

Doings at Our State Capital

Madison—Increased income taxes and added strength to administration features of the income tax law are provided in the bill of Senator William L. Smith, Neillsville, which was passed 58 to 18 by the Wisconsin assembly. The bill previously passed the senate 18 to 8.

Opponents of the measure pointed out that the tax is increased from 50 to 100 percent on incomes between \$2,500 and \$5,000, basing these figures on the tax of a married man with three children.

Proponents of the bill admitted the increases, but declared that percentages were confusing when used to show the increases under the bill and pointing out that when expressed in dollars these figures showed that the man of large means would pay the greater amount of the increase.

The assembly concurred in and sent to the governor two park bills, one appropriating \$350,000 to buy the Northern Lakes park in Rusk and Price counties, the other appropriating \$200,000 to purchase the Seven Pines tract in Polk county. These two parks are to be bought from the proceeds of a surtax.

A tax of 5 cents per pound on all oleomargarine sold in Wisconsin, proposed by Assemblyman Earl D. Hall, Tunnel City, was turned down by a vote of 43 to 23 in the lower house.

Appropriations for establishment or improvement of three state fish hatcheries were approved by Gov. Fred H. Zimmerman.

One bill which he signed provides for appropriation of \$3,000 to establish a hatchery in or near Fort Atkinson.

Two others also endorsed by him will apply \$4,000 for improvement of the Eau Claire hatchery and \$7,000 for similar purposes at the Westfield hatchery the next year.

The state assembly concurred in an appropriation of \$10,000 for immediate construction of a dam in the Rock river to flood Horton marsh. The flooding of the marsh to make it a game refuge was provided in a bill previously passed.

The senate passed an assembly bill providing for a \$10,000 appropriation with which to send a Wisconsin band and drum corps to the American Legion convention in Paris.

Declaring the Duncan bill exempting 2.75 per cent beer from penalties of the Sevelson law is invalid and that it attempts by indirection to nullify a law of the United States and that "the only thing it can accomplish is to bring odium, ridicule and disgrace to the fair name of our beloved state," Gov. Zimmerman returned that measure to the legislature without his approval.

The veto message runs several thousand words, indicating the executive felt a lengthy explanation necessary.

News of Badger State

Cashion—Thieves raided the farm of Joe Degenhardt, near here, a few days ago and made off with 133 young chickens.

Oshkosh—Initial steps have been taken to finance the proposed airport for this city by formation of a corporation, the Oshkosh Airport, Inc.

Boscobel—The Boscobel fair will be held Aug. 9 to 12. A new grandstand has been built, seating 2,000. There is also a new band stand and judges' stand.

Ashland—With 3,000 crates of strawberries already shipped from the Bayfield peninsula and the Moquah district, it is expected that this year's crop will exceed 6,000 crates.

Berlin—Frequent complaints that automobile parkers and peddlers were making nightly use of the sequestered spaces of an alley in the center of this city's business district has resulted in the placing of gates at both entrances to the thoroughfare.

La Crosse—Struck by lightning during a severe electrical storm, St. Bridget's Catholic church, at Ettrick, north of here, was destroyed by fire. None of the altar furnishings or other contents was saved. Payment on the church, erected in 1917, was completed just a week ago.

Madison—The Gisholt Machine Co. is working overtime to produce a quantity of balancing machines to be used by the Ford Motor Co. in its Detroit factories in the manufacture of the new model Ford automobiles. The machines being made will be used for balancing crankshafts in automobiles.

Two Rivers—Hay fever sufferers are again coming to Two Rivers in large numbers this year. Many have come to the camp at Neshota park and others nearby fill the hotels. Most of the visitors are repeatees. The location of Two Rivers, on a point five miles out in Lake Michigan, produces the climatic conditions which are ideal for hay fever sufferers.

Fond du Lac—Six hours after the city commission had granted a soft drink license to James Vrees, state prohibition agents and sheriff's officers raided the Rex hotel here, owned by Ted Surres, and confiscated 29 pint bottles of assorted liquors, mostly moonshine. Vrees has been "barricaded" and holder of the license for a year.

Baraboo—The project for constructing a bridge over the north channel of the Wisconsin river at Lone Rock has been abandoned. The state highway commission reached that decision after the matter had been under discussion since 1924. Sauk county had already voted \$6,750, its share of the cost, but Iowa county refused to make an appropriation, since it did not favor the bridge.

Madison—Summarizing the service rendered by the state's traveling library department, sponsored by the library commission, Miss Harriet C. Long, in charge of the work, has reported that 160,484 volumes had been issued in answer to 27,480 requests during the last year. The totals represent requests from individuals, schools and libraries. The individual requests constituted the greater part of the total, since 24,907 were received.

Tomah—Never having been off her feet nor failing to produce a healthy calf each year, Ideala Korndyke Hengervold H. B. No. 834,652, owned at the county farm, Monroe county, has broken the state record in the advanced registry for Holsteins, by producing 80.35 pounds of butter and 507.9 pounds of milk in seven days, at the age of 10 years. The record also makes her the twenty-sixth highest cow in the United States for that age.

Milwaukee—Market quotations: Butter—Creamery, fresh extras, tubs, 30 1/2c; extra firsts, 28 1/2c. Cheese—Twins, 2 1/2c @ 23c; daisies, 23 1/2c @ 23c; longhorns, 23 1/2c @ 24c; brick, 22 1/2c @ 23c; lamburger, 21 @ 21 1/2c. Eggs—Fresh gathered firsts, 23 1/2c @ 24c. Poultry—Fowls, 16 @ 16c; springers, 24 @ 25c; broilers, 21c; roosters, 16c; turkeys, 18 @ 22c; geese, 14 @ 18c. Potatoes—Wisconsin, 100-lb. sacks, new, \$1.75 @ 2.25. Barley—Choice to fancy, 85 @ 90c; fair to good, 80 @ 85c. Corn—No. 3 yellow, \$1.04 @ 1.05; No. 8 white, \$1.02 @ 1.04. Oats—No. 3 white, 45 @ 48 1/2c. Rye—No. 2, \$1.05 @ 1.05 1/2. Hogs—Fair to best butchers, \$9.50 @ 10.50; fair to good lights, \$9.00 @ 10.00; pigs, \$7.00 @ 8.00. Cattle—Steers, fair to choice, \$8.00 @ 13.00; heifers, \$8.00 @ 9.50; cows, \$5.75 @ 8.00; calves, \$11.50 @ 12.50. Sheep—Spring lambs, good to choice, \$12.50 @ 13.00; fair to good, \$11.00 @ 12.50; ewes, \$3.50 @ 6.50.

Wausau—Steps have been taken by the Wausau Chamber of Commerce to provide a fully-equipped airport. Col. Charles Lindbergh has been invited to visit Wausau and dedicate the field when he comes to Wisconsin in August.

Appleton—A picnic at which the program will be a memorial to Eben E. Rexford, Shiocton poet and author of "Silver Threads Among the Gold," will be held July 29, at Hamlin park, Shiocton, by the Outagamie County Pioneers' association.

Marshfield—Two airplanes of a Marshfield company were smashed and damaged to the extent of \$2,000 when torn from anchorage during a recent storm.

Fennimore—Ben Rebrauer, official tester for the fourth successive year with the Fennimore-Boscobel Cow Testing association, reports 504 cows on test in June and of this number 100 made over 40 pounds butter fat. Mr. Rebrauer favors supplementary grain rations at this time of the year for higher and more profitable production.

GOVERNORS DEMAND RELIEF FOR FARMERS

State Heads Assert Agriculture Is More Important Than Politics.

Mackinac Island, Mich.—At the session of governors of various states held here, the keynote of the program was the lack of aid given the farmers. "The era in which we are living," said Gov. John Hamill of Iowa, "presents a challenge to the men who sense a challenge to the men who sense the people of this nation have placed in positions of responsibility. Either they must do what needs to be done to deal with these critical problems, or they must make way for others who will."

"It is only an ideal that government has nothing to do with the economic interests of groups and classes. The experience of history teaches us that government has everything to do with them. The time calls for men with vision, and there is not the slightest doubt in my mind that men will be found and chosen, capable and willing to grapple with the situation."

Gov. Adian McMullen of Nebraska was no less vigorous in his plea that the farmer be given relief. "The time is past for the farmer to plead for what he should have," he declared. "The time is here for him to demand what is rightfully his. We should challenge the right of any administration and of any party to proceed further in the industrialization of the nation at the expense of agriculture."

"The subject is broader than political parties. And the welfare of agriculture is more to be desired than the welfare of any political organization or of any individual. The cause of the millions of people on the farms is just. They have been patient and long suffering."

"They have waited until every one else has been served. They do not ask for bonuses, or subsidies, or special favors. They do not ask for legislative consideration that has not already been given other industrial units—labor, transportation, banking and industry generally all have their special and particular legislation. They are entitled to the protection they have received, but we insist that agriculture shall be included in the circle."

The Nebraska and Iowa governors made the same constructive plea for the so-called Iowa idea. Mr. McMullen entitled his paper, "The Need of a New National Agricultural Policy," which is probably another way of saying that the government's agricultural policy is unsatisfactory.

Both McMullen and Hamill asked for legislative action that would enable producers in co-operative organizations to stabilize and protect their markets by holding back or diverting crop surpluses through the use of a fund to which every market unit would pay its share.

"That," said Governor McMullen, "was the principle of the surplus control bill that received congressional sanction and encountered executive disapproval last February."

"We do not claim that this legislation in itself constitutes a complete national policy," he continued. "It does offer a constructive nucleus for a program of farm stability. It is a program advanced jointly by the organized farmers of the South, North, and West."

Other speakers dealt with various "problems." After discussing the primary system and the gasoline tax, Gov. Fred Green of Michigan spoke on "the gradual failure and increasing injustice of the general property tax system."

Gov. Bill Grave of Alabama protested in his paper against the federal operation of Muscle Shoals.

Gov. G. H. Dern of Utah protested against the Boulder dam project in the West.

The following governors attended the conference: Graves of Alabama, Martineau of Arkansas, Trumbull of Connecticut, Robinson of Delaware, Martin of Florida, Small of Illinois, Jackson of Indiana, Hamill of Iowa, Paulen of Kansas, Brewster of Maine, Ritchie of Maryland, Green of Michigan, Baker of Missouri, McMullen of Nebraska, Spaulding of New Hampshire, Fisher of Pennsylvania, Richards of South Carolina, Dern of Utah, Weeks of Vermont, Emerson of Wyoming, and Christiansen of Minnesota.

Three other governors were represented by substitutes.

Mrs. P. D. Armour Dead—Chicago.—Mrs. Philip D. Armour, widow of the founder of Armour and company, is dead at her residence, 1200 Lake Shore drive. She had been ill for some months.

Wood Heads Drive on Leprosy—New York.—Gov. Gen. Leonard Wood of the Philippines is taking the leading part in a drive to raise \$2,000,000 in the United States, to be applied in fighting leprosy in all parts of the world.

Abandon Dirigible Flight Plan—Washington.—Secretary of the Navy Wilbur announced that plans for flying the dirigible Los Angeles to Hawaii this summer have been abandoned.

Landis Must Pay Tax Penalty—Chicago.—Former Judge Keneas Mountain Landis, commissioner of baseball, must pay a 50 per cent penalty on his personal property tax for failure to file a schedule. It was disclosed by records of the board of assessors.

