## COMMENCEMENT NEXT WEDNESDAY

With final examinations on Thursday and Friday of this week another school term was brought to a close in the Kewaskum High school. Commencement exercises next Wednesday evening, June 2nd, will officially close the school for the summer intermission.

For those who are to be graduated, four years of hard work are ended. It is felt that these years have been faithfully employed. In a short time those who are about to graduate will go to other fields to assume a life in a work apart from the school, but the work they have done while students in the Kewaskum High school, will live after them. Their graduating class shall be remembered.

A worthy program has been prepared as part of the graduation exercises. Asa M. Royce, President of the Platteville State Teachers' College, will be the speaker. In securing Mr. Royce for the occasion, the school feels that it was very fortunate as he is a much sought after speaker.

The honor of being valedictorian of the graduating class goes to Viola Hawig. The valedictorianship is awarded to the student whose four year average is the highest in the class. Her average is 93.12. The honor of salutatorian, second highest student in the class, goes to Ruth Mary Fleischmann. Her average for the four years is 92.95—only 17 of a point behind Miss Hawig. The next four high students in the class in the order of their ranking are: Jeanette Werner, Dorothy Becker, Ralph Marx and Marcella Heisler, all of whom range very closely.

## WEST BEND TO PLAY BALL HERE SUNDAY

After two Sundays on the road, the Kewaskum baseball team will again play at home Sunday afternoon, May 30th, against the rival neighboring West Bend nine. This game will be the usual battle for supremacy between the two teams. Kewaskum is in first place in the standings and will be out to win its fourth straight game. Other cities in the league are drawing immense crowds to their home games so let's see if Kewaskum can't have the stands filled to capacity for its undefeated team Sunday. Don't miss this game! It will be your last chance to see the team at home for three weeks because after Sunday the boys will play away from home again for two Sundays.

## KEWASKUM WINS THIRD STRAIGHT

One thousand people saw the Kewaskum baseball team annex its third straight Badger State victory and hold its unmarred league lead last Sunday afternoon at Fond du Lac on the Lakeside park diamond. A 3-run rally in the ninth inning pulled the game out of the fire to give the locals a 6 to 4 victory.

Kewaskum's three runs were scored on a 3-hit outburst along with two errors and a sacrifice fly in the ninth after the team had trailed by one run for five innings. Marx twirled the entire route for Kewaskum and was nipped for eight hits over the 9-inning distance. He fanned four men and issued three passes. Kleinke, Fond du Lac flinger, was touched for 11 hits. He struck out four batters and walked two. After Kewaskum took a 3 to 0 lead, the opposing side punched four hits for as many runs in the third frame to make the lead. No more runs were scored until the ninth.

Sunday's game saw a new addition to the local team in Roy Niepow, big first baseman and a good slugger. He took Mucha's position at first and the latter moved to left field. Niepow has been in the Badger league before with Thiensville and has had a tryout with the Milwaukee Brewers. He is a member of the Allen-Bradley team of Milwaukee.

## SCHOOL WINS THIRD IN TRI-COUNTY MEET

Sixty-five trackmen from 5 schools in the Tri-County conference invaded the Fond du Lac Senior High school athletic field at 1:30 p. m. last Saturday for the second annual conference track and field meet. The five high schools entered were North Fond du Lac, Brandon, Oakfield, Campbellsport and Kewaskum. It was a good meet and everyone enjoyed it.

The Kewaskum team made a good showing and took third place. Campbellsport placed second, and North Fond du Lac first. North Fondy entered 17 trackmen, Brandon and Kewaskum 14 each, Campbellsport 11, and Oakfield nine.

Francis Roden of the local team took two first places—the 100-yard dash and the 220-yard dash. His best time in the 100-yards was 16.6 seconds. Fred Miller took third in the 220-yard. He was not at his best and no doubt would have taken one of the first two places had it not been for a hard cold.

