Great Activity of Associations

Render Some Essential Service Connected With Farmers' Enterprises.

(Prepared by the United States Department of Agriculture.)
There are now more than 12,000 active farmers' business organizations in the United States, the Department of Agriculture estimates on the basis of a recent survey. This number is more than twice that in 1915, when the first nationwide survey of co-operative associations was made by the department.

Included in Associations.
The associations include those selling farm products, buying farm supplies, operating creameries, cheese factories, canning plants, grain elevators, stockyards, warehouses, or rendering some one or more of the essential services connected with the conduct of farmers' enterprises. The figures do not include farmers' co-operative banks, credit associations, nor insurance companies.

Fifty-four of the associations listed are federations with local units, 49 are sales agencies operating in central markets, 35 are bargaining associations, and 98 are large-scale organizations of the centralized type. Of the total number of associations listed by the department, 3,325 are primarily engaged in marketing grain, 2,197 handle dairy products, 1,770 ship live stock, 1,250 market fruits and vegetables; 121 perform various functions in the marketing of cotton, 91 in marketing wool, 71 in marketing poultry or poultry products, and 24 in marketing tobacco.

In North Central States.
More than 70 per cent of all the associations are in the 12 North Central states. Approximately 6 per cent are in the three Pacific Coast states, and less than 3 per cent in the six New England states. The largest number of associations reporting from any one state is 1,283 from Minnesota. Iowa is credited with 1,094 associa-

tions, Wisconsin 1,092, and Illinois 822. Missouri has 537 associations; Nebraska, 488; Kansas, 406; California, 359, and New York, 295.
The grain marketing associations are largely in the 12 North Central states, as are also the greater number of the live-stock shipping associations. The organizations engaged in marketing dairy products are scattered through the country with a fair percentage of the total number in Minnesota and Wisconsin.

Possibilities Open for Farm Storage of Grain

The farmer has the choice of three places for storing his grain in order to hold it for a favorable market. It is explained by L. F. Riekey, grain marketing specialist of the college of agriculture, University of Illinois. These three places are: (1) in cribs or granaries on his own farm, (2) elevators or cribs at his shipping point, or (3) at the terminal elevators. In order to hold his grain, it is often necessary for the farmer to borrow money upon it as collateral.

When it is in public elevators at the terminal markets he can readily borrow on the warehouse certificates, but the cost of such storage is rather high. Storage in the local elevator has advantages, but these houses are not large enough to actually store very much grain and many elevators refuse this sort of business or limit the time of storage to a comparatively short period.

Farm cattle and granaries offer the cheapest storage for grain crops and this method has several other apparent advantages. However, no one would care to loan money on grain so located. Iowa has solved this part of the problem by its unbonded agricultural warehouse law. Under its provisions cribs or granaries are officially sealed and storage certificates issued which are acceptable to local bankers as collateral for loans. The grain thereby finances its holding for a favorable market.

EXCELLENT PLAN TO INCREASE PRODUCTIVITY OF AVERAGE SOIL

Crop Rotation as Good as Manure and Fertilizers.

(Prepared by the United States Department of Agriculture.)
In the practice of crop rotation a farmer has at his command a means whereby he can materially reduce acre costs or increase the output of his land, says W. W. Weir, associate soil technologist of the United States Department of Agriculture. Perhaps that fact is not news to many farmers who have been using rotation in their crop system; they know it is a beneficial practice.

They may be surprised, however, says Mr. Weir, to learn that crop rotation is nearly as effective in increasing soil productivity as the use of manure and commercial fertilizers. Furthermore, crop rotation can be practiced usually with no outlay of money, whereas the use of commercial fertilizers requires an expenditure of money.

A study of the long continued soil fertility experiments of this country

and of England, made by the Department of Agriculture, has brought out some important facts about crop rotation in its relation to soil productivity. In general, says Mr. Weir, they show that rotation without the use of manure or commercial fertilizers is nearly as efficient in effecting crop increases as the use of fertilizers without rotation. The beneficial effects of crop rotation are different from the benefits derived from the use of fertilizers; so that when these two farm practices are combined the one practice adds to the benefits of the other, making the resultant increase almost twice that secured by either practice used alone.

On soils long under cultivation highest yields are possible only when rotation and the use of fertilizers are practiced together.

Dairy Cow Has Financed Farmers When Needed

Farmers realized nearly as much from dairy cows during 1925 as from their corn and wheat crops combined, according to figures issued by the National Dairy Council.

According to careful estimates based on investigation, the farm value of all dairy products for the year 1925, is \$2,700,000,000. This is only about \$200,000,000 less than the total farm value of wheat and corn, the government estimate of the combined farm value of the latter being \$2,904,239,000.

"But the important fact," states M. D. Munn, president of the National Dairy Council, "is that American farmers have marketed their dairy products day by day throughout the year without any accumulated surplus on their hands and have thus received funds with which they have been able to live and help finance their other farm operations, while they still have much of their corn and wheat on hand."

