BY: SCHMIDT
To the Voters of Washington County:

It should interest the voters of Washington County to know that during my term of office, I have successfully defended lawsuits against the county totaling close to \$300,000.00 and no one has succeeded in collecting one single penny from the county.

It should also interest the voters to know that during the same period I have collected for the county close to \$20,000.00 of old claims due the county.

My biennial expense account as District Attorney has been the lowest in the state.

Upon this record I am seeking re-election, and respectfully solicit your support.

Yours very truly,
Hy. P. Schmidt,
District Attorney.

CHEESE MARKET

1st month, Wis., Aug. 24—On the Farmers Call Board today 1025 boxes of cheese were offered for sale and all sold as follows: 675 cases long-horns at 23 1-4c, 50 Young Americas at 23 1-4c, 200 square prints at 23 1-4c and 100 daisies at 23 1-4c.

PAID ADVERTISEMENT—Authorized and paid for by Theo. Holtebeck, West Bend, Wis.

To the voters of Washington county:

I hereby announce myself a candidate for the office of sheriff on the Republican ticket at the primary election to be held on Sept. 4, 1928.

My boyhood was spent on a farm in Waupaca County, Wis. In 1909 I settled in West Bend and have been conducting a barber shop here for the last 19 years. My home city honored me by electing me alderman for two terms, and I have served as under sheriff for four years, perhaps the longest any under sheriff served at one time in Washington county. With the experience in the sheriff's office, qualifies me to conduct the affairs of the office of sheriff in an efficient manner.

If I am nominated and elected I assure you that I will give the county my best efforts and that I will conduct the affairs of the office in an HONEST, FAITHFUL and ECONOMIC manner.

WASHINGTON COUNTY VOTERS SHOULD KNOW THE TRUTH

A few days ago a report came to me from a village near West Bend that my opponent in this campaign for the Republican nomination for sheriff is circulating false, vile and slanderous rumors regarding the financing of my campaign. The charge is so ridiculous and unfounded that I feel compelled to reply to it.

I resent this charge for three reasons:

First: It is absolutely untrue and Mr. Frey knows it.

Second: It is the old campaign method of "slinging mud," which I have tried in every way to avoid in this campaign.

Third: Every dollar which I have spent and will spend in this campaign is my own, and I have not received one cent of contribution from anyone.

Mr. Frey has also stated as a campaign argument that I was born in Canada and am of Norwegian descent. I know the voters are intelligent enough to realize that if these statements were true they would not disqualify me. And, if they were true Mr. Frey should have thought of them when he appointed me his under-sheriff.

I know that one's birthplace and nationality make no difference so far as his qualifications for office are concerned; but, since Frey has raised the question, I want my friends to know that I was born on a farm in Waupaca county in this state—my father was a German and my mother a Norwegian. I dislike very much to even discuss these matters, but I cannot permit these untrue statements to go by unheeded.

It is most surprising that he should resort to this sort of campaigning, for I had always considered Mr. Frey an estimable gentleman and an honorable opponent. I have consistently refused to attack him, his personality, his connections or his qualifications in the campaign and I will still refuse to do so.

I have made this campaign in the hope that my friends throughout the County would vote for me and support me because they believe I am qualified to hold the office, and I have not asked for anyone's support because of any objections they might have to my opponent. The office of sheriff is not worth as much to me as the many friendships. Friends are too scarce to lose by such bitter and unfounded attacks as have been made upon me during these last few days of the campaign.

If I am nominated I can go on to the general election without having to regret any statement I have made or act I have done in the primary campaign.

I sincerely trust that you will understand the purpose of this last-minute attack and assure you that I shall greatly appreciate your vote and your support on Primary Day.

Assuring you that I will appreciate your vote on Sept. 4, and any other help you may see fit to give me, I am
Yours Respectfully,
Theo. Holtebeck,
West Bend, Wis.

—The following spent Sunday with Mr. and Mrs. Emil Ramel and family; Mr. and Mrs. Fred Haack, Mr. and Mrs. Herbert Haack and family, Mr. and Mrs. Erwin Haack and daughter, Mr. and Mrs. Oscar Kirchner and family and Mr. and Mrs. John Klumb.

—Erwin Domann and nephew, Elton Domann, returned Sunday from a two weeks' motor trip through the East, traveling through twelve states. They stopped off at Mt. Vernon, New York City, and then toured to points of interest in Canada. The distance covered was 3,500 miles.

MEMORIAL

In loving memory of our dear wife and mother, Mrs. Mary Beisbier, who passed away one year ago Aug. 31, 1927.

A wonderful mother, woman and aid.

One who was better, God never made

A wonderful worker, so loyal and true,

One in a million—that, mother, was you.

Just in your judgement, always right,

Honest and liberal, ever upright;

Loved by your friends and all whom you knew.

Our wonderful mother—that, mother, was you.

Sadly missed by her husband Math.

Beisbier and children.

—Mr. and Mrs. George Reindl and family of here and Mr. and Mrs. Kilian Reindl and family of St. Killian returned home Tuesday from a five-day motor trip to Marathon, Stratford and other points of interest in the northern part of the state. Mr. Reindl says that the farmers in the north are far back with their harvest, as a great deal of grain has as yet not been cut, on account of too much rain.

—Mrs. Augusta Nordheim and daughter Mrs. Jas. Reynolds, left Saturday for their homes in New York City, after visiting two weeks here with Chas. Raether and daughter Frances and with Mrs. Wm. Raether, —H. W. Newman and daughter, North Dakota, who held the position as assistant of the Kewaskum High School, his household goods from his Dackhaus residence.

Multiply Your Man-Power By Seven

McCormick-Deering Corn Binders are built in two types, horizontal and vertical. Both are light-draft, long-lived machines that do hard work quickly and easily.

When you go into the corn with a McCormick-Deering Vertical or Horizontal Corn Binder you are equipped to do the work of from 5 to 7 men with corn knives. You sit in comfort while you are doing it. Instead of turning standing corn into loose, unwieldy stalks that are hard to handle, the McCormick-Deering bundles and ties the stalks for fast handling without loss of labor or corn. This is done at harvest and afterward.

You feed silage you especially need the fast, sure work of the McCormick-Deering Corn Binder. With the binder in the field, the stalk can be turned into the highest grade of silage, at a cost because the fast-working equipment handles the stalk when it is at its best. We have this new McCormick-Deering for you to see and try. Come to our store and we will point out the many fine features that this binder offers.

Vote for Kading for Congress

CHARLES A. KADING

It is important that every voter make his choice of candidate at the primary, next Tuesday, September 4. Congressman Kading has had the benefit of the experience of one term in Congress. His record as your Congressman is satisfactory to his constituents. He has worked hard to perform his duties well; has attended to his responsibilities in the administration of public affairs. He is the only Progressive Republican candidate for the office in this district.

He is able to render better service for his district than a new man. He solicits your support, and will appreciate your vote.

Cyril F. Lohr

Progressive Republican Candidate for MEMBER OF ASSEMBLY Washington County PRIMARY ELECTION SEPTEMBER 4, 1928

PAID ADVERTISEMENT—Authorized and paid for by Cyril F. Lohr, Hartford, Wisconsin.

A BOARDER WHO CAME FOR REST CURE

MRS. BASSETT was worried. Her best room, the front one with the tiny balcony, was vacant after having been occupied three years by one person. Mr. Patten had gone away and she did not expect to find his like again. As for the room, it might stand empty a long time, and that would be serious at this juncture, for Mrs. Basset needed every penny she could get now that her young son John was undergoing all that expensive treatment for curvature at the Crittenden hospital.

Mrs. Basset was small and gray and tired looking, yet she never admitted feeling fatigue. How could she with all that she had to do? With seven boarders and nobody but Annie Wood to help her a day now and then, she could not stop to think whether her head or her heels ached. She must keep going, for expenses did, and she must keep smiling, for nobody would stay long with a cross-looking landlady.

Now, however, when the kitchen door bell rang the smile into which she instantly adjusted her features was a mere shadow of joy. That ring meant, and probably did, that somebody with a patent measuring cup or dusting cloth would pounce upon her with his woe. Yet she had to smile just the same, for one never knew, except that prospective boarders always came to the front door.

A young woman was waiting for her, quite a young woman, in a dark-blue dress and cape with a gray kimmer collar and a small gray hat. A suitcase, presumably heavy, sat at her feet. Her face was tired and sad, but Mrs. Basset thought instantly that it was the sweetest face she had ever seen. And her voice matched the face.

