

Correspondence

NEW PROSPECT

Erick Falk of Mitchell spent Thursday with his brother Edwin and family.

A large number from here attended the band concert at Campbellsport Sunday.

Mr. and Mrs. W. M. Bartelt visited Sunday with Mr. and Mrs. Edgar Sook at Waucousta.

Mr. and Mrs. John Koepke and family of Kewaskum called on relatives here Saturday evening.

Mr. and Mrs. W. F. Schultz, daughter Ruth and Oscar Stern were Fond du Lac visitors Friday.

Mr. and Mrs. August Stern, son Oscar and Miss Ruth Schultz were West Bend callers Saturday.

Mrs. Edgar Sook of Waucousta spent Friday with her parents, Mr. and Mrs. Wm. M. Bartelt.

Mrs. Jos. T. Seboka returned home Wednesday from a few days' visit with relatives at Milwaukee.

Jack Romaine of Fond du Lac is spending the week with his grand parents, Mr. and Mrs. W. J. Romaine.

Mr. and Mrs. Fred Hanson and family of Milwaukee spent Sunday as guests of Mr. and Mrs. August Jandere.

Mr. and Mrs. George M. Romaine called on their son Elwyn Romaine and family at Kewaskum Saturday evening.

Mr. and Mrs. Elton Romaine of Cincinnati, Ohio are spending some time with their daughter Dorothy and Mr. Romaine's mother, Mrs. Anna Romaine.

Mr. and Mrs. O. W. Bartelt of Waucousta and Mrs. William M. Bartelt from here, spent Wednesday evening with Mr. and Mrs. Venus Van Ess at Adell.

Mr. and Mrs. W. Haupt and family and Mrs. John Fedler of Milwaukee, spent Saturday and Sunday with the latter's husband and Mr. and Mrs. John Tunn and family.

Mr. and Mrs. Richard Trapp and children Gerald, Virginia and Marilan and Mrs. W. J. Romaine spent Friday with Mr. and Mrs. Clarence Hill and other relatives at Fond du Lac.

Mr. and Mrs. J. P. Uelmen and Mrs. A. Krueger in company with Mr. and Mrs. John Bowser and children, Mary, Kathleen Ann, and Roman of Batavia spent Sunday at Port Washington.

Mr. and Mrs. Peter Rinzell of East Valley passed through here Tuesday morning enroute to Edgar, Wis., where they will visit with the latter's mother, Mrs. Rauhen and other relatives for a week.

Mr. and Mrs. George H. Meyer and family spent Saturday evening with the John Bowser family at Batavia.

Their daughter Jeanette, who spent over the week-end with the Bowser family returned home with them.

The Misses Martha and Leona Rinzell and their brothers Math and Edmund of East Valley and their aunt, Mrs. James Blackmore of Milwaukee, are spending a week at the Noah Netzing cottage at Forest Lake.

Mr. and Mrs. John Diefenbach and Mrs. Johanna Hoff of Slinger, Mrs. S. Mathison, the Misses Evelyn, Marian, Ellen and Elaine Blum of Milwaukee were guests of Mrs. A. Krueger and Mr. and Mrs. J. P. Uelmen Wednesday.

AMUSEMENTS

Saturday, August 10—Grand Benefit Dance, Kewaskum Opera House, given under the auspices of the Kewaskum Fire Department. Music will be furnished by Windy Jacobs and his musical Aces. All are invited.

Saturday, August 17—Grand dance in Wietor's hall, Wayne Center. Music by Shorty Hoffman's orchestra. A cordial invitation is extended to all.

—Frank Wietor extends a cordial invitation to all to attend the grand dance to be held in his hall at Wayne Center on Saturday evening, August 17. Shorty Hoffman and his famous musical artists will furnish the music. A good time is in store for all.

The funeral was held Friday at 2 p. m., from the Reformed church in Campbellsport. Burial was made in the town of Auburn.

CARD OF THANKS

We desire to express our sincere thanks to all our relatives and friends for the kind sympathy shown us in our recent bereavement, the illness, death and burial of our beloved mother, Mrs. Friederika Kludt. For the beautiful floral tributes, to the pall bearers, to the choir, to Rev. Kaniess for his consoling words, to all who loaned cars and to all who attended the funeral.

The Surviving Children.
MEMORIAL

We loved her, we loved her,
But Jesus loved her more,
And he has sweetly called her,
To Yonder shining shore.

The golden gates were opened,
A gentle voice said "Come,"
And with farewells unspoken,
She calmly entered home.

Anyway, Something Has Made Him Feel Better By Albert T. Reid

(While the Doc is reading the Thermometer)
"GEE, DOC,—THAT DONE ME A LOTTA GOOD!"

\$7,000 POT OF GOLD AT EDEN

A \$7,000 "pot of gold" is hidden away on a farm in the town of Eden and only a prisoner at the county jail knows its location, according to a story told to Sheriff Alfred Vande Zande and Undersheriff Fred W. Schlaak.

Attempts to find the "pot of gold" have been made before but in each case the searchers failed to dig deep enough, according to the story told the officers. In the last attempt the searchers are reported to have gone down seven feet.

The man who knows the location of the "pot of gold" is being held at the county jail in default of \$2,500 bond. He has been bound over to circuit court on a serious charge, conviction of which carries a long prison sentence.

Sheriff Vande Zande and Undersheriff Schlaak were called to the man's cell and told about the hidden "fortune." The prisoner asked to be taken to his home to obtain a divining rod, used in locating metals beneath the ground.

The prisoner said that he had located the gold with the divining rod on a previous occasion and that he had induced some friends to help him dig for it. They gave up, however, before they reached the fortune, he told authorities.

If he locates the gold, the prisoner would be able to obtain his own release from the county jail and would also handsomely reward county authorities for their assistance, he told them. It was said at the jail that digging would have to await the prisoner's release upon other grounds than his own request.—Fond du Lac Commonwealth Reporter.

MAYVILLE BAND WINS FIRST PRIZE

The Tri-County Band association convention held at Campbellsport last Sunday, was attended by a large crowd. The convention was held in Schmidt's grove with the exception of the parade which moved through Main street. There were eight bands in attendance, namely: Hustisford Concert band, Theresa Village band, West Bend Moose band, Ashippun band, Iron Ridge Concert band, Hartford Legion band, Mayville band and the Campbellsport band. The Mayville Military band won first place, the American Legion band of Hartford, second. The judges were R. V. Hall of Fond du Lac, Dr. P. A. Hoffman of Campbellsport and Prof. C. C. Schaeffer of the Schaeffer school of Music of Milwaukee.

Uncle Eben

"You got to admire a great statesman," said Uncle Eben. "He gets no honor and applause than any musician to be band an' don't have to learn to play no instrument whatever."—Washington Star.

Childish Writing

When children begin to write they often do so from right to left. It is called mirror writing. When held up to a mirror it looks correct. Mirror writing has no special significance and it passes as the child grows older.

Church Notices

PEACE EVANGELICAL CHURCH
9 A. M., Sunday School.
10 o'clock, English services.

ST. LUCAS EVANG. LUTHERAN CHURCH
Sunday morning, Aug. 11, we will celebrate Holy Communion in the German language. Confession services begin at 9:30. Regular services at 10 a. m.

One week from Sunday, namely the 18th of August, services will be dropped. On that Sunday the new seminary at Thiensville will celebrate its dedication. All are welcome to attend.
Pastor: Gerhard Kaniess.

ST. JOHN'S LUTH. CHURCH
New Fane
The annual mission festival will be celebrated at St. John's Lutheran church, New Fane, Sunday, August 11. The Rev. Ed. Krause of Sheboygan will deliver the first sermon at 10:00. The Rev. Martin Schmidt of Plymouth the second at 2:30 p. m., and the Rev. Philip Lange will deliver an address in English at 8:00 p. m. Everybody is cordially invited to attend.
C. J. Gutekunst, Pastor.

ST. LUCAS SUNDAY SCHOOL PICNIC
Sunday afternoon, Aug. 11th, the Sunday School will stage its picnic in the grove of August, Bilgo, better known as the North Side Park. At this picnic games of all sorts will be played with the children, and the winners will receive prizes. Everybody is welcome to come and spend an enjoyable afternoon with the children. Other amusements will also be at hand. Refreshments will be served for all.
Pastor: Gerhard Kaniess.

DESERTED INJURED COMPANION
Deserted by his companions after the car in which the three had been riding had collided with a tree, John Burke, of Milwaukee, was left on the lawn of a farm home near Diefenbach Corners at Cedar lake last Saturday evening, with a sprained hip and shoulder. The trio, who were reported to have sufficient reason for fearing of being caught, met with their accident between Kimmerling's resort and Diefenbach Corners. While Deputy Sheriff Dhein of Slinger began a search for the brother and the cousin of Burke, who were his companions, the latter was brought to St. Joseph's hospital. He is still at this place, suffering from the injuries mentioned above and from severe bruises.—Hartford Times.

CARD OF THANKS

We, the undersigned desire to express our sincere thanks to all our relatives, neighbors and friends for the kind sympathy extended to us in our late bereavement, the illness, death and burial of our beloved wife and mother, Mrs. Conrad Bier Sr. To the pall bearers, to Rev. Kaniess for his consoling words, to Clem Reinders, for the beautiful floral tributes, the choir to all who loaned cars and to all who attended the funeral.
Conrad Bier Sr., and son.

Correspondence

DUNDEE

C. W. Baetz and family spent Monday at Plymouth and Sheboygan.

Mr. and Mrs. H. W. Krueger and son Kermit spent Monday at Milwaukee.

Stanley Shnivi of Chicago visited Saturday and Sunday with his family at Long Lake.

Mr. and Mrs. Jacob Jeske left Saturday for their home in Fox Point for an indefinite stay.

Orville Mathies, who was employed at Milwaukee, returned home last week for an indefinite stay.

Mr. and Mrs. Henry Habeck and children of Fond du Lac visited Sunday with Mrs. Lydia Hennings.

Mr. and Mrs. George Gilbey visited Sunday with the latter's mother, Mrs. Regina Bauers at Campbellsport.

Mr. and Mrs. William Larson and son of Woodhall were Saturday afternoon visitors at the C. W. Baetz home.

Miss Edna Roehl who is employed at West Bend, visited Saturday and Sunday with her parents, Mr. and Mrs. Otto Roehl.

