. Wagner, Richfield: Andrew Wiedmever, Clara Theisen, Erwin Theisen, Anthony Theisen, Frank O. Hill, Edward Krueger, Hilda Krueger, Richfield: Gertrude Molkenkin, Wm. Molkenkin, Elmer Krueger, Marie Peters, Lydia Wittenberger, Trenton: Louise Kluever, Helen Schmidt, Wayne Oliver, Mary, George Keding, Arnold Guntly, Milton Justman, Maranda Justman, Lawrence Justman, Roman Weber, West Bend: Alex Bauer, Herbert Bauer.

Unusual interest is being shown in the Calf Club. There are now 13 entries in the Guernsey Calf Club, 10 in the Holstein Calf Club, 1 in the red polled club, 1 in the Brown Swiss Club and 1 in the Jersey Club. More applications are expected.

NOTED COW SENT TO IDAHO

Paul A. Horlamus, secretary of the Washington County Holstein Breeders' association, and R. M. Kunze of Arco, Idaho, were busy in this district last week buying a carload of grade Holstein cows. The load was shipped to Arco, on Saturday. The shipment also included the world's champion grade cow, Aggie, owned by Wm. Huenik of Cedar Grove. This cow, which has a record of over 694 pounds of fat average, will be used for educational purposes, and as an advertisement for Wisconsin Holsteins. This makes three carloads in as many weeks. Mr. Horlamus is looking for more cows this week for a Minnesota buyer.

RICHFIELD COW TESTING ASSOCIATION SOCIAL MEETING

The Richfield Cow Testing association held its monthly social meeting at the home of Henry Kraut on the evening of Wednesday, April 30. Co. Supt. of Schools, M. T. Buckley, County Agent, Milton H. Button and Prof. Sims of the University of Wisconsin were the speakers. Games and stunts were played and a good time was enjoyed by all.

FARMINGTON ASSN. HOLDS MEETING

The newly re-organized cow testing association held its first meeting on the evening of Tuesday, April 29, at the Ties Hall, Fillmore. Prof. J. B. Sims gave an interesting talk on farm conditions in Washington County compared with conditions in other states.

AMUSEMENTS

Saturday, May 10—May Ball, Kewaskum Opera House, given by the Kewaskum Post of the American Legion. Music by Weber's orchestra of six pieces.

Sunday, May 11—Home Talent play "Brown Eyed Betty" at M. W. A. hall, Boharville, given by the Boharville Literary Society.

Sunday, Tuesday and Thursday, May 25, 27, and 29—Home Talent play, given by the St. Michael's Dramatic Club, at St. Michael's. The play is entitled "Dust of the Earth."

Tuesday, June 3—Senior Class play "The Arrival of Kitty", Kewaskum Opera House, given by the Senior Class of the Kewaskum High School.

NEW FANE MILL PROPERTY SOLD

A deal was closed this week, whereby Schiltz Bros. of New Fane sold their mill property to Milton Wheeler and Chas. Bleck, both of New Fane. Consideration private. Possession was given the new owners immediately by Schiltz Bros. as at present undecided what they intend to do in the future.

CARD OF THANKS

We the undersigned, wish to thank all our patrons for their kind patronage extended to us during the time we were in business. Hoping that they will patronize our successors as liberally as they did us.

Schiltz Bros.

ALL SET FOR LEGION DANCE

Everything is now in readiness for the big May Dance to be given at the Kewaskum Opera House tonight (Saturday) by the Kewaskum Post of the American Legion. Everything possible has been done by the committee and members of the Post to make this a most enjoyable affair. Bring your family, friends and relatives, and rest assured that a good time is in store for all. Music will be furnished by Weber's orchestra of six pieces.

HOME TALENT PLAY AT ST. MICHAELS

Those who have attended plays at St. Michael's in the past have witnessed some of the finest plays produced by the St. Michael's Dramatic Club, May 25, 27, and 29, they will again give you a fine treat in producing the four act drama "Dust of the Earth". The success of this play is, in the first place, to be attributed to the actors, who render their parts in a manner not often found on the amateur stage. This is due to persistent drilling and coaching under the leadership of their director, so that the actors for the time being forget or put off their own personality and live right into their parts as they are acting. This success is attained from their part. But the actors alone do not make the play; they in turn depend upon the make up, the stage settings to enhance their acting and to give it the right tone.

To often, as we sit in the audience viewing the performance of a play, we are apt to overlook this important feature in the staging of a play. We see the actors and follow their acting with pleasure and delight, and accord them our praise and compliments upon their success.

The scenic effect of a play has a great deal to do with the success of a play itself. There are weeks of tense preparations. Not only in drilling the actors, but making and painting scenery, and other such accessories needed to put naturalness into the play. Every thing must be in readiness and in its place for the rising of the curtain and long waits between acts. This must all be based on good and prudent management.

"Dust of the Earth" opens with a beautiful, charming September morning scene on one of the swells southern estates. The effect is so real and artistic that you feel right at home at once with the actors. This scene is changed in the second act to midwinter and you are conducted to a cozy sitting room on Christmas morn. You can feel the warmth radiating from the glowing fireplace. Put on your furs and muffs for the third act and you will face a raw, heavy winter scene with north western blizzards and sibirer weather. But not long. In the fourth act you will again find a warm fire in the fireplace.

You cannot resist the invitation to go and see "Dust of the Earth". Are you coming? WHY YES.

LYCEUM ENTERTAINMENT AT CAMPBELLSPORT

The last number of the Campbellsport Lyceum course will be given in that village next Saturday evening. The entertainment will be given by an entertainer who will give a performance that excels anything in the line of first class vaudeville. Robert O. Briggs has had a meteoric career as an entertainer on the professional stage as a result of hard work and giving every audience the best that is in him. Astonishingly versatile and well schooled, he has a straight forward honest appeal to all he meets. On the basis of confidential reports from committees collected by the entertainment agency, Robert O. Briggs led the list of some three hundred companies and entertainers in satisfaction given.

Briggs is an entertainer par excellence, and no matter whether it is a metropolitan or rural audience, the enthusiasm his program arouses is always eloquent testimony to the high standard of his work.

NEW FANE WILL PLAY BATAVIA SUNDAY

The New Fane base ball team will journey to Batavia tomorrow, Sunday afternoon, where they will play their first game of the season with the team of that place. New Fane is represented this year by a stronger team than ever, and expect to hold their own against all amateur teams in this community. They will appear in tomorrow's game in their new uniforms which are of gray color with blue stripes. Batavia is also represented by a strong team this year and expect to make a good record. These two teams are rivals, and a hard fought game can therefore be anticipated. Schramm will do the twirling for New Fane and Sauts the catching.

On Sunday, May 25, the opening game of the season will be played at New Fane, when the strong and much heralded Eden team will be there to cross bats with the New Fane nine. Witt and Harey will constitute the battery for the Eden nine.

FIRST COMMUNION AT ST. MICHAELS NEXT SUNDAY

Next Sunday, May 11th will be the happiest day of their lives for seven children of St. Michael's congregation for on that day they will receive their First Holy Communion after a careful preparation by their Reverend Pastor Father Bayer.

The solemn services will begin at 8:30 o'clock a. m. The children will be conducted from the school to the church in a solemn procession headed by the St. Michael's B. & A. society. The services will consist of the sermon, renewal of the baptismal vows, and the high mass during which the children will receive, at 3 p. m. solemn Mass devotion and Benediction. The following children will receive communion: Leonard Follenz, Leander Fellenz, Anton Rodenkirch, Albert Theusch, Theodore Thull, Rosa Pesch and Arline Schneider.

W. J. C. Perry, Pastor.

Reverend Broderick visited with his brother Leo at Milwaukee last Saturday and Sunday.

MEMORIES

LOCAL LEGION POST ENTERTAINS

The Kewaskum Post No. 384 of the American Legion royally entertained the West Bend Post at the Opera House on Monday evening. The visitors came here about forty strong accompanied by the band. Members of both posts assembled at the M. W. A. Hall at eight o'clock, from where they marched to the Opera House headed by the Legion band. At the latter place a short program was rendered which was opened by a selection by the band. This was followed by a song rendered by the local legion quartette. A one reel comedy was then flashed upon the screen. This was followed by an interesting talk by Adjutant Peterson of Milwaukee who gave an interesting talk, explaining the purpose of the American Legion. The work that has been accomplished since its organization, and work which is yet to be done. The entire program was rendered with pleasing, entertaining and greatly enjoyed by all. The evening's program was concluded with a delicious luncheon served in cafeteria style, to which all apparently did ample justice. The members of the West Bend Post expressed their appreciation for the kind hospitality shown them while here, and stated that they are planning to return compliments some time in the near future, when the local Post will be invited to attend an entertainment at West Bend.

HONORED WITH SCHOLARSHIP

Ellis R. Heineman, son of Mr. and Mrs. Richard Heineman of Madison, formerly of here, was one of ten students selected from the junior class to be awarded a scholarship at the University of Wisconsin. Ellis, who is a junior at the University, has proven himself to be a worthy student. He is the youngest member of this year's class. Being one of ten from 1200 Juniors proves that he has worked hard and faithfully and stuck to his task. A photo of the young man appeared in the Wisconsin State Journal of Sunday, April 27th issue, in which he was also given a very creditable editorial in honor of his success. He was initiated into the fraternity Phi Kappa Psi, and we congratulate Ellis upon his success and extend best wishes for his future career.

AUBURN

Mr. and Mrs. J. F. Uelmen and family spent Sunday afternoon at New Fane.

Mr. and Mrs. Chas. Wunder of Campbellsport spent Sunday at the Heenan Fick home.

Mr. and Mrs. Alex Sook and son Elmer spent Sunday afternoon with Mr. and Mrs. Wm. Geidel and family.

Mr. and Mrs. Paul Wilhelm and family of Fond du Lac called on Mr. and Mrs. Gust. Dickmann and family Sunday.

Leona and Walter Dickmann, Margaret and Dorothy McDonald, Paul Schautz and Clarence Wilkens of West Bend called on Mrs. and Mrs. Just Diekmann and family Wednesday evening.

TOWN SCOTT

Eleanor Graves is visiting with relatives at Cedar Grove.

Miss Loraine Theusch spent Sunday with Pauline Schneider.

Mr. and Mrs. J. Chausch visited with John Pesch and family Sunday.