"I saw the card in your window," she said. "Room to let." I should like it, please.

"Come in," said Mrs. Barrett. She thought: "Probably she won't want to pay so much, but that is my price." The young woman looked around, up and down and smiled.

"It is very nice. I will take it, please. And may I have board as well?" She didn't seem to mind about the price at all. In fact, she didn't seem to mind anything except that she was so extremely glad to have a place to rest in.

At dinner she appeared and took her place quietly. Mrs. Basset introduced her to the other boarders, who were all there except Mr. Thayer. He didn't appear until after the roast was served.

"I'm sorry, Mrs. Basset," he said in his charming way. "But there was a whole dinner that had to be accounted for in order to make the books balance, and we all had to starve."

Mr. Thayer sat next to Miss Jane Wells and spoke to her once or twice. Mrs. Basset thought: "What a nice-looking couple they would make!" She was fond of Mr. Thayer, who had been with her for two years. She knew that he was just what he looked to be—honest and direct and clean-hearted, one of those healthy, blond young fellows whose characters keep them out of temptation and whose ambition leads them to success.

It was Miss Willows who tried to find out something about Jane Wells. Miss Willows always found out about everybody. She prided herself on being able to size a person up after a half hour's acquaintance. But she could not size up Jane. Her questions were evaded so skillfully that she found herself in the predicament of a person swimming against a strong current—she made endless effort without getting anywhere. Still, it was not in her nature to give up.

Jane Wells, it appeared, must be taken or left as they found her. She had nothing to say for herself. She was there and that was all there was about it. Where she came from or where she was going and when—nobody could know. And how she could afford to occupy Mrs. Basset's best room was perhaps the greatest mystery of all for she did nothing with her time except read and walk and eat and sleep. Each day she grew fairer to behold and each day Roland Thayer looked at her with growing love and admiration.

Two weeks had passed when one day Miss Willows found the clew she had been looking for. Jane Wells was going out with a letter to post and she dropped the letter. Instantly Miss Willows, who was just behind her, snatched it up and before she relinquished it she had seen the address—"Mr. Felix Marvel," with the street number and town, a town not a million miles away. So the fair Jane had an admirer! Well, she must tell Roland Thayer, and she did.

Indeed, she went even farther. She went to Mrs. Basset and filled that

good woman's mind full of doubt and perplexity. "I am sure," Miss Willows said, "that Jane Wells isn't her name and that she isn't what she pretends to be. I am sure she is in hiding. Else why doesn't she get any mail? Everybody else in this house gets mail except Jane Wells. Why, she hasn't even had an answer to her letter."

"Oh, dear, Miss Willows, I don't believe any wrong of her," Mrs. Basset sighed. And then she was afraid to say more lest she offend her old boarder. After all, that was the one thing she must do of all others—keep on the right side of all the people under her roof.

Miss Willows whispered in every ear. Roland laughed at her. Mrs. Marcey shook her head, Julia Lanning stared, astounded. It didn't seem possible, but Miss Willows must know what she was talking about.

Gradually there came a change toward Jane Wells. A glance, a word, an act revealed it to her. She withdrew into herself and from everybody except Roland Thayer. To him she seemed to turn as if for protection at breakfast, at lunch. But when dinner-time came she didn't appear.

She had gone, Mrs. Basset said—paid her bill and gone. She had left no word. She had simply stepped back into the oblivion from which she had emerged. Not a single trace was left behind her.

That evening Roland Thayer sought Mrs. Basset where she sat in her tiny private "den" looking over accounts.

"Do you think Miss Willows got anything to do with Miss Wells' going?" he demanded. He looked gray and haggard and Mrs. Basset pitied him. The dear boy!

"No, I don't," she answered. "I think she was ready to go anyway. She said two or three weeks when she came."

"What is your idea of it all?" pleaded Roland, gazing upon his landlady with agonized eyes.

"Why—I think she came for a rest cure," Mrs. Basset replied. Roland nodded and unknotted his hands.

"I love her," he said. "I don't know where she came from or why. I only know I am going to follow her and find her and win her if she is to be found, unless she is already married."

Sweat broke out on his temples. "That man whom she wrote to—" He sprang up.

"You are going?" exclaimed Mrs. Basset.

"Now—to find him. I'll root him out of his bed, I'll—"

Mrs. Basset looked up at him gently.

"I know, knowing her, that you will find everything all right," she said.

"Hard to Escape From Indian Thief Tracker"

In India the great enemy of thieves is the khaji, whose name signifies "searcher" or "tracker" and whose business is to track criminals by their footprints. These trackers are trained to their calling from youth and become exceedingly expert. They are an especial terror to the cattle stealers, who, in the parts of the Punjab adjoining the Indus and other large rivers, where much grazing is carried on, are very plentiful. These match their cunning against that of the tracker but they have to be very clever to throw him off the scent.

One of their tricks is to catch a buffalo, drive it into the river, and, clinging to its tail, guide it in the way they desire to go. By this means they are quickly carried down the current and leave no telltale footprints. But the ruse is not always successful, for the reason that the tracker thinks nothing of distance and is likely to come upon the tracks farther on, where the thief was forced to leave the stream.

A good tracker, it is asserted, will follow a thief, yard by yard, for a hundred miles and come up with him in the end.

In one instance a burglar was once tracked until the searcher reached the lock-up of a village 80 miles from the starting point. Inside the building was the man he had set out to find. The police of that place had observed a suspicious-looking character walking about carrying a small bundle and had promptly locked him up. An examination of the bundle brought to light jewelry worth several hundred rupees.

In one instance the tracker's skill almost condemned an innocent man. Two sheep belonging to a government official had been stolen and the footprints were found to be those of a man employed to look after the public gardens.

The man was arrested, but when the track was followed up it was found to end opposite the police station, where the skins of the sheep were discovered. As it seemed unlikely that a thief would deposit his booty under the very eyes of the police, a further investigation was made, and it was eventually proved that the sheep had been taken by the police, who, to throw the trackers off the scent, had stolen and worn the gardener's shoes.

Progress Denoted by Evolution of Window

Like most architectural terms which are in themselves records of the times and the persons through which they have passed, the simple word "window" conveys a wealth of significance. Originally window openings were primarily for air (wind), hence the name window. They were also in some cases intended for defense against marauders and were, as civilization progressed in later years, intended for light.

Development through the centuries has fostered the evolution of the window through the periods of a simple opening in which was placed oiled parchment or paper, and the first crude glazed windows to the modern steel casement which frames the outlook from the modern homes of today.

As Europe gradually emerged from the medieval ages the growing consciousness of the people, and especially the landed people, began to manifest itself in more comfortable and then more artistic dwellings. The

window became a thing of beauty, its different styles finding no higher expression than in the English homes of the Tudor and Elizabethan periods.

Birth of a Tree

All mature trees and nearly all plants bear flowers for the purpose of reproduction through the formation of seed. To accomplish this there are two essential organs, the pistil and the stamen. The flower includes the seed case, and the stamen bears the pollen, a fine dust, commonly yellow. In contact with the stigmatic surface of the pistil this fertilizes the flower, or, in the gardener's language, sets the seed. These two parts, the essentials of a perfect flower, we usually find in each blossom in the garden, but trees, especially those in the woods, more often have a separate flower for each, a pollen-bearing flower and a seed-producing one.—Washington Star.

Oil burning vessels are blamed for wholesale slaughter of fish.

National Rifle Matches Now On

The national rifle matches, one of America's great sporting events being held at Camp Perry on Lake Erie, will be continued until September 16. Thousands of civilians as well as army, navy and marine experts are in attendance. One reason for the large gathering is the fact that tents or sleeping quarters have been supplied free to civilians. Meals are also furnished at cost price.

At its last session congress passed an amendment to the National Defense act which insures the holding of these great matches annually. It means that our government officially approves of rifle and pistol training for the youth of our nation, for civilians as well as soldiers.

The national rifle matches are not, as some believe, a strictly military affair. No one is barred from competing. The bill specifically mentions the army, navy, marine corps, National Guard or organized militia of the several states, territories and District of Columbia, the Reserve Officers' Training corps and the Citizens' Military Training camps, rifle clubs and individual civilians.

Special arrangements were made this year for women and children, for many entrants took their families to the camp. There were also an unusual number of events for boys and girls,

ranging in age from twelve to nineteen years. For several years the National Rifle association has promoted junior rifle clubs in every state. This year the range at times resembled a huge school yard during recess.

