

Doings at Our State Capital

Madison—Gov. Zimmerman has announced that he will call an extra session of the legislature to consider conservation unless a bill by Senator R. Bruce Johnson, Superior, abolishing the present conservation commissioner and substituting a six-man non-paid board is passed at the regular session. The governor said: "I will call a special session unless the legislature passes this bill. If the members will read the platform on which they were elected, they will find they were elected on a pledge to pass the conservation bill."

Badger State Briefs

Sheboygan—Paul C. Meier, Webster, was elected grand master of the grand lodge of Wisconsin I. O. O. F. here, succeeding William F. Day, Belmont, who was named grand representative for two years. Madison—Wisconsin tobacco growers who are not members of the Northern Wisconsin Co-operative Tobacco pool will have until the middle of July to sign contracts with the pool if they expect to become members of the organization and deliver their 1927 crops through it.

NEW YORK WILD IN WELCOME TO "LINDY"

Noisiest Greeting on Record Turned Loose as Millions Cheer Hero.

New York.—From the standpoint of noise and numbers, frenzy and pent-up enthusiasm let loose with a loud bang, the welcome that New York tendered to Col. Charles A. Lindbergh far outdistanced all celebrations that have been given in his honor either in this country or abroad in the three weeks that have elapsed since he startled the world by his heroic and solitary nonstop flight from this city to Paris. From the air, on the sea and on the land, New York thundered to Lindbergh the most triumphant welcome that ever greeted one man in the world's history.

SENATOR MARCONI WEDS

Senator William Marconi.

Rome.—Senator William Marconi, wireless inventor, was married here by civil ceremony to Countess Maria Cristina Dezi-Seala by Prince Potentian, royal governor of Rome. The religious ceremony was held at the church of Santa Maria Degli Angeli.

FIVE MURDERERS IN BREAK FOR LIBERTY

Third Escape by Desperadoes From Joliet Prison.

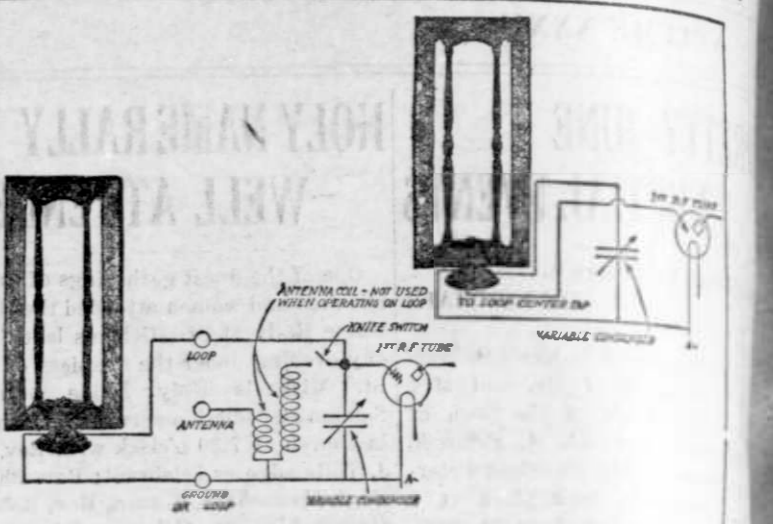

Joliet, Ill.—The five murderers awaiting execution in the Will County jail at Joliet for the slaying of Deputy Warden Peter Klein of the state prison participated in their third jail break with these results: Gregorio Rizo, one of the killers, was shot to death. Another, Charles Shuder, tore through a crowd of citizens and made his escape. Walter Stalesky, another, was shot through the back and probably will die. Charles Duschowski was so violently beaten that his condition is critical. The same five men, with Bernard Rizo, broke from the jail last March 12. In a battle with Chicago police following this escape, Policeman Leo Grant was killed. Rizo never has been recaptured. These six and Albert Price, also still at liberty, escaped from the penitentiary at Stateville May 5, 1926, after they had killed U. S. Warden Klein. Stalesky and Shuder had fashioned a key to their cell door from a rat wire. They emerged from their cell, overpowered three guards and released Rizo, Duschowski and Torrez. Then, thrusting a guard ahead of them, they marched to the jail office and took possession of two rifles, a shotgun and a revolver, all unloaded. As Sheriff Albert Margra stepped into the office Torrez ran back to his cell.

NEW FLOOD CONTROL MEET IS CONSIDERED

President May Call Another Conference Following Engineers' Reports.

Washington.—Members of the executive committee of the recent Chicago flood control conference, headed by Mayor William Hale Thompson, called on President Coolidge and received assurances that the President intends to call another conference as soon as War department engineers now surveying the flooded areas complete their studies. President Coolidge received the committee in the White House with manifest sympathy for their project. He told them he would submit to them preliminary reports of army engineers and other experts as soon as completed. He suggested they call another session of Mayor Thompson's flood conference to consider whether the reports harmonize with their ideas of permanent protection against floods. Mayor Thompson presented to the President resolutions of the Chicago conference, which declared "control of the flood waters of the Mississippi river and all its tributaries is a national problem and the sole responsibility, therefore, should be assumed by the national government."

