NTHE KEWAS- . ALVIN R. ZIELICKE DIES AT HOSPITAL

Alvin R. Zielicke, son of Mr. and Mrs Wm. Zielicke of near Elmore, passed away in death at St. Agnes hospital, Fond du Lac, last Thursday, Dec. 17, death being caused by obstruction of the bowels. He was confined at the hospital only two days when death occurred. He had attained the age of 37 years, 8 months, and 19 days.

Mr. Zielicke was born on March 28, 1899, in the town of Ashford, and at the time of his death had been residing at the home of his parents. He was married to Ida Marquart on Feb. 21, 1925, at Campbellsport, who, along with one daughter, Dorothy, survives. The deceased also leaves one brother, Rolland, of Oakfield, and one sister, Mrs. Harvey Keller of the town of Ashford.

Funeral services were held on Monday, Dec. 21, at the Baptist church. Campbellsport, with interment being made in Union cemetery, Revs. Davies and F. Marose officiated at the last

It was indeed a cruel blow of fate to take this young husband and father. who had just reached the prime of life. His excellent character and kindliness toward others will prolong his memory as a loving one by the bereaved survivors. We, also, extend our sincerest

HASSINGER HELD Funeral services for Mrs. Catherine Hassinger, nee Schmitt, aged 83, who passed away at her home in the town of Wayne last Thursday, Dec. 17th, at 11:30 a. m., following an illness of several months with bronchial pneumonia vere held on Sunday afternoon, at the Salem Reformed church, Wayne, with Rev. A. A. Graf officiating, Burial took

The Season's Greetings

To our subscribers and friends it is indeed a pleasure to take advantage of this occasion to extend our sincere greetings of the season. May your Christmas be merry, may the family be assembled in a spirit of happiness and good will, may you enjoy that glow of pleasure which comes with the knowledge that you have done something to make the lives of others just a little

fortable and just a little happier. But we cannot permit the occasion to pass without a few serious thoughts on the subject of Christmas. It is right that this should be the greatest of all It is also fitting that we should give

By WILLIAM C. UTLEY

TE HAD just finished dinner in a home in one of Chicago's north shore suburbs. We settled back, lighted our cigarettes. There was that temporary after-dinner lull when I could read the minds of my host and hostess with ease. They were thinking, "Well, now that dinner's over, what are we going

I was wondering the same thing. The sun had not yet sunk in the west and there was a long evening ahead of us.

My hostess had an idea. "Let's drive Bill out to see the Hiawatha," she said. "Swell!" replied the man of the house. "But grab your hats, we'll have to hurry! And we have being streamlined, and now you can five miles to go!"

"What time does it begin?" I

"Begin?" Both were plainly puzzled at my question.

"Yes," I said. "I assume it's a pageant or something of the sort. "Oh, no," she explained. "It's one of those new railroad trains. We thought you might like to ride out and see it go by.

"House Is Packed."

I was too polite to ask aloud if it were true that people in this wonderful year of 1936 still gathered at the stations to see a train go by. I simply went along, resignedly. I remember wondering if anyone would catch me at it and josh me about having a stiff neck from looking at the tall buildings.

I got the surprise of my life. This was out in the country, but the rails were lined with little groups of people as far as the eye could reach in either direction. They were all eager, intent, out for a good time, as if they had been coming to watch a parade or a circus. A century ago the crowds that gathered to watch the first railroad trains could not have been much more excited.

It was contagious. When the murmur of the crowds, heralding the approach of the train, reached us, the hair bristled on the back of my neck like a bull pup's. In the twinkling of an eye the Hiawatha, like a long, slim serpent with the speed of light was upon and past us, a swift red and orange streak that created a chill wind in the wake of its roar, depressing the tall grass and making dead leaves and cinders leap momentarily to life for many feet on either side of the right-of-way. The spectators were all waving their hats and cheering, and I swear that I cheered louder than any. We all went home happy

that we had seen a good show. United States, wherever the streamliners run. Crowds like that which the view. thrilling to the sight of the Mark | are traveling at high speed, makes Twain Zephyr, the Mercury, the Su- every breath of air purer and

for 30 cents and dinner for 35 cents. Prices are just as low in the two Porters Refuse Tips. Many other things on trains had annoyed some of the passengersthe petty charges for drinking cups, towels and pillows; the fact that there was usually no one to help day-coach travelers with their luggage unless they engaged a redcap, and many of them could not afford that; the straight-backed seats became broken-back seats on a long ride; the lights were left burning throughout the night and trainmen were constantly disturbing the sleep

stations.

On the new train there are adjustable reclining seats and pillows are provided free. So are towels and drinking cups. Every car carries a colored porter who takes care of the baggage, giving it to a redcap on the platform at the station. Neither of them is permitted to take a tip. Lights in the coaches are put out at 10 o'clock, but little blue and amber lights are left to guide passengers and keep them from tripping; there are tiny individual lamps for those who want to read. Passengers who must get off in the night are told individually-no stations are called. Another nuisance was done away with when the rule was established that tickets were to be collected only once during the 2,300-mile ride.

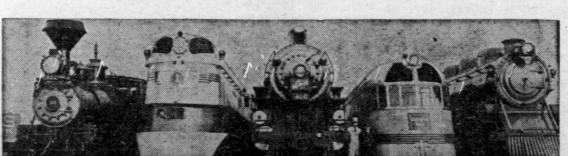

of passengers by calling out the

Stewardesses Make Hit.

But perhaps the greatest innovation of all in this remarkable train is its stewardess—the first in the history of railroading. A registered nurse, this pleasant young woman with the greatest of ease at 100 is able to give first aid, is invaluable in looking after old or infirm persons. She takes care of children, too, when they are traveling alone, or when their parents wish to leave them for a little while.

The Challenger has two cars reserved for women. The stewardess keeps the key to these cars, locking them at night to keep out strollers; even the train crews must have permission from her to walk through them. This busy young lady looks after babies that cry during the night. She even keeps a baby's bottle warmer and a milk cooler in each car.

This is what the railroads are doing-and finding out that it pays. The people love it. Is it any wonder they are going down to the simulate old kerosene lanterns, tracks to watch the trains go by again?

While it undoubtedly will not become law in its present form, it must be regarded as the opening

The Wyoming senator's principal a federal license. If they do not into retail trade between states.

While the main theme of the proposition does not seem anything about which one should get excited, it is the things that can be done behind such a general requirement that must and will be examined by congress and the country before it takes a step of the kind advocated by Senator O'Mahoney. For example, if the federal government is permitted to require businesses to obtain a license or charter from Washington, those businesses may be compelled to meet all manner of requirements before such a license or charter is granted. In the reverse, if after they have the license, they fail to observe the provisions laid down either by congress or bald - headed bureaucrats, revocation of the license is the pen- feeling among all with tender hearts, alty that may be exacted. It should be added that exaction of a penalty of this kind, once the license provision is established as a federal government right, becomes a powerful weapon and the limit to which that riages largely in order to keep our power may be exercised is scarcely to be forecast.