One of the reasons for the large number of entries this year is the program of entertainment keeps the campers happy. There were demonstrations of all arms by the army. The pilgrims were also given every opportunity to enjoy bathing, canoeing and other sports.

Prior to the shooting of the national matches many contests of national importance will be held under the supervision of the National Rifle association. Among these events are the President's match, the Wimbledon Cup and Leech Cup matches, some regimental matches, and other events that have been fired year after year.

In the past a number of youngsters have entered the great marksmanship derby on the shores of Lake Erie, but most of them have been the sons of officers of the army, navy or marine corps. This year, however, boys and girls from all parts of the country sent in their applications to the headquarters of the N. R. A. in Washington.

So Go the Cards

First Sacker Jim Bottomley is not the only star on the St. Louis Cardinals, nor the team's particular premier in any department, but there are those who do say that as Bottomley goes, so go the Cards. It may be true, but Jim is having a big year—and so are the Cards. They are smiling through with "Smiling Jim." Bottomley may not be the cleverest first sacker in baseball, but oh, the power of his punch when his bat swings true! And the inspiration of his cheer leading of a bunch that is a happy, cheering gang of go-after-ten ball players.

Sporting Squibs

A new golf tee has two arrow guides set at right angles to guide the ball's flight.

Helen Willis, the noted tennis champion, used about forty rackets in the course of a year.

Overheard on the links: "Do you put any personal mark on your golf balls?" "Yes. 'Stolen!'"

Ted Payne, assistant basketball coach at Northwestern, spends his summers as a golf pro at Dubuque, Iowa.

Princeton and Yale, both with good prospects from last year's freshman squad, expect to have strong elevens this fall.

Christ Dalton, amateur athletic union official and timer, uses three watches valued at \$5,200 when checking track events.

Sammy Mandell, world lightweight champion, has agreed to defend his title in Chicago this September. He has left selection of his opponent to Promoter Jim Mullen.

Virginia's amateur golf champion is Billy Howell of the Hermitage club, Richmond, and he is sixteen years old. He beat the older golfers in the state amateur tournament at Hot Springs.

The most thrilling sport in England is motor cycle racing on dirt tracks with skids and falls in abundance.

Fairy Story: "He was an executive high in the councils of amateur athletics and seemed to have a very well developed sense of humor."

A public golf course in the infield of the Devonshire race track at Windsor, Ont., is in operation during the mornings on racing days and also after the last event has been run.

BASEBALL NOTES

Time flies. On the other hand, Bullet Joe Bush is again pitching for Connie Mack.

The attempt of Babe Ruth to break his home-run record is called the American league pennant race.

Give the New York Yankees a little more time and they will drive all the "I" tables out of baseball.

Ty Cobb, Jr., like football and tennis at preparatory school, but shows little inclination toward baseball.

Hoinie Groh was given his unconditional release as manager of the Charlotte club of the South Atlantic league.

Judge Landis was a charter member of the Baseball Spirit of St. Louis organization launched a few days ago.

Oklahoma City, leaders in the Western league, is the youngest club in class A baseball today, the team's average being 23.

Umpire Tommy Connolly loves old Ireland so dearly that he has the lawn of his home sodded with grass brought from Erin.

Fred W. Dykes, pitcher for an army team stationed in Texas, struck out 20 batters in a camp league game and 15 in the next.

Officials of the Amarillo club in the Western league were forced to turn the franchise over to the league because of financial troubles.

Joe Hassler succeeded Joe Boley with the Athletics when Joe was hurt. The kid shortstop surprised everybody by his brilliant work.

The Pacific Coast league played to 1,106,040 attendance the first half of the summer. If these crowds keep up the coast will have another big year like 1924.

Edward Shanck, American Association pitcher, recently purchased by the Omaha club of the Western league, has wired he would not report for duty and was returning home.

Bill O'Hara, manager of the Toronto Leafs, in the lead of the International league nearly all season, graduated to his post from the job of road secretary when Lee Folie quit a year ago.

The Buffalo Baseball club, champions of 1927, is having its toughest year. The attendance to date is 70,000 less than it was for the same period last year, according to President Sam Robertson.

Eppa Jephtha Rixey, veteran National league pitcher, is baseball's most learned man. He earned a professorship of chemistry at the University of Virginia and holds the degrees of B. S. and M. A.

Garland Buckeye, the 240-pound Chicago bank clerk who signed with the Glants as a southpaw pitcher after losing his job in Cleveland for being overweight, was sold outright to the Toledo Mud Hens of the American association.

Playing for Birmingham in the Southern association in 1916, Burleigh Grimes set what is probably a record for organized baseball when he pitched six consecutive games in which he yielded a total of only 13 hits, an average of three a game.

Grafted Gland Makes a Race Horse Big Winner

The spectacle of erstwhile "sawbone nags" romping home for derby honors may be witnessed if race horse owners decide to put a little pep into their steeds by gland-grafting a la Voronoff.

The Voronoffication of "onts de-royer" has in fact already been accomplished with brilliant results.

The case in hand is that of Don Zuniga. His owner, M. Veil-Picard, set to win the grand hurdle race of Paris, experimented on Don Zuniga, where there was room for improvement, even if the horse himself could not exactly be classed as a "saw-boner." The operation was performed in accordance with the best rules laid down by Voronoff.

The big race was run at Auteuil. At the starter's signal, Don Zuniga, released by his jockey, went away like a streak of lightning. The twenty-two hurdles were negotiated as if they had never been there to obstruct the way. Don Zuniga won as he wanted. The 5,000 meters (a little better than five miles) were run in record time, three minutes six seconds. No horse has ever before been able to make that time at Auteuil.

Horse owners are enthusiastic, but race courses with coconut palms and other tall timber may see these removed for fear that monkey-glanded contestants will run up a tree at the critical moment.

Former Saints Playing Regularly With Yankees

Down East they call the St. Paul American association club a Yankee farm, a name St. Paul disclaims. But farm or no farm, the Saints have been delivering to the American league pace setters.

Four former members of the St. Paul team are New York regulars. Three others, rated as substitutes, have been used frequently because of injuries to first string men.

Catcher Collins, Shortstop Koenig and Pitcher Pigrass and Shealy are the former Saints playing regularly with the Yankees. Shortstop Durocher, third baseman Robertson and Cedric Durr, utility, are the other old St. Paul players with the Huguenot.

Bob Conroy, former Yankee scout owns the St. Paul club.

Shines at Golf

Glenna Collett, former national women's golf champion, as she returned from Europe, which she toured after competing in the British women's golf championships. Miss Collett was eliminated in the third round but her good playing won her the applause of the English galleries.

Hornsbys' Main Aim Is to Beat Out the Giants

It will be interesting to observe what kind of fight the Boston Braves can make against New York in the games remaining to be played against that team. Boston's showing hasn't been so good to date. It may be expected to improve. Manager Rogers Hornsby wants to win against the Giants or he will dislodge a lot of deadwood on the Boston team.

If Hornsby is to be boss of the Braves, the owners of the club must come to him to consult him about players. It is not very likely that any more swaps will be made by which Boston puts its strength into the New York organization.

Simmons' Batting Form Appears to Be Awkward

Al Simmons' batting stance is wrong—all wrong. The Polish outfielder of the Athletics swings at the last second with his right foot "in the bucket," and his form appears more awkward than that of a fat man taking his first swing at a golf ball.

For many weary months Connie Mack tried to persuade Simmons to swing in the orthodox manner, but to no avail. Al persisted in his bad habits. The other day the best he could do was three home runs and three singles in eight times at bat.

Gets No Pitching

Manager Rogers Hornsby of the Braves complaining with plenty of reason that he can't get any pitching for his team. Other managers say the very same thing. Al Demaree suggested that the reason was that there are so many "angles to pitching." "I can't see it," came back Hornsby. "There's only one angle, as I see it—get the ball over the plate with something on it, but most of them can't do even that."

RADIO

Says Habits of Mind to Be Changed by Radio

Radio is going to change the mind of man, declares Sir Philip Gibbs, the British writer, who believes that radio is going to give man a mastery over life beyond previous dreams.

"Here again the scientists have presented new opportunities to humanity which will surely alter their scheme of life, their habits of mind, their social customs and pleasures almost as much as the alteration of material conditions which are now awaiting them," he writes in Hearst's International Cosmopolitan.

"Again we stand only on the threshold of a new age, and yet already we are conscious of newly revealed wonders which in the old days would have been thought miraculous and are indeed taking us into a region beyond mere matter in the sanctuaries of eternal force."

