NUMBER 1

TWO NEWBURG BOYS KILLED

While on their way to Fredonia to attend a dance, last week Wednesday evening, Albin Koenig, aged 17, and Herman Casper, aged 16, were instantly killed, when the light Ford runabout truck, in which the two young men in company with Wm. Brott, Wm. Jahne and Edward Michaels, aged 16, left the road and crashed into a tree. The latter three escaped with slight injuries. The accident occurred between Waubesa and Fredonia, about three miles east of the county line on Highway 84. The road where the accident happened makes a sharp turn, and the truck going at a high rate of speed, was unable to make the turn, ran off the road, struck a tree, with terrific speed and three Koenig and Casper out of the body of the truck. Both suffered broken necks and fractured skulls, and death was instant. It is reported that the driver is directly to blame for the accident, due to his driving the machine at a very high rate of speed, that caused him to lose control in trying to turn the corner. When the truck left the road, it struck loose gravel and sand and headed for the tree. Casper was found near the tree, and Koenig was thrown about 25 feet over a fence into a pasture. Brott was also thrown over the fence, and was slightly bruised. Jahne was thrown through the fence and suffered broken ribs and an injured back. Michaels, the driver, was only slightly bruised. Sheriff Delles and Coroner Horn of Ozaukee county were notified. A jury was impaneled and the case turned over to the district attorney for further investigation. The inquest was held on Thursday.

Herman Casper, who was a son of Mr. and Mrs. Anton Casper, residing near Newburg, was born August 5, 1907, at Newburg. Besides his parents, he is survived by two brothers, Frank at home and Alex of Milwaukee; three sisters, Edna, Hilaria (Mrs. Bell) and Henrietta of Milwaukee. The funeral was held Saturday morning with services in the Holy Trinity church, Newburg. Rev. Bertram officiated.

Albin Koenig, was a son of Mr. and Mrs. Albin Koenig Sr., of Newburg. He was born May 7, 1907, in said village. He leaves to mourn besides his parents, one brother Ralph and one sister Alice at home. The funeral was held Sunday afternoon at 1:30 o'clock from the family home, to the Union cemetery, Newburg. Rev. H. Erber officiated.

FIRE DESTROYS FARM HOME

Fire which is believed to have originated from a defective chimney, completely destroyed the home on the farm formerly owned by Fred Schultz in the town of Farmington, last Saturday afternoon at about three o'clock. Ed Hagner, a neighbor, who was at work on his farm west of the Schultz farm, noticed smoke issuing from the roof of the building. He went to the road, where he picked up a ride with Joseph Remmel, butcher of Barton, and together they notified the neighbors, with whom they gave assistance in an effort to extinguish the fire. Through the good work of the neighbors all of the furniture except the contents of two closets was saved. The building was modernly equipped, having running water and electric lighting system. The loss is estimated at \$7,000, which is only partly covered by insurance. The home was occupied by Hans Markert and family who have resided there since last May, and who are now making their temporary home with the Hagner family. The farm is in charge of Jas. B. Duy of Hartford. The home will be rebuilt this fall.

WASHINGTON CO. HOLSTEIN WIN HONORS IN SHOW RING

This fall, for the first time, the Washington County Holstein Friesian association assembled some of our good Holsteins and exhibited them at the State Fair. True to predictions, our Holsteins proved to be winners in the show ring, as well as producers in our cow testing association.

The Holstein show at the State Fair this year proved to be the largest in number of any show ever held, there being 526 Holsteins entered for exhibition.

Jos. Piek's Bull, Johanna Ragapple Pabst 346065 was the star attraction of the show after Ward Stevens, the Holstein judge awarded him the ribbons as senior Champion bull and grand champion bull.

In the class of bulls 3 years old under 4 there were 20 entries. Jos. Piek's bull won 1st., and H. Lapein's 8th.

In the senior yearling bull class there were 21 entries. Ernst Schultze's entry won 12th place.

In the junior bull calf class Herb Lapein's entry won 8th place in a class of 54.

Wm. Grubler's entry in the junior bull class won 15th in a class of 34.

In the aged cow class Wm. Jaehning's cow won 7th in a class of 46 and in the 2 year old class Herb Lapein's entry won 7th in a class of 43.

Herb Lapein had 3 entries in the junior yearling heifer class and he surely may be proud of these entries for in a class of 36 head his 3 entries won 2nd, 4th, and 6th.

In the junior heifer calf class a heifer owned by C. A. Schroeder & Son won 3rd place in class of 52.

Herb Lapein was again successful in the group entries he winning 2nd place on breeders young herd, 4th place on calf herd, and 4th place in get of sire.

Fifteen counties had county show herds, and again Washington County was near the top, when Ward Stevens awarded our group 4th place.

The exhibiting of our cattle at the fair surely brought immediate results in bringing cattle buyers to Washington County. On Wednesday evening H. Sexton from Indiana came to West Bend from the fair and on Thursday and Friday purchased 19 head of cattle, 6 pure bred and 13 grades that will be shipped Tuesday.

On Saturday Mr. Thomas and Mr. Johannsen from Iowa came out from the fair and are now purchasing a load of cattle.

HORICON POLICE CHIEF IS APPOINTED GAME WARDEN

William Reabe, chief of police in Horicon for the last five years and assistant chief during the four years previous to that service, was appointed resident game warden for Dodge county. He started his new duties last Tuesday. Dodge county has been without a game warden since 1921 when Warden George Hall was elected sheriff and had to resign his state office. District Attorney George Hartman of Juneau, realizing the urgent need for a county officer to protect game and fish, used his influence in securing the appointment of Mr. Reabe. The new warden has been a hunter and fisherman all his life and is therefore familiar with the conditions under which he will have to work. His duties as police chief in Horicon have also fitted him for the position because he is well acquainted with the county.—Hartford Press.

EVANGELICAL PEACE CHURCH

There will be neither Sunday school nor services in the Evangelical Peace church next Sunday, Sept. 7th. The pastor is absent participating at a mission feast in the Evang. Peace church at Jackson.