While, as I said, the O'Mahoney legislation may not be expected to become law in its present form, its terms and provisions give a hint of what can be expected of any legislation of a similar character.

Take this provision, for example: "Rates of pay shall be increased and hours of work shall be reduced in accordance with gains in the

productive efficiency of the industry, arising from increased mechanization, improvements in technological methods, or from other causes. a result, there is only one class on to the end that employees shall have the Challenger-everybody's class. an equitable participation in the out-Stainless steel lunch wagons are put of industry, and that employoperated through the aisles, serving | ment and mass purchasing power may keep pace with industry.

> such a basic statement of principles, a business Dictatorial could easily be made to agree to Powers collective bargain-

ing among its employees, to establish minimum wages and to follow the dictates of some bureau or commission in Washington in actual management and promulgation of policies. Indeed, it is set forth in the O'Mahoney draft that the federal trade commission would be authorized to obtain all "relevant and detailed data as to production costs, prices and profits.'

As I see this sort of thing and from the views of experts with whom I have consulted, I cannot escape the conclusion that such legislation simply extends to the federal government dictatorial powers over virtually all private business.

It means, moreover, that politics and politicians would be the guiding force and that if union labor leaders were in control of the agency hav- of a foreign-born princess of their ing supervisory powers over business or if communists or conservatives or any other class were in control, business would be directed in accordance with the economic views of that school of thought. Since our nation frequently hands the responsibility of government control from one political party to the other, the implications of such legislation as this are tremendous, to say the least.

Constitutional questions enter into this legislation and it may be that the basic theory advanced by the Wyoming senator will not hold at all. As I understand it, Senator O'Mahoney is holding no pride of authorship as to the language of his bill but to the principles he strongly adheres. So, it is made to appear at least, as I said above, that this proposal constitutes an entering wedge on an entirely new theory of government's relation to private business. For that reason, it is one of the most significant propositions to come forward in recent years, more significant, I believe, than the ill-fated NRA. It certainly is a proposition that should be watched closely by all citizens.

Affairs of the heart are all right privately, our American Department of State Mixing in holds, but it re-Love Affairs serves the right to

affair that involves an American foreign service officer. It is all perfectly open and above board. The Department of State has put its conclusions into writing, into an official regulation, and hereafter no foreign service officer can marry an alien while he is in the foreign service unless he gets the consent of "father" State department.

It is immensely interesting but not significant in an international way that the State department's order concerning international marriages should have been promulgated during the heat of the British constitutional crisis over King Edward's determination to marry the Adams were contributors

Washington - Senator O'Mahoney | American - born Wallis Warfield of Wyoming has prepared a bill for Simpson. It simply happened to introduction early come along at the same time, but since all the world loves a lover, gress that will set | in Washington one hears reference up, if it becomes to the Simpson-Edward affair menlaw, a comprehensive mechanism tioned many times in the same to control and regulate some of the | breath with the State department principal activities of business cor- decree. This obtains because nearly all of our foreign service people have

But the State department ruling ought to be treated with utmost seriousness and sincerity. It is important. It is necessary to stretch idea is to require businesses of an the imagination a great way in orincorporated character to take out | der to assume that international marriages of the type banned by comply, the proposed law would the State department would "shake deny them the right to ship goods | an empire" after the manner of international marriages among royalty. On the other hand, it seems to me to be quite fair to say that international marriages among official representatives of a nation can very easily prove embarrassing to the government by which the foreign service officer receives credentials. In fact, there are instances on record where such marriages have proved to be serious obstacles in the settlement of disputes between governments.

> Then, it must be considered that there is a genuine possibility of war in Europe in the next few years. A tremendous tragedy is being prepared there. While obviously any governmental decision that has the effect of keeping lovers apart arouses antagonism, a sympathetic in this circumstance, the rule seems well justified. In addition to following the lead of other nations on the point, our State department has banned these international marnation free from any possible entanglements in event of that European tragedy that looms like red fire on the horizon of the future. Marriages heretofore contracted, of course, will not be disturbed by the new ban, but elimination of that source of potential difficulty for the future is regarded as likely to be valuable.

I have heard criticism of the State department's order on the ground that affairs of the heart are private affairs-which indeed they are. But it must be remembered that where an individual accepts the rights, prerogatives and privileges of official position, he accepts at the same time certain definite responsibilities. In the case of a foreign service officer, his acceptance of the government title makes him at once and the same time a part of that government in a most peculiar way. Because foreigners do not understand our government any better than we understand foreign governments, when an American foreign service officer speaks, he speaks actually as the American government. One need not amplify this further than to say, therefore, one of that official's responsibilities is to carry out policy. National policy can be arranged only at its proper sources, namely, the President and the Department of State.

So, while budding romances may be blighted, heartaches may arise, soft lights in the eyes of men and maidens may be dimmed by the cruel and cold words of official regulations, it needs must be said that the welfare of a great nation must supersede the personal desires of a lonely man for a mate.

Thus, where any of our American diplomats or consular officers hereafter feel they cannot tread life's highway without the accompaniment dreams, they simply will have to resign from their jobs and bring the lady home.

Early Magazines Failed

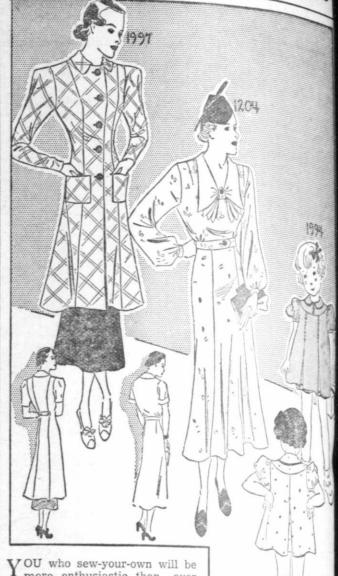

to Be Business Success The first magazine in the United States was called the American Magazine, and was issued in Philadelphia, Feb. 13, 1741, by Andrew Bradford, printer, business rival of Benjamin Franklin. It was edited

by John Webbe. It appears that the idea of starting a magazine in this vountry, on the lines of the famous Gentleman's Magazine of London, originated with Franklin. But he incautiously divulged his scheme to Webbe, with the result that Bradford offered his publication to the colonies three days before Franklin's General Magazine was out. Neither publication lasted very long, however. Webbe's expired with its second number and Franklin's with its sixth. The Saturday Evening Post, another Franklin publication, dates to 1728, but was not originally a magazine.

