Pope Pius Points Out Spread of Bolshevism

Rome.-Bolshevism, as an insidious, subversive doctrine which is permeating the ignorant classes throughout the world, was severely scored by Pope Pius XI it an allocution before a secret consistory convoked to raise

two prelates to the holy purple. Basing his remarks on knowledge coming to him through evidence gathered by his diplomatic outposts, the pope charged Bolshevism with being chiefly responsible not only for the troubles in China, but also in Mexico.

Dealing in Futures Held Legal in Iowa

Fort Dodge, Iowa.-In a ruling made here by Federal Judge Scott, dealings for future delivery of grain are held to be legal transactions. A trader, M. A. Hoyt, Jr., of Carroll, Iowa, had refused to make payment on the ground that the transactions were gambling deals and therefore void.

Turkish Women Active

Stamboul, Turkey.-The Women's union elected a delegation of five suffragists to go to Angera to petition Kemal Pasha, the President, to Incorporate a suffrage amendment in the constitution.

Pleas for Storage Basins

Omaha.-Congressman W. G. Sears urged Governor McMullen to call a midwestern meeting to consider storage reservoirs on headwaters of the Mississippi basin.

Enforce New Radio Rules

Washington. - The federal radio commission announced that radio stations which wilfully fail to observe the new frequency allocations of the commission which are now in effect will have their licenses revoked.

Illinois Gas Tax Loses

Springfield, Ill.-Gov. Len Small's gasoline tax bill lost in the Illinois senate by a vote of 25 to 22. Dassage.

PROPOSES NAVAL CUT

Hugh S. Gibson.

Geneva.-Hugh S. Gibson, who was elected president of the naval arms conference after the adoption of a cordial message of greeting to President Coolidge for convoking the conference, proposed in behalf of the American delegation maximum and minimum total tonnage figures slightly under the existing strength, but on the basis of the ratio of five for the United States and Great Britain and three for Japan. It pledged an American welcome for the lower figures, if the other nations so desired.

HEAVY YEARLY LOSS BY SOIL EROSION

Expert Places It As High as \$2,000,000,000.

Washington,-Based upon the market value of phosphates, nitrogen and hydrogen washed off the fields by rain and wind, the loss to American farmers by soil erosion annually is estimated at \$2,000,000,000, by H. H. Bennett, expert in the Department of Ag-

Mr. Bennett's startling statement as to the cost of soil erosion in the United States was made in an address delivered at the first international congress of soil science here.

Soil erosion, said Mr. Bennett, results in an actual, tangible loss of about \$2,000,000,000 a year to the farmers themselves in poorer crop returns and necessity of buying commercial fertilizers. Failure of farms which is often attributed to crop exhaustion, Mr. Bennett asserted, really

"The estimates are based on a soil survey by the bureau of soils," he continued, "which showed a minimum loss of 126,000,000,000 pounds of plant food, more than twenty times as much as used up by crops."

WASHINGTON BRIEFS

Additional marines will be withdrawn from Nicaragua very soon, Secretary Wilbur announced.

The treasury surplus will be about \$603,000,000, latest official figures indicated. June income tax collections are running \$22,000,000 ahead of last

To determine if an alien must be twenty-one years old in order to become an American citizen, the Department of Justice has approved an appeal in the case of Beniamino Stabile of Florida.

The Commerce department has announced that Germany and Argentina have asked for quotations on airplanes exactly like the one used by Captain Lindbergh in his New York-to-Paris

Tentative plans for flying the dirigible Los Angeles to Hawaii following the completion of repairs now being made on the big commercial airship at Lakehurst are under consideration by navy officials.

By altering leftover clothing, reblocking hats, using electric power instead of steam for many of its refrigeration plants, buying hay and forage locally instead of shipping it from distant points, and by other economies, the quartermaster corps of the army, it was announced, has saved approximately \$1,000,000 during the present fiscal year.

France Helps Farm Hands

Paris. - Better homes for farm hands are suggested as a back-to-thesoil movement. In France, as elsewhere, people are migrating to town.

Police Seek Postmaster Mlami, Fla.-Louis F. Randall, re-

cently postmaster at Hialeah, was sought here on federal warrants charging embezzlement of approximately \$48,000 in postal funds during his term of oflice.

Leaves \$15,000,000 to Charity Pittsburgh.-The late Henry Buhl, Jr., president of the Boggs & Buhl department store here, left \$15,000,000 to char ties, his will, which was filed.

HELLO MILAN! IS THAT YOU?