"This vast sum of nearly two and three-fourths billions has financed diversified farming in this country and relieved agriculture from what would otherwise have been insurmountable difficulties, especially in view of the accumulated surplus of grains together with the low prices that now prevail. In addition to the cash return to the farmer through the dairy cow he has also been supplied with dairy products for his own family use, which have materially assisted in reducing living expenses."

FARM FACTS

Clean out the cistern and catch cool spring rains.

Poor ventilation is largely responsible for damp litter. Give the poultry house plenty of air.

Little potatoes make good seed only when they come from high yielding and disease-free hills.

Get early vegetables started. Onions, radishes, lettuce, peas and beets flourish in the cool damp weather of early spring.

Plow up the sod-bound orchard, and cultivate it. This loosens the soil, kills weeds and makes re-seeding more valuable.

Cabbage growers need particularly to watch crop and market reports. In a short-crop year, cogwheel holding part of the crop unless the fall price is very high.

Hens Used for Hatching Purposes Need Dusting

All hens used for egg-hatching purposes should be dusted with a good loose powder when they are placed on the eggs. The only preparation known to kill lice with any application is sodium fluoride. Put a piece of sod in the bottom of the nest to prevent excessive evaporation. Set two hens at a time so that the chicks may be given to one hen later. Feed cracked or whole grains to the biddies, being careful to avoid feeds that stimulate egg production or cause digestive disorders, say poultry extension specialists of the Pennsylvania State college.

Fine Feed for Calves

A calf should get whole milk until it is two weeks old, when it may gradually be shifted to warm skim milk. By this time the calf should be nibbling a little fine hay, and it will also want a handful of ground grain in a convenient box. A mixture of wheat middlings and ground oats, with 10 to 15 per cent of oil meal, is fine.

What makes the value in General Motors Cars?

- 1 SCIENTIFIC RESEARCH AND TEST. Centering in the largest automotive laboratories and proving ground in the world.
- 2 COMBINED PURCHASING POWER OF MANY COMPANIES. Insuring the best materials at the lowest price.
- 3 VOLUME PRODUCTION. 120,000 skilled workers made more than 835,000 General Motors passenger cars and trucks in 1925.
- 4 QUALITY BODY WORK. Fisher Body Corporation is a part of General Motors.
- 5 WORLD-WIDE MARKETS. Sales and service in 144 countries.
- 6 FAIR PRICE POLICY. Standard prices, with General Motors' savings passed on to the buyer.
- 7 GENERAL MOTORS ACCEPTANCE CORPORATION. A finance company owned by General Motors, and assuring sound terms and low rates to time purchasers.

All these factors mean that General Motors has every facility and every incentive for maintaining quality in the product and value for the price.

When Grandmother Was a Girl Since 1867

Styles have changed a lot since grandmother was a girl. The curls and trills and ruffles and furbelows of that by-gone day are only a memory now. But there is one fashion that has remained in vogue during all these years—that has, as a matter of fact, increased amazingly in popularity since 1867. That is the fashion of home decorating with paint products bearing the label of The Chicago White Lead and Oil Co. This label signified highest quality then—just as it does today. And of the complete line of half-century-old favorites, none is better known than King Wall Finish.

For this remarkable finish combines all the desirable features anyone can ask for. It's easy to prepare by simply mixing with hot water. It's easy to apply, even by an amateur who has never held a paint brush, for it never runs, laps or streaks. And it is so economical that you can finish the average size room for less than \$1.01.

Write today for name of dealer nearest you and for FREE Color Chart showing 19 beautiful colors to choose from. THE CHICAGO WHITE LEAD & OIL CO. 15th St. and S. Western Ave., Chicago, Ill.

"DIAMOND DYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in linens, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!
Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Five Billions in Diamonds
The diamonds of the world represent approximately \$5,000,000,000.

Food! Felt Like

Vinegar In Stomach

Brooklyn, N. Y. Mr. A. Arstan says:—"No matter what I ate, it seemed to turn to a vinegar-like acid as soon as it went down. I was bilious, belched gas and acted rose in my mouth. Appetite was poor. I took Carter's Little Liver Pills for just one week. This certainly was a fine remedy for me."
Treat a constipated condition in a sensible manner, cause the bowels to move daily free from pain. Carter's Little Liver Pills are for every member of the family. Small, sugar coated, easy to take. Druggists, 25 & 75c red packages.

"Aesthetic Value" Appraised

The "aesthetic value" of a young woman in France is 100,000 francs, according to a decision rendered by a correctional court. A girl, age seventeen, run down by a motor car, received injuries that left scars on her neck and face. She first sued for damages and then her parents sued on their own account for diminished "aesthetic value" of their daughter.