Dr. and Mrs. O. J. Wolfgram of Lyons is visiting this week with the former's brother August and other relatives here.

Miss May Murthy who is employed at Lake Pewaukee visited Saturday with her grand parents, Mr. and Mrs. Adan Brown.

Mr. and Mrs. T. M. Koehn and daughter Althea and Mr. and Mrs. H. Hofeman and children, spent Friday at Milwaukee.

Mr. and Mrs. Lester Engelman and daughter Coral of West Bend, visited Sunday with Mrs. Engelman's parents, Mr. and Mrs. August Falk.

Mr. and Mrs. Oscar Hintz and children were entertained by the latter's sister and brother-in-law, Mr. and Mrs. Edwin Wittloof at Plymouth Sunday.

Mrs. H. W. Krueger and son Kermit returned home Thursday after a few days' visit with the former's parents, Mr. and Mrs. Emil Huberty at Plymouth.

Mr. and Mrs. Wm. Hammer and daughter Doris and Mr. and Mrs. Erwin Mathies and children of Batavia visited Sunday with Mr. and Mrs. Peter Brawand.

Mr. and Mrs. John Furlong and son Roger of Plymouth visited Sunday with the former's mother, Mrs. Mary Furlong and also called on the Henry Hafemann family.

Mr. and Mrs. Edward Koehn and their daughter Althea attended the jurymen picnic at Lake Deneve Sunday. Mr. Koehn was a member of the jury the last term.

Mrs. Lydia Hennings and son Earl spent Friday at Fond du Lac. The former remained there till Sunday and visited with her daughter and son-in-law, Mr. and Mrs. Henry Habeck.

Mr. and Mrs. Carl Dins and sons Ronald and Carl Jr., and their guests, Mrs. Wm. Schaeffer and daughter Betty of Milwaukee, were entertained at the home of Mr. and Mrs. Marion Tuttle in Mitchell Sunday.

On August 11th, mission festival will be held at the Dundee Lutheran church at 10:30 a. m., and 2:00 p. m. Revs. R. Pietz, G. Pieper and W. Roepke will deliver the sermons in German and English languages. Everybody welcome.

NEW SERIAL STORY

Commencing with the issue of Saturday, August 24, a new serial story, "Ginger Ella" will appear in the ready prints of the Statesman.

The heroine of this romantic tale by Ethel Hueston is the daughter of a minister in an Iowa village, an up-to-date peppy girl with the very appropriate nickname of "Ginger." The story has a particular charm for the women folks and the men will also like it.

Much water has flowed under the bridge since Ethel Hueston wrote her "Prudence of the Parsonage" and captured her first audience with a portrayal of American girlhood, so fresh, so happy, so tender, so funny and so sweet. Each year finds for it a host of new readers. And each year a new novel comes from the Hueston pen—a new heroine to take a place alongside of Prudence. Of this galaxy of girls certainly Ginger Ella is the brightest particular star. Once more the scene is a parsonage in the great, green, hilly farm country of Iowa. But how times have changed in thirteen years! How much more sophisticated is Ellen than Prudence! But for all her sparkle and snap, just as dear and even more delightful, even more a girl to take your heart.

Famous "Black Shirts"

The black shirt was originally worn by the Italian shock troops during the World War. Later it became part of the uniform of the legionnaires of D'Annunzio at Fiume. The Fascist adopted it as a symbol of the new patriotism. The Fascist organization was founded by Mussolini in March 1919, at Milan.

THE COUNTY FAIR AS THE GREATEST ATTRACTION

The great problem of the Washington County Fair management, as well as many another fair management, always has been how to attract the crowds, an undertaking of this kind needs to meet expenses and bring the greatest good to the greatest number.

There was hardly ever a county fair held in this county, the attendance of which could be called satisfactory. Less than half, sometimes barely one-third of the people of Washington county visit their county fair.

If the fair was poor, this attitude would be justified, but as it is classed among the very best in the state, the poor attendance always was more or less of a conundrum to the officers of the Agricultural society. In recent years especially they went to the limit to make it attractive, yet even to extravagance. But the result still fell short of the expectations.

Let us ask this question: Is there anything else in the county, that offers so much for so little money? There never was and never will be. The county fair is well worth the admission price if it was only for the entertainment features, the free acts, the races, the music, and the chance to see people from all over the county gathered as one great, happy family.

The Washington County Fair of recent years offered so much that it cannot possibly be taken in as it should on one visit. The writer experienced this time and again. The best part of the fair, that which may be of most value, is usually passed up or gone over very superficially. To get the full benefit of all that is offered, the fair must be seen on two days at least.

In the ceaseless endeavor to attract the crowds, the officers this year are trying new ways by holding the fair on Saturday, Sunday and Monday, August 17, 18 and 19, and offer a night fair on every night of the three days, with complete changes of the superb free acts. The grounds and buildings on these nights will be brightly illuminated to make a visit as interesting and enjoyable as in daytime.

There is no reason why the County Fair should not draw crowds twice as big as heretofore. It is the psychological attitude which we must change. We must double our pride in and our enthusiasm. We must come to see that money and time cannot be spent with more returns in enjoyment and real profit than by visiting the Washington County Fair. This is the blunt fact, if we could but recognize it. It is a fallacy to believe that the county fair is the same every year, and that if one has seen one, he has seen them all. The county fair is ever new and wonderful, like new born spring, and the coming fair on August 17, 18 and 19, held at West Bend, promises to be the climax of all fairs ever held on the grounds. If we but change our indifferent attitude toward the county fair, it will be one of the greatest gains Washington county has ever made.

MOTOR CARAVAN FOR CHILDREN TO STATE FAIR

Plans are being worked out at Madison for the organization of Motor Caravans to take children to the State Fair from all sections of the state during fair week, August 26-31 and admit the young people accompanied by parents or older persons free of charge.

County agents, boys' and girls' club leaders and chambers of commerce are sounding out sentiment, working with the service clubs in various communities to provide drivers to take the children in on any day of the fair. There is no set day for children this year.

The grown folks pay the regular admission fee but the children of ages agreed upon, usually not over twelve years, authenticated by the agents, leaders or chamber secretary, in various communities, are admitted free. Credentials and detailed information is being supplied through the Attendance Division, Wisconsin State Fair, at Madison, where communities interested in the plan should write.

Dodgeville, working through the county agent, and the newspapers has promised to send a caravan. Mineral Point, Platteville, Lake Mills and Fond du Lac are at work on the plan which was just launched this week.

"We believe everything should be done that can be done," said Commissioner of Agriculture W. A. Ducey, to interest our young people in the many features which are on display at this annual state event. The educational value, the bringing of farm and factory together, have a strong appeal."

—Milton Miller of Milwaukee, visited the past three weeks with Mrs. Jac Remmel and Ralph Scheilenberg.

VOGUE FOR BROWN PREVAILS; ANGORA HATS THE LATEST

WITH both men and women brown is proving an outstanding color choice. This triumph of brown is apparent not only in the Paris style-plate, but all the European water resorts are recording the prestige of brown. What's more, it's vogue for autumn is promised on a crescendo scale.

The young man in the picture is wearing the latest world in summer attire, consisting of brown flannel sports jacket with brass buttons, white flannel trousers, brown and orange foul-

weather shoes, a hat of brown exotie straw and she carries a brown handkerchief, also handbag.

Those cunning white angora toques or the angora-embroidered straws and felts with more or less brims—what zest they are adding to midseason millinery!

It did not take long for women who appreciate chic and charm, to sense the attractiveness of a costume which tops a sleeveless white or gaily colorful summery frock with a dainty soft-as-down angora head-piece. Which

Both Decked Out in Brown.

and tie, white and brown kid sports shoes, and a Panama hat.

The young woman expresses the latest in a coat of pale yellow flannel, with blue crushed velvet scarf, posed over a two-piece frock with pale yellow flannel skirt and heavy lace blouse, beige kid shoes trimmed with reptile and a hat of linenlike straw. Which all goes to show that kid shoes, flannel suits and straw hats have "it," but no sex. They are as masculine as masculine on the man as they are as feminine as feminine on the woman.

Peach-beige with brown is quite the newest color note for sports ensembles. Then, too, a just-revealed Paris cable reports flesh and brown in gowns and wraps as seen at smartest evening functions.

Brown chiffon for the evening frock is acclaimed by the house of Worth in a charming model which has a long, quite full, straight skirt (note the word "long," for skirts are assuredly longer). The low décolletage flutters a plaited capelet. The back panels which are artfully adjusted form a short train. Yes, trains "are in" again, rather timidly to be sure—more suggestions yet they add wonderful grace.

A coffee brown chiffon frock, also by Worth, is made on tailored lines, with fagoting its only trimming. The

accounts for the midseason "rush" for either a most flattering little toque draped of angora scarfing or a felt or a straw which boasts at least a hand-worked touch of the soft fluffy yarn.

The magic touch of angora has given to each of the pretty models in the lower picture a convincing style prestige. First in the group is a shapely cloche of novelty black straw which accents the vogue for black-and-white millinery in that it boasts striking motifs worked in snowy angora. A glittering crystal pin is thrust through at one side.

Centered at the top is a very charming little hat carried out in white angora and fine natural-colored smooth straw. The straw forms into a fancy strap which is embroidered with angora and buttoned with ribstone balls.

Both crown and brim of the modish cloche to the right are worked with angora yarn, making an all-over effect. Little wheels of narrow navy grosgrain ribbon matches the underbrim which is formed row and row of the same.

Last is an extremely handsome hat with a brim, the larger shapes having come decidedly into the foreground this season. This one is an exquisite natural colored bakou, the back brim cut so as to emphasize width at the

Some of the New Hats.

sports costumes of Worth, which have brown coats, number among the greatest successes of the season.

White flannels and other sleeveless dresses of white pique crepe or shantung are belted and scarfed with brown or orange. Topped with brown Jersey coats these ensembles are very smart, indeed.

The niftiest tailored suits emphasize the importance of brown, too, those in chocolate brown being especially good. The truly fashion-wise works out a clever study in brown supplementing her strictly tailored brown short jacket and skirt with a blouse in tangerine or eggshell tint. With this she wears a brown ascot belt, brown necktie, suntan hose,

sides. The embroidered rings are done in white angora and white floss.

