

Yesteryear Charm in Crocheted Bedspread

Here's an heirloom popcorn bedspread that's going to lend richness to your bedroom—just see how effectively that striking popcorn motif is set off by the lacy mesh background. It's fascinating work—crocheting the in-

dividual squares of durable fabric and once you've learned one you won't want to stop until all the squares are finished and joined into a spread of unusual beauty. In pattern 5908 you will find instructions for making the square shown; an illustration of it and of the stitches used; material requirements; a photograph of the square.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. 14th St., New York, N. Y.

Please write your name, address and pattern number plainly.

What Is Proper Use of Furniture Polish?

In a recent investigation, it was proven that many many homemakers use furniture polish incorrectly—pouring it on a dry cloth, for application to the furniture! This is a gross waste of the housewife's time, energy and her polish! And the latter is usually blamed. We refer, of course, to oil polish—for this type is best to clean, beautify and preserve the furniture. The best oil polish is not greasy, because it's made with a fine, light-oil base. The polish should be applied on a damp cloth—thoroughly moistened with water, then wrung out. Saturate this cloth with the polish—spread on—and rub lightly. The "wet" of the cloth smoothly distributes the polish—and the finish absorbs, receives it evenly! This correct procedure takes the "labor" out of polishing—and requires far less tiresome rubbing! A dry cloth is then used to easily work up the glow, which is even and uniform—the desired effect! This—and only this—is the proper way to use a good oil polish!

MORE WOMEN USE O-CEDAR POLISH THAN ANY OTHER KIND!

... because O-Cedar not only cleans as it polishes, but preserves your furniture—prevents the finish, prevents drying-out, cracking. Insist upon O-Cedar Polish, for furniture, woodwork and floors (with the famous O-Cedar Mop).

As You Can Do all the good you can, by all the means you can, in all the ways you can, in all the places you can, to all the people you can, as long as you can.—John Wesley.

IRON the EASY WAY

Make ironing a quicker, easier and more pleasant task. Iron the easy way—with a Coleman, the genuine Instant Lighting Iron. Just turn a valve, strike a match and it lights instantly. The Coleman heats in a jiffy, is quickly ready for use. Operates for 1/2 an hour. See your dealer or write for FREE FOLDER to THE COLEMAN LAMP AND STOVE CO., Dept. W-1020, Wichita, Kans.; Chicago, Ill.; Philadelphia, Pa.; Los Angeles, Calif. (750-97)

... It is the DOLLARS

... that circulate among ourselves, in our own community, that in the end build our schools and churches, pave our streets, lay our sidewalks, increase our farm values, attract more people to this section. FINNEY OF THE FORCE

By Ted O'Loughlin

**NO BARGAIN PRICES**

At a livery stable, Henry Ward Beecher regarded with deep admiration a horse he had just hired. "What a fine animal," he remarked. "Is he as good as he looks?"

"Indeed he is, sir!" replied the stableman. "That horse will work in any place you put him and do anything a horse can do."

Still regarding the horse with admiration, Mr. Beecher exclaimed, "I wish to goodness he was a member of my church!"

**Hybrid**

A little boy was crying. "What's the matter?" a preacher asked him.

"Well, papa called mama a wadding goose, and mama called papa a stupid ass, so what does that make me?" asked the little boy.—Aitchison Globe.

**Injured**

Barber—Was your tie red when you came in?  
Customer—No, it wasn't.  
Barber—Gosh.

**Startled**

Phil—Was her father surprised when you said you wanted to marry her?  
Dill—Was he surprised? Why, the gun almost fell out of his hands!

Keeping Up With Science

Waters of Colorado Soon to Irrigate the Platte Valley

By RONALD L. IVES

Denver, Colo.—Waters now roaring down the unvisited canyons of the upper Colorado river soon will ripple placidly through the irrigation ditches of the Platte valley, 40 miles to the east of the river gorges and across the 14,000-foot-high Colorado front range. Work has begun on the long-debated Colorado-Big Thompson Transmountain Diversion project.

Armed with good maps and \$40,000,000, hard rock men of the United States bureau of reclamation have started their drills roaring in the first bores for the 13 1/4 mile tunnel through the backbone of the continent. Grand lake, carved long ago from the living granite by Ice-age glaciers, will become an irrigation reservoir, storing water that will later gurgle through the great tunnel, to issue near the little town of Estes Park and fall into a power penstock.

After generating power, the water will flow to storage reservoirs at the edge of the great plains, and later go to the thirsty best fields of the Platte valley.

**Relief for the "Sugar Bowl."**

Designed to remove forever the spectre of water shortage from the farms of northeastern Colorado, and to generate cheap power for farm machines and mining equipment, this diversion project will bring new land under cultivation. Only lands now under irrigation will receive the water from the Colorado river.

Fast becoming a dustbowl, with surface water entirely used for irrigation and underground water supplies mined out during the last drought, the water needs of the Platte valley, Colorado's "Sugar Bowl," have increased yearly. Ditches already have been run miles back into the hills to catch little streams at their source. Now, all the streams on the eastern slope are harnessed, and there is no possibility of getting more water from them.

**Through the Front Range.**

Colorado river water, until now largely wasted in violent springfloods caused by sudden melting of the mountain snow, and flowing through lands unsuited to cultivation, seemed the only solution to the Platte valley's problem. The Front Range, rising more than a mile above the river valley, presented only one of several obstacles. Now, with tunnel construction planned, and storage reservoir construction starting, the transmountain water diversion will soon be an accomplished fact.

From the reservoirs, ditches will extend, like the arms of an octopus, to gather in the water of each little stream in the region. A lower reservoir, built in the melting basin of the long-extinct Monarch Valley glacier, will collect the water as it runs in. Above, at the tunnel mouth, Grand lake will be enlarged, and fitted with special spillways to keep its level constant. Power generated at the eastern end of the tunnel will be wired across the storm-swept range and used to pump water from the lower reservoir to the upper.

Keep New-Born Baby Warm and Reduce the Mortality

Washington.—Keeping new-born babies warm after their birth is a simple but important way of helping to cut down infant deaths, Dr. Horton Casparis of Vanderbilt university pointed out at the conference on better care for mothers and babies held under the auspices of the United States children's bureau here.

