Storm Does Damage

The severe electric storm and high wind on Tuesday night of last week in this area did considerable damage, especially in the vicinity of St. Kilian where trees were uprooted, blown across roads and highways, blocking traffic. A number of barn doors were blown off and on the farm of Mrs. Catherine Schmitt a silo was blown over completely by the strong wind.

Don't Send Children to School Too Young Urges County Supt.

M. T. Buckley, county superintendent of schools, has released the following bit of information to parents who plan to have their children enter school this coming fall:

MUST BE READY TO LEARN

Many parents are planning now for the entrance of their children into the first grade in September. To assist them in the solution of this problem is the purpose of this article. Some parents think their children should be forced to eat or else they will starve. They seem to forget that an active child will get hungry and will eat if given a chance. The parents' job is to set the table with well balanced food and the child will eat. Nowadays most parents worry little about spinach and vitamins.

Not so in the field of reading. Here parents insist that reading should be forced ruthlessly upon a child. To them there is no such thing as getting ready to read. Reading must be crammed into the child's little and unready brain with a horrid rush. Some mothers, and good mothers too, are in such haste to get their children started that they teach them the ABC's or train them in the worthless activity of word calling from some primer. They feel that the child is being helped. Modern first grade teachers know that such activity on the parents' part results in building barriers to reading which must be broken down before the child can make a good beginning in the fall.

ENTRANCE DEPENDS ON CHILD

Many children are sent to school at the age of six. In many cases these children need some training before they start to read. They need to develop certain abilities to get them ready to read. Often children are sent to schools without kindergartens, at five. For most five year old children school experience is tragic. The first half of the year is so difficult and the little tots feel a sense of failure that stays with them for a long time. If parents could only realize the great harm to a child to start life with failure they would think more seriously about the age a child should enter school.

But what is the hurry with this learning business. A child is given time to get strength before being put to work. A boy of five is not asked to do chores that require the physical experience of a child of seven. A girl of five does not keep house. She plays "house." Then, too, mothers and teachers, who have made a thorough and scientific study of reading, know that a child going on seven years of age learns much more easily, eagerly, and rapidly than a five year old. There is lots of time to learn to read after the age of six.

What then is the cause of everyone's anxiety about beginning reading? It may be due to the fact that if the child does not read at an early age people may think he is dumb. That is a carry-over from the old philosophy of education. That day looked for high marks, of passing, of school success, subject-matter control was the big thing, of early graduation. The average child should finish the grades at fourteen and the high school at eighteen. But what does the average child mean? There is no such child as an average child. A child is an individual. We admit variation in such things as the size of our children, some have big, others small feet; some are swift, others slow. But in the school realm we think in terms of the average child. John is six years old, therefore he should begin reading. The parent does not know if John is ready to begin reading. Modern educators use reliable tests to determine reading readiness. Teachers sometimes are reluctant to use these tests because parents object to what the tests reveal, as to their children's readiness to begin reading. Objecting to these tests is as sensible as objecting to a doctor's diagnosis of the physical health of a child. The doctor has certain standards of physical fitness. The reading expert has definite standards to measure a child's fitness to begin reading. There is nothing mysterious about these standards. A child must be able to talk well about many experiences interesting to him. He must be able to see likeness and difference in work forms. The child must have good vision. He must hear well. He must be able to listen to and retell short stories. While not complete, the above list of abilities indicate that there is such a thing as being ready to read.

Nearly all children under six years of age lack some of these abilities and the parent who insists upon his child going to school before six is not acting in the child's best interest.

STORM DOES DAMAGE

The severe electric storm and high wind on Tuesday night of last week in this area did considerable damage, especially in the vicinity of St. Kilian where trees were uprooted, blown across roads and highways, blocking traffic. A number of barn doors were blown off and on the farm of Mrs. Catherine Schmitt a silo was blown over completely by the strong wind.

Thousands Attended Parade and Pageant at West Bend Saturday

Kewaskum Community Band Marches in Parade; Many Local People Witness Huge Pioneer Spectacle

Crowds of approximately 5,000 witnessed the parade and 3,000 saw the pageant of the federal Northwest Territory Sequiquennial Celebration caravan, which appeared in West Bend last Saturday, July 16, through the sponsorship of the West Bend Chamber of Commerce and the West Bend business people.

The caravan, which is portraying the settlement of the original Northwest territory following its establishment by the Ordinance of 1787, came into West Bend from Fox Lake at 2 p. m. Saturday after the members of the troupe had had dinner at Jac. J. Goring's resort, Big Cedar lake. The caravan came by army truck to the city limits, after which it entered the city by ox team, pack horses, and on foot much in the manner of the original pioneers of the territory.

The group was met by a welcoming committee made up of city, village, town, and county officials from all parts of Washington county. At 2:30 the caravan participated in a parade from the lower part of Fourth avenue on the south side of West Bend north on Main street to the beautiful City park at the north city limits.

This parade was a feature of the day. Cars and people jammed every inch of available space along the route to watch the procession. The parade was one of the most interesting seen in West Bend for years because of the gobs of local color added to it.

In addition to the covered wagon, oxen, and other equipment of the federal pioneer players (who added materially to the parade by appearing in costume), there were many pioneer vehicles and equipment of this area on display.

Headlining the local color portion of the parade was the appearance of "The Pioneer," a replica of the first locomotive and passenger coach operated out of Chicago by the Chicago & North Western railroad. Hardly a step behind this in interest was an old hand operated fire pump, which appeared in sharp contrast to the modern motorized equipment of the West Bend fire department directly behind it in the line of march.

There were a number of old cars and buggies, particularly an old Maxwell and Ford, which aroused interest, an 1831 reaper, and another of more recent design, won liberal applause. Old wagons and other equipment drawn by mules were viewed with considerable curiosity and a number of business places in West Bend and the county had interesting displays in the parade.

A color guard, appearance of city and county officers, participation by the 4-H boys and girls and the West Bend Motorcycle club, as well as a bicycle brigade, all added to the impressiveness of the parade, which kept in step to the music of the West Bend Moose and Civic Concert bands and the Kewaskum Community band.

Prior to and after the parade, the crowds which jammed West Bend for the event were busy viewing the show windows of West Bend business places, 44 of which carried displays of old time paraphernalia with at least 10 more having appropriate placard or poster announcements.

Beatrice M. Flasch Weds Felix P. Simon

In a summer nuptial mass read by the Rev. John B. Reichel in St. Kilian's church, St. Kilian, at 9:30 a. m. Saturday, July 16, Miss Beatrice M. Flasch, daughter of Mr. and Mrs. John M. Flasch of St. Kilian, became the bride of Felix P. Simon of Campbellsport, Route 1, son of Mr. and Mrs. Herman Simon of Allenton.