RADIO

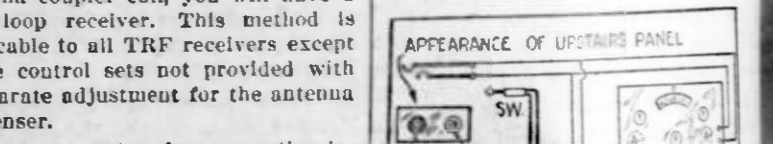

How the Antenna Coil is Disconnected in a Tuned RF Set and a Regenerative Loop Connected in Its Place is Shown at Left. A Knife Switch May Be Used So That the Antenna Coil May Be Cut In at Will, but the Loop Should Then Be Disconnected. At Right is a Method of Using a Loop Tap Loop With Neurodines Particularly. This Method Affords Greater Stability but Lesser Volume.

How a Loop Will Help Selectivity

Properly Installed Part Affords Portability, Ease of Operation. By GEORGE W. HOEHN, (In Radio World) A properly installed loop will increase selectivity and afford portability and ease of operation. In some congested radio districts it is almost impossible to get satisfactory performance from any set without a loop. In the past, one objection to loops has been their unsightly appearance, due to size, shape and design. Now, however, due to modern engineering skill, handsome, highly efficient loops have been developed. One need only look through the latest catalogues of set manufacturers to realize that loop-operated sets are becoming more popular every day. Many manufacturers also have recognized the insistent demand for loop-operated receivers by equipping their sets with connections so that either aerial or loop can be used. Of course, low-powered sets with loops will not have the distance range obtained with a long aerial, but the better selectivity and quieter operation offset the sacrifice of distance. By using a special detector tube in these sets, the reduction in distance is very slight. If any. High-powered sets, such as super-heterodynes and multi-stage tuned radio frequency receivers, usually perform best with a loop. A large proportion of manufactured sets, using five, six or seven tubes, is of the tuned radio frequency type. It is not generally known that sets of this type, designed only for use with aerial and ground, can be changed easily to operate on a loop. The Better Way. Any set will operate, after a fashion, if the loop is simply connected to the aerial and ground binding-posts of the receiver. In this way, the loop acts as a very small aerial and the full advantage of the loop is not realized. However, if the loop is connected to the first (or antenna) condenser tubes the loop, in place of tuning the antenna-coupler coil, you will have a real loop receiver. This method is applicable to all TRF receivers except single control sets not provided with a separate adjustment for the antenna condenser.

Connect Speaker From Radio Set Upstairs

For various reasons—some of which are well known to experimenters who have generator testers and slits—it has been the custom of many fans to keep the radio equipment in an upstairs room where an attic staircase to it. Then there is added convenience to the rest of the family because they have to go upstairs to listen to the music. This problem was easily overcome by using the plan suggested by the accompanying illustration. The receiver is tuned to a program and the switch SW is placed in the "off" position. To adapt a set to loop operation locate the antenna coil. This is the coil that has a connection running directly to the binding-post of the set marked "aerial" or "antenna." Sometimes it is necessary to remove the set from the cabinet to locate the wiring. Locate the grid wire on antenna coil. Upon examining the antenna coil you will note that other wires are connected to it. Find the wire that runs from the antenna coil to an adjacent tube socket and also to the stationary plates of the nearest variable condenser. This is the grid wire and it is connected to the G post of the first socket. Disconnect the grid wire from the antenna coil, leaving the other connections of the grid wire to the tube socket and condenser undisturbed. It is convenient to insert a small knife switch at this point, so that the disconnection can be made by opening the knife switch, and if it is desired to use the outside aerial again, the switch may be closed and the set will be just as it was originally.

Connecting Set to Speakers Up at Downstairs.

Says Broadcast Station Caused Clocks to Gain

Does radio interfere with clocks and watches? The suggestion is not a new one, but renewed interest has been given to it in England by an announcement of the manager of the Savoy hotel, London, who says that from now on every one of the 1,030 clocks in the newly-constructed hotel will be worked and tuned by electricity to insure scrupulous time-keeping. "Ever since the headquarters of the British Broadcasting corporation (which has thirty-eight radio stations) has been established next door on Savoy hill, we have found that quite 50 per cent of our clocks have shown tendencies to gain, which they did not do before," he adds.

Test for Amplifiers

Volume in weakness is not due to battery weakness. This condition may be closely linked with failure of the auto-magnifier tubes to do their customary work. Little consideration is given to the tubes, yet these may be to blame for the lack of volume. One way to test the amplifiers is to tap them while the set is in operation. Do this with a pencil, lightly. If the tubes are operating properly there should be a ringing noise heard in the speaker.

Indicts Huston, 7 Others in Alleged Bogus Deals

Toledo, Ohio.—Guy Huston, president of the Chicago Joint Stock Land bank, and seven of his associates, three of them bank presidents, were charged by the federal grand jury with using the mails to defraud in an indictment of seventeen counts returned here. Those charged with Huston in the alleged scheme, which is said to have caused a loss of \$5,000,000 to individuals and companies interested in farm companies and banks of the Huston group, are: Walter Gravens, president of the Kansas City Joint Stock Land bank; Harold A. Smith, president of the Southern Minnesota Joint Stock Land bank; Grant F. Soloe, president of the Des Moines Joint Stock Land bank; John E. Huston, vice president of the Chicago Joint Stock Land bank; John L. Boyles, secretary of the Chicago Joint Stock Land bank; Vernon U. Sigler, member of the incorporation committee of the farmer's fund of Illinois; Glenn W. Gold, former officer of the Minnesota Joint Stock Land bank. The indictment charges that December 3, 1925, these men "devised a scheme for obtaining money and property by false and fraudulent pretenses."