ALLEN'S FOOT-EASE

For Tired Feet It Can't Be Beat
At night when your feet are tired, sore and swollen from much walking or dancing, sprinkle two ALLEN'S FOOT-EASE powders in the foot-bath, gently rub the sore and inflamed parts and relief is like magic. Shake Allen's Foot-Ease into your shoes in the morning and walk in comfort. It takes the friction from the shoe. Sold every where. RADIO

How to Erect an Outdoor Aerial. The outdoor aerial is conceded to be the most efficient in that it transmits to the set a stronger signal than either an indoor aerial or a loop under equal conditions.

The ideal outdoor aerial for receiving is a single wire from 50 to 150 feet long, including lead-in, installed 10 to 20 feet higher than surrounding buildings. The aerial should be erected so that one end comes near a window, to provide a short, direct lead-in. The aerial should not be near trees, telephone wires or high-tension wires.

Obviates Necessity of Excessive "B" Battery

Questions are frequently asked regarding the use of tubes with a high amplification constant. These tubes are primarily designed for use in resistance and impedance amplifiers. We quote a few lines from one of Keith Henney's tube articles in the Radio Broadcast magazine. He writes as follows: "A low- μ tube will not load up a power amplifier unless coupled to it by means of a transformer. For example, the average amplifier to deliver 60 watts power requires at least 90 volts variation on its grid. A tube with a μ of 8 coupled by means of resistance impedance to the amplifier cannot produce a variation of voltage greater than 8 volts and probably not over 6, so that the amplifier will not deliver its rated quota of power. On the other hand, a tube with a μ of 20, or a tube with a μ of 5 coupled by means of a 2:1 transformer, can easily produce the desired change in input voltage. High- μ tubes can be used as detectors and hence are useful in vacuum tube voltmeters. Their use in resistance and impedance amplifiers make the latter practical without increasing the 'B' battery voltage beyond reason. It must be said here that the μ of such tubes is not the only important constant. The plate impedance must be considered and, like all other tubes, the usefulness of high- μ tubes increases as their impedance decreases."

In this question it must be remarked that tubes of 1926 differ from those of 1925 in the fact that their plate impedance is less. This is due to the use of better filament wire which has a higher electron efficiency. This low impedance, while it makes good amplifiers, causes trouble when the tubes are used in sets that have been neutralized for high impedance tubes. It is well known that less impedance is required in the plate circuit of low impedance tubes to make them oscillate than is the case with high impedance tubes. On the other hand, once these newer tubes are neutralized, the voltage amplification and power output are increased."

FOREFATHERS OF RADIO

By GEORGE LEWIS
of The Crosley Radio Corporation.

While wireless telegraphy soon became quite well established, communication across the Atlantic ocean being proved practical as early as 1901, it remained for an American to make the developments which made radio telephony possible. Lee DeForest was that American. He developed the "audion" radio tube, now in almost universal use as a detector and amplifier of radio signals, and as a generator of oscillations at the transmitting station. Due to certain technical difficulties, it was impossible to send voice by radio from transmitting stations using

the old Marconi equipment. The radio tube as developed for power purposes, supplanted a current, however, which could be used as a carrier for voice and music.

What Causes Frying Noises in Your Set

Two years ago there were few receivers in use there more than five tubes. Today, however, the six or nine tube sets are in very general use and naturally use up considerable battery current. Take a regular six tube receiver using storage battery tubes and you have a drain of from 15 to 40 milliamperes of "B" battery current and from 1 1/2 to 2 amperes on your "A" battery. The natural result is that batteries do not have a very long life and if they are allowed to get very low will cause all kinds of noises and very poor reception.

On all receivers of five tubes or more a voltmeter that will give a reading of both "A" and "B" batteries is valuable. This enables you to check up the condition of the batteries in a few seconds, giving you positive information of their condition. If you use dry cells for both "A" and "B" batteries, a voltmeter is needed more than ever. Sometimes one or two of the cells

STYLES IN AFTERNOON FROCKS; FLARES AND FURS ADORN COATS

WHEN the discourse is of spring and summer styles in frocks and suits, one may expect to exhaust the subject after a while and make an end of it. But when the talk is of spring's lovely frocks for summer afternoon, the conversation is simply "continued in our next" indefinitely and will not come to the end of the subject because there is no likelihood of its having an end. One pleasant episode follows another; for now that

A Quaint Afternoon Frock.

sheer fabrics and printed silks are established in the mode, designers find in them perpetual inspiration and incentive to vary the styles. The quaint and almost childish flavor of the youthful frock pictured here, is the result of several style features used to that end. One of them is the very full skirt, with flare insured by the plaited ruffle of taffeta and another is the rather high waist-line with its plain silk gridle. The use of plaited taffeta on the sleeves is important and makes them unusual; the long ribbon ties fastened with a brooch, are even more unusual and the neck finish is demure and pretty. Worn with one-strap or plain slippers this frock will subtract years from its wearer. When designers deal with printed silks, using them alone, or in combination with plain, sheer fabrics, it seems easy for them to turn out chic styles in afternoon dresses in many of these

Two of the Latest Coats.

