AT CAMPBELLSPORT

OTTO HABECK DIES AFTER LONG ILLNESS

Residents of Kewaskum and Washngton county were dealt a sorrowful blow on Sunday, August 9th, when Otto L. Habeck, a life-long resident of th's village, quietly passed away at his home on East Main street after an extended ilness of several years with inoma of the stomach. Mr. Habeck who had attained the age of 77 years, was active in public affairs in his ear-

Mr. Habeck was born on September 1st, 1859, in the town of Kewaskum. where he spent 57 years of his hardorking pioneer life. His reward came 1916 when he retired and made his es dence in the village, where he coninued to be active about his home.,

His marriage to Augusta Bremser ook place on May 4th, 1886, in the of Kewaskum, who survives him with two children, Henry B. Haeck of Fond du Lac, and Mrs. Walter Belger of Kewaskum. A third child liam, died in 1890, at the age of three years. Other survivors include one sister, Mrs. John Bruesewitz of larshfield, and four grandchildren. namely: Myron and Lyle Belger of the village, and Bruce and Darlene Habeck of Fond du Lac.

Mr. Habeck's funeral services were neld on Wednesday afternoon, Aug. 12th, at 1:30 p. m. from the house, and an course, Kewaskum, with inte ment being made in the congregation's cemetery. Rev. Gerhard Kaniess officiated.

Pallbearers were: Louis Klein, Albert Kocher, John H. Martin, Paul Backhaus, Carl Meilahn and Conrad Bier, all members of the St. Lucas Ev. Luth. church.

husband and father whose kind-heartedness and willingness to a'd his felowmen and family reached the highest degree at all times. His righteousness and devotion leaves an inspiration and loving memory of a faithfull soul and a life that was worth living. His influence to do good will be felt 29th as a result of winning first placand family, to whom we extend our "J-A" Machine Contest held by A. G.

Mayville 7: Grafton 5 Kewaskum 8; Kohler 2 (Called at end of eighth, darkness) West Bend 4; Port Washington 4

(Called in ninth, rain) GAMES NEXT SUNDAY Kohler at Port Washington Mayville at Kewaskum Grafton at West Bend

Kohler was the victim on its own straight second half triumph last Sunday afternoon by a score of 8 to 2, the eighth inning because of darkness after Richter. Kohler center fielder, was hit in the head by a pitched ball and was taken to the hospital. Thunder and lightning, an exceptionally dark sky and a heavy oncoming rain ended

game right off in the first anning with six runs, never to be headed as Ray Jagmin pitched another stellar game for the locals. He had only one weak inning, the third, when Kohler tall fed both its runs and made three of its five hits. After this it was just a breeze for Jagmin, who has hurled Ke-

waskum to five victories in five starts. Math'as took batting honors for the day with a triple and two singles out of four times at bat. Richter co:lected a double and single out of three at-

tempts for the losers. In the big first inning Con'ey started out for the locals with a single, Marx forced him out but Mathias and Wozniak singled scoring Marx and then Kral fanned. Hensiak waited out the plate. Harbeck singled scoring Mucha and Wozniak and Jagmin tripled

\$200.00 FIRE LOSS IN WOODS NEAR HERE

A fire, in the woods on the farm of Walter and Norbert Gatzke in the town of Auburn, better known as the Ferber farm, located about three miles north of Kewaskum, 1/2 mile east of Highway 55, which started about 1:30 p. m. on Saturday afternoon and burned until Sunday night did damage estimated at \$200 when five acres of

Besides burning the woods, the fire, which was fanned by a strong southeast wind, completely destroyed many logs and fire wood which had been made ready for the winter's use. The flames spread rapidly into a hay field of a neighboring farmer, Fred Bartelt, whose land joins a large marsh, with fire was put under control as it spread to within 150 feet of the marsh, otherdous as well as extremely hazardous.

The fire was caused by an employe of Walter Gatzke who had been sent out to cut wood. Not thinking he lit a brush pile which burned readily and the flames spread to nearby timber almost immediately, leaving him help less to the situation.

Upon discovering the plight help was called by Norbert Gatzke and from 11 to 15 volunteers were summoned from the surrounding territory, who bravely fought the flames until 2 a. m. Sunday morning before getting them under control.

With a change in the direction of was started anew and again ne'shbors. numbering eight, moved to the front lines to protect their lives and property. The battle continued throughout the day and when night came weary bodges were enlightened as the fire once more was brought under control just in time, only a few rods from the ployed steady all day Sunday hauling

In a statement to this office one of the Gatzke boys claimed that at times the flames gained a height of 60 feet or perhaps more.

desire to thank all neighbors and friends who so faithfully stuck with them during the dangerous fire and wish to thank H. S. Oppermann and Otto Bartelt, who were the last ones

AB R H PO CARL BACKHAUS IS WED TO BEULAH BOHN

CARL BACKHAUS IS WED

TO BEULAH BOHN A quiet but interesting wedding ceremony to local residents and those of the entire community was performed last Saturday afternoon when a popular Kewaskum young man, Carl Backhaus, son of Mr. and Mrs. Herman Backhaus, became the husband of Miss Beulah Bohn, daughter of Joseph Bohn, former proprietor of a store and tavern at Nabob, and now a resident of Barton.

The nuptial event took place in Holy Ange's' parish house in West Bend, with Rev. Extw. Stehling officiating. Attendants for the couple were Jerome Bohn, a brother of the byde, and Miss Eleanore Boeden.

Following the ceremony in the evening a wedding dance was held at John Gonring's hall, Nabob, where a large crowd of friends and relatives attended to offer congratulations and best

wishes to Mr. and Mrs. Backhaus. The bridegroom, a graduate of the Kewaskum High school, is employed by the L. Rosenheimer firm. The young couple will make their home on Fond du Lac avenue in this village.

By WILLIAM C. UTLEY

WAR has come to the Middle West—a hypothetical war that raises no fear of ravage and pillage in the civilian population but rather permits them to see what manner of defense their army has prepared for them. But to the soldiery in Illinois, Wisconsin, Michigan, Indiana, Ohio, Kentucky and West Virginia it is war in grim earnest for it is the basis for the August maneuvers of the SECOND ARMY.

The maneuvers represent - in a short period of time - a complete cycle of mobilization, concentration, training, operation and de-mobilization, Major General mobilization. Charles E. Kilbourne, commanding general, explained in outlining the purpose and plan of the field exer-

While the problem as a whole simulates a conflict between hypothetical Red, Blue and Brown states, with Green as a neutral, its principal purpose is to provide training, and not to be a formal test of training. Whatever units the umpires from time to time may declare have won or lost a decision, all of the troops should benefit greatly from the character of training these maneuvers make

Will Use Modern Methods

In total number of troops involved and in territory covered, these exercises are the most extensive ever held in the Middle West in peace time, General Kilbourne pointed out. The training problem involves the use of the most modern weapons and facilities available and also is the first in this area to give special emphasis to the employment of aviation and mechanized units. Large has two combat car squadrons. numbers of Illinois and Wisconsin each with two ten-car troops. It troops must be transported across Lake Michigan. Units charged with responsibility for supply and guns and 13, .50 cal. guns, and a communications operate over longer distances than in the field training of former years. Night operations are being conducted and attention given throughout the exercises to the tactical value of force in the army maneuvers the element of surprise.

The entire maneuver is based on of all tactics today involves mechsituations that are moving, rather anization, than static. By provision of faster speed and greater mobility. means of transportation and by reduction of weights carried, a velopments in foreign countries, the army is experimenting with systematic effort is being made to

operations automatically leads to the development of means of defense against attack by such methods or with such materials, experts In the beginning of the World

war aviation was utflized almost entirely for observation missions. Gradually, however, its potentiality for the offensive was recognized and towards the end of the World war the attack on installations, cities and troops on the ground beforce" is the agency through which came daily occurrences.

Efforts to develop a defense against these attacks, other than with aircraft, were decidedly lame until the closing months of the war, when improvements in anti-aircraft artillery and the establishment of balloon barrages seemed to have had a considerable deterring ef-

One of the New "Motorized Army"

fect, and the percentage of planes brought down was rapidly increasing.