When Miss Elizabeth M. Zanodini of the radio laboratory of the of standards wants to talk to the home folks in Milan, Italy, she d to worry about the mail service. With this receiving set and a ti set in her home in Washington, D. C., she can establish a two-way tion. Miss Zanodini is a full-fledged radio amateur and vice president Washington Radio club.

Big Increase in Radios on Farms

1,252,126 Rural Homes Are Now Equipped With Receiving Sets.

(Prepared by the United States Depart-ment of Agriculture.) There are now 1,252,126 farms in the United States equipped with radio receiving sets, the radio service of the Department of Agriculture announced in the report of its past season's

work issued recently. This estimate was based on returns made by county agricultural agents throughout the country and showed a 126 per cent increase over the 553,008 sets estimated to be on farms July,

Iowa led the states with 99,990 farm radio sets, or an increase of 160 per cent since 1925. Indiana was second with 81,144, but this figure represented an increase of 377 per cent as com-

Other leading states included Missouri with 77,510 sets; Nebraska with 69.784: Illinois with 65,832; Ohio with 63,448, and Kansas with 62,055, The largest percentage of increase,

however, was shown in Utah, where the number of sets was estimated at 6,061 as compared with 899 estimated in 1925. How farm radio sets are being used. the program preferences of the farmers, and their own ideas for improv-

ers, and included in the report. Prefer Talk to Music. Summarizing this analysis, Sam Pickard, former chief of the radio service, said: "These replies show that American farmers prefer radio talk to music nearly two to one. Voluntary comments accompanying the

ing present service were also set forth

in an analysis of replies to a question-

naire sent to 10,000 farm radio own-

formal answers indicate a strong dislike for jazz. In music, they want old-time tunes and classical music. "Aside from educational farm programs, weather and market reports, political talks are evidently popular

and more current news programs are in demand. "Farmers are not using the radio merely for entertainment. The day's work is now planned according to the weather forcasts sent out by the weather bureau and received by radio much more quickly than was formerly possible. Market reports issued by the Federal Bureau of Agricultural Economics are eagerly followed and numbers of farmers report definite savings in dollars and cents as a re-

sult of this service. "Not only that," sald Mr. Pickard, "but hundreds of the reports from farmers cite instances where the educational programs prepared by the radio service and broadcast through nearly 100 commercial and state college stations, have been promptly applied to the immedate advantage of

the individual radio user. Many stockmen report larger and more profitable pig crops as a result of the adoption of better practices outlined by radio. Others claim that in-Indemnities for attacks on the Japa- formation from these radio programs nese concession at Hankow April 3 has enabled them to get their poultry projects on a sound financial basis. them."

Still others report thriftier live and improved marketing process a direct result of their recent to

"More cotton on fewer acres be. ter food in the home, and more em from the chickens are listed and the benefits received.

"These farm listeners, hererer" Mr. Pickard continued, "here very definite ideas about how they were the programs presented. Is not a one question, 'Do you prefer houses to be given by an announcer, the can be clearly understood; rather from he authorities themselves? the assess were more than four to one in favor of the trained announcer. Asked to indicate how they preferred farm information presented, 3.148 farmers voted for some form of disions syla as against 1.497 who indicated pref-

erence for the straight because form,

Improvements Suggested. "Among the suggestions for improving service were: Select speakers with good broadcasting voices; train broadcasters on activery; make take short and to the point; schedule tels often enough and regularly enought jort enough atmosphere or entertain par into educational programs to sala their becoming dull; and prepure taiks in simple and every-day

"Many express exasteration at persistent, direct odvertising and plead for some means of promptly distinguishing between bona fide education-

al material and nere sales talks. "In listing the farm problems in which they were most interested, 3.04 mentioned crops and soils; 2.001 mentioned poultry raising, while talks on fruits, vegetables, and flowers were called for by 1.55 Live stark was the chief interest of 1.525 and problems in agricultural economics were listed by 1.581. Dairying was also an

important subject for 228. "Practically all phases of farm Hewere touched on. Among the rails programs requested were the deleing with: The most economical way of fattening hogs for market; does as a soil builder; improvement d country roads; the control of hisen and rodents; marketing perk, bet and grain; how to make and use is infectants; feedlag the dairy con; spraying and orchard care; treating fence posts; raising colts; making charcoal; the production and bree ing of legume hay; utilization of so timber for farm buildings; general farm management; the farm last problem, and fox farming. One tor er asked for information on whether

to sell or not to sell the farm. "Some faint idea of the interest of listeners in farm programs can be gleaned," Mr. Pickard said, by requests for literature mentioned l programs prepared by the Penantal of Agriculture. We have received all filled 40,857 requests for cook bods issued in connection with And 500 my's L'ousekeeper's Chats, which has dently has been one of the blis d the year with housewives of Andrea due to the original presentation sound, fresh, helpful facts. A till of 165,219 Farm School panished by sued in connection with the sens ! radio lessons on live stock, dairy, and poultry problems have been set l listeners in response to find as if