\$1,000,000 TRUST FOR BRIDE

"Bud" Stillman.

Grand Mere, Quebec.—Milkmaid Lena Wilson, the Cinderella of the northwestern camp kitchens, became the constructive mistress of a fortune of \$1,000,000 when her Prince Charming, Bud Stillman, is reported to have arranged to create a trust fund giving her half of his millions. This was done on the eve of their marriage at the Stillman hunting lodge at Grand Anse. He has established a trust fund of \$2,500,000, and legal arrangements have been made by which his bride, in case of bankruptcy, will have prior claim to \$1,000,000 over all other creditors.

FARMERS TO MAKE 8 WKS. EUROPEAN TOUR

Federation Bureau Members to Study Marketing.

Indianapolis.—German reforestation, Danish waste land reclamation and Dutch dairying will replace the cathedral at Rheims, castles along the Rhine and Westminster abbey as cardinal sightseeing points on the European tour of American farm bureau federation members, who will sail from New York July 30.

Although the farmers making the tour incidentally will visit the usual points of interest in foreign cities, their excursion is primarily a business mission. The eight weeks will be passed in study of agricultural, marketing and distribution methods.

The tour was arranged by the farm bureau in conjunction with the Department of Agriculture, following a large number of inquiries from farmers of chief points of agricultural interest abroad. Back of the project is understood to be a desire by farm leaders to study at first hand the advanced co-operative marketing methods which have been used for many years in Germany, the Netherlands and Denmark.

European agricultural methods deemed to have a pronounced bearing on improvement of American cultivation standards, all of which will be closely studied, include: Long-term cultivation methods of very old countries.

Great breeding establishments and inspection of historic herds of Jerseys, Guernseys, Alderneys and Herefords.

Soil-building methods that have maintained a high degree of soil fertility and land cultivation for over 2,000 years.

Methods of irrigation (Denmark), of large-scale drainage (Holland), of terracing (Rhine), of reforestation (Germany), of waste land reclamation (Denmark and Germany), of slaughtering, meat packing and egg packing (Denmark), and examples of the most highly perfected landscape gardening in the world (England and France).

American ambassadors and ministers abroad have co-operated with the tour in making available to the pilgrims the experience of leaders of the progressive agricultural and marketing movements of Europe.

Tardieu Warns France Will Not Ratify Debt

Washington.—French rejection of the Berenger-Mellon debt agreement and the initiation of entirely new negotiations is predicted by Andre Tardieu, member of the Poincare cabinet and French high commissioner to the United States during the World war, in an interview appearing in the current issue of Nation's Business, a magazine.

"No French government," asserted M. Tardieu, "will ever take the responsibility of binding France for sixty-two years. Our people would never understand, and our parliament would never approve, the debt agreement he said."

Race Horse Owner Killed—Forsyth, Ohio.—C. W. Chappell, seventy, owner of a large string of race horses at Roseland, Ky., was killed in a cook tent at the track there as he attempted to stop a fight between a negro and a white man.

Plans Plane Model Contest—Washington.—Plans are announced here for a nation-wide airplane model contest under auspices of the American Playground and Recreational association.

Banker Leaves 22 Millions—New York.—A gross estate of \$22,850,815 was left by Henry R. Taylor, capitalist, son of the late Henry A. C. Taylor and grandson of Moses Taylor, president and one of the founders of the National City bank.

Arthur Hamerschlag Dead—New York.—Arthur Arton Hamerschlag, fifty-eight, president of the Carnegie Institute of Technology at Pittsburgh between 1903 and 1922, died at the Roosevelt hospital.

\$310,000,000 OUTLAY FOR FLOOD CONTROL

Secretary of Commerce Hoover Submits Plans to President Coolidge.

Rapid City, S. D.—The need of a special session of congress immediately after November 1 was urged on President Coolidge by Senator Smoot of Utah, chairman of the senate finance committee.

"There are many things which make the calling of a special session desirable," said Senator Smoot.

Rapid City, S. D.—Informed personally by Secretary Hoover, head of the administration's Mississippi relief committee, of pressing conditions caused by inundation of thousands of acres of southern lands, President Coolidge is prepared to give consideration to whether the problem requires an early session of congress.

The President was told by Mr. Hoover that immediate federal aid is necessary to help the flood area reconstruct its levees and rehabilitate its hope, but the secretary added he was convinced the refugees could be taken care of until congress meets in regular session in December.

He expected with economy there would be \$3,000,000 on hand from the Red Cross relief fund on November 1, but declared "it is impossible at this date to determine what the need will be at that date."

In recommending "immediate" federal aid, Secretary Hoover said he had in mind the fact that state legislators were unable to raise enough money to carry on the imperative work of closing broken levees and that local committees would not be in a position financially to meet taxes falling due on levee bonds because little better than half of the flooded acreage had risen from the waters in time for regular spring planting.

The secretary suggested a plan for permanent flood control, including these principles: Higher and wider levees and extension of federal responsibility for the levees on some of the tributaries.

A safety valve upon the levee system by the provision of a spillway to protect New Orleans and southern Louisiana, most probably using the Atchafalaya river for this purpose.

Possible by-pass, or spillway, northward from the Atchafalaya to the Arkansas, possible creation of emergency flood basins and possibly storage facilities in the tributaries.

Mr. Hoover estimated that an appropriation of from \$15,000,000 to \$20,000,000 annually for ten years in addition to the annual present appropriation of \$16,000,000 would not only provide permanent flood control, but would also complete a program of making the Mississippi and its tributaries navigable. This would mean the expenditure of \$310,000,000 to \$360,000,000.

The St. Lawrence river canal project, in Mr. Hoover's opinion, would be completed some time and when it was, it would result in higher prices to the middle western farmers because it would reduce transportation costs on their products, the price of which now is governed, he believed, by the Liverpool quotation, less cost of delivery.

"Lower the cost of delivery," he said, "and you will increase the price the farmer receives."

Mr. Hoover also was confident the Colorado river development plan would be adopted during the next congress. Whether this would be the same as asked for in the Swing-Johnson bill, he said, he could not say, but he declared he was satisfied the states concerned would reach an agreement.

Congressman Crumpacker Ends Life in California

San Francisco.—Maurice E. Crumpacker, representative in congress from Portland, Ore., committed suicide by jumping from the rocks at the foot of Hyde street into San Francisco bay. The congressman died of submersion despite application of a pulmonary as an ambulance was taking him to the Emergency hospital.

Mr. Crumpacker was serving his second term as a Republican from the Third Oregon district. He was forty-one years old and was born at Valparaiso, Ind. His father, Edgar Dean Crumpacker, for years represented the Tenth Indiana district in congress. The son attended Cuver Military academy and University of Michigan and then took a law course at Harvard. He leaves a widow and three sons.

Three Brothers Die in Smash

Gary, Ind.—Three brothers, the sons of William Roy, an automobile dealer, of Fifth and Mount streets, Gary, were killed when the automobile in which they were riding was struck by an eastbound New York Central train in this city.

Ford Taking On Many Men

New York.—Reports reached Wall street that the Ford Motor company is taking on 500 new a week and will continue this policy until the plants are fully manned and running at capacity.

Hail Drifts Four Feet in Iowa

West Union, Iowa.—Hail which recently fell here drifted to a depth of more than four feet. Stock and poultry were killed and many crops ruined.

Woman to Run for Senator

Galveston, Texas.—The Galveston News says Mrs. Minnie Fisher Cunningham of Galveston, secretary of the National Woman's Democratic club, will run for United States senator in 1928.

Spain's Finance Minister Quits

Madrid.—The resignation of Jose Calvo Sotelo, Spanish minister of finance, was announced. His successor has not as yet been selected by Premier Primo de Rivera.

Vetch Is One Legume That Seeds Freely

Let Some of Pods Ripen Before Crop Is Cut.

Vetch is one winter legume that seeds freely and from which a good supply of seed may be obtained at home.

If the vetch is now growing on land where it is wanted again next year, all that is necessary is to let some of the lower seed pods ripen before the crop is cut or turned under for soil improvement. An abundant crop will volunteer next fall.

"But where vetch is growing with oats or rye they may be cut and threshed together and sown just as they come from the threshing," says E. O. Blair, extension agronomist for the North Carolina State College of Agriculture.

"Small quantities may be beaten out where threshers are not available. There is no trouble in sowing rye and vetch together. With oats and vetch it is necessary to keep the mixture stirred or the vetch, being heavier, will settle to the bottom.

"If it is desired to separate the vetch seed from the oats and rye, advantage may be taken of the fact that the vetch seed are round and will roll. Sling a shovelful of mixed seeds across a wide floor and the vetch will roll to the farther edge, while the grain will stop about half way. A long porch will be an excellent place for this work. If boards are set up to keep the seed from rolling off the edge.

"The spiral vetch separator makes use of this principle. In running down the spiral trough, the vetch rolls to the outside edge of the trough, and out through a different spout from the oats or rye. Vetch seed may also be separated with an ordinary seed cleaner, equipped with suitable screens."

The ease with which a supply of vetch seed may be secured at home should make it possible for increased acreages of the crop to be planted next fall, states Mr. Blair. It is an excellent soil improving crop and does not seem to thrive where other vetches do. Mr. Blair says a supply of vetch seed this season.

Time to Introduce New Queen to Bee Colony

It is an easy matter to decide what colonies need new queens, because a new queen bee properly introduced she replaces, states Ray Hutton, bee specialist at the New Jersey agricultural experiment station. This of course does not apply to Italian queens of this year's brood.

Good queens from reliable breeders can be secured for one dollar or more and will in every case give a high return on the investment in price of ownership, monetary return and ease of handling. In a commercial yard this last item is the most important, for labor still remains the largest cost in beekeeping. Failure from bee moth depredations, poisoning, or gassing, is a serious many benefits to be derived from a new queen.

The best time to get a new queen accepted by a colony is at the time a little honey is coming in. In some localities there is a dearth the last part of July and the first part of August. If a queen is to be given, establish six weeks before a killing frost, the first of August is a safe time to make a start. It is better, however, for the average beekeeper to undertake requeening when there is no honey flow, without losing a day or so before, as well as during the attempt.

There are numbers of methods for introducing queens and the selection of the one to be tried must rest with the beekeeper. Queen breeders almost invariably send directions for introduction on the shipping cage.

MILLIONTH REGISTERED JERSEY IS OWNED IN SOUTH CAROLINA

St. Saviour's Blue Fox's Bess, 739799.

The millionth Jersey has been registered by the American Jersey Cattle club, New York. This incident brings to light the story of a South Carolina man who placed his faith in dairying and has been most successful in building up an outstanding pure-bred herd from a very modest beginning.

The "millionth Jersey," St. Saviour's Blue Fox's Bess 739799, is owned by L. E. Wright of Clifton, S. C., who started a Jersey herd in 1921 with the purchase of one pure-bred heifer. From this small start he has built up a fine herd which is attracting much attention in the South, for Mr. Wright has followed along lines which insure constant improvement in both production and type. The original foundation heifer has dropped three heifers and two bull calves, all to the service of very good sires. These three daughters have given Mr. Wright six calves, while one granddaughter has given him two calves, making thirteen animals descended from the heifer purchased in November, 1921. Inspection of the herd shows that each generation is superior to the previous one both in type and also in milk, producing ability.