Following the World war great emphasis was given both to the development of aircraft for offensive operations and to the defensive means. These defensive means are now divided into an active defense and a passive defense. In Europe and in Japan, training of civilians in the sopoints to the fact that the trend called passive defense against air attack is being undertaken. greater | read of cities being darkened during simulated bombardment from the air; of civilians being required to use gas masks; of fire departments and other civil organizations being drilled in protection of property and personnel, and instructions as to methods of preparing effective cover. These exercises are apparently made very real. The object is not only to save lives, but to organize and drill the people so that panic may not add to the

actual danger of an attack.

Much has been written of the great advance in aviation and the is used. An equal amount of water weapons installed on military aircraft. These improvements extend. of course, to the aircraft designed for operations especially against

Less is generally known of the development of the anti-aircraft artillery. There has been marked mprovement in the type of antiaircraft guns. The three-inch guns can maintain a fire at the rate of twenty shots a minute, with an effective altitude of over twenty thousand feet. The fifty caliber machine gun, firing six hundred rounds a minute, is effective against any aircraft operating at

New Gun Perfected Another automatic weapon for

The searchlights used are eight hundred million candle power. Their range is, of course, dependent upon the state of the weather. However, the greatest improvement of material has been in the development of instruments simple of operation, which control by electricity the setting of the gun so that the projectile will meet the plane in flight and also operate the fuse setter to insure that the projectile bursts at the right in-

Until actually tested by war, it is impossible to state whether the attack by aircraft, or the defense against such attack, has made the most progress. We can state with assurance, however, that both are vastly more efficient than at the

IN EVERY DIET

Nutrition Value Is Now Generally Recognized.

By EDITH M. BARBER

is a habit of the day to sigh for the bountifulness of a bygone time when foods were cheap be avoided by doing just this very and plentiful. While one and all thing. Mechanical devices for lawe should appreciate lower prices | bor saving are apt to have a screw for foods of all kinds, most of us or two somewhere in their mechanwould not exchange the variety, ism, and unless these screws are convenience, and safety which are kept tightened, trouble is brewing. provided today by modern meth- Accidents also ods of handling, preserving, and transporting them. It is a satisfaction to know that round of the house

most foods now available are of consistently good quality. Of all driver, and using staple foods which must be used it as needed. daily none is of more importance than milk, which provides so generously for the most important of that must have the nutritional needs. With the knowledge, which is recognized as absolute by physicians, that children must have milk to grow and develop normally, it is one of the greatest responsibilities of the time to see that the milk which is provided for them is safe. It must, of course, come up to certain standards of quality so that the proper amounts of nutrients are The first thought, however,

should be that the milk is low enough in bacteria-count to be safe. While certified milk, pro- a rather serious duced under the acme of cleanly accident when the conditions, is theoretically the best screws came out milk, it is expensive and beyond of the cord she the price which most persons can was using with afford to pay. It seems unneces- the electric flatiron. So don't forsary in any case when safe milk get to make good use of the screw can be procured at a moderate driver on such screws. price in the forms of pasteurized, evaporated, and dried milks. Sweetened evaporated milk is known as condensed milk and is used more largely to take the place of cream than of milk.

Modern pasteurizing-plants mand, in the first place, that the milk brought to them be clean and of good quality. They help rather than hinder the enforcement of farm-milk inspection by city or state. The process of pasteurizing reduces the bacteria-count. The manufacturers who dry or evaporate (or condense) milk are also supplied from the farms with highquality milk, and through their processes of preparing it in concentrated form for market it is pasteurized or sterilized. Dried milk has had the moisture

removed and is put up in cans ready to beat into four times its volume of water. It has the same food value as pasteurized milk, which has usually lost nothing but part of its vitamin C content. Even when raw milk is used vitamin C must be supplied by other foods, such as tomatoes or oranges. Under the new processes of preparing dried milk its flavor is changed very little, and if chilled after beating into water it can be used for

In the process of making it is and for that reason is absolutely free from bacteria. The high temperature used caramelizes the milk-sugar and gives a charerly equipped observation stations acteristic flavor to the milk. This process, however, seems to affect none of the nutritive qualities except the vitamin C, which must be furnished in liberal quantities by other foods even when fresh milk added to evaporated milk will make the food value slightly above that of most market milk. It may take the place of fresh milk in

While evaporated milk is used for cooking and for infant-feeding, it does not as a rule furnish a table-beverage in the same sense that fresh milk does. It does, however, make a delicious drink when it is mixed with fruit-juices or with chocolate sirup and frapped with ice in a shaker. The fact that evaporated milk will whip if directions are followed, makes it possible to use it instead of cream in gelatin desserts, and for that reason is most useful where whipped cream is at a premium.

Cream of Tomato Soup

- 2 cups canned tomatoes 1 teaspoon sugar
- 2 slices onion
- 3 cloves 1 bay-leaf
- 11-2 teaspoons salt Pepper
- 1-4 teaspoon soda 11-2 tablespoons butter
- 2 tablespoons flour
- 3-4 cup evaporated milk
- 3-4 cup water 1-2 cup grated cheese
- Cook tomatoes and seasoning together 10 minutes, and strain. Add soda and stir until dissolved. Melt the butter, add the flour, and stir until thick and smooth. Add the

grated cheese and crackers, or croutons or toasted bread sticks. Chocolate-Walnut Drops 1-2 pound sweet chocolate

tomato mixture, repeat, but do not

allow to boil. Serve at once with

1-2 cup condensed milk 1 cup dates 1-2 cup walnut-meats

Melt the chocolate with the milk in a double boiler. Remove from the fire, stir until smooth, and add the walnuts and dates. Drop by teaspoonsfuls on a greased baking-sheet and bake for 20 minutes in a slow oven (275 degrees F.) until firm. This amount will make 24 cakes.

The Household

By LYDIA LE BARON WALKER

IT IS a good idea to go around with a screw driver and tight-en screws frequently. It is amazing how many minor repairs can

can be avoided by going the with the screw One of the

kitchen utensils the screws in firmly is the coffee percolator handle. If one loses its grip, the person using the percolator, may get badly scalded. Be sure the screws in electric cord endpieces are secure. I know of one woman who had

Soap Screws

When a screw has to be renewed, or when the old one comes out and must be put back again, there is a little trick that will make the job easier. Soap the screw! Press the screw down into soap, and give it a little twist. Or, holding the head of the screw, just beyond the edge of the cake of soap, turn the screw around on the top of the cake, pressing the thread down enough to get it soaped. Now use the screw wherever it is wanted, and you will find that it is much easier to turn, and also it fits more securely. This is good, especially, when the screw has been used in the hole before, and is a bit loose. Screws should be very firm and tightly fitted.

There is no illumination for a dining table that is comparable to candle light. The tapers should be high enough not to intercept the vision of those looking across the table or else the candles should have shades. It is assumed in these instances, that the candles are near the center of the table Candles that are not high, and are minus shades, can be placed nearer the edge of the table, and be satisfactory

Number of Candles

It should be remembered that Never use three, for three candles are too closely associated with church significances with a sad trend, to make the number suggest gaiety, and merry meals are good for the digestion. When the table is small, or where the candles are for decoration merely, and not for the sole illumination, two candles are satisfactory.

the summer During draughts of air are wanted, candles, even the best of them, will drip when at other times they will not and the wax gets on the table. It is not the easiest thing in the world to get the wax out. If the candles are colored, the dye has been known to stain the tablecloth or centerpiece.

Candlestick Doilies To avoid this little annoyance,

let me suggest using candlestick doilies. These can be as simple as circles or squares of dull finish damask table oilcloth to match the tablecloth in color. They will be inconspicuous, and are recommended for summertime cottage use, or for dining nooks in city homes, or for eating porch meals. Those who prefer better candlestick doilies, can make them of linen embroidered in self tones, white, or contrasting colors, with scalloped edges. Or the doilies can be plain linen, lace edged. Unless the candles are of deep or brilliant dyes, these doilies are entirely sufficient. For more precaution the circle or square of imitation damask oilcloth can be put beneath the candlestick doilies. @ Bell Syndicate .- WNU Service

Paint Domes White

White and light tints do not absorb and hold heat the way darker shades do. Astronomical domes are painted white to minimize the increase in temperature in the daytime. This is done so that the scientific instruments may be maintained at a temperature as constant as possible.