Down to the Revolution, observes a writer in the Cleveland Plain Dealer, sixteen magazines had been launched in America. They included such titles as the New England Magazine of Knowledge horn into any love and Pleasure, begun in Boston in 1758; the American Magazine and Monthly Chronicle, started in Philadelphia in 1757. None survived more than a few years.

Charles Brockden Brown, the first American novelist, established in New York in 1799 the Monthly Magazine and Literary Journal, which lasted three years. And in 1801 there was launched in Philadelphia the Port Folio, which survived until 1827-a remarkable record among early periodicals. An excellent magazine of this time was the Anthology and Boston Review (Boston, 1803 - 1811), to which Everett Ticknor and John Quincy

"Can't you tell a body things in any way but words, Mother?"

"Why, yes, I reckon so, Cynthia, only body could be mistaken, you know. Plenty folk mistake plain words. And it comes by nature for Reuben Warren to be nice to people."

"That afternoon we sat on the gray stone by the sycamore and he laid his band over mine in the white-haired moss, and then he took it away again but it was still there, and that's how you know when it's true." "You are a strange girl, my dear

child, and I reckon you ought to know if it's that way with you. But I wouldn't have any blight spot your heart for this world." "I guess I oughtn't of lied to Doug

though." "I reckon that was just the thing you ought to say to him," Julia said.

"I wouldn't want to make Doug feel bad. He works awful hard at the place and he is banking so much on his crop of 'seng. I did promise him I'd go look at his 'seng bed before I go."

"You ought to do that, and I must send Sarah some of the purple dahlias and some wheat loaf."

And on this they began to readjust their inner lives to the new intimacies born of Cynthia's confession.

CHAPTER XII

of August that Cynthia went down to say good-by to Sarah Mason and Doug. It was the first time in many weeks that she had sat the Finemare and ridden out of Wolfpen. It was a joyous thing to feel horse muscle flow under her thighs and connect with her spirit, to hear the soft plopping of quick hoofs against the sand. It was tonic to efface the thought of what she would see when she peered into the hollow at Dry Creek filled with new men whom Sparrel called riffraff and was troubled

about. She waved to Jesse in the meadow where he had been furiously tossing hay and was sitting now under a haycock with the book opened on his knees. "I reckon Jesse sure means business whether he pitches hay or reads the law. I'm right glad he'll be over there too, even if he don't come for a

week or two." Sparrel was outside his shop, leaning against the shade by the door, looking to nowhere out of Wolfpen with puzzlement on his face. It slipped off as Cynthia came into the mill-yard, and he spoke kindly to her and patted the rump of the Finemare.

"You two make a fine-looking outfit,

if I do say it myself." Cynthia, seeing a remnant of her Daddy Sparrel in his eyes and voice, thought, "He ought to have more pleasure out of all this business than he's getting, but he lets other men's troubles be his own because they are on his land, when he ought to let Shellenberger and his black man run on to suit themselves, and be happy up Wolfpen with his own place."

She smiled to him, and waved back as she took the ford over Gannon. And she smiled with her own sense of pleasure as she heard Abral's voice

pitched high saying, "No. It won't go that way. Here. Watch me." She dreaded the thought of looking up the hollow where the trees had been cut. As she came into the road beyond the shadow of the Pinnacle where Dry Creek would burst into view, she played a game with herself and the Finemare. "We'll see if we can go by without either of us looking over there to the slaughter pens," she said aloud. It was a difficult game to play. She fixed her eyes on the Finemare's ears for many paces. Then she looked off to the bright, sun-tinted green on the timbered ridges to the north, and down neck. into the cool dark pockets in the hollows where the shadows lay. The Finemare held her neck straight down the road between the patches of rank horse-weeds as high as her back. "It's not fair for me, Finemare, because you away her spirit. couldn't see over along here even if you wanted to. But I just naturally the mare's mane. face that over there because I sit side-

Doug." So she resisted Dry Creek while they passed the rank horse-weeds, and the cane-brake shooting pale yellow poles high above her, and came to the open meadow. There she suddenly felt the lure of ugliness rushing across the open space and reaching for her eyes, and could never be. as though a barrier had fallen. She resisted with an effort. She heard the voices of men framing the curious, claimed. sharp, monosyllabic cries to the mules and oxen. She felt the smell of wood smoke in her nose and on her tongue. Still she did not look, and the mare

was absorbed in the animated manipulation of her own legs. "I reckon maybe we can do what we make up our minds to. And if you won't look while I do it, I'll shut my eyes till we are clean across the meadow and get our backs to it." She closed her eyes, and gave her body in relaxation to the rhythm of each precise step of the mare. Then she felt the muscles on the mare's shoulders contract with a snap,

and tighten back to her rump, as she swerved and broke the rhythm of her gait. Cynthia involuntarily opened her eyes to see a young rabbit leap into a clump of berry vines.

As she followed its leap she heard men shouting, followed by the swish and the sharp explosive crack of a tree beginning its fall. The mare looked and Cynthia looked into the hollow at the heavy fall of a great tulip tree, lunging against all the efforts of the lumberman down-hill through space in a thunderous sighing swish, rebounding from the ground on resilient limbs and springing like a beheaded chicken a dozen yards from the stump on the steep hillside.

"I reckon a body just has to look sometimes when things get hurt and die. Does it make your stomach twist too? We both did it at the same time, and maybe you are not so different from other people just because your square mouth won't make any words." And Cynthia looked into the smoking brush piles and ugly stumps where

little at the camp." "When did it begin to hurt?"

"It's felt funny for a day or so." Sparrel gave him some of his remedies and after a while Abral went to bed. He lay there for two days very sick and refusing food.

many weeks and had been up and down for two nights with Abral, fell sick in the third night and had to lie in her bed very pale and without strength. On Monday at the hour set for half

a year for Cynthia to ride away from Wolfpen, she sat by Julia and was startled to see how large her eyes were under the pale skin of her forehead and how weak she had grown from her sickness.

"You must go, dear, as we planned. I'll be all right now," she said in a low voice. "I've never been sick to amount to anything.

But Cynthia sat by her bed, saying, 'Abral's some better. I wouldn't go off today and you sick. A few days won't make a sight of difference." Thinking: "I wonder how sick she is and why it came on so sudden right now. It must be the spread over the place of the sickness in the trees or it wouldn't begin down there in Dry Creek and fasten on Abral and come on up here. It won't make a bit of difference if I'm a little spell late. She looks so pale unher, and then looking puzzled as he der her dark hair, tidy even when she lies in bed sick, and hardly any gray. It's been a hard summer. She looks tired. I'd rather see her lie a time and get well than go over to the Institute right at the start. I guess she's asleep now. Maybe she'll rest a while. I'll see Jesse."