Mr. and Mrs. John Pesch and daughter spent Saturday at West Bend.

Mrs. Francis Al and son of Milwaukee spent a few days with Paul Geiger and family.

Mr. and Mrs. Erwin Gossklau and son spent Sunday with Mr. and Mrs. Joe Moldenhauer.

Mr. and Mrs. Henry Harmling of Cedar Grove visited with Ben Graven and family Sunday.

Mr. and Mrs. John Naumen and family of West Bend spent Sunday with the Naumann family.

AMONG OUR NEIGHBORS

Waldo Man In Runaway

Sheboygan, May 2.—Jerked from his seat on the milk wagon he was driving from his home to the Dyke cheese factory, John Crosby of near Waldo was dragged for some distance before his runaway team could be stopped. The runaway was caused by the breaking of the front axle of his wagon, letting the front end of his wagon down. Both front wheels came loose unexpectedly when the accident happened and the horses broke away from the rest of the wagon, dragging Mr. Crosby behind. He clung to the reins, however, and brought his team to a stop without a lasting injury. Crosby is well known in the town of Lyndon, and is a farmer living about a mile southwest of the village of Waldo. He is laid up at his home as the result of the severe bruises he received. It is expected that the veterinarian's report he will recover without serious results.

Realizes \$8,000 On Fish Harvest

The John E. Miller American Legion post No. 146, of this city, through their fishing operations on Beaver Dam lake the past year have realized a net profit of approximately \$8,000, besides furnishing labor for many local residents, the sum of over \$10,000 being expended in this direction. Boxes purchased for the shipment of fish and other goods bought locally for another expenditure of \$2,158, so that the sum of over \$20,000 was left in Beaver Dam through the movement. When the Legion was granted a contract to operate seines on Beaver Dam lake, for the removal of rough fish, the Wisconsin Conservation commission was favorably impressed with the motive—as the money derived from the sale of fish was instead of to private individuals—Beaver Dam Daily Citizen.

SUICIDE FOUND IN WOODS

The body of an unknown man was found hanging in Merkel's woods, about a half mile south of Golden, Ind., in the town of Germantown, last Sunday afternoon by Geo. P. Howell and family of 1492 Prospect avenue, Milwaukee, who were in the woods to pick flowers. Authorities were notified of the suicide and the body was taken to the town of Muellet, undertaking establishment at Richfield. The suicide is a man who was between 50 and 60 years, weighing about 160 pounds. He was 5 feet 10 inches tall, and wore a soft gray felt hat, size 7, a black overcoat, marked K.K.K.K. Lawrence, Kansas, and a second coat of black with fine white stripes and made by Kruse Bros., of Mankato, Minn. Efforts are now being made to establish his identity and to locate his relatives.—West Bend Pilot.

Following visited Sunday with Peter Siegel and family: Mr. and Mrs. Ernst Rosenthal, Mr. and Mrs. Henry Siegfried and family of the town of Barton, Mr. and Mrs. John and family of West Bend, Mr. and Mrs. Herman Tesch and family of Boltonville and Wm. Schmidt of the town of Auburn.

—Judge A. C. Backus, Judge of Municipal Court, Milwaukee, will deliver the commencement address to the graduates of the counties at a state held on Sunday, June 1, at Rosenheim's pavilion, Big Cedar Lake.

—Mr. and Mrs. Edw. Kibbel and son Jerome of Campbellsport spent Sunday with Louis Backhaus and family.

—Louis Backhaus and son Louis left Monday for Chicago to visit with Frank E. Backus, who is seriously ill at the Chicago Hospital. They returned Tuesday evening in Mr. Backus' car which they purchased there.

NOTICE

The Kewaskum Live Stock Shipping association will ship stock on Wednesday, May 21st.

YOUNG LADY LOSES EYE

Miss Adeline Fox, 17-year-old daughter of Mr. and Mrs. Jacob Fox, residing two and one-half miles northeast of Campbellsport, met with a very painful accident last Friday evening, which resulted in the loss of her left eye. The accident occurred on Highway 67, east of Campbellsport near the Wm. Koehne farm home. The colt became excited and in a wild dash plunged madly into the Fox car, damaging same considerably. The windshield was broken and a section of the glass struck Adeline in the eye lacerating the ball and breaking down the member so that it has to be removed at the St. Agnes Hospital on Saturday morning. Ray Fox suffered cuts on the head and face. Viola escaped without receiving a scratch. The horse was not injured.

DEATH OF MRS. ELIZABETH RODENKIRCH

Death, on Friday morn'g, May 9, 1924, at 6:20 o'clock, summoned to her final reward, Mrs. Elizabeth Rodenkirch (nee Schmitz) of the home of her daughter, Mrs. John Staehler, in the town of Kewaskum, after a lingering illness with ulcer of the stomach and heart trouble. Deceased was born Sept. 14, 1851, in the town of Theresa. In 1871, she moved with her parents on a farm at St. Michaels where she resided for a number of years, when she moved to Barton, coming to her present home 10 years ago. On Nov. 14, 1871, she was married to Math. Rodenkirch, who preceded her in death 23 years ago. 12 children were born of this union, ten of whom survive, and who are: Lizzie (Mrs. John Staehler) of the town of Kewaskum, Barbara (Mrs. M. Doctor) of Chicago, Henry of the town of Barton, Michael of Milwaukee, Math. of Minneapolis, Minn., John of Milwaukee, Clara (Mrs. Lawrence Kirchner) of California, Tina (Mrs. Jess Mack) of Milwaukee, Sister of Chicago, and Sister Prima of Milwaukee. Besides these she leaves, 26 grand children and 6 great grandchildren, and one sister, Catherine (Mrs. Chas. Bath) of Kewaskum. Deceased was a highly respected and well known member of this community, where she was well and favorably known. She was a kind mother, and a true Christian Woman. Her absence will be keenly felt by all who had the good fortune of making her acquaintance. The funeral will be held Monday morning at 9:30 from the home of her daughter, Mrs. John Staehler in the town of Kewaskum, with services in St. Mary's Catholic church at Barton. Rev. Rubman will officiate. Burial will be made in the congregation's cemetery.

DEATH OF ALEIDA AMELIA KUMROW

In the bloom of youth, the angel of death, called away into eternal sleep one of the town of Scott's most popular and well known young ladies, Aleida Amelia Kumrow, beloved daughter of Albert Kumrow. Deceased was taken ill last November with scarlet fever, after having practically recovered from this dread disease, she suffered a relapse, resulting in a complication of rheumatism and dropsy of the heart. Although everything possible was done to save her life, her condition kept growing worse until she finally passed peacefully away at 5 p. m., Tuesday, May 6th, 1924, at her home. Aleida was born Sept. 19, 1908, in the town of Auburn, coming to her present home with her parents, five years ago. She leaves to mourn her early death, her grief stricken father and the following sisters and brothers: Norma (Mrs. Walter Heberer) of New Fane, Leona, William, Lorinda, Florence and Dorothy, all at home. Her brother preceded her in death two years ago, and another brother also died several years ago. Deceased was well liked by her many friends. She was a young lady of a friendly disposition, courageous, and always willing to lend a helping hand at home, and to assist to make some a happy one. She was a favorite among her schoolmates and in the community in which she resided. Her early demise has caused deep sorrow to all who knew her. The funeral was held on Friday afternoon at 1:30 o'clock from the residence with services in the Emmanuel Luth. church in the town of Scott. Rev. Kanies officiated. Burial was made in the congregation's cemetery. The pall bearers were: Raymond Klug, Earl Klug, Milton Muench, Edward Gruesewitz, Martin Kanies, and Wilbur Brandenburger. The flower girls were: Elsie Theis, Leona Backhaus, Lorena Dickliver and Lydia Arndt. All of whom were members of the class in which the departed was confirmed.

ROUND LAKE

Farmers in this vicinity will finish seeding this week.

Chas. Mitchell was a Dundee business caller Saturday.

Mr. Seifert was a Campbellsport business caller Tuesday.

Mrs. M. Calvey visited with Mrs. A. Seifert Tuesday afternoon.

Marion Gilroy will play a May ball on May 11th, music by Doc Wilson's orchestra.

Mr. and Mrs. Anton Seifert and family spent Sunday at Batavia and New Fane.

Mr. and Mrs. Geo. Roehmer and son Kenneth visited Thursday evening at their home here.

Messrs. Geo. and Ray Thever and Vincent Calvey attended a party in Eden Saturday evening.

Mr. and Mrs. M. Calvey and son Vincent visited Sunday with Mr. and Mrs. Wm. Krueger and family.

Mr. and Mrs. M. Calvey and son Vincent visited Sunday with Mr. and Mrs. Wm. Krueger and family at New Fane.

Mr. and Mrs. Henry Haback and children and Roy Hennings of Milwaukee and Mr. and Mrs. W. J. Romaine of New Prospect visited at the Wm. Hennings home Sunday.

Mrs. M. Calvey and son Vincent and Geo. and Ray Thever and Norman Seifert were pleasantly entertained Sunday evening at the home of Mr. and Mrs. Frank Burnett of Wausau.

Wm. Hennings received word from relatives in California of the death of his sister and her husband, Mr. and Mrs. Joseph Fort of California, both dying within 24 hours. They were former residents of Round Lake.

Miss Clara Schaefer and friend of Milwaukee were guests of the Felton and Brodzeller families last Sunday.

PROMINENT LOMIRA MAN KILLED

Louis Jagow, 37 years old, a prominent citizen of Lomira, was instantly killed last Sunday evening at 7:30 o'clock. Six other persons were injured when a car driven by Miles Colligan of Wautoma, crashed into Jagow's Ford sedan on Highway 15, just south of Lomira. The accident happened when Jagow was at the rear of his car, engaged in changing a tire. His head and chest were crushed. Those injured are Mrs. Jagow, three ribs broken and internal injuries; Ray Jagow, aged 8, Marguerite, aged 7 and a boy less than two years received cuts and bruises. Herman Maciejewski, aged 70, father of Mrs. Jagow, cut and bruised, and Mrs. Hagan Maciejewski, internally injured. Jagow and his family and father and mother-in-law had been to Menomonee Falls, and were on their way home, when they reached the south limits of Lomira, a tire on his car went flat. He stopped the machine and got out to make the repairs. It is believed that Colligan, will not be held responsible for the accident, according to a statement made by Attorney R. E. Eileen, also of Wautoma, who was with him in the machine, is to the effect, that at the time of the accident, all cars were running with lights burning, and traffic was heavy. Colligan was traveling at the rate of 25 miles an hour, as were all the cars going north, said that he was watching the cars on his left fearing that some driver might turn out of the line to pass other cars, and that he was blinded by the lights of southbound cars and could not see Jagow's car standing directly in his path. Colligan claims he did not know anything was wrong until his car had crashed into the Jagow machine.