WASHINGTON BRIEFS

Rumors that Gen. Enoch Crowder, United States ambassador to Cuba, now in this country, would not return to his post were confirmed when he personally presented his resignation to President Coolidge. With the permission of the War department, Tu Ying, a Chinese student at Ohio State university, will receive instruction at the army's halloon and airship school at Scott field, Illinois. Allen F. Moore, national Republican committee man for Illinois, has placed before President Coolidge Chicago's official invitation to hold the 1928 national Republican convention there. College Chief Changes Jobs Evansville, Ind.—Dr. Alfred E. Hughes, president of Evansville college since 1917, has accepted the presidency of Hamline university in Minnesota, resigning his post here, effective July 1. Chief Indicted for Killing Canton, Ohio.—Former Police Chief S. A. Lengel has been indicted on a charge of first degree murder in connection with the slaying of Don R. Mellett, newspaper publisher. Two men are already serving life sentences for the slaying. Seaffold Falls; Four Killed New York.—Four workmen killed seven stooges to their deaths when a scaffold on which they were working collapsed. Says U. S. Lacks Munitions Washington.—Addressing the national defense committee of the American Legion here, Assistant Secretary of War Hanford MacNider said the United States has insufficient supplies of munitions to last three months of war. Noted Author, Editor, Dead Atlantic City, N. J.—Thomas Willing Balch of Philadelphia, widely known author and editor in International law, history, and science, is dead here. Plan 1,000 Miner Evictions Pittsburgh, Pa.—Consent for the Pittsburgh Terminal Coal Corporation announced that eviction proceedings would be brought against every miner living in company houses but not employed. About 1,000 actions will be started. Sapp New Rotary President Ostend, Belgium.—Arthur Sapp of Huntington, Ind., was formally elected president of Rotary International in session here. Cigarette Advertising Here Topeka, Kan.—Judge Whitcomb of the municipal court upheld the state law which prohibits the advertising of cigarettes.

110-Story Building for N. Y.

New York.—New York building officials have approved plans for a 110-story building, the highest in the world, to be erected at a cost of \$25,000,000. It is to be called the Larkin tower, after its designer.

College Chief Changes Jobs

Evansville, Ind.—Dr. Alfred E. Hughes, president of Evansville college since 1917, has accepted the presidency of Hamline university in Minnesota, resigning his post here, effective July 1.

Chief Indicted for Killing

Canton, Ohio.—Former Police Chief S. A. Lengel has been indicted on a charge of first degree murder in connection with the slaying of Don R. Mellett, newspaper publisher. Two men are already serving life sentences for the slaying.

Seaffold Falls; Four Killed

New York.—Four workmen killed seven stooges to their deaths when a scaffold on which they were working collapsed.

Notes Author, Editor, Dead

Atlantic City, N. J.—Thomas Willing Balch of Philadelphia, widely known author and editor in International law, history, and science, is dead here.

Plan 1,000 Miner Evictions

Pittsburgh, Pa.—Consent for the Pittsburgh Terminal Coal Corporation announced that eviction proceedings would be brought against every miner living in company houses but not employed. About 1,000 actions will be started.

Sapp New Rotary President

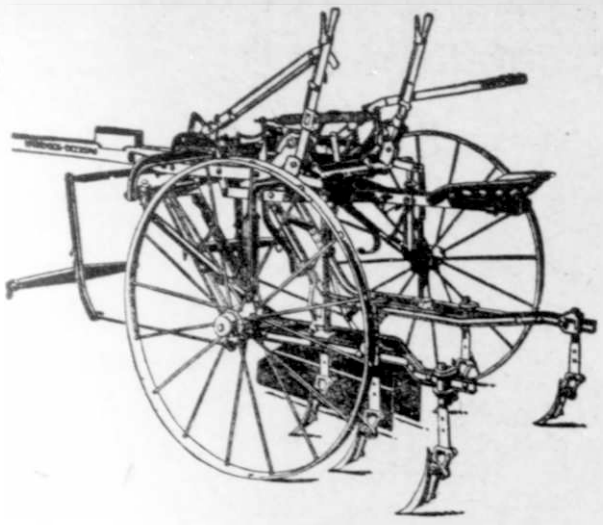

Ostend, Belgium.—Arthur Sapp of Huntington, Ind., was formally elected president of Rotary International in session here.

Doings at Our State Capital

Madison—Gov. Zimmerman has announced that he will call an extra session of the legislature to consider conservation unless a bill by Senator R. Bruce Johnson, Superior, abolishing the present conservation commissioner and substituting a six-man non-paid board is passed at the regular session. The governor said: "I will call a special session unless the legislature passes this bill. If the members will read the platform on which they were elected, they will find they were elected on a pledge to pass the conservation bill."