Starved Bears Troublesome

Because of the pangs of hunger, the bears of Alaska have become so bold this winter that signal corps men operating the extensive telegraph and radio system at isolated stations in the Arctic region have found it neces sary to maintain special guards to protect their food supplies from the attacks of these half-starved animals. They are reported to be very numerous this season and so regular in their travels in search of food that

PRINT SILK ENSEMBLES FOR BEACH; MATCHING CAPES AND CHIC TOUCH

"A PLACE for everything and gette or brocade. What's more, the everything in its place"—and smartness of the beach square, as is that place, according to Dame Fashion is the sandy beach with its background of sky and sea, when it comes to a perfect setting for apparel which is startlingly bizarre, spectacular and boldly colorful. Wherefore stylists have taken their cue, playing up to their limit the charm of vivid printed allks, cretonnes, satins and figured crepes, as mediums for beach and swimming costumes.

There is an interesting diversity to bathing and beach suits this season, so much so, they give the aspect of a style pageant staged to display every

also true of the evening square shawl, depends largely upon the manner of wearing it. It requires a cunning knack to wrap it around "just so," but the result is worth practicing before the mirror to attain,

The new wee-patterned silks, which are so gayly highlighting the fabric mode, seem to call for quaint and cunning fashioning. And they get it. One cannot imagine a styling better tuned to these naive silks than this illustration sets forth. It is one of fashion's latest.

Cleverness and modishness under

phase of the costume mode. In this | writes this little frock, as viewed from every phase of the style question. The diagonal movement of the plaited rufflings, arranged as they are in tiers, is very new. The use of grosgrain ribbon for binding the edges of the cape bespeaks an outstanding trimming tendency.

Of course the first thing one notices about this arresting frock is its cape of self material. Capes to match the summer-silk frock are one of the forehandsome silk coats which are at this moment so favorably accepted by

most features of the later modes. Capes also distinguish many of the women of fashion. Often a coat of black faille silk will have a cape attachment finely plaited. Then, too, a frock of good style carries a plaited skirt with a short plaited cape-wrap

Speaking of capes, they are enter-

ing the costume mode from every angle, for evening as well as daytime. Just now it is the pleasure of the mode to add to the dainty pastel chiffon frock a cape of the same material. These transparent capes are indeed charming, especially worn with the sleeveless gown.

Newest French fashions include long capes of allover lace. Of black chantilly the wrap serves with every evening frock. However often the lace cape is in matched coloring to the sheer frock. Leading shades for the lace cape include gray, beige and soft modulated green.

JULIA BOTTOMLEY. (@. 1927, by Western Newspaper Union.)

New Jewelry Peasant Frock A new version of the peasant frock The newest and most charming

jewelry designed to fit in with inforfor the younger set is of a heavy rough silk with gay embroidered momal costumes is made of dull silver tifs on the full sleeves, gathered into set with semiprecious stones and wrought into exquisite designs of flowers and foliage.

Elephant Motifs

Elephants, small sellboats and Japanese pagodas are used as motifs for the decoration of heavy sliks for evening wraps.

The KITCHEN CABINET

"There is no earthly milment but somewhere God hath an herb for its healing," says a quaint writer. The trouble is that we think the herb has a hard foreign name. We seek it in far lands, but at last find it in our own garden plot.

SAVORY FOODS

When preparing an omelet, if the dish is to take the place of meat, add one-half cupful of chopped nuts to the omelet just before folding. Almonds, blanched, dried and turned into the hot but-

ter just before the

omelet, is another good way of making a nourishing egg dish. They will not cook too brown before the egg is ready to fold. Savory Carrots. - Scrape young, tender carrots and cut into long thin strips. Wash well, put into a saucepan with one and one-half cupfuls of tomatoes, one teaspoonful of sait and two tablespoonfuls of butter. The carrots should measure a pint. Bring to the bolling point, then reduce the heat and cook until the tomato is absorbed, This dish can be eaten by one wishing to reduce. It is rich in lime, iron and vitamines A. B and C.