the little scarf collar and the cuffs are noted and they are made up in two-piece effects quite as often as in one-piece. There are many apron effects also by which the fashionable fullness is added to the skirt without disturbing the slim lines of the silhouette. These front flounces are plaited in side or box plaits, shirred or cut so that they fall in folds. All the sheer fabrics lend themselves to shirtings, tucks, and little ruffles and these—often aided by fine vestees and collars of lace and net—add to the dainti-

- Tulle Dance Frocks**
The most delightful frocks for the debutante are of tulle, flounced and frilled so that they stand out like the dress of a Spanish dancer. Many combine several different pastel colors with most interesting results.
- Colored Covert**
Covert cloth for both tailored frocks and suits is much in vogue and comes in shades of violet, blue and green, as well as the familiar tan and gray.
- Camouflage Hosiery**
The woman who has not trim ankles nowadays can at least trim her hosiery purchases to make them look smaller. The newest camouflage to that end have a V-shaped heel of contrasting color, the points of which extend on either side of the back seam.
- Taffeta Trimmings**
Taffeta forms some of the most fascinating trimming of the season made into rosettes, ruffles and bandings.

ALABAB
ALABASTINE
The Sanitary Wall Coating

Look for the Cross and Circle
Printed in Red on Every Package of Genuine Alabastine

Alabastine
Instead of Kalsomine or Wall Paper

Because only genuine Alabastine will give you those soft delicate, artistic Alabastine colors, which add so much to the beauty of your home. Good decorators use Alabastine. Nearly all stores selling paints carry it in stock. Ask your dealer or decorator to show you samples and explain the Alabastine-Oxaline Process—the newest and most beautiful method of interior decoration.

—Harvey Ramthun was a Milwaukee visitor Monday.
—Mrs. Edward Bassil was a West Bend visitor Tuesday.
—Miss Rose Keller was a Milwaukee visitor Wednesday.
—Dr. N. E. Hausman was a Milwaukee visitor Tuesday.
—Mrs. John Andrae Sr. was a Milwaukee visitor Thursday.
—Walter Schaefer was a business caller at Janesville Monday.
—Rev. and Mrs. H. Heidel were Milwaukee visitors Monday.
—Miss Minnie Heidel visited relatives at Milwaukee last Sunday.
—Fred Andler of West Allis spent Saturday with friends in the village.
—Henry Muckerheide has started to saw logs at the Muckerheide saw mill.
—Misses Edna Schmidt and Lilly Schlosser sent the week-end at Chicago.
—Elmer Eberhardt of West Bend was a pleasant village visitor Thursday.
—Mrs. Joseph Eberle spent several days this week with her parents at St. Kilian.
—Mrs. Margaret Schaefer of Milwaukee spent the week-end with her parents here.
—Sylvester Marx spent Sunday with his parents, Mr. and Mrs. John Marx and family.
—Mrs. Fred Schleif spent last week Thursday and Friday with relatives at Milwaukee.
—Mr. and Mrs. Edw. C. Miller and family spent Sunday with relatives at North Lake.
—Jacob Schlosser and son John visited relatives at Milwaukee Saturday and Sunday.
—Walter Friess, local telegraph operator, was a business caller at Salem, Wis., on Wednesday.
—Henry Heidel is employed at the Otto Graf drug store. He commenced his duties last Saturday.
—Mr. and Mrs. Edw. Seip of Milwaukee spent Sunday with Mr. and Mrs. Erwin Koch and family.
—Mr. and Mrs. Arnold Huck of Sheboygan spent Sunday with Mr. and Mrs. Joseph Mayer and family.
—Farmers have started to do their spring seeding. A good warm rain is greatly in need at the present time.

SAYS:

"See Mrs. K. Endlich's add elsewhere in this paper."

—Miss Lazeda Ramthun of Milwaukee visited over the week-end with her parents, Mr. and Mrs. H. W. Ramthun.
—Julius Johnson, bridge builder for the Whitewater Construction Company was a pleasant village visitor Tuesday.
—Mr. and Mrs. Henry Mueller of Milwaukee spent last Saturday with Mr. and Mrs. William Schulz and family.

—Miss Rose Mc Laughlin is employed at the Otto Graf drug store. She commenced her new duties on Monday.

—Mrs. Clemens Nodolf and children returned home Sunday from a two weeks' visit with relatives at Platteville.

—Mr. and Mrs. Julius Klocke and family of the town of Auburn spent Sunday with Mrs. Ida Schmitt and family.

—Mr. and Mrs. Albert Schaefer and family of Milwaukee spent Sunday with the Harter family in the town of Auburn.

—Mrs. Emma Altenhofen left Tuesday for a visit with her daughter, Mrs. Alvin Gottsleben and family at Okauchee.

—Mr. and Mrs. Frank Hepe and daughter Ruth and Mr. and Mrs. Hy. Backus spent Sunday with relatives at Watertown.

—Mrs. John Enders of Wabeno visited with her parents, Mr. and Mrs. John Harter several days the forepart of this week.