> "Asleen now." "She didn't sleep any last night."

> Taking a walk would be no new ty but history records that Alexist of the country's earliest days, was the first important stroller and that his action ultimately resulted in the destruction of his party.

Hamilton, a dominant political personality, was a bitter opponent of John Adams, second president, having tried to block his election as vice-president although both were Federalists.

The feud continued when John Adams became President, Hamilton secretly obtaining and holding control of the Adams cabiner. Adams, not by nature gifted in that sort of intrigue, nevertheless fought back with considerable success. Hamilton was not the man to

take any rebuffs sitting down. When John Adams sought re-election in the campaign of 1800 Hamilton "took a walk" by publication of a letter designed to show "irrefragable proofs" of Adams' unfitness for the job. Hamilton succeeded too com-

pletely in his battle. Adams failed of re-election but the Federalist party went down with him. While the ding-dong "walkout" battle was in progress during the Adams presidency, Thomas Jefferson, whose name is referred to so frequently by Democratic orators, took advantage of the duelling.

Jefferson was earnestly and efficiently making his plea for unified support of the "plain peepul" and in the election he smashed the Federalists so completely they never again figured conspicuously in a national election. @ Western Newspaper Union.

Do Not Tire So Easily

Those whose work requires fast, but rhythmic movements, tire less easily than those who must move slowly at irregular intervals, according to psychological studies. Soldiers, it was found, march farther when keeping step to band music, the rhythm apparently causing the men to forget their fatigue instead of wasting energy thinking about how tired they are and how much farther they must

Magna Charta in Latin The Magna Charta was written in Latin. It was addressed the archbishops, abbots, earls, barons, justiciars, foresters, sheriffs, governors, officers and to all bailiffs and his faithful subjects."

Princeton Once Had Lotteries Seven lotteries were authorized for the benefit of Princetor university, then the College of New Jersey, between 1748 and 1772, and the proceeds ranged from 600 to 3,000 pounds.

Making a Choice-

Independence and Loneliness or Dependence With Ties of Affection

opportunity for a choice between gether under the same roof and independence and loneliness or ties always be congenial. However, and affection. The wise mature this does not signify that at heart person thinks long before choosing affection is gone. Separation the former above the latter. There means loneliness for one or both are many young people, however, of them. who feel so sure of themselves and their ability to "get along all right" that they are irked by be some dissension at timesthe least restraint. They throw it | young folk may quarrel and adults off, only to discover later in life dispute. But when these times are that affection is worth the curtail- over, the ties of affection, the asing restraint and dependence en- sociations that intertwine, and the tailed. OR THE KEW

A Derry Christmas to All 1936

Accept the season's salutation offered with highest respect and good cheer.

JOHN MARX

They All Advertise!

A hen is not supposed to have Much common sense or tact, Yet every time she lays an egg She cackles forth the fact.

The mule, the most despised of all, Has a most persistent way Of letting folks know he's around By his insistent bray.

The busy little bees they buzz, Bulls bellow and cows moo, The watchdogs bark, the ganders quack, And doves and pigeons coo.

The peacock spreads his tail and squawks, Pigs squeal and robins sing, And even serpents know enough

To hiss before they stidg. But man, the greatest masterpiece That Nature could devise,

Will often stop and hesitate Before he'll advertise.

The Season's Greetings!

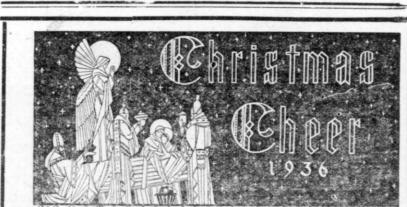

When the three wise men followed the Star into the west until it stood at last above the manger in Bethlehem, they sought the revealment of an ideal.

And now, more than nineteen centuries later, it is the belief in ideals that accounts for all that is true and good in this world of ours. The Christmas spirit. itself, is the expression of an ideal, the ideal of peace on earth and universal good will.

With a firm belief in this ideal, and a hope that it may enter into and bring new meaning to the transaction of the new year's business, the officers and directors of this bank extend to you their heartfelt wishes for a Merry Christmas and a New Year filled with happiness and yes,-prosperity!

President Back in Washington Preparing for Inauguration -Hopkins May Get New Cabinet Post-Wallace Urges Permanent Crop Control.

By EDWARD W. PICKARD © Western Newspaper Union.

trip to Buenos Aires, President

Roosevelt plunged into a great mass of work that had accumulated on his desk. There were numerous reports on government activities to be read, plans for the inaugural on January 20 to be made, outlining of his inaugural address, and consultation with the full cabinet concerning the pro-

various departments.

President Roosevelt gram for his second term. Still more immediate was the task of writing his annual message on the state of the nation and his budget message for the coming fiscal year. Then, too, he is expected to devote considerable time to consideration of the revamping of the cabinet and to plans for reorganiz-

The inaugural ceremonies will be simple in accordance with Mr. Roosevelt's wishes, and the traditional ball will be omitted. After consultation with Rear Admiral Cary T. Grayson, chairman of the inaugural committee and Vice President Garner, it was decided that the parade should be limited to units from the army, navy and marine corps and from the West Point and Annapolis academies. Governors of all the states will be invited but they will be limited to three motor cars apiece. There will be no civilian organizations in the parade. Grand stands are being constructed on both sides of Pennsylvania avenue at the White House, and on the steps of the Capitol.

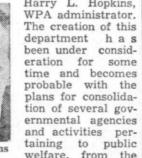

One of Mr. Roosevelt's first duties was a sad one-that of attending the funeral services for August Gennerich, his close friend and bodyguard who died suddenly in Buenos Aires. The services were held in the White House and with the President were Mrs. Roosevelt, Vice President and Mrs. Garner and cabinet members. A delegation of New York City policemen was present to pay the respects of the "finest" to one who had served with distinction on the force for twentyfive years.

The President and his household were cheered by news from Boston that Franklin D. Roosevelt, Jr., ill in a hospital with a streptococcus infection and sinusitis, was recovering rapidly, that an operation probably would not be necessary and that the young Harvard senior has a good chance of spending Christ mas in the White House.

JOHN HAMILTON is still chairman of the Republican national committee. A t a meeting in Chicago 74 of the 76 members in attendance rejected his resignation, and he responded: "I'm gratified, and I'll keep right on working. The opposition to Hamilton was led by Hamilton Fish of New York, but it dwindled rapidly during the de-

Before adjournment Hamilton was empowered to appoint a group of Republicans soon to formulate a plan to bring the party funds out of the red. Treasurer C. B. Goodspeed reported that the campaign expenditures were \$6,546,776, and that the deficit was \$901,501.