The impact hurled the latter car 80 feet and up against a telephone post, demolishing it and injuring the occupants. Colligan and Eileen were taken to Juneau, where they were questioned and later released upon orders to appear at the inquest. The two also suffered bruises and cuts. It is reported that Jagow was kneeling in back of his car, when the approaching machine crashed into him. His head was crushed between the top of his machine and the bumper of the Colligan car.

The unfortunate man is survived by his wife, three children, two sisters and two brothers. The funeral was held on Thursday afternoon, from the Lomira M. E. church.

WILL HOLD SPECIAL THANKSGIVING SERVICES

All congregations connected with the Missouri Synod of the Ev. Luth. church have been asked to hold special thanksgiving services on one of the first Sundays in May; on account of their college building fund. In June 1923 the board of directors found it necessary to ask for \$35,000 for new buildings at the various colleges at St. Louis, Mo., Milwaukee, Wis., Ft. Wayne, Ind., Springfield, Ill., River Forest, Ill., Springfield, Ill., Winfield, Kan., Seward, Neb., and other places. In November, 1923 all members of all congregations were asked to donate or subscribe to the funds required. Early reports indicated that the drive seemed successful. But no one expected such results as reported by the building committee April 19. On that date cash donations amounted to \$1,200,000, and subscriptions to \$3,579,000, totaling over \$4,779,000, with more subscriptions and donations coming in daily. Special thanksgiving services accordingly seem to be the duty of the members of the Missouri Synod. At St. John's church, New Fane the pastor, C. J. Gatzek will touch on the subjects in the morning services next Sunday. Prof. G. Chr. Barth, president of Concordia College, Milwaukee will preach at the same church at 7:30 p. m. St. John's choir will render appropriate anthems.

PROMINENT MAYVILLE GIRL WEBS

Miss Vera Lamoreaux, daughter of Mrs. Mary Lamoreaux of Mayville, at one time assistant of Campbell Kewaskum High School, was united in marriage, last Saturday, May 3rd at Milwaukee, to Erwin Hamm, son of Mrs. Jacob Hamm of Mayville. The couple were married by Judge John Karel of Milwaukee, an intimate friend of the bride's mother. After the wedding ceremony the couple left on a motor trip through the northern part of the state, after which they will reside at Mayville where the groom operates a lumber business.

GOEBRTSKE-GRUBER WEDDING

John Gruber of this village and Miss Marion Goebertske of Northland, Waukesha county, were married at Northland on Monday, May 5th. The groom is engaged as baker at the local bakery. The bride was employed at the Aluminum Factory and by the Engle-Kress Co., at West Bend, for some time. They will make their future home at Kewaskum. We extend best wishes to the newly weds.

CAMPBELLSPORT BOY HONORED

Orval Gunther, son of Mr. and Mrs. Philip Gunther of Campbellsport, a student of the Marquette University College of Business Administration at Milwaukee, is one of the six students, who have been honored by being selected for membership into Lambda Epsilon Sigma, or the Bantrolite as it is known.

JOHN DIETZ DEAD

John Dietz, defender of Cameron Dam, died at the West Side Hospital, Milwaukee, late Thursday afternoon, after several weeks' illness with dropsy. Dietz was 43 years old, and was born in Winnebago, Winnebago county. He is survived by his wife and the following children: Clarence Leslie John, Mrs. Myra Neuman and Elden Dietz, all of whom were at his bedside when death came. Funeral arrangements had not been made up to the time of going to press.

ZEN of the Y. D.

A Novel of the Foothills

By ROBERT STEAD

Author of "The Cow Puncher," "The Home-Steader," "Neighbors," etc.

Copyright by ROBERT STEAD

"YOU FIGHT WELL, ZEN"

SYNOPSIS—Tranley's day-outing outfit, after stacking the Y. D. ranch headquarters, big Y. D. ranch headquarters, Tranley is a master of men and circumstances. Linder, foreman, is substantial, but not self-assured. George Drakz, one of the five, is an irresponsible chap who men in an emergency. Zen, a young man, is a playboy, but not a playboy. Tranley and Linder ride with Y. D. and his to the south. Zen, Tranley resolves to marry Zen. Y. D. instructs Tranley to get the South Y. D. "right of way" high water, and a fellow named Landson. Drakz proposes to Zen and is nearly rebuffed. Tranley pitches camp on the South Y. D. and Landson's outfitting hay. Drakz, Tranley's manager, Tranley that he is working under a lease from the legal owner and warns Tranley off. All of which means war. Y. D. and Zen ride to the South Y. D. Zen is a natural rump, not yet broken and rips for mating. Y. D. has taken a liking to Tranley. Zen holds Tranley off and encourages Linder. Zen enjoys the prospect of a race between Tranley and Linder for her favor, but secretly laughs at both. She has another and more serious encounter with Drakz. Linder, working machine set in the grass. Zen prevents open war with Landson. Tranley half-way proposes and is turned off. Drakz resolves to burn out the rival outfit. Fire blazes up in the Landson stacks. The Y. D. outfit hastens to aid the enemy. Zen rides off alone to help.

CHAPTER V—Continued.

"Then I'll change his style of architecture the first time I run into him," said Y. D. savagely. "Zen is too young to think of such a thing, anyway."

"She will always be too young to think of such a thing, so far as Drakz or his type is concerned," Tranley returned. "But suppose Y. D. to be quiet, Frank, suppose I suggested—"

"Tranley, you work quick," said Y. D. "I admit I like a quick worker. But just now we have a fire on our hands."

By this time they had reached the camp. Tranley gave his instructions in a few words, and then turned to ride down to Landson's. They had gone only a few hundred yards when Y. D. pulled his horse to a stop.

"Tranley!" he exclaimed, and his voice was shaking. "What do you smell?"

The contractor drew up and sniffed the air. When he turned to Y. D. his face went white.

"Smoke, Y. D.," he gasped. "The wind has changed!"

It was true. Already low clouds of smoke were drifting overhead like a broken veil. The erratic foothill wind which a few minutes before had been blowing down the valley, was now blowing back up again. Even while they took in the situation they could feel the hot breath of the distant fire borne against their faces.

"Well, it's up to us," said Tranley tersely. "Well, make a fight of it. Get any speed in that nag of yours?" Without waiting for an answer he put spurs to his horse and set forward on a wild gallop into the smoke.

A mile down the line he found that Linder had already gathered his forces and laid out a plan of defense. The valley, from the South Y. D. to the hills, was about four miles wide, and up the full breadth of it was now coming the fire from Landson's fields. There was no natural fighting line; Linder had not so much as a buffalo path to work against. But he was already staking back-fires at intervals of fifty yards, slotting three men to each fire. A back-fire is a fire started for the purpose of stopping another. Usually a road, or a plowed strip, or even a cattle path, is used for a base. On the windward side of this

base the back-fire is started and allowed to eat its way back against the wind until it meets the main fire which is rushing forward with the wind, and chokes it out for lack of fuel. A few men, stationed along a furrow or a trail, can keep the small back-fire from jumping it, although they would be powerless to check the momentum of the main fire.

This was Linder's position, except that he had no furrow to work against. All he could do was tell off men with sacks and horse blankets soaked in the barrels of water to hold the back-fire in check as best they could. So far they were succeeding. As soon as the fire had burned a few feet the forward side of it was pounded out with wet sacks. It didn't matter about

the other side. It could be allowed to cut back as far as it liked; the further the better.

"Good boy, Lin!" Tranley shouted, as he drew up and surveyed operations. "She played us a dirty trick, didn't she?"

Linder looked up, red-eyed and coughing. "We can hold it here," he said, "but we can never cross the valley. The fire will be on us before we have burned a mile. It will beat around our south flank and lick up everything."

Tranley jumped from his horse. He seized Linder in his arms and literally threw him into the saddle. "You're played, boy!" he shouted in his foreman's ear. "Ride down to the river and get into the water, and stay there until you know we can win!"

Then Tranley threw himself into the fight. As the men said afterwards, Linder fought like a wildcat, but Tranley fought like a den of lions. When the wagon galloped up from the river with barrels of water Tranley seized a barrel at the end and set it bodily on the ground. He sprang into the wagon, shouting commands to horses and men. A hundred yards they galloped along the fighting front; then Tranley sprang out and set another barrel on the ground. In this way, instead of having the men all coming to the wagon to wet their sacks, he distributed water along the line. Then they turned back, picked up the empty barrels, and galloped to the river for a fresh supply. Soon they had the first mile secure. The back-fires had all met; the forward line of flames had all been pounded out; there was no danger of it jumping the burned space. Then Tranley picked up his kit and rushed it on to a new front further south. At intervals of a hundred yards he started fires, holding them in check and beating out the western edge as before.

But his difficulties were increasing. He was farther from the river. It took longer to get water. One of the barrels fell off and collapsed. Some of the men were playing out. The horses were wild with excitement and terror. The smoke was growing denser and hotter. Men were coughing and gasping through dry, seared lips.

"You can't hold it, Tranley; you can't hold it!" said one of the men. Tranley hit him from the shoulder. He crumpled up and collapsed.

A mile and a half had been made safe, but the smoke was suffocatingly thick and the roar of the oncoming fire rose above the shouts of the fighters. Up galloped the water wagon; made a sharp lurch and turn, and a front wheel collapsed with the shock. The wagon went down at one corner and the barrels were dumped on the ground.

She continued straight down the stream, but he had already seen her and was headed her way. In the excitement of what he had just done Drakz was less responsible than usual.

"Hello, Zen!" he said. "Mighty decent of you to ride down and meet me like this. Mighty decent, Zen!"

"I didn't ride down to meet you, Drakz, and you know it. Keep out of the way of I'll use a whip on you!"

"Oh, how naughty! Y. D. all over! Never mind, dear, I like you all the better for that. Who wants a tame horse? An' as for comin' down to meet me, what's the odds, so long as we've met?"