Attending the bride was Miss Hedwig Simon, sister of the groom, as maid of honor. She was attired in a peach lace over satin gown with gold headband and shoes. Her bouquet was of American beauty roses and baby's breath.

The bride wore an aqua blue silk marquisette over satin gown and a matching turban with a short veil. Her shoes, gloves and veil were white. She carried an arm bouquet of tea roses, delphinium and baby's breath.

Ralph Flasch, brother of the bride, attended the groom as best man.

Baskets of garden flowers were used effectively in decorating the altar and aisles of the church for the ceremony.

A wedding dinner was served for the bridal group and the parents of the bride and groom at Bauer's hotel in Campbellsport. In the evening a wedding dance was held at Schill's hall in Ashford.

OPENING OF KIRCHNER'S TAVERN AND LUNCH ROOM

Henry Kirchner, Sr., who recently moved into Kewaskum from Myra, proprietor of Kirchner's Tavern and Lunch Room (formerly the Archway Cafe), located at the intersection of Main street and Fond du Lac avenue, in the village, will hold a grand opening of his place of business this Saturday, July 23rd. Free lunch and music will be supplied. Mr. Kirchner extends to everyone a cordial welcome and bring your friends.

APPROACHING MARRIAGE

The approaching marriage of Miss Gertrude Herriges and Anton Roden of St. Michaels was announced for the first time last Sunday in St. Michael's church.

BIRTH

KLEIN—Born to Mr. and Mrs. Harvey Klein of the town of Wayne, a baby boy last Saturday, July 16.

ingly paraded with red flares through the principal city streets Sunday evening. Concessions were operated by the firemen and the city at the park throughout Sunday and a concert by the Civic Concert band added to the enjoyment of the crowds.

The federal caravan remained in West Bend until Monday, when it departed for Sheboygan. Before leaving, the federal players were vouch in their praise of the City park and of the fine camping facilities afforded them there.

The West Bend Chamber of Commerce, sponsors of the event, wish to take this opportunity of thanking all, particularly the West Bend businessmen, the members of the various committees, the participants in the local portion of the pageant, who in any way aided in making the appearance of the pageant in West Bend the outstanding success it proved to be. We feel that special thanks should also be given the weatherman for the fine break in weather accorded the community during the two days the caravan was in West Bend.

Errors Aid West Bend in Defeating Locals

The six hit pitching of Miller (whose real name is Golemeske), former pitcher in the Triple A league, Milwaukee, and with the Madison Blues, along with five Kewaskum errors, gave the league leading West Bend Benders an 8 to 2 victory over the locals here Sunday. It was the second setback in a row in this half of the split season.

Miller hurled the entire game for the Benders and had the Kewaskum team under control at all times except for a brief spurt in the second inning when the losers scored both their runs. His corker screw curve sent as many as 11 local batters back to the bench via the strikeout route. Jagmin performed the mound chores for the home team and lasted six innings when Marx replaced him after he had allowed 12 base hits. Marx pitched hitless ball in the last three innings. A new catcher, name of Koller, did the receiving for Kewaskum in Kral's absence due to an injury. He was credited with a good job behind the plate.

West Bend broke the ice in the first inning when Lane waited out Jagmin for a walk and Sutter and Dengel followed with singles.

Kewaskum led for the only time in the game in the second inning when the two runs came home. Kronforst walked. Felda hit a ground ball and the second baseman missed the ball when an attempt was made to force Kronforst. Both runners advanced. Kronforst scored on an infield out, advancing Felda to third and the latter scored on a wild pitch.

The visitors came back and took the lead in the third when the league leading hitter, Kaskowski, hit a line drive home run that rolled up against the home run in deep left field. An error gave them another run before the side was retired.

Again in the sixth the Benders tallied. Two runs scored on successive singles by Messenbrink, Lane and Sutter. The final run came in the eighth after Jagmin filled the bases and another error was committed.

NEW KEWASKUM LINEUP TO FACE KOHLER HERE SUNDAY

Practically a new team will take the field for Kewaskum in the game scheduled against the shagging Kohler club on the local diamond this Sunday, July 24. During the past week the lineup has been revised and strengthened. A number of the players were released because of Kewaskum's losing streak and an entire new infield will start Sunday's game. The new combination has a reputation for much needed hitting and fielding power and is expected to put the team in the thick of the race for the second half championship. Who are the players? Well, attend Sunday's game and see for yourself. One of your

Ramblers Tie Redskins For Lead in Softball

As the local softball season goes on a change has taken place in the standings. The team holding the cellar position after two bad beatings has come back to win four straight and go into a tie for first place. This team, the Ramblers, made the grade Monday evening when they slugged the league leading Redskins for a 23 to 10 victory. An eight run spurge by the Ramblers in the first inning finished Miller as pitcher. Schaefer and Mayer followed and were also hit freely. Last week Thursday the Ramblers beat the Pirates a doubleheader, Furlong pitching both games, while Koch's Aces and the Redskins split. Koch's Aces again split a doubleheader with the Pirates Monday evening.

STANDINGS

KEWASKUM BAND WILL PLAY AT COUNTY FAIR

The newly organized Kewaskum Community band has been engaged to furnish music for an evening concert on the first day of the 1938 Washington county fair to be held on Tuesday and Wednesday, August 9 and 10. Because of the loss of the old fair grounds at West Bend, this year's fair will be held on the highway grounds just to the north of the village of Slinger. More information regarding the fair may be obtained by reading the county agent's notes in this issue.

old friends, a hard hitting first baseman, will be back in his old position. You fans know who he is so everybody come out and help the team make Kohler its first victim in the revamped drive. Game at 2:15.

STRAIT GATE

By RUTH COMFORT MITCHELL

COPYRIGHT D. APPLETON-CENTURY CO., INC. WNU SERVICE

CHAPTER X—Continued

Sarah Lynn leaned back in a great deep chair which made her seem almost as if she were floating in space. She had a look of intense concentration on her face, and her hands were clasped in her lap. She was looking at the ceiling, and her eyes were fixed on a point just above her head. Her face was pale, and her lips were set in a firm, straight line. She had a look of intense concentration on her face, and her hands were clasped in her lap. She was looking at the ceiling, and her eyes were fixed on a point just above her head. Her face was pale, and her lips were set in a firm, straight line.

hear of it there'll be the devil to pay and no pitch hot, but I don't care. I've got a hankering to see what it's like. I want to ride up in the sky and look down at birds flapping their wings that I always envied, and I want to look down at Danavale and all the foolish houses the folks built and the road your Gre-gramper and I come over in the covered wagons, dirty and dog-tired and snaling along with the half-dead critters hauling us. I want to do that once before I die."