Stuffed Green Peppers.—Select four large peppers and remove the seeds and membrane. Parboil for five minutes in boiling water to cover. Fill with cooked rice, tomato and nuts. Green peas in a cream sauce make a delightful filling. Leftover meats may be chopped and combined with crumbs and seasoning, also making another tasty filling. Cover the tops of the peppers when filled with buttered crumbs and bake until well heated and brown.

Baked Hash .- Chop fine one or two cupfuls of yesterday's roast beef, add twice the quantity of cold boiled potatoes chopped fine, two onlons (small ones) sliced thin, and butter with gravy to moisten. Add water or broth if necessary and bake in the oven un-

Appetizing Breakfast Eggs.-Fry two eggs and pour over them three tablespoonfuls of melted butter, add a teaspoonful of worcestershire sauce and serve.

Fruit Gems .- Take one cupful of corn meal, one teaspoonful of baking powder, one-half cupful each of raisins and currants, and one-half cupful of cream; beat thoroughly and bake in buttered gem pans. Good Things to Eat.

The southern cooks are noted for their wonderful dishes. The following is one which has become

famous: Maryland Chicken .--Dress and cut up two

young chickens, Sprinkle with salt, pepper, and dip into flour, egg and crumbs; place in a greased dripping pan and bake 30 minutes, basting after the first five minutes with one-third of a

cuptus of melted butter. When well cooked arrange on a hot platter and pour over two cupfuls of cream sauce made from the gravy in the pan.

Fried Chicken, Southern Style -Cut up the chicken at the joints, plunge into cold water, then dredge with flour, salt and pepper, having as much flour adhere to the chicken as possible. Try out a pound of fat salt pork, cut into pieces, brown the chicken in this fat and serve with a white sauce, using half milk and half

Deviled Chicken Legs .- Foods highly seasoned with condiments are called deviled foods. Such are popular for an appetizer for late suppers and picnic luncheons. Take the second joints and the legs of roasting or spring chickens. Divide the parts, removing bones and tendons and flatten the pieces with a cleaver. Make incisions lengthwise in the pieces and fill these with deviled paste, brush with melted butter and broil or fry in fat until cooked. To prepare the paste: Put into a soup plate two tablespoonfuls of salad dressing, onehalf teaspoonful of mustard, scant half teaspoonful of curry powder and one-half teaspoonful of worcestershire sauce. Mix and use as above.

This paste may be used on veal chops, on tripe, ham or ribs of beef. Pineapple, Cheese and Nut Salad .-Make a small ball of cream cheese mixed with a little grated American cheese, adding cream to mold. Fill the center of sliced pineapples with the ball of cheese, arrange on lettuce and garnish with half of a pecan or walnut. Serve with a boiled dressing.

Peanut Brownies .- Take a half cupful of corn sirup, one square of chocolate, three-fourths of a cupful of flour, half a teaspoonful of baking powder, one cupful of chopped peanuts, onehalf teaspoonful of salt, and a teaspoonful of vanilla. Bake in small gem pans.

Tomatoes Stuffed With Sweetbreads.-Peel and scoop out the centers of medium-sized tomatoes, sprinkle well with salt and pepper and invert. Set on ice to chill. Cut cooked sweetbreads into dice, add a few cooked asparagus tips, a tablespoonful of minced green pepper, add mayonnaise to moisten and fill the tomatoes. Garnish each with a stuffed

Putting Real Speed Into The Haying

Having progress continues, with the combination of the FARM-ALL and McCormick-Deering Hay Tools responsible for the latest hig improvement in speed and efficiency. With this all-purpose tractor on your farm you can hook up to new combinations of tools and turn your alfalfa, clover, or grass into crisp, air-dried

19

You can mow with the 7-foot Farmall mower, and hook another mower on too, when you're in a rush; you can mow and rake one operation by putting a side-delivery rake back the Farmall and Farmall mower; you can pull two or even three self-dump rakes back of the Farmall; you can load up in a iffy with the Farmall pulling the rack wagon and hay loader; and you can convert your loose hay into easily handled, marketable bales by belling up the Farmall to a hay press.

all of these fast, modern having operations can be done with the Farmall and the McCormick-Deering Hay Tools we sell. They save valuable man labor at a season when every minute is worth real money. They give you the profit edge on the man who chings to older methods. Let us tell you more about the new machines and methods we have to offer you.

Eyes Tested and Glasses Fitted Campbellsport, Wisconsin New Machine Materially Lowers Expense of Cutting and Threshing.