"SECRETARY OF PUBLIC WEL-FARE" may be the title of a new member of the President's cabinet, and it may be held by Harry L. Hopkins,

Ab. H. L. Hopkins

welfare, from the social security program and the independent office of education to the children's bureau now in the Department of Labor.

There has been talk that the new department might be given to Miss Perkins, who is slated to retire from the labor secretaryship, but general opinion is that Hopkins, favorite money dispenser of the administration, will get the job.

W ITH five men and two women aboard, a big liner of the Western Air Express disappeared in fog and storm south of Salt Lake City and it was believed it had his hands off the Spanish Balearic crashed and that all seven persons were killed either in its fall or by exposure. Searching parties found possible traces of the accident in a broken tree and "tracks" in the snow, but the weather was so severe and the region so isolated that the hunt was badly hampered. Those aboard the plane which start-

E XTENSION of the glass workers' strike to plants in Toledo Charleston, W. Va., and Shreveport La., brought the flat glass industry almost to a standstill. The closing of these factories is directed against the automobile industry, but the Ford company is equipped to produce its own glass and the other automobile makers are said to have enough glass in stock for a month. It was estimated that 14,-300 men were idle at the plants of the Libby - Owens and Pittsburgh Plate Glass companies.

The new strikes were called after leaders of the Federation of Flat Glass Workers failed to reach an agreement with representatives of ing the government machinery in the two companies concerning strikes already in progress. Libbey-Owens also was negotiating for a new union contract, their old one having expired.

Employers said the impasse was reached as a result of the union's determined demands for a closed shop, a checkoff system of union dues, and wage increases.

sent toward Sianfu to besiege the Glen W. McCabe, president of the city. But it was reported in Shanghai Glass Workers' federation, denied that Chiang Kai-shek, clinging to his the union was demanding a closed ideal of a united China, sent word shop or that the checkoff system to Nanking by Gen. Chiang Ting-wen forbidding hostilities. Meanhad to be granted.

SECRETARY OF AGRICULTURE WALLACE in his annual report to the President, recommends that, instead of "emergency crop adjustments," the government establish a permanent production control. In this Mr. Wallace ignores the opinion of the Supreme court in the Hoosac Mills case holding that congress has no power to regulate agriculture. The secretary said that shortage caused by drouth could only be temporary and that the natural reaction will be production that will glut the market and pile up surpluses. Soil conservation alone, he said, is not a sufficient preventive of overproduction.

In another section of his report Wallace cited figures showing that imports of agricultural products exceeded exports by 418 million dollars in the fiscal year 1936. He blamed this, however, on drouth, rather than the scarcity policies of the old AAA and the administration's trade agreements.

The report asserted that a perachieve "soil conservation, consumer protection, and crop control altogether," but outlined no specific plan for attaining all those objec-

JOACHIM VON RIBBENTROP German ambassador to England, addressing an English audience in London, told the world plainly that

Germany intends to scrap "the discriminating part of the Versailles treaty" and that Adolf Hitler is determined to regain colonies for his country. "One thing is cer-

tain," he said, "and this I cannot help stating: Germany has made up her mind to get rid of that discriminating

Ribbentrop part of the Versailles treaty which no great nation could have tolerated forever.

Joachim von

"To attain this aim by agreement, der fuehrer and chancellor made his offer to the world, but the world, still blind and wrapped up in the mentality which is generally known today as 'the spirit of Versailles,' did not respond.

"But der fuehrer sees now, as before, in the possession of colonies desired for supply of raw materials only, on one side, and in world trade on the other, two most essential means of raising the standard of life of his people from the present subsistence level.

"A reasonable solution to the colonial question, therefore, is most desirable and to my mind to the interest of all in the long run."

IT WAS announced in Louisian al-Great Britain and Italy had altual declaration of interests in the Mediterranean. At the same time Foreign Secretary Eden told the house of commons that on September 12 the British government warned Mussolini that he must keep islands. He said there was now reason to believe Italy would not enter into negotiations with General Franco, the Spanish Fascist leader, for a change in the Mediterranean status quo. Eden added that Great Britain had not recognized Italy's annexation of Ethiopia and did not intend to do so.

Church Looks Like Hangar

What is claimed to be the most modern church in the world been constructed at Cranford, Middlesex, writes a London correspondent. Its exterior has nothing in common with ordinary church architecture, but looks more like an airplane hangar. It has soft theater seats instead of pews, indirect lighting, modern interior decorating and loud-speakers. Popular controwe know it today and he thinks this versial questions can be discussed -and laughter is permitted.

Madison-A machine vending candy, peanuts or gum may be legally used if it is not a gambling device, Dist. Atty. John P. McEvoy, Kenosha county, was informed in an attorney general's opinion.

Waupun-Walter Gehrke, Platte-

ville, has been appointed physical educational instructor in the state prison here. During the winter the inmates are given calisthenics instead of the usual outdoor sports. Fond du Lac-Police have warned

women shoppers to "hang on to their pocketbooks" as a result of weekend purse snatching activities. One woman was reported to have lost a purse containing a \$175 ring. Campbellsport-The tax rate for

Campbellsport has been set at \$29.97 per thousand. This has been apportioned at \$11.44 for school tax, \$10.03 county tax and \$3.50 local tax. This is the highest rate ever levied in Campbellsport.

Mayville-Despite an increase in the county and state tax rate the city tax rate will be \$2.02 lower than last year, it was announced. The new tax rates are: county and state, \$11.50; city, \$6.50; school, \$19.15, for a total of \$37.15 per thou-

New Berlin - Tom Peffer, blacksmith, exhibited a 76-pound 12-ounce pumpkin as basis for his claim to the season's pumpkin raising title. The previous claimant was Simon Ienatsch, Monroe, who grew a 42-pound specimen. Peffer picked the pumpkin Oct. 12. Its diameter is close to two feet and he said 30 pies could be made from it.

Madison - Wisconsin's state fair ranked third in attendance for 1936 among 38 state and district fairs making reports at the International Fair convention in Chicago, according to Ralph E. Ammon, manager of the Wisconsin fair. Only Minnesota and California topped Wisconsin in attendance. Each of these drew more than 600,000 while Wisconsin's attendance reached 429,446.

Madison - The Farmers' Butter Association, a Tomah creamery cooperating in the state's dairy improvement program, has reported to the department of agriculture and markets that 175 barns belonging to its patrons have been whitewashed since last September. The association purchased a whitewashing machine last fall, and since that time the machine has been in con-

Rice Lake-Barron county Swiss cheesemakers won about all of the top honors on cheese exhibited this year. Fred Kuenzi, Dobie, won the governor's cup and sweepstakes honors at the state fair at Milwaukee; Fred Reber, Long Lake, won first prize and the blue ribbon at the International exposition at Portland, Ore., and Gottleib Reber, Vance Creek, won first place at a recent state convention at Fond du Lac.

