

Badger State "Happenings"

Neenah—City officials here are giving consideration to establishment of a municipal woodyard to aid the unemployed this winter.
Merrill—A heart attack was fatal to J. E. Mullenbergh, 78, pioneer paper manufacturer and superintendent of the Grandfather Paper Company here.

Racine—Charles F. Smith, professor of Greek and classical philology at the University of Wisconsin for twenty-eight years, died at the home of his daughter here.
Waukesha—Municipal Judge Parkison has given warning that all future convictions for operating slot machines in Waukesha county will draw jail sentences instead of fines.

WHEAT AND COTTON WANTED BY BERLIN

Farm Board Negotiating, Producers Protest.
Washington—Germany will purchase large amounts of American cotton and wheat if credit can be arranged, according to information given out in responsible quarters here.
Since the announcement that this government was ready to sell farm board wheat and cotton to Germany on long-term credits, it has been generally understood that there was little prospect of selling wheat, but that sales of cotton could probably be arranged. High officials have asserted there was likelihood of selling wheat also.

Mrs. Herbert Hoover, wife of the President, christened the navy's new giant dirigible Akron at Akron, Ohio, where it was built.

OKLAHOMA OIL WELLS CLOSED BY GOVERNOR

Murray Insists Price Must Be One Dollar a Barrel.
Tulsa, Okla.—Making good his challenge to major crude oil purchasing companies in Oklahoma that he would close down the oil wells of the state if a \$1 a barrel price was not posted for crude oil, Gov. W. H. Murray declared martial law within 50 feet of 3,108 oil wells in the area now under protesting.

CO-OPS ASSAIL GRAIN POOL AS MONOPOLY

Nine Farm Organizations Protest to Hoover.
Washington—A farm revolt of serious proportions was threatened with nine strong western co-operatives appealing to President Hoover to interpose to stop the federal farm board from putting into effect its plan to centralize marketing control in the Farmers' National Grain corporation.
These nine co-operatives, formerly strong supporters of the federal board, protested bitterly that they were about to be eliminated from competition so that the board's grain subsidy, the Farmers' National, might assume unchallenged control. The plan, it is charged, has the earmarks of a grain monopoly.

HOW COULD MARY FIND A WAY OUT

By FANNIE HURST

THE conditions that brought about the engagement of Mary Estes to Benjamin Parke were of the normal unexciting ones of a certain degree of proximity, similarity of social standing and general desirability smiled upon by families of both parties concerned.
In the thriving Middle West city where Mary Estes had been born and reared, Benjamin Parke was regarded as one of the most promising young business men of the community. When Mary Estes was still attending high school and taking the commercial course which was ultimately to prepare her for her work as secretary to the richest banker of the town, the Estes people were a highly respectable and conservative family in reduced finances, probably a shade or two higher in the social strata than the Parke family, although Benjamin's father was a dentist of solid standing and good practice.

Mary was the...
The engagement...
The result, it was...
Mary did not...
To be un-engaged...
The day of her...

Green Warns of Peril of Labor Rebellion

New Bedford, Mass.—President William Green of the American Federation of Labor, warned of a rebellion of the army of unemployed which will upset our present political system unless industry and government co-operate with labor in the current industrial depression.
Green spoke before the forty-sixth annual convention of the Massachusetts Federation of Labor.

Heiresse Blocks Eviction of Families of Miners

Charleston, W. Va.—Mrs. Ethel Clyde, New York heiresse, saved from eviction the families of 50 striking coal miners by posting bonds totaling \$35,500 to guarantee rent payments for a year.
The homes from which the miners and their families were moving their furniture were company owned. Mrs. Clyde, who was touring here, said: "I'm interested in fair play. Unfortunately, the residents of West Virginia seem to take far less interest in these poor miners than I, a stranger. I don't represent any charitable or philanthropic group."

Hoover Completes Plans for Winter Relief Work

Washington—President Hoover has virtually completed the organization of government and charitable agencies to care for unemployed and other distress sufferers during the winter.
The Red Cross and the army will form the backbone of the organization. Both will seek the co-operation of local agencies and where possible the army will furnish tents and distribute supplies.

Federal Job Service Gives Work to 638,689

Washington—Progress in employment, with 638,689 persons placed in jobs since last April 1, according to the reorganized federal employment service, was reported by President Hoover.
The President also called attention to the expanded public building program now under way, fifty-seven of the 758 federal building projects having been completed, at a cost of \$25,320,870 as shown by Treasury department reports.

Hunter's Shot Glances Off Ground and Kills Son

Sparta, N. J.—Samuel Goble, went home happy after he had killed a woodchuck, unaware that one of his shots had ricocheted and killed his son.
Harold Goble, eight, and his brother, Aaron, five, had been trundling a wheelbarrow along a road at the side of the woods.
"Something flew up out of the ground and hit Harold," the younger brother told his father later. "I put him in the wheelbarrow and took him home."

Col. and Mrs. E. M. House Observe Golden Wedding

Manchester, Mass.—Col. and Mrs. Edward M. House observed their fiftieth wedding anniversary quietly with family and friends, but the world remembered them.
To overlook cottage, the simple New England seashore home where Colonel and Mrs. House have spent the last 35 summers, came messages of congratulations from President and Mrs. Hoover, the king and queen of England, the king and queen of Belgium, the prince of Wales, and statesmen of many countries.

Farm Bureau Will Bid to Rent Muscle Shoals

Florence, Ala.—S. F. Hobbs of Selma, Ala., new chairman of the Muscle Shoals commission, announced the commission will receive proposals for leasing and operating the Muscle Shoals project "in the interest of fertilizer production and agriculture" at Washington September 1.
Edward A. O'Neil announced shortly afterward that the American Farm Bureau federation, of which he is president, will submit a bid to lease the project.