You Can Use This McCormick-Deering Cultivator on All Your Row Crops—
Corn, Cotton, Beans, Etc.

ONE of the biggest reasons for the popularity of this cultivator is its adaptability to all row crops. Growers find it ideally suited for cotton cultivation. And when the beans, corn, and other row crops need cultivating they ring the New 4 in on that work as well.

Another reason for the New 4's popularity is the fact that a 12-year-old boy can operate this cultivator all day, dodging stalks or hills out of line, with perfect ease. Such easy operation makes long days seem shorter by taking most of the fatigue out of the work.

Whatever your row crops or soil, count on the McCormick-Deering New 4 when you need a new cultivator.

LOCAL HAPPENINGS

Saturday, June 18, 1927

—John F. Schaefer and son "Billy" were Milwaukee visitors Tuesday.

—Mr. and Mrs. Theo. Schmidt spent Tuesday with relatives at Milwaukee.

—Sylvester Marx of Milwaukee visited his parents here over the weekend.

—Mr. and Mrs. Erwin Koch and family were Milwaukee visitors last Friday.

—Born to Mr. and Mrs. John Vorpahl, a baby girl, June 10. Congratulations.

—Miss Catherine Harter left for Fond du Lac last week where she is visiting relatives.

—Flag Day was duly observed in this village Tuesday by the display of Old Glory.

—Grand opening dance at the Opera House, Saturday evening, June 18. Don't miss it.

—Mrs. Carl Dahlke of Milwaukee spent a few days with Mr. and Mrs. Chas. Brandt.

—Mr. and Mrs. Hy. Quade and son Raymond were Plymouth visitors one day this week.

—Henry Kaempfer Jr. and family of West Bend were pleasant village callers Thursday evening.

—R. Kruse and C. Berger of Columbus spent Sunday with Dr. and Mrs. Leo Brauchle and family.

—Peter J. Haug and N. W. Rosenheimer spent Sunday with the Nick Braun family at Jefferson.

—The members of the graduating class of Holy Trinity school made a trip to Fond du Lac Friday.

—Mr. and Mrs. Frank Sommers and family of Milwaukee spent Sunday here as the guests of relatives.

—Mr. and Mrs. Fred Eichstadt and John Rilling of West Bend spent Sunday with Mr. and Mrs. John Brunner.

—Mr. and Mrs. P. O'Malley and daughter Shirley of Milwaukee spent Sunday with Mr. and Mrs. John Brunner.

—Mr. and Mrs. Otto B. Graf and Mr. and Mrs. Philip McLaughlin visited Sunday with relatives at Milwaukee.

—Mr. and Mrs. Frank Sommers and family of Milwaukee spent Sunday with the Frank Klockenbush family here.

—Mr. and Mrs. D. Hudson and daughter Esther of Green Bay visited with the A. A. Perschbacher family Sunday.

—L. P. Rosenheimer, D. M. Rosenheimer and Roman Smith attended the National Skat tournament at Madison Sunday.

—Mr. and Mrs. Math. Stockhausen and family of Milwaukee spent Sunday with Mr. and Mrs. Frank Stellpflug and family.

—Mr. and Mrs. Tony Fellenz and Mr. and Mrs. Frank Stellpflug attended the Fellenz-Dricken wedding at St. Michaels Wednesday.

—Mr. and Mrs. Albert Schaefer, and daughters Elaine and Jaquelin of Milwaukee spent Sunday at the home of Jos. Harter and sisters.

—Miss Dorothy Dana, student of Lawrence College, Appleton arrived home last Friday to spend her summer vacation with home folks.

—Mr. and Mrs. Harvey Kippenhan left last Saturday for a several days' visit with Mr. and Mrs. George H. Schmidt and family at Chicago.

—H. W. Giese and family of Coleman, Wis., spent the past week with the Ferber, Scullief and Glass families and other friends in this vicinity.

—Mr. and Mrs. Albert Stark, William Krahn and wife, and Mrs. Ph. Meinhardt of Milwaukee spent Sunday with Mrs. Krahn and son Charles.

—The interior of the L. Rosenheimer store was re-decorated last week, with a new coat of paint. A new cash carrier system was also installed.

—The Moose band of West Bend surprised John Brunner at his home on Thursday evening in honor of his birthday. All enjoyed a good time.

—Honeck Bros. have their new garage ready and equipped to do all kinds of repair work from now on. Alvis Staehler, an experienced mechanic has been engaged to take charge of your wants.

—Members of the Izaak Walton League of Milwaukee arrived in this village today and left soon after for a picnic and inspection trip to Moon Lake game refuge. There were about fifty or sixty cars making the trip. Arrangements were in charge of Henry Kuehn.

—Sometime ago we made mention in these columns of a prize egg. Recently Mrs. Chas. Schultz of Campbellsport informs us that she found a hen's egg that beats the record of the one mentioned. The egg found by Mrs. Schultz measures eight inches in length and six inches in diameter. Can anybody beat this record egg?

SAYS:
"See Mrs. K. Endlich's add elsewhere in 'SPARKLES' this paper."

—Berd. Seil, John Witzig and Mich. Skupniewitz spent Sunday at Kilbourn Wis.