Many women are buying felt or straw shapes to their liking and themselves embroidering them with angora. One can secure the angora in almost any of the new colors as well as white. For instance, a gray felt with hand stitching in perfectly matching gray stands for last-minute vogue. One of the very thin new linenlike navy straws would be handsome embroidered in flame, char-treuse or tangerine angora.

Angora berets for the younger girls are also a proud boast of the milliner.

JULIA BOTTOMLEY. (© 1929, Western Newspaper Union.)

Braided Belts

The belts that are worn with sweaters and tennis frocks are so varied that one can easily have a dozen without duplication. The smartest are very narrow, and are made of braided cord fastened with a metal buckle. And they come in every conceivable color and color combination.

Gray Hats

The new supple straws, which are handled much in the same manner as fabrics, are especially lovely in a soft

shade of pearl gray. So important is this fashion that one shop devoted an entire window to a display of gray straw hats in all the new beret and off-the-face models.

Unusual Blouse

The egg-shell crepe blouse that tucks into a midnight blue suit has its batteau neck finished in a one-inch standing collar of the satin side of the crepe and four one-inch bands of the satin applied around the cuff and of the sleeves.

The Kitchen Cabinet

(© 1929, Western Newspaper Union.)

There is only one type of artist whose achievements make every type of society from the earliest to the latest; and that creator is motherhood.—W. Shaw Apparow.

SOME DAINTIES

There are appetizers, canapes, hors d'oeuvres (call them by any name, they are as zestful) used to begin or end a meal; but the nicest of all at this season of the year is an appealing one of fruit.

The prettiest of all plate covers when serving fruit is the green leaf of the fruit served. When this is not obtainable other leaves such as apple, plum or any pretty foliage will be acceptable.

Cherries With Orange.—Place a spray of cherry leaves on a glass plate, arrange three or four sections of orange, membrane removed, with three cherries, large, ripe and luscious with stems placed between the sections. Grapefruit may be used and if carefully done may be eaten from the fingers as are the cherries, of course.

Fruit Balls.—Take the pink center of the watermelon, scoop out into balls with a potato cutter, place in sherbet cups, pour over a chilled sauce of orange juice and sugar and top with a sprig of mint; place on a leaf-covered plate.

Strawberry Appetizer.—Now that strawberries are to be had almost any time of the year, from the south, to the northern everbearing, one may have these berries for an occasional dish for the first course. Place a heap of powdered sugar molded in a small glass in the center of each dish. Arrange the beautiful fruit well washed and drained dry, unhusked and with the stems on if possible, around the cone of sugar.

Vegetable Melange Salad.—Take one cupful of string beans and one cupful of peas, both cooked with a pinch of sugar in the water; if not add it to the vegetables. Add one cupful of finely shredded cucumber and one-half cupful of crisp, tender radishes, sliced unpeeled. Add a french dressing and let stand one-half hour. Take six hard-cooked eggs, cut off the ends so they will stand upright, cut into halves. Arrange crisp lettuce leaves around each egg and place some of the vegetable mixture on the leaves. Serve very cold with mayonnaise.

Oyster Plant With Herbs.—Wash and scrape oyster plant and cut into half-inch slices. Cook in boiling salted water until soft; drain, add butter to season, sprinkle with chopped parsley, chives and salt and pepper. Serve hot.

The Efficient Kitchen.

Now-a-days with the colorful kitchens and breakfast nooks so common, it seems trite to talk of kitchen conveniences.

But there are thousands of homes yet where the housewife walks miles to prepare and serve a meal, where the kitchen stove, sink and table are hardly within speaking distance. These old fashioned kitchens are still far too common, and they are treasures, too, for by remodeling one may have a small kitchen with equipment conveniently placed and a cosy breakfast nook with benches that push under the table when not in use, leaving space for ironing or dressmaking, with good light and every convenience.

The proper arrangement of kitchen equipment is not a passing fad, but a most serious problem, worthy of thought and planning.

Where the kitchen is small the work table covered with zinc or with a porcelain top stands in the center of the room, over it is arranged a hanging shelf with place for the much used utensils to hang underneath. The shelf may contain the pretty jars for salt, sugar and such condiments used in every day cooking. This table with shelf may be placed against the wall, if it is more convenient in the smaller home; then the sink, stove and table are all within easy reach, saving much walking.

Hang the measuring cups and small things within easy reach and always place them there. When dishwashing, if the cupboard is near the sink, the dishes may be wiped and placed on the shelves without another handling, which saves many hours in the space of a year.

Have the sink, table and all equipment such as ironing board and tub so placed that they will be convenient for your height. Stooping over a table or tub has caused the ruin of many good dispositions and the breaking down of many arches. The ideal floor is a pine one, covered with the best of linoleum. The floors are beautiful, but unless covered with many rubber mats, killing for the feet. Hardwood floors well varnished may be easily kept clean and always look well.

A large tray or a tea wagon for removing soiled dishes from the table, and carrying food to and from the dining table is a great step-saver. The handy boy with his tools can make a very good tea wagon, as many have done in the schools.

Nellie Maxwell

Learning From Failure

We learn wisdom from failure much more than from success. We often discover what will do by finding out what will not do; and probably he who never made a mistake never made a discovery.—Smiles.

Liquid in Human Body

Although the human body is largely composed of water, it is for the most part not water in the usual physical sense, but water bound in this physico-chemical union with colloids.

Silo Profit Is in the Feeding

Dairy Farms and Live Stock Feeders Declare Silage Is Essential.

The proof of the silo profit is in the feeding. Wisconsin has proved the economy of this. If the value of silage in the live stock ration was known all over this land as well as it is in this state, where there is one silo to every 30 head of cattle, there would be 2,000,000 silos built in America in the next three years. All the evidence is in favor of this feed as a profit-bringing, milk-making and beef-building ration.

Corn silage can be grown and put into the silo for less than \$3 a ton. Some reports set the cost figures as low as \$2 a ton. This is crediting the corn as being worth about 94 cents a bushel.

Value of Silage.

Experts in different states claim that when butterfat is selling for 45 cents a pound, corn silage will bring the dairy farmer \$10 per ton, and when fat steers are selling from \$9 to \$10 per hundredweight, corn silage is worth from \$7 to \$8 per ton. The owner of a silo with a fair yield of crop can receive a value from his corn made into silage of \$70 to \$80 an acre when fed to steers and \$100 when fed to good dairy cows.

It has been proved that, with dairy animals, the feeding of silage saves from \$ to 15 cents on the cost of producing a pound of butter, and from 30 to 50 cents on producing 100 pounds of milk. For beef production the saving produced by silage is about \$1 per 100 pounds of gain.

It is true that the horse is decreasing in numbers, but the cattle census must be kept up and will be kept up by the steady demand for milk and meat. It is probable that the values placed upon silage as given above will be considered too low before next spring.

Make Study of Silo.

It is just the time to make a study of their value and economy, watching the feeding through the winter and letting the facts stand as proof that thousands more should be set to work making money for stockmen. Experiment stations, dairy farms and live stock feeders all over the United States have proved that the silo is of highest importance in the economic production of stock and stock products. The half-million progressive stock farmers who are using silos and their indispensable. For many years we have urged the trial of the silo as a money maker.—Wisconsin Agriculturist.

Grafting Relationships Not Clearly Explained

(Prepared by the United States Department of Agriculture.)

One of the facts of plant life on which scientists would like to have more complete information deals with the relationship of plants within which grafting may be done. As Guy E. Yerkes, of the United States Department of Agriculture, remarked recently, the limits of this botanical relationship are not clearly defined. Varieties within the same species, he said, "may be expected to unite; for example, all varieties of European pear will grow on French pear stock. Often different species within the same genus will make satisfactory unions. As an example, most botanical species of apple (Malus) will grow on each other. On the other hand, cherry will not unite with peach, although both are placed by many botanists in the genus Prunus. In many cases, plants more distantly related may be grafted and will grow, as hawthorn upon apple and firethorn upon mountain ash. The citrus fruits are related closely enough so that it is by no means uncommon to see a single stock, which has been grafted, producing different fruits on different limbs, lemons on one, oranges on another, and perhaps grapefruit and tangerines as well."

Modern Practice Is to Fill the Silo Evenly

Many silo owners are coming to the conclusion that it doesn't pay to tramp the silage when the silo is being filled. It is almost impossible to compress the silage evenly, and the labor is largely wasted. The modern practice is to fill the silo full with no tramping—then let it settle for a few days, after which it can be refilled. Even with the most vigorous tramping, settling will occur, and it is observed that not much, if any greater settling will occur even if no tramping is done. The main thing is to distribute the silage evenly over the entire area, which can be done easily with proper handling of the distributor pipe.

Protection Is Needed for Parts of Machines

Cultivator shanks, tractor drawbars, power take-off shafts, and similar devices or parts of machines should be breakrip protected, as a rule. Spring release hinges are replacing breakrips on tractor drawbars to some extent, while safety clutches form a convenient and practical means of protection for power take-off and other revolving drive or driven shafts. But whatever device is used, see that it is always ready—like a fuse in an electric circuit—to break, slip or trip when an obstruction is suddenly encountered.

Buckwheat for Stock

Buckwheat is not as good a feed for any one of the classes of live stock as is oats, corn or barley. It is a very fibrous grain, therefore is less digestible and not quite as palatable as the others. It makes a fair cow feed but had best be used to feed sheep. It should be mixed with other grains in amounts not to exceed one-quarter to one-third of the total.

CHOICE OF MILLIONS because it's such a pleasant way to avoid constipation

THERE'S no real reason why a breakfast food that keeps you regular shouldn't be appetizing too. Food should be appetizing if the digestive juices are to do their work.

That is probably why Post's Bran Flakes appears every morning on millions of breakfast tables. People know the effectiveness of its bran content in encouraging regular habits. And they genuinely like its crisp, nutty flavor. It's such a pleasant way of keeping fit.

Try it with fruit, in muffins or bread—the crisp flavor always adds. And for effectiveness eat it regularly. Call up your grocer and begin tomorrow.

POSTUM COMPANY, INC. BATTLE CREEK, MICH.

Cases of recurrent constipation, due to insufficient bulk in the diet, should yield to Post's Bran Flakes with other parts of wheat. If your case is abnormal, consult a competent physician at once and follow his advice.

POST'S BRAN FLAKES WITH OTHER PARTS OF WHEAT

Unfortunate Mother (to little Gertie, just put to bed)—Why, sweetheart, why are you crying? Gertie (whose one foot is sleeping)—Boo-boo! I've started to sleep from the wrong end.