He had turned his horse and blocked the way in front of her. When Zen's horse came within reach Drakz caught him by the bridle.

"Will you let go?" the girl said, speaking as calmly as she could, but in a white passion. "Will you let go of that bridle, or shall I make you?"

He looked her full in the face. "Gad, but you're a stunner!" he exclaimed. "I'm glad we met—"

She brought her whip with a biting cut around the wrist that held her bridle. Drakz winced, but did not let go.

"Just for that, young Y. D.," he hissed, "just for that, you're drop all formalities, so to speak."

With a dexterous spurring he brought his horse alongside and threw an arm about Zen before she could short him off. She used her whip at beat range on his face, but had not arm-room in that to land a blow. They were strung deep in water, and as they struggled the horses edged in deeper still. Finding that she could not beat Drakz off Zen clutched her saddle and drove the spurs into her horse. At this unaccustomed treatment he plunged wildly forward, but Drakz's grip on her was too strong to be broken. The maneuver had, however, the effect of unbalancing Drakz. He fell in the water, but kept his grip on Zen. With his free hand he still had the reins of his own horse, and he managed also to get hold of hers. Although her horse was plunging and jumping, Drakz's strong grip on his rein kept him from breaking away.

"You fight well, Zen, d—n you—you fight well," he cried. "So you might. You played with me—you made a fool of me. Well, see who's the fool in the end." With a mighty wrench he tore her from her saddle and she found herself struggling with him in the water.

"If I put you under for a minute I guess you'll be good," he threatened. "I'll half drown you, Zen, if I have to."

"Go ahead," she challenged. "I'll drown myself, if I have to."

"Not just yet, Zen; not just yet. Afterwards you can do as you like."

In their struggles they had been getting gradually into deeper water. At this moment they found their feet carried free, and the horses began to swim for the shore. Drakz still clutched his victim with one hand, still clutching his victim with the other. More than once they went under water together and came up half choking.

Zen was not a good swimmer, but she would gladly have broken away and taken chances with the current. Once on land she would be at his mercy. She was using her head frantically, but could think of no device to foil him. It was not her practice to carry weapons; her whip had already gone down the stream. Presently she saw a long leather thong floating out from the saddle of Drakz's horse. It was no larger than a whip-lash; apparently it was a spare lace which Drakz carried, and which had worked loose in the struggle. It was floating close to Drakz.

"Don't let me sink, George!" she cried frantically, in sudden fright. "Save me! I won't fight any more."

"That's better," he said, drawing her up to him. "I knew you'd come to your senses."

Her hand reached the lash. With a quick motion of the arm, such as is given in throwing a rope, she had looped it once around his neck. Then, pulling the lash violently, she forced herself out of his grip. He clutched at her wildly, but could reach only some stray locks of her brown hair which had broken loose and were floating on the water.

She saw his eyes grow round and big and horrified; saw his mouth open and refuse to close, heard strange little gurgles and chokings. But she did not let go.

"When you insulted me this morning I promised to settle with you; I did not expect to have the chance so soon."

His head had gone under water. . . . Suddenly she realized that she was drowning. She let go of the thong, clutched her horse's tail, and was pulled quickly ashore.

Sitting on the gravel, she tried to think. Drakz had disappeared; his horse had landed somewhat farther down. . . . Doubtless Drakz had not let go.

In those old days money was printed on ordinary paper, which was consequently easily obtained or imitated and, consequently, such a book as "Heath's Designs on the Bills," was needed. Now, however, a special brand of paper with special water marks, whorls and embedded tiny silk threads, is used. This paper cannot be imitated by the counterfeiters and such a book as the "Detector" is not now published.

The book, published by Lahan Heath & Co. of Boston and Washington, claimed to be "the only infallible method" of detecting counterfeit notes and bonds with "genuine designs (which were mutilated) from original government plates by authority from the United States Treasury department and the American National and Continental Bank Note companies, New York and Boston."—Detroit News.

Must Expect Retaliation
He that openly tells his friends all that he thinks of them must expect that they will secretly tell his enemies much that they do not think of him.—Colton.

First U. S. Currency Was Easily Counterfeited
So easily counterfeited were the first lots of paper money issued by the United States government in the sixties that spurious bills flooded the country, and countless acute business men were victimized. Finally, to balk the criminals, a book called "Heath's Infallible Government Counterfeit Detector at Sight" was published in 1870.

They Had Gone Only a Few Hundred Yards When Y. D. Pulled His Horse to a Stop.
base the back-fire is started and allowed to eat its way back against the wind until it meets the main fire which is rushing forward with the wind, and chokes it out for lack of fuel. A few men, stationed along a furrow or a trail, can keep the small back-fire from jumping it, although they would be powerless to check the momentum of the main fire.

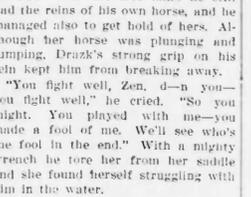

growned. Yes, this would be the explanation. Why change it? Zen turned it over in her mind. Why make any explanations? It would be a good thing to forget. She could not have done otherwise under the circumstances; no jury would expect her to do otherwise. But why trouble a jury about it?

"He got what was coming to him," she said to herself presently. She admitted no regret. On the contrary, her inborn self-confidence, her assurance that she could take care of herself under any circumstances, seemed to be strengthened by the experience.

She got up, drew her hair into some kind of shape, and scrambled a little way up the steep bank. Clouds of smoke were rolling up the valley. She did not grasp the significance of the fact at the first glance, but in a moment it impacted home to her. The wind had changed! Her help would be needed, not by Mrs. Landson, but probably at her own camp. She sprang on her horse, recrossed the stream, and set out on a gallop for the camp. On the way she had to ride through one thin line of fire, which she accomplished successfully. Through the smoke she could dimly see Tranley's gang flailing the back-fires. She knew that was in good hands, and hastened on to the camp. Zen had had prairie experience enough to know that in hours like this there is almost sure to be something or somebody in vital need, overlooked.

She galloped into the camp and found only Tompkins there. He had

Adapted to Rich Soils.
Ladino clover is especially adapted as a pasture crop for rich, well watered soils in regions of moderate temperature. It does not ordinarily succeed on poor soils and it is particularly

Field of Ladino Clover.

sensitive to lack of abundant and continuous moisture quite to the surface of the ground, consequently it should not be sown in localities where severe surface droughts are to be expected. It withstands extreme cold except on heavy clay soils not protected by a snow cover, in which case the plants are likely to heave badly in late winter. It was formerly believed that Ladino clover did not suffer from hot weather provided it was well supplied with water. Recent experience indicates, however, that the plants turn red under prolonged exposure to hot sunlight and the stand is weakened.

In the regions where it succeeds best Ladino clover is one of the most productive and nutritious pasture plants known and is unquestionably one of the most palatable to live stock. Repeated instances have been reported where a field of Ladino clover has carried the equivalent of two to four head of mature stock per acre continuously from spring until fall. During this period the production of milk, meat or other annual products per acre has been greater than that from any other permanent grazing plant. The foodness of all kinds of live stock for Ladino clover has been illustrated many times by the animals leaving good fields of alfalfa, red clover or the grasses to feed on the Ladino. The palatability of Ladino, in fact, is sometimes discussed in terms of rabbits, geese, grasshoppers and other pests sometimes feed on it so voraciously as to destroy it. Even live stock, and especially horses and sheep, sometimes destroy the stand by too close nibbling of the prostrate stems. There is a belief that Ladino clover does not cause bloatings of cattle as badly as other leguminous pastures, but this is uncertain. So far as is known, Ladino clover is not subject to serious injury by diseases and insects, except grasshoppers and other leaf-eaters.

Peculiar Characteristics.
While the peculiar characteristics of Ladino clover are not yet thoroughly understood, there are evidently certain sections in which it is excellently adapted, while for other localities it cannot as yet be advised. The most conspicuous success with Ladino has been had in the irrigated regions of southern Idaho and in the coastal regions of Oregon and Washington. In those districts the department feels warranted in advising its trial by all farmers interested in permanent pastures. The plant is also promising for irrigated districts in Colorado, Utah, northern California and eastern Oregon and Washington. It does not thrive in irrigated regions in the Southwest. Without irrigation Ladino has been a success in northern Michigan, on overflow land along the lower Missouri river, on the lower Mississippi and its tributaries and in scattered places throughout the central United States.

Ladino clover has been under more or less continuous test by the Department of Agriculture for nearly twenty years. Its progress has been retarded, however, by the fact that until recently it has been a very poor producer of seed. Within the past five years it has been found that the plant produces seed abundantly on irrigated soil in the Northwest and seed of excellent quality will probably now be available to supply all those who may care to use it.

Building a Poultry House
For the man who is planning to build a poultry house here are some good points relating to ventilation problems that are worth remembering: This old station poultryman says: "A thousand pounds of hens need 8,275 cubic feet of air a day, while 1,000 pounds of horse use only 3,401 cubic feet of air a day. Hens have to breathe at a furious pace to keep up their high body temperature. Give them air."

Ladino Clover Is New Forage Crop
Especially Adapted as Pasture for Rich Soils and Is Most Palatable.

(Prepared by the United States Department of Agriculture)
Many inquiries have been received by the United States Department of Agriculture this spring regarding Ladino clover, a new forage crop that is being widely advertised for pasturage in the northern and western states. Because of the publicity being given the plant and the evident lack of information concerning it, the experience of the Department of Agriculture with the variety may be of interest.

Ladino clover, a large or "giant" form of the familiar little white-flowered Dutch clover common in lawns and pastures. It is probably a native of northern Italy where, on the rich, moist soils in the valley of the Po river, it has long been a favorite forage crop. Under favorable conditions Ladino clover forms a dense mass of succulent herbage ten to twenty inches deep composed of large leaves borne on long stalks arising from creeping prostrate stems. With the exception of the seeds all parts of the plant are identical with those of common white clover except that they are much larger.

A Half Hour's Hard Riding Brought Her to Lint's.

already run a little back-fire to protect the tents and the chuck-wagon.

"How goes it, Tompkins?" she cried, bursting upon him like a courier from battle.

"All set here, ma'am," he answered. "All set and safe. But they'll never hold the main fire; it'll go up the valley by—by—scoutin'—begin'n' your pardon, ma'am."

"Anyone live up the valley?"