"And you shall, Great-granny, dear," she told her. "I promise—cross my heart!" Gunnar would loan her the Hermod for this ritual.

CHAPTER XI

It was a pretty day. Gunnar approved the weather, and he warmly approved the project. It was exactly what he wished he might have done for Grandmother Gudrun. Lynn Dana was deeply pleased. "She gave you your wings; right to share them with her," he nodded. The colony came, the protesters, at least, anxious, indignant, annoyed, and the harried Emma Waters kept saying, "Now, Miss Dana, where's your handkerchief? Miss Dana, you went and took your knitted jacket off!"

Wrapped like a little old royal mummy, she was finally lifted into the cabin of the Hermod in Gunnar's long arms.

"I'm obliged to you, young fellow," she thanked him. "And I'm real pleased about you and my child. I've set store by Sairy Lynn from the first minute I laid eyes on her in the cradle. I believe you're going to make her a good husband."

"I will make her a good hus-

band," he told her gravely, fastening the seat belt about her, getting out again, passing through the group of disapproving faces. The matriarch rapped on the window with her lean knuckles and waved at her elderly daughters, her middle-aged granddaughters, and gave her shrill, cackling laugh.

"Now, go on home and don't fret," she admonished them, "you poor old things!"

Then Sarah Lynn Dana took her ship away from the pleasant landscape into the calm skies, carrying the ninety-seven-year-old pioneer who had crossed the plains in a covered wagon to found the dynasty of Danavale.

Sarah Lynn looked back at her often and every time she smiled all over her small parchment face and waved a claw.

"I'm having the best time I ever had in all my born days, Sairy Lynn," she chirped, unaware that her wavering treble did not carry over the sound of the motor. "Beats everything. Even the first day in the wagon-train, and the day we knew we was in California. My land, what would your Gre-gramper think of this?" She gave a little crow of triumph. "Well, poor Hank! When I think how he come across the continent, most of the way a-foot, 'cause we lost so many critters and we had to make the loads light, and he was young and stout. I'd admire to have him here, today, looking down like I am. Well, forevermore! If that's all Mt. Hamiliton amounts to, and the way I've been looking up at it for eighty-odd years! My, but the air's nice up here, Sairy Lynn! Awful light and thin. . . . Makes a body drowsy. . . ."

The flier looked back and saw her nodding. It was too bad to let her lose an instant of this thrill. She executed a mild side slip and the old woman sat up with a jerk and grinned at her.

"Hey, Sairy Lynn! What you up to? Trying to spill me out?" She looked down with renewed animation but very soon she was sleepy again.

Sarah Lynn waited until she had her full attention and then she inquired, both by words which she knew could not be heard and by unmistakable gestures whether she was ready to descend.

She shook her head violently. "No! No! I don't want to go down! I don't want to have it over. I want to keep on going up and up and up!"

"All right," her great-granddaughter said, and set the Hermod to climbing. After a while they encountered a soft sea of pink clouds and rose over it. It was an exquisite sight to see, but the passenger's sharp chin was resting on her breast and she appeared to be sleeping soundly. Sarah Lynn thought it a pity; there would be time enough and to spare for nap-

GREAT BOOKS 'Robin Hood' Is Favorite of Children

By ELIZABETH C. JAMES

PERHAPS the first time that you met Robin Hood and his Merry Men, you were a little child and were in bed with the measles. Perhaps your mother sat by the window where a ray of light permitted her to read to you from the stories of Robin Hood. Anyway, you certainly remember Robin's fight with Little John.

One summer's day Robin Hood and his Merry Men stopped their journey in the forest to rest in the shade. Their leader set out to rove the woods alone, taking his horn which he used to summon his men should he need them.

Going along gaily Robin found himself over a rushing river on a narrow log bridge, face to face with a man seven feet tall. Hot words passed between them for neither would go back to allow the other to pass first. Pulling an arrow from his sheaf and placing it to his long bow, Robin prepared to end this argument, but the tall man taunted him with the name of coward.

"Do you not see me unarmed except for a staff?" cried his opponent. "And yet you would use your bow."

Robin led the bridge and cut himself a stout cudge from a tree. Returning he faced the tall man and became to fight, both balancing on the narrow log.

Robin Hood Falls.

A blow from Robin's staff seemed to shiver the bones of the other, but a quick stroke nearly cracked the crown of Robin's head. Thus they were struggling, hand to hand, when a dextrous stroke from the stranger tumbled Robin Hood into the water. Pulling himself from the river by the overhanging boughs of a bush, Robin gave a mighty blast on his horn. Running at top speed came his band of Merry Men in their liveried suits of green. Seeing their leader wet from head to foot, they asked the reason, and when Robin told them of the fight they beset the stranger to give him a ducking.

"Stop!" cried Robin Hood. "If this brave man will join us, he can become a member of the Merry Men!"

Shouts greeted these words, and the tall man agreed to accept this

WHAT to EAT and WHY

C. Houston Goudiss Offers Practical Advice on How to

Keep Cool With Food

By C. HOUSTON GOUDISS
6 East 39th Street, New York City.

FROM the standpoint of health, the summer months constitute the most important period of the entire year. They should be used to build stamina and vitality that will fortify your body against disease. But to many people, the warm weather means merely a succession of exhausting days and restless nights. And hardly a week passes without reports of heat prostrations.

Meeting the Challenge of Hot Weather
While abnormal heat or humidity may be a secondary cause, the real reason behind much warm-weather suffering is a failure to meet the challenge of summer with a judicious diet.

Automobile owners know that no car is better than its engine, and in warm weather, careful drivers watch the gauge on the dashboard to be sure the engine does not become overheated. But most people give little thought to that most remarkable of all engines—the human digestive machinery.

Compared to the engine in your body, the one in your car is a crude, rough affair that can stand no end of punishment. Moreover, the automobile is driven for a certain length of time and then permitted to rest. But the marvelous mechanism which transforms your food into blood, bone, muscle, and your capacity for thought and action is never wholly at rest.

Importance of the Right Food
If the automobile engine requires special attention, how much more important to stoke your body engine with food suited to the weather!

No one would think of going about in midsummer wearing the same garments that were worn all winter. Yet many women continue to serve the same type of meals which were required to keep the body warm in winter. Such a practice is sure to make you miserable. But more than that, it lowers resistance and may, therefore, lead to illness.

Beating the Heat
There are several factors to bear in mind when planning the hot-weather diet. The first secret of keeping cool is to supply the body machinery with food fuel that can be utilized with the least expenditure of energy.

Warm weather is responsible for muscular relaxation in the digestive tract, as well as other parts of the body. And you run the risk of digestive upsets, with their discomfort and health hazards, unless you make every effort to lessen the work of your digestive system.