Keeps Heat Out Tests made by the Bureau of

Standards show that the use of aluminum paint on the tops of automobiles, ice wagons and other vehicles reduces by about 60 per cent the amount of heat admitted through the top.

echoed with ominous finality. "And he isn't going to get away."

Monty Mitchell said thoughtfully, "A pity you have let this find be known. The thief, whoever he was, might have meant to hide the stones only till the first flurry of searching died down. He could feel reasonably sure that Miss Seton wouldn't be wearing that dress pnight, too light and gay and all that, so he thought he had a good temporary hiding place."

I was passionately grateful for his words and for his coming and standing by me, as if casually.

"Why do you imagine he chose that dress for a hiding place?" asked Donahey very slowly as if picking his way. "The position of the room, for one thing," said Mitchell. "It was near

the art gallery, and its door was visible from the gallery door-later on the gallery would have been a good lurking place till he saw his chance to nip in and retrieve the jewels. I rather think he meant to retrieve them," he went on thoughtfully, screwing up his black eyebrows, "for they are too valuable to ignore. . . You said the dress was right by the door, didn't you?" he asked of me.

"On a chair by the door," I re peated,

Donahey glanced up and said, "Does it strike you as feasible, Mr. Mitchell. that any one who committed murder for those diamonds would take a chance on losing them afterwards?" "Very feasible," said Mitchell, "if

he found the trail getting too hot. . . But you don't know that the one who hid them was the one who did the murder."

"No?" said Donahey. "No," said Mitchell, very firmly. Some one may very well have found them afterwards and just not mentioned it. And then he got cold feet for fear of being suspected of the mur-

der and so got rid of them in this hiding place." "Sounds far-fetched," was Donahey's comment. "What's the matter with this girl's hiding them herself?"

It was out in the open at last, the

accusation. "Well, there are lots of matters against that," said Mitchell in a very | plice-" reasonable tone. "One is that Miss Seton isn't the sort of person who

goes about hiding diamonds." The inspector grunted. "Somebody hid 'em. Somebody got 'em off Mrs. Harriden's neck. And you can't deny that this girl had the opportunity when she went upstairs, after dinner-

"The room was empty when I entered it," I flashed at him. "That's what you say."

"Anson must know that she made the room before I came up," I said. The Princess Rancini was up just after me, and she found the room ready for the night. There wasn't time, between our visits-" I couldn't ge on.

Donahey's thoughts were following mine. "No-no, there wasn't time," he conceded equably. "Not for the killey asked me to tell you ing. . . . But there'd have been time enough for you to pick up the shiners," he added. "You might have

found them lying about." I stared back at him and hardiness came to me. "You are very wrong," said curtly, "and you are wasting time you ought to spend in finding

the real criminal." "Anybody might pick up diamonds," said Donahey, loking me over with his experienced eyes.

"But why would they be left there?" I went on, trying desperately to be lucid. "Why would any one who killed Mrs. Harriden for her jewels go away

and leave them behind?" "He might not have killed her for her jewels," Donahey pointed out. "Then you came along and did the

finding-" Harriden's voice overtook his. Harriden had been standing there, watching, his eyes as hard as flints now,

suddenly, he intervened. "She was Deck's confederate," he said. "The thing's clear enough. He did the killing. It may have been for-for rea-

Harriden grimly. "The big one. He to get into all that if you can be kept sent her up to look for it. She made out. And the best way to keep you up this cock - and - bull story of a out is to find who did the planting."

There was a dreadful silence. Harriden went on, "She may have found it, and she may not. Deck may have the diamond on him. He may have been holding out on her."

I said in a low voice, "This would all be funny if it wasn't so terrible," and Mr. Keller murmured uneasily, "You're going pretty far in your accusations, Dan. . . .

"You were meeting Mr. Deck in the gallery just before dinner," Donahey reminded me. "Now how about that?" "I told you that was sheer accident." Mitchell created a brisk diversion.

'Mr. Harriden's feelings are really not evidence. Now that cloth those diamonds were tied up in is evidence. May I see it?" Donahey handed it over. It was a

piece of linen, a fine hemstitched handkerchief, with one corner torn out as if to remove a monogram. The cloth was crumpled and faintly stained. Mitchell examined it, then passed it to me. "What do you make of it,

Miss Seton?" "It's been washed," I said, trying hard to speak normally. "Washed and dried. Those brown marks look like radiator marks."

"Washed, by Jimmy!" Mitchell was alert as a terrier. "Now what do you think was washed out, Mr. Inspector?" We all knew the answer to thatblood.

"Your man going over the handkerchiefs in this house?" Mitchell rather sharply asked of Donahey, and Donahey passed on his disrelish at the rebuke in the bruskness of his tone to his subordinate, as he gave the order. Harriden said, belligerently, that probably the man hadn't used his own.

"Then why tear out the monogram?" Mitchell retorted. His keen eyes, behind their glasses, studied Harriden almost banteringly. "Trying to discredit the clue, in case the hankies don't match?"

Harriden reddened. "I'm not making a secret of what I think," he said harshly. "Deck threatened my wife, and he carried out his threats. And by God, I'll bring it home to him! As for this girl, who was his accom-

"Don't let your feelings get the better of your judgment," the lawyer advised drily. "You've every reason to be sore as hell, but don't get a complex, and try to fit the facts to it."

He swung around to Donahey. "Let me know when you have that hanky report, and I'll be back for it. Both of us will," and his arm on my arm turned me about with him and headed me toward the door. "Let's go and talk this over," he said to me. His tone was so friendly, so inti-

mate, that I was touched to the quick; had never needed a friend more in my life. Together we went out into the hall

and he led the way to a deep cushloned couch and proceeded to light cigarettes for us both. "Now this is very interesting," he said cheerfully. "I wonder if you have any chemicals with you that could test those spots on that handkerchief? Find out if they are rust or blood?"

At my assent he said, "Good!" heartily and then, "I'll get Donahey to give you the handkerchief. He'll probably send a guard with it. It's pretty important evidence-about all we have so far."

"Harriden's down on Deck like hell." I ventured, "Was Deck-was Mrs.

Harriden-?" "Oh, her infatuation was notorious. don't know the ins and outs-I wasn't one of their intimates. I never liked her."

"I don't see how you could resist her," I said honestly and thought of her dark, amazing eyes, her slim, seductive loveliness.

"Oh, a man could lose his head over ner-Deck did, apparently-but I don't lose my head," the young lawyer informed me. "She wasn't likable." And I thought of Nora Harriden's dead mouth, with its sharp, crael

edges. . . . "Whatever they were quarreling about," Mitchell went on, "I don't see the motive for killing her. He may have been cooling to her and going after some other girl, and she was threating to tell the girl-but that's not motive enough for murder.

"All that they have against you now is that you had the opportunity to pick up the chain and that it was found, this morning, secreted in your dress. It was secreted in a handkerchief whose identifying marks were torn out, that had been recently washed and dried without benefit of ironing, and the implication from that is that the handkerchief might have been bloodstained. Now, could Deck have passed you the chain at dinner in that very handkerchief? Going into the horrid details we have to imagine Deck thrusting Nora into the closet, wiping his hands on his hanky, or wiping off the point of whatever he jabbed her with, and then premptly washing out the aforesaid hanky and drying it on the radiator. Then he out Nora out the window, snatched his hanky off the radiator, and came down to dinner . . . Yes, it just could have been done. . . Or he could have done the hanky washing and the consignment of the gems to you later in the evening, while all the bustle was going on."

"I hardly saw him-" "Who's to prove that? What I'm examining is the strength of the pos- Sicily. Wheels are carved and gorsible case against you. Sunday, Mr. and Mrs. M. Calvey and children, Dehlia and Vincent, attended church at Eden and were entertained Krahn, Wallace and Warren Tupper at the home of Mr. and Mrs. Wm. Ellison and family at Fond du Lac.