Before birth the baby has been living in an environment with a temperature of 98.6 degrees Fahrenheit, which may be compared to the wilting heat of midsummer. An infant, especially a prematurely born infant, needs to be gradually acclimated to the temperature of his new environment, just as an adult is careful about not getting chilled after a hot bath. Failure to protect the baby against the change in temperature at birth may, directly or indirectly, be responsible for his death.

Protecting the infant from infection and seeing that he gets plenty of water and suitable food are other important measures stressed by Dr. Casparis.

Lifeless Zones in Sea

Tulsa, Okla.—Mysterious, evil-smelling, lifeless zones in the seas off the coast of Arabia, markedly resembling the azolic conditions deep in the Black sea, are the latest puzzle to geologists seeking the origin of oil.

Recording Device

Berlin.—A new type of sound recording apparatus, working on the same principle as an office dictating machine or phonograph, but using a pyroxylin "film" instead of a cylinder or disk, is in use in Germany.

Early Pole Vaulting

Pole vaulting found its way into sports around the beginning of the Nineteenth century in Germany. At that time long, hardwood poles were used.

American Spas Not Well Enough Known to Our Physicians

Chicago.—Let us save for America and Americans the many millions spent each year in foreign spas.

Dr. Bernard Fantus, Chicago physician, makes a plea to state governments to provide the nation's doctors with information in regard to the natural remedial resources within their own states.

He further asks the American Medical association to interest itself in ridding American spas of quackery.

Dr. Fantus presents his two pleas in the Journal of the American Medical Association.

American doctors know a great deal more about European spas than about our own health resorts, Dr. Fantus states, "although in this country there are practically all the climatic and balneic remedies possessed by any other country in the world."

Some 2,000 places in the United States boast of springs of more or less medicinal value.

The result of the European exodus each year is not only a net loss to this country but also a financial loss to the patients who are sent abroad for a treatment they could obtain much more economically nearer home.

Better Handled in Europe.

In Europe, Dr. Fantus declares, the governments and the governmentally owned medical schools see to it that their doctors are well informed as to their national health resorts.

This is not only altruistic but also sound financial policy for, through taxation, governments are in virtual partnership with all the national enterprises.

A sick person does not get the same benefit out of drinking mineral waters from a bottle in his own home, experience has shown.

The therapeutic value of a mineral water "cure" consists also of the remedial value of a vacation, the change of scene and of occupation, the change in mode of living, the subtle influence of climate and the factor of faith, the Chicago physician states.

Distrust and skepticism prevail among doctors regarding American health resorts. With a few notable exceptions this distrust is well merited in the opinion of Dr. Fantus.

"The mendacity of many of the advertisements for mineral springs rivals that of the claims for 'patent medicines' in their palmiest days," he writes. "Unethical practice and quackery abound in and around health resorts. Even the social features and amusements, in many of them, may be objectionable from a therapeutic as well as a moral standpoint."

California Coast Ranges Comparatively Modern

Washington.—California's earthquake-plagued coast ranges first started to grow only a short time before the Ice age began, and received their most recent uplift only a few thousand years ago, according to data reported recently by Dr. W. P. Woodring of the United States geological survey.

Rising first during the Pliocene period, age of giant mammals, just before the beginning of the ice ages, to part of their present height, the coast ranges were thrown into a jumble of ridges and basins somewhat resembling their present construction.

Ice age erosion, during the time of alternating glacial periods and warm spells, changed the shape of the original mountains somewhat, removing material from the higher lands and depositing it in the valleys, it was stated.

Evidence has been presented during the past generation to prove that the coast ranges were built any time from about 40,000,000 years ago to 20,000 years ago, but the most recent studies lead to the conclusion that the greatest uplifting and deformation took place during the Pleistocene period, time of ice ages, which probably began not more than 1,000,000 years ago.

Polar Seas Fast Warming, Russian Scientists Find

Moscow.—Surface layers of cold water in the Arctic ocean are becoming rapidly thinner, reports Tass, Soviet news agency, summarizing the results of recent thorough studies of Russia's 16,000-mile northern coastline and adjacent seas.

From the surface to a depth of 210 yards, in 1895, Fridtjof Nansen found the temperature in the Arctic ocean slightly more than one degree below freezing. Now, in the same areas, the cold zone is only half as deep. Below the cold zone the water was warmer. Soviet scientists believe that this shallowing of the cold zone is caused by an increased amount of warm Atlantic water flowing into the Arctic ocean under the surface.

Alaska's Output

Washington.—Gold, silver, copper, coal and tin produced in Alaska last year were valued at about \$27,000,000, according to preliminary figures issued by the United States geological survey.

Television in Hospital

Moscow.—A telephonic television communication system to enable visitors to the departments of contagious diseases in hospitals to see patients while speaking to them over the telephone has been developed here.

The Oregon Trail

The Oregon trail, route of the covered wagons, extended 2,000 miles from Independence, Mo., to Oregon City and Ft. Vancouver, Ore.

CLASSIFIED DEPARTMENT

**SCHOOLS—COLLEGE**

BARBER SCHOOL

**LEARN BARBERING JOBS OPEN**  
Send for free booklet to: MILWAUKEE SCHOOL OF BARBERING, 839 N. Water St.

AROUND THE HOUSE

**Cleaning Hair Brushes**—To move grease and dirt from brushes and combs, wash in a quart of water to which a spoon of ammonia is added, and dry in the sun.

Sweet Omelet

A tablespoon of butter added to the regular recipe will produce a sweet omelet, especially popular with youngsters.

Jumpers Keep Their Shape

When drying woolen jumpers a curtain stick through sleeves and then hang up, hanger will make "pokes" shoulders and spoil the shape.

Fluffy Meringue

If your fluffy meringue for your pie is a teaspoon of baking powder the well-beaten whites of two eggs before adding the sugar.

Washing Parsley

Washed with hot water, parsley flavor better and is easier to chop.

Dry Those Boots

At the time of the year overshoes or often get damp inside. Dry them by the fire or the radiator. Keep two old woollen socks filled with bran. Heat them the oven and pop them into the boots—the bran retains warmth for some time and helps to dry out the dampness.

Glowing Lamps

Here's a new idea for country readers who use oil lamps. Never wash the globe as it makes them dirty. Sprinkle methylated spirit clean soft rag, rub it over the globe, leave for a few minutes and then polish. They'll be new.

## County Agent Notes

### PRUNING DEMONSTRATION MARCH 21

The two orchard schools conducted by Mr. E. E. Skalsky, county agent, and Mr. C. L. Kuehner, fruit specialist of the college of agriculture, will have their final meeting on Monday, March 21st. The meeting on that day will consist of pruning demonstrations.