—William Klein Jr., an 18-year-old of Milwaukee spent Sunday with their brother Erwin Klein and wife in the town of Scott.

—Mr. and Mrs. Albert Stark of Milwaukee spent Sunday with Mrs. Wm. Krahn and son Charles and other relatives and friends here.

—Louis Bath and family, Walter Buss and Mrs. Don Harbeck and daughter Helen were Fond du Lac callers Saturday evening.

—Ernst Haentze and Clayton Haentze of Fond du Lac spent Tuesday with Mr. and Mrs. August Buss and family and other relatives here.

—Mr. and Mrs. Anthony Fellenz, Mr. and Mrs. Frank Stellpflug and Mrs. Mamie Roden and son Francis visited relatives at Milwaukee Sunday.

—Due to heavy advertisements in last week's issue of the Statesman, a number of interesting items had to be omitted on account of lack of space.

—Theo. Holtebeck of West Bend, who has announced himself a candidate for sheriff of Washington county, was a pleasant village visitor Wednesday.

—Mrs. William Schill and Mrs. Lawrence Ackenburg and daughter Florence of Milwaukee spent Sunday with Mr. and Mrs. Joseph Schoofs and family.

—Mr. and Mrs. Edw. Guth, Mrs. Olive Haase with some friends from Adell attended the card party at the Holy Trinity school hall Wednesday afternoon.

—Math. Beisbier was at Milwaukee last Friday and Saturday, where he attended the funeral of his sister, Mrs. Barbara Smith, held there on Saturday morning.

—Raymond Casper and Ralph Wolhensak of Milwaukee and Mr. and Mrs. Joseph Schwinn and family of Newburg spent Sunday with Mr. and Mrs. S. N. Casper and family.

—The Bridge Club met at the home of Mrs. Otto E. Lay Monday evening. First honors were awarded to Mrs. John Marx. The usual refreshments were served after the games.

—Alfred Jaehrig and family, Miss Leona Klessig and friend of Milwaukee, E. W. Jaehrig of Port Washington and Mr. and Mrs. John W. Kane of Fredonia spent Sunday afternoon with Mr. and Mrs. John Klessig.

—John Muehleis, a prominent citizen of this village, and retired rural mail carrier, suffered a slight stroke of paralysis at his home here last Sunday evening. He is getting along as well as can be expected at this writing.

—Mrs. Charles Blasser of West Bend spent several days this week here with her parent, Mr. and Mrs. John Muehleis. Being called here by the illness of her father, who suffered a slight stroke of paralysis last Sunday evening.

—Mr. and Mrs. August Schnurr and Dr. and Mrs. E. L. Morgenroth were at Milwaukee last Saturday, where they attended the silver wedding anniversary of Mr. and Mrs. Henry Klessig. Mrs. Klessig is a sister of Mrs. Schnurr and Dr. E. L. Morgenroth.

—A. H. Seefelt, who spent the past two months at Milwaukee where he received treatment for his left eye, returned home Saturday. Although benefitted by the treatments, Mr. Seefelt is still making weekly trips to the city for further observation.

—A number of local skat onklers were at West Bend last Sunday afternoon, where they attended the skat tournament given by the American Legion of that place. Roman Smith, was the only one to win a prize from here, it being a diamond turnover against 7, and 522 good points.

—W. V. Arvold, representative of the school division of the Frank Holton Company of Elkhorn, Wis., who is organizing school bands throughout the state, and Mr. Lund of Madison, formerly principal of the Kewaskum High School, now engaged in the insurance business were village callers

L. ROSENHEIMER

KEWASKUM, WIS.

DEATH OF MRS. ANNA WAGNER

After an illness of five months with bronchial pneumonia, Mrs. Anna Wagner answered the final roll call at the home of her daughter, Mrs. Gregor Schmitz in this village, on Wednesday afternoon at 4 o'clock, April 21, 1926. Deceased was born April 1, 1847 in Furtalitz, Bohemia. In 1865 she was married to Peter Vogel, who preceded her in death in 1883. After the death of her husband she immigrated to America in 1888, and settled in the town of Kewaskum, where, in the same year she entered upon the sea of matrimony for the second time by marrying Peter Wagner, who died on Aug. 27, 1923. In the same year after the death of Mr. Wagner, she came to this village to live with her daughter, and where she has since resided. Mrs. Wagner was the mother of two children, Mrs. Philip Volm of the town of Wayne and Mrs. Gregor Schmitz of this village. Mrs. Wagner was a kind and devoted wife and mother. A true christian lady, ever ready to assist in the growth of the church to which she belonged. Though resting peacefully in eternal sleep, her kind deeds will long linger in the memories of those she has left to mourn her demise. The funeral will be held today, Saturday at 10 a. m. with services in the St. Bridgets church. Rev. Vogt will officiate. Interment will be made in the adjoining cemetery.