Radio has already opened up new vistas of knowledge, according to Sir Philip, and has given to people wide sympathies in life and put them into touch with other countries and minds.

"Perhaps these are high words to use about an invention which is called wireless or radio," he adds, "so common now after a few years of use, that most of us have a wireless aerial over our chimney pots. One must not underestimate the effect even now on the human mind caused by this broadcasting habit which has taken hold of life. One may only hope that it will be less vulgarized by some of its transmitters."

Waves, Not Watts, Give Range, Amateurs Find

When a broadcast station wants to increase its range, it increases its power. When an amateur short-wave operator wants to increase the range of his station, he changes wave-length and does not increase power at all.

Several years ago, when short waves were first being investigated, the amateur found out that increases or decreases of the power of his transmitter meant very little, but that the particular wave-length used meant much. An 80-meter wave, for instance, was found good for ranges of 50 to 1,500 miles at night, more or less regardless of the power used, and a 40-meter wave for distances of 1,500 to 5,000 miles.

Consequently, if an east coast amateur using a low-power transmitter on 80 meters for communicating with stations in the Midwest wishes to communicate instead with the Pacific coast, or Europe or Australia, he does not put in a larger transmitter, but merely changes to 40 meters, confident that his low-power set will be just as effective over the long distance on 40 meters as it was at the shorter distances.

For extreme distances at night, and moderate long-distance work in daylight, 20 meters is used.

Method of Pepping Up Veteran Radio Tubes

A simple and efficient method of rejuvenating tubes which have "gone dead" is to turn their filaments up to normal brilliancy and then to reverse the polarity of the "B" battery, connecting its positive terminal to "A-" and its negative to the lead which is normally connected to the "B+." This tubes should be left connected in this manner for a full hour; the filament current should then be turned down to the lowest point and left this way for another half hour.

In cases where the tubes are unusually poor, the treatment may have to be repeated. After the tubes have been allowed to cool off, the batteries should be connected in their correct manner. It should be borne in mind that some types of tubes are not suitable for rejuvenation; such are the 500A, and certain power tubes.—Radio News.

\$90,000 Is Annual Cost of 5,000-Watt Station

Statistics of the service bureau of the National Association of Broadcasters show that a sum of \$90,000 was necessary to operate a representative 5,000-watt station last year. The engineering department consumed 25 per cent of the appropriation with an expenditure of \$22,500. The same amount was spent under the item of "general overhead." This included taxes, insurance, rent, depreciation and other charges.

The program department was the biggest single item with an expenditure of \$31,500, or 35 per cent. Office supplies and service consumed \$5,200, the commercial department \$4,500, while \$2,700 went toward the publicity department.

Uses Radio to Extend Long Arm of City Law

Radio has been used for broadcasting general police alarms and not infrequently the capture of a criminal has resulted. New York is the first city to put it to work as a detective in a big way. The radio system permits police headquarters to get into touch with any precinct station or with all of them in the fraction of a second.

Giant Wireless Tower

Details have been published of a proposal for a new wireless tower in Berlin which will be completed by 1930. The tower will be 2,100 feet high, more than twice the height of the Eiffel tower, with a restaurant on a slowly revolving floor, so that guests can watch the changing view in comfort.—Exchange.

No License on Listeners

Lifting the lid which imposed a license fee on listeners has increased the number of Danish fans by more than 15,000.

MONARCH QUALITY FOODS, YOUNG AND VIGOROUS, Gets Rich With Reclamation in Reclamation, Waves, Not Watts, Give Range, Amateurs Find, Method of Pepping Up Veteran Radio Tubes, Hornsbys' Main Aim Is to Beat Out the Giants, Simmons' Batting Form Appears to Be Awkward, Uses Radio to Extend Long Arm of City Law, Giant Wireless Tower, No License on Listeners.

Shift Wornout Tires to Front Wheels of Auto

It has been pretty definitely established that the rear right tire is the first to wear out, the rear left next, the front right next and the front left last of all.

As a result, practice has become almost general to shift the wornout tires to the front wheels with the idea of evening up the wear.

This, however, is dangerous. When a worn tire blows out on a rear wheel, while the car is traveling at a high rate of speed, the driver still has enough control of the front wheels to guide the car safely out of a dangerous skid.

When, however, a front tire lets go, and the car is moving fast, there is almost nothing the driver can do. The steering is thrown out of his control, the car is forced into a serious skid and there is great possibility of injuries to all in the car.

Rather leave a worn out tire on a rear wheel, even though it will wear down so much faster, than risk the dangers that go with changing it to the front. For greater safety, however, a tire that shows the first mark of a tread worn down to the fabric should be taken off and used only as a spare.

Even as a spare, it should be in use only long enough to get a good replacement.

Useful Carrying Case for Gasoline Lanterns

A gasoline lantern is a valuable addition to a motor camper's equipment, but many tourists object to its use because of the frequent breakage of mantles, due to the vibration of the car. The risk of breakage can be eliminated if a coil spring is provided under the dome nut of the lantern as shown, and the lantern is carried in

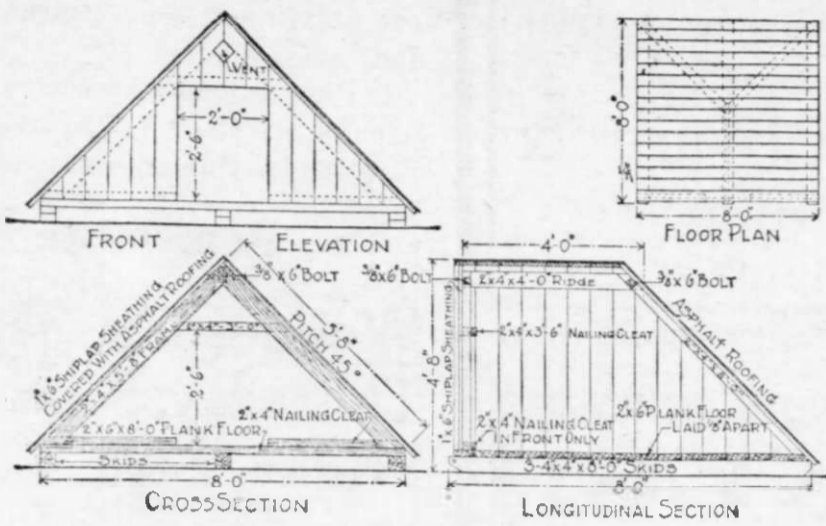

Gasoline Lantern Case.

An inverted position in a suitable container. The spring should be made of No. 22 or 24-gauge piano wire. The carton in which the lantern was originally packed will serve as a temporary container until a suitable carrying case can be made. The most important thing is to fit the spring and always carry the lantern upside down.

Perfect Alignment for Front Wheels Important

Are the front wheels in perfect alignment? If there is any question about it, there is an easy way to find out. Just drive the car over a wet pavement at moderate speeds. Misalignment is certain to show itself through a tendency to skid. If the car feels as if it were skidding, or tending to swerve, even though the steering is straight ahead and the brakes are not being used, the chances are that the alignment is not right and it should be checked up by better methods or by more accurate alignment devices. Since alignment varies if there is much wear on the bushings and steering connections, it is a good plan to run over a rough road and then repeat the test on the smooth, wet paving. Make sure, however, there is no brake dragging.

A-Shaped Hog Houses Can Be Moved to Clean Ground When Necessary

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of housing work on the farm, for the readers of this paper. An account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Since agricultural colleges have been advocating pasturing hogs and pigs on ground that was not used as pasture the year before as a means of saving a greater number of young pigs and to prevent the ravages of round worms and other enemies of hogs, the A-shaped hog house has come into greater use than ever before. An individual home for the sow and her pigs is believed to be the best method of housing.

Shown in the illustration are a number of A-shaped houses, each with a yard for the young pigs to exercise in, while the houses provide shelter at

Tile Used for Floors, Roofs and Partitions

Lightweight and incombustible tile for use as fireproof partitions, roof-decks and floors are manufactured from gypsum and wood fiber, with about 97 per cent of the whole being gypsum and the balance wood fiber. When used for partitions such tiles are laid up very much as brick is laid up, only the mortar used is a gypsum mortar.

For roof-decks they are manufactured to special sizes, laid across the steel roof members, fastened and then ready for any standard kind of a roof covering. When used for floors, they are covered with cement topping, over which the finish flooring is applied. In addition to barring fire, because of their incombustibility, such tile reduces the transmission of heat and sound from room to room or floor to floor, because of the natural insulating properties of the gypsum from which they are made and because of the hollow air space that each tile contains. They also can be sawed to fit odd-sized spaces with the same ease that wood is sawed and nailed.