The Galabinska brothers had an ac-

cident Saturday afternoon while mov-

ing onto the Sukowaty farm. Turning the machine too short on a s'de hill tipped the separator over, demolishing parts of it quite badly. It is being repaired however. Misses Beulah R. Calvey and Gay Stablefeldt and Jimmy Theken of Mil-

with Frank Addishun and sister Mollie and Vincent Calvey, attended dance at Fond du Lac The milk yield has decreased half as all pastures are dried up. Most farmers are hand-feeding their stock. No one Diehls is a patient at the Memorial scarcely has any early potatoes, as they are all dried down, the bean crop is also very poor unless rains come

> Mr. Theodore Leibel of Hortonville, Minnesota, is spending a week with family. He was born and raised near Batavia and is 75 years old. He visited Mr. and Mrs Edgar Meyer and family and Mr. and Mrs. Clarence Seifert near Beechwood on Tuesday, accompanied by Mr. and Mrs. Seifert and son Gilbert, Mr. Leibel owns and conducts a quarter section of land at Hortonville and is unmarried

Used Marriage Bracelets

Cucious customs have been reported by those who have studied some of the jungle tribes. At the United States National museum is a pair of extraordinary marriage bracelets brought back from the region in 1858 by naval officers. By daring to wear these, a young Indian would prove his worthiness for marriage. The wristlets look harmless enough, but before the aspiring bridegroom put them on, they were filled with stinging ants of a most vicious kind. Bravely wearing them, the suitor would dance from one end of the village to the other, pausing before each house. If he did not flinch in his grim dance, he was "approved," and presumably he and the bride lived happily ever after.-Science Service.

Circumnavigated Australia The first man to circumnavigate Australia was Abel Janszoon Tasman (1603-1659), -greatest Dutch navigator.

Wild Dog The warrigal or wild dog of Australia is there known as the dingo.

INLESS John L. Lewis and his | flow of excess quota oil into marassociates in the Committee for ket channels, and raise prices in Industrial Organization repent and that turbulent industry. "rebellious" activities

before September 5, the ten unions they head will be under suspension from the American Federation of Labor. Such was the verdict of the federation's executive council which passed on the

metal trades division, that the CIO was "fomenting insurrection and rebellion." David Dubinsky, smaller than it is this season. head of the garment workers, cast the only vote against the suspension order.

charges of John P.

Frey, president of

Lewis having definitely set himself against any peace overtures, it appeared that the suspension certainly would be put into effect. The next move will be up to the Tampa convention in the fall, which will be asked to vote the expulsion of the refractory unions. The ten unions accused by Mr.

Frey and found guilty are: Amalgamated Clothing Workers Sidney Hillman, president. Oil Field, Gas Well, and Refinery

Workers, Harvey Fremming, pres-Mine, Mill and Smelter Workers, Thomas H. Brown, president.

Ladies' Garment Workers, David Dubinsky, president. Textile Workers, Thomas F. Mc-Mahon, president.

Flat Glass Workers, Glen Mc-Cabe, president. Iron, Steel, and Tin Workers, M.

F. Tighe, president. Automobile Workers, Homer Martin, president. Rubber Workers, S. H. Dalrym-

ple, president. Action on the International Typographical union, whose president, C. P. Howard, is secretary of the CIO; and the United Hat, Cap and Millinery Workers, part of whom are not associated with the CIO, was deferred. The suspended unions have a membership of about one million, or nearly one-third of the total in the federation.

The council stated: 'This is the first attempt ever made, during the existence of the A. F. of L., covering a period of more than 50 years, to set up a dual movement within.

"It was the opinion of the executive council that it could not condone the setting up of a rival organization within the officially ognized family of organized labor, or tolerate and countenance it without sacrificing its self-respect or making an unconditional surrender to a minority group composed of members who are in open rebellion to democratic procedure and majority rule, as exemplified at the late convention of the A. F. of L."

Lewis characterized the council's action as one of "incredible and crass stupidity" and said that it was "dictated by personal selfishness and frantic fear."

 $S_{\mathrm{were\ instantly\ killed\ when\ a\ big}^{\mathrm{IX}}$ Lockheed Electra plane of the Chicago and Southern Airlines crashed a few minutes after taking off from the airport of St. Louis, Mo. At this writing there is no explanation for the disaster. The plane was almost new and the weather not bad though skies were overcast.

The plane was bound from New Orleans for Chicago, and five of the victims were residents of the latter city. One of the dead was Vernon Omlie, a veteran pilot and husband of Phoebe Omlie, a noted flyer.

CHARGED by the government with conspiracy to violate the anti-trust law by combining to dominate the purchasing of oil in the

Texas, Louisiana and Oklahoma fields and to fix prices of gasoline in the Middle West, 58 persons, 23 petroleum concerns and three publishing companies were indicted by a federal grand ury in Madison, Among the prominent defendants are Edward G.

H. M. Dawes Seubert of Chicago, president of the Standard Oil Company of Indiana; Henry M. Dawes of Evanston, Ill., president of the Pure Oil company, and many officials of Standard Oil, Pure Oil, Deep Rock, Socony-Vacuum and various other oil concerns and their subsidiaries. Also in the list are Warren C. Platt of Cleveland, publisher of the National Petroleum News and Platt's Oilgram; his two publications and the Chicago Journal of Commerce.

The indictment charged that the defendant oil companies formed pools in the east Texas and midcontinent fields for the purpose of purchasing gasoline at artificially high prices from independent producers, and in furtherance of such a scheme were members of associations which included the independents. Further it was charged that independent refiners, to aid the plan, had curtailed their production of gasoline.

This, said Mr. Platt, is exactly what the oil companies did with the approval of Secretary of the Interior Harold L. Ickes, administrator of the NRA petroleum code, when efforts were being made to limit the production of gasoline, prevent the virtually destroying many towns. I Juliana ascends the throne.

SENATOR HENRY W. KEYES of New Hampshire has announced that he is not a candidate for reelection by the Republicans, preferring "to retire from active participation in public affairs." The Republicans therefore will choose between former Senator George H. Moses and Gov. H. Styles Bridges, both of whom have announced their candidacy for the nomination.

Kansas Republicans renominated Senator Arthur Capper, and the Democrats picked Omar Ketchum of Topeka. In Kentucky the Democrats renominated Senator M. M. Logan, whose Republican opponent in November will be Robert H.

Marion A. Zioncheck, the eccentric congressman from Seattle, reconsidered his decision to retire and announced that, at the request of his mother, he would be a canon whether a practice legally startdidate to succeed himself, "to show the people that I am neither crazy nor foolish." Five other Democrats and seven Republicans seek Zioncheck's seat.

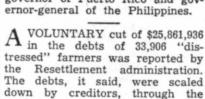

IN THE first few days of the Olympic games in Berlin the EXPERT crop statisticians estimate that, as a result of the record breaking drouth, this year's corn crop will be reduced to 1,572,-American track team piled up such an imposing number of points that it appeared certain none of the ri-000,000 bushels, which would be the val teams could catch up. Jesse smallest yield since 1881 except for Owens of Ohio State university lead the disastrous drouth year of 1934. his mates in this victorious march, In that year total production was winning three championships, in 1,478,000,000, but the acreage was the 100-meter and 200-meter runs and the broad jump. In the longer Argentine farmers are expected dash he lowered the world and to profit to the extent of \$50,000,000 Olympic marks. Ken Carpenter of or more as a result of the keen California won the discus throw competition for corn between the with a new Olympic record of 50.48 United States and Europe, which meters, and Gordon Dunn, also of has recently lifted prices about 17 California, was second. Earl Meadcents per bushel in the Buenos ows of Texas was first in the pole vault with a new Olympic mark; There are only a few other counand points were won by various tries which figure as exporters of corn, including South Africa and other American athletes.

Among the women contestants Helen Stephens of Missouri distinguished herself by breaking the world record in two heats of the 100-meter dash.

YEW YORK Republicans are to nominate a candidate for governor at their party convention in September, and Col. Theodore

Roosevelt has said in a letter that was made public that he is willing to accept that honor if the party so desires.