Is the Girl to Blame? She—Jim Jones is certainly cracked. He—Probably, his girl dropped him. —Border Cities Star.

Rain "What became of your picnic?" "It was a wash-out."—Louisville Courier-Journal.

We are too easily offended at opinions that differ from ours. Why should we care?

Makes Life Sweeter

Too much to eat—too rich a diet—too much smoking. Lots of things cause sour stomach, but one thing can correct it quickly. Phillips Milk of Magnesia will alkalize the acid. Take a spoonful of this pleasant preparation, and the system is soon sweetened.

Phillips is always ready to relieve distress from over-eating; to check acid acidity; or neutralize nicotine. Remember this for your own comfort; for the sake of those around you. Endorsed by physicians, but they always say Phillips. Don't buy something else and expect the same results!

PHILLIPS Milk of Magnesia

Continued Performance A couple of rival but friendly shopkeepers were talking things over. "When does your opening sale close?" asked the first. "When our closing sale opens," the second replied. — American Legion Monthly.

Memory recalls many things, but never the money loaned to your friends.

Any man who hasn't a good opinion of himself is inwardly deformed.

It's not a very wise doctor who doesn't know better.

Electricity Great Aid to Market Gardeners

Electrical gardening has proved to be a practical and economically profitable occupation in Sweden. Although the recent winter was one of the hardest in history, such garden products as "home-grown raspberries," cucumbers and the most delicate of garden flowers have been available at all times. In the gardens near Hamlingby, a small town north of Stockholm, 10,000 tulips, 1,500 lilacs-of-the-valley, and 1,500 hyacinths were raised during January, all in ground electrically heated and under the artificial light of electric lamps. The operating expense of the electrical system was found to be negligible. The most difficult phase of the work is found in supplying various types of plants with the particular variety of light which they require, the lamps suitable for roses, for example, being unsuited to the development of carnations. There are 300 so-called "electro-horticultural" stations in Sweden, all of which are carrying on experiments in the artificial production of flowers and vegetables.

Insect Fights Insect

Two hundred beetles were sent from Melrose to Seattle, Wash., to act as a set of shock troops against a great army of caterpillars. They were released in a section of Seattle where the hordes of caterpillars, swarming on the tracks, caused a street car to slide down hill. The beetles, originally imported from Europe in 1905, are said to be hereditary enemies of the caterpillars.

Want Checks in Welsh

Whether banks in Wales should print checks in Welsh was discussed at the recent annual conference of the National Union of Welsh Societies at Aberystwyth. One bank manager said he often received checks with the words "payable to order" crossed out and a Welsh translation written instead.

Military Landowner

Judging by the signs you see at attractive camping places all through the country, this fellow Private Keep-out owns enough land for a general.—Terre Haute Tribune.

Conciliation

"What's the get heaving about?" "Hair in the soup." "Send out a pretty waitress."

The complacency of learning can't quite equal the complacency of ignorance.

Everything comes to him who waits—except the money he loaned to a friend.

How Rashes do Itch!

BATHE them freely with Cuticura Soap and hot water, dry gently, and apply Cuticura Ointment. It is surprising how quickly the irritation and itching stop and after a few treatments the rash disappears. There is nothing better for all forms of skin troubles.

Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sample each free. Address: "Cuticura," Dept. B7, Malden, Mass.

Eager for it Lemuel shuffled into the office down in Savannah and said hopefully: "Don't suppose you've heard anything as how 'nobody's business' does you?"

A trainload of train cars recently was received in Sasatchewan, for farmers in the vicinity.

A DOZEN different things can cause a headache, but just one thing you need ever get relief. Bayer Aspirin is the absolute antidote for such headaches. Keep it at the office. Have it in the home. Those subject to frequent or sudden headaches carry Bayer Aspirin in the pocket. Until you have used it for aches, colds, neuralgia, etc., you no idea how Bayer Aspirin can help. It means quick, complete relief of millions of men and women who use it every year. And it doesn't depress the heart.

ASPIRIN

Aspirin is the trade mark of Bayer, manufacturer of Monoaceticester of Salicylic Acid. DON'T SUFFER Headaches, Toothaches, neuralgia, etc. Bayer Aspirin is the most effective relief for all these ailments. It is safe and non-toxic. For trial packages and FREE PAMPHLET, write to: NATIONAL REMEDY CO., 745 Broadway, New York, N.Y.

How Melvin Ott Grips His Bat

A closeup of the strong hands of Melvin Ott, youthful outfielder of the New York Giants, showing how Mel grips his bat when he goes through his famous natural swing on a pitched ball. Ott is leading both leagues in home runs. His batting average promises to go much higher before the season draws to a close.

Howley Not to Manage Browns Again in 1930

The Globe-Democrat says that Dan Howley, manager of the St. Louis Browns, in third place in the American league pennant chase, will not be back next year. The paper says a squabble between Howley and L. C. McEvoy, vice president of the club, is responsible.

Limit Number of Ducats for Army-Illinois Game

Anticipating a sell-out of seats for the Illinois-Army football game September 13, the university ticket committee has decided to limit the number of ducats available to individuals.

Likes His Chew

Here is Art Shires, the much talked about White Sox ball player, who, it seems cannot play ball without a good chew.

Large-Fisted Boxer Is Given Big Advantage

In the matter of mitts, Berlin boxing experts have struck a snag. At the last bout between the German heavyweight, Ernst Rosemann, and the Italian giant, Primo Carnera, for whom gloves of a special size had to be made, it became apparent that the big Italian's opponent was greatly handicapped.

Indians Like Golf

Seldom does a white man's sport arouse enthusiasm among the Indians, but golf has done it with the Osage tribe. Joe Mills, a young sub-chief, has set the style for Osage golfers by adopting the white man's trousers and shoes, yet retaining the tribal head-dress and colorful blanket.

BRITISHERS NOW FAVOR BASEBALL

Feature of Recent Contest Was Latham's Umpiring.

Britishers are beginning to take a perfectly ripping interest in the jolly old game of baseball. This is the eighth consecutive year that the Anglo-American association has been in operation at the Stamford Bridge grounds near London and the season promises to be a record-breaker, according to information received in a letter from Lonsdale Green, a Chicagoan, visiting in London.

Green writes in particular concerning a game between the Akron (U. S. A.) nine and the London Americans, which was won by the latter by a score of 13 to 17. A feature of the contest was the umpiring of Arlie Latham, who played with the St. Louis Browns and New York Giants many years ago.

Despite the fact that Kiracone, hurler for the Akrons, struck out the first nine men to face him, his team lost. This probably was due to the fact that his support was wabbling, the Akrons committing no less than ten errors.

A glance through the program reveals the fact that although baseball is being played in England the British have invented some entirely new features that should hand the American fans some laughs. The programs are numbered and after the game is started a drawing is held and the lucky numbers pulled from a hat are shown on a billboard back of the outfield.

On one of the program pages is printed a diagram of the diamond showing the position of the players and the dimensions of the field. Below this is an explanation of baseball terms, a few of which were the following: "Attaboy"—meaning "That's the boy," a general term of encouragement.

"Bonehead"—A stupid player. "Razz"—To talk sarcastically to a player. "Solid Ivory"—What a fan thinks a stupid player's head is made of.

Girl Wins Medal

Miss Peggy Meaney, nineteen-year-old San Francisco girl, who recently won the medal for the 500-yard freestyle swim of the Pacific Athletic association. She will take part in all the swimming meets of the season, and is expected to win more honors.

Sport Notes

Surf-board polo is the newest aquatic sport in Walkiki. Gene Tunney has been the only heavyweight boxing champion to retire undefeated. Despite his 70 years of age, Dr. Winton Ingram, Bishop of London, England, is an active hockey and tennis player.

Dr. Taku Iwahara, medical officer of the ministry of education of Japan, is making a study of amateur athletics in America. Los Angeles will entertain the greatest number of European athletes in 1932, for the next Olympic games, that has ever gathered previously in the United States.

Kid Chocolate, Cuban bantamweight, has four times achieved the distinction of knocking out two opponents in one week. As an amateur he has scored 86 knockouts in 100 bouts.

"Pittsburgh Phil" Smith, one of the greatest plungers in the history of horse racing, is the only outstanding gambler who beat the game and died in the possession of more than two million dollars.

Oscar Mathieson of Norway, who twenty years ago and later was invincible as amateur speed skating champion of the world, recently made a new world's record for 500 metres, which he covered in 43 seconds flat.

We trust it will not be unpatric to hope that Sir Thomas Lipton may have very good success in his new yachting venture.

George Washington high school of New York city will hold all its home football games this fall in the new \$450,000 stadium.

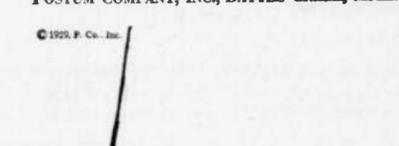

On your toes with POST TOASTIES -quick, rich energy

Busy day ahead? Begin it right with Post Toasties. There's an ample store of brisk new energy in each crisp, appetizing mouthful. Easily digested energy that turns quickly into zest for the day's work.

And it's so good to eat! Pour the crumbly, golden-brown flakes out of the handy package into the saucer. Then add cream and sugar if you like. We've found that rich, natural corn flavor and the toasted crispness make a perfect combination. Everyone likes it!

Ask your grocer for the genuine Post Toasties in the red and yellow package.

POSTUM COMPANY, INC., BATTLE CREEK, MICH.

Billy Wouldn't Stand for Leaving Out Nurse

Mrs. E.—had to go to a hospital for treatment and while there her kiddies were in the charge of some one who granted them more than the usual privileges. The new experiences brought a new vocabulary to the youngsters.

When mother returned she told the children of the wonderful nurse who so kindly cared for her, and said: "I want you always to include Miss Blank (the nurse) when you say your evening prayers."

This they did religiously. One night the mother had a prominent clergyman for a guest of the home and he was asked to conduct the family worship.

On his rise from their knees, little four-year old Billy, noticing a serious omission in the service, rushed over to the minister and using his newly acquired words, said: "You! You did not pray for the nurse."

Times Have Changed Ellnor Glyn, the novelist and picture maker, said at a Hollywood garden party:

Habits and customs have changed since my young days. The other night I heard two girls talking at a night club.

"What would you do," said the first girl, "if you'd been out three times with a man and he never once tried to kiss you?"

"I'd lie about it," said the second girl.

Recast Ancient Bell A bell which was installed at Thundersley (Essex) church in 1589-90 years ago—has been taken down and sent to be recast by a London firm which constructed it. It has been suspended all these years from oak ship's beams. Other beams supporting the walls and roof have been in service since 1230, 15 years after the original building was burned down on a Christmas day.

Snakes' Sight and Hearing All snakes have good eyes, and some of the nocturnal species have very large ones, but the eyes have no lids and are not movable. No external ear is present, but a complicated internal apparatus exists, so that snakes hear well and are affected by musical sounds.

Not What He Meant He—To avoid being an old maid, would you go so far as to marry a damed fool? She—This is so sudden!

A Refusal of Spinach Codpiece—Nuttleigh never takes a cigar when I offer it to him. Crabflake—Maybe he has a craving for tobacco.

If some people did nothing but mind their own business they would soon become rather narrow-minded.

A woman may gain her point, but she seldom acquires it at the end of a lead pencil.

Electrical chairs haven't been in existence long enough to get into museums with other chairs.

The Devil to Pay

Judge Thomas F. Graham of San Francisco was talking at a dinner party about marriage. "Woman has come into her own," he said, "but Henry Ward Beecher's dictum about marriage is as true today as it was a generation ago. Beecher's dictum, you know, was this: "A marriage between a young man and a young woman is made by God, between an old man and a young woman it is made by the world, between an old woman and a young man it is made by the devil."—Detroit Free Press.

Rather a Giveaway

"What are the qualifications required to make a successful card player?" asked Mrs. Bowling, casually. "Well, it's hard to say," replied her husband, thoughtfully. "A man must be cool, calculating, crafty, cunning, and have a touch of meanness in his disposition."

"Oh, John!" exclaimed his wife. "Surely you wouldn't like to play cards with such horrid people!"

"That's all right," the husband answered, proudly. "I nearly always win."

Da Vinci's Learning

Leonardo da Vinci drew a map of the globe, said to be the first to include America, and also showing an imaginary Antarctic continent. Even before Columbus sailed from Spain Leonardo not only maintained that the earth was round, but calculated its diameter to be more than 7,000 miles. The actual diameter, as now accepted, is roughly 7,900 miles.

Noise nuisances, as a rule, peter out after a while—then there is another one, sometimes two.

The average man fails to learn a lot of things that experience should teach him.

The tuba player's wife also may go around making a big blow.

A woman never really knows a man until she knows she doesn't.

Good Suggestion

Jones—I never know what to do with my week-end. Bones—Why not keep your hat on it?

Cutting Reply

Barber—Is there any particular way you'd like your hair cut? Customer—Yes, shorter.

Even the silver-tongued orator is seldom able to interest his wife.

Correcting an Impression about our USED CARS

WE HAVE sometimes found the impression prevailing that we will not accept anything but a used Ford car in trade for a new Model A. That is not a fact. Many cars—in both high and low price classes—are being constantly traded in for the new Ford.

If you're in the market for a used car, come to our showroom. Thousands of miles of unused transportation are represented there in cars nearly as new and owners, for each one is priced at just what it is worth. There is no "price padding" or inflation to permit us to recoup excessive trade-in allowances. The price of the Model A is so low that excessive allowances for used cars are impossible.

You can take advantage of this situation. Act now! Come and see these bargains in unused mileage—

Schaefer Bros. Kewaskum, Wis.

TOWN SCOTT

Alfred Fellenz of East Valley spent Sunday at his home here.

Mr. and Mrs. Paul Geier entertained company from Milwaukee Sunday.

Aug. Bartelt of Forest Lake spent Friday evening at the John Pesch home.

ARRANGE TO COME!

Multiply Your Man-Power By Seven

McCormick-Deering Corn Binders are built in two types, horizontal and vertical. Both are light-draft, long-lived machines that do hard work quickly and easily.

When you go into the corn with a McCormick-Deering Vertical or Horizontal Corn Binder you are equipped to do the work of from 5 to 7 men with corn binders. And you sit in comfort while you are doing it. Instead of turning standing corn into loose, unwieldy stalks that are hard to load or shock, the McCormick-Deering bundles the corn for fast handling without loss of labor or time. This saves time at harvest and afterward.

If you feel silage you especially need the fast, sure work of the McCormick-Deering Corn Binder. With the binder in the field and a McCormick-Deering Ensilage Cutter at the silo, your stalk can be turned into the highest grade of silage, at minimum cost, because the fast-working equipment handles the corn when it is at its best. We have this new McCormick-Deering for you to see and try. Come to our store and we will point out the many fine features that this binder offers.

With the Wisconsin Legislature

Madison—Increase indemnity for cattle slaughtered under tests for tuberculosis eradication work is provided in Gov. Walter S. Goodland's bill signed by Sen. Walter J. Kohler.

The bill provides that a general test of all cattle in each area tested county shall be made every three years and increases the indemnity to be paid for each slaughtered animal from one-fourth to one-third of the difference between the net salvage and the appraised value of the animal.

Chippewa Falls—The Cleghorn-Pruett association had an average production for June of 900 pounds of milk and 33.6 pounds of butter fat.

Rice Lake—Judge Charles A. Stark, 75, of the second municipal court of Barron county, died following a long illness. He was a resident of Rice Lake 42 years.

Fort Atkinson—Two of six persons who went out on Lake Koshkonong in a dilapidated boat were drowned when the craft became partly filled with water and capsized about 600 feet off shore.

Florence—The Wisconsin firm Co. of this city is doing a brisk business in the shipping of ferns from the woods of Florence county. Express shipments of ferns are made to Chicago and other cities each night.

Fort Atkinson—Fourteen head of livestock perished in a fire at the C. O. Christ farm, three miles south of here, in which the loss probably will amount to more than \$20,000. Four buildings burned, including a barn 38 by 110 feet.

Hayward—Four-H club work has had a rapid growth in Sawyer county. Enrollment last year more than doubled while this year there has been a small increase in membership with project work almost doubled.

Madison—Arguments in the demurrer filed by Gov. Kohler's attorneys to the ouster suit started against him will be made by the opposing attorneys here Sept. 4 in Dane county circuit court before Judge James Wickham, Eau Claire, according to Harry L. Butler, counsel for the governor.

Madison—Sewer gas provided the heat by which a luncheon was prepared for 40 state power plant engineers attending their annual school at the University of Wisconsin when they visited the Madison sewerage disposal plant. This city is one of the pioneers in utilization of its sewer gas.

Madison—Conservation wardens have been instructed by the conservation commission to be more strict in enforcing the law which orders non-resident fishermen to carry their licenses when fishing. It has come to the attention of the commission that in a few cases the same license has been used by more than one person at the same camp or resort, those people taking turns carrying the license with them.

Stevens Point—The sale of all lands three or more acres in length in the Kert creek, Cranberry creek, Remington and Wood county drainage districts in Wood county is ordered in a decision by Circuit Judge Byron B. Park. Application for such action had been made by Wood county and some of the bondholders. In order to make the sale effective an obtain bidders all lands in the districts are to be assessed to the limits of benefits.

Madison—Extra precautions to prevent forest fires should be taken by people living in, or passing through, forested or cut-over country, the conservation commission warned. District forest rangers in the field advised C. L. Harrington, superintendent of parks and forests, that warm weather has dried out the woods, resulting in several forest fires, most of them small and confined to a few acres. Some have burned as much as 1,000 acres but all are extinguished or under control, Harrington was advised.

Wisconsin Rapids—Central Wisconsin is a source of large quantities of lawn grass seed. This is a fact not generally known, yet the 1923 crop was about 60,000 pounds, and was harvested on land which less than 15 years ago grew nothing but brush and cattails. The area is the Buena Vista marsh, which during the height of the drainage movement was the scene of feverish activity in rural development, with numerous new farms opening up on the newly drained soil.

Butler—Creamery, fresh quotations, 42 1/2c; extra, 42 1/2c. Cheese—Twins, 19 1/2c; daisies, 20 1/2c; young Americas, 19 1/2c; brick, 19 1/2c; Limburger, 22 1/2c. Eggs—Fresh gathered, 30 1/2c; broilers, 28 1/2c; old fashions, 22c; ducks, 19 1/2c. Potatoes—Wisconsin new, \$1.50@2.00. Barley—Choice to fancy, 71 1/2c; fair to good, 67 1/2c. Corn—No. 2 yellow, \$1.00@1.00 1/4; No. 2 white, \$1.01 1/4@1.02. Oats—No. 3 white, 46 1/4c@47c. Rye—No. 2, \$1.11@1.12. Hogs—Fair to good butchers, \$11.25@11.50; fair to good lights, \$11.75@12.00; pigs, \$10.50@11.50. Cattle—Steers, fair to choice, \$10.00@10.00; heifers, \$7.50@12.00; cows, \$7.25@10.00; calves, \$13.50@15.00. Sheep—Lamb, good to choice, \$12.75@13.25; fair to good, \$11.50@12.50; ewes, \$4.50@6.50.

Hayward—The Sawyer county fair this year will probably have the largest Four-H club exhibit of any county fair in the state. There are already 450 entries, including 137 calves. Nearly \$2,000 in prizes is offered in this department.

Florence—There will be no blueberries or raspberries in Florence county this year as the heaviest frost of July 19 killed all the blossoms and green berries. A big blackberry crop is evident.

Rhineland—The hay crop in 25 and other counties in the upper Wisconsin lake region is the largest in years. In a number of fields clover is so thick that mowers can scarcely cut it. All hay barns will be filled to the top.

Janesville—Rock county farmers are having large quantities of limestone ground this summer preparatory to spreading it on the cornfields after cutting corn for ensilage, according to County Agent R. T. Gieseler.

Weyauwega—There is a large acreage of cucumbers in Waupaca county this year. The vines are free from disease and are yielding heavily.

ZEP IN NEW RECORD IN CROSSING OCEAN

Giant Aircraft Makes Trip to U. S. in 93 Hours.

Lakehurst, N. J.—The German Graf Zeppelin, on her third flight across the Atlantic, broke previous records by arriving here after a flight of 93 hours. Thousands of people were at the landing field to greet the huge craft.

This is about 15 1/2 hours less than was required on the trip to America last year, when the ship made the flight to Lakehurst in 111 hours and 38 minutes. She completed the return trip to Germany in 46 hours and 40 minutes.