### COUNTY HOLSTEIN DIRECTORS TO MEET

A meeting of the directors of the Washington County Holstein Breeders' association will be held in the court house at West Bend on Thursday evening, March 24th. Mr. E. M. Clark, fieldman for the National Holstein association, and Mr. Arthur Holte, of the college of agriculture will be present.

### FRUIT GROWERS COOPERATIVE MEETING

The annual meeting of the Southeastern Wisconsin Fruit Growers' Cooperative was held at the Underwood Hotel in Wauwatosa on Wednesday of this week.

### HORSE NUMBERS AGAIN DECLINE IN WISCONSIN

After showing some increase in recent years, the horse population in the state has again dropped off somewhat. According to the annual livestock inventory made by the Crop Reporting Service of the Wisconsin and United States Departments of Agriculture, there are about 526,000 horses in the state, or 5,000 less than the number estimated a year ago.

### WISCONSIN PLANS PARTICIPATION IN WORLD POULTRY CONGRESS AND EXPOSITION

Wisconsin's participation next year in the first World's Poultry Congress and Exposition ever to be held in America will be planned by a statewide committee consisting of 58 persons appointed last week by Gov. Philip F. LaFollette.

The exposition and principal meetings of the congress will be held in Cleveland, Ohio, July 28-Aug. 7, 1933. The purpose of the congress is "to acquaint millions of producers, manufacturers, processors, distributors and consumers with the extent and significance of the poultry industry."

General Classification—Gov. Philip F. LaFollette; Dean Chris L. Christensen, Wisconsin College of Agriculture; Harry Jack, chairman, and Milo K. Swanton, secretary, of the state board of agriculture and markets; Ralph E. Ammon, director of the department of agriculture and markets; W. W. Clark, director of agricultural extension, University of Wisconsin; R. B. Goodman,

chairman, state conservation commission, and George Hambrecht, state director of vocational education.

### MAINTAIN SOIL FERTILITY ON COUNTY FARMS BECOMING IMPORTANT PROBLEM

Owners or operators of Wisconsin county farms, in common with those of other Wisconsin counties, are finding out and selling their fertility at a surprisingly fast rate. This process has been going on gradually and continuously every year without more than passing interest until in recent years it is becoming apparent that our soils are not as productive as they used to be.

In general, we have labored under the false impression that where all crops grown on the farm were fed to livestock and the manure returned to the land, we were keeping up the fertility of our soils. But soil authorities, by taking into account the various fertility losses, estimate that from Wisconsin farm soils more than \$30,000,000 worth of plant food is lost annually, even under our present system of livestock farming.

C. J. Chapman, extension soils specialist, in the recent circular "Soil Mining or Soil Building" calls attention to the loss in phosphate through the sale of milk alone. He reports that "eight thousand pounds of milk contain the equivalent of 100 pounds of 20 per cent superphosphate. A good cow will produce 8,000 pounds of milk a year; so, we are losing the equivalent of a 100-pound sack of 20 per cent superphosphate for each cow in our herds. If a farmer is milking 20 cows, he is losing the equivalent of one ton of 20 per cent superphosphate in the sale of milk every year."

He goes on further to say that every 1,000 pounds of livestock sold from the farm carry the equivalent of nearly 100 pounds of 16 percent superphosphate. Every 40 bushels of barley or 30 bushels of wheat sold from the farm carry with them phosphorus equivalent to 100 pounds of 16 percent superphosphate.

Being phosphorus, our soils are losing potash, lime and organic matter and something must be done to stop these losses, such as shifting from soil-depleting to soil-conserving crops and using more fertilizers and lime to maintain a balanced state of fertility.

This important question of maintaining soil fertility is one upon which your county agent will gladly give assistance. Anyone who would like to receive a copy of the circular "Soil Mining or Soil Building" or has questions about acid soil or other fertility questions should feel free to call upon him.

### WAUCOUSTA

Mr. and Mrs. F. S. Burnett spent Saturday at Fond du Lac.

H. F. Bartelt was a business caller at Fond du Lac Tuesday.

Mr. H. Jandre of Five Corners is spending the week with relatives here.

Arnold Voight of Beechwood called on relatives and friends here Sunday.

Mr. and Mrs. Edgar 'Sook and son Ellis spent Sunday with relatives at Adell.

Mr. and Mrs. H. Loomis and son of Milwaukee spent Monday at their farm home here.

Mr. and Mrs. Richard Pieper of Fond du Lac spent Sunday at the W. C. Pieper home here.

Mr. and Mrs. Ed Reis and daughters, Maxine and Shirley of Cascade were callers here Tuesday.

Mrs. M. C. Engels, Tuesday and daughter Elaine and the Misses Hattie and Dora Busaft spent Sunday afternoon with Miss Eva Allen at Eden.

Wm. Wachs and Mrs. Margaret Haegler, Mrs. M. C. Engels and daughter Elaine spent Saturday at Sheboygan. They also visited Mrs. Haegler's father, who is sick in St. Nicholas hospital there.

### ST. KILIAN

Mrs. Anton Richart visited Monday at Milwaukee.

Orville Strachota of Milwaukee spent the week end at the home of his parents.

Miss Myrtle Strachota was a week end guest of Mr. and Mrs. Ray Grooss at Beaver Dam.

Be sure to see the New Idea manure spreaders now at Rex Garage, Kewaskum. Complete line New Idea repairs.

Mrs. Hugo Straub and sons, Huey and Carroll, Mrs. Adolph Batzler and son Donald spent the week end with Mrs. Elizabeth Weninger at Milwaukee.

Mrs. Andrew Flasch and son Conrad, Mr. and Mrs. Al. Flasch visited Sunday with Mr. and Mrs. Richard Preo and family at Milwaukee. Mrs. Andrew Flasch remained to spend the week with the latter.

The following were entertained Monday evening at the home of Mrs. Rose Flasch: Miss Marie Flasch of Waunakee, Mr. and Mrs. E. German of Barton, Mr. and Mrs. Frank Cole of Lomira and Mr. and Mrs. Leo Helsler.

Payments for soil-building practices, under the 1937 Agricultural Adjustment Act, will be divided in the proportion that landlord and tenant contribute to the carrying out of the practice, according to an announcement by Secretary Wallace.