Colonel Roosevelt, n o w forty-eight years old, was the Republican candidate for governor in 1924 and was defeated by Alfred E. Smith. Since then he has been governor of Puerto Rico and gov-

work of voluntary farm debt com-

mittees in bringing farmers and

Col. Roosevelt

their creditors "together in a neutral atmosphere" during the ten months ended June 30. Expenses of seeking debt provided by President Roosevelt Sept. 1 last year, amounted to 1 per cent of the total amount of debts involved, the administration said. So far, \$1,100,000 of the allocated \$2,000,000 had been ex-

DECLARING that it "will indorse railways, in order no candidate" of party in the Presidential campaign, the Ameri-

would be directly under governcan Liberty league states: "The league is neither an adjunct nor an ally of the Republican parpower stations, gas works and other ty. It is not an adjunct of the Democratic party, even though many of lice not on guard duty were held its principles harmonize with the excellent platform adopted by that party in 1932 and proclaimed as 'a ment of an eight hour day, a mincovenant with the people to be imum wage and a social insurance faithfully kept.'

"Certainly the league is not an adjunct of the New Deal party which for the moment has usurped control of the party of Jefferson, Jackson, Cleveland, and Wilson. It has not and will not contribute to any campaign fund."

DESPERATE fighting for posses-WHILE the nations of Europe sion of the passes in the were worrying over the Spanish rebellion and the danger that it Guadarrama mountains north of might bring about open rupture Madrid was going on between the among the Fascist and anti-Fascist government forces and the rebel governments of the continent, steps troops. Loyalist soldiers were hurwere taken to assure peace. Gerried to that region, and Madrid many and Italy accepted the inviclaimed some victories. However, tation of Great Britain, France and the Fascists on the northern side Belgium to participate in a conof the range were said to be within ference this fall from which it is sight of the capital and in position hoped another and better Locarno pact will emerge. The rebels scored in the south by

No date for the conference has been set, but it was expected to be held either just before or soon after the meeting of the league of nations assembly in Geneva in September.

PEDRO ALBIZU CAMPOS, leader of the Puerto Rico Nationalist it had captured the provinces of party, and seven of his associates were found guilty at San Juan of a Catalonia, Valencia, Murcia, Malaconspiracy to overthrow the United States government in the island by force and were sentenced by Federal Judge R. A. Cooper to prison of aiding the Spanish rebels, and it terms ranging from two to six years. In the first trial of these men the jury had disagreed. The defense attorneys gave notice of

appeal. The case originated in a clash between Nationalists and police last October in which several persons were slain. Following this, Col. E. Francis Riggs, chief of insular police, was murdered, presumably in opposite sides, and all this caused revenge for the killing of Nationalists in the October fight.

A CCORDING to the Daily Herald of London, Queen Wilhelmina of the Netherlands has decided to abdicate, probably early next year, in favor of her daughter, Princess Juliana. That young lady is twentyoners were common on both sides | seven years old and it is expected and these deaths were probably as | that her engagement will soon be numerous as those in battle. The announced to Prince Charles of government planes showered Sweden, nephew of King Gustav V, bombs on the rebel strongholds, who will be prince consort when

« All Around »

Menomonie-Fire believed started by the exhaust of a threshing engine caused an estimated \$10,000 damage at the H. W. Jodell farm near here.

Superior - Upturn of Superior's prosperity graph is indicated from many points. Grain, ore, postal and customs receipts all were far ahead

Kenosha-For the second successive year the Kenosha County Conservation club was announced winner of the state winter feeding contest for wild life.

Lyons-Mr. and Mrs. John Holzheimer observed their golden wedding anniversary at their home here recently. The couple was the second to be married in St. Joseph's church

Baraboo-Hail stones were used to make ice cream at the Arthur Cady farm just 12 days after the hail fell in Excelsior. The hail was preserved in a valley, covered by dirt and Green Bay-Ralph Miller, giant

tackle and recent graduate of Rice Institute, Houston, Tex., has signed to play with the Green Bay Packers of the National Professional Football Rice Lake-With the deadline for

filing nomination papers ended, there has been no regular republican nomination for any county office to date. The progressives are most numerous seeking office.

Madison-Revenue from the occupational tax on beer, wine and liquor, broke all records during July, according to Robert K. Henry, state treasurer. The collections totaled \$691,705.93, 13 per cent higher than any other month since modification

Milwaukee-The federal rural resettlement administration has made seed loans to 1,500 Wisconsin farmers averaging \$20 apiece and totaling \$30,000, according to information at the office of R. I. Nowell, regional director. This is expected to enable farmers to replace drought damaged crops with forage.

Madison - Allottment of \$260,000 of federal funds for construction of the Buffalo county rural electrification project designed to serve 600 families was announced by Orland S. Loomis, state co-ordinator. The grant raises Wisconsin's total of federal RSA funds over the \$2,000,-000 mark, Loomis said.

Clyman-Loss estimated at \$25,000 was caused on the Albert Kreutziger farm by sparks from a threshing machine. The sparks set fire to a straw stack and the flames destroyed a large barn, two silos, 1,100 bushels adjustments, taken from a fund of recently threshed grain, three calves, several small buildings and the upper part of the farm home.

Milwaukee-Fred R. Zimmerman, independent republican governor of Wisconsin from 1927 to 1929, is in the fourth district race for election to congress as a progressive supporting the Townsend old age pension plan. He received unanimous endorsement at a meeting of 130 delegates representing 21 Townsend clubs here.

Madison - The state board of health reported that 17,335 Wisconsin residents over 60 years of age died of various causes in 1935, marking an all time peak for this age group. The total comprised 57 per cent of the state's deaths for all ages last year and the records now show that the average age at death is 55.9 years, a new high.

Madison-The devastating drought of 1936 which burned crops and pasture lands and greatly reduced the flow of milk was the most destructive in Wisconsin's history, William Kirsch, statistician of the state department of agriculture and markets, said after an extensive survey. Investigation of the drought damage revealed that Wisconsin's farm production was approximately 42 per cent of normal.

Oeonomowoc-School District No. 3 authorized the board of education to call a special election to vote upon a \$160,000 bond issue to erect an addition to Oconomowoc high school. The addition, according to the preliminary plans introduced by W. C. Krueger, superintendent, includes eight classrooms, two science laboratories, agricultural experimental classroom, toilet facilities, music quarters, a study hall, lockers, office space and an assembly hall.

Waupun-Only 65 prisoners have escaped since the state penitentiary was established here in 1852, Edwin P. Krause, assistant record clerk, announced after a study of the records. Forty-four were recaptured and only 15 attempts at escape have been made since 1900.

Fond du Lac-Two Fond du Lac rouths, Carl Kraemer and Gordon Mueller, have returned home from a "twice-around-the-globe" expedition financed on a combined pool of \$70.

Jefferson - Indications are that more persons will be married in Jefferson county in 1936 than during the previous year. Up to the end of July, 149 licenses have been issued by Elton Rice, county clerk. Last year 204 licenses were issued.

Manitowoc-Single men who have been living at a shelter maintained by the relief department will have to shift for themselves in the future, the city council was told by Ald. Ray Wernecke, relief chairman. The shelter will be closed down.

Madison-Nomination papers were filed with the secretary of state by Congressman Merlin Huli of Black River Falls, who seeks re-election on the progressive ticket.

Madison-An order increasing the retail price of milk from 10 to 11 cents a quart at Janesville and Beloit was issued by the state department of agriculture and markets.

Mt. Horeb-James Harvey Scott, 92, one of the three remaining Civil war veterans here, is dead. During the Civil war he was a member of Company M, Wisconsin volunteer

Balsam Lake-The Humbird Canning company has completed the pea pack here for this season with between 35 and 40 per cent of a normal run. The quality is considered superior to that of 1935. Milwaukee-The third annual

tournament of the synodical conference Lutheran Golfers' Association of Wisconsin will be held Aug. 16 over the Riverdale course at Sheboygan, Herbert Rose, secretary, an-

Beloit-A building permit total of \$111,346 for July gave Beloit its biggest construction month since November, 1930, it was announced by Building Inspector E. A. Lufkin. The total for November, almost six years ago, was \$143,735.