"There is. There's the Lint's—squatters about six miles up—it was from them I got the cream an' fresh eggs you was good enough to notice, ma'am. An' there's no men folks at all; just Mrs. Lint an' a young herd of little Lints; least, that's all was there last night."

"I must go up," said Zen, with instant decision. "I can get there before the fire, and as the Lints are evidently farmers there will be some plowed land, or at least a plow with which to run a furrow so that we can start a back-fire. Direct me."

Tompkins directed her as to the way, and, leaving a word of explanation to be passed on to her father, she was off. A half hour's hard riding brought her to Lint's, but she found that this careful settler had made full provision against such a contingency as was now come about. The farm buildings, implements, stables, everything was surrounded, not by a fire-guard, but by a broad plowed field. Mrs. Lint, however, was little less thankful for Zen's interest than she would have been had her little steading been in danger. She pressed Zen to wait and have at least a cup of tea, and the girl, knowing that she could be of little or no service down the valley, allowed herself to be persuaded. In this little harbor of quiet her mind began to arrange the day's events. The tragic happening at the river was as yet too recent to appear real; had it not been for the touch of her wet clothing Zen could have thought it all an unhappy dream of days ago. She reflected that neither Tompkins nor Mrs. Lint had commented upon her appearance. The hot sun soon dried her outer apparel, and her general disheveled condition was not remarkable in such a day as this.

Having Killed Drakz, what is Zen going to do about it?
(TO BE CONTINUED.)

He that openly tells his friends all that he thinks of them must expect that they will secretly tell his enemies much that they do not think of him.—Colton.

Extension Activity in South Carolina
Attention Given Primarily to Poultry Assistance.

(Prepared by the United States Department of Agriculture)
Home demonstration work in South Carolina during 1923 was marked by activity in many different fields. It almost every county attention was given primarily to assistance with poultry, as it was found that by urging the selling of high-grade chickens and fine quality eggs a more substantial source of income than in any other way. This work led in turn to the encouragement and support of the club markets in various counties, which have been a noteworthy feature in South Carolina for several years past. With an increase in returns for their products, many of the women were able to put improvements into their homes which they had previously lacked, and while no general or county contests in household improvements were held, practically every one of the 35 home demonstration agents' reports received by the United States Department of Agriculture mentions a number of advantageous changes or additions to equipment.

Among the girls' clubs there were, however, a great many county and county contests, leading up to district contests. In line with the work with adults in poultry were the egg-baking contests, sewing club work led to sewing contests, and a great many girls learned in the course of competing for a prize how to make simple garments for themselves and keep their clothes in order. Hat making instruction was especially popular. Other club contests held in many counties were biscuit making, yeast bread, and canning.

Club contests were often held at the two or three day summer camp for boys and girls. These camps were featured in almost every county. They included some instruction, as well as club demonstrations and recreational activities, and were a source of great profit to the rural young people who were able to attend them.

Big Increase Shown in Use of Milk and Cream
The American appetite for milk and cream goes on increasing. A survey recently completed by the bureau of agricultural economics, United States Department of Agriculture, shows that the per capita consumption of fluid milk for 1923 was 53 gallons, which figures out to 1.16 pints daily for each person. In 1922 the per capita consumption was 50 gallons, and the year before it was 49 gallons.

The statement has often been made that farmers who produce milk for the market sell practically all of it and do not use as much in their homes as do city people. The survey showed the contrary—that on farms with producing cows more milk and cream were consumed than by city families. The farm figures were obtained from 30,000 individual farms and represent the most comprehensive survey of the kind ever made. The city figures were obtained principally from boards of health and covered 390 cities having a total population of about 25,000,000 persons.

The average daily consumption of milk and cream on farms where producing cows were kept was found to be 1.78 pints per person in 1923. On farms having no cows or on which nonproducing cows were kept, the average daily consumption was 0.87 pint. The city average was 0.87 pint.

Iowa Specialist Favors Concrete Fence Posts
Posts which have been on test in an Iowa experiment station for over eight years, made of concrete and reinforced, show practically no signs of deterioration. The tests showed that the posts made from graded aggregate, although requiring less cement, possessed greater ultimate strength than posts made from bank-run material. For most of the posts a mixture of one sack of cement to two and one-half cubic feet of bank-run gravel having an excess of fine particles was used.

One-quarter inch square twisted bars, flat bands and No. 3 wire were used as means of reinforcement. When placed in the testing machine, the quarter-inch bars proved most satisfactory. The laboratory tests also indicate the advisability of placing the reinforcing material comparatively near the surface of the post rather than near its center. From five-eighths to three-fourths of an inch from the surface is considered about right by Professor J. B. Davidson.

Farm Hint
Better seed, better crops.
Civilization is threatened when the soil is robbed.
The cost of production depends very largely upon the yield per acre.

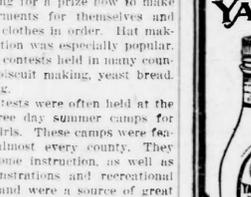

The first milestone on the road to market: Carefully select both seeds and sires.
The inoculation for the cowpea is only good for cowpeas, peanuts and Japan clover.
If you would sell farm stuff easily, raise better stuff than the other fellow raises.
Whoso sareth poor seed because they are cheap loseth ten-fold more than he saveth.
One way of "beautifying the home gardens" is a good vigorous clean-up of the backyard.

In selecting seed, whether for herds, flocks or crops, the best is always the greatest economy.
Another fine argument for bees! 90 per cent of the orchard pollination is done by the busy bee.

WRIGLEYS
After Every Meal
It's the longest-lasting confection you can buy—and it's a help to digestion and a cleanser for the mouth and teeth.
Wrigley's means benefit as well as pleasure.

"Queen of Fruits" May Find New Throne Here
The mangosteen, reputed "queen of fruits," and long thought to be impossible of cultivation outside the Asiatic tropics, is to be thoroughly tested in tropical America, according to plans of the United States Department of Agriculture. Seeds from this fruit, which are among the most difficult in the world to transport long distances, have after years of failure finally been successfully brought to Washington. Plants grown from these seeds will be kept in the greenhouses there for two years, when they will be ready for the testing.

The mangosteen is a tree which grows about twenty feet high and produces a delicate fruit of a reddish brown color about the size of an apple.

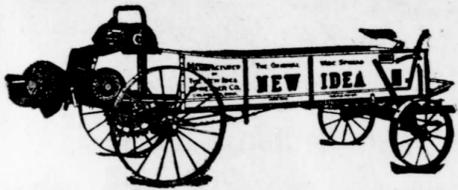

Many troubles would disappear if we had less time to think about them.

The NEW IDEA SPREADER

The Spreader That is Easily Drawn by Two Horses

This Manure Spreader differs somewhat in appearance from our former models, even painted different. Where we formerly used red as the body color, the new machine is finished in a beautiful rich yellow, with an olive green trim—really an artistic combination, one that will stand out as the color of the Genuine NEW IDEA Spreader, enabling the tourist to distinguish the machine when he sees it in the farmer's yard. The Model 8 is herein briefly described. It uses the Auto Steer or Pivot Axle construction. The bolster is securely held in place by the side sills and the front axle is secured by strong angle steel braces and plates riveted to the sides. The main axle beam consists of two 2x3 angles hot riveted together and has the end trunnions hot riveted into these angles, making a front structure that is practically indestructible. The axle ends are forged out of cold rolled steel in one piece and are strengthened at the bend by a heavy casting cast around them. The steering arms are wide steel forgings riveted to the axle ends and are so set that the front wheel on the opposite side does not slide over the ground when turning, a very important feature. The steering rods are provided with hardened steel bushings, eliminating all wear. There are no adjustments necessary. They are right when they leave the factory and a chance to make adjustments would usually result in misalignments and trouble. The main axle oscillates in the uprights, preventing twisting of the bed when driving over uneven ground. Wide wearing plates are provided at these oscillating points. The tongue on this model is a slip tongue held in the bracket by a steel pin with a cotter pin. This enables the user to take the tongue out without removing a lot of bolts, a valuable feature when the spreader is housed in a machine shed or barn. A safety stop prevents breakage in case of too short a turn. The construction of this front end is very simple—very strong and exceedingly durable and is the result of 14 years' experimental work with this type. Track is 60 inches center to center, and 8 ft. 6 in. from center of front axle to center of rear axle. Turning radius is 1 1/2 feet. The cylinder bars are made out of angle steel with pointed teeth held rigidly by a rivet through the flattened end of the tooth. The bars are bolted to the cylinder beads. Anti-wrapping shields at each end of the main cylinder prevent straw and twine from wrapping around the shaft. A collar upon the upper cylinder and distributor shafts prevent wrapping around these shafts. The upper cylinder is set ahead of the lower one so as to take the upper part of the load off ahead of the lower part, which greatly reduces draft and prevents choking. The two cylinders are set apart just far enough to prevent choking, at the same time pulverizing all the manure, a feature that will please the particular farmer who wants to see a nice job of spreading. The distributor is distinctly New Idea. Its construction is covered by strong patent claims. The shape of the blades and their relative position to each other are vitally necessary to do good work. The steel blades or paddles are cut out of heavy gauge copper bearing steel which is rust resisting. They are riveted to castings fastened to the shaft. The rear axle has the feed cam on the one end and the drive sprocket hub on the other end, and runs in self-aligning bearings fastened to the main side sills and properly braced to the bed. All bearings are self-aligning and are provided with a spring top oiler. All bearings are small inexpensive journals held in place by steel forgings. The feeding mechanism, operated from the rear axle, provides four changes of conveyor speeds—4, 8, 12 and 16 loads per acre—or can be shut off entirely with the lever at the operator's right side. A safety is provided by the key in the ratchet wheel, which, in case of a frozen load or a load run into the idle cylinders, will shear off. A new key can easily be inserted. The conveyor is of the chain type traveling over a solid bottom. Tempered steel sprocket chain to which at regular intervals angle steel cross bars are riveted, is used. The bed of the machine is 1 1/2 inches wider in the rear than in the front—freeing the load from the friction against the side. This method has been in use by us for 25 years. The drive is also operated from the rear axle. A large sprocket wheel is bolted to the main sprocket hub that is keyed on the axle. In case of breakage it provides inexpensive repairs, and also enables us to fasten it securely by a press fit, not possible any other way. A tempered steel drive chain transmits the power from this wheel to the main cylinder shaft. This chain is raised or lowered by the drive lever at the operator's left side. A spring tension on the rod holds the chain to the sprocket wheel, preventing jumping or climbing. The upper cylinder and the distributor are driven by tempered steel chains from the main cylinder. We use separate chains for each drive as it prevents short bends of the chain, thereby prolonging the life of the chain and making a lighter draft machine. Both chains are provided with hardened steel slide tighteners. The construction of the sides and bottom are distinctly New Idea. Heavy cross pieces, to which the matched bottom boards are nailed with cement coated nails that can't pull out, are fastened to the main side sills and held in place by 5 steel bolts the full width of the machine. The main side sills are forged out of one piece—not two or three pieces patched together. All main bearings are fastened to these sills as well as the footboard in front. The boards in the sides are grooved and matched and are riveted to the steel uprights riveted to the main sills. It makes a one-piece construction, light in weight, yet far stronger and durable than the old methods. Steel braces from the long center upright to the bottom cross piece underneath keep the sides from twisting or bulging out in the center. The angle steel saddle over the upper cylinder and the front end board hold the front and rear end rigid. A steel angle is fastened over the top of the sides for convenient loading. All castings are made in our own foundry out of the strongest possible mixture of iron and steel melted together. Nearly all steel parts and forgings are made out of high carbon steel with copper bearings, steel in the distributor blades, upper axle shields, chain shields and other sheet metal parts.