Kewaskum's relay team took second place. The boys running on the team were: Francis Roden, Harry Koch, Myron Petri and Fred Miller. This meet was the end of the track work for the season in the Tri-County league.

Campbellsport won the meet last year when the trackmen annexed 34 points to Kewaskum's 24 points, which was good for second place. Brandon took third with 22 points and North Fondy fourth with 10.

A trophy, a statuette of a runner, was awarded the championship team and a medal to the trackman annexing the most points. Ribbons were given to the winners of first, second and third places in each event.

Odin Olson, Fond du Lac Senior High school physical education instructor was the official starter.

Editor's Note—The Kewaskum High school track team, different from other schools, can put its Furlong record in the news before it starts running, as Harry Furlong is coach of the team. In the jargon of the sports page, a furlong is a 220-yard dash.

## LOCAL RUNNERS IN STATE MEET AT MADISON SATURDAY

Saturday, May 29, the state track meet will be held at Madison. All schools taking one of the first three places at the various district meets recently are eligible to send their boys. Kewaskum High will send Francis Roden and Fred Miller to compete in the 100 and 220-yard dash events, for Class "C" runners, since they won a first two weeks ago in the district meet at Whitefish Bay.

With good weather Roden and Miller should be in the running for one of the first three places. The boys are in fine shape and will give the other men in their events plenty of trouble.

## AUCTION SALE

The undersigned will sell a quantity of household goods at public auction on Highway 45-55 at the north village limits of Kewaskum on Saturday, May 29, beginning at 1 o'clock p. m. sharp.

Terms: Cash.

## 100,000,000 pounds of milk baked into bread

Bakers used more than 100 million pounds of milk powder to bake their 1936 bread—four times as much as they used 10 years ago. Milk improves quality and adds food value to bread. But technical difficulties for many years limited its use in commercial baking.

Made with Milk

To make it easy to use more milk in baking, Borden research developed a milk powder which is pre-treated under actual baking conditions, so that it doesn't fail. Borden's "bakery-testing" has greatly enlarged the use of all milk in baking, by giving bakers faith in the quality of powdered milk.

New and greater uses for milk are the aim of Borden research. Through research and merchandising, farm income from milk is sustained.

### GRADE SCHOOL NOTES

The eighth grade took a mental ability test under the direction of Mr. Rose last Saturday morning.

Achievement tests were given in the intermediate and grammar rooms on Monday and Tuesday of this week.

The grammar room will hold its annual picnic on Tuesday at Goring's Resort, Big Cedar lake.

The intermediate pupils have made plans to have their annual picnic at the West Bend City Park on June 1.

The pupils of the primary room will have their picnic at the Kewaskum City Park on Tuesday.

### IN THE CLASSROOMS

As the school year has drawn to a close, the various classes have spent the last week reviewing material that was covered in the respective courses this past semester.

### CITIZENSHIP

Work in the freshman citizenship class consisted of working out problems dealing with the various everyday problems of life. This included a study on the management of business and industry; man's efforts to conquer nature, and man's power to use nature. Besides this, there were weekly topics given on current events. The information was obtained from the Weekly News Review. These talks not only broadened the students' knowledge of everyday affairs, but it gave them training, enabling them to talk before an audience.

### AMERICAN HISTORY

Since both the juniors and seniors studied American history, these two history classes have done practically the same things. However, the juniors had a lot of work in their work books while the seniors studied for a daily "quiz." The material the two classes covered dealt mostly with the development of the United States. This included a study of expansion; the Civil War and its effects; the rise of the West; America with the world powers; the World War, and America since the war.

### WORLD HISTORY

The sophomore world history class has studied the development of the old world. The members have also had weekly news topics taken from the Scholastic magazine.

### PHYSICS

A summary of what we have learned in Mr. Gibson's physics class covers much territory, since there are so many and such interesting facts about physics. We have studied molecules and their behavior, atmosphere and its pressure, simple machines, sound, light and the different optical instruments, magnetism, all of the facts about electricity, etc.