Beloit-Legal action will be taken against all Rock county theater bank night winners to force them to forfeit their winnings in accordance with Wisconsin's anti-lottery laws, Dist. Atty. John H. Matheson announced. Winners will be sued, he said, because the penalty for a conviction of operators of a lottery is not severe enough to halt the practice. Matheson said he also "expects to prosecute" all persons who advertise "bank nights or other types of lotteries."

Sheboygan - Henry Repphun, 35, began a term of 14 to 17 years in state prison for the slaying of Mrs. Esther McWilliams, mother of four children. Repphun was sentenced by Circuit Judge Henry A. Detling. He was convicted of second degree murder by a jury Dec. 12. Elmer McWilliams, husband of the murdered woman, is in Waupun prison for burglary. Repphun admitted he was the father of one of Mrs. Mc-Williams' children born while her husband was in Waupun.

Superior-Wood on areas burned over by forest fires in the towns of Dairyland and Summit last August is being salvaged under a WPA project approved by the Douglas county board. The wood will provide fuel for needy families in Superior and outskirts of the city. remove fire hazards.

Darlington-Le Roy Reese, agricultural instructor at Mt. Horeb, has been appointed La Fayette county agricultural agent to succeed R. V. Hurley who resigned to take a position as Dane county agent.

Monroe-Upland game bird feeding stations which are to be erected within a 15 mile radius of the Argyle CCC camp during the winter are to be made out of brush or cornstalks. Camp members will build the stations and supply the feed and grit.

Fond du Lac - Installment payment of city real estate taxes next year was approved by the city council here. Property owners may pay 50 per cent by Mar. 1, 25 per cent not later than May 31 and a similar amount not later than July 31.

Madison-Harry Klueter of this city was elected president of the National Association of Dairy, Food and Drug Officials at the annual convention at Coral Gables, Fla.

Kenosha - Ralph Mark, 41, Milwaukee, was sentenced to serve five years in Wisconsin state prison for defrauding a widow of two diamond rings on his promise of marriage.

Balsam Lake-Discharging of 2,-000 farmers employed on emergency drought relief work left only 236 regular WPA employes on the pay roll here. These are employed on 21 projects.

Appleton - A voluntary slash of lectric rates, involving a saving of \$48,000 for consumers in the southern division, has been announced by W. E. Schubert, general manager of the Wisconsin-Michigan Power company. The new rate will go into effect Jan. 10, 1937.

Manitowoc-The first of three new heavy duty trucks and snowplows to aid the Manitowoc county highway department in controlling drifts this winter has arrived. The county will have a fleet of 15 truck-plows this season, in addition to two rotary plows, three tractor plows and 15 motor graders.

Gays Mills-The five apple orchards on Kickapoo Heights have just closed one of the most success. ful seasons of their history. The crop was abundant and prices were high throughout the season. Only about 1,200 bushels of winter apples remain in storage and these will be marketed in March or April.

Fort Atkinson-George H. Pounder of Fort Atkinson, one of Wisconsin's most widely known Civil war veteran, died in the Fort Atkinson hospital after being ill six weeks. He was 92. Mr. Pounder had held many offices in the local, state and national Grand Army of the Republic organizations. He was the last Civil war veteran here.

Kenosha - A thousand families, 401 single persons and a total all together of 4,659 individuals are receiving aid in whole or part from the county relief unit, Charles L. Holderness, Kenosha county relief director, announced, with prospects of relief costs in December topping many preceding months. November relief costs were \$43,766, compared with \$43,267 in October.

Manawa-A third payment amounting to 10 per cent of funds in the closed First National bank of Manawa has been distributed. The sum is \$27,738.25. Two previous payments were made, one of 40 per cent and the other of 25 per cent, making the amount received by depositors thus far \$208,406.24. The bank had deposits of nearly \$300,000 when it went into a receiver's hands on Mar.

Madison-It cost the state government \$400 to have President Roosevelt's electors notify the country at large that he carried Wisconsin's lution made up at one-half the votes Nov. 3. This money went for train fares, luncheons and incidental expenses. The 12 electors, each with a vote to cast for Mr. Roosevelt, gathered here officially to clean up the unfinished business of the general election. The formalities took

Superior - Mrs. Edna Bergstrom, Duluth, reported to police that two men who told her they were distributing money from an estate had swindled her of \$2,200, her life savings. The men assured her, she said, that she would receive \$1,000 of the estate. Mrs. Bergstrom said she drew her money from the bank to "prove that she had been frugal," which was the condition for obtaining a share of the bequest.

Milwaukee - Walter M. Singler, leader of statewide milk strikes, has resigned as president of the Wisconsin Co-operative Milk Pool. He had held the office since 1932. The pool's board of directors accepted Singler's resignation at Oshkosh and elected Harry H. Jack of Hortonville as his succesor. Jack resigned last summer as pool vice-president to run for lieutenant governor as a progressive but was reinstated after his defeat in the primary election.

Fond du Lac - Lake Winnebago claimed its fourth ice fisherman. John Dekker, jr., New Holstein, was trapped behind the wheel of the car he was driving and was drowned when his automobile crashed through the ice. His companion, Corbin J. Stenz, 34, also of New Holstein, managed to extricate himself and float to the surface. He was rescued. Three Fond du Lac men, Joseph Schmidt, Edward Jurgensmeier and Irving Kinsley, on Dec. 22, 1935, returning from an ice fishing trip on the lake, were drowned in a similar accident when their car struck an airhole and fell into deep water, 18 miles from Fond du Lac.

Cool Days Best for Hog-Killing

Choose Temperature of 28 to 40 Degrees, Advises an Expert.

By R. E. Nance, Professor of Animal Husbandry, North Carolina State College, WNU Service.

The best time for killing hogs on farm is a cool, dry afternoon, not the coldest day in mid-winter.

On a bitter cold day the job is too disagreeable and there is danger of the meat freezing on the outside before the animal heat escapes from around the bone. Ideal butchering weather is in a temperature of 28 to 40 degrees Fahrenheit. Keep hogs off feed for 24 hours

before slaughtering, but give them plenty of fresh water. After they have been killed, scald them in water heated to a temperature of 150 degrees.