(Prepared by the United States Depart-

Harvesting costs are reduced so materially by the use of the combined harvester-thresher, that this machine is rapidly replacing other harvesting machinery in the Great plains east of the Rocky mountains, according to a study just completed by the United States Department of Agriculture in co-operation with the Texas, Oklahoma, Nebraska and Montana agricultural colleges. The advantages of this machine are in the lower cost of cutting and threshing grain, reduction in labor requirements and in shortening the harvesting and threshing periods.

East of the Rocky mountains a type of combine is in use which is considerably smaller than the kind formerly seen in California and in the Northwest states. Most of the new machines have a 15 or 16-foot cut, baving auxiliary engines, and are drawn by tractors.

Reduces Amount of Labor.

Eight-foot combines harvested 275 acres of grain on the average, and men, not including grain haulers, der shelter, Similar machines having a power drive from the tractor are sometimes operated by one man. It is estimated Plan for Driving Nine that the combine reduces the amount of labor necessary for harvesting and threshing in the Great plains from about 3.6 man hours per acre for cutting with the binder and threshing with a stationary machine to about

0.75 man hours per acre. Operators of combines estimate the life of the machine to be about eight years. Their first cost ranges from about \$1,000 for small machines to \$2.40 for the larger sizes. Extended use of the machine during the harvesting season is essential to a low harvesting cost per acre. When the farmer has only a small acreage to cut, the investment and replacement charges of a combine may be too high.

To Make Combine Profitable.

In order to make the combine a than ordinarily cut with one binder. Harvesting with the combine, says the department, is not cheaper than with the binder and thresher unless 100 or more acres are available for In Planting Young Trees cutting. There must be 150 or more acres available for cutting before costs with the combine fall below costs with a header and stationary account only the direct cash expenses the necessary replacement charges for the machines. The minimum acreage for more economical harvesting depends somewhat on the size of by a downward thrust of his heel. combine used.

Farmers in the Great plains allow the combine than with other ma- ling.

chines. Tests made show that properly adjusted combines separate grain as efficiently as many stationary threshers. Losses due to heads left on the ground in fields on which observations were made averaged 2.6 per cent of the total yield for the combine, 3.3 per cent for the header, and 6.1 per cent for the binder. A condensed report of the survey is colltained in a preliminary report which may be obtained upon application to the United States Department of Agriculture, Washington, D. C.

Farm Manure Is Subject

to Tremendous Losses

Farm manure is subject to tremendous losses from leaching and fermentation if it is improperly handled. If piled in loose heaps where it is exposed to the rain, a large part of the nitrogen and more than half of the potash will leach away. Also, under such conditions, the manure ferments rapidly, with the result that still more of the nitrogen escapes in the form of ammonia. If the manure cannot be hauled directly to the fields as produced, it should be kept under shelter, and in a moist compact condition. An excellent plan is to have a manure shed where the manure is placed when 16 foot machines averaged 682 acres it is taken out of the stable. Calves last season. Except where the grain and other stock should be allowed acwas very heavy, the yield per acre cess to this shed, and in this way the bad no appreciable effect on the rate manure is kept thoroughly packed. of cutting. The minimum crew for The least loss will occur when the maa 15-foot or 16-foot combine is two nure is kept moist, compact, and un-

INOCULATION IS OF GREATEST VALUE TO THE SOY BEAN CROP

Furnishes Bacteria Nodules inoculated and nodules form in abunon Roots of the Plant.

One of the greatest values of the soy bean crop will be missed if those who plant soys fall to inoculate the seed, says K. G. Harman of the Missouri College of Agriculture. Inoculation furnishes the bacteria that form nodules on the roots of the soy bean and take nitrogen out of the nodules on the roots. air. This is important because it furnishes a nitrogen supply for the plant and also makes it possible for ing so heavily on the soil for this ele-

a corn or wheat crop. When they are 25 cents a very profitable one,

dance on the roots 40 pounds of this held his own whenever called upon to 60 is taken from the air and 20 from the soil. Nitrogen sells on the fertilizer market at 30 cents a pound Inoculation then saves the soil \$12 worth of nitrogen for each ton of growth.

Another advantage of using inoculation is that on poor soils the soy beans will make much better growth where there is a good formation of

inoculation may be secured from the soils department of the Missourl College of Agriculture at Columbia the soy bean to grow without draw- at 25 cents for enough inoculation to treat one bushel of seed. First Freak Occurrence

of 1927 Baseball Season None of the Atlanta Crackers lay any claims to mathematical ability and for that reason none of them has attempted to explain one of the season's first escapes from Pandora's box of baseball freaks.

It happened thuswise. Bill Calkins, the outfielder, was at bat with Alvarez. All this power makes it possible for the Cuban twirler, facing him, Walter Gilbert was at third, where he is supposed to be.