On farm soils that are sandy or subject to wind erosion, jack pine, Scotch pine, and Norway pine are the most suitable trees for shelterbelt purposes.

### NEW PROSPECT

Charles Miller of Kewaskum spent Monday in the village on business.

Mr. and Mrs. Walter Jandre and family spent Sunday evening at West Bend.

Mr. and Mrs. J. P. Uelmen were business callers at Kewaskum Saturday afternoon.

Miss Betty Tunn spent Thursday and Friday with her cousin, Miss Martha Kaehne near Campbellsport.

Mr. and Mrs. Henry Becker and daughter Gladys of Kewaskum were Sunday guests of Mr. and Mrs. Wm. F. Schulz.

Monroe Stahl of Beechwood, Dave Hanrahan and son Jerome of Lake Seven were business callers in the village Saturday.

Mr. and Mrs. John Schulz and daughter Emma of Lake Fifteen visited Monday afternoon with Mr. and Mrs. Wm. F. Schulz.

Mr. and Mrs. John M. Braun of Eden visited Tuesday with their aunt, Mrs. Augusta Krueger and Mr. and Mrs. J. P. Uelmen.

Mrs. Wm. F. Schulz spent Thursday with her son-in-law and daughter, Mr. and Mrs. Henry Becker and daughter Gladys at Kewaskum.

Jake Fellenz, treasurer of the town of Auburn, collected taxes at the John Tunn place Monday. He was assisted by H. S. Oppermann of New Fane.

Mr. and Mrs. Richard Trapp, son Gerald and daughters, Virginia and Marilyn spent Sunday as guests of Mr. and Mrs. Phil Koch and family and W. J. Romaine at West Bend.

Miss Virginia Trapp returned to resume her studies at Roosevelt Junior High school at Fond du Lac Sunday, after spending the week end with her parents, Mr. and Mrs. Richard Trapp.

### BEECHWOOD

Mr. and Mrs. Ed Koepke were visitors with Mrs. Wm. Gatzke and daughter Emily Tuesday evening.

Mrs. Frank Boelter, Mr. Carl Boelter and Mr. and Mrs. Joe Kemper of Milwaukee were visitors with Mrs. Wm. Gatzke Monday.

Mrs. Gatzke and daughter Emily and Miss Emma Thiel of Leavenworth, Kans., sister of Mrs. Gatzke, spent the week end at Milwaukee. Miss Thiel left for her home Sunday evening after spending three months with her sister.

Mr. and Mrs. Clayton Kohn of Campbellsport, Mr. and Mrs. Arbie Gatzke, Mr. and Mrs. A. Baesinger and children of Sheboygan Falls, Mrs. William Eblit of Plymouth, Mrs. Minnie Arndt, Mr. and Mrs. A. Lohse and family were callers at Mrs. Wm. Gatzke's home.

Be sure to see the New Idea manure spreaders now at Rex Garage, Kewaskum. Complete line New Idea repairs.

—Mr. and Mrs. Charles Miller spent the week end with her parents at Wild Rosa.

—Fred Schaefer of West Bend called on John F. Schaefer and family on Tuesday.

—Mrs. Olive Haase spent last week at Adell with Mr. and Mrs. Ed. W. Geth and family.

—Simon Stoffel and Miss Crescenzo Stoffel of Milwaukee were Kewaskum visitors Saturday.

—Mr. and Mrs. Mike Skupniewitz of Dalton spent Saturday with Mr. and Mrs. A. P. Schaefer.

—Mr. and Mrs. Harvey Ramthun spent Sunday with the L. C. Kraft family in Fond du Lac.

—Mr. and Mrs. Harry Bouchard of Milwaukee spent Sunday with Mrs. Henry Backus and sons.

—Mrs. Henry Backus visited with Mr. and Mrs. George Rau at Watertown last week Tuesday.

—Miss Lillie Schlosser, Mrs. Elmer Youst and Mrs. Lester Dreher were Milwaukee visitors Friday.

—Mr. and Mrs. A. P. Schaefer visited at the home of Mrs. Mary Ana Honeck in West Bend Sunday.

—Roland Backus of Milwaukee spent Monday and Tuesday at the home of his mother, Mrs. Henry Backus.

—Miss Audrey Koch and friend attended the bicycle races held at the Milwaukee auditorium on Sunday.

—Mr. and Mrs. Elmer Moldenhauer and daughter of New Paine visited Sunday with the Henry Weddig family.

—Mr. and Mrs. Jos. Schwind visited with Mr. and Mrs. Frank Keller Jr. and family at Orchard Grove Sunday.

—Mr. and Mrs. Anton Wiesner and family of St. Bridget's visited Sunday with Mr. and Mrs. John Kral and sons.

—Mrs. Emil Backhaus and Mrs. Henry Becker were business callers at West Bend last Wednesday afternoon.

—Mrs. O. M. Lechner of Beaver Dam and Mrs. Wendt of Mayville called on the John F. Schaefer family Wednesday.

—Mr. and Mrs. K. A. Honeck visited with Mr. and Mrs. William Backhaus in the town of Kewaskum Tuesday evening.

—The month of March really came in like a lamb, the thermometer registering slightly above 40 degrees at noon.

—Mr. and Mrs. Val Peters attended the funeral of the former's brother-in-law, Peter Bohn, at West Bend last Monday.

—Jacob Wilhelm and Mr. Schroeder of Marshfield were pleasant callers on Mr. and Mrs. John Klessig Monday morning.

—Mr. and Mrs. Leonard Marquardt of Beechwood spent Sunday evening with Mr. and Mrs. Henry Weddig and children.

—Mr. and Mrs. William Binder and Mrs. Viola Donath of Fillmore spent Friday afternoon with Mr. and Mrs. C. Groeschel.

—Mr. and Mrs. Conrad Bleier of the town of Kewaskum spent Sunday evening with Mr. and Mrs. K. A. Honeck and family.

—Miss Margaret Browne, commercial teacher in the local high school, spent the week end at her home in Harvard, Ill.

—Mrs. Henry Ramthun, Mrs. Harvey Ramthun and Mrs. Myron Perschbacher were business callers at West Bend Friday.

—Mr. and Mrs. Walter Buss of West Bend visited his parents, Mr. and Mrs. August Buss, and the Chas. Buss family on Sunday.

—Mr. and Mrs. Martin Knickel and family of Campbellsport were Sunday guests of Mr. and Mrs. John F. Schaefer and family.