Madison-The Cities Service Oil company and the Shell Petroleum corporation filed suit in circuit court to test the legality of the state chain store license law to determine its applicability to gasoline filling stations and bulk storage plants.

Milwaukee-Damage caused by a fire that swept through the home of Frank Nagler here when grease used in making doughnuts boiled \$5,000. Mrs. Nagler, home alone family radio.

Rice Lake-An epidemic of burglaries has occurred here with loot aggregating more than \$1,000 in value. Most of the burglaries have occurred in the early evening and the usual method of entry has been by cutting open screen doors and unlocking bolts.

New Lisbon-Terrified at the thought of telling his father about denting the fender of the family car, Lorell G. Cade, 15, shot and killed himself at his home here. He left a note addressed to his mother, Mrs. George Cade, asking the family not to "take it too hard."

Milwaukee- A treasure map was the bequest of the late James A. Silver, 76, to his son, Harold, according to a will on file in Milwaukee county court. The map, drawn on a sheet of tracing paper, gave directions to Rubijo's gap on the Old Santa Fe trail in western Nebraska. Jefferson-Jefferson county's pol-

icy of holding its annual county fair over a weekend has proven so successful in recent years that the policy will be continued this year, of The plan of holding the fair on a Friday, Saturday and Sunday was introduced several years ago. This year the fair will be held Sept. 11 to 13.

Belgium—An overalled bandit and companion seized about \$1,000 cash and an undetermined amount of bonds at the Belgium branch of the Port Washington State bank. He tossed the loot into a market basket and fled. One of the bandits pushed a pistol at Cashier Ansy, forcing him to hand over the money and bonds while the other, similarly armed, kept a sharp lookout and held others

the state supreme court in an effort to break the will of Mrs. Agnes Wahl Nieman, wife of the founder of the Milwaukee Journal, is on file with John Schlehlein, jr., register of probate. Last month, County Judge Michael S. Sheridan ruled against duction in every year except one the three contestants who sought to break the will, which named Harvard college the residuary legatee of her estate. Mrs. Nieman died Feb.

Eau Claire-The only Elks club in clubhouses will be host to the Elks of the state at their thirty-fourth annual convention here Aug. 20, 21 and 22. The unusual feature of the Eau Claire Elks club, lodge 402, is the River club, a unique and large cottage situated on the Chippewa river, just above Dells lake, a few miles north of the city. The Elks club finest structures of its kind in the state, having been built originally as a private club by many wealthy lumber kings of this section of the

Madison-With the opening of the fall semester still six weeks off, more than 2,000 requests for National Youth Administration aid for students have reached the University of Wisconsin registrar. This number is expected to be doubled by September, as most freshmen do not apply until the session begins.

Eau Claire-This city is preparing ing for the thirty-fourth annual state convention of the order of Elks to be held here Aug. 20 to 22. A colorful parade will be the final feature.

Racine-The zeal of Philip Hay to obtain milk customers from a competitor cost him a fine of \$50 in court here. It was charged that Hay obtained several of his competitor's bottles and filled them with sour milk, which was substituted for fresh product delivered at homes by the other dealer.

American farmers these days are threshing their wheat crop. The production is that of a reduced acreage, an acreage that was planned on theory by the Department of Agriculture. The result is that this year's American wheat crop will approximate 640,000,000 bushels. That is about 145,000,000 bushels less than the average crop during the five years from 1929 to 1933. The result is a shortage.

Department of Agriculture figures indicate that the total wheat crop in the world this year will be something like 650,000,000 bushels below the annual production. In other words, the wheat crop is short everywhere on earth and the result is obvious.

In our own case, there is normally a carry-over each year of about 125,000,000 bushels but due to the shortage of the crop this year that carry-over is insufficient to make up the needs of domestic consump-

Consequently, we soon will see heavy importations of Canadian wheat, a wheat that can be blended in milling with our own production and a very satisfactory flour results. Yet, it must be rememover and ignited, was estimated at bered that on all importations of wheat from Canada or anywhere when the fire started, saved only the else, a tariff of 42 cents a bushel must be paid. It is clear, therefore, that consumers of bread must pay that tariff because the importers are going to pass that item of expense along as part of the cost of the flour. In addition to the shortage in the United States, Canadian wheat production is reported to be something like 100,000,000 bushels under normal. There is sufficient production in Canada to permit of export, of course, but the shortage is bound to be reflected in the

And mention of the price brings us back to the individual effect of the combination of acreage, reduced by government edict, plus the act of nature in visiting a drouth upon us. Scarcity always results in higher prices. It is the operation of the law of supply and demand. The Roosevelt farm policy has been predicated on the theory that scarcity would produce higher prices and thereby add to the farm income. But drouth and other production hazards cannot be predicted and, therefore, the American people find themselves in a position where the unpredictable has happened and the farmers are getting the ficers of the association announced. prices on a natural and normal production.

> There seems to be a stronger demand for wheat now than at any time during the Industry last five or six Opens Up years. It indicates

> a restoration of buying power on the part of the masses. In other words, industry again is opening up to some extent and employing workers although the increase in employment has been small thus far. In consequence of this combina-

tion of circumstances, there is now a seller's market in wheat instead of a buyer's market in wheat. To say it another way, there are Milwaukee - Notice to appeal to more people seeking to buy wheat than there are seeking to sell it and the consumers of flour will pay the bill. By way of contrast with present conditions, it may be pointed out that world wheat consumption has exceeded world wheat prosince 1929. In the 1932 crop year there was slightly more wheat produced in the world than was consumed. The result of the steady growth in consumption over production in the last few ; ars has been to wipe out all of the carrythe state of Wisconsin to have two over-wheat stored in bins and elevators throughout the world-and in every country users of wheat are scraping the bottoms of their bins. The tragedy of it all is that, because of the reduced acreage and the drouth in the United States, American farmers are not in a position to take advantage of the higher prices thus established by the proper in Eau Claire is one of the sale of surplus wheat which may have been accumulated if the acreage had been normal. Instead of the United States real-

ly controlling the market for wheat, we are in a position where a good many other countries may be encouraged to grow more wheat. The natural and obvious results of this will be to further curtail the outlet for American wheat which so long has been relied on by many foreign nations that are non-producers of wheat.

I do not know how far the New Deal intends to go in revising its basic economic policy regarding crop controlling. I can be sure of only one thing in regard to the New Deal plans: The visitation of the drouth in two years in which the political planners of the New Deal attempted to upset natural laws has proved the inability of man to alter the course of nature and by the same token these conditions have proved the inability of government to change human nature. I do not know whether others will agree with my conclusion or not but I am of the opinion that the American farmers are paying dearly for the crop control checks they received in the past two years. Even with a crop shortened by drouth, if there had been the normal acreage of wheat, American farmers would have reared the re-

Quaker. He den town-Pennsylva-1808, just a son ar. n home of Hanks Lincoln ginning of a friendship which endured for 30 years and which was destined to be more important to that young legislator than either man then realized.

In 1836 Fell became interested in real estate and turned his law office over to a young lawyer named David Davis. Davis was born at "The Rounds," Sassafras Neck, in Cecil county, Maryland, on March 9, 1815. Graduated from Kenyon college in Ohio at the age of seventeen, he studied law for two years in an office in Lenox, Mass., and then attended law school in New Haven, Conn., for a year. In 1835 he moved to Pekin, Ill., and was admitted to the Illinois bar the following year. Evidently the young Marylander wasn't any too successful in Pekin for he was about to return to his native state when Jesse Fell suggested that he move to Bloomington and take over Fell's law practice which he was giving up for the real estate business. Davis accepted the offer, which also included financial aid. About this time he first became acquainted with Lincoln. But their closest association came some twelve years later when Davis, as a judge, and Lincoln, as a lawyer, were making the rounds of the Eighth Judicial Circuit of

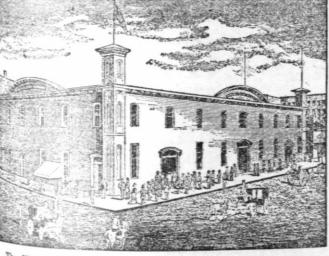

It was during this period in Lincoln's life that the youngest of the trio came on the scene. He was Leonard Swett, born near the village of Turner in Oxford county, Maine, on August 11, 1825. After three years at Waterville (now Colby) college, he began studying in the office of a law firm in Portland. He

DAVID DAVIS

stayed there two years, traveled for a year in the South and finalvolunteered to serve in the Mexican war, during which time he contracted a disease which nearly proved fatal. Discharged from the service at Jefferson Barracks, Mo., before he had fully recovered, Swett started for home. En route east he arrived in Bloomington where he settled down to teaching school and reading law while regaining his health. He was admitted to the bar in June, 1849, and began the active practice of law in Bloomington. Through his acquaintance with Judge Davis he met Lincoln, who had just returned from his one term in congress to take up his work as a circuit-riding lawyer again.