### ECONOMICS

The study of economics has given us a clear and dependable knowledge of the important facts of everyday life, of business, of money and banking and of numerous other things which will help us to adapt ourselves more easily to our economic environment. Besides the study of money and banking we have studied production, demand and supply, trade and transportation, and price and value.

### GEOGRAPHY

The geography class has studied all of the physical aspects of geography plus a discussion of the related human aspects. Their work was not only devoted to the geography of the United States but also to that of Latin America, British Empire, Continental Europe, China, and Japan. Besides the study of these various countries, they also studied the earth as a whole. This included the three parts of the earth, causes of mountains, volcanoes, earthquakes, and many other things.

### BIOLOGY

The biology class this semester completed the principles of biology; that is the life of the tree, life functions, green plant as a factory and the physical basis of life. The biology of animal life or the study of insects and their habits, moths, bees, ants, crabs, clams, fish, frogs and mammals was made. They also studied the biology of the human body, which is the study of structure, respiration, foods, digestion, absorption, circulation, the nervous system of man, bacteria and health. The biology of plant life is the study of leaves, stem roots and their functions, flowers, fruits and seeds. General biology is the study of the interrelations of living things or the conservation of health.

### GENERAL SCIENCE

The general science class studied: How the earth is related to the other bodies in the universe; how earth came to be as it is today; what conditions determine our weather and climate; how man provides his food supply; how one can keep in good physical condition; how man protects himself from infectious diseases; how we care and select our clothing; how man obtains and controls the energy of fuels; how man controls heat for his use; how man constructs his buildings; how natural resources are controlled by use of simple mechanical devices; how energy of air, water, steam and exploding gas is put to work, and how electric currents are obtained and used.

### ENGLISH

The freshman English class reading material was taken from the World of Adventures. It included such stories as "Lady of the Lake," "The Citizen," "Vision of St. Laurence," and many other interesting stories of travels, difficulties, friendliness and fun. In grammar they have been learning the parts of a sentence and the various types of sentences. A work book made this work seem like play to the students.

The sophomore English class has been reading stories the entire semester. They have read stories in prose, verse and drama. The poetry was read aloud so as to get the rhythm and music in the lines and the plays were acted so as to get a better picture of the story.

The junior English class has had a complete course in the Mechanics of Writing, which included punctuation, grammar and construction. Intensive work was done on the assembling of ideas in oral and written composition.

The senior English class has spent a part of this semester on English literature. They have studied different types of literature as: short stories, essays, novels, dramas, biography and poetry, and they have watched how it developed from one historical period to the next. The other part of the semester was given over to composition. Most stress was put on unity and coherence of ideas in discourse.

### BEGINNING TYPEWRITING

The members of the beginning typewriting classes have mastered the keyboard and typed for ten minutes with a high degree of accuracy. The speeds varied and the highest speed was made by Russell Belger with 55 words per minute. In addition to timed tests, twelve different styles of letters were studied and typed, envelopes were typed, the classes learned how to use carbon paper, material was arranged into columns and two booklets were made. One booklet consisted of model letters and the other consisted of criticisms of actually used business letters and correct foldings for letters, and the correct method of addressing envelopes.

### ADVANCED TYPEWRITING

A general review of the first year's work was given last fall. More detailed assignments on letter writing were given, tabulation was more fully studied and budgets containing a series of letters between various companies were typed. The highest speeds attained in advanced typewriting were as follows: 65 words per minute by Anita Mertz and 63 words per minute by Rosemary Haug. Members of both typing classes had accuracy tests on Wednesdays and speed and accuracy tests on Fridays throughout the year. The rest of the week was devoted to lesson work as outlined above.