—Mrs. Philip Schierhorst of Chicago spent from Friday until Monday with Mr. and Mrs. August Buss and the Chas. Buss family.

—Mr. and Mrs. Henry Claus of Milwaukee and Mrs. William Stacy visited Sunday afternoon at the Mrs. Henry Becker home.

—Edw. E. Miller attended the National Funeral Directors meeting which was held at the Schroeder Hotel, Milwaukee, last Friday.

—Mr. and Mrs. Peter Heisler and Mr. and Mrs. Johnnie Brodzeller of Theresa visited Saturday evening with the Louis Heisler family.

—Mrs. Jac. Brussel Sr. and Mrs. J. H. Martin attended a quilting bee at the home of Mrs. Sarah Werner at West Bend last Wednesday.

—Miss Marcella Prost of Fond du Lac spent the week end with her folks and also called on her grandparents, Mr. and Mrs. William Prost.

—Mr. and Mrs. Ervin Kruse and daughter and Mr. and Mrs. Glass of Milwaukee visited with Mr. and Mrs. A. W. Koch and family Sunday.

—The Misses Margaret and Tillie Mayer attended the funeral of Jacob W. Schaefer at St. Matthew's church, Campbellsport last Thursday morning.

—Walter Becker of West Bend, Mrs. H. Knepper and Mrs. Ed. Bassil called on Mrs. Ernst Becker Saturday afternoon.

—Mr. and Mrs. Chas. Groeschel called at Fillmore Wednesday afternoon to visit at the home of Mr. and Mrs. Gustave Degnitz and family.

—Mr. and Mrs. Henry Ehnert, Mr. and Mrs. Peter Kurtz and family of West Bend spent Friday evening with Mr. and Mrs. Henry Weddig and children.

—Winners in schafskopf at the tournament held at Casper's tavern Tuesday evening were Myron Belger, first; Marvin Schaefer, second, and Alex Kudek, third.

—Mr. and Mrs. Ed. Smith and daughter Rose, Miss Camilla Leonardelli and Ed. Cliske of Menasha were Sunday visitors with the Witzig and Zelniet families.

—Mr. and Mrs. Arnold Steger of Theresa, Mr. and Mrs. Art. Eichstadt and Mr. and Mrs. Louis Backus visited Saturday evening with Mr. and Mrs. Chas. Brandt.

—Visitors at the home of Mr. and Mrs. Frank Rose in the town of Kewaskum Sunday were Aaron Rose and family and Mr. and Mrs. Walter Welch of Fond du Lac.

—Ray Herman called on relatives and friends in the village Tuesday while returning to his home in West Bend from a visit with relatives at Minneapolis, Minn.

—A. C. Scheder, Mrs. Henry Hauer was and daughter of Milwaukee were Thursday visitors with the Misses Tillie and Margaret Mayer and Mr. and Mrs. Jos. Mayer and family.

—Mr. and Mrs. Wilmer Prost of the town of Kewaskum Mr. and Mrs. Ernest Hornshoe and daughter Lillian of West Bend spent Sunday with Mr. and Mrs. Arnold Prost and family.

—Neal Wollensak of Milwaukee is spending this week with his parents, Mr. and Mrs. S. C. Wollensak, and his brother, Ralph, and family. Neal is recuperating from a recent operation.

—Harold Marx, Joseph Miller, William Harbeck and the Misses Eleanor Hron, Laura Hirsig and Marcella Heisler attended the six day bicycle races at the Milwaukee auditorium Sunday.

—Mr. and Mrs. Chas. Groeschel were at St. Joseph's Community hospital at West Bend Thursday afternoon to call on Mrs. Fred Goldammer and also visited at the home of Mr. and Mrs. August Oelhafen.

—Mr. and Mrs. Via Thompson and daughter of West Allis, Mr. and Mrs. Herman Groeschel of Fillmore and Mr. and Mrs. Chas. Groeschel spent Sunday with Mr. and Mrs. Leo Yvyan and son Ray.

—Miss Josephine Smith, R. N., of Menasha arrived Friday to spend some time at the Witzig and Zelniet home to care for Mrs. S. E. Witzig, who is seriously ill following a blood clot in her arm last week.

—The Misses Mary Ichimi, R. N., and Florence Williams, R. N., of Milwaukee are spending several days with their former nursing school classmate, Mrs. Marvin Schaefer, and infant son born Wednesday.

—Yes, you must rest and sleep well to protect your health. That is why you should select a comfortable innerspring mattress and box spring at Miller's Furniture Store now. Prices are very reasonable.—adv.

—Mr. and Mrs. Rudy Casper of Waukesha, Mr. and Mrs. Ray Casper of Milwaukee and Harold Casper of Oshkosh were Sunday visitors with Mr. and Mrs. S. N. Casper and Mr. and Mrs. Marvin Schaefer.

—Mr. and Mrs. Aug. Bilgo, sons Roger and August, Mr. and Mrs. Herman Belger and son Russell and Mr. and Mrs. Albert Kocher visited Sunday at Fond du Lac with Mr. and Mrs. Reuben Dreier and family.

—Mrs. John Pirks of Kewaskum accompanied Mr. and Mrs. Harvey Labott and Mrs. Elizabeth Guth of West Bend to Fond du Lac Sunday where they called on Charles Doms, who is a patient at St. Agnes hospital.

—Mr. and Mrs. Edgar Becker, daughter Corrola and Mr. and Mrs. William Becker of Milwaukee, Mr. and Mrs. Carl Becker and son Junior of West Bend were Sunday guests at the home of Mr. and Mrs. Ernst Becker.

—Mr. and Mrs. Jac. Becker and Mr. and Mrs. Wallace Geidel visited at the William Becker home in Milwaukee Sunday to call on August Becker, father of the former, who is recovering nicely from a recent operation.

—Washington County Agent E. E. Skallskey, Harry Furlong, Ralph Kohn, Lehman Rosenheimer Jr., Lloyd Hron and Otto Weddig, all of the village, attended the finals of the six day bicycle races at the Milwaukee auditorium or Tuesday evening.

—Mr. and Mrs. Milton Eisentraut of Fredonia, Otto Backhaus of here and Herman Gilbert of West Bend visited with Mr. and Mrs. Edwin Miller and infant daughter, born last week Wednesday, at Milwaukee Sunday. The little girl will be christened Carol Ann.