Eat lightly of rich fatty meats, pastries, rich cakes, sauces and gravies. At all times, choose easily digestible foods.

Overeating Saps Vitality
Don't overeat. The task of handling excess food is a burden to the body at any season. In hot weather, it will cause the body temperature to mount along with the thermometer, and may result in a serious upset. It is also advisable to cut down somewhat on the quantity of heat and energy producing foods consumed—that is the carbohydrates and fats.

Need for Body-Building Foods
The protein requirement remains the same summer and winter. Some people think that meat should not be eaten in summer, or

For Warm Weather Comfort
REDUCE
By This Easy, Comfortable Method
Send for the Free Bulletin Offered by C. Houston Goudiss

When the temperature mounts, fat hinders heat loss. The body temperature of the overweight individual is more likely to rise than that of the thin person, and he is therefore more liable to heat prostration. For greater comfort, better appearance and for improved health, the man of woman who is overweight should send for the reducing bulletin offered free by C. Houston Goudiss and reduce by the safe and sane method of counting calories.

The bulletin is complete with a chart showing the calorie value of all the commonly used foods and it contains sample menus that you can use as a guide to scientific weight reduction.

Just send a postcard to C. Houston Goudiss at 6 East 39th Street, New York City, asking for his reducing bulletin.

Simple, Keep-Cool Cottons
There are several factors to bear in mind when planning the hot-weather diet. The first secret of keeping cool is to supply the body machinery with food fuel that can be utilized with the least expenditure of energy.

Making Friends
Blessed are they who have the gift of making friends, for it is one of God's best gifts. It involves many things, but above all, the power of going out of one's self, and appreciating whatever is noble and loving in another.—Thomas Hughes.

Surface-Stains on Teeth Yield to Pepsodent with IRIUM
BOTH Pepsodent Tooth Paste and Powder contain Marvelous Irium

There's a reason why Pepsodent can make your teeth gleam and gleam as they naturally should! The answer? Irium, that remarkable new cleansing agent found in Pepsodent alone of ALL dentifrices! Once you've used this new-day dentifrice you'll see for yourself how much more effective it actually is! You'll see how Pepsodent—thanks to wonderful Irium—gently brushes away those surface-stains . . . how it polishes teeth to a dazzling natural brilliance! . . . And Pepsodent works SAFELY! It contains NO BLEACH, NO GRIT, NO PUMICE! Try it!

Side by Side
Friendship is to be brother and sister, two souls meet without mingling, two fingers of one hand.—Victor Hugo.

Waistline in a way that makes you look much, much slimmer than you are. Make this of gingham, percale, lawn, tub silk or calico. 1537 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 3 1/2 yards of 35 inch material with short sleeves. 1395 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 3 3/4 yards of 35 inch material; contrasting collar (if desired) takes 1/2 yard cut bias.

Success in Sewing
Success in sewing, like in any other field, depends upon how you approach the task in hand. To help you turn out clothes professional looking in every detail, we have a book which plainly sets forth the simple rules of home dressmaking. The beginner will find every step in making a dress clearly outlined and illustrated within its covers. For the experienced sewer there are many helpful hints and suggestions for sewing short cuts. Send 15 cents (in coins) today for your copy of SUCCESS IN SEWING, a book every home dressmaker will find of value.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

Need for Body-Building Foods
The protein requirement remains the same summer and winter. Some people think that meat should not be eaten in summer, or

James Monroe as Minister
President James Monroe was minister to England in 1803 and to Spain in 1804, secretary of state under Madison, and in 1814-15 also secretary of war. In 1794 he had been United States envoy to France, but was recalled by President Washington.

Gun Invention Far-Reaching
A soldier's invention to eliminate triggers on guns developed the idea of improving the accuracy of rifle and pistol fire.

(TO BE CONTINUED)

"Enough of folly. We finish!"

band," he told her gravely, fastening the seat belt about her, getting out again, passing through the group of disapproving faces. The matriarch rapped on the window with her lean knuckles and waved at her elderly daughters, her middle-aged granddaughters, and gave her shrill, cackling laugh.

"Now, go on home and don't fret," she admonished them, "you poor old things!"

Then Sarah Lynn Dana took her ship away from the pleasant landscape into the calm skies, carrying the ninety-seven-year-old pioneer who had crossed the plains in a covered wagon to found the dynasty of Danavale.

Sarah Lynn looked back at her often and every time she smiled all over her small parchment face and waved a claw.

"I'm having the best time I ever had in all my born days, Sairy Lynn," she chirped, unaware that her wavering treble did not carry over the sound of the motor. "Beats everything. Even the first day in the wagon-train, and the day we knew we was in California. My land, what would your Gre-gramper think of this?" She gave a little crow of triumph. "Well, poor Hank! When I think how he come across the continent, most of the way a-foot, 'cause we lost so many critters and we had to make the loads light, and he was young and stout. I'd admire to have him here, today, looking down like I am. Well, forevermore! If that's all Mt. Hamiliton amounts to, and the way I've been looking up at it for eighty-odd years! My, but the air's nice up here, Sairy Lynn! Awful light and thin. . . . Makes a body drowsy. . . ."

The flier looked back and saw her nodding. It was too bad to let her lose an instant of this thrill. She executed a mild side slip and the old woman sat up with a jerk and grinned at her.

"Hey, Sairy Lynn! What you up to? Trying to spill me out?" She looked down with renewed animation but very soon she was sleepy again.

Sarah Lynn waited until she had her full attention and then she inquired, both by words which she knew could not be heard and by unmistakable gestures whether she was ready to descend.

She shook her head violently. "No! No! I don't want to go down! I don't want to have it over. I want to keep on going up and up and up!"

"All right," her great-granddaughter said, and set the Hermod to climbing. After a while they encountered a soft sea of pink clouds and rose over it. It was an exquisite sight to see, but the passenger's sharp chin was resting on her breast and she appeared to be sleeping soundly. Sarah Lynn thought it a pity; there would be time enough and to spare for nap-

band," he told her gravely, fastening the seat belt about her, getting out again, passing through the group of disapproving faces. The matriarch rapped on the window with her lean knuckles and waved at her elderly daughters, her middle-aged granddaughters, and gave her shrill, cackling laugh.

New Indian Trade Commissioner

NEW YORK CITY. . . Hardit Singh Malik, I.C.S., O.B.E., newly appointed by the Government of India as its trade commissioner for North America, is shown with his wife and two children as they arrived here recently. The Indian government hopes to increase trade relations between the two countries by this commissionership.