Mr. Wright presented his little daughter, Sarah, with a great-granddaughter of the foundation heifer, so that she might become a member of the Spartanburg County Jersey Calf club. The heifer calf won first place at the South Carolina state fair, and little Miss Sarah then entered her in the county calf club show where she again won first. In the open classes at the county fair she also took first prize. Another heifer, sold to a calf club by Mr. Wright, was titled at the state fair, second at the calf club show, and first prize in the showing contest.

St. Saviour's Blue Fox's Bess 739799, a young daughter of Mr. Wright's foundation cow, was the millionth Jersey to be registered for 200,000 bulls have been registered as well as 739,799 females.

Whitewash Is Excellent for Use on Implements

The use of white wash is not commonly recognized in connection with the prevention of rust on implements and other metal equipment. Probably few farmers have ever tried whitewashing implements to keep them from rusting, but some with experience say a coat of whitewash in the early winter will be highly effective for this purpose, and if they are under cover a simple mixture of lime and water is sufficient. That which the implements are put into in the spring, the whitewash quickly wears off and causes no trouble.

Using Ground Limestone to Assist Clover Crop

The use of ground limestone where clovers do not grow successfully, the practice of a good farm rotation which includes a clover crop, sufficient natural or artificial drainage and the thorough working of the soil to control weeds are essential to profitable crop production. The response in crop yields which will attend the judicious application of manure and commercial fertilizers will depend to a large extent upon the attention that is given to those other essential factors which are also largely under control of the farmer.

Harvesting Apples

Harvesting of apples should be carried on according to a definite system. They should be picked from the tree by hand and placed in a padded basket or a sack and should be carefully handled at all times. Bruised fruit is fit only to go into the cull pile and will rot only a short time. Care in harvesting is one of the most profitable of all orchard operations.

Agricultural Items

Plant a tree. Put in a short row of carrots every two weeks. Low-grade fertilizers mean low yield crops. Mow pastures to destroy bitternuts and wild onions. High-priced land and ordinary pasture grasses do not cooperate for success. A silo saves a third of the value of the corn crop, which is otherwise largely wasted. It's a wise farmer who encourages his boy to take up club work—he'll be wiser still afterward. For buy sow soy beans at the rate of two bushels per acre with a grain drill on a well prepared seed bed.

CHAPTER VI—Continued

"I did not want to influence you. I wanted you to decide for yourself." She listened to Malet's story and her father's.

"I shall be a great help to you," she said cheerfully when she was in possession of what facts they could give her. "A woman's brains are always useful. You see, she so often jumps to the right conclusions when you men are floundering along in doubt."

"We haven't one idea worth discussing," Malet admitted. "I noticed that," she laughed. "I think I see exactly how it can be done."

CHAPTER VII

Paul Raxon knew very well that his sudden success would make enemies for him among the established powers in Wall Street. But he also knew that he was not to be brought low by any combination against him so long as he kept his head and resisted speculation.

"This is absolutely wrong," the girl asserted. "You are not to be brought low by any combination against him so long as he keeps his head and resisted speculation."

"What does it all mean?" the girl whispered. There was no doubting the friendship, almost the affection, with which the other men regarded Paul Raxon.

"What does it all mean?" the girl whispered. There was no doubting the friendship, almost the affection, with which the other men regarded Paul Raxon.

"What does it all mean?" the girl whispered. There was no doubting the friendship, almost the affection, with which the other men regarded Paul Raxon.

Small Tribe Resists Domination of Russia

Though technically a part of the old Roman empire under the rule of the czars, the Russians in reality never conquered Svanetia, which has been occupied by an isolated mountain tribe occupying a small area in the heart of the Caucasus mountains.

Twain Revision Not Good

Mark Twain's first draft of "Tom Sawyer," with his letter to his publisher, is still preserved and shows that the humorist made many alterations before submitting the story.

"I wish I understood you better," she said a trifle wistfully. She had not been the only woman to say that. "I'm glad you don't," he said cryptically; "that prevents your giving me away. I'm one of those men whose peculiar joy it is to play a lone hand. If you share secrets, they are only fifty per cent your own."

"I wish I understood you better," she said a trifle wistfully. She had not been the only woman to say that. "I'm glad you don't," he said cryptically; "that prevents your giving me away. I'm one of those men whose peculiar joy it is to play a lone hand. If you share secrets, they are only fifty per cent your own."

Training Teachers

The first genuine effort for the professional training of teachers undertaken in the world was undoubtedly by Jean Baptiste de la Salle at Helms in 1681. At the beginning of the Nineteenth century the development of institutions to train teachers took on a new life and the Prussian system of normal schools was firmly established.

Unclaimed Riches

Hundreds of thousands of dollars in cash are taken annually from the mails in the United States where letters have been improperly addressed and delivery is impossible. One post office alone took \$125,000 in cash from such letters, although in this instance \$25,000 of it was returned to the sender.

Appetite of Kangaroo

One kangaroo will eat as much grass daily as six sheep.

PASTED FEATHER SKULLCAPS AND HANDPAINTED FROCKS

AND now it's the feather toque or skullcap, more properly named, which is the newest star in the millinery firmament. They are nothing short of a midsummer sensation, these pasted feather caps, coming in so unexpectedly just as a fashionable clientele had been converted to the wearing of brims of the wildest.

felt or straw close-fitting hat is not as becoming as you wish it were, just add one of the new shaving brush feather trims and note its transforming effect.

Some New Tips in Millinery.

picturesque. Catch a fleeting glimpse of one of these new pastel feather toques as worn with fluttering garden party frocks of flowery print and—well it's a woman's privilege to change her mind. As the elite in Paris wears the pastel pasted feather skullcap, it is always in tones to match the frock.

There's another number on the mid-summer millinery program which is eliciting much favor. It is the Agnes-toque of white violets—so called because of the artist modiste who created it. The moment you look at it as shown in this picture you will not doubt be saying "It's lovely." And so it is; perfectly adorable—made more so because of the huge cluster of matching violets which are always worn with it.

This white violet chapeau lends itself beautifully to the season's all-white ensembles which are so def-

center figure in this picture, is hand painted, showing a nautical scene of a proud ship sailing over some very blue waves—all this in the name of fashion.

It is really quite exciting the way white sails speed over wild waves pictured with paint and brush, across the ends of one's scarf, or perhaps upon the front of one's blouse, or on one's necktie or kerchief square for the neck. If a tennis enthusiast, it will be an alert breeze posing a racket in mid-air which adorns her summer blouse, or a golf player in action, if such be the event.

Considering the vogue for hand painted apparel, it behooves the artist, either amateur or otherwise, to lose no time in getting out palette and brush preparatory to taking up the fascinating pastime of embellishing frock, blouse, smock, coolie coat, hat and also parasol with wonderful birds of para-

Latest Whim of the Mode.

diety representative of the present season's fashions. Speaking of the modish new feather turbans, as shown at the top in this picture, they apparently are the prologue to a coming vogue for feathery millinery. Even now flat feather motifs are appearing on straw and felt hats.

Then, too, scores of little snug-fitting hats have their contour diversified by conspicuous feather side-trims of the shaving brush type. Women always like this type of trimming, for not only does it "carry style" in the truest sense of the word, but it is very flattering to the wearer. If your

New Colors

"Mezzo-tint harmonies" is what the new colorists are called. Pinks tint into soft creams, orchids into blues, greens into tea-rose fellows and so on. Chiffons, georgettes and velvets usually exemplify the new shades.

Tulle Dance Frocks

Tulle frocks in pastel shades and in black are much worn by younger women. They are charming dance frocks and are usually made with tight waists and full ruffled skirts.

Prints Plaited for Sports Skirts

An example of the smartness and charm of the new modes for summer is seen in a costume which has a finely plaited skirt of blue-flowered silk and a white sweater with a border of blue stripes. There is also a handkerchief scarf of the printed silk.

Tailored Chiffon

The new chiffon dresses are exquisitely tailored, with all the little touches that used to belong to heavy materials.

Gothic-Roof Dairy Barn Will House Good-Sized Herd and Their Feed

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

This gothic-roof dairy barn will house 40 milk cows, their calves and the herd bull. It is attractive in appearance, has plenty of mow space to hold the roughage for the animals and a silo for the fresh winter feed, and is equipped so that the herd may be handled economically.

The building is 36 feet wide, a size that permits two rows of stanchions, facing in, a driveway through the center of the building and litter alleys at the rear of the stalls. Windows for the admission of sunlight to the gutters are provided to help keep the stable floor sanitary.

It is the equipment, however, that takes away a great deal of the work of caring for a dairy herd and cuts the cost of man labor. The stall partitions are of steel, which are more easily kept clean, while the floor is of concrete, with a gutter at the rear pitched to a drain to allow all the stable to be hosed out. At each stall-head there is a drinking fountain to supply the animals with fresh water, and a system of ventilation keeps the air in the stable fresh, without drafts.

Inspect Your Fireplace and Flue Construction

Defective fireplace and flue construction is responsible for more dwelling fires than any other cause. The owner who builds is particularly at the mercy of the contractor in this feature of the structure. A dishonest builder can easily disguise his fraud and make the work appear safe if perfect, when in reality a fatal defect may exist.

Carelessness and sometimes ignorance also enter into the causes of fire through faults in chimney construction. Wooden beams ends are allowed to enter the flue or rest so near the heated bricks that charring and eventually ignition takes place. Inferior mortar may be used. Only one course of brick, where there should be two, may be employed. Spaces between bricks and mortar may be left for flames to pass through. Of course the natural remedies for these hazards are competent contractors and careful inspection during erection and after completion. By being forewarned the beginner may guard against such dangers.

Linoleum Can Easily Be Painted Like Wood

Linoleum floors are generally subject to great wear and tear and for this reason it is often a problem to keep them fresh and attractive. But linoleum (except the kind that has originally been "waxed" by the manufacturer) can be successfully painted and in this way given new life and color. If varnish is applied after the paint is dry the finish will be even better. Varnish is equally valuable for new linoleum, as it always protects the surface and simplifies cleaning.

Grain of Wood Helps to Obtain Fine Finish

Because the grain of the wood is not equally receptive to colored filler, certain parts retain more of it than others; it is in this way that the

Use of Good Mechanics and Materials Urged

The home builder of today is confronted with many problems, not the least of which is the selection of mechanics for the various lines of work involved in the construction of the house. Good workmanship is as important as good materials, for good materials, if not handled by competent workmen, would give a job only half done.

Good workmen using poor materials would be a better combination than poor workmen using good materials, although either would prove an unsatisfactory and expensive investment. The work of the mechanic is constantly in evidence after completion, especially as regards woodwork, plaster and paint. If the surface does not retain its original appearance, additional and unwarranted expense begins in the shape of repairs.

Do Not Varnish Over Wax

Probably no class of work on a house requires a higher grade of materials and more skilled workmanship than plastering. Concealed behind

most interesting effects are obtained. Handsome and rich are the color-stippled finishes for living-room woodwork. After the work has been brought up to a smooth surface of desired ground color (in case of new wood at least three coats are required) then a thin glaze coat of contrasting color is applied, which is stippled with a large stencil brush. The brush should be kept fairly clean and dry by frequent wiping. Good color combinations are light buff ground with olive-green glaze, Venetian red ground with mahogany glaze, white ground with orange glaze, ivory ground with raw sienna glaze.