Business Man Admits Heading Robber Gang

Grand Rapids, Mich.—A career of crime that included five holdups, four of them hijacking jobs, and several warehouse burglaries, was uncovered by police when John Gogo, forty-eight, former local business man and West-Gogo in his confession admitted he headed a gang.
Raymondville, Texas.—Mrs. C. C. McDonald was convicted of brutally whipping her six-year-old daughter, Lucile. She was sentenced to serve two years in jail and to pay a fine of \$1,000.

Buys Entire Town to Give His Children Jobs

Wichita, Kan.—George Washington Winters, Wichita realtor, has solved the problem of supplying summer jobs for his children by buying a town.
Mr. Winters purchased Waco-Wego, a small town twelve miles south of Wichita—that is to say, he purchased the garage, filling station, grocery store, soda fountain, lunch room, oil station, and a home, which constitute visible Waco-Wego.
Then he moved his family there so his three boys and one daughter now have a variety of jobs at their disposal. The town is on a main highway between Wichita and Wellington.

D. R. Anthony Passes

Leavenworth, Kan.—Daniel Read Anthony, representative in congress from the First Kansas district from 1907 to 1929, died at Hilltop Camp, near Leavenworth. He would have been sixty-two on August 22.

Brutal Mother Jailed

Raymondville, Texas.—Mrs. C. C. McDonald was convicted of brutally whipping her six-year-old daughter, Lucile. She was sentenced to serve two years in jail and to pay a fine of \$1,000.

Kidnapers Beat Rich Man

St. Louis—Oscar Johnson II, twenty-six, son of the late Oscar Johnson, one of the founders of the International Shoe company, was robbed and severely beaten by two men who attempted to kidnap him.

Walter P. Cooke Is Dead

Buffalo, N. Y.—Walter Platt Cooke, who had served as president of the arbitral tribunal of interpretation of the Dawes plan and on the reparations commission in Europe, died at the age of sixty-two.

Moses Wants Fourth Term

Concord, N. H.—Senator George H. Moses announced he would seek a fourth term. He made it plain that the Vice Presidency had no attractions for him.

Hindenberg, 84, Can Shoot

Eberswalde, Germany.—President Von Hindenburg, who is nearly eighty-four years old, proved his prowess as a hunter by bagging a royal stag of 20 points, the biggest he ever shot, while spending the week-end at his hunting lodge at Schorfheide.

Storms Batter New England

Boston.—Lightning, wind and rain struck parts of Massachusetts, Connecticut and southern Vermont on New Hampshire, taking two lives and causing thousands of dollars damage.

Stage Beauty Dies

Toledo, Ohio.—Ray Carroll, twenty-five, called "America's most beautiful show girl," died suddenly in St. Vincent's hospital after a three-day illness. In private life she was the Broadway star was Mrs. ...

Hundreds Drown at Hankow

Hankow, China.—Hundreds of Chinese were drowned when a dam holding the waters of a lake in the rear of the city gave way.

Bringing the Medical Profession Up

That the amount now paid by the average family for doctors' bills will be substantially decreased when the medical profession drops its old-fashioned ideas about advertising, and learns to adopt modern merchandising methods, is the theory advanced by Ernest Elmo Calkins, nationally known magazine writer and advertiser, a business magazine for doctors.
In his article "Doctors Advertise? Why not?" Mr. Calkins says, "If a tuted, shared in, and supported by every doctor in the country, not only would the incomes of doctors go up, but the cost of medical attention of thousands who should have a doctor's care who are not getting it, though they could have escaped elaborate treatment or operation if they had money. Doctors ...

Brazil Refuses Daylight Time

Rio de Janeiro.—The Brazilian national observatory refused the proposition to advance the time one hour to conform with daylight saving time elsewhere.

Oklahoma Attorney Named

Washington.—President Hoover announced the appointment of Herbert K. Hyde as United States district attorney for the western district of Oklahoma.

St. Louis, 84, Can Shoot

Eberswalde, Germany.—President Von Hindenburg, who is nearly eighty-four years old, proved his prowess as a hunter by bagging a royal stag of 20 points, the biggest he ever shot, while spending the week-end at his hunting lodge at Schorfheide.

McCormick-Deering
Improved No. 12 Ensilage Cutter

THE improved McCormick-Deering No. 12 Ensilage Cutter is the enclosed-gear machine that is making friends by its economical performance. The one-piece, bridge-type main frame encloses the fly-wheel, cutter, transmission, and apron drive. All working parts are in an oil-tight, dust-proof housing and run in a bath of oil. Gears are especially cut and heat-treated. To vary the length of cut on the No. 12, merely shift a lever outside the housing. A selective-gear type of transmission, similar to that in an automobile, controls the speed of the feed table. The large, reinforced boiler plate flywheel with eight steel wings is safe at all working speeds. See us about this improved model that cuts from 10 to 16 tons per hour.

