ner and supper were served cover were laid for over thirty guests.

"Plymouth" Feed Cutters are the result of twenty-five years' experience and practical study of conditions and needs in the farm and dairy field. They embrace every advantage known to other similiar machines, and many vital features which are original with us and can be had only in the "Plymouth Self-Feed." Below are some mighty strong points for you to think about before you buy a feed cutter.

Automatic Self-Feed-This feature consists of a traveling feed chain, made of heavy iron slats securely rivited to a chain which passes over the lower feed roller. Throw the fodder into the feed box and the "Plymouth" does the rest. Danger-Proof Self-Feed Rollers-Here's another strong feature original with the "Plymouth." It consists of four large rollers of cast iron. The traveling feed chain passes over the lower hind roller, just passing the lower front roller, which is six inches in diameter, and smooth. The two upper and lower hind rollers are ribbed. The 8-inch automatic roller at the top, to the rear, is a special feature of the "Plymouth." It acts as a lever or weight to keep the fodder passing through continuously, depending on its own gravity to keep the material going through without a hitch. Two coil springs serve to exert an even and steady pressure on the automatic roller as the volume of fodder increases in going through. The spring feature is entirely automatic, and is only to be had in the "Plymouth." It absolutely prevents clogging.

Jewelry for all occasions

When a lady "dresses up," the last and most effective part of hercostume is aer jewelry. Has your wife, mother, sister or sweetheart the jewelry she needs to set off hir costume? Come in and let us show you what she needs. The cost is moderate and the great joy you will give will well repay you for the money you spend. After all-there is nothing in all the world so helpful to one as giving joy to others.

#### Martial Law in Teheran Due to Murder of U.S. Vice Consul.

Teheran .--- Teheran and its suburbs were put under martial law until such a time as the political situation becomes normal again. Agitators against law and order will meet capital punishment. The papers which have been inciting the movement against the government will be suppressed and no public meetings will be permitted.

One paper says the government should have come to this decision sooner and saved Persia from sname due to the murder of Maj. Robert Imbrie, United States vice consul, by a mob of anti-foreign fanatics. The nature of the crime is very rare in Persian history. A similar crime, committed more than a century ago, prac tically enslaved Persia to Russia.

The editor of another paper regards the crime of the mob as an act which will strengthen the government's hands in putting down priestcraft, with its humbug miracles. Persia, he says, will never forget Maj. Robert Imbrie and the work he unknowingly at the University of California. did for the future good of the coun-

Evidence revealed shows that the U. S. GOVERNMENT two Americans were accused by leaders of the mob of having poisoned the Sacred Fountain," causing the death of some women and chilliren. A special man was put to work to propagate this lie, and it was he who, while running after the carriage in which the Americans were escaping, told the the Americans were escaping, told the shopkeepers this lie and called them for to wreak vengeance. shopkeepers this lie and called them shopkeepers the s out to wreak vengeance.

customers, plus an amount equivalent

to what the freight charge from Pittsburgh to the customers' destination if such products were actually shipped from Pittsburgh.

Under that system the steel corporation pays the actual freight charges on the products from their mills where the products are manubut customers pay the freight from Pittsburgh.

Findings of Commission,

As to the system the commission finds:

It is contrary to the public interest. It is not based on the laws of supply and demand.

It is a price-fixing scheme.

It substantially lessens and eliminates competition.

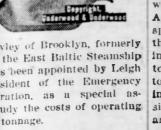

It is price discrimination not made in good faith to meet competition. It is an unfair method of competition.

It adds unnecessary millions of dollars annually to the cost of steel products and specifically adds \$30,000,-000 to the cost of steel products paid by farmers in eleven western states. It increases prices.

"According to present plans," th air service said. "the flight should leave Kirkwall, Orkney islands, for Hofn Hornafjord. Iceland, on Aug. 1. The planes should arrive at Labrador about Aug. 10 and Boston about Aug. 16. This schedule, of course is subject to delay, but, on the other hand, may be bettered."

Kenosha Youth Shoots Father When Scolded

Kenosha, Wis ..- Commanded to go to bed, William Marshall, 20 years old. shot his father with a shotgun here, inflicting wounds which may result in death, according to the police.

Young Marshall was arrested, and the father, James Marshall, 45 years old, was rushed to the Kenosha hospital.

The shooting was the climax of a series of family quarrels, police were told.

At the police station, the youth said his father had accused him of being drunk and had threatened to beat his mother.

Mr. Marshall was shot in the left leg above the knee. At the Kenosha hospital, physicians restored to transfusion of blood in an effort to save his life. Amputation of the leg above the knee will be necessary.

their families and their soil; there is no doubt about that. They have been told it for many years by politicians and writers, and now they have demonstrated it.

The proof comes through recent awards by an organization of the city of Quebec, which has discovered onfamily that has been on the same land since 1029, and it is believed still occupies the original house. An Island of Orleans habitant has 210 living descendants.

Louis Hebert, the first Canadian settler, came in 1617, and bls son-in-law, Guillaume Couillard, was first to use a plow in this country in 1628.

The family which has remained on the same land for the greatest length of time in Quebec county is that of Ismael Bedard of Charlesbourg. It has been there since 1629, and still occupies the original house.

#### Musical Jealousy

"Musicians are sensitive and sometimes also envious. An eminent violinist and an eminent pianist sat together in a box during one of Helfetz's violin recitals. When the vociferous applause, which greeted the end of a magnificent display of technique, re-