Striping Beautifies One-Tone Finishes

Striping gives an individual touch of beauty to the one-tone wall. It supplies a decorative note which makes a finish distinctly different from the usual plain wall finish, while preserving the dignity of the one-tone effect. Because wall treatments of this type are homelike and attractive, they are often of unusual importance in selling and renting property where women are concerned.

Half of Homes Have Antiquated Fixtures

A committee of engineers has made a recent survey of electrical wiring in this country to determine how well equipped homes are to make use of electricity. It has reported that more than half the houses that are already wired are using antiquated fixtures, many of them need rewiring and practically every one of them has too few electric outlets to permit the occupants to get the full benefit of the electricity they buy.

Insulate Pipes

Furnace and pipes should be insulated. Cover them with cellular asbestos. Sheet asbestos is unsatisfactory, loses more heat than bright metal, as extensive engineering tests have proved.

EUREKA!!

No wonder this venerable old party is whooping for joy. He's four punctures and six blow-outs behind the money in a still hunt for tire bargains and here—right before his eyes—is a tire that guarantees what the others promised. It's a Pathfinder. Built by Goodyear for folks who want the best tire they can get for a minimum cash outlay.

Kewaskum, Wis.

—Over two hundred friends and relatives of Mr. and Mrs. Mike Braun of Wabeno tendered them a surprise party at a hall there last week Friday evening, on the occasion of their 25th wedding anniversary. Congratulations to the happy couple.

—The members of the Boltonville Fire Department will sponsor a dance at the M. W. A. Hall, Boltonville on Sunday evening, July 31. Music will be furnished by Andy's Wisconsin Five. All are cordially invited to attend.

ST. MICHAELS

Mrs. Bandle spent Wednesday with Mrs. Margaret Junk.
George Schlosser spent Monday at the John Roden home.
Haying is well under way and harvesting has begun in this locality.
Edwin Ullrichson and children of Milwaukee spent the week-end at the Louis Habeck home.
Mr. and Mrs. A. Roden, Mr. and Mrs. John Roden and children spent Sunday with relatives and friends at Chicago.

In last Thursday's Sentinel among the Waukegan marriage licenses, we noticed the marriage of "Shorty" Garber of Kewaskum and Miss Martha Geier from here.
Math Herriges, Math. Staehler and Jake Theusch returned from a week's motor trip through the northern part of the state, their destination had been Canada but this trip they had to abandon because of the flooded condition of the roads.

During the severe electrical storm which passed over this section last Thursday afternoon at four o'clock, lightning struck a telephone pole several rods from John Roden's residence snapping the wire from the pole near the house. It followed the line across the porch splintering a screen door through which the wire passed into the house and killed a dog who had sought refuge from the storm on the corner of the porch leaning against the screen door.

BOLTONVILLE

Iva Woog is spending some time with relatives at Kaukauna.

A grand Firemen's dance will be held in the M. W. A. Hall Sunday evening.

Mr. and Mrs. Herman Voltz were business callers at West Bend Wednesday.

Mr. and Mrs. Clifford Stautz and son of Batavia spent Sunday with the Chas. Stautz family.

Chas. Stautz held a shingling bee on Thursday by having a new roof put on his residence.

Mr. and Mrs. J. Emley and daughter of Batavia spent Friday evening with the Frank Oettinger family.

The play "The Winning of Joy", given here on Friday evening was quite well attended and greatly enjoyed.

Mr. and Mrs. E. J. Frohman, Mr. and Mrs. Max Grubbe and Lavern Eisentraut spent Wednesday near Beechwood.

Mr. and Mrs. Chas. Eisentraut and children spent Sunday at West Bend, the guests of the Harvey Albright family.

Mr. and Mrs. Walter Liepert and children and Mr. and Mrs. Otto Liepert spent Sunday with the Herman Staeger family.

Mr. and Mrs. Art. Rohde, Mr. and Mrs. Erwin Rohde and daughters spent Sunday with the O. Marshman and Chas. Eisentraut families.

Oscar Marshman accompanied his cousins the Chas. Weber family of Whitefish Bay on a trip to Plainville, Minn., last Wednesday to visit relatives. He is expected back by the end of the week.

FOUR CORNERS

Miss Irene Koch spent Monday at Barton.

Miss Leona Wunder called at the Alb. Butzke home Friday.

Mr. and Mrs. Roy Ours and family were Oshkosh callers Sunday.

Miss Elizabeth Weasler returned home from Milwaukee Saturday.

Fred Leitzke is spending a few days at the Fred Ludwig home.

Mr. and Mrs. Wm. Klabuhn spent Saturday and Sunday at Plymouth.

Miss Lena Weasler visited from Thursday until Monday at the home of her parents.

Mr. and Mrs. Peter Berres and Mr. and Mrs. Irvin Dieringer spent Sunday at Holy Hill.

Mr. and Mrs. Vernon Halverson and son of Barton spent Sunday at the Aug. Koch home.

Mr. and Mrs. M. Weasler and daughter Lena spent Friday evening with Mr. and Mrs. Frank Bowen and family.

Mrs. Charles Schultz and son Elton and Althea Schultz of Cascade were Sunday callers at Fort Atkinson with relatives.

Mr. and Mrs. Charles Schultz in company with Mr. and Mrs. Arnold Miske spent one day last week with Mr. and Mrs. Ed. Schultz at Van Dyne.

Mr. and Mrs. John Fischang and Mr. and Mrs. John Weasler of Fredonia, Mr. and Mrs. Domenick Goshay of West Bend, Mrs. Mary Furlong and daughter of here, Mike Schick of Fond du Lac, Anton Schick and Anthony Weasler of Milwaukee, Mr. and Mrs. Wm. Klabuhn and family, Mr. and Mrs. Henry Ketter and family, Mr. and Mrs. Robt. Buettner and Pete Ketter, Alvin and Clarence Butzke, Mr. and Mrs. Wm. Odekirk and Alma Koch spent Sunday evening with Mr. and Mrs. M. Weasler. The occasion being Mrs. Weasler's 44th birthday anniversary. At 11 o'clock a plate supper was served by Misses Lena Weasler and Clara Klabuhn, after which they all departed for their homes wishing Mrs. Weasler many more happy birthdays to come.

—Martin Schmidt, who has been confined to the Kewaskum Hospital with a bad case of blood poisoning for the past two weeks is recovering and expects to return to his home in the town of Kewaskum next week.

WAYNE CENTER

Mr. and Mrs. Rudy Kullman spent Sunday at Long Lake.

Mrs. Jac. Hawig visited Friday evening with Mrs. Sam Hawig.

Mrs. Oscar Bachman visited Thursday evening with Mrs. Rudy Kullman. Miss Alice Becker of Milwaukee visited Sunday at the Henry Schmidt home.

Miss Ruth Petri of Milwaukee spent the week-end with Ralph Petri and family.

Agnes Borchert is spending a week's vacation with relatives and friends at Milwaukee.

Miss Elizabeth Kudek of Milwaukee visited Saturday with Wendel Petri and family.

Wm. Foerster Sr., and son William Jr., were business callers at Juneau Wednesday.

Alfred Bruhn of Ohio is spending his summer vacation at the Herman Bruhn home here.

Mr. and Mrs. John Braun and daughter Mabel were Allenton callers Wednesday evening.

Miss Alvina Werner of Milwaukee spent the latter part of the week at the John Werner home.

Mr. and Mrs. John Hawig and daughter Rose of Milwaukee spent over Sunday with relatives here.

Mr. and Mrs. Bill Eberle and daughter Violet and Mrs. John Guenther called on Phil. Arnet and sister Friday evening.

Mr. and Mrs. Wendel Petri and Miss Elizabeth Kudek of Milwaukee and Arnold Amerling spent Sunday at Holy Hill.

Mr. and Mrs. Otto Westenberger of West Bend and Mr. and Mrs. Ralph Petri spent Sunday at Long Lake and Fond du Lac.

Mr. and Mrs. Louis Foerster and children of Kewaskum were guests of Mr. and Mrs. Art. Schmidt and family Sunday evening.

Wm. Foerster Sr., and son Washington and Henry Gritsmacher and son Hilbert transacted business at Appleton Thursday.

Mr. and Mrs. Joe Schlosser and Miss Mona Foerster of Milwaukee visited Saturday and Sunday with Wm. Foerster and family.

Mr. and Mrs. Basil Berger and family who spent some time with Mr. and Mrs. Rudy Kullman, left for their home at Chicago Thursday.

Mr. and Mrs. Rudy Miske motored to Marinette, Wis. and Iron Mountain, Mich., Friday. They returned on Monday and were accompanied by Mr. and Mrs. Adolph Schultz of Manitowish.

Mr. and Mrs. Gen. Kling and Mrs. M. Borchmann of Lomira and Mr. and Mrs. Elmer Borchmann of Illinois, Mr. and Mrs. Rudy Hoepner and daughter Arling were visitors at the Arthur Schmidt home Tuesday evening.

FIVE CORNERS

Miss Mary Enders of Wabeno visited several days here with relatives.

Mr. and Mrs. Walter Nigh and family and guests visited at Fond du Lac Saturday.

Mr. and Mrs. Christ Hall and Miss Sophia Schrooten visited at Fond du Lac Sunday.

Herbert Williams of Fond du Lac is visiting several days with Wm. Ferber and family.

Rev. and Mrs. Herman Nolt of Milwaukee visited with the Peter Senn family Monday.

Mr. and Mrs. Ed. Terlinden and family visited with the Ben Steinaecker family Sunday.

Miss Romona Enders of Milwaukee visited with Mr. and Mrs. Walter Nigh and family Sunday.

Miss Sophia Schrooten of Chicago visited a week with Peter Schrooten and Mr. and Mrs. Christ Hall.

Wm. Ferber, Herbert Williams and Wayne Marchert visited with the latter's parents at Rosendale Sunday.

Geo. Schaefer and children Laura, Ruth and Kathleen of Chicago visited two weeks with Joe Harter and sisters.

Mr. and Mrs. Wm. Ferber and Miss Virginia Terlinden visited with Mr. and Mrs. Leo Ward at Madison Tuesday.

The Misses Irene Schartam and Ira Fetzer of Oshkosh were guests of Miss Florence Senn Friday and Saturday.

Mrs. Elizabeth Hall of Campbellsport and Mr. and Mrs. Christ Hall visited with Mr. and Mrs. Fred Martin at West Bend.

Dr. and Mrs. Ulrich Senn and son Roger and Miss Esther Wieting of Chicago visited with Peter Senn and family Sunday.

Mrs. Walter Nigh and children and Perry Nigh and son Lester visited a week with relatives and friends at Wabeno and Eagle River.

Miss Florence Senn returned to her home after spending a few weeks with relatives and friends in Milwaukee, Chicago, Detroit, Buffalo and Niagara Falls.

Mr. and Mrs. Walter Nigh and family spent Sunday at Random Lake. They were accompanied there by Miss Lucena Gessner who visited there two weeks.

Be Ready for Any Condition at Harvest

McCormick and Deering grain binders have long enjoyed a world-wide reputation for substantial construction and ability to stand up and do accurate work year after year. Now you can buy in one machine the best features of both the McCormick and Deering, with the addition of many new improvements.