A. G. Koch, Inc.

—Dr. and Mrs. Leo Brauchle and family were guests of relatives at Columbus Sunday.
—Miss Pearl Buss spent Wednesday with Mr. and Mrs. Paul Halfman at Campbellsport.
—Dr. and Mrs. A. D. Backus and family of Cedarburg visited with Wm. F. Backus Sunday.
—Al DeMork of M. Owen and Wm. Schara of Thiensville spent Monday with Wm. F. Backus.
—Mr. and Mrs. Rudy Casper of Milwaukee were Sunday visitors with Mr. and Mrs. S. N. Casper.
—Miss Pearl Buss, who is employed in Dr. Leo Brauchle's office, is enjoying a week's vacation.
—Mr. and Mrs. Fred Groth of Jackson spent Sunday with the former's mother, Mrs. Jake Remmel.
—Mr. and Mrs. Arnold Hoek and son of Fond du Lac visited Mr. and Mrs. Jos. Mayer and family.
—Miss Minerva Sommerfeld of Fond du Lac visited over the week-end with the John H. Martin family.
—FOR SALE—Canning pickles. Inquire at Backus Dairy, R. 3 Kewaskum, Wis. Phone 616. 814 2 p.
—Miss Viola Hufferman of Milwaukee spent Sunday with her parents, Mr. and Mrs. Chas. Hafeman and family.
—If you want your car washed or polished, phone 1397 or see Harold Casper. A good job at a reasonable price.
—Mrs. Art Koch, Mrs. August and Harry, Mrs. Ed Seip and George Koebel spent Wednesday at Oconomowoc.
—Mrs. John Gerert left Monday for her home in Kaukauna after spending a week with Wm. Koenen and family.
—Mrs. Nick Weber and son Math. and Peter Weber of Nabob visited Sunday with the Witzig and Zeimet families.
—Mr. and Mrs. A. C. Schaefer and Mrs. Henry Hauerwas of Milwaukee spent Tuesday with Mrs. Nic Mayer and family.
—Joe Eberle, Joe Surawaty and Louis Foerster spent Tuesday with Ed Krautkramer, at St. Agnes hospital, Fond du Lac.
—Mrs. Rose Gehard and son Otto and daughter Ella of Chicago visited with Mrs. William Buss and family Friday and Saturday.
—Miss Hilda Windorf of Milwaukee is spending a two weeks' vacation at the home of her parents, Mr. and Mrs. William Windorf.
—Mrs. Fred Buddenhagen, daughter Dorothy and son Paul of Milwaukee visited Sunday with Mr. and Mrs. Philip McLaughlin.
—Miss Minerva Sommerfeld of Fond du Lac is spending the week with Mr. and Mrs. William A. Backhaus in the town of Barton.
—The booster dance held at the Opera House last Sunday evening, given by the Kewaskum Athletic club, was largely attended and a grand success.
—Mrs. L. Bruesser and son Ralph left Wednesday for their home in Milwaukee, after visiting several days with her father, Henry Firks at New Fane.

Virgin Diamonds

are more than a TRADE-NAME. Any reputable jeweler can offer you diamonds of assured beauty and quality—but none can distinguish those which have passed from hand to hand, of unsavory past and undesirable associations. Today, for the first time you can secure Certified Virgin Diamonds—but only through an Authorized Virgin Diamond Dealer. Our repair department is at your service, all work handled by our repairman of 28 years' experience, no idle promises made but honest workmanship.

STOLEN \$6,000 FROM FARM HOME
Thieves entered and ransacked the home of Martin Budahn on Highway 41, located two and one-half miles south of Theresa this week and stole \$6,000 in money and Liberty bonds. The sum of \$100, which was in some dishes in a cupboard, was overlooked by the robbers. The family was at work in a nearby field when the robbery was committed.

Most Compact of All Airports

With the completion of the first hangar and a concrete runway from the beach, with turntable for seaplanes and other refinements, the Wilmington-Catalina Airplane Company, Ltd., has on Catalina Island the most compact airport in the world. The photograph shows what a small cove was necessary for the installation.

How It Started

By JEAN NEWTON

Why Is It "Hoodlum" and "Hooligan"?

We all know a "hoodlum" to be a ruffian. The word is frequently applied to street urchins who make a nuisance of themselves generally, but, it is in the sense of roughneck that it is usually understood.

We have it after a gangster named Muldoon, who, in 1868, made life miserable for many of the citizens of San Francisco.

Public indignation finally led to Muldoon's arrest and arraignment under the name of "Noodlum," which, because of the bad handwriting of the court clerk, was misread as "Hoodlum," in which form it stayed in our language in the general sense.

In this connection, it might be stated that our word "Hooligan" for a roustabout is similarly derived from the name of a notorious gangster of London in the year 1808.

The Children's Corner

Edited by DOROTHY EDMONDS

The Fishing Game

As many as wish to can play this game. All you need are sharp eyes, quickness and a place to be comfortable. As well as a small basket, some pieces of paper, pencils and a love of fun.

The words that are given herewith are to be copied on tiny squares of paper, all mixed up together and put into the box or basket. Now choose partners! And one captain! Don't look! Just put your hands (in turn, of course) into the basket and draw one piece of paper with a word written on it, then another, until all are drawn.

The captain says, READY, SET, GO!

And every child playing the game makes a list of all the words he sees in the words he fished from the basket.

The captain says, STOP! And the partners whose lists are the longest win the game.

Here are some suggested words. Of course, you can use others. Remember, the words you see may not be properly arranged in the words you draw. You may have to hunt for them.

- carefulness, handkerchief, healthiest, musician, peanmanship, patriotism, favorite, brathfulness, telephones

A Silhouette Picture to Make for Your Room

1. Cut out the little silhouette figures at the bottom of the page and paste them securely in their proper places in the round picture at the top. 2. When you have done this cut out the round picture and mount it on a white cardboard just the same size or with a tiny border left. There! What a pretty picture to hang on your wall.

(Copyright,)—WNU Service.

Then you must close your eyes and vision a great, green meadow, divided by a hedge. Now it is necessary to fill the meadow with sheep and start them jumping over the hedge. As they go, you count them, one by one. After you have counted a million, it may be well, for the sake of variety, to switch to goats.

MADE COOL PART

"Did Plunger make that cool million in stocks he was going to make?" "He made the cool part of it. They went below zero."

Fear is cruel and mean.—Emerson.

Oldest Office Holder

on Job for 60 Years—Richmond, Va.—Sergt. Patrick Boisseau of the Richmond police force claims to be Virginia's oldest officeholder. He is eighty-one and is entering his sixty-first consecutive year of public service in Richmond. He was sheriff at Danville during the race riot there in the early '90s. Once, almost single-handed, he turned back a mob seeking to attack the jail to secure a negro prisoner.