If you don't have a thermometer, dip your finger into the water. If it burns badly the first time, it is too hot. If you can dip your finger in and out more than three times in rapid succession, the water is too A barrel may be used to scald

one or two hogs, but where more than two are to be dressed, a vat is much more satisfactory. A small table should be provided, in either case, for picking and scraping the hogs. It should be 12 to 18 inches high and three or four feet wide. After hogs are scalded and

scraped, the carcasses should be split down the center of the backbone and the leaf fat loosened from the lower end of the ribs. Hang them in the smoke house to chill over night, but be sure the meat does not freeze.

The next morning, after all animal heat has dissipated, make the various cuts as neat and smooth as possible. Trim each piece closely, as ragged edges and too much fat lower the value of the cured product and also provide a hiding place for meat insects.

Grease Heel Found With Poorly Cared-For Horses

Grease heel is most often found with horses which have thick, coarse legs and are kept in dirty, damp, dark stables, or made to wade frequently in muddy, stagnant ponds. In a few cases the trouble appears with horses not kept under such conditions. For treatment it is necessary to

clip all the hair from the infected areas and wash the leg with soap and water containing washing soda or bicarbonate of soda. After the leg has been dried, it should be soaked in a strong solution of an astringent antiseptic, such as 3 ounces each of copper sulphate, alum and zinc sulphate to each gallon of water. The infected patches should be thoroughly soaked with the solution. Thereafter the leg should be dressed daily with the sostrength as given. In most instances it is best to remove all wart-like structures found on the diseased spots.-Indiana Farmer's Guide.

When Buying a Horse When buying a horse, it is com-

mon for farmers to give more attention to the teeth than any other part of the animal for signs of age. condition, etc., and while this certainly is important, equally as much can be learned by examining the eve. To a close observer, the eye not only will disclose the approximate age of a horse, but also its disposition, and a good disposition is important if one wants a reliable farm work horse. - Missouri Farmer.

Phosphorus in Soil

A medium amount of available phosphorus in the soil is sufficient for good yields of alfalfa, clovers, and all grain crops. If the amount of available phosphorus is high, 75 pounds per acre, near the surface, it will be sufficient for high yields of alfalfa, clover, and all grain crops. Surface soil with a high or medium amount of phosphorus does not need an application of phosphate for ordinary farm crops.

Agricultural Notes Iodized salt is given preference

Men Not Statues. names are familiar to ins who have read in the school his-

By ELMO SCOTT WATSON tories. But lack of space (plus the inclination of most school book historians to make Revolutionary war heroes pieces of statuary rather than flesh-andblood human beings) has prevented our learning there many other interesting details about the men themselves.

We know that Ethan Allen "thundered on the portal of all earthly kings at Ticonderoga" and demanded its surrender "in the name of the Great Jehovah and the Continental Congress." We know how John Hancock, warned by Paul Revere, fled from Lexington that April night in 1775 before the British redcoats arrived, thereby making it possible for him to write his signature with its historic flourish a year later. We know that Thomas Paine wrote "Common Sense" and the "Crisis" and some of us have recited those thunderous words from the latter-"These are the times that try men's souls-"

But what else did they do to distinguish them from other

THOMAS PAINE

careers? Were those incidents which are preserved in the school books the only ones worthy of mention? In partial answer to those questions are offered these "footnotes to history" to help you recall on this, the two-hundredth anniversary of their birth, these three notables in the history of America's struggle for liberty.

When Ethan, "The Strong," grew into young manhood, he found Connecticut too narrow a sphere of action for his tremendous energies. After farming a bit, mining a bit and wandering from place to place, he finally landed in the region into which he fitted so perfectly. It was the frontier country between New Hampshire and New York known as the "New Hampshire Grants." There he acquired nearly 100,-000 acres of wilderness lands by grants from the New Hampshire provincial government. But this territory was also claimed by the province of New York who tried in vain to colonize it, for it was already held by "squatters" called "the Green Mountain Boys."

A Name of Terror. Before long the name of Ethan Allen was a name of terror to settlers who dared come there with their New York grants and to the officials whom Governor Colden sent to survey the lands and try to enforce New York's title. Cabins were offered as "burnt sacrifices to the Gods of the World," and the settlers driven out with instructions to "Go your way now and complain to that Damned Scoundrel, Your Governor. Damn your Governor, Laws, King, Council and Assem-In despair, the officials of New York proclaimed Ethan Allen an outlaw and placed a price on his head. Ethan retaliated

York. So the war of words, and from time to time a more serious war of action, continued. Then came the outbreak of the Revolution and Ethan Allen, embarking upon what was ostensibly a patriotic expedition but what was in reality a move to safeguard the frontiers of his wilderness commonwealth in case of war between Canada and the United Colonies, marched with his "Green Mountain Boys" and with Benedict Arnold against Ticonderoga. There, on the early morning of May 10, 1775, he uttered the phrase which won him

with a similar proclamation

against the governor of New

an imperishable place in American history. An Anti-Climax.

The capture of Ticonderoga was a brilliant achievement but, unfortunately for Allen's future fame, the remainder of his Revolutionary war career was a sad anti-climax. Later he organized a filibustering expedition into Canada with the object of capturing Montreal, but after a short and almost farcical campaign he was captured by the British. Kept as a prisoner of war until 1778, he then returned to his wilderness commonwealth, by now organized under the name of Vermont but still not a mem-

There he rose to even greater power as a sort of an uncrowned king. His hatred for New York was as strong as ever; for New Hampshire he had an aversion almost as great as for the other colony and for the Continental congress, in whose name he had sworn at Ticonderoga, he had profound contempt.

It's the 200th Anniversary of

Three Famous Revolutionary Figures

This congress, refusing to deal with Allen's "outlaw administration," steadfastly declined to consider adding Vermont to the United Colonies. So Allen began negotiations with the British for annexation of Vermont to Canada under British dominion with a certain measure of independence reserved. For this he has been branded by some historians as a traitor, although his "treason" is doubtful in light of the fact that the congress had cast Vermont loose to shift for its own independent existence.

Ethan Allen's turbulent career came to an end in the roistering manner in which he had lived. In February, 1789, he died on a load of hay while returning from a joyous drinking party on an island in Lake Champlain. A year later New York gave up its claim to the Vermont lands and recognized the independence of that colony. In 1791 it was taken into the United States as the first to be admitted after the 13 original colonies. And when Vermont came to honor her two greatest men by placing their monuments in Statuary hall in the National Capitol in Washington, the first one chosen was Ethan Allen.

In striking contrast to the career of that "frontier roughneck," was the career of John Hancock, scion of two generations of clergymen, a graduate of Harvard college, a cultured, polished gentleman whose heritage and training assured him a leading place in the affairs of the colony. Choosing a business career instead of the ministry, he showed a conscientious devotion to his work which would have assured his success even if he had not inherited a fortune from the uncle who adopted him. For seven o'clock in the morning found young John Hancock at his desk in his foster-father's counting house and even after he became the "great Boston merchant" he still observed those early hours.