Calkins lambasted a liner through three teams is a new one worked out the box with considerable gusto. Althis spring by O. O. Waggener, of the varez apparently elected to let it hit draw chains are used, one on each spheroid smacked the Cubanola pitch-

DETROIT NEVER FINISHED LAST

Each Other Team in American League Been in Cellar.

None of the teams representing Detroit in the American league in the last 27 years has finished in the cel- than 30,000 individuals in the various lar. There are no other clubs in the history of the circuit that escaped hitting the lower regions at least once. Chicago White Sox tripped along for 24 years before one of its teams landed in last place. The lot fell to

the team of 1924. Cleveland club slipped down only there until the finish of the season. It there since and are not particularly stuck on going back.

the cellar, while St. Louis Browns hit the last rung four times-1905, 1910, day.-Wall Street Journal. 1911, 1913. Since then the club has steered clear of that place, although finishing on the brink several times.

The Athletics sailed along for 14 years before the club commanded by Connie Mack struck the rocks. Only twice during that 14 years did the club sink below fourth place. Then came the storm. For seven consecutive years the teams of Mack held an ironclad contract on the eighth Athletics of Philadelphia had head-

Manager Connie Mack.

quarters in the lower regions of the American league, It seemed as If they would never give up the lease. Up until 1911, a stretch of 11 years, the Washingtons occupied the lower floor four times; seventh place four ica by Ludlow Griscom of the Ameritimes, and the sixth place twice. Since can Museum of Natural History in 1911 the club has steered clear of New York. One of the most curlous eighth position.

place in six different years. In 1922 the team hit the cellar, It seems to like the atmosphere, for It has been holding out there ever since, save in 1924 when it was crowded into seventh place by the Chicago White

The only club that has never finished in first place in the American league is the St. Louis club.

Connie Muck's club holds a record that is unique. Seven times have the A's captured the rag. Seven times have they crowded out all competitors for the occupancy of the basement.

Says Amateur Baseball

Is Undergoing Change

Baseball is undergoing a reorganization, upon amateur lines, similar to those on which football, tennis, golf and basket ball are organized, Mai. John L. Griffith, commissioner of athletics from the Western conference, said in an address before the American Physical Education association at Des Moines. Major Griffith reviewed the devel-

George Hildebrand, famous American opment of baseball, which in its "early days was played in towns, cities and Joe Boley, Athletics' shortstop, has cross roads throughout America." He neen on the sidelines with a slightly told of the period during which nearly fractured finger. The injury came to every city or town "maintained or atthe former Baltimore star when he tempted to maintain a professional ball club."

"This period is passing," he declared. "The idea that the home boys Three players, Ed Konetchy, Chick would be stimulated by the deeds and Howard and Red Bird, were removed accomplishments of the experts has from the Fort Worth baseball club proven false, because it has been pay roll to reduce the Cat roster to found that the sports, primarily amateur, such as golf, tennis, football, basket ball and track, have been growing more rapidly without the stimulus of paid demonstrators."

Lipton Trophy Races to Be Run at St. Petersburg

The 1927 Lipton trophy races will be held in St. Petersburg, Fla., on Labor day, according to an announcement made by Houston Yacht club members. The annual meeting of the Gulf

Yachting association was held in New Orleans and at that time the race for this year was awarded. A steamer will be chartered from

New Orleans to go to St. Petersburg for the annual Southern sailing classic, The boat will go by way of Pensacola and there it will pick up Pensacola, Bay St. Louis and Mobile members. Several new clubs will be admitted

to the association before the regatta is staged.

Leading Batter Seen the indications are that Detroit,

which has had the leading batter in the American league in 16 of the last 20 seasons that the league has been in action, will again produce a leader this year in Robert R. Fothergill. In 1926 it was Manush who led and in 1925, Hellman, both Detroit players. Cobb won the honors for Detroit from 1907 to 1919, inclusive, with the exception of one season. Fothergill got away to a good start this year and I fans are pulling for him

New York Structure

York Structure
City Under One Roof
THIS WOMA A city within a huilding may be the boast of New York if plans now before the building department are approved. These call for what is known as the Larkin building for West Forty-second street, which is to be 110 stories high and have accommodations for more sultes and offices. Thus the structure would take care of more persons than reside in some of the cities of this country and Europe.

HORN HONKING STIRS DANIELS

Expert Drafts List of Ten Rules for Driving a Car on Sunday.