—The following from here were at Milwaukee last Friday evening to attend the play "You Can't Take It With You" at the Davidson theater: Mr. and Mrs. M. W. Rosenheimer, the Misses Lillie Schlosser, Pearl Buss, Helen A. Rimmel Viola and LaVerne Bratz, Inez Stelling and Elizabeth Quade, Mr. and Mrs. Paul Landmann, Mrs. Lester Dreher and Mrs. Elmer Yoost.

—The following spent Thursday evening at the home of Mr. and Mrs. William Prost to help celebrate Mrs. Prost's birthday: Mr. and Mrs. F. E. Colvin, Mr. and Mrs. T. Schaefer, Mr. and Mrs. Chas. Prost and son Carl, Miss LaVerne Bratz, Miss Agnes Busch, Mr. and Mrs. Arnold Prost and family, Mr. and Mrs. Wilmer Prost and family. The evening was spent in playing cards, following which a delicious lunch was served.

## WHY Do People Save?

Most people keep that to themselves. Even bankers do not know. What we do know is that when people decide in earnest to save money, they usually have some definite purpose in mind. That we know by the clock-like regularity with which they add to their accounts. Such people seem to have learned that the way to get the things they want is to save for them. We invite you to save here for the things you want.

Safety Workers Recruit Science In Battle on Highway Fatalities

These are traffic developments predicted for the future: (1) Guiding cars automatically by invisible rays from cables in a street. (2) Ending motorist's "hazard zone" with—in effect—a battery of wind-shield wipers through non-skid methods. (3) Infra-red rays from car to car to slow down vehicles approaching too rapidly. (4) Radio beam warnings from one car to another. (5) Electric eyes to control highway lighting so that any given area is illuminated only when traffic requires it.

Automobile accidents dealt sudden death to 39,700 persons last year. That is not news. It is an all-time record and a disgrace that should be emblazoned in letters of fire along every highway of the land, although it already has screamed from many highways in the last few weeks.

But today, for the first time, there is a definite, organized effort being carried into every corner of the United States by an army of 8,000,000 who, with their families, make up a quarter of the nation's population, in an effort to drive the grim reaper from the highway once and for all.

Science is developing a new system of highway lights for certain areas which will supply long-range visibility without glare—illuminating the road so that a driver can see as far ahead as in clear daylight.

Eliminating the "hazard zone" where wet pavement causes skidding accidents—will be one of science's greatest contributions to traffic.

Such traction is a simple matter when road surfaces are dry, according to Professor Lessells, editor of the technical journal of the American Society of Mechanical Engineers.

It is especially heartening to know that two active groups represent the scientific resources of the great universities. These are the Traffic Safety Institute of Northwestern University in Evanston, Ill., and the bureau of street traffic research of Harvard University at Cambridge, Mass.

The "crystal-gazers" of science are Dr. Miller McClintock, director of Harvard bureau, and Prof. John Lessells, of Massachusetts Institute of Technology—recently started the automotive world with vision of the day science will make highway accidents next to impossible.

Dr. Miller McClintock, director of Harvard university bureau of street traffic research, examines a model "city of the future," where traffic will move quickly along super-highways.

Dr. Miller McClintock, director of Harvard university bureau of street traffic research, examines a model "city of the future," where traffic will move quickly along super-highways.

Pointing out that the solution of the problem must be found at the point where the car makes contact with the road, Professor Lessells adds: "If we can instantaneously create a dry surface, over which the tire is always passing, the car's brakes will keep it under control. I anticipate that some way will soon be found to make this possible."

Autos on Increase. The car owner who thinks that traffic safety will come only when fewer autos are on the highways is in for a big disappointment, if a recent survey of automobile and traffic experts means anything. They expect, on the basis of present trends, that the next 20 years will find 37,000,000 motor vehicles

kind of a car today's driver may be riding in tomorrow, is given by Capt. Eddie Rickenbacker, World War ace, and engineering "prophet."

Lighting the Way. The things of the future may themselves turn on, and off the lights to illuminate highways at night, as it is predicted by Dr. Mc-

FARM TOPICS

SUNSHINE, SULPHUR FOR CHICKEN LICE

Combination Is Effective in Parasite Control.

Sunshine and sulphur are being united as a team to fight external poultry parasites, including lice and "sticktight" fleas, in a series of experiments by Dr. M. W. Emmel of the Florida Agricultural Experiment station at Gainesville, Fla.

A preliminary report of this work was published recently in the Journal of the American Veterinary Medical Association. The report stated that chickens were completely rid of lice by feeding them sulphur for a three-week period.

In order to check on the "sulphur and sunshine" treatment, four "control birds" were exposed to exactly the same conditions, except that they were given no sulphur.

Sulphur was found to be effective, also, in controlling the chicken mite in infested poultry houses.

Response to Cold Tells. The response of the blood pressure to a cold—another test taken every few months, will show whether or not the patient is improving.

Dr. Kennedy outlines the method used on 80 patients to obtain the blood pressure response to cold—putting hand and wrist of one side in near-freezing water for 25 seconds—while blood pressure is taken on other arm.

For Underweight Child. Some mothers are naturally distressed when they find that despite the amount and variety of food eaten by their youngsters they still remain underweight.

Of Interest to Farmers. Feed is one of the most important factors in egg production.

Watch closely for throat infection. It spreads rapidly and will result in death by choking.

Ducks can be bled in the mouth the same as turkeys or chickens; this is the proper way to kill them.

Estimated annual loss to poultry industry in the United States from eggs that fail to hatch is \$20,000,000.

Sunflower seeds are very high in protein and fat and are unlike most of the other poultry grains that we use.

Eggs laid by Kentucky hens in one year would reach around the earth at the equator if placed end to end.

The color of egg shells depends on the breed of hens. It in no way indicates difference in food value or quality.

Economists say farmers fare better when they have bounteous crops to sell at moderate prices than when they have scant crops to sell at high prices.

Devices for the artificial hatching of chickens from eggs were known to mankind in early times.

Lameness in pullets or fowls of any kind, is very often associated with intestinal parasites which sap the birds of their strength.

Turkey raising in the United States is a 50-million dollar industry. Scientific findings about proper feeding and control of disease have been largely responsible for the growth of the industry.

"Laughter," said Hi Ho, the sage of Chinatown, "sometimes drives away sorrow and sometimes only conceals it."