In The Good Old Summer Time

ATLANTIC CITY, N. J. . . Celebrating its fortieth anniversary this summer, the Atlantic City Steel Pier dramatized its growth by staging a 40-year review of what made the seashore famous. . . bathing suits. Styles ranged from the long skirts, bloomers, stockings and bathing shoes of the '90s up to the latest modern mode, worn by Miss Ann Rupp (center), Miss Atlantic City of last year's pageant.

WHAT DO MOVIE STARS DO FOR THEIR TEETH?

It stands to reason that Hollywood stars need sparkling, lustrous teeth more than anybody else in the world. And therefore, it is significant that so many famous stars use Calox Tooth Powder. Calox is made specifically to give teeth a real beauty

polish. It contains five cleansing and polishing ingredients. **TRY CALOX—FREE!** Because a trial is so convincing we offer you a FREE 10-day trial. See coupon. You be the judge. Convince yourself that Calox makes teeth shine . . . shine like the stars!

FREE TRIAL COUPON
 McKesson & Robbins, Inc., Fairfield, Conn. Dept. A.N.F.
 Send me a 10-day trial of CALOX TOOTH POWDER at no expense to me. I will try it.

ST. KILIAN

Jos. Librizzi of Milwaukee is visiting his family at the J. Kleinhaus home. Mr. and Mrs. Jos. Scheib and family of Seward, Nebraska, and John Tiss of Kewaskum called on relatives here on Tuesday.

Mr. and Mrs. Andrew Strachota of Milwaukee called on the Simon Strachota family Thursday while enroute home from Canada.

The Misses Paula Strachota of here and Mary Ellen O'Brien of Eden and Crville Strachota attended the wedding reception of the former's classmate, Elizabeth Dohr, and Frank Barum at Appleton Saturday.

A reunion was held at the home of Mr. and Mrs. Herman Sabish Sunday in honor of Mr. and Mrs. Ralph Esteb and family, and Mrs. Mary Brenner of Bay City who are visiting relatives. Entertainment was furnished in the afternoon by Alois Sabish and a lawn dinner and supper were served. Those who attended were: Mr. and Mrs. Math. Becker and son of Milwaukee, Mr. and Mrs. Leroy Stietz, Mr. and Mrs. Bernstein and daughter, Mr. and Mrs. J. Fischer, Mr. and Mrs. Peter Marten and son and G. Greiten of Cudahy; Jan. Becker, Mr. and Mrs. John Stoffel and daughter, Mr. and Mrs. Frank Stoffel and family, Mr. and Mrs. Leo Becker and family, Mr. and Mrs. Frank Becker and family, Mr. and Mrs. Peter Hilbert and daughter, Mr. and Mrs. Barthol. Becker of Campbellsport, Mr. and Mrs. Leander Belsbir, Mr. and Mrs. Peter Eecker and family, Mr. and Mrs. Chris. Becker, Mr. and Mrs. Louis Sabish and family, Mr. and Mrs. Herbert Sabish of Elmore, Mr. and Mrs. Jos. Karl and sons of St. Bridgets, Mr. and Mrs. Leroy Marcotte and daughter, Mr. and Mrs. John McCarthy and family, Mr. and Mrs. Barthol. Jaeger of Ashford, and Mr. and Mrs. Stanley Sabish of St. Kilian.

KIRMES DANCE AT NEW FANE

A kirmes dance, given by the Married Ladies' sodality of St. Mathias Ann church, town of Auburn, will be held in Rudy Kolafa's hall, New Fane, on Wednesday, July 27. Music by Al's Melody Kings, furnishing modern and old time selections. Admission 25c per person. Lunch and refreshments. All are invited.

FOUR CORNERS

Ed. Marquardt was a caller at the Henry Butzke home Sunday. Arnold Oppermann was a caller at the Wm. Klabbuh Jr. home Friday evening.

The army worms are working around this neighborhood in the barley and corn fields. Mr. and Mrs. Wm. Hohert spent Saturday and Sunday with the Mary Furlong family.

Mr. and Mrs. M. Weasler were callers at the Robert Buettner home Friday evening. Mr. and Mrs. Wm. Klabbuh Sr. spent Sunday afternoon with Mr. and Mrs. Wm. Klabbuh Jr.

Mr. and Mrs. George Buettner and Robert Buettner were Fond du Lac callers one day last week.

Mr. and Mrs. Wm. Klabbuh Sr. of New Fane spent Sunday evening with Mr. and Mrs. M. Weasler.

Mr. and Mrs. Ed. Berg and family of Menomonee Falls spent Sunday with Mrs. Peter Berres and family. Mr. and Mrs. Louis Tunn and family, Mr. and Mrs. Henry Ketter and family spent Sunday at Lakeside park, Fond du Lac.

A few neighbors and friends gathered at the home of Mr. and Mrs. Louis Tunn, it being their son Ronald's birthday. At 11 o'clock lunch was served.

Mr. and Mrs. Frank Bowen spent Saturday with Mrs. Bowen's mother at Campbellsport, who was sick for the past week. She is somewhat better at this writing.

Mr. and Mrs. Wm. Klabbuh Jr., Mrs. M. Weasler and son Anthony, Mr. and Mrs. Henry Keller, Mr. and Mrs. Peter Sonn and son of Campbellsport spent Saturday evening at the home of Mr. and Mrs. Elton Schultz.

AROUND THE HOUSE

To make lemonade for 50 people, use one to two dozen lemons, four cups of sugar, and two gallons of water. The number of lemons depends on their size and juiciness, and a little more water may be added if needed.

Shredded beans cook in a third of the normal cooking time. This saves color, vitamins, mineral matter, and flavor. The beans are uniform in size when shredded, so there is no danger of overcooking or undercooking.

County Agent Notes

Uncle Jim Says

"A supplemental pasture such as sudan grass to turn cows into when the regular pasture is short, gives the cows all they can eat and helps hold up the milk check."

Green, juicy grass during July and August, such as every dairyman likes to have to help keep production costs down, can be had if we plan ahead for it. Permanent pastures at this time of the year unless they have been renovated with dry weather legumes, such as alfalfa and sweet clover, need to be supplemented with such a crop as sudan grass.

Sudan grass, sweet clover, or alfalfa, in a planned rotation of pasture crops certainly gives results. Milk that is produced from good pastures is produced cheaper than if pastures are poor and you have to resort to barn feeding."

COUNTY FAIR AUGUST 9 AND 10

Plans for the 1938 county 4-H fair are rapidly nearing completion. Because of the loss of the old fair grounds, the fair will be held on the highway grounds just to the north of the village of Slinger. Here the county has about seven acres of land suitable for holding a 4-H fair. The large highway shop building can also be used to house home economic and other exhibits.