The McCormick-Deering grain binder is the most substantially built and highest running grain binder on the market. The improvements which enable it to cut grain so successfully and tie bundles with such consistent accuracy, also include features which facilitate adjustments when they are necessary.

Instead of wasting time in trying to make an old binder work another year, instead of risking the loss of grain, better see us now and place your order for a new improved McCormick-Deering binder, so that you will be fully prepared to meet every emergency when harvest time comes.

ALMOST everyone ordering printed matter feels that they want "something different." They sense that to obtain such printing they must have either one or two things—special cuts or type. To outline or specify "just what they want" is a task beyond one inexperienced in the craftsmanship of printing.

When you let us do your printing you get all of this service free of extra charge. We know just which type faces to use to carry your message in the most effective way. In addition to this we have a complete line of cuts to illustrate your message—pictures which will attract readers and make them read.

No matter what kind of printing you want we can do it—deliver the job promptly—and at a price far below what you may pay elsewhere. Try us.

—Mr. and Mrs. Herbert Holtz and son Herbert Jr., and Miss Flora Holtz of Milwaukee spent Sunday with Mr. and Mrs. L. D. Guth.

—Miss Irene Van Epps of Dotyville, Wis., who visited with Mr. and Mrs. F. E. Colvin the past week, returned to her home Monday.

—Sylvester Marx, student of Marquette University, Milwaukee, is spending a three weeks' vacation under the parental roof.

—You are cordially invited to attend the dance at the Kewaskum Opera House tonight, Saturday. A good time is assured to all.

—Miss Marcella Hermann of Milwaukee and gentleman friend arrive home Sunday evening after spending a few days at Wabeno.

—Miss Marcella Hermann of Milwaukee is spending a two weeks' vacation with her parents, Mr. and Mrs. Jos. Hermann and family.

—Mr. and Mrs. And. Straub and family of Ashford and Erwin Smith of Waukesha spent Sunday evening with friends in the village.

—Mr. and Mrs. Art. Van Epps and children Leila and Elwood of Dotyville, visited with Mr. and Mrs. F. E. Colvin Sunday and Monday.

—Mr. and Mrs. Fred Basil and daughter and Mr. and Mrs. Henry Ramthun of West Bend spent Sunday with the Fred Ramthun family.

—Mr. and Mrs. L. P. Rosenheimer left Monday for the northern part of the state, where they spent several days the forepart of the week at points of interest.

—Mr. and Mrs. John Weddig and family and Carl Goertz were at Sheboygan Sunday where they attended a reunion of the Spanish-American War veterans.

—Mr. and Mrs. Geo. Heisler and family of Hartford, Mr. and Mrs. J. M. Nicholi and family of Madison, Minn., visited with the M. Beisler family Thursday.

—Byron Brandt and family and Nettie Kludt of Highland Park, Ill., and Erwin Brandt and family of Milwaukee visited Saturday with Mr. and Mrs. Chas. Brandt.

—Mrs. Lizzie Palmer, son Adrain and Wm. Strong of Iron Mountain, Mich., and Mrs. Gusta Lau of Kohler visited Tuesday with Aug. and Chas. Buss and families.

—Mr. and Mrs. Charles C. Schaefer, son Harry and Miss Laura Fischer left Wednesday for Minneapolis, Minn., to visit relatives. They expect to return home Sunday.

—Mr. and Mrs. Ed. Rudolph and son Gordon of Milwaukee, Mr. and Mrs. Wm. Beger Jr., of West Bend spent Sunday with Mr. and Mrs. Jos. Hermann and family.

—Mr. and Mrs. Nic. Haug, daughter Rosella and Miss Hulda Koepke of here accompanied by Miss Caroline Tesloff of Fond du Lac visited relatives at Ripon Sunday.

—Mrs. Nic. Braun and daughter of Jefferson are visiting at the home of the former's parents, Mr. and Mrs. J. M. Ockenfels and with the Peter Haug family since Monday.

—Mr. and Mrs. Florian Furich of Chicago arrived here Monday to spend a two weeks' vacation with Mr. and Mrs. Roman Smith and other relatives and friends here and at Hartford.

—Miss Minnie Heidel visited relatives at Milwaukee Wednesday evening. She was accompanied home by Miss Pauline Marske of South Bend, Ind., who will visit with her until Sunday.

—Mr. and Mrs. Herman Butzlaff and family, Mr. and Mrs. Wm. Butzlaff and family and Mr. and Mrs. Arnold Prost and family spent Sunday with the Jacob Schaefer family at West Bend.

—A. C. Schaefer and wife of Milwaukee spent Sunday with Mrs. Nic. Mayer and family. They were accompanied home by Miss Tillie Mayer, who visited a week with relatives in the Cream City.

—Mr. and Mrs. Henry Backus Jr., Mr. and Mrs. Frank Heppie and daughter Ruth, Mr. and Mrs. L. P. Merkel from here and Mr. and Mrs. Roland Backus of Ripon spent Sunday at Manitowoc and Watertown.

—Mr. and Mrs. Louis Bath and son Louis and Mrs. Math Bath and daughter Dolores enjoyed a motor trip to Two Rivers, Green Bay and Wabeno, where they visited with relatives and friends from Friday until Monday. They also attended the silver wedding anniversary of Mr. and Mrs. Mike Braun which was held at Wabeno Friday evening.

—B. H. Rosenheimer executor of the estate of Victoria Kohler, deceased, last week sold the former Kohler farm consisting of 120 acres of land, located in the town of Ashford, Fond du Lac county to Felix Bros. for a cash consideration. Immediate possession was given the new owners. Felix Bros. now own 340 acres of land in that township and are real up-to-date farmers.

—Mr. and Mrs. Dave Rosenheimer and family, Mr. and Mrs. Troller and family and Myron Rosenheimer, all of Milwaukee spent Sunday with Mr. and Mrs. D. M. Rosenheimer and family.

—Mr. and Mrs. John Rilling of Wausau visited from last Friday until Wednesday with Mr. and Mrs. Wm. Endlich. On Sunday Mr. and Mrs. Rilling and Mr. and Mrs. Endlich visited with relatives at Suring, Wis.

—Word was received here this week that Mr. and Mrs. Carl Dahlke, former residents of this village, received the sad news that their son-in-law, Edward Greenway, died at his home in Chicago on Thursday, July 21st.

—Mr. and Mrs. O. Recheyle and family, Fred Kibler, Mrs. Louise McEvoy and daughters Margy and Bernice, Mr. and Mrs. Earl Rummel and Art. Rummel of Milwaukee visited Sunday with Mr. and Mrs. Wm. F. Schultz here and with the John Thill family.

—Mr. and Mrs. Lorenz Guth of Lomira, Mr. and Mrs. Leo Biester of Fond du Lac, Mrs. Hedwig Schabender and daughter of Milwaukee and Mr. and Mrs. Frank Kirst of Newburg spent Sunday with Mrs. Aug. Bilgo Sr. and family.

—Mr. and Mrs. Walter Rust, daughter Betty, Mr. and Mrs. Geo. Groskopf, daughter Lois and X. Becker of Milwaukee spent Sunday with Mr. and Mrs. Jos. Mayer and family. Messrs. Rust, Groskopf and Becker returned home the same day, while the former's families remained for a more extended visit.

—Announcements were received here this week by relatives and friends of the approaching marriage of Leo Marx, son of Mrs. Martha Marx of Milwaukee, formerly of this village and Miss Loretta Ziemert, daughter of Dr. and Mrs. Ziemert of Milwaukee. The wedding will take place on Tuesday, August 9th.

—Peter Kirchner, a prosperous farmer of the town of Wayne, was the first one to sell and deliver clover seed for the season in Washington county. The seed was purchased by the L. Rosenheimer firm of this village, who purchase a large amount of seed every year. The seed was delivered to the firm on Tuesday. From reports received here there will be a good crop of clover seed this year.

CHEESE MARKET

Plymouth Wis., July 22—On the Farmers' Call Board today 1190 boxes of cheese were offered for sale and all sold as follows: 755 cases longhorns at 22 1/4 c, 55 cases young Americas at 22 1/4 c, 100 boxes square pairs at 22 1/4 c, 255 daisies at 22c and 25 twins at 22 1/4 c.

LOCAL MARKET REPORT

Winter wheat	1.20-1.25
Wheat	1.20 to 1.25
Barley	.80 to .85
Rye No. 1	.85 to .90
Oats	40-43
Eggs strictly fresh	25c
Unwashed wool	32c-35c
Beans, per lb.	13
Hides (salt skin)	5c
Cow Hides	11c
Horse Hides	4.00 to 4.50
Potatoes, hundred lbs	

Live Poultry

Old Roosters	13
Hens heavy	17-19
Spring Chickens, heavy	22
Leghorns, Broilers	18
Ducks	16
Ducks Dressed	15
Black chicks	15
Light hens	14
Geese Alive	14
Geese Dressed	14

(Subject to change)

NEW SHOES FOR OLD

Bring Us Your Old Discarded Shoes and Save Money.

Beginning August 1st

Next Monday, for a limited time, we will allow you money for your old shoes. Think of it—On every pair of new shoes bought, we will allow you

25c for an old pair of Baby Shoes
50c for an old pair of Children's Size
\$1.00 for an old pair of Large Size Shoes

Watch the price of old shoes GROW in our show window. Do not forget the old pair of shoes. We want them. Shoe Specials every day during August.

MONDAY MORNING

FINNEY OF THE FORCE

THE FEATHERHEADS

PROVIDED FOR HERSELF

makers' advice and "take home a brick" when you're late getting in? Jones—No, my wife usually provides herself with one before I arrive.

A Modified Slap
First Flapper—What are you so furious about?
Second Ditto—Daisy called me an old cat.
"Why, you're not so old."

Fly-by-Night
A salesman started out with a new

firm and after several days of promises he wired the house for money. The reply was:
"String together the feathers in your hat and fly home."

Falls Into Traps
Griggs—You didn't seem to enjoy your wife's music.
Briggs—No, I got confused, as usual. I never can remember that cello isn't something you eat and meringue isn't something you play.

RADIO

Trouble-Shooting the B-Eliminator

Where to Look and What to Do When Power Supply Gives Out.

By CHARLES GOLENPAUL, American Mechanical Laboratories.

Trouble-shooting the B-eliminator should be a systematic process of elimination—but with nothing eliminated until it has been checked up. In other words, take nothing for granted, because things taken for granted are often the very things causing the trouble. We all recall the chap who took the automobile half apart, looking for the trouble, when some one reminded him that his gas tank was empty. Radio trouble-shooting can be very much the same.

The first step in trouble-shooting the B-eliminator is to make sure that the 110-volt current is turned on, and that it is reaching the transformer primary of the device. The next step is to be sure that the fault lies with the B-eliminator, and not with the associated radio receiver.

With the trouble narrowed down to the B-eliminator, the logical procedure is to start with the resistance bank and then work backward through the filter, rectifier tube, and finally the transformer.

Lamp or Meter Test
A common trouble, when trouble does occur, is the absence of voltage at a given tap. This is generally traceable to an open-circuited or burnt-out resistor. Thus if the 10,000-ohm fixed resistor of the usual B-eliminator becomes open, the detector voltage will immediately increase, so that in the tuned radio-frequency receiver the signal strength will be greatly diminished, while in the regenerative receiver there will be constant oscillation.