BAREE SON OF KAZAN

by JAMES OLIVER CURWOOD

COPYRIGHT BY DOUBLEDAY PAGE & CO.

NARROW ESCAPE

Synopsis.—Part wolf, part dog when two months old Baree...

Chapter IV—Continued

Baree darted to one side and ran for the open meadow...

Pierrot it was a miracle. Deep in his heart he was filled with the wonderful conviction that the dog had gone with his beloved Wyola into heaven.

Baree had not moved an inch from under his rock. He lay like a thing stunned, his eyes fixed steadily on the scene of the tragedy...

"Nepeesa, Ma Nepeesa!"

and Kazan and the old windfall. He had witnessed the death of the creature he had thought all-powerful.

He could see Nepeesa. She came straight back to the break through which his flight had taken him...

It was slaughter—but business. A minute later, standing over Nepeesa, Pierrot said to Nepeesa: "Mon Dieu, but it is a fine skin, Sakahet! It is worth twenty dollars over at Lac Rain."

Then she said, almost in a whisper: "Baree! Baree! Upi Baree!"

It was the first time Baree had heard his name, and there was something so soft and assuring in the sound of it that in spite of himself the dog in him responded to it in a whimper that just reached the Willow's ears.

Animals and Insects Prepare for Winter

Ants, bees, wasps, flies and many other insects protect themselves during the winter by securing food supplies and constructing retreats.

A Gentleman by Nature He that can enjoy the intimacy of the great and on no occasion disgust them by familiarity, or disgrace himself by servility, proves that he is as perfect a gentleman by nature as his companions are by rank.

Old-Time Pittsburgh Pirates

Photograph shows Babe Adams and Fred Clarke, both Pirate players of the 1908 world series. Clarke is now coach of the team, while Babe Adams' pitching ability is known.

Horsemen to Divide \$375,000 at Chicago

Stakes and purses totaling \$375,000 will be distributed when the Illinois Jockey club holds its 31-day meeting at the new Washington park course, beginning July 3 and ending August 7.

Heading the list will be the renewal of the American derby, for three-year-olds, with an added value of \$100,000. It will be run July 10.

The debutante stakes, a 5 1/2-furlong dash for two-year-old fillies, is the first stake on the program on inaugural day. It will have an added value of \$5,000.

Three stakes worth \$10,000 added also are listed.

Sporting Squibs

Harvard has more tennis courts than any other two universities.

This is the season of the year when the duffer begins wondering whether he can keep his eye on the ball. He can't.

Austin T. Davis, left wing of this season's Princeton hockey six, has been chosen captain of the 1929-30 team.

The value of sporting and athletic goods produced in the United States during the last year was around \$80,000,000.

Frau Robert Neppach, woman tennis champion of Germany, is coming to the United States to participate in American tennis tournaments. She won 48 prizes last season.

A new football policy has been adopted by Middlebury college in Vermont. The eleven will meet only "their own size," instead of tackling large colleges, such as Yale and Harvard.

The bloodiest battle ever fought since glove contests superseded the old bare-knuckle fights was furnished by Billy Papke and Stanley Ketchel on the occasion of one of their four meetings in the ring.

A municipal stadium is under construction in Guadalajara, Mexico, having a capacity of between 18,000 and 20,000 persons. It will be equipped with a gymnasium, shower baths, swimming pool and lockers.

Coach H. E. Vall has been instructing University of Wisconsin rowing candidates for 15 years. He selects the oars, shells and other essentials for the equipment of the eights which have always made a good showing in competitions.

Harvard's New Coach

Above is Arnold Horween, who has just been appointed as football coach for Harvard by Athletic Director Bill Binham. Horween, who came from Chicago, played half back and full back on the Harvard team in 1920-21.

Adolfo Luque's Career

Adolfo Luque had brief trial with Boston Braves in 1914. Returned to Cleveland in 1918. Best season in 1923, winning 27 games, losing 8, a percentage of .771. Had earned-run mark of 1.93 same season.

Ranked second to "Duzzy" Vance in strikeouts with 140. In one world series. Allowed one hit in six innings. Fanned six.

BELTING BEAUTIES BACK THIS SEASON

Murderers' Row Again on Job for Yankees.

"Murderers' row," as the lineup of the New York Yankees was called in the salad and socking days of the Huguenot, will again become an American league institution this season.

There is no reason why George Herman Ruth should not bat around .350 and also lose a number of balls in the bleachers. Meusel, Combs, Paschal and Gehrig are normal .300 hitters and, unless all signs fail, Tony Lazzeri, the new Yankee rookie from the Coast league, will not be far behind them.

Each unbroken "Bayer" package contains proved directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Cuticura Talcum Unadulterated Exquisitely Scented

It is said that haste makes waste, yet you seldom find a hustler in an antishower.

Every human heart is human—Longfellow.

Dodgers Secure Star

Above is pictured Johnny Butler, brilliant infielder of the Minneapolis club, who has been secured by the Brooklyn Dodgers. Wilbert Robinson, manager of the Dodgers, was compelled to give six of his players for this young star.