H. L. Barth, Pastor.

THE BEST OF FRIENDS MUST PART

CARRUTHERS PAYS HEAVY PENALTY

James Carruthers, formerly owner and manager of the Long Lake Resort but now located at Fox Lake where he is owner and manager of a resort, paid a penalty amounting to \$1340.00 as the result of an accident which befell one of his employees. The Fox Lake Representative gives the following narrative on the case.

"The case of James Donovan vs. Jas. Carruthers was settled last week in full and it cost Mr. Carruthers \$1340. It was a very peculiar case and unfortunate in more ways than one. Donovan was working for Mr. Carruthers at the Fox Lake Hotel. In attempting to nail up a sign Mr. Donovan fell out of a tree and broke his leg. The break proved to be a bad one and refused to mend and Jimmie spent several months in the Beaver Dam hospital, where hospital and doctor bills mounted to a tremendous degree. The accident disclosed the fact that Mr. Carruthers, as proprietor of the Fox Lake Hotel, had failed to take out compensation insurance on his employees, provided by law. A hearing was held before the state board and the outcome is that Mr. Carruthers is forced to stand the expenses to the amount of \$1340, which is certainly a tough break and the whole deal has been an unfortunate one for both gentlemen interested. Mr. Donovan has had a hard pull and his leg is still of little use to him and the accident has been a seemingly needless expense to Mr. Carruthers."

GERMAN-KLEINHANS NUPTIAL

A wedding of considerable interest was solemnized at Holy Hill on Wednesday morning, when Rev. J. R. Reichel of St. Kilian, united in bonds of matrimony Miss Elizabeth German, daughter of the late Mr. and Mrs. Paul German of Theresa and Paul J. Kleinhans at 9 a. m. The couple were attended by Mr. and Mrs. Adolph Leichte of Mayville. Only near relatives of the contracting parties were in attendance. The newlyweds left the same day for a short wedding trip. The groom, who is a son of Mrs. Regina Kleinhans of Elmore, is at present employed as cheesemaker at the St. Kilian cheese factory. Mr. and Mrs. Kleinhans have the well wishes of their many friends for a happy and prosperous married life.

AUTO RACES AT WEST BEND SUNDAY

Wisconsin's champion dirt track drivers will be at the fair grounds at West Bend, Sunday, September 7th, for a real treat to auto fans. The West Bend track will be given special attention to bring it in as good a shape as possible. Stanley Nowicki, undisputed state champion, both half and mile tracks; Russell Truelli, who made a clean sweep of events at Cedarburg August 24; Carl Marchese, a coming champion, who promises to hit the high spots some day; Francis Reinke of West Bend, runner-up in the races this year at Cedarburg; a real hard luck driver, usually developing trouble when he has the race practically won; Hub Lohr, Hartford's speed demon; Artie Brack, Milwaukee's favorite and several other good drivers will start.

HIGH SCHOOL COURSE OF STUDY

Final arrangements have been made to get the work of the year under way as smoothly as possible when the schools open here Monday, September 8th. The course of study as outlined by Principal C. W. Nodolf is as follows:

FIRST YEAR		Second Semester	
English I	Algebra I	English I	Algebra I
General Science	General Science	General Science	General Science
General Agriculture	General Agriculture	General Agriculture	General Agriculture
SECOND YEAR		Required	
English II	Citizenship	English II	Citizenship
Biology and Physiology	Biology	Biology	Biology
Commercial Arithmetic	Bookkeeping	Commercial Arithmetic	Bookkeeping
Ancient History	Medieval History	Ancient History	Medieval History
THIRD YEAR		Required	
English III	Geometry	English III	Geometry
Modern History	Modern History	Modern History	Modern History
General Geography	General Geography	General Geography	General Geography
FOURTH YEAR		Required	
English IV	American History	English IV	American History
Physics	Physics	Physics	Physics
Economics	Social Problems	Economics	Social Problems
German II	German II	German II	German II
Advanced Algebra	Solid Geometry	Advanced Algebra	Solid Geometry

LEADING MAN WAR HERO IN SPLENDID FILM ROLE

John Bowers enacts the role of hero opposite Madge Bellamy in the Palmer Corporation's all-star production, "The White Sin," which is presented at the Opera House tomorrow, Sunday evening. Big, manly, handsome, and magnetic in screen personality, his role of a partial cripple and war hero presents him in his many "fascinating" features in a new way, but a peculiarly fitting way, inasmuch as it gives him new acting possibilities and a chance for putting the real-life John Bowers on the screen. The facts are that in real life, Bowers is a world-war hero also. He has never capitalized the fact in motion picture advertising, and only the similarity of certain parts of Harold Shumate's powerful direct screen story with parts of his own experience brought some of the facts to light. It is a well-known fact that Mr. Bowers has an equal following among men, in contrast to the "sheik" type of matinee idol, beloved of women but seldom admired by men. His role in "The White Sin," however, is certain to win him many new friends, for this splendid photoplay brings out to the fullest his ability as an actor.

LONG LAKE HOTEL HAS FIRE

Fire which had its origin in the roof of the Czemitz resort hotel at Long Lake Sunday, threatened to destroy the building, and if it had not been gotten under control would have wiped out other buildings close by. Prompt action of neighbors who saved the building. The loss is estimated at between \$500 and \$1000.

ASHFORD SALOON KEEPER ARRESTED

Frank Sell, proprietor of a soft drink parlor and dance hall at Ashford, was arrested last Wednesday by Sheriff Schlaak of Fond du Lac, on a charge of illegal possession and sale of intoxicating liquor. Three gallons of liquor were found in the place. The arrest is the outcome of a large number of complaints received at the sheriff's office concerning drunkenness at the Ashford dances. After making a search of the premises the officer, together with deputy sheriff Elmer Becker found a two gallon jug of watered kimmel, and a one-gallon jug of "moonshine" behind the bar. The "moon" tested 80 proof and 40 per cent alcohol. Mr. Sell, together with his two bartenders, Max Wistner and Ed. Emmmer will be prosecuted.