A defective resistor may be located by means of a high-resistance voltmeter connected to each tap in turn. The reading obtained at each tap should be approximately that called for by the designation on the tap. In the absence of a high-resistance voltmeter, a 15 watt, 230-volt incandescent lamp may be employed. It should glow at that rate on the full output and on the intermediate tap of the B-power unit. If it lights equally bright at the detector tap it is an indication of an open or defective 10,000-ohm fixed resistor.

A satisfactory temporary repair can generally be made by means of a charcoal connected between the plus binding post and the terminal which gives no voltage. The resistance is adjusted until the proper voltage is obtained, and this saves the trouble of seeking the correct value for a fixed resistor, while at the same time providing ample current-handling capacity.

Look to By-Pass Condenser.
If the voltage taps are found satisfactory, yet the receiver still fails to operate properly, the trouble may be due to an open or an omitted by-pass condenser. A short-circuited by-pass condenser will act the same as a short-circuited resistor.

If there is no voltage at all the terminals, the trouble may be traced to an open circuit in the wiring, or in the transformer or choke coil windings, or again to a broken-down condenser. The wiring should be checked over for broken wires or bad connections. The transformer secondary and choke coil windings can be tested, by means of a telephone receiver and a dry cell, for continuity. Filter condensers can be tested by the same means, with a loud click at the time of making contact and a weaker click upon successive tapping of the terminals, to indicate a good condenser. If the successive clicks are equally loud, the condenser is short-circuited.

The rectifier tube should be considered after that. The best method is to try a new tube or a tube known to be good, in place of the existing tube. This is especially true with the gas-tube type of tube, which gives no other indication of its operation but a slight warmth.

Canadian-Newfoundland Chess by Amateur Radio
Dartmouth, N. S.—What is believed to be the first inter-dominion chess match ever played by radio in the British empire was recently staged between the chess club of this city and that of St. Johns, Newfoundland, through the co-operation of amateur station 1DD, operated by Maj. W. C. Barrett of this city, and station 8AR, owned and operated by Loyal Reid of St. Johns. According to information furnished the American Radio Relay

FOR RADIO FANS
The direction from which static comes always indicates a storm center. An old tube will often work intermittently when it is near the end of its useful life.

Caps of headphones should always be screwed up tight to avoid rattling of the diaphragm.

An indoor aerial, especially one strung around the rafters of the attic, does not need a lightning arrester.

It is necessary to employ a magnetic pickup and amplifier in order to use a cone speaker with a phonograph. An acid storage battery should be placed on a rubber mat or glass tray to prevent damage by the sulphuric acid should it by any chance or mishap leak out.

When living on heavily traveled streets the loud speaker should be placed in some room at the rear of the house where the noise will not disturb an otherwise good concert.

When building a receiver, always test parts first before wiring and lining them up on the baseboard. Hur-

league, of which both men are members, the game was highly successful and lasted nearly three hours, twenty-three moves being completed on each side of the board. The match resulted in a draw, but, judging by the enthusiasm displayed by both teams, the two amateur stations will probably be called upon in the near future to assist in a deciding match.

Effects of Magnets on Volume of Radio

During the first few years of broadcasting, when regenerative receivers were the most common type, the use of permanent magnets for increasing the sensitivity of the detector tube practically dropped out of sight. The advent of multiple-tube, nonregenerative receivers brings back the possibility of reviving this old stunt to advantage.

Experiments along this line are very simple, for it is only necessary to obtain a magnet with space enough between the poles to allow the tube to go between, and explore around the tube with it. There is no fixed rule as to where the magnet should be placed, nor is one necessary, for if it is going to effect an improvement, it will be apparent when the magnet is held in the hand.

When the approximate position of the magnet giving increased volume is found, some sort of support may be arranged which will allow for critical adjustment of its position. The magnet position will depend to a degree on the strength of its field. It should be quite strong.

Magnets from old boat or motorcycle magnetos are just the thing for this experiment, but those from flywheel magnetos, or even straight bar magnets may be found effective. The larger ones may be found rather awkward to use, so, if possible, the use of small ones is recommended.

The efficiency of this magnetic action is not to be taken for granted. In some cases, signals which are hardly audible are increased to speaker volume after the magnets are applied, while in other cases the volume is decreased or unaffected. In regenerative sets, the stunt is hardly worth trying as the only action will probably be a "spilling over" and distortion.

Radio Wages Crusade on Fuzzy Caterpillar
Boston.—Many and varied are the accomplishments of radio, but one of the most unique achievements on record is believed to be the tent caterpillar crusade of the Radio Nature league. The crusade brought about the destruction of 300,000,000 of the "crawlers."

This novel campaign was conducted by Thornton W. Burgess, founder and director of the Radio Nature league, a regular feature on the schedule of station WBZ.

The crusade lasted three weeks. It was conducted as a contest, with several worthwhile prizes offered. More than a million egg masses, which would have yielded approximately 300,000,000 crawly furry tent caterpillars, were destroyed by the ardent contestants. Two albatross and end to end, the exterminated pests would form a line 3,850 miles long.

When Microphonic Tube Is in Range of Speaker
"Howling" says Radio Broadcast Magazine "results from a microphonic tube being within close range of the loud speaker. The most effective way to overcome howling due to microphonic tubes is to place the loud speaker at least 10 to 25 feet from the receiving set, depending on the maximum volume used. The use of sound dampening devices, such as the placing of metal covers or wooden boxes over the tubes, has been found fairly effective. Set cabinets not tightly assembled are sometimes the real cause of the trouble because they vibrate freely at a certain frequency. The resulting vibration is then passed to the tube elements through the cabinet and socket. Sometimes merely opening the lid of the cabinet stops the trouble."

Can Locate Music, but Not the Ta-ta-tee-um
Julius Mattfeld, librarian of the musical research department of the National Broadcasting company, prides himself on his ability to locate anything in music. A few days ago, however, even Mr. Mattfeld's expert knowledge wasn't sufficient to answer an inquiry. A woman listener telephoned to ask: "Can you find that little piece that was played over a Kansas City station about two years ago—by a guitarist—maybe it was a singer—some time in the afternoon or late evening? It goes 'Ta-ta-tee-um'—just like that, you know. My daughter wants the music to sing to-night." That was enough for Mattfeld. He was beaten, and knew it. The music department reports that he was picked up and carried to the tea-room.

Snakes Don't Pilot
The pilot snake gets its name from the curious belief that it precedes the rattlesnake and warns it of the approach of danger. This, of course, is merely a superstition without foundation. According to another version of the superstition, the pilot snake is neither male nor female, but a sort of "neuter rattlesnake," like a worker bee, which devotes its time to piloting rattlesnakes.—Exchange.

Appropriate Decorations
A South Island youngster, age 12, was helping his mother make bread. Molding it in the shape of a man, he placed raisins for the eyes, mouth and a row of buttons. He began to decorate the figure also with raisins.
"Why do you put raisins on the legs?" asked the mother.
"Well, the fly explained, 'the lives.'"—Indianapolis News.

A Cinch
Bill—"How did you ever land that engagement?" Mike—"Oh, well, I told her my salary."

Physical and Mental Requisites for Flying
The exploits of Lindbergh and Chamberlin have attracted attention anew to the physical and mental factors concerned in aviation, says Hygeia Magazine, commenting editorially on their flight.

Continuous flying for from 40 to 50 hours makes a tremendous demand on the constitution, since it involves sleeplessness, relative starvation and constant concentration. In addition to these factors is the question of altitude and the ability of the body to meet the demands of the unusual environment.

Undoubtedly, a physical examination of a man who has just completed the terrific stress of a transoceanic flight would show much the same physical changes that occur in marathon runners or in workers who are compelled to maintain concentration for long periods of time.

Stationary Engine Open
If you operate a compressor, a type of stationary engine driven equipment just install a set of Champion you want the dependability, the efficiency and economy that makes Champion the better spark plug.

A New Way to Make Jellies
Without Staining Fingers—Without Long Hours of Boiling—Without Depending Upon Berries or Fruit Being in Season.

One of the most interesting and yet one of the simplest new products in the food field is called minute jelly. It is pure fruit or berry juice already boiled down and concentrated. To this concentrated juice, fruit pectin in the right amount has been added. The pectin is that part of fruit which makes jelly "jelly." It is as pure and wholesome as the fruit juice.

To make the jelly take the little bottle of concentrated juice, pour in a sauce pan, add water and sugar according to directions on the bottle and boil a few minutes. Then pour into jelly glasses and when it has become cold you have the most delicious pure fruit jelly you ever tasted.

A few bottles kept on hand, selected according to your taste for jellies, and you can make up a few glasses just as you want it. One small bottle makes two glasses of jelly. If you wish to try two bottles send us twenty-five cents and we will give you your choice of grape, mint, pineapple, orange, raspberry, strawberry or blackberry. Or four bottles—all different—for fifty cents. Address Department WJ, General Packing Corp., Cranford, New Jersey.—Adv.

Could See It Better
Landlady—How did you find your food today, sir?
Boarder—Oh, I took my plate to the window.—London Answers.

The jealous man poisons his own banquet, and then eats it.

Unconscious Frankness
Bill—"Doesn't that seat on your money?"
Road—Oh, it's next to nothing.

Truth is trite; but it never becomes as stupidly so as long continued falsehood.

CHAMPION Spark Plugs
TOLEDO, OHIO

For your protection be sure the Champion you buy are in the original Champion cartons.

CUTICURA
Helps Business Girls to Look Their Best

The regular use of Cuticura Soap, assisted by touches of Cuticura Ointment when required, keeps the complexion fresh and free from blemishes, the hair lustrous and glossy, and the hands soft and smooth. Cuticura Talcum is fragrant and refreshing, an ideal toilet powder.

Soap 25c. Ointment 25c. and 50c. Talcum 50c. Sold every where. Samples sent free. Address: "Cuticura Laboratories, Dept. 103, Malden, Mass."

Ma Buzz gets it in the neck
FLIT spray clears your home of mosquitoes and flies. It also kills bed bugs, roaches, ants and their eggs. Fatal to insects but harmless to mankind. Will not stain. Get Flit today.

FLIT
DESTROYS Flies Mosquitoes Moths Ants Bed Bugs Roaches

FOR RADIO FANS
Heddy-put-together coils, hastily-followed diagrams and quick wiring can never aid the successful completion of a receiver. Every unit should be electrically perfect before assembly.

When planning to hide a storage battery, a charger, an eliminator and other dry batteries in the bottom of a flimsy cabinet the weight of the combined load should be taken into consideration or the whole thing will collapse.

When using the house line to supply energy for the receiver, a male plug may be conveniently mounted in the back of the table or console. The female plug is connected directly to the line. When making the plug connection, the fingers cannot possibly touch the prongs.

When a ground clamp is not available an emergency ground connection can be made by wrapping copper wire around an iron pipe, leaving a wedge between the pipe and the wire. Hammer the wedge down, thus jamming the wire in good contact with the scraped pipe.

WOMEN OF MIDDLE AGE

Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kowal of 226 1st Ave. writes that she became so weak and ran down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Marie Adams, who lives in ... writes ... "I tried your medicine ... and I feel like a new woman."

... of women past fifty, say ... "I feel like a new woman."

... ready for a substitute ... "I feel like a new woman."

... he was mortified ... "I feel like a new woman."