"Lincoln spent over half of every year riding the circuit," writes Wakefield. "And the influence of the Eighth Circuit upon the career of Lincoln can scarcely be overestimated. It was on this circuit that Lincoln made the friendship of all sorts of people, and here he first became famous. But it was principally his friends in Bloom-

ington, headed by Jesse W. Fell, Judge David Davis and Leonard Swett, who created his countrywide fame, conceived of him as President, and secured his nom-

The first step toward this goal was taken by Jesse W. Fell in 1854. On May 30 of that year the Kansas-Nebraska bill, which had been introduced into congress by Senator Stephen A. Douglas, became a law. Almost immediately the anti-slavery elements in the North began to

Lincoln in 1860

make an issue of the bill and in August Douglas returned to his home state to justify his efforts in its behalf. On September 1 Douglas made a speech in Chicago, defending the Kansas-Nebraska bill and he was scheduled to address a Democratic meeting in Bloomington on the same subject later in the month.

In the meantime a German Anti-Nebraska state convention was held in Bloomington and on the evening of September 12, Lincoln who was then in town to attend court, was invited to address the delegates. On that occasion he "for the first time in his life, publicly and in forthright words denounced slavery and asserted that it was incompatible with American institutions." As a result of this speech Jesse Fell conceived the idea of having a discussion of the subject by Lincoln and Douglas when the latter came to Bloomington for the Democratic meeting on September 26.

So Fell arranged to have Lincoln be in Bloomington on that date and when Douglas arrived he laid before the two men his plan for a series of joint debates. Lincoln was willing, but Douglas declined. Although Fell's plan failed at the time, he did not give up the idea and for the next four years he continued to urge that the debates be held.

In the meantime Lincoln, although defeated in his attempt to win a seat in the United States senate in an election held in February, 1855, had become increas ingly prominent in the councils of the Anti-Nebraska party in Illinois. On May 29, 1856 this party held a state convention in Bloomington to choose candidates for state offices and elect delegates to a national convention. At that time Lincoln delivered in Major's hall in Bloomington his famous "Lost Speech," the climax of which was his declaration "We will say to the Southern disunionists, We won't go out of the Union, and you SHAN'T!"

But if 1856 was an important year in Lincoln's career, 1858 was even more important. and Douglas were rivals in the election for United States senator and they were opponents in the famous Lincoln-Douglas debates. Douglas won the election but popular opinion returned Lincoln as the winner of the debates. Moreover, they made him 'for the first time a nationally known figure. Until nationally known, his rise to the presidency was impossible."

Just as Jesse W. Fell was the first to suggest the debates with Douglas, so was he "the first man seriously to think of Lincoln as a Presidential possibility and to urge Lincoln to become a candidate." In giving the circumstances under which this came about, Wakefield quotes Fell's own words as follows:

"In the fall of 1858, during the discussion between Senator Douglas and Mr. Lincoln, I had occasion to visit the Middle and Eastern states: and as the whole country was then agitated by the slavery question, and that discussion cut a prominent figure in the agitation, I was frequently applied to for information in reference to Mr. Lincoln. I felt my state pride flattered by these inquiries, and still more to find the New York Tribune, and other papers, publishing copious extracts from these discussions, taken from the Chicago press. I did what little I could to satisfy so laudable a curiosity, not thinking, at first, that anything further would come of this discussion, in reference to Mr. Lincoln, than his election to the senate. At length, from the frequency of these inquiries and public notices of the Illinois contest, an impression began to form, that by judicious efforts he could be made the Republican candidate for the presidency in

Quarters, Feeding, Handling Are Important Points as Economy Measure.

By PROF. JOHN P. WILLMAN, New York State College of Agriculture.— WNU Service.

The hog has been called "an animal that deserves its name," but when it comes to economy in converting feed into edible meat, the hog excels all other farm animals.

As one of the best housekeepers, a hog will keep his quarters clean if given a chance. He should not be criticized too severely for digging holes in the ground or for wallowing in the mud, because this is the only way the hog has to cool

Swine are not equipped with so many sweat glands as are other farm animals, and for this reason they like to dampen their bodies to become cool.

Many farmers would undoubtedly find that their hogs would be more profitable with more sanitary quarters and better feeding and handling. Every breeder should aim to produce the type of pig that feeders, breeders, and butchers demand, and he should do his best to enable his swine to convert as economically as possible the various feeds suitable for swine into Upon his return home, Fell food for human use.

Plenty of Water, Salt,

He admitted that he would like Life-Saver for Horses to be President but that he was also aware of the many practical Sudden hot weather, intense and difficulties which would prevent continued for days, usually brings its coming to pass. Fell, kow- reports of horses being lost from ever, was firm in his conviction over-heating. This is unnecessary. that it could be brought about Good horsemen do not lose horses, and, as corresponding secretary no matter how hot the weather of the Republican state central may be.

The Horse and Mule Association moted the idea everywhere he of America advises taking a couwent in Illinois. Furthermore ple of barrels of water, on a wagon he prevailed upon Lincoln to or stoneboat, to the field, and alwrite an autobiographical sketch lowing the horses opportunity to which he sent to a Republican drink at the end of each hour. If leader in Pennsylvania who gave this is done, and the animals are allowed access to all the salt they want in stables, or in pastures Back in Illinois Fell "had convinced David Davis and Leonwhen turned out at night, heat ard Swett of the feasibility of losses will not occur.

making Lincoln President, and The same plan-plenty of water Lincoln found himself backed by and all the salt they want-allowed as loyal and efficient a triumto men who work about coke ovens, virate as he could well have." where the temperature is about 135 They formed a Lincoln club in degrees, has stopped heat prostrations among men. It works, with Bloomington which, while professing to promote the interests men or with horses, and is so simof the Republican party, in realple, so easily adopted, that there ity was to boost Lincoln's candiis no excuse for losing horses from dacy. They engineered an enoverheating, no matter how hot the dorsement of him for President weather is. at a Republican mass meeting,

Common sense in working aniheld in Bloomington on April 2, mals, water every hour and all the 1860, to choose delegates to the salt the animals want, is all good horsemen use in handling their state convention in Decatur on work animals in hot weather. It At this convention Lincoln's will save work stock from heat cousin, John Hanks, appeared prostrations.

Foot Rot in Sheep

the foot, and remains more or less localized to that area. The economic importance of foot rot lies in the severe losses which the owner sustains from a long period of inactivity of the infected animals from the loss of body weight, from decreased wool clip, from the diminished milk production at lambing time, and finally from the probable infection of the newborn and others.

Music for Milk

"Music hath charms to soothe the savage breast"-and to make cows give more milk. A farmer in a village on the German-Czechoslovakian frontier plays the concertina every morning to his cows. He first noticed that one refractory animal became docile when it heard the strains of the concertina, and applying this lesson to the other cows found that they submitted more readily to milking and gave increased yields.

Agricultural Hints

Trees grow best on vell cultivated soil which slopes to the north or east. Loose, porous soil is much better than hard clay.

Probably no subject has taken more space in the bee journals or caused more study and discussion among beekeepers than the subject of swarm control.

Broccoli, known in Italy for more than a hundred years, was not widely known in the United States until 1918.

According to recent figures, nearly 1,000,000 rural boys and girls are enrolled in 4-H clubs in nearly 3,000 counties in the United States.

Trials show that forest soils soak up 50 times as much water as the same area of bare soils and from 3 to 20 times as much water as pasture land.