Local Overflow

—Miss Helen Bruesewitz, left Friday for several days' visit with her parents at Marshfield.

—Mr. and Mrs. Fancher Colvin motored to New London where they visited from Saturday to Monday.

—Mr. and Mrs. Herman Meiland and family of Milwaukee spent Sunday with relatives here and at Boltonville.

—Tony Meyer and family of Milwaukee spent from Saturday to Monday as guests of Mr. and Mrs. Frank Van Epps.

—Mr. and Mrs. Joe Schield and family of Nielsville arrived here Wednesday for an extended visit with relatives and friends.

—Mr. and Mrs. Heftin of Lomira, Helen and Elsie Goergens of Forest Park, Ill., visited with Mr. and Mrs. Frank Van Epps Sunday.

—Mrs. Raynor, two sons, daughters Helen and Beatrice and Miss Marie Gonner of Milwaukee spent Monday with Mr. and Mrs. Frank Van Epps.

—Mrs. M. A. Wittman and son Sylvester and daughter Marie and Rev. Wittman of Byron spent Thursday with Mr. and Mrs. Hubert Thurman and family.

—Dr. and Mrs. G. A. Landman and family of Scotland, South Dakota left Saturday for their home, after spending several weeks with relatives here and at Cedar Lake.

—Mr. and Mrs. Alfred Windorf and family of Joliet, Mr. and Mrs. Herman Windorf of Shawano spent the week-end with Mr. and Mrs. Wm. Windorf and family.

—N. W. Rosenheimer visited from Saturday until Monday with relatives at Antigo. He was accompanied here by his family, who spent a two weeks' vacation there.

—Mr. and Mrs. Alb. Schaefer of Milwaukee spent Sunday with Mrs. Elizabeth Schaefer. Their daughter Elaine and Mrs. Laura Schaefer returned home with them.

—S. N. Casper and family were at Newburg last Saturday where they attended the funeral of Herman Casper, who was killed in an auto accident last week Wednesday evening.

—Mrs. John Hau and daughter Viola of Chicago and Miss Clara Schaefer and Herbert Winner of Milwaukee were guests of the Misses Ida and Christina Fellerz Monday.

—The Bridge Club met at the home of Mrs. Otto E. Lay Thursday evening. First honors were awarded to Mrs. Karl Hausmann. Dainty refreshments were served after the game.

—Mr. and Mrs. Elwyn Romaine and family and Mr. and Mrs. Geo. Romaine of New Prospect visited from Saturday until Tuesday with Dr. and Mrs. Reuben Frohman and family at Burnamwood.

—Miss Gertrude Petri of Campbellsport spent Monday with Mr. and Mrs. L. P. Rosenheimer and family. She was accompanied home by Ruth Rosenheimer, who spent the forepart of the week there.

—Barney Tachjain and family and Mrs. Julia Deltgen of Chicago, Mrs. George Parker, Miss Evelyn Ruster of Highland Park, Ill., Dr. A. Backus and family of Cedarburg visited with Mr. and Mrs. Wm. F. Backus Sunday.

—Dr. L. A. Kliese, wife and two sons of Milwaukee visited with Mr. and Mrs. Frank Van Epps Sunday. They were accompanied home by the former's mother, Mrs. Johanna Kliese, a sister of Mrs. Van Epps, who spent several weeks visiting here.

—Anthony P. Schaeffer, Station Agent, had the misfortune of splitting a bone in the ankle of his right leg on Thursday afternoon. Tony was helping in loading freight onto an auto to truck, when in some manner he slipped and a heavy iron truck struck his leg, causing the injury. He was taken to the office of Dr. N. E. Haasman, where the injured member was attended to. Though Tony has the right foot in a cast he is able to walk around on crutches.

FACTORY FIRES

What do factory fires mean to the city, the owners and the workmen?

In 1920 Sheboygan had two factory fires with a loss of approximately three million dollars. This gave to the city the unenviable reputation of having the largest per capita fire loss of any city in the country. The following year Milwaukee had a factory fire with a loss of about one and one-half million dollars, and so a relatively large per capita loss. In 1922 and 1923 Oshkosh and Eau Claire had large fires, unduly raising their per capita loss.

Fortunately these fires were not accompanied by loss of life; but the probability of a factory holocaust is always there. Let us not forget the Triangle shirt waist factory fire and its 142 victims.

The factory owner loses valuable customers, his trained employees, often books, drawings and models hard to replace, and for the workmen a fire spells unemployment and loss of wage.

With the certainty of unduly large losses in factory fires, and the ever-present probability of a holocaust, this class of buildings should have the special attention of the owners and the municipal building and fire departments.

Factories must not be "built to burn". Fire-resisting building materials should be used in their construction, large floor areas subdivided by standard firewalls, as far as the operations will permit, standard fire doors installed, vertical openings closed up, the exposure hazard reduced to the minimum by the use of standard fire doors and windows, dangerous manufacturing processes isolated, explosives, inflammables and combustibles properly stored, good clean housekeeping maintained, and proper fire protection provided.

Most of these recommendations apply to old buildings of the factory class as well as to new.

Even a fireproof factory is never panic proof and ample, safe and unobstructed exits must be provided.

Daily cleaning-up, standard metal waste cans for oily waste, ventilated metal lockers for oily clothing, oil drip pans and cups where needed, fireproof rubbish bins, metal ash receptacles, dust exhaust systems, separate storage of oils, paints, chemicals, fuels and other things which may cause fires, should be insisted upon, and "no smoking" rules strictly enforced.

Water barrel and pails, the proper chemical fire extinguishers, interior standpipes and hose, well distributed yard hydrants and a trained fire brigade with proper equipment should be provided. The best and cheapest protection is the automatic sprinkler.

The building department, the fire department, the private factory inspector and the owners must cooperate to bring about needed changes and safer conditions. Let us have a unit, "drive" for factory safety. It means the saving of precious lives and valuable property.