... one advantage ... "I feel like a new woman."

... for over 100 years ... "I feel like a new woman."

... gold medal ... "I feel like a new woman."

... K-R-O ... "I feel like a new woman."

Betty Nuthall on British Team

Mollie Mallory (Left) and Betty Nuthall.

Betty Nuthall, the sixteen-year-old English school girl who eliminated Mrs. Mallory from the Wimbledon tournament recently, has been designated to go to the United States this summer as a member of the Wightman cup team.

The other members of the team which will attempt to regain the trophy are: Mrs. Kitty McKane Gedree, Miss Gwendolyn Sterry, Miss E. H. Harvey and Mrs. J. Hill.

The American squad was announced as Mrs. Mallory, Helen Wills, Elizabeth Ryan, Mrs. Hazel Hotchkiss Wightman, donor of the cup, Mrs. Marion Zinnerstein Jessup, Miss Eleanor Goss, Miss Martha Bayard, Mrs. Charlotte Hodner Chapin, Miss Margaret Blake, Miss Penelope Anderson and Miss Helen Jacobs.

New Zealanders Are Fond of All Sports

Manufacturers of sporting goods and equipment will find many dollars in New Zealand, according to the Commerce department at Washington. Popularity of sports in the island combine to create an important market for athletic equipment, agents of the department report. Football is the most popular of winter sports. Cricket is the favorite summer sport, although it has a strong rival in tennis. Golf is played the year around. Lesser sports are bowls and track. In a few mountain resorts in winter a small amount of skiing is found. Fishing and hunting also have many followers.

HARRY McCURDY FIND OF THE YEAR

Manager Ray Schalk Loud in Praise of Youngster.

American league fans, noting the recent success Harry McCurdy is having behind the bat and with the stick for the Chicago White Sox, have been wondering how Branch Rickey ever let this sterling backstop get away from him. It was the former manager of the Cardinals who found McCurdy at college, got him to sign a contract and tried him out at St. Louis under the most unfavorable circumstances.

Rickey at that time was sorely pressed for backstops, not having very much luck with his maskmen. After seeing McCurdy in action at college, he predicted a brilliant future for him. McCurdy got his chance to get into the big league with a hop, skip and a jump.

Overton Tremper, University of Pennsylvania outfielder, has been obtained by the Brooklyn National league club. The Syracuse team of the International league announces the purchase of Catcher Hanby from the New York Giants.

Paul Waner, Pittsburgh outfielder, hit in 23 consecutive games before he finally fell off in the game with the Cincinnati Reds.

The Baltimore Orioles admit all boys in short trousers to view games free on certain days, but older youths in golf pants are excluded.

Johnny White, star shortstop of the Fordham university baseball nine for the last three years, has signed a contract to play with the Cincinnati Reds.

Pitcher Walter Deall of the New York Yankees has been released to the St. Paul club of the American association under an optional agreement.

Zach Wheat, veteran outfielder, has never been put off the field by an umpire or fined for insubordination in all of his 19 years in the major league.

The record for consecutive pitching victories in organized baseball is 20 games, set by Jimmy "Rube" Parmham with the Baltimore Orioles in 1923.

Seattle has purchased Pitcher Jack Knight from the Philadelphia Nationals. He is a right-hander who has had varying success with the Phils.

Cy Young, regarded by many as the greatest pitcher of all time, won 508 major league games during his career, which includes three no-hit performances.

Ray Schalk holds the record in the major leagues for the greatest number of games caught, with a mark of 1,705 games, compiled during 15 consecutive seasons.

The Toronto Leafs of the International league signed Stanley Lucas, a youthful pitcher. Lucas graduated to professional ranks from a Toronto amateur nine.

In 1892 there were 12 hurlers in the National league who won 30 or more games that season. The 30 mark in victories hasn't been reached since 1920, by the hurlers of either big circuit.

Pitch Opening Game of World's Series

Herb Pennock in all probability will hurl the opening game of the 1927 world series for the New York Yankees. Huggins' team is enjoying a big lead, especially when a team is hitting in the crushing fashion of the Yankees.

The merciless clouting of the Yankees has overshadowed some fine pitching performances by Miller Huggins' twirlers. With exception of the White Sox, no American league entry has received as good pitching as the Yankees, who boast in Pennock and Reuther two of the outstanding portersiders in baseball.

Cochran Likes Golf

Welker Cochran, world 182 halftone billiard champ, is no mean player of that famous game golf. Cochran is a six-handicap man and hits 'em straight and far down the fairways; strange to say, he is weakest on the greens. He is shown at Broad Moor golf club, Seattle, where he shot 79 on a strange course.

Diamond Notes

Deamont of the Texas league has sold Ted Pillette, pitcher, to the St. Paul-American association team.

Wally Schang was the last player to wear a mustache in the big leagues, but stuck to it for only half a season.

Overton Tremper, University of Pennsylvania outfielder, has been obtained by the Brooklyn National league club.

The Syracuse team of the International league announces the purchase of Catcher Hanby from the New York Giants.

Paul Waner, Pittsburgh outfielder, hit in 23 consecutive games before he finally fell off in the game with the Cincinnati Reds.

The Baltimore Orioles admit all boys in short trousers to view games free on certain days, but older youths in golf pants are excluded.

Johnny White, star shortstop of the Fordham university baseball nine for the last three years, has signed a contract to play with the Cincinnati Reds.

Pitcher Walter Deall of the New York Yankees has been released to the St. Paul club of the American association under an optional agreement.

Zach Wheat, veteran outfielder, has never been put off the field by an umpire or fined for insubordination in all of his 19 years in the major league.

The record for consecutive pitching victories in organized baseball is 20 games, set by Jimmy "Rube" Parmham with the Baltimore Orioles in 1923.

Seattle has purchased Pitcher Jack Knight from the Philadelphia Nationals. He is a right-hander who has had varying success with the Phils.

Cy Young, regarded by many as the greatest pitcher of all time, won 508 major league games during his career, which includes three no-hit performances.

Ray Schalk holds the record in the major leagues for the greatest number of games caught, with a mark of 1,705 games, compiled during 15 consecutive seasons.

Robbed of Record

Here is shown Benny Paschal, the Yanks' utility outfielder, who was robbed of a home run record in the third game of the series with the Cleveland Indians. Ben snatched out two home runs and was robbed of two more by only a few feet. One turned into a two-bagger while the other was a triple. Only two men, Ed Delahanty and Bob Lowe, made four home runs in one game.

English Women Prefer Lighter Men in Ring

Feminine prize-fight fans in England are showing a preference for fly-weights and bantams, and on this account the little fellows are in great demand. Fight promoters have learned that action without too many bruises is more desired than science by women spectators. Consequently, the promoters have hit upon the scheme of providing snappy lighter weight bouts to stimulate interest in boxing among the wives, sisters and sweethearts of their regular patrons.

With women taking more interest in sport than formerly, the managers have hopes of receiving increased revenue by selling two tickets where formerly they sold one.

Graduation Takes Stars

Graduation took its usual toll of athletes at Penn State college this year. 30 members of teams being among the seniors who received degrees at the commencement exercises.

In addition, several other Lion players will be ineligible for further competition although they are not members of the graduating class. The wrestling team will be the hardest hit, four of the first-string regulars receiving their degrees. Other branches of athletics were also affected.

The Kitchen Cabinet

(©, 1927, Western Newspaper Union.) By day its voice is low and still—A charming dancing little rill. But when the silent night is here Its voice is heard so loud and clear. And yet so sweet, it often seems As though the brook brought pleasant dreams.

SEASONABLE GOOD THINGS

To make lemon tapoca pudding, take one-half cupful of the minute tapoca and cook in a quart of milk in a double boiler. When the tapoca is clear add the well-beaten yolks of two eggs and one-half cupful of sugar. Add the creamed rind of a lemon and cook until smooth. Beat the whites of two eggs stiff, add three tablespoonfuls of sugar and a tablespoonful of lemon juice. Put the pudding into a baking dish and cover with the meringue. Brown lightly and serve cold.

Graham Wafers.—These are so much better for the children to eat than rich cookies, and so much cheaper made at home that they are worth trying. Take one quart of good graham flour, one tablespoonful of sugar, one teaspoonful of baking powder, one-half teaspoonful of salt, two tablespoonfuls of sweet fat and a good cupful of milk. Mix and knead well, then roll out to one-fourth inch in thickness, cut into small oblongs, prick with a fork and bake carefully, as they burn quickly around the edges.

Creamed Mushrooms.—Brush and peel the caps, removing any earth by brushing. If carefully picked they will need no washing, but if it is necessary wash quickly and drop at once into hot butter. Cook five minutes, add cream and serve poured over well-buttered toast. Serve at once.

Broiled Mushrooms.—Broil the top of the caps first, then turn and fill each with a bit of butter. Cook until well heated through and serve on toast squares.

Mushroom au Gratin.—Peel one-half pound of fresh field mushrooms, sprinkle with salt and let stand one-half hour. Fry one sliced onion in two tablespoonfuls of cooking oil, add two tablespoonfuls of flour and when well blended add a cupful of stock made from cooking the stems of the mushrooms in water to cover. Cook until thick, add seasonings and the mushrooms to the sauce. Cover with a half cupful of well-buttered crumbs and bake until the crumbs are brown.

Mexican Rabbit.—Mix one cupful of freshly boiled rice with one cupful of tomatoes and the same of corn, one-half of a green pepper cut in shreds, one slice of onion chopped, one-half pound of cheese, a teaspoonful of paprika, one-half teaspoonful of salt and two well-beaten eggs. Turn into a well-greased baking dish. Sprinkle with crumbs mixed with melted butter and bake in a moderate oven in a dish set in water. Serve when the mixture is firm in the center.

Good Things We Like. Simple desserts which may be served to young and old, appeal to the busy housewife.

Lemon Jelly and Sliced Bananas.—Prepare the lemon jelly from a package which needs but the addition of a pinch of boiling water.

When it is firm (if prepared the day before) it will be ready to cut into cubes. Put the cubes in the center of a glass dish and heap the sliced bananas around them. Pour over a thin custard using a cupful of milk and egg and a strained honey for sweetening. The tartness of the jelly is especially good with the bananas.

Orange Parfait.—Boil together one cupful of sugar and one cupful of water until it threads or at 218 degrees on a candy thermometer. Pour the syrup onto two stiffly beaten egg whites, fold in the whipped cream (two cupfuls) and add one cupful of strained orange juice. Turn into a mold and pack in ice and salt. Allow to stand four hours before serving.

Orange Souffle.—To the whites of three eggs add a small pinch of salt and beat until stiff, then gradually beat in three tablespoonfuls of sugar. Beat the yolks of the eggs until light and lemon colored and add six tablespoonfuls of powdered sugar and enough orange juice to make of the consistency of coffee cream. Into this fold carefully one-half of the beaten whites, turn into a baking dish and cook in a dish of water until it puffs. Spread over it the pulp of three oranges, cover with the remaining egg white and set in the oven to brown quickly. The pulp of oranges when cooked at a high temperature will become bitter.

Simple custards baked, steamed or served as a sauce on fruit, are always a wholesome dessert for both little people and the grown-ups. A caramel custard is always enjoyed. Melt a half cupful of sugar in a heavy frying pan, add hot milk to dissolve and when well dissolved add one egg to each three-fourths cupful of milk, bake in a pan of water or steam in water over the gas flame. Remove as soon as the custard thickens as overcooking spoils a custard making it coarse and unwholesome.