Ohio State Golf Coach Is Admired by Players

This is the story of a Big Ten varsity coach who resigned because he felt he couldn't devote the proper amount of time to his squad, but whose men were so strong for him they refused to let him go.

That preacher who minimized the story of David in the Old Testament should realize what a crack pitcher he would make for some modern big league.

The Bloomington club of the Three-I league has sold outfielder Verne Bleikiron to the Lincoln club of the Western league. Bleikiron was one of the leading fly chasers of the Tri-Orb in 1925.

Perkins, Vet Backstop, May Sit on the Bench

Another major league veteran, Cy Perkins, catcher of the Athletics, may do bench duty a good portion of the coming season.

A few more Cubans have been added to big league rosters. Bucky Harris has two Cuban backstops working with his Washington team. Pedro Pedrero is one, and Lopez is the other.

Noel Workman at Ames

Noel Workman, former Ohio State football star and for three years athletic director at Simpson college, has been appointed head football coach at Iowa State college at Ames, succeeding Sam Williams. Williams will become freshman coach at Ohio State.

English Cue Victor

Joseph Fahlan, the twenty-year-old player from Rutcum, who made a record break of 435 in the qualifying competition in the Liverpool district, beat F. Parmenter in the first heat of the competition proper for the amateur billiard championship of England at London recently by 1,000 to 701.

Roy Chuck, formerly of the Knoxville team of the South Atlantic league, has been engaged as manager of the Corinth team of the Tri-State league. He will be a playing pilot.

"BAYER ASPIRIN" PROVED SAFE

**ANNUAL REPORT OF KEWASKUM
FARMINGTON C. T. A.**

During the year 294 cows completed
the year (9 months or longer) 44 cows
were sold as unprofitable, 20 went as
good dairy boys and 1 died, 147 of the
294 cows made the requirements of
200 pounds of fat or better, 13 reach-
ed the 400 pound mark.

The high herd for the year is owned
by Edward Krautkramer, his 12 grade
Holsteins averaged 5771 pounds of
milk and 245.6 pounds of butter fat
with an average test of 3.53 per cent.
This herd showed \$141.66 average
above feed cost per cow, and \$2.34 re-
turn for every dollar expended for
feed. Second high herd is owned by
Conrad Bier with 10 grade and regis-
tered Holsteins averaging 9811 pounds
of milk and 341.3 pounds of butter fat
with an average test of 3.50 per cent.
This herd showed \$141.75 average
above feed cost per cow, and \$2.30 re-
turn for every dollar expended for
feed. Third high herd is owned by
Frank Bruesewitz. His 11 grade and
registered Holsteins averaged 9585
pounds of milk and 333.9 pounds of
butter fat with an average test of 3.48
per cent. This herd showed \$136.35
above and above feed costs.

The high cow is owned by Conrad
Bier (a heifer) grade Holstein giving
12335 pounds of milk and 441.0 pounds
of butter fat with an average test for
the year of 3.57 per cent. Second Bill
Grubbe, 13930 pounds of milk and
439.2 pounds of butter fat with an
average test of 3.20 per cent. Third,
Ed. Krautkramer 13201 pounds of milk
and 428.9 pounds of butter fat with an
average test of 3.25 per cent.

The association butter fat average
is 290.0 pounds (which is 100% better
than the average Wisconsin cow). The
milk average is 8350 pounds per cow,
and an average test of 3.49 per cent.
This average can be well over 300
pounds if the members would weed out
their poor producers, and feed up the
good cows.

The annual report of this associa-
tion will come out in book form some
time later.—F. G. Strathearn, Tester.

**MARCH REPORT OF KEWASKUM-
FARMINGTON C. T. A.**

Conrad Bier carries the high honor
of having highest herd for the month
of March. His 22 Holsteins averaged
1359 pounds of milk and 45.9 pounds
of butter fat. (This shows 5 pounds
butter fat more per head than same
number of cows last month). This al-
so shows proper feed and management.
Second high herd Jac. Harter, 45.4
pounds of butter fat. Third, Carl
Aurig, 42.9 pounds of butter fat. Wm.
Grubbe carries the high cow honors, a
Registered Holstein giving 1922
pounds of 3.6 per cent milk or 69.2
pounds of fat. Second Conrad Bier
65.8 pounds butter fat. Third Louis
Oprenorth 64.8 pounds. The other 40
pound butter fat herds are as follows:
Frank Bruesewitz 42.0 pounds, Edw.
Krautkramer 41.7 pounds, Wm. Grubbe
41.6 pounds. The 50 pound cows were
divided as follows: Wm. Grubbe and
Conrad Bier 4 each, Charles Hagner
3, Joe Harter, Carl Aurig, Frank
Bruesewitz, Ed. Krautkramer and Ot-
to Backhaus 2 each, Philip Schladwe-
ler and Louis Oprenorth 1 each.—F.
G. Strathearn, Tester.