—Miss Bernice Perschbacher, student of the University of Wisconsin at Madison, arrived home last Friday to spend her summer vacation with her parents.

—Don't forget to attend the grand opening dance at the Opera House on Saturday evening, June 18. A colored orchestra from Milwaukee will furnish the music.

—Mr. and Mrs. Jacob Schlosser were at Slinger Sunday where they visited the day with the Wm. Herbs' family. The latter was injured last week in an accident.

—William Brandstetter of Indianapolis, Ind., spent Sunday with his mother, Mrs. Casper Brandstetter and son Carl and with the William Schleif family at Campbellsport.

—Mr. and Mrs. Walter Reichman, daughter Doris Mae, Miss Ruth Wollensak of Milwaukee and Rudy Casper of Kenosha were week-end visitors with the S. N. Casper family.

—Miss Maude Hausman, student of the North Western University, Evanston, Ill., returned home Wednesday to spend her summer vacation with her parents, Dr. and Mrs. N. E. Hausman.

—Mr. and Mrs. Joe Schmidt of Chicago spent Wednesday and Thursday with the former's mother, Mrs. Kathryn Schmidt and daughter Edna, and with other relatives and friends here.

—The infant daughter of Mr. and Mrs. Oscar Koehler was christened at St. John's church at West Bend Sunday. The sponsors were Viola Koehler, Miss Mabel Koehler and Lloyd Reinke.

—The bridge club met at the home of Mrs. Hubert Wittman last week Thursday evening. First honors were won by Mrs. L. P. Rosenheimer. Dainty refreshments were served after the play.

—The Bridge club met at the home of Mrs. Hubert Wittman last Thursday evening. First honors were awarded to Mrs. L. P. Rosenheimer. Refreshments were served after the games.

—Mr. and Mrs. Harold Petri and family, Mr. and Mrs. Ferdinand Raether and Miss Esther Pollnow visited several days last week with Mr. and Mrs. Oscar Habek and family at Unity, Wis.

—Mr. and Mrs. Herbert Holtz and son Herbert Jr., of Milwaukee spent Sunday with Mr. and Mrs. L. D. Guth and other relatives and friends here.

—Mrs. Holtz and son remained here for a week's visit.

—Miss Elizabeth Quade, student of the University of Wisconsin at Madison, returned home Monday to visit a week with her parents, when she will again return to Madison to attend summer school.

—Mr. and Mrs. Walter Shepard and family of Janesville spent Sunday with friends in the village. They were accompanied home by their son Hannahford, who will spend his summer vacation at home.

—Edw. C. Miller spent Wednesday at Beaver Dam. He was accompanied home by his sons Allen and Charles, students of the Wayland Academy, who will spend their summer vacation under the parental roof.

—Wm. Hafemann and family of Libertyville, Ill., visited from Monday to Saturday with the Chas. Hafemann family here and the Hy. Hafemann family at Dundee. They also visited other relatives in this community.

—Mr. and Mrs. Wm. F. Schultz and Arthur Schaefer were at Juneau last Friday where they attended the graduation exercises of the Juneau High School. Their nephew Wilber Schaefer son of Mr. and Mrs. Louis Schaefer, was a member of the graduating class.

—Prin. C. E. Nodolf and family left Sunday for Plattville, Wis., where they will spend their summer vacation with relatives and friends. Mr. Nodolf commenced teaching summer school in one of the public schools there on Monday. Mr. and Mrs. Nodolf were accompanied to Plattville by Miss Margaret Miller, who will spend the summer months with them there.