### BOOKKEEPING

Transactions for a complete business cycle were recorded. This included journalizing, posting, taking a trial balance, preparing balance sheets and statements of profit and loss, adjusting and closing entries, work sheets, post-closing trial balances, etc. The transactions were for sole proprietorships and for partnerships. Two practice sets were completed. One was the Potter practice set and involved one month's transactions for a radio dealer. The other was the Collins practice set and involved two months' transactions for a retail hardware dealer. Two chapters on individual accounting, preparing budgets, etc. were also studied.

### BEGINNING SHORTHAND

The theory of Gregg shorthand was studied in this class. A great deal of time was spent in reading from shorthand notes. In addition to this, some time was spent on writing shorthand and taking letters from dictation and transcribing them in longhand. A test was given at the close of each chapter and each student was compelled to make a grade of 90% on each chapter.

### ADVANCED SHORTHAND

A detailed review of the Gregg Manual constituted the first six weeks' work. Extensive assignments in reading shorthand notes, dictation and transcription, and business problems took up the remainder of the time. A budget on business correspondence was given to the students, involving different types of letters, ethics in the business office, and office procedure. The last six weeks were devoted mainly to organizing the Chieftan. The work consisted of typing the copies, cutting the stencils and running off the copies on the mimeograph machine.

### THE SENIOR CLASS TRIP

In six cars last Thursday, the entire senior class of K. H. S., accompanied by Mr. Rose, went to Madison. Shortly after they arrived at Madison they went to the state capitol, where they visited the assembly and senate chambers. After having listened to the various discussions on bills they left the capitol to have dinner. Then they went to the broadcast studio, where they were ushered around by a manager of that institution. Later they were escorted to the observatory on Observatory Hill, and the various devices which were in the

building were explained to them. Then, the whole class went down to the zoo. Most of them felt quite at home, because they all have been to a zoo sometime or other and it felt like seeing "someone from home."

On the way home they stopped at Beaver Dam for lunch, and a show, "Swing High, Swing Low." After the show, a tired, weary "bunch" of seniors ventured home—and they all got there in one piece.

### SPORTS

**K. H. S. BEATS CAMPBELLSPORT**  
Tuesday afternoon, May 18, the Campbelsport High school baseball team was defeated by Kewaskum by a score of 10 to 9 here. Marx pitched the first four innings, allowing no hits. Liermann and Hafermann followed in order and were touched for six hits and eight runs before Dorn came to the rescue, retiring the side without any more scoring done. Roden led the attack with two hits, one being a triple.

### NORTH FOND DU LAC ALSO DEFEATED

On Monday afternoon the Kewaskum High school nine played the North Fond du Lac "B" team at the latter place and defeated them 4 to 2. North Fondy staged a final inning rally which fell short by two points. Kewaskum scored two runs in the fourth frame, another in the sixth inning and still another in the seventh, while North Fondy bunched their hits in the seventh to bring home two runs, after being held scoreless for six innings by Dorn, local pitcher, who allowed only five hits.

**HEADON CRASH FATAL TO ONE**  
FOND DU LAC—A headon automobile collision on highway 41 south of the village of Byron early Tuesday resulted in the death of C. E. Keller, 40, Fond du Lac, and severe injuries to Mrs. W. J. Thorpe, Milwaukee, Edw. J. Pincsak, New Lisbon, and Mrs. Irma Johnson, Elroy. All were treated at St. Agnes hospital. The cars were demolished.

**SUICIDE ATTEMPT FAILS**  
HARTFORD—Attaching a garden hose to the exhaust pipe of his automobile after he had taken sleeping pills, and then entering the machine with the expectation that monoxide poisoning would cause his death, proved successful for Leo Galaska of 3465 So. 15th St., Milwaukee, Sunday morning, May 16. Galaska was found in his auto, which was parked at the foot of Holy Hill, by people who had come to the hill to worship.

**BURGLARS ROB SAFE OF \$700**  
PLYMOUTH—Burglars entered the office of the Farmers Equity Cooperative sometime last Friday evening, and breaking open the safe, got away with a sum of money estimated at around \$700 by police officials. In their eagerness to get away, the burglars overlooked \$230 in cash which was in the same container with some checks.