Windows Are Called Eyes of Residence

For many years, probably centuries, windows have been used in residences. In spite of their being so generally used, they have not received the consideration that has been given other items.

When it is considered that windows are the eyes of the home, that they are the means of admitting the sunlight and air, it seems strange that they have been just a part of the house instead of one of the major items which make the house a home.

Casements were the original window. They possessed beautiful lines, were artistic and broke up the flat wall appearance when they were open, so much so that architecture was built around them. The early Americans were among the first to depart from the double-hung window, or what the French call the "guilotine" window. Formerly all casements were made of wood, and as time went on the limitations of wood made the casement

Oak Flooring Requires Attention Twice Yearly

Oak and other hardwood floors require attention and should be gone over and cleaned and touched up at least twice a year.

They should also be polished frequently and wiped off, using a soft cloth. Remove mud stains with soap and water, but do not use the soap too freely. Be careful with gasoline when removing stains, on account of inflammability. Where benzine fails, try oxalic acid.

A floor that is old and has become dark with age, having been oiled, as kitchen floors usually are, should be treated with varnish remover, which will soften up the oil, which in turn must be removed with cloths, washing off with benzine or turpentine.

Then bleaching powder should be applied over the floor and all difficult spots treated with oxalic solution, used spots treated with oxalic solution, used spots treated with oxalic solution, used spots treated with oxalic solution.

When a floor has been cleaned and touched up year after year it will need

less serviceable. Wood was subject to weather foibles, and shrunk or stuck, and sooner or later reached a point where the window had to be repaired or replaced.

The natural result was to use steel for these casements, since steel windows had proved so satisfactory in industrial buildings, schools, libraries and banks. This took place within the last five years, and as the acceptance grew, because of the practical qualities of steel casements, the manufacturers were able to place on the market a steel casement within the price range of most any home owner.

The architects have given wide acceptance to steel casements because of their beauty and efficiency. Steel has none of the limitations of other types of windows, and casements made of steel are today the modern window for residential use.

Draperies, shades and screens can be used with far more satisfying results than is possible with double-hung windows, and they are easy to erect. The fact that movable sections, or ventilators, are integral with the frames insures a more positive result when setting the windows in the wall. The narrow, trim steel lines improve their appearance; their life, under natural performance, is indefinite.

Unit Lock Will Save in the Cost of Labor

In these days of high cost of labor contractors are adopting all the labor-saving devices which they find good, and the unit lock is meeting with their favor for this reason. In the unit lock set the old type of mortise is eliminated.

The lock set is shipped by the manufacturers with knobs and escutcheons attached and the carpenter simply cuts a U-shaped notch in the edge of the door with saw and chisel, slips the lock into the cut and screws the escutcheon fast.

This type of lock is made in the highest grades only. It is found on the finest office buildings, banks and public structures and on fine homes for the outside doors. It is built like any other high-grade mechanism, to last, and the first locks of this type, placed more than twenty-five years ago, are still in use, with no cost of upkeep.

Baseboard Construction

In constructing the baseboard, it is well to nail the small quarter round molding at the bottom to the floor, so that slight sagging of the floors will not make an ugly crack. Should later shrinkage cause the floors to sink slightly, the molding will follow the movement of the floor, still maintaining a tight contact with the baseboard.

Feeding Value of Standardized Hay

Grade or Quality of Product Is of More Importance Than Kind.

(Prepared by the United States Department of Agriculture.)

Prejudice against certain kinds of hay or the claim of inferior feeding value is often due to a difference in quality rather than to the kind of hay, according to E. C. Parker, hay standardization specialist, bureau of agricultural economics, United States Department of Agriculture.

Many horse, mule and cattle feeders. Mr. Parker says, are of the opinion that hay made from either prairie grass or other grasses is of inferior value to either timothy or Johnson hay. This prejudice is usually justified where bluestem, bluegrass, red-top, or other kind of grass hay is overripe, bleached and fibrous when harvested, because all kinds of prairie or other "grass hays" when overripe, are comparatively low in feed value and palatability.

The feed value of timothy, of over-ripe timothy or Johnson hay. Analyses of timothy cut at various stages of maturity show that timothy cut not later than full bloom has a higher feed value than timothy cut at the ripe seed stage. Variations in feed value of all hay are caused by time of cutting, weather damage, and fermentation. The United States standards for timothy, Johnson, prairie, and grass hay reflect approximately these variations, so that usually the grade or quality of any of these hays is of more importance than the kind as a guide to feed value.

Hay, to meet the requirements of the United States No. 1 grade, must be cut early, cured with little or no damage from rain or sweating, and must not contain over 10 per cent of foreign material. Hay which meets the requirements of the United States No. 2 grade consists, usually, of either (a) early cut hay which received an appreciable though not severe degree of weather damage, or (b) late cut, though not fully ripe, hay which was cured with little or no weather damage, and in either case the hay must not contain over 15 per cent foreign material.

No. 3 Grade Requirements.

Hay which meets the requirements of the United States No. 3 grade consists, usually, of either (a) early cut hay which was severely weather damaged, or (b) distinctly overripe hay, and in either case the hay must not contain over 20 per cent foreign material. United States sample grade is either (a) hay that is unsound because of wetness, rust, or mold, (b) hay which contains over 20 per cent foreign material, or (c) badly over-ripe hay.

These brief descriptions of the various United States grades of prairie hay, grass hay, timothy hay, and Johnson hay, Mr. Parker says, show that

the hay of each grade has a somewhat different quality or feed value. There is no material difference, however, in the feed value of timothy and upland prairie hay if the two kinds of hay are of the same grade.

Concrete Approaches to Stables Not Expensive

On most barns there is a little ramp or incline leading to the door. When this is made of wood it rots out quickly and goes to pieces and is forever giving trouble. The way to avoid this is to build the approach of concrete. It can be very easily done and at very little expense.

Remove all the old wood sills and supports; then excavate a little so that when the concrete is finished it will be about six inches thick. Use planks at the sides for forms, holding them in place with stakes, driven in on the outside.

Use a fairly rich mixture of concrete, say one part of cement, one and one-half part of sand and three parts of broken stone or well assorted gravel. Mix it up thoroughly to a medium consistency, put it in place, strike it off with a straight edge and then smooth it down somewhat with a wood float. Do not use a steel float as that will put a polish on the concrete and make it very slippery.

It is better to leave it fairly rough as the horses can get a much better footing on it.

If possible, do not allow heavy weights to come upon it until it has cured for a week or ten days.

Proper Time to Harvest Corn Crop for Silage

Corn for silage should be harvested when the kernels are well dented but while the plants are still green enough to pack well and to ferment normally in the silo. An air tight silo is, of course, essential. Given these conditions the general quality of the silage may be improved by the following practices:

1. Cut the corn into small pieces. If the pieces are from one-half to three-fourths of an inch in length, the silage will pack well and will be eaten with minimum waste.

2. The heavy and the light parts of the corn should be evenly distributed so that the whole mass can be firmly and evenly packed in the silo. If the heavy parts—ears and stalks—are thrown largely in the center or one side, the silage will settle unevenly, and considerable spoiling will result.

If the corn is too ripe to pack well, water should be added as needed. A silo may be filled with dry shock corn, which makes a satisfactory feed with the addition of sufficient water, but it is not so palatable as silage cut at the proper stage and put into the silo green. Water may be run into the top of the blower by means of holes. The water should be well distributed to facilitate packing.

Apiary Practice and Honey Marketing Study Has Begun

First Work Started in Intermountain Regions.

(Prepared by the United States Department of Agriculture.)

Work on profitable practices in the operation and management of apiaries, as a preliminary step to the study of the economics of honey production, has been started by the United States Department of Agriculture. The practice study is being undertaken by the division of bee culture of the bureau of entomology, and the division of farm management and costs of the bureau of agricultural economics. Other divisions of the bureau of agricultural economics have under way studies of the important problem of honey marketing.

The first practice study has already been started in the intermountain region, where conditions seem favorable for inaugurating it at this time. It is felt that the work can be done in that region more easily, and therefore at less expense, than in some of the other beekeeping regions because of the presence of the Intermountain Field station, the large number of colonies, and the relatively high percentage of commercial beekeepers. The limited amount of money now available is being used for this part of the work. It is planned to continue the investigation in two or more other important honey-producing regions until a thorough study has been made of practices and systems of management under various typical beekeeping conditions. It is needless to say that such investigations as planned cannot be carried out successfully without the active co-operation of the beekeepers, beekeepers' organizations and the bee press. Beekeepers or organizations particularly interested are invited to write to the division of bee culture or the division of farm management and costs, as it is desired to make as many personal contacts as possible in the course of the work. Bookkeeping systems showing the results of profitable practices are especially desired at this time, particularly from beekeepers in the intermountain region.