Naturally So.
In any family there is usually the most admiration for the one who quietly and unobtrusively does the most.

INFECTION TAKES BUSINESS MAN

Sunday night, August 31, 1924, at 11 o'clock occurred the sudden death of Albert S. Schwandt, a well known and prominent business man of Campbellsport. Mr. Schwandt had been suffering from a boil on his face, and was getting along nicely, until infection set in, which later caused his death. Everything possible was done to save his life, but his condition was such that all medical aid proved of no avail. Deceased was born in the village of Rosendale on February 28, 1884, and graduated from the Rosendale high school, later taking a course in commercial and business work at the Berlin Business college. He later became interested in the Rosendale state bank and with the Cole Savings Bank of Fond du Lac, and later became cashier of the State Bank of Campbellsport. In 1909 he purchased the hardware store of Wm. Wedde at Campbellsport, in which business he has since been successfully engaged. On July 14, 1900 he was married to Mrs. Olga Kliese. He leaves to mourn his early death, his wife and three children, George Kliese, Louis Schwandt and Dorothea Schwandt. Besides these he leaves his parents, Mr. and Mrs. A. F. Schwandt of Rosendale, two sisters, Mrs. Dora Giffey of Rosendale and Clara Schwandt of La Crosse and a brother Arthur of Rosendale. Mr. Schwandt was a prominent man in Campbellsport, he acted in the capacity of village trustee for six years; clerk of the No. 2 Union school district for two years. He was a member of the Campbellsport Fire Department and a member of the choir of the Reformed church. The funeral was held on Wednesday afternoon with services in the Reformed church. Rev. Wm. Zenk officiated. Burial was made in the Union cemetery.

RADIO

By W. M. HENDERSON

Every radio fan is well acquainted with the efficiency of the three-electrode vacuum tube. It is also generally known that the disadvantages of the present-day tube are the fragility of the filament and the uncertainty of the vacuum. These two disadvantages have caused many radio inventors to attempt the design of some form of rectifying and amplifying apparatus to take the place of the present tube. The results obtained through tireless research and design have done much to further dependable radio transmission and reception. One of the most interesting of these developments is the use of colloid liquids to replace the vacuum and filament in a tube.

Though this form of rectifier and amplifier is not developed to an efficient stage, and though it may never be a simple description of how a colloid solution acts as a radio device will be given to acquaint radio fans with a working knowledge of a colloid tube, so they may experiment with it if they so desire.

The heart and substance of this tube is a colloid. Those who have studied chemistry know that a colloid is a compound which, when placed in a liquid, absorbs that liquid, similar to a sponge, and the particles of the colloid are held in suspension by the liquid. When the liquid is driven off from the colloid by evaporation one of two things will occur—either the colloid will become a hard, solid mass incapable of reabsorbing a liquid, or will become a solid again capable of reabsorbing a liquid.

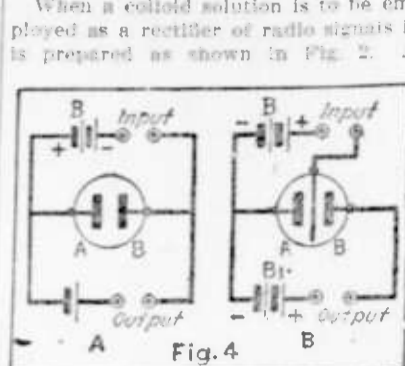

Glass U Tube Apparatus for Making the Test.

Colloids of the former class are called irreversible, and when solidified after once absorbing a liquid are in a coagulated state. Colloids of the latter class are called reversible. If a colloid solution be examined under a powerful and sensitive microscope it will be noticed that there is a constant movement of the particles in the liquid. This movement is given two explanations. One is that each particle of the colloid has a charge of electricity and each particle is charged at the time polarity. The second theory is that the liquid molecules are constantly striking the colloid particles. The impact between the molecules and particles gives the noticed particle movement.

How Test Can Be Made. No matter which may be the real cause of this movement, and either may be wrong, still it is conceded that it is this particle movement which gives a colloid solution its rectifying and amplifying properties. A test of this can be made by using the apparatus shown in Fig. 1. A glass U tube, a colloid, distilled water and two platinum or aluminum electrodes are necessary. These colloids may be prepared in most drug supply houses.

With the apparatus mounted as shown in the diagram and a source of high potential current connected to the correct leads a concentration of particles around one electrode will be easily discernible by the increased coloration around that electrode.

When a colloid solution is to be employed as a rectifier of radio signals it is prepared as shown in Fig. 2. A glass jar, two electrodes and a colloid solution are necessary. Electrode B has four times the surface of A. This rectifier can be connected in a radio receiving set in place of a crystal detector. The signals from nearby stations will be received with greater volume than with an ordinary crystal. CW can also be received on this detector without the aid of an external heterodyne or a tapper. The best results of the depth of A must be varied.

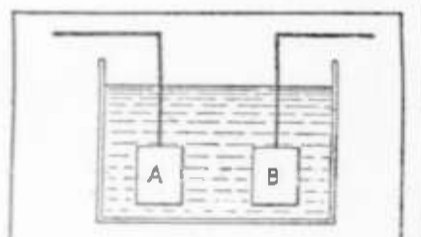

The Action is Different for Amplifier Circuit.

Slight success has been obtained by using this type of tube as an oscillator in the circuit shown in Fig. 3. Here a control electrode, similar to the grid of a vacuum tube, is interposed between A and B. Reversal of polarity also materially increases the life of the oscillator. An alternating current flowing through the input circuit causes a variation of resistance, which is, of course, proportional to the potential variations. Because of the negative characteristics of the "tube," a reinforcement of the alternating circuit is obtained in the output circuit.

For the amplifier circuit connecting a "tube" with a control electrode the action is different. The variations in the applied alternating current force the control electrode to act electrostatically upon the flow of colloid particles between A and B, with a consequent slightly amplified current flowing in the output circuit.—New York Herald-Tribune.