**HOLSTEIN MEN TO HOLD SHOW**  
CEDARBURG—The Holstein cattle breeders located in Ozaukee county have completed plans for a one-day Black & White Show to be held June 10, at Hilgen Spring Park, Cedarburg. Each Holstein breeder in the territory is expected to bring to the show a few of his best cattle where they will be judged by an expert.

**SPORTSMEN NAME COMMITTEE**  
WEST BEND—A meeting of all sportsmen in Washington county was held in the circuit courtroom in the courthouse at West Bend Tuesday evening, May 25, for the purpose of the annual election of the conservation committee for the county. The meeting was called by Game Warden R. J. Lake.

**PLANT WALL-EYED PIKE**  
RANDOM LAKE—Seventeen cans of wall-eyed pike fry were planted in the local lake Sunday, May 16, by members of the Random Lake Rod & Gun club. Each can contained approximately 10,000 of the little wigglers from the State Fish Hatchery at Madison.

**CAR COLLIDES WITH TREE**  
CAMPBELLSPORT—Two Milwaukee women were taken to St. Agnes hospital, Fond du Lac, for treatment Monday, May 17, after the auto in which they were riding ran into a tree on Highway 55, two miles south of Eden. The women are Mrs. H. R. Manger, and Mrs. J. E. Kiefer. According to officers, Mrs. Manger, driver of the car, turned off the road to avoid a collision with another machine.

(Here is Mr. Dunn's own story of his experience with Chevrolet motor cars)

"Buying another Chevrolet has become an unbreakable habit with my family and me—so much so, that we are now driving our twenty-first consecutive car of that make. Another part of the 'habit' is that we always buy from Joe Mills, owner of the Mills Chevrolet Company, our Chevrolet dealer in Colorado, Texas. As the big spaces of Texas test both cars and friendships, I think our long-time loyalty says much for the dependability of both the Chevrolet car and our local Chevrolet dealer. While we can get values like these, nothing but Chevrolet will satisfy us."

## County Agent Notes

### COUNTY FARM FAMILIES TO ATTEND FIELD DAY AT MADISON, SATURDAY, JUNE 5.

Many Washington county farmers and their families are planning now to take a day off on Saturday, June 5, to attend Farm Folks Field Day at the College of Agriculture, Madison, announces County Agent E. E. Skalsky.

Taking with them their questions about farming and homemaking, they will visit the many exhibits on display in the large university stock pavilion where experiment station workers will explain the latest discoveries and information bearing upon many farm and home problems.

Among the exhibits of special interest to the men will be such things as a model-farm showing ways of conserving soil fertility; pastures from May to November; new ways of preserving alfalfa; helps in rural electrification hybrid corn; low cost livestock rations; safe controls for an electric fence; better fly sprays and sprayers; ways of avoiding sudan grass poisoning, pasture renovation; herd improvement, and many others.

Dealing with homemaking problems will be special demonstrations of cookery, house decoration, and a style show of home-made clothing.

To add to the sociability of the day, families and their neighbors will take their lunches with them and picnic together at noon on the university campus. Following the luncheon hour, field day visitors will be entertained with a half hour concert of band music given by the University of Wisconsin band. F. O. Holt, dean of the College of Agriculture, will address station day visitors briefly during the noon hour.

**THE 1937 SPRING POULTRY SITUATION**  
Better days are apparently ahead in the poultry business. Right now when many Washington county farmers are expressing discouragement over the fact that feed prices are high when egg prices are low, comes encouraging forecast information from farm economists at the College of Agriculture which suggests higher egg prices and lower feed costs for next fall and winter.