The dates of the 1938 fair are Tuesday and Wednesday, August 9 and 10. Three tents, 40x80, have been rented to house the livestock. All entries excepting the 4-H clothing and colt club class are to be entered on the opening day of the fair, namely August 9th. All 4-H clothing will be entered at the court house on Friday, August 5th. This early entry permits the clothing to be judged before it is to be moved to the fair grounds for display purposes. Colt club classes will be entered Wednesday morning, August 10th. This permits all entries in this class to be taken home on day of showing.

Wednesday, August 10th, is judging day. The services of eight judges have already been arranged for to award the honors on that day.

The premium list which is now available has many new classes. Among the new classes the fair management wishes to emphasize this year is the floral exhibit, heretofore a small display at the fair. This class offers liberal prizes for artistically arranged bouquets and baskets of flowers. Also attractive premiums for best displays of flowers, namely: Delphinium, Phlox, Snapdragon, Zinnias, Cox Comb and Asters.

There has been a complete revision of the canning, foods and nutrition and clothing departments. These will be discussed more fully at a later date.

Anyone planning to exhibit is invited to ask for a premium list. Merely call West Bend 502 and ask that a premium list be sent you, or write for one.

HARTFORD AND KEWASKUM BANDS WILL PLAY AT FAIR

The 150 piece Hartford Junior band has been secured to play at the county fair on Wednesday evening, August 10th. On Tuesday evening, August 9th, the Kewaskum Junior band will furnish the music. Both will present evening concerts only.

The Badger State Carnival company, with shows and rides, will be on the grounds to entertain fair visitors on both days and evenings.

The county agent's program over WHBL will be heard at 5:45 o'clock in the future. The radio discussion on July 25th will be on the coming World's Poultry Congress.

4-H GARDEN TOUR

There will be a tour for all garden club members this afternoon, July 22. They will meet at 2:00 o'clock at the brick school at the junction of County Trunk "A" and Highway 144 about 2 miles northwest of Barton.

From there they will go to visit Marie Bahr's garden, then to the garden of Clarence and Vera Kurtz, then on to Wm. Donath and the Noster gardens. Professor R. A. Vaughn of the college of agriculture will be there.

APPLY EXTRA ORCHARD SPRAY

The outlook for the apple market is very promising for clean fruit. Apples on the eastern market are now selling for several times the price they had a year ago. Many rains during the past weeks have caused apple scab to spread freely and has washed off the lead arsenate from the fruit so that the codling moth larvae is not amply checked. To correct this many commercial fruit growers are applying two or three additional sprays. It would pay Washington county fruit growers to apply an extra spray in the near future. Use 2 1/2 gallons of lime sulphur and 2 1/2 pounds lead arsenate per 100 gallons of water.

GROWING OUT THE PULLETS

Washington county poultrymen who grow out their pullets to good body frame and finish rather than to early production will have better chances of getting good sized eggs during the winter laying season.

C. E. Holmes, of the poultry husbandry department at the Wisconsin College of Agriculture, in a recent radio talk over WHA-WLBB, called attention to the fact that pullets should have developed good body size, a good degree of fleshing, and have completed their adult plumage before egg laying commences. Unless they do this, their egg size will not be as large as their breeding would allow for and it is harder to keep them laying throughout the winter months, he states. He has found that pullets that come into good production before they are fully mature and before they have their adult plumage, are very likely to go into a moult and stop laying eggs during the winter.

With most production-bred strains, pullets should be given reduced amounts of animal protein by the time they are from four to six weeks of age. For those who are using liquid milk, he suggests that some water should be given and the amount of animal protein decreased in that way. For those who are using dry milk and meat scrap for a source of animal protein, two ways are available to decrease the protein. One is to start feeding grains and the other is to reduce the amount of protein in the mash.

Chicks that are four to six weeks old will eat whole wheat but are hardly large enough to eat whole yellow corn. However, as soon as the chicks are big enough to eat whole yellow corn, there is no advantage in using the more expensive cracked corn, and the shift to whole corn might better be made while the pullets are on range rather than to wait until they are in the laying house this fall. Most chicks, he says, will be large enough to eat whole corn by the time they are eight to ten weeks of age or sometime sooner.

MARKET LAMBS AT 70-90 POUNDS

Finished lambs that reach the market at from 70 to 90 pounds in weight will bring top prices and will cost the farmers less to produce than will lambs sold at heavier weights.

This is the suggestion of J. J. Lacey, extension animal husbandman at the Wisconsin College of Agriculture, who reports that good pastures and not too attractive prices are expected to combine to delay marketing of the Wisconsin lamb crop. For those who are tempted to delay their marketing before the 70 to 90 pound finish stage, attention is called to the fact that every pound put on after the market finish has become acceptable to the buyer is added at increased cost and really detracts from the value of the carcass when sold.

In answer to the question "at what finish or how fat should lambs be when sold" Lacey states that experience in handling lambs is the only guide as to how fat they should be. He suggests that if someone whose judgment is reliable will handle the animals, the degree of finish can be determined. Many buying and commission organizations now give such service at no cost to the producer.

On the terminal markets, buyers, commission concerns, and agencies unite in urging producers to "top out" the lots. This, he explains, means to select the ones ready to market and sell them. He believes that this procedure will add growers in saving feed and making the most income from the farm flock.

DUNDEE

Mr. and Mrs. M. P. Gilroy were Sheboygan visitors Thursday.

The Trinity Lutheran congregation had their quarterly business meeting Monday evening.

Miss Eileen Gilroy of Milwaukee visited from Friday until Sunday with her father, Edward Gilroy.

Miss Erma Ramthun of Milwaukee spent the week end with her parents, Mr. and Mrs. Henry Ramthun.

Mrs. Paul Koernigs, daughter Rita and son Teddy spent the past week with Mr. and Mrs. John Krueger.

Mr. and Mrs. Bert Wendelborn of West Bend visited Sunday with the Henry and Louie Ramthun families.

Mr. and Mrs. Norman Jaeger of Campbellsport visited Wednesday evening with Mr. and Mrs. John Krueger.

James Curruthers of Waupun, former proprietor of Long lake resort spent Sunday calling on old friends in the vicinity.

The Young Peoples' society of the Dundee Lutheran congregation had their annual picnic at Maunthe lake on Sunday afternoon.

Mr. and Mrs. Gerhardt Haegler and son Karl of Sheboygan visited Friday evening with the former's father, Ernst Haegler, and family.

EXPERIENCE—THE EXPENSIVE TEACHER

In our cemeteries there are many gaunt, bleak monuments to fire—the grey tombstones over the thousands of annual fire fatalities. Many more thousands of persons are walking the streets, scarred and disfigured by man's great servant—fire. This toll keeps on as regularly as each new year comes.