When using a potentiometer in a radio frequency circuit, great difficulty is sometimes experienced in bringing in weak stations without having the tubes spill over. This is especially the case with the usual wire-wound instrument, as the variation is not even, but consists of small jumps as each turn of wire is passed. It is obvious that a vernier attachment cannot be used on the potentiometer itself, as it is impossible to get any variation between turns. The solution is to employ a variable resistance of low value in series with the potentiometer. This can take the form of a 30-ohm rheostat. If the potentiometer has a resistance of 200 ohms, it will readily be seen that, as a complete turn may be made on each instrument to vary the complete resistance, a ratio of ten to one will be had. When using this rheostat, it should be placed in series with the potentiometer and the negative lead of the "A" battery. In operating this vernier, the movable arm should be placed about on the center of the resistance. Now, when the adjustment as can be had is obtained with the potentiometer, a very fine vernier effect can be made with the rheostat. This attachment may be used with any radio frequency receiver and will prove extremely useful on long-distance stations.—Radio News.

When using a potentiometer in a radio frequency circuit, great difficulty is sometimes experienced in bringing in weak stations without having the tubes spill over. This attachment may be used with any radio frequency receiver and will prove extremely useful on long-distance stations.—Radio News.

This Type of Tube May Be Used as an Oscillator.

When using a potentiometer in a radio frequency circuit, great difficulty is sometimes experienced in bringing in weak stations without having the tubes spill over. This is especially the case with the usual wire-wound instrument, as the variation is not even, but consists of small jumps as each turn of wire is passed. It is obvious that a vernier attachment cannot be used on the potentiometer itself, as it is impossible to get any variation between turns. The solution is to employ a variable resistance of low value in series with the potentiometer. This can take the form of a 30-ohm rheostat. If the potentiometer has a resistance of 200 ohms, it will readily be seen that, as a complete turn may be made on each instrument to vary the complete resistance, a ratio of ten to one will be had. When using this rheostat, it should be placed in series with the potentiometer and the negative lead of the "A" battery. In operating this vernier, the movable arm should be placed about on the center of the resistance. Now, when the adjustment as can be had is obtained with the potentiometer, a very fine vernier effect can be made with the rheostat. This attachment may be used with any radio frequency receiver and will prove extremely useful on long-distance stations.—Radio News.

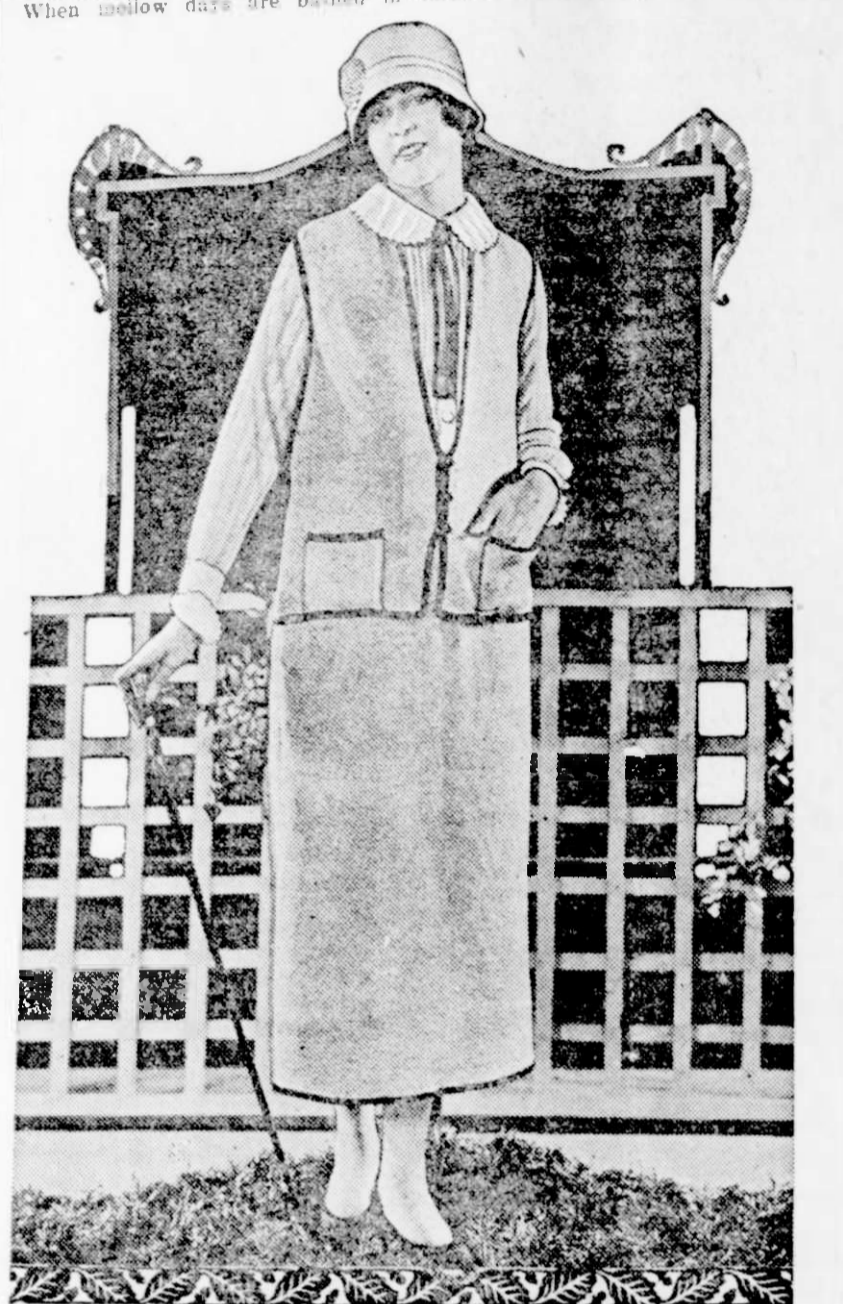

When using a potentiometer in a radio frequency circuit, great difficulty is sometimes experienced in bringing in weak stations without having the tubes spill over. This is especially the case with the usual wire-wound instrument, as the variation is not even, but consists of small jumps as each turn of wire is passed. It is obvious that a vernier attachment cannot be used on the potentiometer itself, as it is impossible to get any variation between turns. The solution is to employ a variable resistance of low value in series with the potentiometer. This can take the form of a 30-ohm rheostat. Sleeveless Knitted Fall Suit; Effective and Not Expensive

Now comes autumn with its cool days and its warm sun days with "Indian summer" just to be. Though the thermometer may frank a two-piece knitted suit will prove equal to the capriciousness of most any sort of weather. If one owns a knitted skirt with matching sleeveless coat, the possibilities for adjusting to meet the circumstances are many.