Although commercial hatchings in March were somewhat larger than a year ago, the unfavorable price relationship between feed and eggs has caused poultrymen to be hesitant in the purchase of baby chicks. Heavy cancellation of orders resulted with many hatcheries being left with surplus chicks on their hands during the early hatching season. Hatchings in April were reported to be about 8 per cent less than that of a year ago and on May 1 advance orders with commercial hatcheries for future delivery were over 54 per cent less than for the same date last year.

Farm laying flocks are now of less than average size, a condition which with a reduced hatch, economists suggest will result in smaller supplies of fresh eggs and consequently higher prices next fall and winter. A small hatch will mean fewer pullets with which to replenish farm flocks next fall. Added to this encouraging price

situation is the probability that with anything like normal yields, the 1937 harvest will provide feeds at a lower cost.

Aiding the present price situation is the fact that there is now a heavy movement of eggs into storage. About a third more eggs went into storage from March 1 than a year ago, economists report. Although these eggs will later be placed on the market, the quantity is probably not sufficient to prevent egg prices next fall from being higher than a year earlier.

With this situation in prospect, farm economists and poultrymen of the College of Agriculture are suggesting to poultrymen throughout the state that laying flocks be maintained at the usual size for the coming year.

### SPRAYING

Madison—Because of the danger of poisoning bees and the needless waste of spray materials, fruit trees should never be sprayed while in full bloom. The main considerations in successful spraying are correct timing, thorough application and the use of proper materials. Spraying should be looked upon as a form of insurance.

The most important spray to eliminate wormy apples, cherries, and plums is known as the Calyx spray. This is applied just after the petals have fallen.

"Besides our fruit and ornamental flowers, many of our vegetables such as beans, peas, tomatoes, melons, and squash, and such field crops as clover, buckwheat and tobacco depend mainly for their fertilization upon insects which carry pollen to their stigma."

Without that process no seed or fruit would form. Plants do not develop beautiful blossoms and sweet odors to delight the sense of man but to serve in attracting insects for the purpose of their pollination.

### RECORD EGG PRODUCTION REPORTED FOR WISCONSIN

Wisconsin now has the largest farm flocks of chickens ever reported for May 1, and egg production, which is the highest ever reported per farm flock, is about 6 percent higher than the first of May of last year although supplies of feed are low and poultry ration costs are relatively high in comparison with egg prices, the crop reporting service of the Wisconsin and United States departments of agriculture stated today.

### DECREASED MILK PRODUCTION AND HIGHER PRICES ARE REPORTED FOR WISCONSIN

Lower milk production and higher milk prices mark the changes in the Wisconsin dairy situation as compared with a year ago, the crop reporting service of the Wisconsin and United States Departments of Agriculture stated today.

According to reports from Wisconsin crop correspondents, milk production on Wisconsin farms on May 1 was about two per cent less than a year ago. This was due mostly to the decrease in the number of milk cows per farm. Milk production per cow in herd was reported practically the same as a year ago.

### WISCONSIN PEA GROWERS FACE NEW COMPETITION

Peas packed in Japan and distributed by a Chicago wholesale company were recently discovered on the Wisconsin market by a food inspector of the department of agriculture and markets.

### GLADIOLUS BULBS SHOULD BE TREATED TO DESTROY THRIPS

The saying that "an ounce of prevention is worth a pound of cure" applies to the control of gladiolus thrips, E. L. Chambers, state entomologist, stated today in suggesting measures to combat that insect.

The gladiolus thrips invaded the state only five years ago, he said, and already has proved to be a limiting factor in the growth of a flower once considered among the easiest to raise because of its freedom from serious pests.

By treating with corrosive sublimate, it is possible to free the gladiolus bulbs from this pest. All stocks, whether new or selected from bulbs stored through the winter should be treated before they are planted.

If it is the usual practice of the growers to peel the corns; three hours' immersion in a solution containing one ounce of corrosive sublimate to six gallons of water may be used. Since the chemical dissolves very slowly in cold water, it would be advisable to first dissolve it in a small quantity of hot water and then dilute to the correct amount with cold water.