Agricultural Notes

Did you ever happen to think that fall in the garden really begins in the summer?

Hay is worth more for milk production if it is cut early than if it is fully matured.

Now is the time for the poultry raiser to save expense by starting to cull out the low producers among his flock.

Loading hens in the farm flock cut up the profits the busy birdies make. Good poultrymen soon send them to the butcher.

Now is the time to select the dairy animals intended for exhibition at the fall fairs. They should be fed well, groomed daily, and taught to lead and stand.

To maintain a good milk flow during the fall months, extra feeding of green feed or grain, or both, should begin now or as soon as pastures begin to get short.

If high production is to be maintained the hen flock must consume large quantities of laying mash and be culled regularly every two weeks, Penn State poultry specialists say.

Salt is needed by all animals that eat vegetable and plant food. The average requirements for cows is about three-fourths of an ounce a day per 1,000 pounds live weight and a similar amount for each 20 pounds of milk produced.

Copper carbonate dust does not kill the smut spores on the seed wheat until after the seed is in the ground where the dust is dissolved by the water in the soil. For this reason, it is essential that the dust stick on the seed until it is planted. Successful treating means plenty of dust and sufficient agitation in a fairly air-tight treater to thoroughly coat each kernel.

No Phone Service for Channel Isles

It is impossible to telephone from England to the Channel Islands—Jersey, Guernsey, Alderney and Sark. They have always been in a state of splendid telephonic isolation in spite of the fact that telephone conversations between that country and the United States and other distant countries are going on every day.

This "discovery" was made by a reporter who had an urgent message to convey to Jersey. "We have no telephonic communication at all with the Channel Islands, and we never have had," explained a post office official. "It is possible that lines to Jersey and other places may be a development of the future, but we have none at present." Jersey has a population of 49,404 and Guernsey 40,120.

Very Aukward

The well-known actress rushed into her press agent's office holding the evening paper in her outstretched arms.

"I am ruined!" she cried. "Ruined! Look at this!"

"What is it? Another scandalous story about you?" asked the press agent.

"Worse than that," was the reply. "I signed a testimonial stating that I always smoked Midway cigarettes because they never bothered my throat; and I signed another testimonial that I always use Lymphatic lozenges to protect my throat after smoking; and here they are both on the same page!"

Which Is Bigger?

Which is the biggest, Mr. Bigger, Mrs. Bigger or their baby? Answer, the baby is a little bigger.—Capper's Weekly.

If a woman once poses as a beauty it keeps her busy trying to live up to it.

An Inch of performance is worth a fard of promise.

"WORTH WEIGHT IN GOLD"

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sanative Wash. The medicine that will do for me what the Vegetable Compound and Sanative Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound."—Mrs. CHARLES MORGAN, R. F. D. 1, Tully, N. Y.

Automatic Power
A power station run without the aid of human hands is now being constructed in Sweden at Surahammar in the province of Vestmanland by the Swedish General Electric company of Vasteras. Automatic devices will enable the engineers at the control station, located far from the plant, to gauge the speed of the engines and the high-water level at the power station as well as detect any possible faults with the motors. The plant is entirely self-regulating, so that the turbines adjust themselves automatically to the flow of water.

Beneficent Silence

"And you were present at Jean's wedding, dear. Who gave the bride away?"

"Oh, nobody said a word!"

Jealousy is the greatest vice of the smallest minds.

Revenge is a gun that clicks harder than it shoots.

Nurses Know, and Doctors Have Declared

There's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it's genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark of Bayer Manufacture of Monocristalline Acetylsalicylic acid

W. N. U., MILWAUKEE, NO. 35-1928.

Information Is for Problem

When Gas Fires in Cylinder

When gas accumulates in a cylinder and is ignited, it causes an explosion which has killed and maimed many people. However, there is a solution in its solution.

When, however, a front tire lets go, and the car is moving fast, there is almost nothing the driver can do. The steering is thrown out of his control, the car is forced into a serious skid and there is great possibility of injuries to all in the car.

Rather leave a worn out tire on a rear wheel, even though it will wear down so much faster, than risk the dangers that go with changing it to the front. For greater safety, however, a tire that shows the first mark of a tread worn down to the fabric should be taken off and used only as a spare.

Even as a spare, it should be in use only long enough to get a good replacement.

Useful Carrying Case for Gasoline Lanterns

A gasoline lantern is a valuable addition to a motor camper's equipment, but many tourists object to its use because of the frequent breakage of mantles, due to the vibration of the car. The risk of breakage can be eliminated if a coil spring is provided under the dome nut of the lantern as shown, and the lantern is carried in

Gasoline Lantern Case.

An inverted position in a suitable container. The spring should be made of No. 22 or 24-gauge piano wire. The carton in which the lantern was originally packed will serve as a temporary container until a suitable carrying case can be made. The most important thing is to fit the spring and always carry the lantern upside down.

Perfect Alignment for Front Wheels Important

Are the front wheels in perfect alignment? If there is any question about it, there is an easy way to find out. Just drive the car over a wet pavement at moderate speeds. Misalignment is certain to show itself through a tendency to skid. If the car feels as if it were skidding, or tending to swerve, even though the steering is straight ahead and the brakes are not being used, the chances are that the alignment is not right and it should be checked up by better methods or by more accurate alignment devices. Since alignment varies if there is much wear on the bushings and steering connections, it is a good plan to run over a rough road and then repeat the test on the smooth, wet paving. Make sure, however, there is no brake dragging.

Portable Bed for Overnight Stops

For the motorist who desires for auto interiors which provides a comfortable rest for the night, this portable bed is a device which does not want to find hotels for the night. The front and rear seats are adjusted

Oil Breaker Cam

The breaker cam in the distributor is one unit that rarely gets consideration in the automobile lubrication process. Of course, it rarely needs it, but the thoughtful motorist who wants to keep this unit functioning at its highest efficiency will get around to the task once a year, at least.

Each side of the cam should be treated to a thin coating of light grease. The best way to apply it is by using a toothpick or a small match stem.

(Authorized and to be paid for by John F. Enz)

Are You Represented In Congress?

How would you like to go to Europe? Not on a pleasure trip, but to earn your living, perhaps in a European factory, perhaps on a European farm? A ridiculous question, of course. But you might just as well be over in Europe, competing with European workingmen and farmers as to permit the importation of European manufactured goods and European grown farm products to compete on a basis of equality with American farm and factory products. That's why we have a protective tariff to protect the American workingman and the American farmer from competition with cheap European labor. There are 28,000,000 automobiles in the United States, one for every family of four people. In Europe the automobile is still a curiosity. Those of you who have visited relatives back in the old country know that they just will not believe you when you tell them about the comforts and luxuries that every American family can have. Let us keep the American standard of living and even improve it.

Elect John F. Enz and Keep the Tariff Protection

Great big ocean-going freighters and passenger ships tying up at the docks of our lakeport cities—an enormous shipbuilding industry—cheaper transportation for farm and factory products—cheaper passenger transportation to the eastern states and to Europe—great increase in population and property values—these are the things we are assured by the building of the St. Lawrence-Great Lakes Waterway.

Elect John F. Enz and Make The St. Lawrence Waterway a Reality

Every year the state of Wisconsin of which you and I of the Second District are a part, are helping to pay into the treasury of the United States the enormous sum of \$35,000,000 to \$40,000,000. Wisconsin gets back from that amount the paltry share of less than three million dollars, largely in federal highway aid. We are entitled to more. We would get more, represented in deeper harbors, post-office buildings, federal aid for highways, schools, etc., if we were in better standing at Washington.

Elect John F. Enz and Get Your Share of Federal Aid

For years Wisconsin people have been flim-flammed into sending men to Congress who pride themselves on standing with the majority, being out of step, and then returning to Wisconsin to gather in the votes once more, by shouting the sordid tales of corruption and graft in high places. Under this smoke screen, Wisconsin people have practically deprived themselves of representation in Congress, for, by the attitude of the Wisconsin delegation, Wisconsin has had the short end of everything. Now we want protection for the farmer and for the workingman of Wisconsin, and more particularly for the farmer and for the workingman of the Second District; we want the St. Lawrence-Great Lakes Waterway; we want more money for harbors, post-offices and other public improvements and programs.