Lavern of Fond du Lac, Mr. and Mrs.
Joe Sook of Dotyville.
Mr. and Mrs. Elmer Schnurr, Mr.
and Mrs. Clarence Wilkens, Walter
Dickman and Rose Habersetter, Carl
Convers and Erma Dickman all of
West Bend attended the base ball
game at Campbellsport Monday even-
ing.

BUILD A MILK HOUSE

Owing to numerous requests regarding plans and specifications of Milk Houses, we are publishing same for general informa-
tion of the dairymen of the surrounding community.

We can't have real good milk unless we have a good place to keep it. Where it keeps cool and is safe from dirt, dust, flies,
etc. Build the Milk House separate from the barn, but handy to it, where it is away from strong odors. Supply it with
plenty of fresh water. Enough light to see to work, and of material that is easily kept clean. It will be a paying investment.

KEWASKUM CREAMERY

"SINFUL EMIL"

OR
"WHAT PRICE PASSION"
[By Oswald P. Arrowroot]
Published by Courtesy of THE MILWAUKEE JOURNAL

WHAT HAS GONE BEFORE
Emil Patrick Kuchenbeiser, reaching
21, tires of life on his father's farm
near Kewaskum and determines to go
to Milwaukee, where his genius may
have full play. He tells his father of
his intentions and is overheard by Em-
ma Hemstich, the Kuchenbeiser hired
girl, who falls into a swoon. When she
recovers she demands that Emil make
her one promise before leaving, and the
elder Kuchenbeiser, suspicious of his
son, forces him to comply. Now go on
with the story!

Chapter II
"I—I—it's so hard to ask!" began
the girl, blushing sufficing her cheeks.
"I—I—don't want—"
"Ask your promise, Emmy," the el-
der Kuchenbeiser urged, patting her
arm. "I'll see that he keeps his word."
"Well," stammered the girl, "I want
Emil should send me a package of the
new lipsticks when he gets to the
city!"

Young Emil dropped her hand in
horror. Had it come, then, to this!
With a sneer upon his lips, his eyes
blazing in anger, he turned and walk-
ed rapidly into the farm home. His
father and the girl stood as if rooted
to the spot. Here was a new, a more
forceful Emil! But in their amaze-
ment some glimmering of his latent
greatness flashed into their minds.

Once inside his room Emil deter-
mined to leave the farm at once. So
he busied himself with his packing.
He emptied the contents of an imita-
tion leather suitcase upon the floor
and began to select the articles that he
would take with him to Milwaukee.
"I shall travel light," he said to
himself, "but I shall travel fast! I
am going to leave this place without
speaking to another soul! I'm sick of
the whole outfit! Once I am in Mil-
waukee, I shall live my own life!"
But as he stole down the back stair-
way and emerged, suitcase in hand,
from the dark lawn, thoughts of Mary
Katrinka tumbled at his mind and his
heart. Leave the farm without bid-

ding a last farewell to Mary Katrin-
ka? Well, not after all, a man
owes something to past attachments
and he is a poor person who runs from
sentiment. So Emil put down his suit-
case and slightly stole into the barn.
There, familiar with the interior ar-
rangements, he groped until he reach-
ed the fourth stall, the home of Mary
Katrinka, prize Holstein bossy milked
by Emil for these many years. As he
put forth his hand to touch her velvet
skin she gave a gentle flick with her
tail and Emil fancied that it was emo-
tion that made her swallow her cud.
"Goodbye, Mary Katrinka," whis-
pered the youth, and two tears coursed
down his manly cheeks. "I may never
see you again, but I'll never forget
you! I hate to leave, but my inner
soul commands me to seek my destiny
in another clime!"
For minutes he remained thus and
when he finally tore himself away he
rushed from the barn, his soul in an
upheaval of emotion. Grabbing his
baggage, he trudged rapidly down the
lane and into the village of Kewas-
kum where the lights of the railway
station beckoned to him.
His ticket purchased Emil strolled
to the edge of the station platform
and gazed pensively about the little
town. Thoughts of home, so recently
left, crowded into his mind and a
small feeling of regret began to pen-
trate his consciousness. But the train
to Milwaukee steamed into the station
and he forced such thoughts aside.
Seizing his bag, he made for the day
coach and was about to swing up the
steps when a heavy hand came down
upon his shoulder.
"Skiping, eh?" exclaimed a stern,
neering voice. "Well, you'll settle
with me before you go!"
(Continued next week.)

(What great trouble does our friend
Emil, about to seek fame and fortune
in a great city, meet with now? What
crises does he face? Read the answer
in the next instalment of this great
and thrilling romance of Milwaukee
life!)

**YOU DON'T SAVE
BY SENDING AWAY**
A great many people who
have heard and read of
the advanced rubber prices
have thought they could
save money by sending
away for Tires.

IF YOU HAVE THOUGHT SO, READ THIS:
