DEATH OF JOHN SCHWINN SR.

John Schwinn Sr., a well known and

N. Casper, at 3 a. m., Sunday, January 5th, 1930, after a few days' illless. Cause of death being attributed to cerebral hemorrhage. Mr. Schwinn was born in Germany on November 13, 1840, and had attained the age of 89 years, 1 month and 22 days. He immigrated with his parents to America when still a boy and setiled on a farm in the town of Farmington. He was married to Mary Ann Schulte, who preceded him in death five years ago. Shortly after their marriage they made their home on a farm in the town of Trenton, where they lived until ten years ago when they retired from farm life and moved to Newburg where he resided until the death of his wife when he came to Kewaskum to spend the remainder of his life with his daughter, Mrs. S. N. Casper. Mr. her plan to present Schwinn was the father of nine children as follows: Susan (Mrs. Anton Casper) of Newburg; John of West BLE OF CHRISTMAS Bend; Henry (deceased) Richard of Freeport, Minn.; Bertha (Mrs. S. N. Casper) of Kewaskum; Louisa (Mrs. Mich Thelen) of Barton; Theodore of the town of Farmington; Joseph on the homestead and Amanda of Milwaukee. He also leaves to mourn, 33 grand children and 12 great grand children, and the following brothers and sisters: Nic Schwinn of Kaukauna; Rev. Francis Schwinn of Watertown; Mrs. Margaret Laufer 'of Store, Newburg and Helen Schwinn of Newsenhei- burg. The two were carried by automobiles until they young men had been at a dance at reached Germantown, where they met Lake DeNeveu and were on their way Alvin H. Ciriacks, who took them to to Fond du Lac when the accident ochis home fed them and kept them ov- curred. Their roadster skidded, they er night. On Friday morning Mr. said, crashed into the guard rail on the Ciriacks brought them to Kewaskum, left side of the road, swerved back v'here Chief-of-Police Brandt picked and tipped over into the ditch on the

STATE TRAPPER EXAMINATION SET FOR JANUARY 17

An examination for the position of state trapper will be held by the state Bureau of Personel on January 17. Applications for examination will be received up until January 14, and entrance blanks may be secured upon application to the Bureau of Personel. Madison.

The position of state trapper is a new one in Wisconsin and has come bout through the cooperation of the conservation emmission with the federal biological survey in an attempt to rid Wisconsin of wolves and other predatory animals. Ot o Coleman, leader of the Biological Survey in the Division of predatory animal control, has been in Madison for the past 'wo weeks making preliminary plans for his work which will begin as soon as state trappers have been chosen from the examination. Mr. Coleman has been in predatory animal control work a number of years, particularly in New Mexico, and the southwest.

There will be 5 or 6 positions to fill in the present examination, and they will be filled from the eligible list resulting from the examination. All daughter Ruth spent Thursday with candidates must file an application outlining in detail their education, training, and practical experience. All candidates will be assembled in various county seats for the examination,

Badger State News = Briefly Told =

Weyauwega-Henry Glock was reelected president of the Waupaca County Agricultural society and Aug. 26 to 29 selected as the dates for next

Glidden-Continuous day and night shifts will be needed at the sawmill of the Soo Lumber Co. here for the next six months. The company plans to cut 12,000,000 feet of timber.

Ellsworth-The Rev. Paul N. Blaufuss, pastor of the Evangelical Lutheran church here for two years, has accepted a call to the Evangelical church of Manitowoc. He will go there about Feb. 1.

Rice Lake-All of this part of the state will witness lively contests for the legislature, something rather unusual in the past. The situation is much the same as in other districts, due in some measure to the new salary

Jefferson-More than 500 head of Holstein cattle were sold to buyers in 13 different states through the Jefferson County Holstein Breeders' association last year. This exceeds by nearly 200 head the number sold during 1928. There are only 120 members in the

Platteville-Damage suits have been brought against Grant county in circuit court by several property owners along the main highway through the villages of Rockville and British Hol-The road was rebuilt and the grade raised several feet in each village. Several homes have been left below the grade. One plaintiff asks \$2,-

Janesville-Directors of the Rock County Fair association at Janesville voted to abandon the Rock county fair and have called a meeting of stockholders for Feb. 1 to ratify that action. The fair at Janesville has been one of the best known fairs in the northwest for more than eighty years. It was the scene of the state fair years

Madison-Deputy Sheriff Earl A Van Deusen, Madison, was killed by James E. Jones, 48, in a gun fight at the hotel in Mazomanie, near here. Jones was shot twice and is in a critical condition at a Madison hospital. Jones fought with the officer and Sheriff Herald Smedal when they went to the hotel, operated by Mrs. Jones, to quell a martial disturbance.

Couderay-O. C. Cuiver of the Hulapa Indian reservation in Arizona has arrived at Reserve, on the Court Oreille. Indian reservation near here, and taken over the position of Indian farmer. He succeeds C. I. Gruber, who was assigned to similar work on the Fort Totton Indian reservation in North Dakota. There are about 1,400 Chippewa Indians on the reservation

Madison-Trials of Clinton G. Price. suspended district attorney of Juneau county, and Lyall T. Wright, deposed sheriff of the same county, on charges of conspiracy to violate the national prohibition law, are expected to be held at a jury term of federal court here in late January or early February, according to plans anneunced by Harold E. Hanson, assistant United States district attorney.

Stevens Point-Sale of 14 pickle salting stations in Wisconsin and five in lower Michigan by the Arnold Brothers Pickle & Preserve Co. and the Alart & McGuire Co. of Chicago to the Green Bay Food Co. became known here with the filing of a bill of sale. The entire string of stations was transferred at a consideration of \$135,000. The Wisconsin stations are in Portage, Wood, Marathon, Oconto, Shawano and Marinette counties.

Rice Lake-Employment conditions in Rice Lake are better than for a number of years. There is considerable construction work in progress, be sides the Hines lumber mill and other industries going at a good pace. The Hines mill started a month sooner than last year and has both day and night crews working. Logs are coming in at the rate of 45 carloads a day. Lumber shipments from here also have been heavy.

Milwaukee-Mrs. Miriam Noel Wright, divorced wife of Frank Lloyd Wright, famous architect, died suddenly at Shorewood hospital here. Mrs. Wright underwent an operation, the nature of which was not made public. several months ago, and it had been reported from time to time since then that she was improving steadily. Mrs. Wright was born at Memphis, Tenn., May 9, 1869, and was a daughter of Mr. and Mrs. Andrew J. Hicks. She met Wright in Paris in 1914 and they were married in 1922.

Kenosha-Twelve years ago Mrs. Giovannina Via, mother of one daughter, and Raffael Nudi, father of a son of the girl's age, were married. Now the two children are to marry each other. Olga Mafalda Via and Dominico Nudi, her step-brother, have obtained a marriage license to be used

Black River Falls-About half the male population of the town of Bear Bluff, near here, were fined \$50 each for deer poaching. Six men paid fines and costs totaling \$347.70.

Kenosha-An increase in the number of commitments to the Kenosha county jail was reported in 1929 by Sheriff Steve Robinson. In the last twelve months, 691 men and women were sentenced. Of these, 215 resulted from liquor violations.

Madison-One cow was blamed for an epidemic of sore throat resulting in 800 cases andfi indirectly, six deaths here. Investigation by local, univercity and state health authorities located the offending animal in a dairy herd supplying this city.

Fort Atkinson-Placer munn, barnyard fowls continue to do good business. Paul Baker, farmer near here, reported finding what a jeweler identified as a six grain gold nugget in the gizzard of a duck.

Milwaukee-Milwaukee county will remain under dog quarantine for another 90 days to prevent the spread of rabies. The ban, which had been in effect since Oct. 19, was extended by Dr. C. A. Deadman, state veterinarian, following the discovery of a new case

Madison-Mrs. Mattle Pierce, a negro, freed from slavery in the Civil war, whose son is messenger for Gov. Kohler, celebrated her one hundred, first birthday anniversary New Year's in Louisiana after the Civil war.

Appleton-Pastor of the Baptist Church of Peru, Neb., the last four come here Feb. 1, succeeding the Rev. E. M. Salter, who has resigned to become head of the Dodgeville congrega-

Black Hawk-The State bank of various governmental departments. Black Hawk, which was robbed of \$4,-300 by two bandits Nov. 30, closed its aminers had gone over the books. Lawrence Strecher said that the de house without much trouble. posits totaled \$190,000.

Madison-Wisconsin farmers raised approximately six per cent more pigs in the fall of 1929 than in the same period a year ago, according to figures disclosed by the state and federal crop reporting service. While Wisconsin reported increased production, the per cent fewer pigs than during 1928, the report showed.

Madison-Of the 232 arrests made through and by the United States marshal's office in Madison during 1929, violations of the federal prohibition law were responsible for 211, according to a tabulation by C. H. Rawlinson, United States marshal of the western Wisconsin district. Violations of the federal prohibition law have rapidly increased since repeal of the Severson state prohibition law, according to figures compiled by Mr. Rawlinson.

Marshfield-Nineteen hundred and thirty will be extremely wet, according to Ewald Benesch, Marshfield cobbler whose onion rite has served as a weather oracle for years. Citizens here no longer hesitate to accept the predictions of the local prophet. His forecasts for 1929 proved true in most respects. The last half of 1929 and the first half of 1930 is the hour when Benesch divides an onion and by care-April, very wet; May, mostly authority to the President. dry; June, wet; July, nostly dry; medium and colder; December, dry on domestic sugar.

Milwaukee-Arrests for drunkenness during the year which has just ended, it was made known by police after a checkup of records for 1929 was completed. During the year, Police Chief persons were charged with drunkenness. This was about one-fourth the number arrested on all charges, 42,350. | Chinese Republic Now Of those arrested on charges of drunkenness 6,066 were charged with being just drunk, 687 with driving automobiles while drunk and 4,586 with being in 1918, the last of the pre-prohibition which China has been struggling. years, there were 2,113 arrests. In enness charges.

Milwaukee-Market quotations: far as 30 cents, possibly farther. Butter-Creamery, fresh extras, tubs, 21c; daisies, 21½c; longhorns, 21½c; Eggs-Fresh gathered firsts, 34@391/2c. being payable in gold. Sheep-Lambs, good to choice, \$13.00 @13.25; fair to good, \$1'.50@12.25; ewes, \$4.00@5.50.

Fennimore-More than 600 persons attended the patrons' party of the Farmers' Mutual Co-operative Creamery Co. and an overrun of 114 cents a pound for all butter fat delivered during the year was distributed. The refund amounted to about \$12,000. About 700 patrons shared in the re-

Clintonville-A distinguished service medal from the United States government has been awarded to Selmer J. Tillison, postmaster here, for heroism during the world war.

Appleton - The American Legion post at Shawano has been awarded the Reginald F. Hoeble trophy for the greatest increase in membership over last year in the Wisconsin department. It had a gain of 22 per cent, according to Commander Marshal C. Graf of

Milwaukee-Less than twelve hours after they were captured while attempting to open the safe in the Progressive Dairy company offices in Racine, two Milwauke men were on their way to the state's prison at Waupun.

DRY LAW, TARIFF TO **GET MUCH ATTENTION**

Congress Faces Great Battle on Both Issues.

Washington.-Tariff legislation and prohibition enforcement are the chief topics for consideration as congress reconvened, following the holiday recess. The major part of the session of the Seventy-first congress will continue until some time in midsummer.

Immediate prohibition discussion on the floor of both the house and the senate cannot be kept down, it is said, but there is a substantial determinaday. Her husband, John Pierce, also tion on the part of both Democratic a negro, was a judge and a legislator and Republican leaders to attack the tariff problem immediately and keep at it until it is finished.

The smooth-working house, when It receives the tariff bill from the senyears, the Rev. Ernest Hasselbad has ate, will have no trouble getting accepted a call to the ministry of the sturted since its procedure is much Baptist Church of Appleton. He will more binding than that of the senate. Meantime, while awaiting senate action, the house will devote most of its time to consideration of several appropriation bills, providing the necessary expenses for the operation of

Perhaps the most interesting piece of legislation to come before the doors last week after state bank ex. house is the resolution to create a joint congressional commission on "Frozen assets and heavy withdraw- prohibition. The measure has passed als" was given as the cause. Cashter the senate and probably will pass the

In the senate there is no one who has changed during the recess in the determination to keep the tariff to the fore. A conference of the progressive Republican group in the office of Senntor William E. Borah a few days ago authorized him to state that this bloc believed the tariff should be disposed of as soon as possible. Senator Joscountry as a whole raised about five eph T. Robison, Democratic leader, who has long urged continuous action on the tariff, has said that the purpose of his bloc and members of the progressive Republicans together was not to attack the industrial rates of the present law, but to seek to make reduction on some outstanding articles, such as aluminum and steel, with a view to expediting the bill.

Senators James E. Watson, Republican leader; George H. Moses, chairman of the committee on rules, and Charles L. McNary, chairman of the committee on committees, held a conference on procedure with the resultant decision to force the tariff bill to the front.

The rising of tariff interest was indicated in statements issued by Representative Joseph W. Byrns, Democrat, of Tennessee, through the Demoeratic national committee and by Junior Owens, secretary of the American Bottlers' of Carbonated Beverages. The Byrns statement was an attack on the supposition that Republicans in conference would attempt fully examining the skins predicts the to eliminate the Simons-Norris weather for the new year. World Ring of Alien

Smugglers Is Sought New Orleans.-Eleven Chinese arrested here by immigration authorities on suspicion of having been smuggled by an international syndicate, are being held here awaiting further Investigation at Houston, New York and San Francisco.

The aliens told immigration inspectors they had paid \$1,000 each for entrance into the United States and they were headed for Mott street, New York, which authorities believe is headquarters of the syndicate.

Patten Estate Set at \$19,788,524 Chicago,-The \$19,788,524 estate of the late James A. Patten, capitalist and wheat king, the largest estate in the history of Illinois' inheritance law, was closed a few days ago. The estate noid \$2,024,949 in fees to the state and federal governments.

Sixty Power Plants in Merger Fort Worth, Texas.-Sixty power plants in as many west Texas cities have been merged into the Texas Electric Service company.

Chicago.-A loss estimated at \$1,-500,000 was caused by fire which destroyed the elevator of Albert Schuwill and Company here. The building was valued at \$500,000 and the con-

tents at \$1,000,000.

\$1,500,000 Elevator Fire

Baseball Free to Children Chicago.-The Cubs and White Sox managements announced that next summer school children will be admitted free at the baseball parks except on Saturday, Sunday and holidays.

Dr. Jacob Gould Schurman.

Berlin.-All Germany listened to a farewell oration on Dr. Jacob Gould Schurman, retiring American ambassador, broadcast by Prof. Arthur Liebert, president of the Kant society. Professor Liebert voiced the deep regret of the German people in losing a friend to whom the country "owes deep gratitude for his warm heart and understanding mind."

"At the pinnacle of popular veneration, he is the recipient of best wishes from the nation to which his affection ever inclined," said the professor.

SUCCESS PREDICTED AT BIG NAVAL MEET

Foreign Demands Do Not Halt Optimism at Capital.

Washington.-Whatever may be the ground for it, the nation's Capital is inclined to be optimistic of a five-power naval agreement as the American delegation prepared to leave for the London conference.

Neither President Hoover nor any of the delegates has conceded that the French, Italian and Japanese demands present insurmountable obstacles and hence have refused to discuss a three-power or a four-power agreement which would be contingent on failure of the five invited nations

The administration's air of confidence in the face of the developments of the last two weeks is thought to be significant of reassuring information not known to the public. It appears to be reflected more or less on Capitol hill where the immediate reaction to the French note was not nearly so re-

Senator William E. Borah, chairman of the foreign relations committee, declared that he was among those who expect "something will be accomolished" in the London parley which is to open on January 21.

"It may not be as much as they hoped for in the beginning, considering the various differences in national "ewpoint to be reconciled," said the senator. "But I do expect good re-

He has shared the view expressed in the French note that a disarmament agreement presupposes an agreement on the freedom of the seas defining the rights of neutrals in war time, a subject which President Hoover and J. Ramsay MacDonald, prime minister of Great Britain, are unwilling to take up in the London conference.

President Hoover has not given up his hope of reducing, as well as limiting, the navies of the world by this conference, which must also put American and British auxiliary fleets on equal footing. He is by no means discouraged about a cruiser agreement. as some unofficial observers of recent development have been.

Henry L. Stimson, the chairman of the delegation, has been in almost daily contact with the President, and it is through him that the delegates principally have learned the administration's views.

Indianapolis Schools Closed by Meningitis

Indianapolis, Ind.—So serious was the cerebro spinal meningitis epidemic regarded here that health authorities decided to close all high schools, nor-

mal schools, and colleges in the Indianapolis area, as well as grade schools. Even high school basketball games are canceled for the first time in history. Connersville and Hammond reported cases indicating spread of the disease. Nearly 50 deaths have occurred in the state. Sixty cases were reported here in December and 13 more out state.

Legation at Warsaw Raised Washington.-The American legation at Warsaw, Poland, shortly will be raised by President Hoover to an

HATE TO SEE HIM LEAVE STUNT PLANE CRASH CAUSES TEN DEATHS

Motion Picture Men Hurled Into Pacific Ocean.

Hawks, movie director and sportsman, and nine other men engaged in the filming of venturesome air "shots," were hurled to death in the Pacific ocean in two tangled, blazing monoplanes off the Palos Verde hills, 25 miles from Los Angeles. In addition to Hawks, those killed were: Max Gold, twenty-eight, assistant director. former handball champion and basketball athlete. Conrad Wells, head camera man for the Fox Film corporation. Ben Frankel, assistant camera man. Hal Rouse, pilot. Ross Cook, pilot. George Eastman, camera man. Hank Johanes, property man. Otto Jordan, assistant camera man. Tom Harris, property boy.

Stinson-Detroiter cabin craft, each powered with a Wright 300 horse power motor, working at the time for the Fox Film corporation, collided at an altitude of 3,000 feet, exploded, and fell afire into the sea.

chance to save their lives or those of any of the passengers. A third plane of the "movie" flotilla, piloted by Capt. Roscoe Turner, Hawks' good friend, was close by as the burning planes fell, with men tumbling out of them from a great height and plunging into 260 fathonis of water. Turner could do nothing to help. The picture on which the planes and the men were working was entitled "Such Men Are Dangerous."

Eyewitnesses' descriptions of the tragedy said that one of the two planes poised above the other and then, as If the pilot had lost his vision in the piercing rays of the setting sun, had darted down and struck the top of the lower plane. After a momentary shudder a wing broke and one of the planes exploded.

The other plane, tangled in the debris of its stricken, blazing companion, became engulfed in flames and the two swept down to the depths of the ocean. As the planes fell men jumped or were hurled from them. The bodies which were recovered showed that some of those on the planes were perhaps mercifully struck dead or unconscious at once, for the bones of the

Leaves for Launching of

Chicago.-Launching of the \$100,-000,000 Bank for International Settlements is scheduled for next month, according to Melvin A. Traylor, president of the First National bank and American member of the organization committee. Mr. Traylor recently left Chicago for Europe. He was joined by Jackson E. Reynolds, president of the First National Bank of New York,

The remaining work of the international organization committee consists in electing directors and arranging for the subscription of the bank's capital. One director for each of the seven nations participating in the bank is to be named. The capital stock also will be apportioned among the countries but only a quarter of it is to be paid in at present. The central banks of other countries will take their share while the American share will be taken by a private banking group, as the United States is not officially a party to the bank,

The committee will begin its final meeting on January 12. Prior to these sessions the bankers will meet at The Hague, where final conferences on the Young plan will be held. Both the Young plan and the international bank are designed to govern future payments of German reparations.

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these sub-jects. Address all inquiries to William A. Radford, No. 407 South Dearhoir Street, Chicago, Ill., and only inclose two-cent stamp for reply.

Something more than a monetary investment is required to make a house a home. Small houses that do not cost much comparatively can be made, through proper design, to be more homelike than some in which the investment is considerably greater. This happy result is secured through the proper selection of the home building design with relation to the lot upon which it is to be built and to Its surroundings.

The house illustrated is of a type which is economical to build and at the same time provides a comfortable, attractive home. Set in rural surroundings with lawn, shrubs, flow ers and trees, the owner will have a home of which he may well be proud

First Floor Plan.

and at the same time he and his fam ily will have a comfortable abode.

As will be seen, this is a small deep. Much of its attractiveness can be attributed to the set-in porch dor- cost, this down mer and the projection in the roof at siderably.

Garage Floor Can Be

"It's the bumps you get, and the

And the shocks that your courage stands. The hours of sorrow and vain regret The prize that escapes your hands, That test your mettle and prove your

worth: It isn't the blows you deal, But the blows you take on this good old earth That shows if your stuff is real."

FOODS NEW AND OLD

A dessert that the children as well as older people will like is made by pouring New Orleans molasses over vanilla ice it and see how

This is popcorn time, so prepare some popcorn balls to regale the youngsters when they come in from skating.

good it is.

Popcorn Balls .- Pick over popcorn to see that none of the old bachelors are left (those are the ones that don't pop). Take three quarts of corn, three-fourths of a cupful of New Orleans molasses, one and one-half cupfuls of sugar, one-half cupful of water. one-fourth cupful of vinegar, threefourths teaspoonful of salt and two tablespoonfuls of butter. Boil the molasses and other ingredients except the corn and flavoring until it makes a brittle ball when tried in cold water. Remove from the fire and add the butter and vanilla for flavoring, using two teaspoonfuls for this amount. Have a large pan for the corn and pour the sirup over it very slowly, mixing well with a spoon. Form into balls as quickly as possible. This recipe makes three dozen balls.

Creole Layer Cake.-Take one cun ful each of sonr milk and brown sugar. one-half cunful of molasses, one teaspoonful of soda, two and one-half cupfuls of flour, one-half teaspoonful of baking powder, one-half teaspoonful each of cloves, nutmeg and salt, three-fourths of a cupful of melted butter, two whole eggs and one teaspoonful of cinnamon. Mix soda with the sour milk and add the molasses. Sift together the remaining dry ingredients, combine mixtures, add the melted butter and beat vigorously. Add the well beaten eggs last. Pour into three buttered layer cake pans and bake in a moderate oven thirty minutes. When cool cover with the following: Boil two cupfuls of water, one-half cupful of sugar without stirring until it makes a long thread when dropped from a spoon. Beat two egg whites until stiff, then pour the sirup slowly over the egg whites, stirring constantly. Add one cupful of chopped raisins, a few chopped nuts, one teaspoonful of lemon or vanilla extract. Beat until of the consistency to spread.

CANDY AS DESSERT

Circular skirt, knitted tuck-in blouse few candy bars, some marshmallows and some caramels,

as well as peanut brittle on hand, will always be able to surprise her family with a

dainty dessert. Prune Gelatin With Marshmallows and Brittle .-

Cook a nound of prunes until tender after soaking them over night in a quart of water. Remove the pits and chop fine through the food chopper. There should be about three and onehalf cupfuls of pulp. Add the hot prune pulp to two and one-half tablespoonfuls of gelatin which has been soaked in one-half cupful of cold water. Stir and add three-fourths of a cupful of sugar, one tablespoonful of lemon juice, one-fourth cupful of orange juice. Chill until slightly stiffened, then stir in one-fourth pound of fresh marshmallows cut into quarters and turn into a mold. Chill again and serve with whipped cream sprinkled with crushed peanut britile.

Chocolate Marshmallow Pudding .-Melt one milk chocolate bar in a double boiler, add one and one-half cupfuls of milk. Mix well two tablespoonfuls of cornstarch with one-half cunful of milk and add slowly to the chocolate mixture, stir and cook until smooth and creamy. Stir in two tablespoonfuls of sugar, twelve marshmallows and a teaspoonful of vanilla. Cool and serve with plain or whipped ing a lot. They don't bundle their

Casserole of Tongue.-Wash one fresh beef tongue and look until tender in boiling water to cover. Remove the skin and all unsightly portions and lay in a casserole. Blend two tablespoonfuls of flour and two tablespoonfuls of sweet fat, and one cupful of the broth. Add one teaspoonful each of minced onion and salt, one-fourth teaspoonful of pepper and one cupful each of diced carrots, turnip, celery, canned peas; pour around the tongue and cook in the oven well covered until the vegetables are tender.

Those who enjoy grapefruit find it most inviting with a bit of sugar, a adds to the flavor of the cocktail. former."-Washington Star. With the citrus fruits plentiful in the contrasting with a neutral shade to market at this season, one is never at a loss for a good beginner for a dinner.

LOOKING AHEAD

A shopkeeper wanted to give his son a good education to fit him for carrying on the business after he had gone. He interviewed the principal of the school.

"Yes." said the master, "we will do our best, but is there any particular cream. Just try course of study you wish your son to pursue?"

"Well, now you mention it, there is. I notice you teach biology. That would be handy for him, as then he would be able to do all his own buying when he took over the business.

Distrusting Father

"Our youngest son said something very clever today," remarked Mr. Meekton.

"What was it?"

"He won't tell me. His mother has typewritten it and he says he doesn't want to take a chance on having his stuff stolen."-Washington Star.

COVERED THEM

He-Girls used to have curves, She-Yes-and hid 'em.

•••••••••••••••••••••• Bishop Is Defensive Player

VEN if he is weefully weak in hitting, Max Bishop was the second baseman for the Athletics in their struggle with the Cubs for the world's championship. He's so good a defeath the Cubs for the world's championship. He's so good a defensive player that the team can afford to carry him with the idea of stopping the other fellows with his brilliant infielding.

Max was not expected to drive in a lot of runs. His batting average last year was away down around the .235 mark but with the host of sluggers to do the bitting. Max can ride with them and do the fielding. Because of the weak hitting of Bishop, the Cubs had a big edge on the Mackmen at the second base position with Hornsby, the leading

bitter of the team matched against the helpless little Philadelphia fellow. But those who watched the progress of the A's this season declare that the team always performed better when Bishop was at second even if it got little assistance from him in the attack.

Bishop went to the A's in 1924 and has put in all of the last six years with them. At the time he went the team was a helpless trailer. His first year with the outfit was the first year the A's began to show signs of regaining life so it seems this young fellow had something to do with the rejuvenation

f the team. Bishop is just thirty years of age now. He bats left handed but throws with the right. He's 5 feet 81/2 inches in height and weighs 155 pounds.

The sporting public may not believe that Connie Mack is wise in his choice of a second baseman, but Mack is old in the game.

At the station house Police Chief

William Brautigan recognized the coach and released him. "Humph," snorted the arresting officer, "If Northwestern had gone as fast on the gridiron as their coach did in that automobile it might have got

somewhere." Scoring Tells Nothing

Scoring statistics in football carry fittle significance. Among the leading scorers of the 1929 season there are few players of the first class. There is not more than one who is ranked among the leading backs. And there is not one who has been included on any of the all-American teams of national circulation.

The players who lead in point scorang are nearly always members of minor teams and they pile up their points against weaker opponents. The leading scorers in the Western conference did not total one-half as many points as the leading scorers in

Coach McNichol to Quit

the East and South.

Eddie McNichol, head coach of the Cniversity of Pennsylvania basketball team, confirmed a report that be would not be a candidate for reappointment at the end of the present season. "This is my last year as basketball coach at Penn," he said. He

would gire no reason. McNichol was a member of the varsity team from 1914 to 1917, and was ceptain two years. The team of 1916-17 won the intercollegiate champion-

LARGE CAGERS ON WOLVERINE COURT

Only Four Players Are Less Than Six Feet Tall.

Michigan's basketball team again this season gives observers an opportunity to dub the Wolverines "giants." Of the 14 men Coach Veenker has retained on his varsity squad only four are less than six feet tall. Six men stand above the six foot mark,

while four are an even six feet tall. If Coach Veenker should pick Norm Daniels, sophomore forward, it is probable that every man on the team will hit the six-foot mark. Capt. Bob Chapman, who jumps center, is the second tallest man on the squad, being 6 feet 2 inches. Truskowski and Orwig, forwards, as well as Daniels, are an even six feet tall as is Lovell, guard. Jones, sophomore guard prospect, is an inch taller than his rival, Lovell.

Henry Weiss, sophomore forward from Cleveland, is the midget of the squad. He is 5 feet 7, the same as was Danny Rose, star floor guard of last winter. Weiss, however, stands a fine chance of breaking the monopoly of the six-footers.

The three men besides Weiss who are less than six feet tall are Kanitz and Downing, forwards, and Hudson, guard. They all stand 5 feet 10.

Torrell, sub center, is the tallest man, 6 feet 21/2 inches. Dougail, another center, and Jennett, guard, are an inch shorter. Ricketts, another guard, is 6 feet 1.

An indication of what the recently St. Viator and Illinois college, two authorized additional paying street, Illinois schools playing night football, will mean to National Hockey league teams is seen in the acquisition by Montreal Maroons of Bill Phillips, Martin Lang, southpaw pitcher, has flashy center of the Vancouver profes been purchased from Omaha of the sionals, who was sold by the Coast club to Windsor, Ontario, for \$10,000, Western league by the Pittsburgh and resold for the same figure to the local team.

> Maroons will now send into action three complete forward lines, all with real merit. They will consist of Stewart, Siebert and Hooley Smith as regulars; Phillips, Trotter and Ward as seconds and Phillips, Northcott and Robinson as thirds.

Eddle Wittmer, star halfback at Princeton, is captain of the basketball five. Vogt, Carey and Bennett are other football regulars to make the court team.

Representative Ham Fish, who is racking his brain to find a way to bring the Army and Navy together in football again, always put a lot of color into all that he did at Harvard. He was a wizard receiver of a forward pass, even going to the extreme of catching them sitting when need be. His unusual height gave him a valuable reach aloft and he could pick the low ones off the ground. In the law school he put in his spare time organizing teams of former Harvard and Yale players for games.

Jane Bell of Toronto, a member of the Canadian women's Olympic track team in 1928 and winner of many national and international honors, has decided to give up running. The announcement of her retirement came through Myrtle Cook, another Olympic star. Miss Cook, who is forming a team to compete in the Millrose games in New York, said Miss Bell had refused to join the team because she was retiring from the track,

The French Tennis Ranking committee Issued a new list for the 1929 Take campaign, with Henri Cochet and Rene preparate Lacoste grouped together in first place. Sweet rece Jean Borotra was third and Christian Boussus and Jacques Brugnon were tied for fourth.

In the women's ranking, Mme. Mathieu was first, followed by Mme, for the mile Lafaurie, Mme. Bordes and Mme. Cleinadel in that order. Mesdemoiselles Barbier, Neufend and Metaxa were together in fifth place.

Yale's basketball coach, Elmer Ripley, was generally conceded to be the most consistent foul shooter in the professional ranks a few years back.

There is a possibility that the Lehigh university lacrosse team will be one of those to meet the combined Oxford-Cambridge team when the Englishmen tour this country in the spring. Some of the colleges already scheduled were divulged by the Intercollegiate LeCrosse association but Lehigh was not included.

It is understood that the negotiations now under way will materialize favorably. Lehigh is one of the pioneer colleges in this sport and on a previous visit of a combined Cambridge-Oxford team was one of the colleges met.

Eddie Halicki, Bucknell's greatest athlete since the days of Christy Mathewson, has been shunted to the minor leagues after a short trial with the St. Louis Cardinals.

Starting in 1921 with eight schools the Athletic Association of High School Girls of North Carolina now has S7 member schools and more than 20,000 girl athletes. Basketball, golf, tennis and other sports are on the program, but state basketball tournaments were discontinued some time ago.

Maury Kent of Northwestern tells this one about "Doc" Spears, the Minnesota coach. It occurred during Spears' first year at West Virginia. Spears' eleven got off to a good start in one of its biggest games when it returned the kickoff 25 yards. On the first play, however, something untoward happened and the referee penalized the West Virginians 15 yards, Another penalty of half the distance to the goal was soon inflicted and a third followed, putting the ball on West Virginia's one-foot line.

This was too much for Spears. He hurried out and without hesitation acquainted the referee with his opinion of him. "Get off the field or II penaltze your team again!" barked the

"Where to, brother, where to?" came Barber back Spears.

WAUKEE, NO. 2-1930.

CARBON MONOXIDE GAS IS DANGEROUS

Practice of Starting Engines in Closed Garages Deadly Error.

With the season of cold weather comes the increased danger to motorists from deadly carbon monoxide gas, warns the Chicago Motor club. The practice of starting engines in garages before opening garage doors results in many fatalities each year, according to reports received by the motorists' organization. Motorists should pay strict attention to ventilation in the garage, and, above all, should not "warm up" the car unless ample avenues of escape are available for exhaust gases. A cross-draft through the garage is most desirable.

Has Numbing Effect.

"Carbon monoxide gas has a numbing effect on the senses and many instances are recorded where motorists have died before they could span the short distance from the driver's seat to the fresh air," says a bulletin issued by the club.

"One of the best practices is to open the garage doors before starting the motor. Another is to connect the exhaust pipe with a pipe leading through the door, so that fumes will be carried out of the building. This can be done by means of rubber tubing and an extension on the exhaust.

Few Inhalations Fatal.

"Owners who do their own mechanical work should be particularly careful that they do not leave the motor running without providing adequate ventilation. Only a few inhalations of carbon monoxide gas are required to cause fatal results.

"These suggestions are offered in the hope of reducing deaths attributable to the motor car. Very little cooperation is needed to prevent unnecessary monoxide fatalities, but the public must first be aware of the peril from those deadly fumes."

Shortage of Motor Car

Fuel Supply Not Feared For the next 50,000 years, at any rate. American Motorists may feel assured of an ample fuel supply for cars, boats, airplanes and whatnots. Nor will it be necessary to carry a tank full of TNT or nitroglycerin in the car to get us there and bring us

Thus one great national worry was laid at rest, when Thomas A. Boyd, fuel technologist, recently talked to the Canadian section of the Society of Automotive Engineers meeting at

Mr. Boyd cited the known quantity of petroleum, crude petroleum, peinto liquid fuel. These are pyrolysis, or coking at high and low temperatures: hydrogenation and gasincation. The speaker dealt at some length with the Burgess hydrogenation process.

Speaking of the relative amount of power contained in gasoline, Mr. Boyd stated that this hydrocarbon contains 19,000 British thermal units; TNT has 6,500; nitroglycerin, 3,200; dynamite, 2,500; and black powder,

Eliminates Crossings

The bridge division of the New Mexico highway department is working overtime on plans and specifications for grade crossing elimination which will greatly increase the safety of the highways. Last year four grade separations were built at the crossing, which has been the scene of automobile tragedies. Three more eliminations are now in the plan stage, to be commenced and pushed through this year.

The Motor Quiz How Many Can You Answer?

Q. Should a driver attempt to turn out of a rut at high speed? Ans. No. This may cause a tire to blow, resulting in a skid or even overturning of the car. Q. How many grade crossings were eliminated from the federal aid highway system of United States in 1929?

Ans. Three hundred ninety Wisconsin led with 35; Alabama, second, 31; Michigan, third, 26; Texas, fourth, 25; Indiana, fifth, 24; Kansas, sixth, 23; Montana, seventh, 22: Georgia and Illinois, 21 each, and Mississippi, 17.

Q. During what year did Canada produce its largest number of automotive units? How many units were produced and what was their approximate value? Ans, During 1928 Canada produced 242,054 automobile units •

Q. How many different kinds of trouble can be attributed to

valued at more than \$162,867,-

missing spark plugs? Ans. There are (1) sluggish engine; (2) slow pick-up; (3) loss of power; (4) hard starting; (5) engine loses power on hard pulls and cuts out at high speeds; (6) incomplete combustion, gas gets into crankcase, dilutes the oil and causes formation of carbon, execessive wear on pistons, cylinder walls and 4

Cowcatcher on Car Adds Safety to Pedestrians

A scene during the test of a safety being picked up by the device in front of the car. A car traveling at 25

Safety Device on Auto.

miles an hour will not hurt a pedestrian, but will deposit mm "cowcatcher" of the auto.

AUTOMOBILE FACTS

An automobile tire wears better in cold weather than in hot.

Spare fuses and light bulbs, which occupy so little space in the car, often times are of great importance. There are various ways of getting

a bee out of a sedan. For instance, you can break the car open against a telephone pole.

Improperly adjusted valves will cause the engine to run unevenly and will also give less power and mileage. Adjust valves to proper timing.

In an effort to cope with the increase in automobile fatalities, the Southeastern chapter of the American Red Cross plans to establish a circle of first aid stations around Philadelphia, Pa.

VACUUM GEAR SHIFTING DEVICE PERFECTED

J. H. Newmark, New York automotive engineer, announces that after a period of seven years of research and experiments, a vacuum gear shifting device has been perfected which does away with the gear shifting lever commonly used on automobiles and enables the driver to do the shifting on the wheel by fingertip control. The vacuum gear shift, it is explained, requires a minimum of equipment and makes use of a natural element to shift the gears—the engine intake, used to create a vacuum. It requires only to remove the cover plate of the present transmission box and to apply a special one, in order to place the new gear shifting device on cars in use. This is done by attaching vacuum tubes leading to two small vacuum cylinders mounted on a cross member at the rear of the transmission case. A simple line also runs to the motor intake pipe. A pretty young model demonstrates the ease with which the gears may be shifted,

Tire Pressure Important One thing that might help the car owner to keep tire pressures where they belong is the realization that any other pressure than the one specified by the manufacturer is wrong. "About 30 pounds," the motorist tells the service station attendant. This is wrong.

never had the slightest idea what they were doing. The latest traffic nuisance is a towcar parked across an intersection at There is no "about" to it. If 30 pounds the rush hour, while a couple of cops spend ten or fifteen minutes demonis specified, the tire was intended to strating to the crowd how little they carry just that pressure. A pound more or a pound less means that the know about the mechanism of an au formation. wrong amount is being carried in the

Help to Control Disease of Scab

Clean Plowing and Proper on plant tissue, and discusses its ef-Rotation Are Among Other Essentials.

(Prepared by the United States Department of Agriculture.) While the European corn borer is spending the winter in a piece of a corn stalk or in a bit of buried crop residue in the field, it often happens that another enemy of the farmer is wintering on the outside of the same crop material. This other enemy is the seab or fusarium blight that attacks wheat, barley, rye and oats, killing the seedling plants or reducing the yield. In Farmers' Bulletin 1599-F, just issued by the United Staes Department of Agriculture, Drs. James G. Dickson of the Wisconsin Agricultural Experiment station and Edwin B. Mains of the Purdue University Agricultural Experiment station, Indiana, point out the following as three essentials for the control of the scab -clean plowing and proper crop rotation, use of well cleaned and treated seed, and the growing of scab-resistant varieties.

Corn-Borer Clean-Up Helps.

In areas where the corn borer is now a pest the corn-borer clean-up will help to eliminate scab. The scab winters in spore cases formed on the outside of crop refuse. Moisture and warm weather cause the development and spread of the summer stages. Scab caused serious losses in the small grain crops in 1919 and again in 1928. In arid and semi-arid regions device on automobiles showing a man it does not affect grain. In 1919 Illinois and Iowa were centers of the principal damage.

Scab damage is likely to be most severe when a small grain follows corn, but if all corn residues are removed or buried in plowing the danger is reduced. Cleaning seed is helpful in blowing out many of the spores and in eliminating many scabby kernels which are usually lighter than the sound kernels desirable for seed. The mercury dust treatment is desirable for seed grain

Ask for Advice. Several of the state and federal experiment stations in the region affected by scab are developing diseaseresistant varieties of wheat and barley. Farmers should ask their state experiment station for advice as to the best variety available for their locality.

Farmers' Bulletin No. 1599-F, "Scab of Wheat and Barley and Its Control," describes the disease and its phases as little expense as practicable.

fects, the weather conditions which favor severe damage in either the seedling blight stage or the head scab stage, and gives information as to control. It may be obtained free from the office of information, Department of Agriculture, Washington, D. C., as long as there is a supply available for free

Simple Way for Feeding

Bees in Winter Season A simple way to feed bees in winter is to put granulated sugar into a cheesecloth sack made much larger than just the size to hold the sugar. Then spread it out thin on top of the brood-frames. Cover it all up with the packing in an empty super. Again the moisture from the bees will soften the sugar so the bees can take it through the thin sacking ma

Some beekeepers prefer to boil the sugar and make it into a cake. It can be poured into a paper plate, and then when it is sufficiently hard, the plate with the sugar cake in it can be turned upside down on the broodframes. Then cover well with the packing as before described.

There are others who prefer to make a cake of sugar right in a wired brood-frame. After it hardens, hang the frame of sugar right in the place of an empty brood-comb removed from the hive. This plan puts the food right down among the bees. Of course, this last plan disturbs the bees much more than any of the other methods of feeding given here.

Practice Economy in

Constructing House Economy should always be practiced in house construction. One can go to the extreme both ways; a house can be built too expensively as well as too cheaply; few people, however, put too much expense on the poultry house, though occasionally, where special attention is given to appearance, there may be such a tendency.

As long as the house gives the hens comfort it need not be elaborate. It is not fair to lay a burden of several dollars of debt on each ben if the

house can be built for \$1 per head. The extreme, however, usually goes the other way-the house is not good enough. A good house is economy though the aim should be to build a house that suits local conditions with

WELL PLANNED GARDEN REDUCES FOOD BILL OF ANY FARM FAMILY

Profit Than Other Crops.

A garden, well-planned and properly cared for, assures an abundant supply of fresh vegetables of the best quality, a more healthful diet and a consider able reduction in the family food bill, Products of a quarter-acre farm vegetable garden would probably cost more than \$200 if purchased on the market from a grocery store, according to A. M. Binkley, assistant professor of horticulture at the Colorado Agricultural college.

Such products can be grown in the garden at a cost of not over \$60, he says. In other words, he explains, the farm vegetable gardener really receives \$1.50 an hour for the time he spends in his garden.

The vegetable garden will return considerably more net profit per acre than farm crops generally.

It will produce all the vegetables the average family can consume during the growing season, and in addition, supply sufficient quantities of vegetables for canning, drying and winter storage.

Beets, late cabbage, carrots, celery, onions, parsnips, potatoes, salsify and turnips may be stored for winter use.

Formaldehyde Favored

for Treatment of Oats Just before the seeding of the oats treat them with a formaldehyde solution composed of one pint of formaldehyde to fifty gallons of water. The seed may either be put in gunny sacks and dipped into the solution, draining the drippings back into the barrel, or it may be spread on the granary floor and thoroughly moistened with a sprinkling can containing the solution. In either case, a gallon of the solution will be enough for one bushel of seed. In other words, you will need a pint of formaldehyde and 50 gallons of water to treat 50 bushels of seed.

Testing Seed Corn for

Germination Is Favored Seed corn should be tested for germination this spring, according to M. O. Pence of Purdue university. Pence says that many farmers will find that the seed corn they left in the crib over winter is dead or germinates weak. This report is confirmed by county agents and farmers from all corners of the state. Seed corn that was field selected, stored in a dry, well ventilated building or heated basement shows a much stronger germination and in some cases does not pay for testing.

County agents who have compared the strong and weak germinating corn we have waited a total of 1.841 hours in the fields say that the stronger at railroad crossings, while freight cars shuttled back and forth, and corn outyleids the weaker by ten bushels an acre.

The testing costs are quite modestonly 20 to 30 cents per acre when it is done at the community tester. If the tester is busy the farmer can do it easily by making a rag-doll tester. If further directions are desired on making the rag-doll test, write Purdue university, Lafayette, Ind., for the in- decayed ends, the experimenter in

Vegetables Return More The seed should be sown soon after treatment, preferably while still moist. It may be necessary to open up your drill gauge wider than usual in order to get sufficient seed on the ground as the moistening prevents it running through quite so freely.

Keeping Sweet Cream

Butter Not Difficult Dairy specialists of the United States Department of Agriculture who supervise the making of sweet-cream butter for the navy have found that such butter can be made to keep as well in one-pound prints as when stored in tubs. Approximately 150,000 pounds of butter was put up in onepound packages, or prints. After nearly eight months in storage it showed only very slight deterioration in quality and was given a commercial score averaging 92.44 for the entire lot. Only fresh, sweet cream was used in making this butter. Throughout the manufacturing and printing processes sanitary conditions were rigidly enforced under bureau of dairy industry supervision.

Agricultural Hints

A farm icehouse is a valuable asset. Young alfalfa plants are weak feeders and need a large quantity of avail-

able plant food elements in the soil.

In picking a ram for breeding purposes, remember that half of the flock next year will carry his blood lines. Choose for improvement instead of

Upturned sods with a few seeds of the melons, cucumbers, squash, etc., may be started in the frame and the whole thing transplanted to the garden, thereby galning two or three

Increased returns of \$6 per plg, through the use of the sanitation system of production, have been reported to the United States Department of

Potato growers are urged to be cautious in buying their supply of 1930 seed from unknown dealers. It is best to obtain seed from dealers of proven reliability. Truly, the frame is a useful acces-

sory for the garden. If you are not using this convenience, you are missing much of the fun and great amount of the profit in gardening. Egg laying doubled on a Texas farm it is reported within two weeks after

the flock of 450 birds was wormed

and culled. Plainly it doesn't pay to

keep culls and feed worms at the

same time. Watermelon growers will be interested in an experiment reported in the Farm Journal. By pruning his field of melons showing bottlenecks or creased his yield 1,466 pounds per acre.

For COLDS

We all catch colds and they can make us miserable; but yours needn't last long if you will do this: Take two or three tablets of Bayer Aspirin just as soon as possible after a cold starts. Stay in the house if you can—keep warm. Repeat with another tablet or two of Bayer Aspirin every three or four hours, if those symptoms of cold persist. Take a good laxative when you retire, and keep bowels open. If throat is sore, dissolve three tablets in a quarter-glassful of water and gargle. This soothes inflammation and reduces infection. There is nothing like Bayer Aspirin for a cold, or sore throat. And it relieves aches and pains almost instantly. The genuine tablets, marked Bayer, are absolutely harmless to the heart.

BAYER

"That settles it, Miss Smiffkins, the engagement's off. Good-by." "Ta-ta, old thing. Sue you later!"

As It Should Be "Did you have much rain this year, Farmer Giles?"

"A fair amount, but my neighbor

had more." "How could be have more?" In an amateur play, it is those who "He has more land than I have."carry a spear who have the most fun Der Brummer (Berlin).

Your Kidneys

KIDNEY disorders are too serious to ignore. It pays to heed the early signals. Scanty, burning or too frequent excretions; lameness, stiffness and constant backache are timely warnings.

To promote normal kidney action and assist your kidneys in cleansing your blood of poisonous wastes, use Doan's Pills. Endorsed the world over. Sold by dealers everywhere. 50,000 Users Endorse Doan's:

C. A. Hawkins, 68 Shotwell Street, San Francisco, Calif., says: "I was stiff and achy and had a persistent soreness across my back. My kidneys didn't seem to act right after a cold and I felt all out of sorts. Doan's Pills were what I needed. They made meffectlike myself again. I now keep Doan's on hand and recommend them right along."

"Hello! Hello! How Much Does Happiness Cost?"

Only the price of learning a simple health rule, this smiling youngster finds!

"TTAPPINESS just radiates from our baby since we began giv-ing her—"

What was it that Mrs. Fred E. Schmitt of 2023 Stone Street, Falls City, Nebraska, discovered, which she could give to her baby that made her happy, well, strong and buoyant?

Not a medicine; not a drug of any kind; just harmless bodily lubrica-tion. Only that, and nothing more. Mrs. Schmitt's discovery that little Barbara kept well when she was made regular as clock work is the same discovery as has been made by millions of other people, who are enjoying the happiness of health because they use Nujol.

Babies, old folks, people in the prime of life—all alike need to have the bodily poisons (we all have them) regularly cleaned out. Nujol just gently, naturally, normally lubri-cates the action of your body which needs lubrication as much as any other machine.

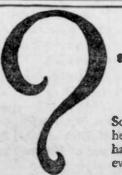

Please remember that Nujol contains no drugs; is non-fattening; is

"Happiness is on the other end of your phone too," says little Barbara

take. All it can do is keep you internally clean, and make you con-tinually feel better. Colorless, taste-less as pure water, Nujol will make you see the bright side of life; it will help you to get the most out of your life; it will make you wake up in the morning feeling fit, and help you to do a good day's work with a smile.

Millions of people have discovered this fact-why don't you? You can buy Nujol in sealed packages at all drug stores. It costs but a few cents, and makes you feel like million dollars. Get a bottle today not absorbed in any way by the body; can form no habit; cannot hurt you, no matter how much you million dollars. Get a bottle today and see how brimming zestful health will boost your day's happiness.

Gypsy Trails

The romance of the road is irresistible to most healthy, vigorous people. Walled up within most hearts is the desire to travel. Whenever man is happy he wants to travel. His deep-est emotions move him to go where he hasn't been. The gypsy is the irrepressible youth of the world; he has in his longuage no word for "duty," and nome for "possession"-he is the one man who is free, says American Magazine.

"King's English"

It is the king's English just as it is the king's army, the king's navy and the king's country. Everything in the tight little isle is subject to him, in theory at least. The expression is proverbial. It is sometimes credited to Shakespeare because of his use of it in the first act of "The Merry Wives of Windsor," but it antedates him.

Hikers, Grease Your Sox

Hikers who are troubled with tender feet are advised by the American Magazine to follow the example of soldiers during the war and grease their socks on their feet, before a long hike, with vaseline or candle

Bulgaria Land of Roses

The production of attar of roses ranks as the fourth leading product in the export trade of Bulgaria and in shipments to the United States it is the principal item. Roses were first cultivated around the valley of Tundja at Kazanlik, and then spread to the valley of Strjema, in the vicinity of Karlovo, on to the south.