We can have these things for the asking, if we will send Republicans, those who are not ashamed to acknowledge their party, men who are in the Republican party because they believe in its principles, men who are not using the Republican party as a cloak for their pernicious political activities and outright treachery to that party.

Everybody knows JOHN F. ENZ. We know he will keep his word and work for the interest of his constituents every day he spends in Congress. He has the ability, the industry, and the good tact to get for the 2nd district the things we want.

MAKE YOUR VOTE MEAN SOMETHING ON SEPTEMBER 4th (REPUBLICAN PRIMARY)

SEND JOHN F. ENZ to CONGRESS

RESOLUTION OF CONDOLENCE

(Authorized, circulated and paid for by John H. Frey, Hartford, Wis.)

JOHN H. FREY
On account of harvesting and threshing I have been unable to see all of the voters of Washington county personally, so I am taking this opportunity to ask them for their support on September 4. My opponent, Theo. Holtebeck, who was born in Canada, of Norwegian descent has been very busy the last four months misrepresenting and trying to give the public a wrong impression of me when I was sheriff of this county. I will invite the public to investigate my record as an officer and then decide for themselves. Mr. Holtebeck publicly accused me of being a "cheap guy." As to trying to gain votes with cigars and drinks, I wish to say I have no gamblers or proprietors of houses of ill fame backing me financially; my expense in this campaign is of my own private funds. If I am elected sheriff I will be under no obligation to anyone, and will be in a position to run a respectable, clean, law abiding county the same as I did in 1925 and 1926.

The sheriff's office, if properly conducted, is the most important office in the county and should not go to a man for chicanery or sympathy.

Respectfully submitted,
JOHN H. FREY
R. 2, Hartford, Wis.

—Lloyd and Clarence Brunner of Bedford, Wis., Mr. and Mrs. W. H. Hess and family of West Bend, Mr. and Mrs. Fred Guth and family of Beaver Dam, Mr. and Mrs. P. Klumb and family of Kohlsville and Mr. and Mrs. Clifford Stautz and family of Dautwin spent last Friday with the Brunner families here. Lloyd and Clarence Brunner, who made the trip in a Studebaker Commodore car, returned to their home on Monday.

—Mrs. Math. Ogenorth and children and Miss Olive Ogenorth left Sunday on their return trip to Tacoma, Wash., the former to her home there, and the latter to resume her duties as teacher at Lincoln High School, after spending the summer months at the home of the latter's father, Mr. John Ogenorth and other relatives.

—A number from here attended the skating tournament at Fond du Lac last Sunday.

An Enormous Needless Waste

If you had occasion to cross a toll-bridge every day and was forced to hand out 15 to 25 cents every time for the privilege of driving across you would certainly appreciate the fact if a free bridge was opened for the benefit of the public. Many producers pay toll amounting to thousands of dollars per year, in lower butter-fat prices, on account of those who will not cool milk properly at once after milking. When milk leaves the udder of the healthy cow it is perfect, and can be kept in this same perfect condition, if cooled at once and kept cool. Until all producers realize this, and work together for the production of good milk only, they will continue to pay toll.

THE KEWASKUM CREAMERY

STUDEBAKER

30,000 MILES in 26,326 MINUTES

(total elapsed time)

At Atlantic City Speedway, between July 21 and August 9, four regular factory production Studebaker President Eight again proved Studebaker's supremacy in the automotive world.

Under strict supervision of the American Automobile Association, two President Eight roadsters traveled 30,000 miles in less than 27,000 consecutive minutes—19 days and 18 nights of driving at better than 68 miles per hour! Two President sedans averaged 63.99 and 64.15 miles per hour for the same distance! All four cars were strictly stock—chosen at random from Studebaker's assembly line by A. A. A. officials.

Even before this great achievement, Studebaker held more official speed and stamina records than all other makes of cars combined—The Commander with 25,000 miles in less than 23,000 minutes; The Dictator with 5,000 miles in less than 4300 minutes; and The Erskine Six, at \$860 f. o. b. factory, 1600 miles in 984 minutes!

Whatever Studebaker-built car you buy, you are assured superlative performance—supreme economy. Profit value. See and drive a Studebaker today!

STUDEBAKER'S FOUR NEW LINES

The Dictator \$ 835 to \$1045
The Commander 1185 to 1395
The President Eight 1425 to 1665
The President Six 1665 to 2485
All prices f. o. b. factory

BEECHWOOD

Mrs. Frances O'Connell spent Thursday and Friday at Fond du Lac. Mrs. Ruth Fay of Eden is spending the week with her sister, Mrs. Dave Schaefer. Mr. and Mrs. Henry Schultz and son Leo, Mr. and Mrs. John Gatzke spent Saturday and Sunday at Fond du Lac. Miss Viola Vetter of Milwaukee visited Saturday and Sunday with Mr. and Mrs. John Gatzke and family. Mrs. John Gatzke and son Leo, Mrs. Marie Hanrahan and family and Misses Edna Foy and Lillian Hanrahan called at the Ray Krahn home. Mr. and Mrs. Julius Glander and Mrs. and Mrs. Ray Krahn, Mr. and Mrs. Martin Krahn and Mr. and Mrs. Edwin Krahn and son called at the Bob Oberdas resort Monday evening. About one hundred friends and relatives gathered at the home of Mr. and Mrs. John Gatzke and family Sunday evening in honor of their 25th wedding anniversary. At nine o'clock a service was delivered by Rev. G. K. Kasper. The evening was spent in a social way and at midnight a delectable repast was served after which all returned to their homes wishing Mr. and Mrs. Gatzke many more such happy celebrations. Those from afar who attended were: Mr. and Mrs. Frank Ebert of Fond du Lac, Mr. and Mrs. Wm. Ebert and daughter of Clintonville, Mr. and Mrs. Philip Conrad and Mr. and Mrs. Edgar Conrad and daughter of Kiel.

NEW FANE

Mr. and Mrs. Theo. Dworschak visited Monday with Charles Bremser. Mr. and Mrs. Frank Ehnert spent last week with friends at West Bend. Mr. and Mrs. Art. Naumann spent Sunday with Mr. and Mrs. Jac. Fellenz. Miss Lillian Moldenhauer is spending a week's vacation with relatives at Jackson. Mr. and Mrs. Frank Ehnert and son visited Sunday with Mrs. John Heberer at Plymouth. Mr. and Mrs. Harry Ehnert and son of Milwaukee and Miss Irma Ehnert are visiting with relatives in Minnesota and North Dakota. Miss Alice Kern and Mr. and Mrs. Theo. Dworschak and daughter spent Sunday at Holy Hill and with Mr. and Mrs. Rudolph Spiegling and family at Hartford.

ST. KILIAN

Andy Strachota of Milwaukee is spending the week with relatives here. Mr. and Mrs. Martin Berg of Edgar visited several days with the latter's brothers, Strobel brothers. Mr. and Mrs. E. German, Marie Flasch and Silverio German visited at Argyle and Iowa several days. St. Kilian defeated the Ashford nine at Ashford Sunday afternoon by a score of 17 to 2. Thelen, hurler for the losers struck out 3 men while Felix stopped 13.

Detective Reaction

How a person reacts to surprise, fear, love, alcohol, coffee, or cigarettes is said to be revealed with scientific accuracy by a new "vitality meter," which records graphically the rate and nature of pulses. Attached to the wrist of the person being examined, a sensitive detector transmits to a recording paper drum every heart action and vibration of the nervous system.

Capacity for Love

In the most perfect love, the lovers' hearts are not exactly the same, but their union ever so close; the one better of the two needs most the love that is deeper; and the one who loves with a deeper love will be surely the happier.—Master.

NEW PROSPECT

Mrs. Jos. T. Seboka is spending the week at her home at Kekoske. Gust and Emil Flitter are spending the week with relatives at Milwaukee. Mr. and Mrs. Rich. Trapp spent the week-end with relatives at Fond du Lac. John Flitter of Campbellsport spent Sunday with his uncle, John Tunn and family. Miss Margart Schneider of Oshkosh is spending a few weeks with the Geo. H. Meyer family. Emil A. Bartelt and Catherine Carlson spent Sunday with Mr. and Mrs. Otto Bartelt at Slinger. Mr. and Mrs. Louis Krueger of Mayville spent Tuesday with the latter's brother, Emil A. Bartelt. Mrs. Anton J. Marx returned Tuesday from a week's visit with relatives at Cascade and Sheboygan. Oscar Stern and the Misses Ruth and Emma Schultz attended the county fair at Plymouth Thursday. Mr. and Mrs. Garret Romaine of Fond du Lac were Sunday guests of Mr. and Mrs. W. J. Romaine. Mr. and Mrs. Moritz Weasler of Four Corners spent Wednesday evening with friends in the village.