KNITTED SUIT SURE OF POPULARITY

sunshine unwanted are sleeves in one's knitted suit. That is why the sleeveless kind are so popular, being not too warm, too cool, too burdensome, just right!

Yet there come times between when autumn winds are sure to chill. A sleeveless jacket-with-skirt, plus a lightweight knitted jumper substituted for the lingerie blouse proves equal to the occasion. Not only does this combination assure comfort, but more

FOR SMALL GIRL'S ADORNMENT

than that it converts a two-piece suit into a swaggy three-piece knitted ensemble. Take as a working basis this very model shown in the picture. It is a suit trimly tailored and knitted of lion yellow mohair with striking black bordering. Admirable indeed for the warmer fall days, but, when winds do blow, fancy its comfort and its effectiveness if its sleeveless jacket is worn over a lightweight jumper knitted, say, in gay plaids with yellow and black predominating. Perhaps, a heavier mixture introducing ruddy autumn tones would make even more of a pleasing color study. At any rate the experiment is worth trying, especially as designers antedating this demand for sleeveless jackets, skirt and jumper to match, have employed the method this season of making individual garments

of tooled leather. The gift of leather still remains one of the most acceptable for all ages and the shops continue to bring out new and attractive articles. For the woman who has a large correspondence nothing could be nicer than a large box of tooled leather containing three sizes of writing paper.

Tucked Coat of White
The all-white coat has many variations and one of the most attractive is

Veranda Cushions
Raffia sofa cushions are up to date for the porch—especially where there is wicker furniture. Cretonne or chintz is also used, and some of the newest are combined with plain satens.

Determine Time for Caponizing

Age and Size of Fowl to Be Operated On Are of Great Importance.

These facts are brought out in an investigation by the United States Department of Agriculture, which is now waiting an intensive campaign in the spring-wheat states to induce farmers to clean their wheat on the farm. The quantity of dockage last year, if removed from the wheat, would have fed (with addition of roughage) 3,500,000 lambs, thus adding weight worth about \$6,700,000, the department says.

Wheat should be cleaned preferably at the threshing with a portable disk cleaner, or with any good cleaner at the granary. Cleaning at the farm increases the market value of the grain; provides clean wheat for sowing; and saves freight. A descriptive illustrated poster emphasizing the need for cleaning wheat at the farm has been prepared by the department, copies of which will be displayed at banks, country elevators, mills, railroad stations and other public places through the spring-wheat territory. A special bulletin entitled "Cleaning Wheat on the Farm" is also being published, copies of which may be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Inspection Service on Eggs Expanding Rapidly

Nearly 5,000 cases of eggs were inspected at New York last month under the new market inspection service of the United States Department of Agriculture. Inspections were mainly for users of eggs, one chain restaurant system alone having 2,338 cases inspected by the federal officials. Other inspections were for government hospitals, navy supply ships, the United States Steamship lines and other steamship lines.

Brown Rot of Cherries and Prunes Is Serious

Brown rot of prunes and cherries occasionally breaks into a serious epidemic in the Pacific northwest and causes the loss of a large percentage of these crops. Results of five years' investigations of this disease as it occurs in the lower Columbia and Willamette valleys are reported in Department Bulletin 1252, just issued by the United States Department of Agriculture. The fungus and cherries that had fallen to the ground and become partly buried develop apothecia which shed spores causing the disease by infection of the blossoms, the extent of infection varying with the prevalence of damp and showery weather. Applications of spray just before the blossoms opened and just after the petals had fallen decreased the blossom infection, and applications three to five weeks before picking time decreased the fruit rot. All of the various standard spray materials were found fairly efficient in holding the disease in check.

Automobile Is Raising Standard of Work Horse

The small, steady, misty horse is now a "has been." The automobile has put it out of business. The automobile was responsible for a cut in the price of horses, and, of course, the scrub suffered most. As a result, says W. H. Peters, head of the animal husbandry division of the Minnesota experimental station, University farm, St. Paul, the type of horse one sees now is the big strong animal, able to do a honest day's work.

Comb Honey Difficult

Comb honey is more difficult to produce than extract owing to the bees having an aversion to working in the section supers. To get them there requires crowding. Early in the spring, when the colonies require extra brood rearing space, it is customary to give a second brood chamber. Later, in the fall, when nectar is coming in well, this second brood chamber is removed and the super containing the sections is placed, without excluder, next the brood chamber.

Cure Chicken-Eating Sow

All kinds of remedies are given to cure a chicken-eating sow. The trouble is usually caused by not allowing enough protein in her feed. A self-feeder containing tankage should be put in the pen and then try to keep the chickens out. Among the remedies offered are a heaping teaspoonful of soda in a small amount of slop twice daily, feed cracklings with a little salt on them, and kill a crow and throw to the sow before it gets cold.

Successful Farmers

"The most successful farmers study carefully the general trend of production, and without disorganizing their general plans, nevertheless try to go somewhat counter to the prevailing trend. Such farmers usually have the higher priced stuff to sell."—Henry C. Wallace, United States secretary of agriculture.

Farmers Lose Much on Wheat Dockage

Failure to Clean Grain on Farm Is Cause of Loss.