Ten special rules for the regulation of Sunday automobile traffic, in which the blowing of the horn upon all occasions is stressed, have been compiled by Harry Daniels in Thrift Magazine. Observance of these rules will insure drivers a portion of that highway confection known as traffic jam. Here are the rules:

1. On account of only taking out your car on Sundays, you are entitled to a lot of special privileges. For one thing, you can drive anywhere on the road you please. This entitles you to select your own ditch.

Assistant Drivers. 2. You are allowed as many assistant drivers as the back-seat will hold. provided they all give instructions at once. Don't neglect to blow your

3. Whenever you get around a corner without hitting anything, stick out your left hand.

4. If you happen to run into a tree or fence, go to the nearest policeman and file a complaint. People must learn to be more careful about where they leave their trees and fences standing around outside. Be sure and

5. Take no back talk from any traffic cop. They don't understand the rules and get a good driver all mixed up. If one of them gets too fresh let

him have a drink out of your flask. 6. In case your car starts running backwards by mistake, just let it go till one of the assistant drivers can find a wrench to use on your

7. If you run out of gas, put on a new tire. If the darned engine dies on you, let down your top and tighten up the bolts on your running board. Keep the horn blowing.

8. Whenever you find it is going to be possible for you to crash into another car, notify your assistant drivers at once so they can all be thinking up a lot of pretty names to call the 9. If another driver runs into you,

stop whatever is left of your car and jump out at once so he can knock you down without needless delay. 10. If you find yourself tied up with

a lot of other cars, don't try to get out, but be satisfied just to work yourself around so that nobody can get out. And keep that old horn going.

Hugging Inside Curves Dangerous for Drivers

Perhaps it is because every one knows that a straight line is the shortest distance between two points that a majority of motorists hug the inside of a curve when climbing a hill. It is well to remember in such a case that the shortest way is not always the best.

In hill climbing the outside of a curve, while longer, always is easier on the car than the inside. It simply is a practical application of the law of mechanical advantage. To climb up the longer way the engine is forced to make more revolutions, and therefore it is capable of lifting the machine that much easier.

Regardless of the path the driver takes, the engine is required to lift the car the same distance. Taking the outside is a matter of spreading out the work over a greater number or revolutions.

Operation of Piston at High Speed Is Big Feat

At a speed of 60 miles an hour, the pistons of the ordinary automobile engine are traveling at a rate of 30 miles every 60 minutes. Yet, they reverse their direction about every five inches of the way.

That this process can be continued without audible knocking of the pistons against the cylinder walls or banging of the connecting rod hearings is one of the greatest single achievements of modern engineering. | moving rattles.

First Rule to Remember in Removing Mud Stains

The first rule to remember in taking the mud stains off a car is that they should be taken off at the first possible moment after the mud has fastened itself upon the car. Every minute of delay means so much more difficulty and so much more likelihood of a permanent spot. The reason for this is that mud will fasten itself very securely to the finishing coat of the car as it dries. When it becomes thoroughly dry and the mud is removed it simply takes the varnish along with it and leaves an unprotected spot of color on the surface. Very often this spot will not show for a short time, but as soon as it is exposed to a

little wear or hard weather it will be-

come visible.

Water is the only cure for hard mud, but water must even be used judiciously or it will be of as much barm as good. The garden hose is called into use by the suburbanite in cleaning the car. On this bose there is a nozzle which is adjustable to throw anything from a spray down to a thin, hard stream that has force enough to carry it 20 or 30 feet. This nozzle should be arranged to allow the water to come forth in a gentle stream so that when it strikes the body it only has a flowing or washing action without the suggestion of impact. This will dissolve the mud, removing it grain by grain.

Test Relative Comfort

While in Automobile In tests of relative comfort in motoring the United States bureau of standards in Washington has developed a new instrument, an accelerometer, which records the degree of comfort or discomfort minutely. The instrument was devised by Dr. H. C. Dickinson, chief of the division of

Testing Comfort of Auto.

heat and power. The device measures the acceleration of automobile seats caused by changes in speed and from vertical motion. Through its use it is hoped seats will be devised which will be much more comfortable. The photograph shows D. C. Ritchie testing the device.

AUTOMOBILE ITEMS

The United States makes 786 different models of motor vehicles.

If a man has enough relatives, he can easily go broke running a filling

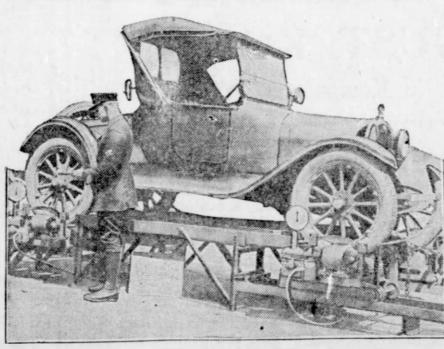

The woman driver who gave us more than half the road the other day was in a ditch.