There are fires taking place almost daily in our country and in our state. In many instances no lives are lost and only property is destroyed. Not much is made of NEAR catastrophes or conflagrations.

Throughout the state there are public gathering places, schools and hospitals being used daily for their respective purposes, entertainment, education and the caring of the sick. There are restaurants and roadhouses accommodating crowds of merry-makers every evening, especially Saturday and Sunday nights. Many of these places are located several miles from the jurisdiction of cities or villages where fire departments are maintained and fire prevention regulations and orders are enforced to guarantee safety. It is surprising that more conflagrations are not caused when one takes into consideration conditions discovered. Overcrowded roadhouses and dancing places, especially during the spring months, invite panic if a fire should break out suddenly.

What would you do if the cry of "fire" was announced in one of the places you may have been frequenting where you know fire hazards exist? When the cry of "fire" comes, occupants will attempt to escape down stairways, out of windows, pushing and kicking as only a mass of humanity can do in such instances. If you succeeded in getting out of the building safely, and you might be that lucky, would you stand ready to assist others? What would you do? Have you ever given thought along this line?

Regulations require that halls, stairways, fire escapes and passageways be unobstructed and well lighted and that there be at least two good and sufficiently large exits available for emergency use. Exits should be practical in location, the total width of exits, stairways and passageways depending upon the capacity of the hall or assembly room.

Proprietors of assembly halls and other public places should not wait until something shocking happens before information is sought about regulations which would guard against catastrophe or conflagration.

DRIVERS! The car to watch is the car behind the car in front of you.

ST. MICHAELS

Rev. Father Klappert spent the week with relatives at Montello.

Miss Ethel Harris of Milwaukee is spending the week at the Al Uelmen home.

The approaching marriage of Andrew Roden to Miss Gertrude Herriges was announced for the first time Sunday.

—Howard Schmidt, W9DDD, spent last Saturday morning with radio amateurs W9WKL and W9QYZ at Sheboygan Falls.

—Mr. and Mrs. Irwin Schulz and daughter helped celebrate the birthday of Clara Moldenhauer at Allenton Saturday evening.

—Mr. and Mrs. Dale Carpenter and children of Jackson visited with Mr. and Mrs. Philip McLaughlin and family Saturday. Marilyn Carpenter remained here to spend several days.

FARM HAND SENTENCED FOR STEALING OF TIRE

Pleading guilty to the theft of a tire from the John Stockhausen farm, Campbellsport, Route 3, where he was employed, Henry Guggisberg was sentenced to six months in the Fond du Lac county jail by Justice of the Peace Hayhoe at Campbellsport last Friday. Chief of Police George F. Brandt of Kewaskum and Deputy Sheriff Ed. M. Bauer of Campbellsport made the arrest.

When arrested on the complaint of Stockhausen, who lives on Highway 23, east of West Bend, Guggisberg pleaded not guilty. He was released on \$200 bond and the hearing was set for Monday on the morning of his hearing, he changed his mind and pleaded guilty. He was immediately sentenced.

Guggisberg had served nine months in the state reformatory at Green Bay in 1934 and previously had been paroled on a barley theft charge. Due to this he was given a more severe sentence than ordinarily. Guggisberg is married and has no children.

The New Jersey legislature has appropriated \$32,000 for the advertising of the state's farm products.

AS CONVENIENT AS YOUR NEAREST MAILBOX

This institution is as convenient to you as your nearest mailbox. When time, weather or ill-health prevent you from coming to the bank to make deposits, the U. S. Mail enables you to carry on your banking affairs safely and easily. We shall be glad to tell you more of this convenience.

FLIGHT AROUND EARTH
Howard Hughes and Companions Set New Record of 91 Hours . . . Japan Cancels 1940 Olympics

President Roosevelt addressing Louisville citizens from the platform of his special train, urging them to support Senator Barkley for renomination. The senator is at the President's left and Mayor Scholtz of Louisville at his right.

Edward W. Pickard
SUMMARIZES THE WORLD'S WEEK

Hughes' Great Flight

HOWARD HUGHES and his crew of four completed their remarkable flight around the world when they landed at Floyd Bennett airport, New York, 3 days, 19 hours and 17 minutes after starting from that place. They had covered 24,854 miles and made six stops for refueling—at Paris, Moscow, Omsk, Yakutsk, Fairbanks and Minneapolis.

They cut more than three days off the record made by Wiley Post in 1933, but Hughes said after landing that he still considered Post's solo flight was the most remarkable of flying ever done.

On the hop across the Atlantic the time made by Lindbergh was nearly halved. With Hughes, wealthy sportsman and aviator who financed and organized the flight, were Harry Connor and Thomas Thurlow, navigators; Richard Stoddard, radio operator, and Ed Lund, flight engineer.

Hughes himself was at the controls all the time, but said the robot pilot did all the flying except the takeoffs and landings. Much credit also was given the automatic navigator loaned by the army air corps. The chief perils encountered were that they had barely enough fuel to reach Le Bourget airport; and the trip over Siberia where they had to go to an altitude of 17,000 feet and accumulated much ice. Radio communication with the land was maintained most of the time except for six hours before Minneapolis was reached. During that period their transmitter was out of commission.

The monoplane, named "New York World's Fair, 1940," was welcomed at New York by Mayor La Guardia and Grover Whalen and a tremendous crowd. The weary fliers soon got to bed, but next day the metropolis gave them one of its customary ticker-tape receptions with a parade. The wives of Stoddard, Connor and Thurlow were at the airport to meet their husbands. Katherine Hepburn, the movie star, bade Hughes good-bye when he started and welcomed him back. In Hollywood it is rumored they are engaged or possibly secretly married. Another woman deeply interested in the flight was Miss Elinore Hoagland of New York, fiancée of Ed Lund.

Deficit to Be 4 Billions

IN REVISED budget estimates for the current fiscal year, given out in Washington, the President forecast a net federal deficit of \$3,984,887,600, an increase of \$2,525,639,500 over last year's deficit and \$3,035,000,000 more than he had estimated in January for the 12 months ending next June 30.

The deficit, which will increase the gross public debt by \$3,485,000,000, will be financed, the President indicated, by a reduction of \$500,000,000 in the working balance of the treasury's general fund; by the use of \$690,000,000 in special issues of government obligations and by \$2,895,000,000 in new federal financing.

The gross deficit was estimated at \$4,084,887,700, in which is included \$100,000,000 for debt retirement.

The business slump, which grew sharper after Roosevelt submitted his budget estimates to congress last January, was blamed by him for the inaccuracies of his forecasts.