Forgets Rented Horse; Tied to Tree 3 Days

Pittsburgh—When Frank Sopolski hired a saddle horse and had not returned it two days later George Fassinder, owner of the South Hills riding schools, figured something was wrong. A 12-hour search located Sopolski at his home. Then, Fassinder told Humane society officials, Sopolski thought of the horse for the first time when he had gone swimming in a South park pool. He wasn't quite certain where he had left the horse, Fassinder said, but they finally found it in a clump of woods a quarter of a mile from the pool. The horse, its owner said, had been tied to a tree so closely that it had not been able to reach food nor water during the 76 hours it was there.

At a hearing before Ald. Patrick Cawley, Sopolski was fined \$10 for cruelty to animals and posted \$1,000 bond for a hearing on the criminal charge of failing to return a rented horse.

BOARDER IN LOVE

Old Boarder—What makes you think the new boarder is in love with you? Has he made any advances? Landlady—No, but he says he will as soon as his father renits.

Tree-Sitting Cat Quits—Knoxville, Tenn.—A tree-sitting cat spent a week in a tree here without food or water before it was forcibly lowered to the ground.

A few other recent patents, as listed in the Gazette, are: Handbag and concealed muff (this combines the old-fashioned hand warmer with the modern oversize purse), cigarette board, hair-cutting machine, identifier for toothbrushes and the like (toothbrush), machines for wrapping fingers and other elongated bodies, alternately right side up and upside down).

Another recent invention is a combination fountain pen and inkstand, in which a device in the inkstand operates the filling device in the pen, thus saving labor for the pen's owner.

From California came a design for a prune pitter. This machine has a gadget for gripping the prune firmly, a rubber tube to be applied to the end of the prune, and a device for extracting the pit. The pit then is sucked through the tube and deposited wherever they deposit prune pits in California.

ary as to cause a sensation, except, perhaps, among technicians especially interested.

LIGHTS OF NEW YORK—By WALTER TRUMBULL

Practically anyone can go to bed, but not everyone can go to sleep. For this there are various remedies. All depends upon the form of wakefulness from which a person suffers. I know a man who is kept awake by any light. He happened to get a room in a hotel where a street light shone through the window. Knowing that his wife sometimes slept with a stocking over her eyes, he tried the scheme over her. Apparently, he didn't know the trick of adjusting it, as it constantly slipped down over his nose and mouth, threatening to smother him. Finally, he remade the bed so that he lay with his head away from the window. This was a pretty good idea, except for the fact that he had a stiff neck in the morning from twisting about to see whether the light was still there.

Ripening

whether he could hear through the wax.

There is a friend of mine who lives next to an armory. In the regiment to which the armory belonged was a man who evidently had ambitions to become a bugler. After everything was over on drill nights and the others had gone home, he would remain and practice bugle calls. Perhaps at eleven o'clock, he would blow tattoo for a while, which was fair enough, but around midnight he would start in on reveille, or boots and saddles. Later still, he might blow the mess call. Now the listener to whom I refer is a man who retires and rises early, but he had no desire to boot and saddle at 1 a. m. And as for the mess call, his doctor refuses to permit him to eat at night. The result is that a good, hard-working fellow with music in his soul may never become an expert bugler, merely through lack of practice.

Some persons are like that. They have no appreciation of honest effort. A side street in New York was being excavated, as all streets are. Some time in the early hours a workman with a lantern climbed down into the trench and began to beat cheerily with a hammer on a piece of metal. Henry W. Longfellow would have appreciated such industry. He might have been inspired to write something else along the line of "The Village Blacksmith." But the fellow who did hear the musical notes was the night business man, retired for the night business man, he secured three electric light bulbs, he hurred them in quick succession from a seventh-story window, so that they struck what was left of the street in the immediate vicinity of the worker. If you ever have dropped an electric light bulb on a hard surface from any height, you know what happened. The cheerful worker got out of that excavation in one jump and made the first 100 yards in record time. To his dying day, he probably will believe that some one was shooting at him.

Golfer's and bridge player's insomnia are among the commonest forms of the malady. The golfer plays each shot over; the bridge player each hand. Between dark and daylight, some most remarkable drives are made and every fence is successful. About the only cure I know for this form of wakefulness is chloroform.

But there is the old reliable method of inducing slumber. First you must relax all your muscles and your jaw.

Indians Organize a Chamber of Commerce

Representatives of the approximately 2,000 Indians who live in and near Los Angeles have formed the nation's first American Indian Chamber of Commerce at Ramona village, electing Chief Thunderbird, a Blackfoot, as president. He is seen above dictating to his secretary as other members sit around.

Inventors Never Take a Rest

Washington—Hard times or no, hopeful inventors are offering the world a constant stream of ponderous achievements and frivolous gadgets. Recent inventions registered at the United States patent office range from a snowplow to a new kind of hen's nest, replacing the conventional straw variety so long in use, and to an improved type of sea wall.

Palm Beach, Fla., obtained the patent for a sea wall. Wherein this particular sea wall is an improvement over other sea walls is not immediately apparent from the description in the Patent Office Gazette, but it might be considered significant that a Floridian should invent a sea wall. Minor and freak inventions as dominate the patent office lists. Only rarely does one appear so revolution-

ary as to cause a sensation, except, perhaps, among technicians especially interested. In the latter class is Olaf Bjork of Tall, B. C. The world may live to see delegations of motorists making pilgrimages to Bjork, for he has invented a backstop for automobiles. It is a simple device of rubber and coil springs, taking the place of the familiar rear bumper, and is designed to cause a recoil when one automobile sneaks up and bumps another in the rear.

Another recent invention is a combination fountain pen and inkstand, in which a device in the inkstand operates the filling device in the pen, thus saving labor for the pen's owner. From California came a design for a prune pitter. This machine has a gadget for gripping the prune firmly, a rubber tube to be applied to the end of the prune, and a device for extracting the pit. The pit then is sucked through the tube and deposited wherever they deposit prune pits in California.

A few other recent patents, as listed in the Gazette, are: Handbag and concealed muff (this combines the old-fashioned hand warmer with the modern oversize purse), cigarette board, hair-cutting machine, identifier for toothbrushes and the like (toothbrush), machines for wrapping fingers and other elongated bodies, alternately right side up and upside down).