GUARANTEE

"We hereby guarantee the NEW IDEA SPREADER to be well made, of good material, and to do the work as represented when set up and operated according to our instructions. Should a part break or prove defective in material or workmanship within one year from date of purchase, a new part will be furnished free of charge, f. o. b. factory, providing the defective part is returned to us transportation charges prepaid."

Girls—You can't expect a feller to love a girl with a red nose, colorless lips, dull eyes. Don't wait—your "chance" might come tomorrow. Buy or take Hollister's Rocky Mountain Tea at once and be on the safe side—O. B. Graf, Kewaskum, Wis.—Advertisement.

—Mr. and Mrs. Aug. Schultz of Random Lake, Mr. and Mrs. Erwin Klein and son of Glenbeulah, Mr. and Mrs. Herbert Krain, daughter, Larverne and son Leroy of Cascade and Mr. and Mrs. Fred Ramthun spent Sunday with Mr. and Mrs. Alfred Ramthun.

—William Hausmann, son of Dr. and Mrs. William Hausmann of West Bend, a student at Marquette Dental College, was elected secretary of Marquette College Chapter of the Delta Sigma Delta national fraternity last week. We extend congratulations for the honor bestowed upon him.

—Miss Laura Brandstetter of South Gormantown and Mrs. Edward Krause of Racine spent Saturday and Sunday with their mother, Mrs. Casper Brandstetter and family. Mrs. Krause and husband, left their home at Racine Thursday for Florida where they will stay during the summer months.

—Maurice Rosenheimer and Herbert Beisler were among the lucky ones who won prizes at the bowling tournament held at the Masonic Temple bowling alleys, during the month of April. Maurice won \$150 in the single events by rolling up a score of 591. In the double events, Messrs. Beisler and Rosenheimer won \$500 bowling a score of 1138.

—Sour Stomach, stuffed up bowels, pimples, headaches, foul breath, are evils of constipation. HOLLISTER'S ROCKY MOUNTAIN TEA regulates the bowels, purifies the stomach, and expels decay matter from the system. Nature's way to cleanse and purify your stomach, kidneys, liver. Satisfactory results will follow.—O. B. Graf, Kewaskum, Wis.—Advertisement.

—Anthony P. Schaeffer, station agent, received word this week, that all conductors on passenger trains operating between Milwaukee and Fond du Lac must keep count of the number of tickets sold between these stations daily, to ascertain the amount of tickets sold, if the amount is not sufficient to warrant running all passenger trains, some of them will be discontinued.

Why Not Start Today?

The Sooner You Start Your Savings Account Here the More Money You Will Have When You Need It!

Your bank book is all ready—just your name and the amount of the deposit are to be filled in. There will be no delay—no red tape—when you start a savings account here. It does not matter what amount you choose for your first deposit. The main thing is that you start to save today. Your deposited money will accumulate quickly. The peace of mind and happiness gained from the knowledge that you have a bank account will impel you to resolve never again to be without one. Our connections have made the banking facilities here exceptionally advantageous.

—Do not fail to attend the May ball at the Opera House tonight, Saturday.

—Clarence Hoffman of Milwaukee spent Sunday with the Henry Backus family.

—Walter Zacher of Milwaukee was a guest of the Fred Backhaus family, Sunday.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)

Rear View of New Tridyn Receiver—Simplicity of operation and construction makes this new Tridyn 3 R 3 the perfect receiver for all purposes. It will operate with any antenna and does not radiate when receiving broadcast signals. Four important radio principles are employed in this circuit, which gives signal strength equal to five tubes, but only three are necessary in the Tridyn.

The rapidly increasing popularity of tuned radio frequency in receiving sets is clearly indicative of its extreme efficiency. A prominent radio corporation has used tuned radio frequency for the past two years, notwithstanding the great amount of publicity already given to tuned radio frequency of the transformer type. It is gratifying to the president of the corporation to know that so many large and influential manufacturers are turning to tuned radio frequency in the design of their new receivers.

The newest addition to the line is the Tridyn 3 R 3, announced on the third anniversary of the corporation. The Tridyn, having passed through a thorough test from every angle, and after practical use by people in various parts of the United States, was deemed ready to distribute to the public. Laboratory tests are not always as practical as those given a receiver under the different circumstances encountered in actual operation and the reports received here on the excellent tests of the designers. A year has been given to perfecting this receiver.

Four important principles are accomplished in receiver design in the Tridyn: tuned radio frequency amplification with the first tube; Armstrong regenerative detector action with the second tube; reflex amplification by employing the first, or radio frequency tube as an audio amplifier and one stage of audio frequency with the third tube. These factors combined in the particular arrangement of this receiver give signal strength of a receiver utilizing five tubes.

The Tridyn will not radiate when receiving broadcasting stations' signals due to the fact that the antenna is very loosely coupled to the secondary circuit and a nonoscillating radio-frequency amplifier is employed before the regenerative detector, as a barrier to

prevent oscillations generated by the detector upon reaching the antenna. The primary or antenna circuit of this set is aperiodic or untuned, making it possible to calibrate the secondary circuit and the tuned radio frequency amplifier in terms of wave-length, thereby enabling the receiver to be accurately adjusted to the signals of any broadcasting station from a calibration table or curve sheet. This arrangement greatly simplifies tuning, making it possible for the operator after having once located a given broadcasting station, to again return to it by adjusting the two tuning dials at the numbers previously logged. This makes it the ideal receiver.

The set is very selective because it employs tuned radio frequency, loose-coupled antenna and a tuned secondary. It is possible to receive the distant stations despite local interference. For example, in Cincinnati it is possible to tune in KDKA which is only 17 meters higher in wave length than WLW, while the latter station is in operation.

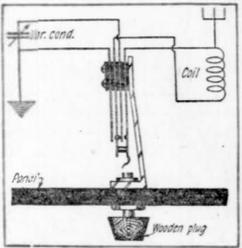

The operation of the Tridyn is very simple and will give excellent results with any type of antenna. It operates satisfactorily with a small indoor antenna, which provides loud-speaker volume, even on long distance stations and good results have been obtained without using any antenna, using only a ground connection. It requires a detector and two amplifier tubes of standard type and satisfactory results are obtained when dry cells are employed for lighting the filament, but the volume will be greater with 6-volt tubes. The amplifier circuit employs 90 volts of "B" battery, but will operate satisfactorily with 45 volts. A "C" battery may be employed if desired. The Tridyn is enclosed in a beautiful solid mahogany cabinet and a cabinet to match may be used for the dry cell batteries.

How to Build Your Own Series-Parallel Switch

By S. STARR WALBRIDGE

In constructing a honeycomb coil set, the diagram of which calls for a series-parallel switch to put the primary condenser in either series or parallel with the primary coil, a very neat job can be done by using a four-prong, two-closed-contact Jack. The Jack should be connected as shown in the accompanying diagram. The change from series to parallel is made by inserting a wooden plug where the phone plug would ordinarily go. If you have an old violin key, this may be cut off and will suit the purpose very well. Another method of making the plug is to cut a small spool in half, shape the cut end of one-half to suit yourself, and insert a short, round wire just the size of the hole in the spool. The plug may be enameled black.

This arrangement not only works well, but requires a very short time for installation, and takes up very

A Neat and Efficient Series-Parallel Switch Can Be Made by Employing a Jack of the Type Shown.

little panel room. Only one hole need be drilled in the panel instead of several as for the ordinary series-parallel switch, and the result is much neater in appearance.—Radio News.

Things to Know About Your Neutrodyne Set

A great many people who have purchased neutrodyne receivers find that they operate perfectly in one location while in another location the receiver has a tendency to oscillate on the lower and higher wave lengths. This condition is not the fault of the receiver and it can usually be traced to carelessness.

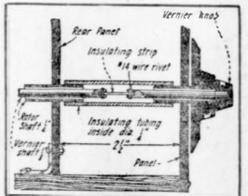

One thing that will frequently cause a perfectly balanced neutrodyne to oscillate is allowing feedback to take place between the aerial circuit and the last stage of radio frequency amplification. This feedback may be caused by allowing the aerial wire to come close to the last stage of radio frequency amplification or the battery wires, and, therefore, an attempt should always be made to have the aerial wire leave the set as directly as possible.

If improper tubes are used in the radio frequency stages of a neutrodyne, oscillations are apt to result. Most of the commercial neutrodyne

Body Capacity May Be Obviated by This Plan

By E. C. MAHONEY

It is well known that the general practice of shielding panels is not as efficient as it might be. While tinfoil or sheet metal eliminates the body capacity, it also has a tendency to ab-

If the Metallic Shafts of a Variable Condenser Are Insulated From the Knob and Dial by Small Strips of Insulating Material as Shown, Body Capacity Is Eliminated.

sorb energy from the apparatus which it is shielding.