These facts are brought out in an investigation by the United States Department of Agriculture, which is now waiting an intensive campaign in the spring-wheat states to induce farmers to clean their wheat on the farm. The quantity of dockage last year, if removed from the wheat, would have fed (with addition of roughage) 3,500,000 lambs, thus adding weight worth about \$6,700,000, the department says.

Wheat should be cleaned preferably at the threshing with a portable disk cleaner, or with any good cleaner at the granary. Cleaning at the farm increases the market value of the grain; provides clean wheat for sowing; and saves freight. A descriptive illustrated poster emphasizing the need for cleaning wheat at the farm has been prepared by the department, copies of which will be displayed at banks, country elevators, mills, railroad stations and other public places through the spring-wheat territory. A special bulletin entitled "Cleaning Wheat on the Farm" is also being published, copies of which may be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Ducks With Sore Feet

Ducks as well as hens are liable to get bruised or cut feet, causing considerable pain and lameness and occasionally death. In cases of injury and swelling or festering lanes, the swelling by making a rather wide incision with a sharp knife. Drain the wound and wash it with iodine, and then bandage. Several dressings may be necessary before healing results. Such cases in birds greatly differ. Some may be easy to heal, while others result in lameness and great loss of vigor. Your own inspection of the bird can best determine whether it is worth trying to save through surgery.

Far From Market

In 1920 the United States Department of Agriculture sent out questionnaires to a large number of grain and live stock farmers in the corn belt who used trucks in their farming operations. A study of the 831 replies received shows some interesting results as published in Bulletin No. 531. Only 14 per cent of these farmers are less than five miles from market and 20 per cent are 15 miles or more.

Roads Changing State

What good roads will do is vividly indicated by the great increase in West Virginia automobile registration for 1923. The percentage of increase is 40.6; the average for the United States is 23 per cent. West Virginia has been busily engaged in good road building and now has a fine "backbone" system. The welfare of the people of any state is becoming more linked up with motor transportation.

Farm Notes

If you don't dock your lambs the market will.

A good part of gas engine troubles is due to incorrect timing.

The wise farmer studies not only soil and seed, but the food habits of the consumer.

If you want your descendants to say, "My great grandfather put in these posts," use concrete.

If hens could talk, they'd probably say it was a waste of time to try to hatch chickens from inferior eggs.

An ordinary six-shovel corn cultivator is a good implement for cultivating potatoes. More and smaller shovels will be better in a clean and mellow soil.

Keep the weeds cut close around the fence. Weeds take the water which the vegetables need. They harbor insects, and disease lives over the winter on the old weed stalks.

WRIGLEYS

After Every Meal

It's the longest-lasting confection you can buy—and it's a help to digestion and a cleanser for the mouth and teeth.

Wrigley's means benefit as well as pleasure.

Sealed in its Purity Package

WRIGLEY'S JUICY FRUIT CHEWING GUM

Airplane Carries Horse

When the body of an airplane on the run between Paris and Amsterdam was found too small to take a crate carrying a live horse, the crate was set aside and the horse loaded into the body of the airplane and successfully carried off into the sky unharmed.

Something to Think About By F. A. WALKER IDLERS' ISLAND If you are resolved to continue your search for Idlers' Island, contrary to the advice of the expert...

Through the Glad Eyes of a Woman By Jane Doe WHEN YOU MARRY A MAN I WOULD be foolish, O Miss, to let the idea take root under your hair that he who stood you the best of theater tickets, the slickest of taxis, the choicest of flowers, the most melting of chocolates, doesn't know that 100 cents make one dollar, and won't expect you to.

SCHOOL DAYS Illustration of a school scene with children playing and a teacher. Includes text: "There goes another one! This 'two you've' dropped!"

Remember there are many ways of killing love. Some wives do it by strangulation, some by malnutrition. Taunt not your husband by alluding to his ignorance of domestic matters.

Mother's Cook Book

Neelie Maxwell MEN YOU MAY MARRY By E. R. PEYSER Has a man like this proposed to you? Symptoms: A perfect Apollo! Tanned, a figure like a pugan god, can wheedle you into doing anything he wants you to; you like him 'cause he can. He never bothers to do what any one else wants. He hangs sumptuously all over a room and looks like the cat who swallowed the canary when he's empty.

The KITCHEN CABINET

The spirit of benevolence is a precious possession of mankind; but a more precious possession is the spirit which raises the strength of humanity so that benevolence itself becomes less of a necessity.

SOMETHING FOR A CHANGE It is economy to buy a fowl weighing four or five pounds, unless the weight is largely fat, as a smaller fowl has more bone in proportion to the edible portion.

Hawaiian Chicken. Dice fowl and heat in a liberal amount of rich curry sauce. Prepare the sauce as follows: To a pint of hot milk or thin cream add one-half cupful of condensed chicken broth, four table-spoonfuls each of flour and melted butter, salt, pepper, a dash of cayenne, a teaspoonful of scraped onion and curry powder to taste.

Horn Pie With Tomatoes. Fill a buttered glass baking dish with alternate layers of seasoned mashed potato and minced ham—a little ham will be sufficient—leaving the top layer for the potato, with a space left for the other vegetables.

STUBBORN SALADS During the sultry days we require less food, but should have everything served invitingly arranged to appeal to a flagging appetite.

Molded Potato Salad. Chop fine eight cold boiled potatoes, chop one green pepper, a small cooked beet, a hard-cooked egg, four small cucumber pickles, half of a small onion, one-quarter cupful of nut meats, preferably pecans.

Famous English Society The Royal Geographical Society of England was founded in 1830. Its object is to collect, register, digest and print in a cheap and convenient form such useful and interesting facts and discoveries as the society might from time to time acquire.

WILLING TO BE KILLED. A kiss? Certainly not! Don't you know that kissing breeds disease? Well, who cares! You've studied nursing, haven't you?

Passing Strange Wonder why a woman rather likes being called a vision, yet bristles at being called a sight.—Jack Canuck.