CAP AND BELLS

HELPING

They put on Hamlet at the Hollywood Thespian club, and a certain well-known boulevard character attended, taking his small daughter along.

It was after the second act that the little girl asked: "Daddy, is this all made up or was Mr. Hamlet a real man?" "Why, I'm surprised at such a question," exclaimed the father. "As soon as we get home, bring me the Bible and I'll tell you all about him."

LEARNING TO LOVE

"Do you think one can learn anything through correspondence?" "I learned to love George that way."

Limited "Hattie, what do you like for your lunch?" The new landress was asked. "Well, I like eggs," was her suggestion.

"Very well, then, you shall have eggs," agreed Mrs. Smith. "But, Mrs. Smith," added Hattie, "don't fix more than six, for I never eat more than that!"

No Longer Deceived "I don't like that man. Every time I see him he tells me I'm looking younger." "I should think you'd be pleased to receive such a compliment."

"Not at all. No man ever says that to a woman unless he thinks she's getting old."—Boston Transcript.

NOT DANGEROUS

First Highwayman—Say is there any danger in this business? Second Highwayman—No, not unless you get shot.

Something After All Pat—Ere, Mike, I reckon I lost me job—I just dropped a brick an' it's broke. Mike—Go on; that's nothin'.

Pat—Oh, ain't it? It's broke on the foreman's head!

Keeping Up With the Fads "But, dearie," said her dearest friend, "if you and John love each other and get along, why do you want a divorce?"

"Oh, I'm just dying to wear one of these new ritzy divorce rings they have now," she explained.—Cincinnati Enquirer.

His Cue Sultor—May I marry your daughter, sir? Stern Father—What is your vocation? Sultor—I am an actor, sir. Stern Father (angrily)—Then get out before the "foot lights!"

It's the Truth "Mothers have a pretty bad time." "Why?" "Well, they're always afraid some girls will marry their sons and that some men won't marry their daughters."—Passing Show.

Champion Pent House Gog—New York has a pent house on every skyscraper. Magog—Yes, I know. There is one at Sing Sing that holds more people than all of them.

Gain in Knowledge Young Wife—Going out again? Two years ago you said I was your whole world. Husband—Yes, it is surprising how much geography one can learn in two years.—Lustige Blaetter, Berlin.

Unfailing Book Marks Son—I've forgotten how far I read in my book. Mother—Just look for the place where the clean pages start.—Cap per's Weekly.

Modernism "Do you permit your children to go to see these gangster pictures?" asked the first mother. "No, but—" began the other one. "Yes, I know," butted in the first, "ours go anyway, too."

Stepping Stone We suppose the principal object of so many young men taking up law is that they expect it to be a great aid to their golf.—Columbus Ohio State Journal.

How One Man Lost 22 Pounds

Mr. Heron writes: "A few lines of my book on a rheumatism sufferer... with my first bottle... diet and lost 22 pounds and was like a new man." To lose fat safely and take one half teaspoonful of Salts in a glass of water before breakfast every morning. 85 cent bottle lasts a week. At any drug store in America. If not joyfully satisfied after first bottle—money back.

Man's Natural Desire to Duplicate

Novelist Thornton Wilder talking about a book that had a best seller. "The writer of that book," "will expect all his books to be best sellers now." Of course, he will, but success does have a queer way of coming.

There's a story about a sort of golfer who joined a club and on his first round he hit a whack that, by a miracle, it in the hole in one.

A second miracle happened next hole. The golfer swung whacked the ball, it flew through the air, landed, rolled slowly across the green and disappeared in the baggin'. Another hole in one!

The golfer watched it with trembling lips. "Golly," he said, "I missed it that time."

Miss Brown's School of Business

MILWAUKEE Enrolls only high school graduates. Special intensive course for women. FALL TERM, September.

Salt Statistics

The man who isn't used to weight in salt and the one who "feels like 30 cents" seem to be a pair, judging from the statistics of last year. During that period, 8,000,000 tons of salt were produced and the total value about \$25,000,000, which on the basis of a 200-pound man works out about the rate of 30 cents.

Her Handicap

The Golfer—They're all about to play me. What do you think my handicap is? The Girl—Oh, I don't know. I may be your face.—Rehoboth Beach day Herald.

Worth Pondering Over

If the devil can have first dibs on our children I don't see what particle of difference to his high we build our church services.—Capper's Weekly.

AVOID INFECTION HANFORD'S Balsam of Myrtle

Movies Movies of surgical operations being used to teach operating procedure to student nurses. The system gradually habituates the nurse to the atmosphere of the operating room and she is prepared attend operations without fainting on the first occasion, writes Mitchell in Hygeia Magazine.

And He Doesn't "How do you keep such a fish on the floor?" "Well, my method is to place Willie on it and ask him to get still."

DIABETES HAD GANGRENE

Glad to tell any sufferer how I got sugar free and back to normal weight. Send stamped addressed envelope. C. H. BABCOCK 1825 Fourth Ave., S., Minneapolis, Minn.

Roman Decadence

The use of poison in the days of the emperors was a common mode of taking life and wreaking vengeance on an opponent or enemy.

Speed Limitation might be put into the car. That's the only way to get the most of the disappointment due to depending on some one else.

Printed Net Is Charming and Chic

By CHERIE NICHOLAS

WHAT with the program of party frocks for the last several summers being mostly a matter of one printed or embroidered cotton suggests a most intriguing discussion.

The beauty about these very charming new quality-kind cotton nets which now so smartly in fashion for evening wear is that they can be safely and successfully washed—no danger of colors "running" as heretofore. In fact, too, these nets drape ever so charmingly, at the same time having a body in them to stay crisp and looking on the warmest evening.