Some of the modern school of "debunking" historians have made much of the fact that, just before the Revolution, Hancock was engaged in smuggling goods into the country to evade the British excise taxes. They have pointed out that there were 500 offense and that "if convicted the penalties would have been 100,000 pounds, twice the value of all his property." In this fact they see the motive for his encouraging the revolt against the crown.

But it might also be pointed out that, when the best method of driving the British from Boston was under discussion at a patriotic club in that city, he declared "Burn Boston and make John Hancock a beggar, if the public good requires it." Furthermore, in the autumn of 1776, when congress gave Washington instructions to destroy Boston if it should be necessary to do it in order to dislodge the enemy, Hancock wrote to the commander of the Continental army saying that, although he was probably the largest property-owner in the city, he was "anxious the thing should be done if it would benefit the cause." Certainly that does not sound like a man whose main concern was private gain.

A Soldiering Statesman. As for Hancock's other services after the outbreak of the Revolution and especially after he had become famous as the first and only signer of the draft of the Declaration of Independence which was first published, he was a member of the Continental congress from 1775 to 1780 and again from 1785 to 1786, serving as president from May, 1775 to October, 1777. We do not ordinarily think of him as a soldier, yet the fact is that, as major-general of the Massachusetts militia, he commanded the contingent from that state and served valiantly in the expedition against the British in Rhode Island in 1778.

After the close of the Revolution he was a member of the Massachusetts constitutional convention and in 1780 he became the first governor of the new state of Massachusetts. He held that office until 1785 when James Bowdoin was elected in his place. But Bowdoin's weakness in handling the famous "Shay's Rebellion" made the people of the state regret the change of chief executives and in 1787 Hancock was again elected. He soon improved the conditions in regard to taxes and seizure of property for debt which had been responsible for the rebellion and until his death in 1793 he was reelected governor regularly each

The importance of Thomas Paine and his pamphlets to the Patriot cause is too well known to need much comment here. It will be remembered that the first number of the "Crisis" (that one which begins with the immortal These are the times that try men's souls, etc.") was read by Washington's orders to each regiment in the Continental army and they did much to relieve the despair, that was so prevalent in the army during the trying win-

Payne's Other Services.

But writing these pamphlets, important though they were, was not the only contribution which Paine made to the cause of American liberty. After serving a short time in the army as aide to Gen. Nathanael Greene, he became secretary of the congressional committee of foreign affairs but lost this position in 1779 through charges made against him by Silas Deane, commissioner to France. Then Paine became clerk of the Pennsylvania legislature and while holding this place made an urgent appeal to the people for money to relieve the distress of the ragged, starving Continentals in Washington's army. Moreover, he subscribed his entire year's salary to the fund that was thus raised.

In 1781 Paine was associated with Col. Henry Laurens in a successful effort to obtain loans from France and Holland and a grateful nation voted him the sum of \$3,000, the state of New York gave him a large farm in Westchester county and Pennsylvania again made him clerk of the legislature. But Paine was not yet ready to settle down to the quiet enjoyment of life in the new nation which he had helped found. The fight for human liberty was still being waged in other parts of the world.

He went back to England and in 1791 published his "Rights of Man" in reply to Burke's "Reflections on the French Revolution." For this he was outlawed by the court of the king's bench, so he went to France where the Revolution had overthrown the Bourbons and where he was hailed as a hero. In fact, he was elected to the National convention but his republicanism was not strong enough to please the Jacobins. So when he opposed the execution of King Louis XVI and urged instead that the monarch be exiled to America, the Jacobins expelled him from the convention.

Saved by Chance.

When Robespierre came into nower Paine was thrown into prison where he was kept for a year in constant fear of death.

ETHAN ALLEN

Listed among those who were to mount the steps of the guillotine, he escaped that fate by a strange freak of chance. One morning the keeper of the prison went along the corridor placing chalk marks on the doors of those who were to be executed that day. It so happened that the door to Paine's cell was open and pushed back flat against the wall of the corridor. In the darkness of the gloomy old prison the keeper failed to notice this and put his chalk mark on the inside of Paine's door. Thus when the door was finally closed the guards passed it by when they came to lead the other prisoners to their doom.

Paine was finally released through the efforts of James Monroe, United States minister to France, and resumed his seat in the convention. Eventually he returned to the United States and died in New York in 1809. He was first buried on his farm at New Rochelle but a few years later William Cobbett, the English radical, removed his bones to England with the hope of increasing enthusiasm for the republican ideas of which Paine had been the principal exponent. But that hope failed to materialize, and eventually the bones of this English - American - French revolutionist found their last resting place in France. @ Western Newspaper Union.

CHRISTMAS A House Built

AMONG THE **PINES**

Christmas Day

... by ... Frances Grinstead

A HOME that was built on a foot four was a boy at heart.

Boss of a larging crew he
could be plenty stern when occasion demanded, but a Christmas

Christmas day stood for a long time on the old Santa
Fe trail where it passed near Arrow Rock, Mo., on the Missouri tree and all the lights and cheer river. Though not quite completed in a single day, with the help of his neighbors on that "holiday" about a hundred years ago, Henry it looked like Bill was doomed to Nave got his cabin ready for his family and the day after Christ- ished to find you want to say The crew were lounging around mas took them into his shelter.

Of course the house was built of Resistance Strengthens lumber, felled right on his farm. When he had selected the location this pioneer cut down round poles for the walls, rafters and joists-the framework.

Mr. Nave had found some large, flat stones, and in the afternoon they dragged these into place for the hearth. Then of other suitable rocks, by much puffing and pulling they built a fireplace-one of those great practical ones which served to heat the home and to cook venison, buffalo meat, corn pone and other "victuals." The exterior of this fireplace was wood, the stones providing a fireproof lining. The mortar to bind the stones

was chiefly mud; to obtain even this simple ingredient it was necessary to build a fire in the middle

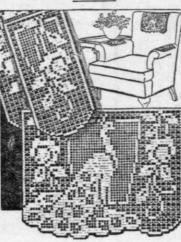

While the Little Nave Children Wished for Things.

of the half-constructed cabin and thaw the ground. But, writes this hardy woodsman,

"It was not many days until we were living snugly in our cabin and in good health and with fine appetites."

Holidays among our ancestors were made occasions for such cel ebrations as this, but they never witnessed the cessation from labor ours afford. There was always a satisfactory Santa Claus to at need for immediate shelter, crop harvesting, or game killing. Hence done his best on the feast that fol- gun-shoots were made social occasions. But do you suppose we "three cheers and a tiger" for a ever have more fun than Henry jolly Christmas among the Oregon Nave's family and friends had building a house on Christmas day?