AFTER BABY ARRIVES

Many Mothers Weak, Nervous

Lydia E. Pinkham's Vegetable Compound Helps to Restore Health

A great many letters similar to the following recommend Lydia E. Pinkham's Vegetable Compound as a wonderful medicine for bringing the new mother back to normal health and strength.

Now Well Again Milwaukee, Wisconsin.—"After I had my second child I felt sick and nervous and could not do much. Then after the other baby came I was worse than ever. I suffered this way for a long time and did not know what to do. I was looking over my cook books, and found one of your little books and I sat down and read every page. Then I bought a bottle of Lydia E. Pinkham's Vegetable Compound and took four bottles of it before I stopped, and now I am well again. I always recommend the Vegetable Compound to my friends."

In the Same Boat The dramatist mistook the noise in front and was distressed to find that, although they wanted to see him, what they wanted to see him for was something very different from his expectations.

Children Cry for "Castoria"

Especially Prepared for Infants and Children of All Ages Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups.

Squelched Benham—You are a woman, and a woman is like a cat. Mrs. Benham—I wouldn't be if I had to depend upon you for my fur coat.

Bees Have Code of Honor Strange bees visiting hives without carrying honey are instantly attacked, but if laden with the nectar they go unchallenged.

The secret of good bread: Yeast Foam

"I made it all myself" Send for free booklet "The Art of Baking Bread" Northwestern Yeast Co. 1730 North Ashland Ave. Chicago, Ill.

Interesting to Scientists When the swamp areas of northern Minnesota are drained, remains of many elephants may be brought to light. Prof. Clinton R. Steffer of the University of Minnesota has reported to science that recent finds indicate were once abundant in that region and survived the great Ice age formerly thought to be the period in which they became extinct.

Where will you shoot this Fall? Most of the best hunting country is posted. What's the answer? Send for this free book, "Hunting Posted Property." It will help you find more and better shooting. It tells you how farmer and sportsman can get together.

Books and Nature.
Books are of pathetically little use to tell the story of nature. Few people recognize more than a dozen possible flowers, the commonest trees and shrubs, a few kinds of birds and insects. To be able to distinguish the call notes of birds seems to most persons a miraculous gift. The few who know enough of nature to be guides for a few hours' walk have knowledge that many others deeply long for and that they would pay handsomely to get.—Fourth's Companion.

Mah Jongg 3,000 Years Old.
The Chinese game, Mah Jongg, which has taken America by storm and which is being played in London, Paris and other world centers, was invented 3,000 years ago by a Chinese fisherman, who whiled away the time during stormy play at the game with his employees.

Incandescent Lamps.
The average amount of light obtained for 1 cent from incandescent electric lamps at first was about five candlepower hours, but it is now possible to obtain with the ordinary 40-watt lamp 170 candlepower hours for 1 cent.

To Give Him His Due.
Winnie Wantsit—"You may say what you will about Mr. Cadger, but he always behaves like a gentleman in my presence." Her Dad—"Acts like a gentleman; yes, I'll grant him that much. He's the best amateur impersonator I ever saw."

Not Large, but—
A rather awkward looking individual went into an ice cream parlor the other day and bought an ice cream cone. He went out on the sidewalk to eat it. Presently he reappeared with the cone emptied of the cream and he said to the attendant, "Thank you for the vase."

"TILL THE SOUL THAT FEEDS YOU"

Mother Earth is mankind's best provider. She produces everything we wear—everything we eat—and everything that shelters us. In brief Mother Earth has made life possible. So it is with your city and your merchants. Your success is dependent upon their success. You must support them or they will retrograde. You are to them what the plow is to the field. In other words, sustain your merchants by buying at home. The goodwill of the buying public is the goal of the modern sellers. Without it they cannot exist. Back up your merchants and you prosper with them. By boosting the "Buy-at-home" movement you help put your community on the map.

PLYMOUTH SELF-FEED ENSILAGE CUTTERS

"Plymouth" Feed Cutters are the result of twenty-five years' experience and practical study of conditions and needs in the farm and dairy field. They embrace every advantage known to other similar machines, and many vital features which are original with us and can be had only in the "Plymouth Self-Feed." Below are some mighty strong points for you to think about before you buy a feed cutter.

Automatic Self-Feed—This feature consists of a traveling feed chain, made of heavy iron slats securely riveted to a chain which passes over the lower feed roller. Throw the fodder into the feed box and the "Plymouth" does the rest.

Danger-Proof Self-Feed Rollers—Here's another strong feature original with the "Plymouth." It consists of four large rollers of cast iron. The traveling feed chain passes over the lower hind roller, just passing the lower front roller, which is six inches in diameter, and smooth. The two upper and lower hind rollers are ribbed. The 8-inch automatic roller at the top, to the rear, is a special feature of the "Plymouth." It acts as a lever or weight to keep the fodder passing through continuously, depending on its own gravity to keep the material going through without a hitch. Two coil springs serve to exert an even and steady pressure on the automatic roller as the volume of fodder increases in going through. The spring feature is entirely automatic, and is only to be had in the "Plymouth." It absolutely prevents clogging.

THE DIFFERENCE

When the doctor makes a mistake he burys it.
When the preacher makes a mistake nobody knows the difference.
When the plumber makes a mistake he charges twice for it.
But when an editor makes a mistake—good night.

"Here's Why I Like It"

ASK your painter why he likes to use Lowe Brothers High Standard Liquid Paint. He will tell you that it goes on more smoothly and easily than ordinary paints, that it covers better, that it dries right, is true in color, that it retains its freshness and wears for a surprisingly long time under the most severe weather conditions. There is wide variety of pleasing colors from which you can select a combination of pleasing harmony. And you can be sure of long satisfaction and economy, too.

Lowe Brothers

HIGH STANDARD LIQUID PAINT

For over fifty years Lowe Brothers have been making paints, varnishes, stains and enamels. There's one for every need in your home. We have them all—and we think we can help you to decide how best to use them.