Progress in Tuberculosis

By DR. JAMES W. BARTON

ANYONE who has regularly visited a relative or friend at a tuberculosis sanatorium learns the names of patients in adjoining rooms and wards, and can see the progress toward recovery or otherwise from week to week.

Of course the physician can see the record of each patient—the range of temperature, the amount of daily sputum, the number of times he breathes in a minute, and finally the X-ray film which shows whether the tuberculosis process is spreading, healing, or standing still.

From the above he is able to tell the patient, or the family, just what to expect—three months, six months, or a year to recovery, or it may be just a matter of months before he passes away, notwithstanding all that can be done by way of food, fresh air, rest, or collapsing the lung by artificial air or by surgery to give it rest.

What should help the patient to fight and family to hope, despite all the other signs, symptoms, and tests, is recorded by Dr. Allan S. Kennedy of Mountain sanatorium, Hamilton, Canada, in the Canadian Medical Association Journal.

"It is an accepted fact that active and progressing tuberculosis of the lungs is accompanied by lowering of the blood pressure."

"It is generally believed that tuberculosis patients with high blood pressure have very little tuberculosis, or, in any case, tend to heal the tuberculosis more quickly than people with normal or low blood pressure."

Response to Cold Tells. The response of the blood pressure to a cold—another test taken every few months, will show whether or not the patient is improving.

Dr. Kennedy outlines the method used on 80 patients to obtain the blood pressure response to cold—putting hand and wrist of one side in near-freezing water for 25 seconds—while blood pressure is taken on other arm.

For Underweight Child. Some mothers are naturally distressed when they find that despite the amount and variety of food eaten by their youngsters they still remain underweight.

Of abundant amounts of meats, vegetables and fruits have been given to maintain body structure and also liberal amounts of bread, butter, milk and cream to provide energy and store up a little fat, with no proper amount of increase in weight, there is something wrong with the youngster and he should be examined by the family physician and dentist.

For instance, there may be a history of thyroid trouble in the family and the youngster may be an early thyroid case. Should this be so, the amount of food eaten may be quite large, yet there will be no increase in weight; the youngster continues to be underweight.

Another cause of underweight is infection of teeth and tonsils. So much of the body's energy is being used to fight this infection that there is not enough left for proper growth aside from any increase in weight.

Sometimes the youngster will play so hard and so long, perhaps stay up so late at night, that his body is actually tired all the time and the food eaten is not fully absorbed into the blood.

When the cause for underweight has been removed—fatigue, goitre, infected teeth or tonsils—then what is called the upbuilding diet should be used. This includes all the usual foods—protein (meat, eggs, fish, poultry, cereals), all the starch foods—(bread, sugar, potatoes), all the fat foods (cream, butter, egg yolks), and the minerals and vitamins (fruits, vegetables, dairy products). The next point is to give increased amounts of the foods known to be fattening; an extra tablespoonful of butter with each meal adds 300 calories, and improves the flavor of cereals, vegetables, and desserts without being noticeable when used as a seasoning. A tablespoon of thick cream on cereal, or whipped cream on dessert, and of mayonnaise dressing on salad, will add 300 calories more. One or two tablespoons of olive oil at bedtime furnish 100 or 200 more calories and may help relieve constipation.

Disease Fatal to Civil Warriors. In the Civil War, disease killed more soldiers than did war wounds, says the Standard American Encyclopedia. According to a statement prepared by the adjutant general's office, 67,058 were killed in battle, 43,012 died of wounds, and 199,720 died of disease.

"Laughter," said Hi Ho, the sage of Chinatown, "sometimes drives away sorrow and sometimes only conceals it."

For Your Spring Wardrobe

DRESSES that not only satisfy your present craving for something new and spring-like, but also look ahead to a later season, too. Make them yourself at home, for very much less than you usually spend on clothes. You'll find it very easy to do, with the sew chart that accompanies each pattern.

Corsette Waistline. If you have a slim figure, this is the afternoon dress for you! The fullness over the bust, the sleeves cut in one with the shoulders, and the lifted waistline, are just as flattering as they can be! It's the kind of dress you can wear to bridges, luncheons, meetings, and for every afternoon occasion, with the assurance that it is not only smart but becoming.

Slenderizing House Frock. Especially designed for full figures, this house frock follows straight, tailored lines, and fits beautifully. You can get into it in nothing flat, and it doesn't take long to make either, thanks to the complete and detailed sew chart that comes with your pattern. Make it up in a pretty, small-figured printed percale, and trim it with rows of old-fashioned rick-rack.

A Frilly Home Cotton. This is perfectly charming, made up in dotted Swiss, voile or dimity, in some flower-like color like delicate blue or pink or sunshine, clear yellow, with sheer white collar and cuffs. It's ideal for slim figures. Nice to wear around the house now, and perfect to wear anywhere, later on, during summer afternoons.

1442 is designed for sizes 12, 14, 16, 18 and 20, 40 and 42. Size 14 requires 3 3/4 yards of 39-inch material.

1389 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4 1/2 yards of 35 or 39-inch material. 3 1/2 yards of braid.

1453 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 4 yards of 39-inch material, plus 5/8 yard contrasting, 2 3/4 yards edging.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

FIXED stars are so called because they change their positions so slowly in comparison with the planets. All of the stars are in motion.

The name morning star is given to the planets Jupiter, Mars, Saturn and Venus, when one of them rises shortly before the sun and is a conspicuous object in the sky before dawn.

The brightest star is Sirius, the Dog star, in the Canis Major. Betelgeuse, a bright reddish star in the constellation Orion, has a volume about 30,000,000 times that of the sun.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you feel the most common cause of nervousness? Do you feel that you are not getting on with your life? Do you feel that you are not getting on with your life?

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure.

Make a note NOW to get a bottle of world-famous Pinkham's Compound today. WITH-OUT FAIL from your druggist—more than a million women have written in letters reporting benefit.

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Game Animals Doubled. Big game animals in the national forests have more than doubled in the last 12 years.

FOR COLDS. LUDEN'S MENTHOL COUGH DROPS. 5¢

Discretion. Thy friend has a friend; and thy friend's friend has a friend; be discreet.—Talmud.

CONSTIPATED? What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

INSIST ON GENUINE NUJOL

ADVERTISING is as essential to business as is rain to growing crops. It is the keystone in the arch of successful merchandising. Let us show you how to apply it to your business.