I present herewith a novel and efficient method of eliminating this nuisance, as per sketch, which is practically self-explanatory. When mounting a variable condenser with a vernier, the connecting link between the two vernier shafts should be a flat piece of bone or any good insulating material, the same being fitted into the saw slit and a hole drilled with a No. 50 drill and a copper rivet inserted. The one-fourth inch shaft upon which the dial is mounted should be of hollow brass in which the smaller rod fits.

This method may also be applied to variocouplers; no rear panel is necessary with a variocoupler, as the average coupler on the market today is self-supporting.—Radio News.

On a long journey, an elephant can average eight miles an hour.

are adjusted for use with UV 201-A and C 301-A tubes and these are the only tubes that can be used successfully.

Mechanical Verniers Liked for DX Stuff

Vernier controls often spell success or failure in distance work. A 4-inch dial with a mechanical vernier applied to its rim is almost equal to a stage of radio frequency when you are after the distant signals. They enable tuning to the neck of the wave, which is where you find the DX stuff. A vernier condenser with a sliding plate, however, is not usually very satisfactory, as often the friction contact causes noises in the receiver.

Control Over Regeneration
Often, to conserve space, an inductance coil may be placed around a variable condenser. In a three-circuit set, a three-plate condenser across the terminals of the plate variometer will give excellent, and vernier, control over regeneration.

Alluring Dressy Frocks of Crepe; Hats of Many Kinds for Midsummer

APPARENTLY the more silk crepes are used the better they are liked—especially in afternoon and dinner gowns. Familiarity with the varied crepe weaves strengthens their position in the world of apparel where they are used for all sorts of garments. But it is in simple and alluring dressy frocks that women find the most satisfactory. Either in light or dark colors that are not as sensitive crepe gowns are the most adaptable of garments to be toned up

Afternoon and Dinner Gowns of Crepe.

or down, to suit them to many occasions, by accessories worn with them.

Fashion has been flirting with many variations of the straightline dress, indicating a return to wider skirts. Straight and spiral bouffants, tunics, plaits, tiers, godets and panels entice the designer who is working with crepe and who finds its suppleness an invitation to make experiments. All these appear in crepe dresses. Printed and plain crepes combined contribute another means for varying them and the fashionable scarfs lend to the crepe frock almost any character required.

The frock at the left of the two pictured is of plain crepe de chine with beaded panels and border about the

diversity in everything that goes to make up millinery. The group of five hats pictured reveals something of their latitude in shapes and materials and trimmings that has made it possible for individual taste to be suited. It begins with a moderately wide-brimmed and very graceful hat of georgette, with burnt goose fans for trimming. This shape is flattering to almost every one, and similar fans are made of certain grasses in various colors, so there is a considerable color range to choose from.

Below, at the left, a milan cloche is trimmed with a soft silk scarf run through rings of tubular braid and beads. The scarf is finished with a

Wide-Brimmed Hats for Midsummer.

body. Sometimes detachable sleeves of georgette to match are provided for these short-sleeved models to be basted in when wanted. The pretty twisted girle is made of crepe and ribbon. Plain crepe and striped silk are combined in the other frock, with the silk making the bodice and front panel, the three-quarter girle and narrow ruffle.

When Easter has come and gone the trade has recited its fascinating story of spring and early summer millinery. Nothing remains to be told but the last chapter wherein the trade is brought to a happy ending with midsummer's superlative hats. Many of these are already launched and on silk tassel. A wide-brimmed hat of hair braid has fine lingerie lace and embroidery to elaborate its round crown and a bunch of beautiful colored grapes on the brim.

At the lower left of the picture a pretty and late arrival has a crown entirely covered with small yellow flowers, a fan of black lace across the back and the brim is of black milan. Next it another hat of straw braid has a brim facing of georgette and the crown covered with rose leaves in different colors. A clou of silk is posed at the side.

JULIA BOTTOMLEY.
(© 1924, Western Newspaper Union.)

High Black Aigrette
One restaurant hat seen lately, confines itself to narrow lines, yet achieves a picture-hat effect. Of black shining straw, closely fitting the head, it rises in a point in front, and this height is emphasized by a very high black aigrette.

Novel Straw Flowers
Some of the sports frocks and blouses in woolen materials which one sees today have an attractive pattern

The KITCHEN CABINET

(© 1924, Western Newspaper Union.)

"A thing of beauty is a joy forever. Its loveliness increases; it will never Pass into nothingness; but, still will keep A bower quiet for us, and a sleep Full of sweet dreams, and health, and quiet breathing."

FOOD FOR THE FAMILY

A good warm-weather dish is the one which is prepared as follows:

Sauer Braten.
Take four pounds of beef, wipe it with a damp cloth and place in a large bowl sliced, allspice, pepper and a little celery root, with one cupful each of vinegar and water. Let stand twenty-four hours. Then remove the meat, wipe well and sear in hot fat. Cut the celery and onions into small pieces and add to the meat. Season with salt and pepper and add a little water. Bring to the boiling point and simmer for several hours until the meat is very tender. Remove the meat to a hot platter, cream a tablespoonful of butter with one of flour and add to the strained gravy. Cook until thick, adding four crumbled ginger snaps to give flavor and color. Serve with cauliflower or brussels sprouts as a vegetable.

Savory Potatoes.—Arrange a half-dozen potatoes in a shallow baking dish, add one-fourth cupful of water, six tablespoonfuls of olive oil, two onions minced, one teaspoonful of salt, a few dashes of pepper. Bake an hour or more, basting often until the potatoes are soft and brown.

Apples a la Manhattan.—Pare and core eight medium-sized apples. Cut pieces of sponge cake into squares an inch in thickness and the size of an apple. Sprinkle the cake rounds with sugar and set into the oven until the sugar melts. Make a sirup of a cupful each of sugar and water; cook the apples very slowly in the sirup. When tender, drain and put an apple on each piece of cake. Add half a glass of jelly to the sirup, cook until it is quite thick, then pour over the whole. Garnish with whipped cream and candied cherries.

Cream of Corn Soup.—Cook one-half of an onion finely minced in four tablespoonfuls of butter until brown. Add four tablespoonfuls of flour, two cupfuls of milk after the flour has been well blended, two teaspoonfuls of salt, one-fourth of a teaspoonful of pepper and one or two bouillon cubes—if they are very salt, add less salt. Cook until the mixture thickens and add one pint of sweet corn put through a colander. Let the whole boil up once and serve with croutons.

If a cream soup scorches slightly, add a teaspoonful of peanut butter after stirring it well in a dish of cold water. The peanut butter will disguise any unpleasant taste.

Tired nature's sweet restorer, balmy Sleep! He, like the world, his ready visit pays. Where Fortune smiles; the wretched he forsakes. Swift on his downy pinion flies from woe, And lights on lids unsoiled by a tear. —Yound.

LIGHT DESSERTS FOR WARM DAYS

A dessert is quite as acceptable on hot days as on cold, but one likes something cooling and easy of digestion. Gelatin lends itself nicely to such desserts.

Cherry Moss.—Soak one tablespoonful of granulated gelatin in one-quarter of a cupful of cold water; dissolve in one-quarter cupful of boiling water; add one and one-half cupfuls of stoned canned cherries, cut into halves, and one-half cupful of the juice. When the mixture begins to thicken add the whites of two eggs, beaten stiff. Mold and chill. Remove from the mold to a serving dish and garnish with whipped cream, sweetened and flavored with almond; sprinkle with blanched shredded and roasted almonds.

Coffee Sponge.—Soak two tablespoonfuls of granulated gelatin in one-fourth of a cupful of cold water and add two cupfuls of hot strong coffee, then add one cupful of sugar. Set into a pan of ice water and when it begins to thicken beat with an eggbeater until quite stiff. Add the whites of three eggs, beaten stiff, and continue beating until the mixture is stiff enough to hold its shape. Turn into a mold fluted into cold water and chill. Serve garnished with whipped cream when unmolded.

Lemon Crumb Pie.—Grate the rind and take the juice of a lemon. Mix two tablespoonfuls of butter with five tablespoonfuls of sugar. Stir the mixture into one and one-half cupfuls of hot milk and cool, add the yolks of three eggs well beaten, and the lemon juice and rind. Line a pie plate with an inch layer of buttered crumbs and pour in the mixture. Cover when baked firm with a meringue made from the whites of the eggs beaten stiff and three tablespoonfuls of sugar added. Brown and serve cold.

Had to Hurry
When Pola Negri first went to Los Angeles she was astonished by the way people hurried around. At a dinner given in her honor she could contain her curiosity no longer and, turning to a well-known business man sitting next to her, asked: "Why are you Americans always so nervous and so much in a hurry?" "You'd be in a hurry, too," laughed the American, "if you had to transact a whole day's business and were allowed to park only 45 minutes."

Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before.

Lapps Famed in Witchcraft

The Lapps at one time had a great reputation for witchcraft and it was said English seamen used to go to Lapland to "buy a wind" from the natives.

Something to Think About

By F. A. WALKER

RESPONSIBILITY

WITHIN the breasts of ambitious youths of both sexes there is a yearning for the day when they shall be in a position to assume responsibility, buckle on their armor and march at the head of their own regiment.

As they look out upon the vista of years confronting them, they dream of the worlds they shall conquer, and the honor which shall be theirs when their hair has caught some of the whiteness of snow.

It is good to peep into the future and venture a guess as to what it holds for brave hearts and willing hands.

Those who do this in honor to themselves and their employers have within them the essence of which noble manhood and womanhood are made.

So they keep pressing toward the dream-city, eager for conquest and anxious to accept responsibility.

What these ardent youths are doing now is well done. Each day there is visible improvement in their work.

It matters not that their friends are few, so long as they are true. With such friends they are comfortable and happy.

They read and think, discuss the leading questions of the day. In this manner they broaden their minds, sharpen their vision and strengthen their powers to reason.

They dwell in contentment with the noisy world all about them, obsessed with the one idea of some day bearing

responsibility and helping others to higher altitudes.

The erring, thoughtless and pleasure-loving have no such ideals.

They have chosen their place among the shirkers and are already marked by Time for the scrap-heap.

And the conclusion of this is that only those who are willing to play the leading role in life, take the jars and jolts as they come, smile complacently on difficulties, are capable of going forth to conquer, being conquerors at this hour without suspecting it.

(© by McClure Newspaper Syndicate.)

Has Anyone Laughed At You Because—

You are diplomatic? This stings! You are probably very polite and you hate to hurt people's feelings and for that reason you are called diplomatic, and people say "you know what side your bread is buttered on."