Very newest printed nets carry the message that dots have appeared on the horizon for midsummer evenings. For the slender woman the printed frock for slim and svelte and later providing you're the

might have started to be a sleeve and decided to "just pretend." We most forgot to tell you that the dots which pattern this particular dress are in "English Officer" red, from which striking color the hand-made silk aprons, which form the corsage take their cue. A slightly stiffened bodice is featured, its hemline following the contour of the skirt hemline with considerable artistry.

Quite as effective, although not so unusual and new as the big coin dots are the charming nets which are patterned with colorful florals. These tune in every key from flamboyant rose motifs to demure Dolly Varden flowerettes.

You may have quite a time deciding whether to buy a printed or an embroidered net for your next evening or garden-party frock. Choose either and you will play safe. The inspiring thought in this connection is that through perfected processes these fine quality dured nets no matter how delicate their tones and tints may be or how bold, they may be relied on as being fast color. This means they are not only appealing from an esthetic point of view, but they are also thoroughly practical.

Stunning Dinner Gown

This is a Lanvin replica of a dinner gown in black. The braided peplum is unique, as are the long satin gauntlets with jeweled bracelets.

Three Colors for Scarf; Worn With White Sports

There are all sorts of attractive scarfs, many of them made of red, white and blue. There are lots of clothes accessories in those colors, anyway. They are worn with white sports clothes.

There are, for instance, scarfs made in triangles of the three colors, oddly trinketed together. There are scarfs of the three colors in wide stripes, others with the center portion of the scarf white, the ends striped red and blue. These scarfs, striped and triangles, are made of the finest wool crocheted in a loose, lacy stitch.

Other scarfs are made of the three colors striped lengthwise, in soft silk crepe. Still others are made of two colors on one side, lined with the third color.

Mech Stockings Regarded Comfortable for Sports

Many women do, because it gives them less dressed up and formal. Do you like mesh for sports stockings? The new work seems next most comfortable to bare legs. Lisle and mesh, therefore, to make comfortable, good looking stockings to wear with sports costumes. And Lisle stockings are a joy for tennis.

Stocks continue to be worn for active sports, but usually over stockings. Bare legs may be worn for comfort, but only in private and informal places.

With the white clothes and the light colors you will be wearing this summer you will find that a light clear shade is most becoming. This is the shade that tones best with your outdoor-darkened skin.

Women at Palm Beach adopted this shade almost universally in the daytime. In the evening they wore paler shades—nude and peach.

There is talk of white and off-white for wear in the evening.

Brief Fashion Notes of Interest to Women

Many evening gowns are being made with separate lace jackets or boleros.

Large and small pearl buttons are used to trim good-looking summer frocks and hats.

Plink taffeta slip is lovely worn beneath a pink organdie gown, embroidered in pink and green, while a delicate line ruffled slip is worn with a taffeta frock.

Belt and necklace ensembles are a new midsummer fable for feminine fashionists.

A successful tricolor scheme is an ensemble in brown and white with a touch of brilliant orange.

Silk mitts are the newest addition to evening elegance in Paris. Shimmery pastel-tinted satin mitts are meriting pastel-tinted gowns exactly matching in fabric and tint.

FARM POULTRY

FALL EGG LAYING BRINGS IN PROFITS

Now Is Good Time to Plan for Hatching Pullets.

Winter eggs are not the most profitable eggs for the poultry producer. Fall production of eggs is more important than winter production, according to an analysis of egg prices during the months of August, September, October and November, and comparison with the winter prices, made by R. B. Gray, extension specialist in poultry husbandry at the Ohio State University.

"In February is the time to plan the hatching of pullets for production of eggs next fall during the high-price season," says Gray. "Next winter is the time for managing the flock in such a way that the egg production which started in the fall will continue throughout the winter."

"Breeding is the first requirement of pullets that are to mature, lay good-sized eggs, and continue to produce steadily through the fall and winter months. Careful breeding is becoming more and more important with general increases in feed prices and decreases in egg prices. I feel safe in predicting that the next five years will see conditions in the poultry business which will make it necessary to increase the production 10 eggs per bird in order to make the same profit we are making today."

Keep Young Cockerels in "Bachelor" Quarters

Place prospective breeding cockerels in "bachelor" quarters at the age of 10 to 12 weeks, counsels Berley Winton of the Missouri College of Agriculture. Put the culs in fattening crates for quick growth gains two weeks before sale. Removal of the males will help prevent crowding and will provide room for the pullets to make rapid growth.

As soon as the young cull chickens weigh one and one-fourth to one and one-half pounds, they are ready to fatten. They should be placed in fattening crates, and should receive no feed the first 24 hours. Then feed the fattening batter lightly for the first day or two at least three and preferably five times a day. Care should be taken not to over-feed and to keep the birds slightly hungry by giving only what they will clean up in 15 minutes. It is not considered profitable to fatten for more than 14 days.

A good batter is made from seven parts of cornmeal and three parts of middlings mixed with enough buttermilk or skim milk to make the whole the consistency of pancake batter. Ordinarily two pounds of milk to one pound of dry feed are used. Neither grit nor water are required with this ration.

Green Ducks Always in Demand at Fair Prices

Ducks require about the same care that is given to geese. However, ducks are easier to mate and, generally speaking, easier to manage. It is best to keep standard bred ducks, the market will pay more for uniform quality, the carcass is bigger and besides there is a ready demand for breeding stock of the more popular breeds.

Young ducks require fresh water to drink, but do not require it to puddle in and should not be allowed to spoil the drinking water in this way.

To fatten young ducks to the green duck stage, they must be kept in yards or pens which are clean and sanitary, and fed every ounce they will consume of the following ration:

Three parts cornmeal
Two parts low grade flour (or middlings)

One part bran
One-half part beef scrap, to which should be added 3 per cent fine grit and 10 per cent green feed.

Feed this as a mash, moistened with milk, three or four times a day—all they will eat. This mixture, fed properly, will make a three to four pound green duck in ten to twelve weeks.