The Graf Zeppelin's latest flight marks the sixth spanning of the Atlantic by lighter than air liners. The Los Angeles, then known as the ZR-3, left Germany on the morning of October 11, 1924, and arrived at 9:52 a. m. October 15, at Lakehurst, covering the 5,080 miles in 80 hours and 17 minutes.

The return trip to Germany is planned to be the first leg of a journey around the world.

The silver sided queen of the skies brought a total of 19 fare-paying passengers, two of them women, and one stowaway—a seventeen-year-old baker's apprentice who leaped aboard just as the giant craft was sliding out of the hangar at Friedrichshafen.

The air liner's cargo consisted of some unestimated thousands of dollars' worth of miscellaneous merchandise, including a champagne, a real live gorilla, said to be the only one in captivity, and 600 Harz mountain canaries, consigned to Newark, N. J., pet shop dealer.

It was dark when the long gondola of the airship touched grass in front of the stub mooring mast of the naval station landing field, thus putting a period to another westward record breaking voyage through some 5,000 nautical miles of air lanes between here and the Zeppelin's German base.

Ten years ago in July, 1910, the British R-34 flew from East Fortune, Scotland, to Roosevelt field, landing with barely a half hour's fuel left. Three days later she returned to England, making the westward crossing in 108 hours.

Unlike the Graf's homeward flight on her previous trip here, the westward voyage this time was attended by a diversity of weather, a storm to get away in, then hours and days of blue skies overhead, and the calmest of calm seas beneath; a heavy rain storm as the ship reached the gulf stream; head winds ranging anywhere from 30 to 60 miles an hour as she neared the coast; and finally a breeze of zephyrlike gentleness to negotiate the last crucial test of her hazardous undertaking—the landing.

The passengers, one and all, agreed that they had had the time of their lives. They danced and sang and played cards and wrote letters when they were not in conversation in one of the luxurious cabins of the air liner.

Except for the leakage to a water tank, which did no serious damage and amounted to nothing more than a drip in the cabin ceiling, the trip was without accident of any kind, a sharp contrast to the last westward flight, when a fin was ripped from the dirigible's craft by a gust wind, causing the ship to pitch head downward and all but plunge into the sea. The average speed for the entire trip was 55 sea miles an hour.

Nation's Bank Deposits Exceed Previous Record

St. Paul, Minn.—Deposits, capital and total resources of banks throughout the United States are larger than ever before and "reflect a healthy condition," according to a report made public from R. N. Sims, secretary-treasurer of the National Association of Supervisors of State Banks.

Paris—Former Premier Poincare is rapidly recovering from the effects of his recent operation. His physicians say his condition is so satisfactory that there is no necessity for issuing further bulletins.

Cincinnati, Ohio.— Rex Harker, famed parachute jumper, set a new world's delayed drop record here by falling 9,000 feet before pulling the rip cord of his parachute.

Navy Plane Sets Speed Record

Newport, R. I.—A new record of 100 miles in 27 minutes has been established by a naval torpedo plane flown by S. B. Smith, first class aviation pilot.

Try Out New Japanese Cruiser

Tokyo.—The new Japanese cruiser, Myoko, with Premier Hamaguchi and his cabinet on board on its first cruise, reached a speed of 33 knots.

Mussolini in 47th Year

Rome.—Premier Mussolini recently celebrated his forty-sixth birthday with a day of rest and quiet with his wife and family at Carpena farm in the province of Romagna, near Fardoppio, where he was born.

Horses Show Prizes Increased

Kansas City.—Prizes for the American royal horse show next fall will total \$40,000, double the amount previously awarded at this annual turf classic.

Insects in California Orchards

Los Angeles, Calif.—Discovery has been made that walnut, nut, nut-feeding conifer of Florida's Mediterranean fruit fly, has infested orchard areas at Covina, Chino, and other ranch communities.

Plan Census School

Washington.—A correspondence school to train government workers for taking the 1930 decennial census of population is planned by the Department of Commerce.

TO CHOOSE NEW BOARDS

Gov. L. L. Emmerson

Springfield, Ill.—Gov. Emmerson expects to announce the appointment of several new members of the Illinois commerce commission and the state boxing commission within a few days.

"I am giving most careful consideration just now to the reorganization of these two important bodies," Mr. Emmerson stated.

SEATTLE BOY WINS IN EDISON CONTEST

Bishop's Son Gets Scholarship; Four Others Awarded.

New York.—Wilbur E. Huston, sixteen years old, of Seattle, Wash., son of Bishop S. Arthur Huston of the Episcopal diocese of Olympia, is the winner of the Edison scholarship.

At West Orange, N. J., a committee of several of the most outstanding personalities of America selected the tall, bespectacled boy as the foremost of those chosen by forty-eight states and the District of Columbia.

Walker conferred the title of "champion of the world" on him in the New York city hall later.

Young Huston, a student yet fond of athletics; keen to seize a joke, extremely earnest about the spiritual in life, has no "side" about him.

After Thomas A. Edison, Ford and the other members of the adjudging committee had congratulated him, and after his friends had carried him on their shoulders in triumph, he remained the same quiet, amiable boy.

He will receive tuition in the Massachusetts Institute of Technology for four years, with all expenses paid by Mr. Edison. So close was the race and so satisfactory were the results, according to Dr. Samuel W. Stratton, president of the M. I. T., who headed the committee of judges, that four others received lesser scholarships.

These were: Charles H. Brunson of West Pittsburg, Conn.; Ivan A. Getting, Pittsburg, Pa.; James Seth, Santa Fe, N. M.; and Bernard Sturges, Butler, Ind.

Free tuition in technical schools will be provided for the four, who almost came up to the 92 mark reached by Huston. Every one of the forty-nine candidates passed with a score above 60 points.

Farm Aboard in Warning Against Rushing Wheat

Washington.—The federal farm board, which recently outlined the establishment of a \$20,000,000 agency to handle the problems of the wheat surplus, has issued a warning against "crowding" the primary markets under present price conditions.

Although it disclaimed any intention of forecasting a fair price for wheat or attempting to pass judgment on prevailing quotations, the board expressed the opinion that it was "unfortunate" to find that the wheat market at a time when there is a pronounced spread between the cash and futures prices.

The policy of immediate marketing, it was added, could not be considered advisable at a time when a "substantial reduction in world supply" over last year is anticipated.

Mandell Beats Cannoneri

Chicago.—Sammy Mandell, of Rockford, Ill., the lightweight champion of the world, retained his title after fifteen rounds of milling with Tony Cannoneri of New York, late champion of the feathers, at the Chicago stadium.

Elm Pest Reported

Corvallis, Ore.—Elm trees, widely grown throughout Oregon for shade, are now being attacked by the elm leaf beetle and will be seriously denuded of foliage.

Endurance Flyers Are Killed

Minneapolis, Minn.—Capt. P. J. Killion and Owen Aughtland were killed when their monoplane Minnesota, in which they had been aloft nearly seven days in an effort to set an endurance flight record, crashed.

Phillips on Canadian Champ

Toronto, Ont.—Jackie Phillips of Toronto, won the Canadian welterweight championship here by decisively outpointing "Red" Braun, also of Toronto, in a ten-round bout.

Marines to Leave St. Croix

Washington.—Marine corps headquarters has ordered discontinuance of the marine garrison at St. Croix, Virgin Islands, which has been maintained since the islands were purchased from Denmark in 1917.

Canada Buys 3,000 Reindeer

Ottawa, Canada.—The dominion government has bought 3,000 reindeer in Alaska. The animals will be driven to the Mackenzie river section to provide food for Eskimos.

NEW CO-OP. COUNCIL HAS BEEN LAUNCHED

Million Farmers of Many Groups Represented.

Baton Rouge, La.—The National Co-operative Council, with an initial membership representing a million farmers in a hundred commodity co-operative groups, was organized here during the session of the American Institute of Co-operation.

C. O. Moser of Dallas, Texas, president of the American Cotton Growers' exchange, was unanimously elected temporary president of the organization, and Charles W. Holman of Washington, secretary of the American Institute and of the National Co-operative Milk Producers' Federation, was named as acting secretary.

The committee of eight, appointed a year ago at the meeting of the institute in Berkeley, Calif., to work out a plan for uniting co-operatives, and which made the report recommending the organization, was authorized to proceed with the legal incorporation of the group in order that it may begin functioning at as early a date as possible. The formal and complete organization, however, is not expected to be consummated for several weeks.

Inasmuch as full representation of all groups is desired.

The eight divisions represented by the committee went into the movement definitely with a few others. Dozens of additional co-operatives will enter as rapidly as they are organized into divisions.

Large groups already represented in the council include interests handling cotton, wheat, dairying, live stock, wool growing, co-operative buying, eggs and poultry, cranberries, pecans and citrus fruits. The council plans its headquarters in Washington, from whence it will function, as the collective representatives of all co-operatives along the lines upon which the United States Chamber of Commerce works as the representative of business.

The purpose of the organization is to form unanimity of action as far as possible in questions affecting agricultural co-operation in a national way and to prevent groups with the same interests taking opposing views.

The report of the committee said: "Generally speaking, our agricultural co-operative business associations are making steady progress. They are meeting and solving problems involved in their own organization and business. At present there is no method, however, by which their representatives can meet, periodically, or otherwise, to discuss national problems and policies in which all are more or less interested."

"In all questions affecting agricultural co-operation in a national way, each determines its position on such questions without having the benefit of discussing such problems with fellow co-operatives. This frequently results in some groups taking one position and other groups other positions, even in cases where their interest in the question involved would seem to be mutual and reciprocal."

"That this tends to weaken the influence of such business groups in molding national policies and public sentiment goes without saying."

Members of the committee making the report are as follows: C. P. Moser of Dallas, Texas, president and general manager of the American Cotton Growers' exchange; J. D. Miller, Susquehanna, Pa., vice president and general manager of the Dairyman's League Co-operative Association, Inc., and member of the executive committee of the National Co-operative Milk Producers' Federation; John D. Zink, Springfield, Mass., general manager of the Eastern States Farmers' exchange; C. B. Denman, Farmington, Mo., president of the National Live Stock association and recently appointed a member of the federal farm board; R. A. Ward, Portland, Ore., general manager of the Pacific Co-operative Wool Growers; S. D. Sanders, Seattle, Wash., president and general manager of the Washington Co-operative Egg and Poultry Association; J. J. Knight, Kansas City, Mo., general manager of the Equity Union Grain company; Ernest R. Dowdle, Wichita, Kan., general manager of the Kansas Co-operative Wheat Marketing association.