It hurts you, because you are naturally well bred and well trained. It is bitter to be turned down for a thing you are not.

You think you will try and be a bit brusque, but you cannot. It isn't your nature to be thoughtless. Diplomacy is a good trait when it is used as much for the comfort of others as for your own advancement.

Rejoice in it, there is too little of it.

Your get-away here is: You probably have more friends and more happiness than the tactless and so-called un-diplomatic.

Reflections of a Bachelor Girl

By HELEN ROWLAND

A MAN always lets somebody else do his worrying for him—but a woman doesn't need any help.

This is an age of self-made men, machine-made laws, home-made drinks and home-made beauties.

It isn't until after the smashup, that a man decides that it requires something besides brute force and determination to run a motorcar—or a wife.

It doesn't take so very much love to "make the world go 'round," if you have plenty of money to oil the axis.

"Leisure," to a married woman, is that sweet "pause in the day's occupation," when nobody around the house can think up anything else for her to do.

Yes, Millicent, the difference between the way in which a man tries to "persuade" you of something before marriage, and the way in which he will try to "convince" you of something after marriage, is as great as the difference between the way he talks to a toddler-top, and the way he talks to a bulky flivver.

Every man fondly hopes to find a woman who will "understand" him, and who, at the same time, knows nothing of the world and its wickedness.

A compliment from a husband would be as precious as pure radium, if he didn't always hand it to you wrapped in the cotton-battling of "good advice."

A man's love is not dead until he begins to think of his wife, merely as the person who disturbs his morning beauty-sleep, and his after-luncheon reveries.

30 DAYS' FREE TRIAL, 12 Months to Pay

Practically every farmer at one time or other has wanted to try a SHARPLES Cream Separator. Mr. Sharples has formulated a 30 Days' Free Trial Plan that will enable you to try the SHARPLES Allsteel Separator without any cost to you whatsoever—he even pays the transportation charges to your express office.

Sharples Allsteel Separator

Why not get the world's best while you are at it. The SHARPLES Allsteel Cream Separator is a Super-Separator. Turn it with one finger and skim over 600 lbs. of milk per hour. The whole frame and stand are of forged steel. Every part is constructed with the greatest skill. Have the wonderful Automatic Variable Feed at any speed. Send at once for details of the Free Trial on your farm.

The Sharples Separator Company, West Chester, Pa.

Origin of Schools in Scotland

Elementary schools were established in Scotland by the provisions of the elementary education act of 1872. Prior to that, however, education had been regulated by the Scottish parliament. As early as 1696 an act was passed for settling schools, providing for the maintenance of a school in every parish in connection with kirk.

Not Even Near It

"Of course," said the agent, "I can tell at a glance that you are the boss in your home."

"Better look again," returned the prospect, sourly. "There's a wife, a baby and a collie pup between me and the throne at my house."—Kansas City Star.

Mutual Hope

Wife—George, I hope I didn't see you smiling at that girl.

Hubby—I hope you didn't my dear.

NO TROUBLE WHEN BABY CAME

Mrs. Crossan Gives Credit to Lydia E. Pinkham's Vegetable Compound

Mrs. Dakan Also Tells What This Medicine Does

St. Joseph, Missouri.—"I heard so much about Lydia E. Pinkham's Vegetable Compound that I decided to try it as I had had such a hard time with my first child. I took nine bottles of Lydia E. Pinkham's Vegetable Compound and I never felt better in my life than the day my baby girl was born. I will be glad to tell what it will do to any woman who will let me know her address."—Mrs. ROSA DAKAN, 2227 S. 11th St., St. Joseph, Missouri.

I was sick over a year, then a friend told me about Lydia E. Pinkham's Vegetable Compound and I started to pick up as soon as I began taking it. Then I took it again before my first baby was born and I never had a bit of trouble. I recommend it highly."—Mrs. JANE CROSSAN, 612 Fine St., Wilmington, Delaware.

Back To Normal Health

New Orleans, Louisiana.—"I took Lydia E. Pinkham's Vegetable Compound while I was carrying my child and I must praise it highly because I never suffered one day during that time and could do all my housework and had a very easy confinement. I am still taking the Vegetable Compound because I have a weakness due to working around the house too soon after my baby was born. But thanks again to the Vegetable Compound I am getting back to normal health once more. I advise any woman to take it."—Mrs. A. MEYN, Jr., 2019 Touro St., New Orleans, Louisiana.

Consider the statements of these women. They give you the benefit of their actual experience with the Vegetable Compound.

A nation-wide canvass of women purchasers of the Vegetable Compound reports that 98 out of every 100 have been benefited by its use.

This is a remarkable record and proves the dependability of the medicine for the relief of the troubles women often have.

Not A Bit of Trouble

Wilmington, Delaware.—"I was nervous and weak and not at all regular. I worked in a factory at the time and could not work very much.

The Vegetable Compound contains no harmful drugs or narcotics and can be taken in safety by the nursing mother. For sale by druggists everywhere.

For weak and run-down conditions so common after child-birth it is well adapted. It strengthens and tones up the system and restores normal health.

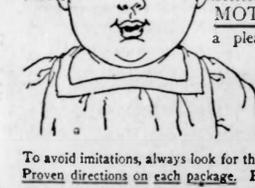

Lot to Contend With

Mr. GANGES—"Do you remember the woman in the Bible who was turned into a pillar of salt?" Mrs. GANGES—"Yes, and I also remember that she had a lot to contend with."

Count Dust Particles

A count of the dust particles found in air at the top of Washington monument has been made by the United States weather bureau every day for the last year.

Children Cry for Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, prepared for Infants and Children all ages.

Disordered Stomach

Take a good dose of Carter's Little Liver Pills—then take 2 or 3 for a few nights after. You will relish your meals without fear of trouble to follow. Millions of all ages take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Blotchy Skin. They end the misery of Constipation.

ENOUGH

By DOUGLAS MALLOCH

THERE'S a fellow higher up, and a fellow lower down. Some have silver when they sup. There are others on the town.

Between the two, Not up nor down, Are I and you.

There's a fellow who has more, There's a fellow who has less; Looking other people o'er We're just average, I guess.

Not rich nor poor Is what I mean But somewhere else Just in between.

There's a fellow with the gout, There's a fellow minus shoes. When I have to move about Neither fortune I would choose.

For you and I Are satisfied, Prepared to walk Or glad to ride.

There's a weary millionaire, There's a man without a cent. In between the two somewhere We are mighty content.

We haven't such A lot of stuff, Yet, thank the Lord, We have enough.

(© by McClure Newspaper Syndicate.)

SCHOOL DAYS

Mother's Cook Book

Entire candor and honesty regarding ourselves, instead of being the first of the last and highest attainments of a perfectly fashioned character. But though this is true, it is also the beginning of all well-doing; without some measure of it, even though weak and unsteady, no good thing can begin.—J. C. Shairp.

THINGS FOR THE FAMILY

Put into a punch bowl a cupful of granulated sugar and the juice of six lemons. Put in three peeled and sliced lemons and leave on ice until ready to serve. Add a dozen sprays of green mint and a quart of cracked ice. Stir well and pour into it three bottles of ginger ale. Serve at once.

Orange Cake

Take two cupfuls of sugar, one-half cupful of shortening, one teaspoonful of salt, one-half cupful of milk, one-half cupful of orange juice, four cupfuls of flour, five eggs and four teaspoonfuls of baking powder. Mix and bake in layers and use the following for the filling:

Cook all together—one-half cupful of sugar, two-thirds cupful of water, two tablespoonfuls each of butter and corn starch, one-third of a cupful of orange juice and a teaspoonful of lemon juice. When smooth and well cooked pour over a well-beaten egg. Beat until cool.

Savory Potatoes. Arrange eight medium-sized potatoes in a shallow baking dish, after peeling them. Add one-fourth cupful of water, six tablespoonfuls of olive oil, two onions minced, one tablespoon-

ful of powdered sage, one teaspoonful of salt and a few dashes of pepper. Bake an hour until the potatoes are brown and soft.

Men You May Marry

By E. R. PEYSER

Has a man like this proposed to you?

Symptoms: Mysterious. You never know whether he will show up for a date or not. You never feel certain of him. You can't make out just what his business is. When you do he keeps mum about it. He is only shy when he is talked of—quite different with others. He walks stiffly in one piece—has sort of a stare eye, seems to be looking in at Asia. He likes you he says—'cause you don't bother him with 1,001 foolish questions.

IN FACT He is the question mark of your life's sentence.

Prescription for bride-to-be: Forget the question mark. Read mystery tales, get your questions satisfied there.

ABSORB THIS: To have is not to behold.
(© by McClure Newspaper Syndicate.)

The Young Lady Across the Way

The young lady across the way says the man in charge of the filling station seems to be a very nice young fellow, and she feels sure every gallon of gasoline she gets when he is on duty contains the full two quarts.

(© by McClure Newspaper Syndicate.)

Cleveland News Mr. Votet—You're an undisciplined citizen. You didn't vote the last election day. Citizen—Yes, I did. In fact, I voted three times.

A WORLD-FAMOUS SIX AT \$1045!

Scientifically balanced, holds the road at all speeds. All-steel body. One-piece windshield. Luxurious, genuine leather cushions. 10 inches deep. Cool lights. Standard non-skid cord tires.

We'll lend you a car

to compare with other cars at near its price

THIS is an offer to anyone who is considering the purchase of a car in the \$1000 field.

We invite you to take out a Studebaker Light-Six model for the sake of comparing it with other cars at near its price. This without obligation to buy.

Every maker advances claims for his car. Some are fair, some superlative; some are borne out by facts, others not.

You've been told this car, that car or another is "just as good" as this famous Studebaker model. Now find out for yourself. That's the only way to buy lasting satisfaction.

When you try this Studebaker Light-Six, you will find an engine of remarkable power

and flexibility—an L-head engine designed and built by Studebaker; noted for its quiet and smooth operation; free from vibration because its crankshaft and connecting rods are machined on all surfaces, an exclusive Studebaker feature on cars at this price.

You will find surprising ease of handling, unusual comfort, roominess, obvious refinements and all the visible signs of a quality car. You will find low price its only contrasting feature.

Remember, Studebaker is the world's largest quality car builder and thus is in position to give you the utmost for the least.

Buy no car at \$500 or more without making this test. Don't buy blindfolded.