Poultry Hygiene

The task of poultry hygiene is twofold because it aims not only to promote health but also to protect and defend it. In connection with the former, conditions are sought to be established under which the vital functions of the animal body can be performed with the least hindrance and at a maximum efficiency, while the latter is designed to either ward off actual causes of disease, to interrupt their free movements, to bring about their destruction.

Avoid Worm Troubles

There are numerous recipes and suggestions given for the treatment of worms in poultry, turkeys included, but the first thing to notice is that worm troubles are largely due to dirty premises. There is not much use in attempting to stop losses in a flock through worms unless care is taken to clean up the premises regularly, disinfect them and clean out the droppings from the roosting place to a portion of the farm that is not frequented by the flock.

Thorough Delousing

In delousing fowls with powder, it is a wise precaution to saturate all bunches of nits found with a mixture of lard and kerosene, which prevents their hatching. Blue ointment rubbed into the skin among the feathers below the vent will kill the nits as soon as they hatch and come down to the skin. Sodium fluoride powder is supposed to remain on the skin long enough to catch nits that hatch after, but the grease or ointment makes destruction sure.

NATIVE CUNNING OF FOXES AND WOLVES

Classed by Hunters as Wiser Than Other Denizens of the Woods.

Which is superior in wit and cunning, the fox, famous since Biblical times, or the wolf, who was known well in the days of ancient Rome and, no doubt, even earlier in history? While not pretending to settle the long-mooted question, John A. Hope, in an article published in the American Forests and Forest Life, tells of his personal experiences with both animals, leaving the reader to decide for himself.

Mr. Hope has known the fox since boyhood and the timber wolf for some forty years in the forests and mountains of Canada. Both, he says, are gifted with a more acutely intelligent cunning in self-preservation than any other species of wild life, with the exception of the brown Atlantic rat.

Each animal, however, depends for safety upon widely divergent phases of woods strategy. Mr. Hope points out, and the individual must judge for himself in which phase of woodcraft the most cunning is displayed under all conditions, toward first prize.

"A wolf invariably fights shy of steel traps, dead falls, poisoned bait and other instruments set for his capture, and generally successfully," Mr. Hope states, "even though no human taint be present. Nor will he, as a rule, cross or run along a snowshoe trail made by a human, even when this trail cuts between him and a previous kill he is anxious to dine off in the dark hours. Knowing that this track is foreign to his territory, his native cunning comes into play. He is seldom seen in the daytime and a sixth sense seems to warn him always of unseen danger."

"I have seen scores of foxes by daylight," Mr. Hope continues, "and have even picked off many with a rifle, without their seeing me or even knowing whence death came. The fox I have caught within twenty hours in steel traps set with bare hands and covered with dry grass, moss, or earth, in temperate weather—no bait used. The same conditions apply to poisoned bait. And a fox will not hesitate to run along tracks by snowshoes or prints made by boots."

On the other hand, it is pointed out, a wolf depends upon speed and endurance to evade capture, and if in danger of capture at the end of a run, will turn and fight with savage

courage. Few dogs, in a no-quarter fight, come off victorious. The fox, instead of depending upon speed and endurance relies upon its wits.

"From the moment a dog picks up its scent," Mr. Hope writes, "the fox utilizes every bit of cover on its run for life, to twist and turn, outflank and break back, head for a lake or river, paddling miles up and down stream, if necessary, to throw hounds off its scent—and do it successfully nine times out of ten. It will dodge into badger earths and burrows, caves and hollow trees and even jump into the limbs of thickly branched trees, springing from one branch to another. Overhauled, it, too, will fight hard for its life, but being smaller than any domestic dog as fast as itself, it is invariably killed."

Counts Time Spent on Study of "Math" Wasted

I believe that an appalling amount of time is spent in childhood in learning things which don't matter, remembering things which will never be needed, and doing silly tricks which an intelligent man need never waste his time upon.

Let us contemplate, for example, the absurdities and abominations of arithmetic. At a conservative estimate, I have myself wrestled with arithmetic and its related studies through ten years of my irreplaceable youth.

I was, moreover, pretty good at it: I could throw a mean logarithm and change a cotangent into a corner and hang my hat on it. I have done all the geometry, plain and fancy, and dabbled delicately in calculus. I could once make an advanced algebraic equation say "Uncle."

I assure you that not a trace of it is left, and that furthermore I don't miss it. There must be a large blank area in my brain which was once full of arithmetic, but it isn't the least painful. Except for a reasonable facility with the multiplication table there isn't a particle of arithmetic left in my system.

I can make change, but so can a street car conductor. But I can't remember more than five telephone numbers, and so long as they continue to print telephone books I won't need to.—Donald Rose in the Forum and Century.

Guidance Provided

We need only obey. There is guidance for each of us, and by lowly listening we shall hear the right word.—Emerson.

No Date

He—I say it with flowers but I grow them myself.
She—You do look rather seedy.

Why look further?

when you can have this **DEPENDABLE ALL BARLEY MALT SYRUP**

"That's Blatz!"

BLATZ BREWING CO. Milwaukee ESTABLISHED 1851

Village Built for Bombers

To provide target practice for airplanes in a recent aviation meet in Italy an elaborate reproduction of an Arabian village was built in miniature. The model was raked with aerial bombs shot from airplanes, flying low. Big bombers and small scout machines were used in the attack, and the maneuvers were carried out in strict accordance with the latest Italian military development. The speed in which the village was completely destroyed was declared to be an indication of the effective offensive of the present airplane in waging war.

Very Tender Age

Mistress—Is this young salad?
Cook—Yes, ma'am, so young that I had to wash and dress it.

Speedy, but Careful

SPEED and painstaking care give you the delicious quality found in Monarch Golden Maize. The prize sweet corn is husked, sorted, cut from the cob, cooked at high scorching heat so quickly that all the fine fresh flavor and healthful vitamins are sealed in the tin. It comes to you fresh, clean, sweet, tender, creamy.