State authorities race-track killings, Vice President of the association, which approved his charge of laxness by the adoption of a resolution deprecating the sacrifice of life and placing the blame primarily on the organization having supervision of the races.

"Any auto organization, whose major function is public safety and which undertakes to sponsor automobile races," said Mayer, "cannot escape responsibility for the tragic consequences of inexpert driving, as regards personnel, or the physical condition of tracks over which the races are run."

"Automobile racing is sufficiently hazardous without imperfect track conditions, and we believe public opinion will no longer tolerate contests under such conditions, no matter under whose auspices and sanction the races are run."

"Automobile racing, under the present system, is conducted primarily for profit and serves no useful purpose."

"In the early years of the automobile, races were of value in the development of automotive science and mechanism. At the present time, however, each automobile manufacturer makes his own tests on his own private grounds. Furthermore, the development of an automobile that will travel 200 miles an hour is of no practical value to automotive science for such speed would always be a menace on the public highway."

Magnetic Storms on Aug. 14, Says Sun Student

Pasadena, Calif.—A gigantic sun spot that is powerful enough to cause severe disturbances in the earth, has been discovered, according to Dr. Seth B. Nicholson, observer at Mount Wilson observatory, who said the spot may cause magnetic storms on the earth on August 14.

President's Cup Race Sept. 13

Washington.—The President's cup regatta will be held here on September 13 and 14. It was announced by the newly formed Chesapeake and Potomac Power Boat association.

Peru Awards Hoover Decoration

Lima, Peru.—The grand cross with diamonds of the Order of the Sun has been awarded to President Hoover by the Peruvian government, and the grand cross also to Secretary of State Stimson on the occasion of the one hundred and eighth anniversary of Peruvian independence.

Limit Length of Trailers

Columbus, Ohio.—Trailers more than 30 feet long are against the law in Ohio, the attorney-general ruled.

Germany Claim Glider Records

Gersfeld, Germany.—New endurance records for gliders are claimed by Pilot Meisinger of Darmstadt and Pilot Meyer of Als la Chapelle. The first remained aloft for eight hours, ten and twenty-six minutes and the other two minutes less.

Michigan Nine Off to Japan

Ann Arbor, Mich.—The University of Michigan baseball team recently departed for Seattle en route for a playing tour of Japan.

NEW PORTABLE AUTOMOBILE SPRAY

A demonstration of the new portable auto-spray device was introduced in Germany. Whether in town or country, the machine sprays a pair of water, and this hand-spray to clean up his car.

LAXITY BLAMED FOR RACE DEATHS

Accident to Ray Keech Was Due to Hole in Wooden Bowl at Altoona.

Criticism of the laxity under which automobile speed contests are conducted throughout the country was voiced in Washington by the American Motorists' association, in co-operation with the Automobile Club of Illinois.

The charge was made by Si Mayer, president of the Automobile Club of Illinois and vice president of the A. M. A., that the failure on the part of authorities supervising the races to permit only experienced drivers to participate in well-conditioned tracks has resulted in avoidable loss of life to both drivers and spectators.

The recent death of Ray Keech at Altoona is the latest example of this laxness, writes Walter A. Berlingham in the Chicago Evening Post. Following his death it was officially announced that the accident was due to a hole in the wooden bowl, which it was stated would have required less than a carload of lumber to repair.

State authorities race-track killings, Vice President of the association, which approved his charge of laxness by the adoption of a resolution deprecating the sacrifice of life and placing the blame primarily on the organization having supervision of the races.

"Any auto organization, whose major function is public safety and which undertakes to sponsor automobile races," said Mayer, "cannot escape responsibility for the tragic consequences of inexpert driving, as regards personnel, or the physical condition of tracks over which the races are run."

"Automobile racing is sufficiently hazardous without imperfect track conditions, and we believe public opinion will no longer tolerate contests under such conditions, no matter under whose auspices and sanction the races are run."

Ann Arbor, Mich.—The University of Michigan baseball team recently departed for Seattle en route for a playing tour of Japan.

Fatalities Per Car Is Declining Materially

Pointing out that the number of motor fatalities per 100,000 registered in the United States has declined materially in the past few years, Harry R. Cobleigh, of the National Automobile Chamber of Commerce, advanced the view that the automobile industry has made a great deal of progress in the past few years, speaking before the joint instruction manual. Few people are also being adjusted according to the latest recommendations.

Tourists Must Register

Motorists driving to Vancouver, B. C., by way of the Pacific Highway are required to register their cars and obtain a temporary visitor's permit from the state of Oregon and the state of Washington. In Oregon this permit may be obtained to at the hotel or at the state motor association and in Washington at the head office of the Automobile club. This permit is to be returned to the United States before entering Canada.

BARONESS ORCZY
Illustrated by M. O'Connell
1912 Series

CHAPTER VIII—Continued

"The man explained. 'However, I called to my mates, and we stooped to see what it was. We were much surprised, you may be sure, to see two pairs of feet in ragged shoes. We seized hold of them and pulled. The feet were attached to two pairs of legs in tattered stockings and breeches. Finally there emerged from underneath the diligence two ragamuffins with mud up to their eyes and their clothing in rags.

"They were a sorry looking pair. We put them down for two portnoos, not worth powder and shot, and were just wondering what we should do with them when suddenly, without the slightest warning, they turned on us like a couple of demons. Not they only, for a third fellow seemed to have sprung out of the earth behind us, and came to their aid. A giant he was."

"A giant!" Ruffet exclaimed, for he had suddenly remembered Citizen Chauvelin's warning about the English spy who was tall above the average.

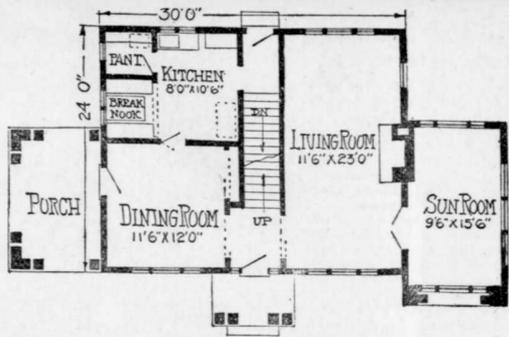

"Aye! A giant, with the strength of an ox."

No one said anything more for the moment. There was, indeed, nothing to say. Reproaches and vituperations would come later; punishment, too, perhaps. The soldiers and their captain hung their heads, brooding and ashamed.

"Epona is not more than four kilometers, citizen," Ruffet at last ventured to suggest, "and we have the lanterns."

And so the procession started, trudging down the incline in the darkness and the rain; Chauvelin and Lauzet, Ruffet and his corporal with a couple of troopers carrying the lanterns. Two hours later they reached Epona, hungry, tired, spattered with mud up to their chins.

Handsome and Commodious Home Suitable for Farm or City

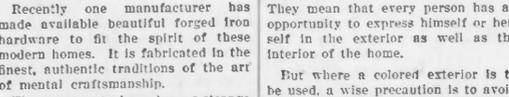

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the reader of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

In different countries there are different names for much the same type of house. In France the home shown in the accompanying illustration would be called the "chateau," for it has the same lines as country houses there. In the United States this is what is known as a rectangular hip roof house with a pitch to the roof so that there is an insulating air space between it and the second floor ceiling.

This is a very handsome, stable-appearing and commodious home and will be equally attractive on the farm, in the smaller towns, or in the city. To get the best effect, however, this home should be set on a lot where there is plenty of room for allowing trees and decorative garden.

The home is 30 feet long and 23 feet deep and is of frame construction. Without the open porch at one end, the sun room at the other end, and the colonial type pergola porch roof with the colonial columns, it would be a rather plain rectangular home.

The interior is laid out very similar to the New England colonial house. The entrance door is practically in the center of the front and leads into the hall out of which run stairs to the second floor. At the right through a

being 11 feet 6 inches by 16 feet. The others are 13 feet by 11 feet 6 inches and 9 feet by 9 feet 6 inches. As has been said, the sun room and porch on either ends of the house are attractive features. The sun porch projects slightly at the front and is 9 feet 6 inches by 15 feet 6 inches deep. Its design makes it very out of the ordinary, as will be noted by a careful study of the illustrations. The colonial idea is carried out in the pillars supporting the roof of the open porch.

For those who desire something out of the ordinary for their home, this design should have a strong appeal.

Forged Iron Hardware Adds to Period Home
Among all the details which go to achieve atmosphere and individuality in a house, forged iron hardware has always held important place. Indeed, with the continually spreading tendency to build period homes of Elizabethan, Spanish, colonial and other types the call for such hardware has become universal.

Recently one manufacturer has made available beautiful forged iron hardware to fit the spirit of these modern homes. It is fabricated in the finest, authentic traditions of the art of metal craftsmanship.

There seems to have been a strange sympathy in the medieval mind with the properties of iron that led in those days to a very wise use of it in many different ways. During the years from the Tenth to the Seventeenth century some of the finest examples were produced.

In later times our own forefathers with a directness of purpose and crispness of line which characterize so much of their handicraft, brought to a high degree of excellence the forging of iron hardware, and some of their designs, the Curley lock, the tulip and the heart, so-called, have won a popularity which bids fair to increase as time goes on.

It is these three designs, together with the Etruscan motif from some excellent examples of iron craft of medieval days found in southern Europe, which are now available to home builders, in absolutely authentic form, by the introduction of this new forged iron hardware.

Gumwood Used for Oak and Birch; Save on Cost
Gumwood is rapidly taking the place of oak and birch in small homes or apartments, where the constructor wishes to keep the cost of the building down to as low a figure as possible.

We do not say that gumwood or birch is as pretty as some of the harder woods, but with modern workmanship carpenters can turn out some very fine jobs with these materials. Many interesting schemes have been worked out with them.

Both woods can be finished very attractively, either painted or stained, and they have a certain permanency that many woods of softer varieties have not.

One thing in particular pertaining to the selection of gumwood for interior trim is that the wood should be properly cured before installation.

Paint Great Help
In the remodeling of an old house, painted woodwork is certainly a "life-saver," for like charity, paint covereth

a multitude of defects, and transforms old interiors into rooms of real beauty and charm.