The world's champion idiot is the man who honks his horn to make the automatic traffic light give him the

Another need is for an automobile that won't get all scratched up when it tries conclusions with a locomotive.

Tightening the body bolts of an automobile is not the hard job it sounds if the owner really is intent upon re-

NOVEL DEVICE TESTS EACH WHEEL BRAKE

The first public demonstration of a new automobile brake-testing device has shown that 98 per cent of Washington's (D. C.) machines are at fault as far as perfect equalization of brakes is concerned. The machine to be tested is run on a platform, each wheel resting on a set of rollers which revolve at a speed which makes their pull correspond to the ordinary road pull. A separate guage for each brake tells just how efficient each brake is.

Battery Needs Attention

Charging and discharging generates battery heat, which in turn causes evaporation of water. Therefore, when evaporation is greater this will require weekly attention. Unscrew the cap f each cell and pour in distilled water. Distilled water is necessary because it co tains no acid or impurities to start counter action. The solation should be about half an inch ful than a locomotive. This statistic, above the tons of the plates. Be careful not to sefill.

Electricity is wonderful. With it you can time a 203-mile-an-hour automobile you can't even see.

About the nearest thing to being in five places at once would be driving a car that makes 203 miles an hour.

Engineers have determined that the modern automobile, in proportion to its weight, is eight times more powerso far, has not been unusually dem onstrable at railroad crossings.

ANSWERED:

three vital questions you have asked about used car allowances

1 "What is my present car worth?"

Answer: Your used car has only one fundamental basis of value: that is what the dealer who accepts it in trade can get for it in the used car market.

2 "Why should dealers in different makes of cars offer me allowances that differ materially?"

> Answer: Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.

3 "Is it true that the largest allowance offered means the best deal for me?"

> Answer: The largest allowance is not necessarily the best deal for you. Sometimes it is; sometimes it is not. An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its

First judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car. Remember that after all you are making a purchase, not a sale.

Here's three-day extra vacation -where you going to drive? Roads are great fishing and bathing dandy. Let's go!

But-wait! What's the use of counting on a good time if your friends have h stand at the side of the road while you get all warmed up and dirty changing

The other cars will go buzzing by and your trip will be ruined if you have tin trouble. And the best way to insure a fast ride with no delays is to—

See That Your Tires Are Right!

Come over to this Goodyear Service Station and let us look over your tire Perhaps you ve been putting off buying a new tire or two-or a good span

This three-day sale of Goodyear Tires gives you a chance to enjoy a glorious 4th and chase away tire worries for the rest of the summer.

All brand new Goodyear "firsts," with a tire at the price you want to pay-Goodyear All-Weather Tread Cords, made with Supertwist, for the man who wants the best and Goodyear-built Pathfinders for the man who wants the best tire a low price will buy.

Play safe! Buy sanely! Goodyears cost no more!

SWAP YOUR OLD TIRES FOR **NEW GOODYEARS**

Think of it! We'll take off your old, worn tires and put on stout, brand-new Goodyears that are fresh from the factory and make you a fair allowance for your old tires! You can have one, two, three, four, five-yes six! Why not do it? You don't wait until your car is ready for the junk pile before you trade it in do you? Why not get something for your old tires and be all through with worry for months and months to come? With heavy traffic on the highways you really ought to have good, thick treads on your tires for safety's sake. Plav safe! Be sane! Swap your old tires today, and play safe.

Why jump every time you hear a fire-cracker? Let the other fellow have the blowouts that will add to the celebration.

There isn't a doubt about Goodyear Tires! More people ride on Goodvear Tires than on any other kind and that means you can trust them. Why take a chance on "unknowns?"

Big Fourth of July Shoe Sale | The Most Efficient of All Machines

The good dairy cow is the most efficient of all machines. She takes the grasses of the pasture, fence corners and road-side-the roughage from the fields. which would otherwise be wasted, and with the help of a little grain, converts these raw materials into a high priced product---milk. Tais machine is werking for your interests twenty-four hours a day. She does all this and more. With her the fields may be maintained in their original fertility, and if low in fertility, may be brought back to a high state of production. Equip your farms with the best of these machines and prosper. Join a cow testing association for reliable information as to their productiveness. Why guess at the matter when through a cow testing association facts and figures may be obtained that will enable you to put your herd on a high production basis. Why keep unprofitable cows in your herd?