After preparing celery for the table save the tops to put into soup.

Character Revealed. To be tempted to anger and hold the rebellious tongue in silence, to rein in the tempestuous spirit—that is the height of good breeding. It is also the indication of a great character.—Exchange.

Spanish Settlements. The following states were first settled by Spaniards: California, San Diego, 1769; Florida, St. Augustine, 1565; New Mexico Santa Fe, 1582; Texas San Antonio, 1690.

If you are planning to trade-in your present car for a new car, remember these facts:

- 1 When you trade-in your used car for a new car, you are after all making a purchase, not a sale. You are simply applying your present car as a credit toward the purchase price of the new car.
2 Your used car has only one fundamental basis of value; i. e., what the dealer who accepts it in trade can get for it in the used car market.
3 Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.
4 The largest allowance is not necessarily the best deal for you. Sometimes it is; sometimes it is not.
5 An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.
6 First judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car.

Duration of Soviet Rule Easily Proved

"Comrade" Kallinin is president of the soviet union. He is a peasant by origin. Like all good presidents Kallinin makes a speech occasionally. He makes a specialty of addressing peasant audiences. Not long ago he made a speech at a farmers' reunion not so far from Nizhni. The president was drawing a grandiloquent picture of life under the soviet regime. At the outset he told his peasant listeners that Russia was the first country to throw off the yoke. Suddenly he was interrupted. Interruptions are not infrequent in peasant districts. "We have land and freedom," cried one farmer, "but under the czar some of us had three pairs of pants and now we have only one." "Comrades," replied the comrade-president, "the negroes of Africa have no pants at all." "How is that?" came back the voice from the audience. "You told us we were the first to be sovietized, but if those people in Africa have no pants at all, they must have had soviet rule for at least 20 years."—Pierre Van Plassen, in the Atlanta Constitution.

Just So

Mrs. Newrick—John, I phoned you to your office at noon and they said you'd gone to lunch. I tried again at 2:30, but you were still at lunch. Newrick—Yes, I did have a rather lapsed time at lunch, my dear.

Business as Usual

First Street Bandit—How's business? Second Street Bandit—Holding up.

Much Too Good

Smith—That man of mine ought to be hanged. Smithers—Not hung—hanged! Smith—Hung! I say, hanging is too good for him.—London Tit-Bits.

Sorry for Poor Horse

Little Carol, age four, has always been interested in horses and loves to watch them pass by, but had never seen one used except to haul trucks or milk wagons. While riding in the country recently with her aunt she saw a young man on horseback and exclaimed: "Oh, Aunt Mary, look at that poor horse without a wagon on it!"

Not a Poisson

NOTE A POISSON. K-R-O does not contain arsenic, phosphorus, strychnine, or any other poisonous substance. Made of equal parts of the best quality of flour and water. At your drug store. 72-cent boxes (10 boxes in a pack) \$2.00. Or sent by mail in postpaid box for \$2.50. K-R-O CO., Springfield, Ohio.

Bugville's Richest Citizen

But Flyosan will get him too!

HE'S BEEN burying flies and mosquitoes by the millions.

Flyosan floats through your rooms, killing every single fly and mosquito—getting into corners and crevices you could never see.

But use Flyosan itself—the first liquid insect spray on the market (non-poisonous). Flyosan not only kills every fly and mosquito in your house, but also kills the millions of deadly, disease-bearing germs on the body of each.

And "swatting" only scatters these germs into the air you and your family breathe.

Peterman's has the right insecticide for each insect. On sale wherever drugs are sold.

Flyosan VICTIMS BURIED AT GREATLY REDUCED RATES AND FLY UNDERTAKER

Here is the right insecticide for each insect: FLYOSAN, Liquid Spray—kills flies and mosquitoes. PETERMAN'S ANT FOOD—exterminates ants. PETERMAN'S DISCOVERY, Liquid—exterminates bedbugs. PETERMAN'S ROACH FOOD—exterminates that cockroach army. PETERMAN'S MOTH FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's 200 Fifth Ave., N. Y. C.

No

Foolin'

The fight for business leadership is no monkey business in this day and age, as is evidenced by the latest report from commercial centers—and which has to do directly with the future of towns exactly the size of KEWASKUM

It has been learned that the big mail-order houses now maintain a department, the duty of whose staff is to read weekly newspapers from all over the country and continually make a survey of the different districts to learn of mail-order selling possibilities.

And, it is a fact—that immediately that department finds a town or country wherein the local merchants

are not using the local paper to advertise their merchandise to the trade—that district is immediately flooded with catalogues—because it is virgin territory and the mail-order houses have learned that they can do GOOD business there.

We pass this information on to business leaders of KEWASKUM and assure them that all of our support is of course with them. We maintain a local advertising service which can be used to advantage—and for such service we make no extra charge. Come in or phone and we will call. Business goes to those who go after it.

NEW PROSPECT

Miles Shea of Armstrong was in the village on business Friday. Jos. T. Sebolka spent from Friday until Tuesday with friends at Milwaukee.

Mr. and Mrs. John Dunn of Lake Forest visited Monday with Mr. and Mrs. J. F. Walsh.

Frank Bowen and family and Gordon Schneider spent Tuesday with Mr. and Mrs. Wm. King at Cascade.

Geo. Schneider and son Gordon of Oshkosh spent the past week with relatives here and at Campbellsport.

Mrs. J. P. Uelmen and guests Miss Florence Krueger and Armin Bell were Sheboygan visitors Wednesday.

Mrs. Aug. Stern spent Monday with Mr. and Mrs. W. White and Mr. and Mrs. Wm. Krewald at Lake Fifteen.

Mr. and Mrs. John Schultz and daughter of Lake Fifteen spent Monday with Mr. and Mrs. Wm. F. Schultz.

Mr. and Mrs. John Bowser and family of Batavia visited Sunday with Mr. and Mrs. Frank Bowen and family.

Miss Ruth Schultz returned home after spending a few weeks with Mr. and Mrs. Arnold Butzke at Round Lake.

Mr. and Mrs. J. P. Uelmen and Mrs. A. Krueger spent Tuesday with Mr. and Mrs. P. Rinzel and family at East Valley.

Mrs. Joe. T. Sebolka returned home Tuesday after spending a few days with Mr. and Mrs. Gust Doner at Milwaukee.

Mr. and Mrs. A. C. Bartelt and children Iris and David spent Thursday with Art. Bartelt and family at Buttes Des Morts.

Mrs. Venus Van Ess and daughter Arline of Adell spent Friday with her sister Mrs. W. M. Bartelt and daughter Cordell.

Mr. and Mrs. Phil. Koch, daughters Mariel and Shirley of Fond du Lac were Sunday guests of Mr. and Mrs. W. J. Romaine.

Mr. and Mrs. Max Schoetz and daughter of Menasha spent from Wednesday until Thursday with Mr. and Mrs. W. M. Bartelt.

Mr. and Mrs. H. E. Uelmen and daughter Mary Elair of Sheboygan were guests of Mr. and Mrs. Geo. H. Meyer and family Sunday.

Mr. and Mrs. W. Haupt and family of Milwaukee, Miss Lizzie Polzean and Al. Schoetz of Waucousta spent Sunday with Mr. and Mrs. John Tunn and family.

Miss Florence Krueger and A. Bell returned to Milwaukee Friday after spending the week with their grand mother, Mrs. A. Krueger and other relatives.

Geo. Schneider and son Gordon of Oshkosh, Frank Bowen and family, Geo. H. Meyer and family spent Wednesday evening with John Bowser and family at Batavia.

Mr. and Mrs. Martin Hartman, daughter Elizabeth and son Arnold of Plymouth and Mr. and Mrs. William Hennings of Dundee were guests of Mr. and Mrs. W. J. Romaine Sunday.

EAST VALLEY

Harvey Backhaus spent Sunday at Beaver Dam.

Mrs. Henry Fellenz spent Tuesday at the Nic Hammes home.

Lawrence Rinzel spent Sunday with his parents at South Germantown. Jerome Schiltz of Milwaukee is spending a week at the Peter Schiltz home.

Mr. and Mrs. Lute Wooden of Appleton spent Sunday with Mr. and Mrs. J. Reysen.

Donald and Robert Luby of Fond du Lac are spending some time at the Mrs. P. Bell home.

Mr. and Mrs. Joe Uelmen and Mrs. Krueger of New Prospect spent Tuesday with Mr. and Mrs. P. Rinzel and family.

Lawrence Rinzel and Clarence Riemer of Milwaukee, Nic Hammes and sons called at the Peter Rinzel home Sunday.

Mrs. Julius Reysen and daughter, Mrs. C. Reysen, Mrs. Peter Schiltz and Mrs. Ed. Uelmen spent Tuesday at Kewaskum.

Lawrence Rinzel of Milwaukee, Clarence Riemer of West Allis spent Saturday and Sunday at the Nic Hammes home.

Mr. and Mrs. B. J. Darling and daughter Floris and son James are spending a week with Mr. and Mrs. J. Reysen and family.

Mr. and Mrs. Nic Hammes and son Wm. and daughter Theresa spent Saturday evening with Mr. and Mrs. N. Thoemmes and family at Grafton.

Mr. and Mrs. John Boegel of St. Kilian, Mr. and Mrs. Mike Schladweiler and Joe Schladweiler spent Tuesday with Mr. and Mrs. Wm. Pesch.

Mr. and Mrs. Tom Ferman and daughters Elrine and Donn Jean of Madison spent from Wednesday until Saturday with Mrs. Peter Bell and family.

Lawrence Anthony, Math and Edmund Rinzel, Wm. Joe and Theresa Hammes, Ruth Reysen and Leona Rinzel spent Thursday at the F. Hopkins home.

Mr. and Mrs. Julius Reysen and daughter Ruth, Mrs. C. Reysen, Mr. and Mrs. B. Darling and daughter Floris and son James spent Monday at Crystal Lake.

Mr. and Mrs. Julius Reysen and daughter Ruth, Mrs. C. Reysen, Mr. and Mrs. B. Darling and daughter Floris and son James spent Sunday evening with Mr. Borden and Flora Reysen at Forest Lake.

Mr. and Mrs. H. Rinzel and sons Andrew and Benedict of South Germantown and Miss Summer of Menomonee Falls spent Tuesday with Mr. and Mrs. N. Hammes and Mr. and Mrs. P. Rinzel and family.

ST. KILIAN

Miss Marian Kleinhans is spending the week with friends at St. Cloud.

QUALITY MILK OUR SPECIALTY

In producing milk of good quality, clean utensils are perhaps one of the most important factors in production. If milk is handled in utensils which are already full of bacteria of different kinds, the quality will be poor and nothing can restore the milk to its original quality. Milk shipped to city markets must be sweet, clean and good. There is no market for off grade milk, and this holds true, no matter in what form the milk is consumed. If off grades are used in manufacturing other dairy products the results are always detrimental to the business and the pocket-book. The producer of milk or the manufacturer of milk products, who insures the cleanliness of his product is entitled to success. No one wants to eat unclean things. Buyers of milk and dairy products use them because of their food value and palatability, but these two characteristics are lost if milk is not properly taken care of and promptly cooled to insure its fine flavor and quality.