Birdhouses Need Protection of Paint
Birdhouses, usually placed so that they are peculiarly exposed to all inclemencies of the weather, should be painted very carefully with a good grade of outside house paint, and then, preferably, varnished with a good spar varnish. It is foolish to suppose that, merely because a birdhouse is a small article, it needs no surface protection.

All destructive surfaces, exposed to wind and weather, require paint and varnish to preserve them.

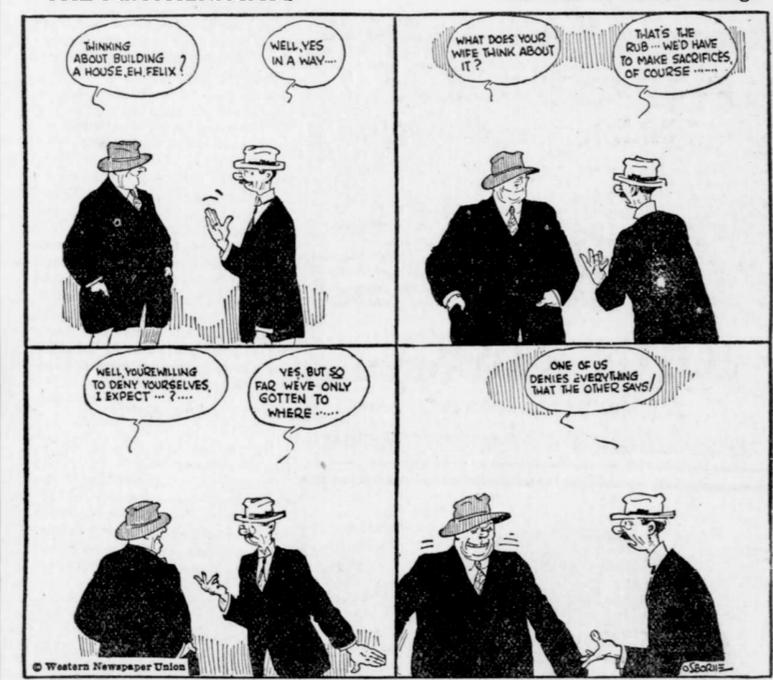

Good Lumber Pays
When building a home it is more secure and more economical to buy a trade-marked brand of lumber manufactured by a reliable firm. No matter how good the workman is, if an inferior brand of material is used the result will be disappointing.

HE'D BEEN WORKING
years, ain't you?" Williamson—"Well, no—been working for 'em only since the boss said he'd fire me and get a new man."
So There!
"Why the thunder didn't you signal what you were going to do?" demanded the angry be-motorist.
"Because I couldn't make up my mind what I wanted to do, and I wasn't going to give you the wrong signal and chance a smash-up," retorted the lady driver, haughtily.

Down With It
Tourist—See here, waiter, what in the devil is this stuff? I asked for Vichy water!
Country Waiter—That's the water the 'adock was boiled in, sir. It's the only fishy water we've got.—London Opinion.
Oh, Sir, Soft!
Fair Customer—I want a pencil.
Assistant—Hard or soft?
Fair Customer—Soft: it's for writing a love letter.

CHAPTER IX

Discomfiture

He was sitting for it now but Charles-Marie to drive the horse, since its owner was away on a business trip.

At Epona Ruffet's courier lost no time in recounting at full length the adventures that had befallen him and his comrades. Thus the story was all over the district by the time the laborers of Epona had gone to their work the following morning, and the chief of section in the department of Seine et Oise, Citizen Lauzet, became the laughing stock of the countryside, together with his wonderful friend from Paris.

Late that same day a horseless diligence, which at first appeared deserted and derelict, was discovered half a dozen kilometers to the north of the forest of Mezerles, in the mud of the stream that runs southward into the Seine. A group of laborers going to their work were the first to see it. It had been dragged into the stream and left axle deep in the water behind a clump of tall reeds. The laborers reported their find to a patrol of Ruffet's troopers, whom he had sent out to scour the countryside. The wheels had sunk deep into the mire, and it was only after a great deal of exertion that laborers and soldiers together succeeded in dragging the coach over the flat bank upon firm land.

"Truly, fate has been against us," Lauzet sighed dolefully. "Satan alone knows where the English spies and the prisoners are at this hour."

"Well on their way to England," Chauvelin remarked. "I know 'em. With their long purse and their impudence, they'll work their way to the coast, aided by fools and traitors. Such fools and traitors," he added under his breath, "as helped their last night in their latest adventure."
(TO BE CONTINUED.)

All Bunk
No doubt there are ilingo lexicographers who know the exact shades of difference between honey, hokum, blab, baloney, applesauce and bananas oil.

"Aye! A Giant, With the Strength of an Ox."

Urmia. For years and years it has been becoming saltier and saltier, probably exceeded in this respect only by Karabugas, the salt water annex of the Caspian sea. No fish live in it.

World's Largest Stones
In the ruins of the famous temple of the sun god, built by the Roman emperor, Antonius Plus, at Balbeck, Syria, are the largest stones ever used. Some of the great stone blocks are more than sixty feet long and nearly twenty feet square on the end. The ruins still can be seen a few miles east of the modern city of Beirut.

Poverty and Wealth
None is poor but the mean in mind, the timorous, the weak and unbelieving; none is wealthy but the ethereal in soul, who is satisfied and doweth over.—Tupper.

Car Is Being Materially
The number of registered cars in the United States has for the past ten years, according to the National Bureau of Commerce, increased at the rate of 100 per cent. The maximum safety of the modern car is the traffic safety of the New York State.

Urmia Has Salt Lake Larger Than Dead Sea
The Urmia basin is a catch basin for a considerable area, but as it has no outlet except evaporation, the water that comes in stays in. Consequently the streams bring a continuous supply of salt, and the result is a salt lake.

Nick Feiten and Ted Dworschak and daughter Constance attended the funeral of their cousin, Elizabeth Dworschak at Marinette, Wis., last week, from there they went to Michigan to visit relatives.

Almost Pure Silver

"Sterling is the British standard of silver for coins, and means the proportion of 925 parts silver to 75 parts copper. The American coins are only 900 fine—that is, the proportion of 900 to 100.

Don't Worry

Fear and worry are as unnecessary as they are debilitating. They are our race's heritage from the dim dawn of time, and only clear-thinking, audacious souls have risen above them, says American Magazine.

Great American Port

Approximately \$50,000,000 worth of business is done daily in the port of New York. It has been estimated that an ocean vessel and 200 freight cars arrive or depart every ten minutes during the day.

Riches Within Reach

We may not all be rich in material things, but we may all be rich in mental, moral and spiritual things without impoverishing anyone.—C. L. Quinton

Famous Juvenile Team Will Be Seen at State Fair

Ray and Maldee

State Fair Park, Wis.—Ray and Maldee, just two youngsters, brother and sister, who will appear on a free grandstand act at the Wisconsin State Fair, Aug. 26 to 31, are barely past the lisping age, but what they don't know about packing a wallop into an act is hardly worth mentioning. In neat blue jerseys and tans and gray nauties, the youngsters open with a dandy tap-dancing number. The boy remains on the stage for solo work that's even more distinctive. Corking good acrobatic-contortionist numbers finishing with a fast headstand whirl. In white cowboy regalia the boy shambles out, a la Will Rogers, and exhibits some amazing fast lariat spinning, this being climaxed with a glimpse of dancing in and out of two loops. The boy and girl then team up and do a peach of a double number in a single loop. The outstanding feature, perhaps, consists of an eight-ply rope spinning trick by the boy, with five baby lariats gyrating around his waist as he keeps them going by a continuous rhythm of body movements, one from a stick gripped in his mouth and two others in either hand.

"More Merriment Morris" is Coming to State Fair

"More Merriment Morris"

State Fair Park, Wis.—Will Morris, known on the vaudeville stage as "More Merriment Morris," should never advertise himself as a mere "bicycle rider," for that description does not do half justice to him or his ridiculously funny performance. He is a pantomimist extraordinary, the type that are just naturally funny no matter what they do. He turns giggles into laughs, and laughs into howls of merriment and there is never a lull in the laughing on the part of the crowds until he has finished his final stunt. He will manufacture laughs at the Wisconsin State Fair, Aug. 26 to 31, as part of the free grandstand acts.

Janesville Man New State Fair Speed Superintendent

H. C. Hemmingway

When the country's speediest trotters and pacers flash around the mile oval at the Wisconsin State Fair, Aug. 26 to 31, Mr. Hemmingway will be in charge of the card as the new superintendent of speed.

Mr. Hemmingway, whose home is in Janesville, is also a member of the State Fair advisory board, having served in that capacity for the last two years. He is an ardent devotee of the ancient sport of kings, harness horse racing.

Short Time to Repent

A Rumanian woman was seriously considering matrimony at the age of one hundred and eighteen. She could marry hastily, but couldn't anticipate much leisure for repentance.—South Bend Tribune.

Dependable Motor Oils—
POLARINE and ISO-VIS

You can depend on either of these two motor oils to lubricate your car as it needs to be lubricated. They are both sturdy, rich oils.

Because they are sturdy they will hold up under the trying conditions of country driving.

Because they are rich they will keep a cushioning film over every bearing surface.

Iso-Vis, the most sensational advance in motor oil, maintains a constant body—wears and wears and WEARS, lubricating at highest efficiency all the time. Many motorists run 1000 miles and more without draining the crankcase.

Polarine needs no introduction—for 20 years this dependable motor oil has been giving satisfactory service in millions of cars. If you want dependable lubrication for the least money, buy Polarine and drain the crankcase every 500 miles.

Polarine and Iso-Vis are made in different grades—use the grade made for your car.

COOLING MILK

To produce the best milk as to odor, flavor and bacteria count, it is positive necessary to place the cans in plenty of fresh, cold water and stir until the milk is cold. When water is pumped with a gasoline engine or electric motor it is an easy matter to arrange stirring apparatus that will keep the milk agitated while the pumping is going on. Market milk, in fact milk for any purpose, should be brought to a low temperature to effectively check fermentation. High temperatures cause bacteria to grow rapidly, the by-products formed during their growth, acid or gas, or both, is the process of fermentation, a chemical change which destroys the value of milk for any purpose. Clean milk, cold water and stirring to cool rapidly is the whole secret of producing grade A milk.