Lindbergh Landing From the Cruiser Memphis

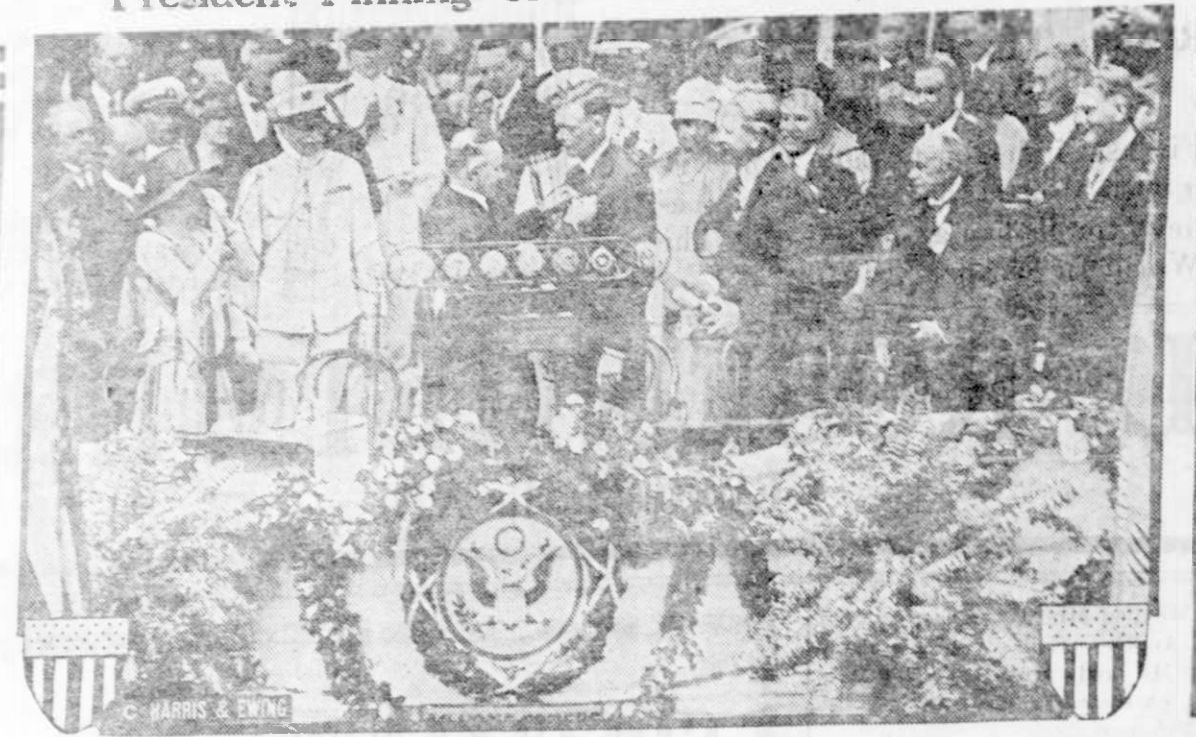

Colonel Lindbergh coming down the gangplank of the cruiser Memphis at the Washington navy yard. In the background are his mother and members of the cabinet.

Part of Immense Crowd That Saw Lindy Decorated

This photograph, taken from the top of the Washington monument, shows part of the huge throng that saw President Coolidge receive and decorate Colonel Lindbergh. The stand is in the middle background. The inset shows Lindbergh speaking to the crowd and the microphone.

President Pinning Cross on Lindbergh's Breast

Col. Charles A. Lindbergh receiving the distinguished flying cross from President Coolidge on the Washington Monument grounds.

Lindbergh and Cavalry Escort in the Big Parade

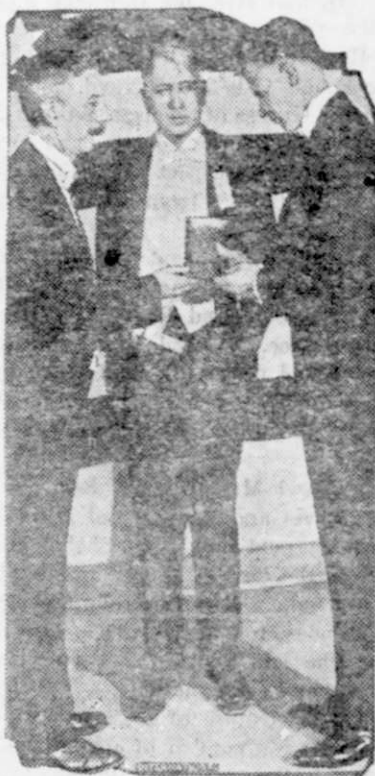

Escorted by platoons of cavalry, Col. Charles Lindbergh, in the automobile, is seen passing through the capitol plaza on the way to the reception stand in the Washington Monument grounds.

His Tribute to the Unknown Soldier

Colonel Lindbergh placing a wreath on the tomb of the Unknown Soldier in Arlington National cemetery.

GETS HUBBARD MEDAL

Colonel Lindbergh receiving the Hubbard gold medal of the Smithsonian Institution, which was presented at the reception given the aviator by the National Press club. Dr. C. G. Abbot, acting secretary of the institution, is at the left and Louis Ludlow, president of the Press club, in the center.

On Way to White House With Mother

Here is Colonel Lindbergh with his mother leaving the monument grounds for the White House after receiving the distinguished flying cross from President Coolidge.

HAPPY MOTHER

Mrs. Evangeline Lindbergh, mother of Colonel Lindbergh, at the door of the temporary White House, waving to the cheering crowds. With her is I. A. Hoover, chief White House usher.

At the Temporary White House

At the door of the temporary White House where Colonel Lindbergh and his mother were the guests of the President. Left to right: President Coolidge, Mrs. Coolidge, Mrs. Evangeline Lindbergh and Colonel Lindbergh.

PAL MEETS LINDY

Harry C. Smith, bosom friend and buddy air-mail pilot of Colonel Lindbergh, who was selected by President Coolidge as one of the two air-mail pilots to greet Lindbergh on his arrival in Washington.

HIS BRITISH CROSS

This is the British Air Force cross which was presented to Colonel Lindbergh by King George in London.

Two of Lindbergh's Medals

Here are the Hubbard gold medal of the National Geographic society and the Langley Medal for Aviation that were presented to Col. Charles A. Lindbergh for his flight to France.

FROM FAR AND NEAR

Michigan has the longest coast line of any state.
The cow tree produces a milky sap which may be drunk.
Mosquitoes in Florida swamps are being fought by poison gas spread by airplanes.
An electrically operated motor horn that imitates the human voice and utters warning words has been invented.

There are 500 muscles in a man's body.
Early Egyptian doctors were also priests.
Lassen peak, the only active volcano in the United States, is reported to be in a restless state.
An international medical code, to aid doctorless ships in getting medical advice by wireless, is being devised.