EDITORIAL "FRIENDLINESS"

Friendliness is one of our best characteristic attractions. Friendliness is an interest in others, a reaching out of the spirit, a giving out of love, sympathy, gladness and cheer.

The ability to make friends also depends on friendliness and this friendly feeling must be implanted in youth. The ability to make friends is part of the equipment of a satisfactory life.

SCHOOL NEWS

The object of study for the physics class in the past two weeks has been the reflection of light, which included concave and convex mirrors; and the refraction of light, which included concave and convex lenses.

The bookkeeping classes have finished review of the work at the close of the fiscal period.

The only satisfactory test of the understanding of bookkeeping is a series of business papers from which the student must make his interpretation and records.

The senior shorthand class is taking letters in shorthand and transcribing them every day to increase speed and accuracy.

The general science class is now working on Unit IV, "Obtaining the Energy of Fuels." The students have discovered several new facts through carrying out experiments.

Throughout the semester the freshman English class will take reading tests. These tests are for reading speed, to gain central thought, and the ability to recognize word meanings.

nine are practice tests to overcome our difficulties. We have taken two tests so far. Many of us have found out that we have many difficulties in reading.

The seniors are studying the English novel, Charles Dickens's story of the French Revolution, "A Tale of Two Cities." Besides this, each senior is reading another novel in order that he might come to know English novelists and the subjects they wrote about.

GRADE NEWS INTERMEDIATE ROOM—

The fourth graders are studying about the development of the city of Chicago from the building of Fort Dearborn to present day Chicago.

The eighth grade is working a series of twenty exercises in arithmetic to improve their speed and accuracy.

SOCIAL NEWS

Lights, almost every night in the auditorium of the high school indicate that the seniors are working hard and diligently on the class play.

The two leading roles will be played by Rosemary Haug and Floyd Hansen, as Mr. and Mrs. Winlock. Patricia Buss, as Sylvia Winlock, is a very charming heroine and her hero is Chick Bren, played by Roland Koepke.

SPORT NEWS

The Kewaskum High school basketball team lost their last league game of the season to the leading Oakfield team by a score of 22 to 16.

Table with columns: NAME, FG, FT, PF. Rows: Dreher, Bartelt, Kral, B. Bunkelman, Hafeman, Manthel, B. Bunkelman, Buss, Bomaire, Schneider, OAKFIELD, Schmidt, Hoppe, Anderson, Senk, Erdman, Cook, Gelke, W. Erdman.

Erwin Deicher and Elmer Staeger were Kiel callers last Monday. Mr. and Mrs. L. Van Ess spent Sunday with Mr. and Mrs. William Bartelt at Waucoasta.

Mrs. Olive Haase of Kewaskum spent last week with Mr. and Mrs. Ed. W. Guth and family. Be sure to see the New Idea manure spreaders now at Rex Garage, Kewaskum.

William Hillenberg of Josephsburg, Canada, and Miss Hulda Siegel of the town of Kewaskum, were quietly married at Milwaukee on Wednesday.

The Woman's club held a Colonial party at the Temperance hall last week Saturday afternoon.

A number of sleigh loads of young people from the West Bend High school enjoyed a sleighing party to this village last Tuesday evening.

Mr. and Mrs. D. M. Rosenheimer contemplate leaving for Germany in the near future for a few months' trip to visit the former's father and other relatives.

The Messrs. Wm. Schultz, George Brandt, Peter Mees, John Witzig, Jac. Decker, John Brunner and Louis Brandt enjoyed a sleigh ride to Mich. Johannes, Jr.'s home last Thursday evening.

Word was received here on Sunday that a baby girl was born the same day to Dr. and Mrs. Gustave Landmann at Scotland, S. D.

In the past, too little attention has been given to the sub-soil in making liming recommendations, a badger soils authority believes. He has found that on several important soil types, only a light application of lime is needed to get alfalfa roots established in the lime-rich sub-soil.

Be sure to see the New Idea manure spreaders now at Rex Garage, Kewaskum. Complete line New Idea repairs.

friends who take advantage of them and who help each of the Winlocks to suspect each other. It is a play of mistakes and the total sum of mistakes makes an evening of entertainment. It is funny from the beginning to the end.

You will want to see the performance which has much humor in it. Come and see the 1938 senior class play, "Dying to Live."

HAVE YOU HEARD?

That Mr. Rose has turned to drumming? That Mr. Furlong embarrassed Audrey Koch Tuesday? (writing letters, eh!)

That Charlotte wants to go skating on Friday night? (she must be after "Stripes") (Sisterly rivals.) That Clara Metz has a new heart throb? (Oh Fritzie!!!)

That Bernadette's West Bend friend drove her to school last week? (I wonder who he is. Don't you.) That Miss Busch is very adept at singing. (Especially one song.)

That Eleonora's heart throb is working right in Kewaskum? (Ask August Bilgo for further reference.)

Who the boys were who were trying to get Lillian's attention while roller skating last Friday? That Claudia B. has an out of town boy friend?

Who Vernon L. took home from play practice last Monday? (Rosemary are you bushing?) When the senior class play is to be given? (I'll tell you a secret. Oh March 18 and 19. Come one, come all.) That Mr. Gibson's birthday was Tuesday?

NOTICE OF APPLICATION FOR PROBATE OF WILL AND NOTICE TO CREDITORS

STATE OF WISCONSIN, COUNTY COURT, Washington County. In the matter of the estate of Emma Belger, deceased.

Notice is hereby given that at a term of said Court to be held on Tuesday, the 22nd day of March, 1938, at two o'clock in the afternoon of said day, at the Court House in the City of West Bend, in said County, there will be heard and considered:

The application of Herman Belger for the probate of the Will of Emma Belger, deceased, and for the appointment of an executor of the estate of said Emma Belger, deceased, late of the Village of Kewaskum, in said County.

Notice is further given that all claims against the said Emma Belger, deceased, late of the Village of Kewaskum, in Washington County, Wisconsin, must be presented to said County Court at West Bend, in said County, on or before the 28th day of June, 1938 or be barred; and that all such claims and demands will be examined and adjusted at a term of said Court to be held at the Court House in the City of West Bend, in said County, on Tuesday, the 12th day of July, 1938, at 10 o'clock in the forenoon of said day.

Dated February 24th, 1938. By Order of the Court, F. W. BUCKLIN, County Judge Cannon & Meister, Attorneys