Wild life often suffers because of the flying mower sickle. Nests are destroyed and many birds and animals are maimed.

When the tractor plow gives trouble, first check the beams to see if they are sprung. A sprung beam may cause many different troubles.

Early pigs make cheap gains on good alfalfa pasture and a full feed of corn. If tankage is added the cost of gain is usually about the same, but the pigs gain faster.

Political History FRANK E. HAGEN ELMO SCOTT WATSON

ROOSTER CROW

THE Gooding tavern in Green-field, Ind., has long since disappeared but it deserves to be remembered as the birthplace of a familiar emblem of one of the major political parties, a symbol that is still in use after nearly a century.

Back in the thirties it was owned by Joseph Chapman, an ardent Democrat, who had the habit of imitating a rooster when exulting over victories by his party. So when his political enemies won, they taunted him by shouting: "Now crow, Chapman, crow!"

In 1840 Chapman was a candidate for the state legislature from Hancock county. In that year Democratic prospects were far from bright. The country still remembered the panic of 1837 and blamed President Van Buren for it. Moreover, the "singing Whigs" were making a powerful appeal to the voters with their shouts of "Tippecanoe and Tyler, Too!" and their log cabin and hard cider symbols. In the midst of the campaign

George Pattison, editor of the Indianapolis Constitution, wrote a letter to William Sebastian of Greenfield in which he said: "I have been informed by a Democrat that in one part of your county 30 Van Buren men have turned for Harrison. Please let me know if such be the fact. I think such a deplorable state of facts can not exist. If so I will visit Hancock and address the people relative to the policy of the Democratic party. have not time to spare, but I will refuse to eat or sleep or rest so long as anything can be done. Do, for heaven's sake, stir up the Democracy. See Chapman, tell him not to do as he did heretofore. He used to create unnecessary alarms; he must crow; we have much to crow over. I will insure this county to give a Democratic majority of 200 votes. Spare no pains."

This letter accidentally fell into the hands of the Whigs and was published in an Indianapolis paper with a view to ridiculing the Democrats. But it proved to be a boomerang for the Whigs. "Crow, Chapman, crow!" became the slogan of the Indiana Democrats and spread all over the country.

When the Indiana Sentinel was launched in 1841 it carried at the top of its front page the picture of a proud rooster and under it was the slogan "Crow, Chapman, crow!" Other Democratic newspapers began carrying the same picture and slogan and soon the rooster, crowing proudly whether in victory or defeat, became the accented symbol of the Democr infectious disease of the tissues of party. Despite the later popularity of the donkey, it is still a favorite symbol-thanks to John Chapman. of Greenfield, Ind., who taught his fellow-Democrats how to crow.

WINNING WITH BUCKEYES

W HEN Martin Van Buren, bosom friend and successor to fiery Andrew Jackson, undertook to succeed himself in the White House in the race of 1840 something new in political history was the result.

Van Buren not only was defeat-He insured the election of William Henry Harrison of Ohio and he endowed Ohio with the name of the Buckeye state. which flourishes today.

It all came about when the cry was taken up by Van Buren's campaigners that Harrison was more perfectly fitted to live in a log cabin and drink hard cider than to go to Washington as the nation's

What a boomerang that proved to be!

The only background for the attack was that when the hero of Tippecanoe retired from battle he selected a site overlooking the Ohio river in the southwestern part of the state, built a double log house and finished it with shining white clapboards.

Ohioans naturally resented the slur on their habits of living, including the charge of tippling. Miniature log cabins, symbolic of pioneer life and the vigor which pushed civilization westward from the more effete east, made their appearance throughout the state.

These cabins were reproduced from buckeye logs. So were the canes carried by thousands of marchers who participated in parades to advance the candidacy of Harrison. The cabins were mounted on wagons and within each was a horny - handed frontiersman, quaffing hard cider.

Wan Buren was not neglected while this was going on. He was attacked by the Ohioans as a snob with a penchant for Europea customs.

By the time the "Buckeye" parades popularized and spread east of the Alleghenies, Van Buren's managers realized their mistake and tried in vain to stem the tide. It was too late. Gen. Harrison won the election, hands down, and Ohio has been known ever since as the Buckeye State.

Saltiness of the Seas

The Dead sea leads easily in saltiness with 25 per cent as its salt content. Next come the Adriatic sea, with a 4.06 per cent; the Red sea, with 3.98 per cent; the Mediterranean, with 3.64 per cent; the Atlantic Ocean, with 3.56 per cent and the Black sea, with 1.75 per cent.

SUCCESS PROCESS TOO COMPLICATED TO BE GIVEN OUT

Few processes are so delicate or complicated as those of success. Who would venture to say that he has mastered them so thoroughly that he can venture to tell another human being how to make a success of this individual life. Some people who succeeded never seek counsel. They have instincts which guide them aright in the most difficult moves of the game. They make mistakes, of course. It is often necessary to make mistakes once, so that one need not make them a second time.

William Watson, in one of his poems, has spoken of "that stillness on a base of power." There is fine counsel, as well as truth, in the phrase; for true power goes as quietly about its work as gravitation.

Failure is usually a nervous, fidgety creature, perpetually agitating itself as to whether or not it is succeeding; whether or not it is winning acceptance. Success, on the other hand, does its work, does it with all its might, knows for certain that it has done it well, and, come, praise or blame, passes quickly on to its next job; or if it be not always so scientifically sure of itself as this, it practices what I have called an "optimistic fatalism." -Richard Le Gallienne.

What's a **ROORBACK**

Yes, many of us know that it's a political campaign falsehood used to advantage by an opposition party. But just when did the "roorback" start, and where did it get its name? You can trace the origin of many such political terms in a new series of historical articles to appear in this paper . . .

'The Man Who-0-0'

ELMO SCOTT WATSON

and

FRANK E. HAGEN

You'll learn the history of the "dark horse," the origin of the Republican elephant and the Democratic donkey, how the initials "GOP" were introduced
... you'll read about the presidential candidate who defeated himself and about a lot of other quirks in American political history. "The Man Who-o-o" is a sprightly series that will fit into your campaign year reading program. Watch for it in this paper!

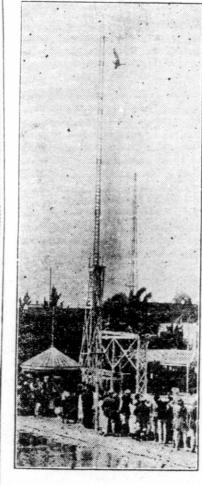

WISCONSIN STATE **FAIR AUGUST 22-29**

The Wisconsin State Fair grounds are rapidly being put in order for the opening August 22nd of the great 8 day Wisconsin Centennial Fair. Indications are that the new grandstand addition will be completed by fair time. Concession buildings are being repainted and everywhere men are busily making preparations for the throngs which are expected Augus 22nd through the 29th.

The program is nearly completed and is the finest from every point of view that has ever been offered fair visitors according to Ralph E. Ammon, fair manager. A race program consisting of AMA motorcycle races, Grand Circuit horse races and AAA auto races has been arranged for the afternoon. In addition there are 10 feature thrill acts starring a spectacular 125 foot dive into a 6 foot tank of water. At night, the great outdoor musical show, "Above the Stars," will be featured. This \$50,000 production with its three revolving stages, gorgeou girls, delightful dancing and beautiful music, has a cast of 150 people.

Present indications according to Ralph E. Ammon, fair manager, are that this year will see the greatest livestock show in the history of the Fair, A fortunate selection of dates has resulted in most of the outstanding breeders in our nation planning to come to the Wisconsin State Fair Over a million dollars worth of blue bloods on our fair grounds during these 8 days will offer to visitors a chance to see America's stock autocracy on parade.

Practically every department superintendent reports a similar condition The increase of \$10,000 in premium Ists over last year, making a grand total premium award of \$55,805,50 has been enthusiastically received by farmers and breeders everywhere and while the farm crops department will not be as complete as in a normal year, there is every reason to believe every other department will have added entries and a more complete display than at any time in history.

A Challenge to Death A death defying dive from 125 foot tow er into a 6 foot tank—a daily thriller a the Wisconsin State Fair, August 22-29