Optimist's View
Friend who is pessimistic drops in to say there are more liars per square mile nowadays than at any time in the history of the world. Well, an optimist would just say: "Population's increasing."
Unfortunate
After publishing the bans of marriage of five couples, a Bath (Eng.) clergyman announced the next hymn, "Forgive them, O My Father, they know not what they do."

FROM THE FOUR QUARTERS

Less than one-third of the earth's surface is dry land.
Naturally dark furs can now be dyed in light colors.
In many Indian tribes the language spoken by the women differs somewhat from that of the men.
To imitate conditions under which daylight is produced, a new glass for lighting fixtures is made of three layers fused together.

The only diamond mine in the country is in Arkansas.
The glaciers in the Canadian Rocky mountains are retreating.
The first 1,000 steel houses in Scotland have proved so successful that another 1,000 have been ordered.
A new apparatus now protects motorists in the Hudson River tunnel by measuring the amount of poisonous gas in the tunnel.

Different Specie
Rug Peddler (to very plain house wife)—And believe me, when I tell you, mum, the usual market price of a rug like this in Persia is three beautiful women like yourself.—Boston Transcript.
Dictates
Perhaps one reason for so many unsuccessful marriages is that very few modern girls can run their husbands as completely as they ran their parents.

Persuasion
"Don't go home! Mother's going to give us Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches."

Every genuine Monarch package bears the Red, the oldest trademark in the United States covering a complete line of the world's finest products—Coffee, Tea, Cocoa, Candy, Peanut Butter, Canned Fruits and Vegetables and other superior table specialties.

MONARCH Quality for 70 Years

Monarch is the only nationally advertised brand Quality Food Products sold exclusively through REID, MURDOCH & CO., Established 1853. Chicago, Pittsburgh, Boston, New York, Jacksonville, Tampa, Los Angeles.

Practical Medicine
"I hear strange sounds in my ear, doctor." "Well, where else would you expect to hear 'em?"

Takes Out all pain instantly

CORNS

Dr. Scholl's Zino-pads stop all pain quicker than any other known method. Takes but a minute to quiet the worst corn. Healing starts at once. When the corn is gone it never comes back. If new ones make the spot "itchy" again, a Zino-pad stops it instantly. That's because Zino-pads remove the cause—pressing and rubbing of shoes.
Dr. Scholl's Zino-pads are medicated, antiseptic, protective. At all druggists' and shoe dealer's—35c.

Dr. Scholl's Zino-pads

Put one on—the pain is gone!

keeping Algy and me busy with your errands, Miss Sharpe. My doctor has advised the regular use of dumbbells, you know."

His Excursions
"Here comes Gabbieby," said J. Fuller Gloom; "I must go."
"What's your hurry?" we asked.
"He wants to relate his symptoms and I don't want to hear them. I have walked twenty miles in the last two days, dodging around him."

Saving Price of Mineral Mixture

Rations for Swine Containing Skim Milk, Tankage, Etc., Are Favored.

"Usually, if a farmer needs a 30-inch fence, he doesn't go to the expense of stretching a 48-inch wire along that line, even though a hardware salesman tries to persuade. The question of mineral supplements for swine rations, which has stirred up considerable discussion among farmers, is a very similar problem and is almost as simple," says Dr. W. E. Carroll, chief in swine husbandry at the college of agriculture, University of Illinois.

"The two things most needed in the way of mineral supplements for swine is a little more straight thinking on the part of the men who feed them, and a little less 'hocus pocus' on the part of the salesman. Some rations used a mineral supplement while others do not. In case the ration being fed needs a mineral supplement, it is not necessary to pay exorbitant prices for it.

Some Rations Need Protein.
"If a ration already contains enough mineral elements of the right kind, nothing will be gained by adding more. It is the problem of the 4-foot fence when one 3 feet high is ample. In general, rations which contain liberal amounts of skim milk, tankage, fish meal or other protein supplements of animal origin will contain enough of the necessary mineral elements, except common salt, to meet the needs of any class of swine. On the other hand, swine rations which are made up entirely of materials from the plant kingdom are likely to be deficient in lime and may also lack phosphorus. As examples of these rations may be mentioned corn and soy beans, also corn and soy bean oil meal.

"Even with these rations which are known to be deficient in mineral, nothing apparently is to be gained, except in special cases, by adding other elements than calcium, phosphorus, sodium and chlorine. That being the case, the source of these elements, their cost and the proportion in which to feed them are the questions needing attention.

Cheap Source of Calcium.
"Without going into detail, it may be stated that a cheap, yet satisfactory, source of calcium is the ordinary agricultural limestone of high calcium grade. One of the best sources of phosphorus is steamed bone meal, while sodium and chlorine are added as common salt. The proportion of these materials quite generally recommended at the present time, is: Two parts ground limestone, two parts steamed bone meal and one part common salt. In case the feeding is being done in a gortous area, the feeds and water will be deficient in iodine. In these areas one ounce of potassium or sodium iodide should be added to each 100 pounds of the mineral supplement.

"This simple mineral supplement can be mixed on almost any farm at a cost not to exceed \$1.25 to \$1.75 a hundred pounds, based on average retail prices of the ingredients. If spent bone black can be bought for less than steamed bone meal, it may be substituted for the bone meal in

the formula. The Indiana station has obtained good results from feeding a mixture composed of ten parts wood ashes, ten parts 16 per cent acid phosphate, and one part salt."