FOUR CORNERS

Darwin Koch is spending a few days with friends at Milwaukee. Miss Lena Weasler and friend spent Sunday with friends at Milwaukee. Mr. and Mrs. Wm. Strupp were Saturday evening callers at the Mary Furlong home. Mr. and Mrs. Arnold Miske called on the latter's parents, Mr. and Mrs. Chas. Schultz, Friday. Wm. Ketter Sr. and son William of Waucousta spent Sunday with Mr. and Mrs. Joe Ketter. Mr. and Mrs. Geo. Miller and family of Sheboygan were Sunday evening callers at the Wm. Klabuhn home. Mrs. M. Weasler and daughter Elizabeth spent Sunday afternoon with Mr. and Mrs. Arnold Butzke at Waucousta. Mr. and Mrs. Leo Long and family of Milwaukee spent Saturday and Sunday with Mrs. Mary Furlong and daughter Emma. Mr. and Mrs. Henry Butzke and family and Mrs. Albert Butzke Sr. spent Sunday with Mr. and Mrs. Wm. Hintz and family. The basket lunch picnic of the Royal Neighbors held on the lawn of Roy Ours was largely attended and everyone had a good time.

Mr. and Mrs. Otto Hinn and family of the town of Scott, Ed. Marquardt spent Sunday evening with Mr. and Mrs. Henry Butzke and mother. Mr. and Mrs. Peter Ketter and son Leo and Mrs. Julia Miller spent Sunday with Mr. and Mrs. Joe Ketter and Mr. and Mrs. Henry Ketter and family. Mr. and Mrs. Geo. Klumb of West Allis, Mr. and Mrs. E. W. Heilman of Chicago spent Sunday evening with Mr. and Mrs. Herbert Koch and daughter.

Mrs. John Koch and family of Chicago, who spent the past two weeks with relatives here, returned to her home with Mr. Koch, who spent Sunday here. Mr. and Mrs. Ed. Koch and daughters Beulah and Bernetta and son Donald, Mr. and Mrs. Peter Ketter and son Leo and Mrs. Julia Miller spent Tuesday evening with Mr. and Mrs. M. Weasler and daughters. Among those who attended the christening of the little daughter of Mr. and Mrs. Wm. Koch at their home Sunday were: Mr. and Mrs. Belling and family of Lomira, Mr. and Mrs. John Koch and family of Chicago, Mr. and Mrs. Leo Koch and son of Milwaukee, Mr. and Mrs. Mirkel of Milwaukee, Mrs. Ball and family of Milwaukee, Mr. and Mrs. Art. Buss and family of Kewaskum, Mr. and Mrs. Leo Ferber and family of Campbellsport, Mr. and Mrs. Herbert Koch and daughter, Mr. and Mrs. Ed. Koch and family and Miss Alma Koch. The little girl received the name Elaine Meta. The sponsors were Mrs. Belling of Lomira, John Koch of Chicago and Mrs. Herbert Koch of here.

WEST WAYNE

Melvin Fritz visited Sunday with Milton Coulter. David Coulter attended the State Fair at Milwaukee Tuesday. Miss Elvira Coulter visited with Mrs. Wm. Coulter and daughter Violet Tuesday afternoon. Miss Lizzie Schmidt and niece Rose Schmitt visited with relatives at Kohlsville a few days last week. Mr. and Mrs. Jos. P. Schmitt and family visited Sunday with Mr. and Mrs. Jack Murphy at Milwaukee. Mr. and Mrs. Jos. P. Schmitt and sons Herbert and Peter and Mr. and Mrs. Joe Theisen are visiting at Marshfield this week.

CEDAR LAWN

Wm. Bartelt of Mitchell spent Saturday in the town. Mr. and Mrs. John Skelton are the happy parents of a son. Mr. and Mrs. Ralph Kohlman spent Friday evening at the fair in Plymouth. Mr. and Mrs. Edgar Bowen visited at the Ezekiel Bowen home Thursday evening. Mr. and Mrs. Herbert Krahn visited Mrs. Paul Krahn at the Plymouth hospital Thursday. Mr. and Mrs. Tom Long, Mr. and Mrs. Will King and daughter Elaine spent Saturday and Sunday at the Dells of Wisconsin.

Subscribe for the Statesman and get the news of your home community.

BOLTONVILLE

Mr. and Mrs. Geo. Hiller and children spent Sunday at Milwaukee. Mrs. J. Emley of Batavia spent a few days at the Wm. Enright home. Mrs. Keller of Milwaukee is spending a few days at the Chas. Stautz home. Mr. and Mrs. Oscar Koth and family spent Sunday with relatives at Waterloo. Mr. and Mrs. Chas. Stautz and Mrs. Keller spent Sunday at Philip Hauck's at Adell. Mr. and Mrs. Otto Liepert spent a few days at Milwaukee and also attended the State Fair. Miss Sophia Kraetsch and Mrs. Geo. Hiller and sons were entertained at the Ed. Beger home last Wednesday. Mr. and Mrs. Oscar Marshman, Cora Marshman and John Kempf spent Sunday with relatives at Whitefish Bay. Lucile Weyker and Leo Weiss and sister Regina of Milwaukee spent Saturday evening with the Marshman family. Mr. and Mrs. Oscar Lierman and family of Hulls Crossing spent Sunday with the O. Schultz and Herman Voltz families. Mr. and Mrs. Fred Stautz and Mr. and Mrs. Aug. Held of West Bend spent Sunday evening with the Chas. Stautz family. ODD PUNISHMENT

Around 1800 the law had a "bite" to it in Trumbull county, Ohio, for an old story tells that a self-organized tribunal did to a man convicted of stealing from his fellow boarder. The defendant was sentenced to be "dressed" of his apparel, tied to a tree, and subjected to the bites of mosquitoes for an hour.

FAMOUS IRISH WRITER

Charles James Lever, the talented and popular Irish novelist, lived from 1796 to 1872. He was educated at Dublin for the medical profession, and then turned to literature. At the age of thirty years he had written the well-known stories, "Harry Lorrequer" and "Charles O'Malley." His books abound in rollicking good humor.

LASTING MONUMENTS

If we work upon marble, it will perish; if we work upon brass, time will efface it; if we rear temples, they will crumble into dust; but if we work upon immortal minds, if we imbue them with principles, and with the just fear of God and love of our fellow men, we engrave on those tablets something which will brighten all eternity.—Daniel Webster.

HEAT VALUES OF WOODS

The heat values of some common oaks and maples in millions. British thermal units, are: Post oak (Quercus tinctoria), 24.0; red oak (Quercus rubra), 21.7; white oak (Quercus alba), 22.0; black oak (Quercus velutina), 22.0; sugar maple (Acer saccharum), 21.8; silver maple (Acer saccharinum), 17.8; red maple (Acer rubrum), 18.1.

ARCTIC WIRELESS

The most northern wireless station in the world has been erected on Cape Deziar, jutting into the Arctic zone west of Archangel. It will be used to keep in touch with explorers entering the Arctic by airship and airplane.

TALKING ABOUT NOISE

Noise-merely relative paragraph in McPherson Republican: "If you think that a hen makes a lot of noise after she lays an egg, just come in contact with a man after he has laid a carpet."—or beaten a rug.—Capper's Weekly.

LORD MADE LOTS OF THEM

There are probably three and one-half million kinds of insects in the world, say the scientists, and this doesn't include the kind that think the girl's are all crazy about him.—Capper's Weekly.

HAD FIRST BALLOON IDEA

Joseph Michael Montgolfier was the inventor of air balloons. He discovered that a balloon, with a car attached, could be kept suspended by a supply of heated air. His brother, Jacques Etienne, collaborated with him in his scientific pursuits and participated with him in his first experiment in 1783.

DISTANCE'S LURE

I have heard it said of a great painter, "Don't go too close to it" in order to get the best out of a picture, view it in the proper light, and from a distance. If you get too close a look, you will realize the rough way in which it is made. . . . I prefer (now) to also view women from a distance; never closer than four or five feet.—E. W. Howe's Monthly.