Sold only by independent dealers

MONARCH SUPER-QUALITY FOODS

Engine, Aged 100, at Fire

When the fire departments in neighboring towns refused to help extinguish a blaze in a grain store at Bishops Cleve, England, a fire engine built in 1831 was used. Villagers poured water into the ancient machine with buckets while others pumped. Eventually a volunteer brigade at Stroud, 20 miles away, came to the rescue and extinguished the blaze. Departments of other towns refused aid because the Bishops Cleve council refused to contribute to their upkeep.

Up in the Air

"Klymer has a high position, I hear."
"Yes, he builds smokestacks."

CAR OWNERS bought more Firestone Tires

during May, June and July than in any like period in History

THERE are reasons for this—Firestone is building the Greatest Tire Values in history, with the result that Firestone Factories are operating 24 hours a day, 6 days a week, to meet public preference.

This is the year everybody is scrutinizing his purchases. This is particularly true in tire buying because of the many confusing and misleading statements made about tires.

To give car owners the facts, Firestone published comparisons showing quality, construction and prices. Then the public went to Firestone Service Stores and Service Dealers—made their own comparisons with cross sections cut from Firestone Tires—and from special brand mail order tires and others.

When they saw the facts, they bought more Firestone Tires during May, June and July than in any like period in Firestone history.

Let the Firestone Service Dealer show you these Firestone Extra Values and have your car equipped for Safe, Trouble-Free Motoring. Drive in today.

THE GREATEST VALUE EVER BUILT INTO A FORD CAR

The Beautiful
Ford Tudor Sedan

\$490

(F. O. B. Detroit, plus freight and delivery.
Bumpers and spare tire extra at low cost.)

WHEN you buy a Ford car today, you buy what is unquestionably the greatest value in the history of the Ford Motor Company. Never before has so much beauty, comfort, safety and performance been offered at such a low price.

The low price of the Ford is something to think about because it means an immediate saving of many dollars — always an important consideration. But far more significant than price alone is what you get for that price. When high quality is combined with low price, you may justly take pride in having found a most satisfactory purchase.

See the Ford — ride in it — learn something about the value that is built into every part. The more you know about it, the more certain you will be that it is the car for you. It is literally true that when you "get the facts you will get a Ford."

"Happy Warrior" Greets His Successor

Former Governor Al Smith, without the brown derby, was snapped with Gov. Franklin D. Roosevelt at a lawn party. The picture does not justify any talk about friction between the two.

Made World's Longest Flight

Russell Boardman (in cockpit) and John Polando, his co-pilot, set a record when they flew the Atlantic to Istanbul, Turkey. They flew miles in 49 hours and 17 minutes, 43 minutes under the time they had for the hop.

- Housing automobiles, tractors and trucks in barns.
- Gasoline engines in barns or other unsafe place.
- Unsafe installation of incubators and brooders.
- Unsafe installation of feed cookers.
- Thrashing engines and tractors igniting straw.
- Cleaning with flammable liquids.
- Careless handling of gasoline.
- Dangerous storage of gasoline.
- Using kerosene to start or quicken fires.
- Spontaneous ignition of oily waste, rags and mops.
- Sparking electric motor improperly installed.
- Defective electric wiring.
- Oil stove explosions.
- Lamp and lantern explosions.
- Lantern not hung up.
- Moonshine still explosions.
- Clothes too near stoves.
- Rubbish in furnace room.
- Carelessness with matches and smoking.
- Children playing with matches.
- Lamps or lanterns used to heat chicken houses.
- Heating grease, oils, paint or tar.
- Brush and rubbish fires unattended.
- Friction between heavy insurance and low values.

These are most of the causes of farm building fires. The preventive remedies are so plain and common-sense, that we do not care to expound them to intelligent farmers.

In the absence of or far removed from public fire protection the need of simple first-aid fire extinguishing equipment is equally plain.

It is estimated that fifteen per cent of the net earnings of farms is wasted annually through fire. At this time of depression this makes the struggles of farmers just that much harder. All help to pay for this fifteen per cent fire waste.

Except in cases of forest and prairie fires the farmer is not threatened with exposure fires; and his safety is just what he makes it.

If you have any of these dangerous fire hazards on your farm, remove them before it is too late.

INDUSTRIAL COMMISSION.

CEDAR LAWN

A large crowd attended, including people from many parts of the state.

—Eleanor Bron is spending her week with relatives at Milwaukee.

Gain!

QUALITY SPEAKS!

The good merchant—the good product—the good service—make the real gains!

The policy of the good business man is to be consistent in quality throughout his business.

Making new contacts—opening new channels—is part of your business—a part where first impressions count. Good printing consistent in quality with your product will convey the impression of high quality as a characteristic of your business.

A leaflet—booklet—letter-head—broadside will produce results in proportion to its quality. Poor printing—poor results; quality printing—gain!

Nobody Loves a Policeman!

That's an old saying but it isn't true any more. At least, it hasn't been true since F. O. Alexander added "Finney of the Force" to the list of famous comic strip characters. For "Finney," with his twinkling humor and his shrewd comment on people and the common everyday events of life, is a lovable character, as thousands of newspaper readers who have followed him through his various adventures will testify.

"Finney of the Force" is a regular feature in this newspaper with whom our subscribers are acquainted, and all enjoy him. Then tell your friends about him, for they will enjoy him as much as you do.

Two Rockefeller Babies

John D. Rockefeller sat for his picture with John and Elizabeth Cuevas, his great-grandchildren. There's more than 90 years between the two Johns.

The generous use of butter in cooking and baking is recommended by the home economics department of the University of Wisconsin, because butter improves the flavor of food, adds energy value and by means of its high vitamin A content helps protect against infections.

Pearl Bron is spending her summer vacation with her grand mother, Mrs. Wenzel Bron at Small Cedar Lake.