Control Melon Aphid by Application of Nicotine

(Prepared by the United States Department of Agriculture.)
The melon aphid, which attacks watermelons, muskmelons, cucumbers and like crops, is effectively controlled by the application of nicotine either as a spray or dust, says the United States Department of Agriculture. This insect, frequently called the melon louse, is very small, varies in color from light green to dark green, and the wingless forms are louse-like in appearance.

The pest has more than 40 known natural insect enemies, which in some measure check its ravages, according to Bulletin No. 1493-F, "The Melon Aphid and Its Control." When conditions are favorable for its development, however, artificial control becomes necessary.

The winged forms of the aphid develop on other food plants and fly to the melon and cucumber vines, where they feed on the underside of the leaves, which curl, wither and die. Since the insects are capable of causing wholesale destruction on short notice, it is important that a constant lookout be kept for any sign of the pest and control measures applied promptly.

Bichloride Is Safest for Sweet Potato Dip

Growers will do well to continue using mercuric chloride for the control of certain sweet potato diseases, in the opinion of B. F. Poole, associate plant pathologist at the New Jersey agricultural experiment station. Experiments indicate that a number of new organic mercury compounds now on the market must be used with caution. These substances control the diseases very well but also poison the roots of the plants and thereby reduce sprout development to a considerable degree.

Until this bad effect of the new compounds is overcome, growers will get better results from the old mercuric chloride or, as it is sometimes called, bichloride of mercury, dipping method. In making the solution for this, one ounce of the bichloride is used in eight gallons of water. By immersing the seed potatoes in this for ten minutes, the grower can destroy scurf, black rot, soft rot, and stem rot organisms on the surface of the potatoes.

DEL-BAY FARMS NOW WAGING POISON WAR ON CABBAGE PEST

Corrosive Sublimates Guns Useful for Purpose.

New tactics are to be used against cabbage maggots this year by Del-Bay Farms, of Bridgeton, N. J. Instead of using the customary method of hoeing around the young cabbage plants to remove maggot eggs, the company will poison the pest with corrosive sublimates.

With the new method, the young cabbage plants are watched after they are set in the field. When eggs of the maggot fly are found, which under ordinary conditions will be within four or six days after the setting, the Del-Bay Farms' workmen will go into action with their corrosive sublimates guns. Instructions have been issued to apply the solution on the plants for a space of about two inches above the ground so that it will run down to the roots. A second application will be made ten days later.

The Del-Bay Farms company estimates that this treatment, including materials and labor, will cost about \$15 an acre for each application, which is considerably below the cost of the old method.

Agricultural Notes

Well-rotted barnyard manure is a good fertilizer for the garden. It should be applied at the rate of 20 tons to an acre and should be worked into the soil.

There is no substitute for milk in rearing calves, but they may be raised on small amounts of it if they get enough when they are real young to get a good start.

As long as the only reason you plant a tree or a bush is to have something worthwhile growing, it looks like good sense to use sufficient care in the planting of the tree or bush to insure its growth.

A period of better prices in the beef-cattle industry is ahead because the number of consumers is increasing and because there is already a shortage of young cattle. The high point probably will come in 1931.

Opportunities!

EVERY Velvet dealer is an opportunity for you to save some money. Your motor runs more smoothly, lasts longer and requires less repair when it's lubricated with Velvet Oils.

Just try Velvet Oils once in your tractor or car. Your motor will tell you the truth in the smooth power that it gives. Your pocketbook will tell you of the saving it makes. Ask the nearest Velvet dealer.

THIRTY-FOUR YEARS OF PROVEN DEPENDABILITY

"Remade" Husband Not Often High Product
No wife is ever satisfied with her husband as he was when she married him, maintains Charles J. McGurk in an article in Liberty. "In every woman lurks the desire to mold a man," the writer contends.

"She'll tell you she wants to make him a bigger and better citizen, but what she really wants to do is to make him something different from what he is, no matter what he may be.

"Her methods are determined by her type," the writer continues. "If she is strong and masterful, she informs him of the changes she desires and from then on reminds him frequently and forcibly.

"If she is tactful, she works by indirection. If she is sweet and clinging, she seeks to soften him with tears. If she is easily discouraged, she packs up and leaves him flat. But, whatever type she is, Lord help the husband who is weak enough to be molded; because, having finished the job to her utmost satisfaction, she invariably realizes that the job is unrevocable."

First Printed Iliad
The Library of Congress has received a copy of the first printed edition of Homer's "Iliad." It is regarded as one of the most valuable ancient books sought by collectors, for it was printed in the original Greek and published in Florence four years before Columbus started out on his first voyage across the Atlantic. The book is a gift to the library from Gabriel Wells, a New York book collector.

Record in College Class
Four students in a university from the same family at the same time and all four in the same class, is the case at the University of Wisconsin, where two daughters and two sons of James Caldwell, lumberman of Rio, are in the freshman class.—Exchange.

At the Ball
"How is it you keep pestering me for a dance?" demanded the girl. "I owe you nothing."
"Well, it's a charity ball."
A high temper and good manners are always at war.