Japan Cancels Olympics

JAPAN evidently thinks the war in China is not near its end. The Tokyo government has cancelled the Olympic games of 1940, dropping all plans to be the host of the world's athletes. The announcement, made by Marquis Koichi Kido, public welfare minister, surprised even the Japanese organizing committee, and the members of

English Trial of the Pyx Finds No Error in Coinage

Great Britain's strangest trial—the Trial of the Pyx—has ended with a favorable verdict from a jury of 15 men of the Goldsmiths' Company, which since the time of Edward I has tested the country's coinage for weight and purity.

In the 12th century coins were made by private companies who were known to mutilate them to their own advantage. Nowadays the

body declared the games would be held, "whether or not the government supports them."

In Tokyo it was said the government's action was due to the cost of financing the games and to military leaders' opposition to a growth of nationalism among the Japanese people.

Though the government lacks money and materials for the necessary sports structures, it had prepared to contribute \$1,250,000 toward the cost, and only a few days ago 40 men for the Japanese football team were selected and started training.

Count Michimasa Soyeshima, member of the International Olympic committee, said Japan might bid for the 1948 games.

"I hope Japan can bid then," he said. "Apparently it is impossible to bid even for the 1944 games. The cancellation was inevitable under the present circumstances."

It was expected the international committee would meet soon to determine the next move. London and Helsinki, Finland, were mentioned as possible sites for the 1940 games.

Senator Thomas Wins

VICTORY of Senator Elmer Thomas of Oklahoma in his fight for renomination by the Democrats was hailed by the New Dealers as a

direct result of the campaign speaking tour of President Roosevelt. The President told the Oklahomans what a help the senator had been to him and how much he had done for the state; and he gave some swipes to Thomas' rivals, Governor Sen. Thomas Marland and Representative Gomer Smith. So the Oklahomans picked Thomas by a good majority. For governor they named Leon C. Phillips, much to the disappointment of Alfalfa Bill Murray.

In the course of his trip across the country, Mr. Roosevelt, in his capacity of head of the Democratic party, first boosted the cause of Senator Barkley of Kentucky, his staunch supporter, and cleverly avoided hitting too hard at Governor Happy Chandler, who seeks Barkley's seat.

In Arkansas Mr. Roosevelt found time to say kind words about Senator Hattie Caraway.

Passing through Colorado and Nevada, he avoided politics in his talks, for Senators Alva Adams and Pat McCarran, both of whom he opposed, are mighty strong in their states. Both of them boarded his train but their reception was decidedly cool. The President delivered the only set speech on his program at the San Francisco world's fair administration building. He then reviewed the United States battle fleet of 66 vessels, and spent several hours aboard the cruiser Houston. Next day he spent in Yosemite National park.

After three days in California the President boarded the Houston at San Diego and went to the Galapagos islands for some fishing. Thence he was to pass through the Panama canal and come back home by way of the southeastern states.

Van Nuys Nominated

OPONENTS of Senator Frederick Van Nuys of Indiana accepted defeat with wry faces. They had intended that he should be "purged" for his fights against New Deal measures, but realized his threatened independent candidacy would split the party in the state wide open, and also would injure the presidential aspirations of Paul V. McNutt. So Governor Townsend invited the senator to present his name to the state convention, and other candidates withdrew.

Van Nuys was then perfunctorily renominated without anyone saying a good thing about him.

English Trial of the Pyx Finds No Error in Coinage

Great Britain's strangest trial—the Trial of the Pyx—has ended with a favorable verdict from a jury of 15 men of the Goldsmiths' Company, which since the time of Edward I has tested the country's coinage for weight and purity.

In the 12th century coins were made by private companies who were known to mutilate them to their own advantage. Nowadays the

Wheat Loan Basis

SECRETARY WALLACE announced the government loans to wheat raisers. They will average 59 to 60 cents a bushel. Only farmers cooperating in AAA crop control who have not exceeded their soil depleting acreage allotment by more than 5 per cent will be eligible to the loans for which the RFC has provided 100 million dollars.

Under the loan plan the wheat farmer stands to win much and to lose nothing. If he is able to sell his wheat eventually for more than the loan, he will sell and pay off the loan.

If the farmer is unable to get more for his wheat than the loan rate he can default payment of the loan and let the government take his wheat.

PWA Aid 'Conditional'

PUBLIC Works administration, of which Harold Ickes is head, withdrew the outright allotments of about \$10,000,000 for power projects that would have competed with privately owned facilities and substituted "conditional" loans and grants for 21 of the projects.

This action followed upon publication of the fact that the PWA had approved loans and grants totaling \$55,000,000 for 54 duplicating public power plants and that the private companies affected had not been given opportunity to sell their plants at a reasonable price.

New Air Board Meets

MEMBERS of the new Civil Aeronautics authority got together in Washington and prepared to take up their work. Edward J. Noble presided as chairman. Other members are: Harlie Branch, second assistant postmaster general, vice chairman; G. Grant Mason, Pan-American Airways official; Robert Hinckley, WPA director for far western states; and Oswald Ryan of Anderson, Ind., general counsel for the federal power commission.

Clinton M. Hester, assistant treasury general counsel, has been assigned the independent administrative position. He is responsible to the President. The board is responsible to congress.

Du Pont and Raskob Hit

THE United States board of tax appeals ruled that Pierre S. du Pont and John J. Raskob must pay back federal taxes of upward of \$1,200,000.

The board held that a series of transactions by which DuPont of the Wilmington dynasty, and Raskob, former chairman of the Democratic national committee, sold each other large blocks of stock, could not be considered eligible for purposes of tax reduction.

Raskob's share of the payment will be between \$800,000 and \$900,000, and DuPont's will be at least \$400,000.

Canton Bombed Again

BOMBING of Canton, great South China port, was resumed by the Japanese airmen, and in three successive days hundreds of civilians were killed by the warplanes. Unaccounted numbers were driven to abandon their homes.

In one of the boldest moves in the war, powerful Chinese guerrilla contingents landed secretly on Nanshan island, off Swatow. They claimed to have recaptured a considerable part of the island which had been taken by the Japanese.

Justice Cardozo Dies

BENJAMIN N. CARDOZO, associate justice of the United States Supreme court, died at Port Chester, N. Y., of a chronic heart ailment that had kept him from work on the bench since last December. He was sixty-eight years old. Descended from Spanish Jews who came to America in 1750, he was born in New York city and educated at Columbia university. He was appointed to the Supreme court by President Hoover in 1932 and lined up with the liberal minority. His scholarship and hard work won the highest respect. Chief Justice Hughes, informed of Cardozo's death in Italy said: "It is an irreparable loss to the court and the nation. He was a jurist of the highest rank and noble spirit."

Probably President Roosevelt will not appoint Cardozo's successor before fall, for the court is in recess until October. But speculation as to his choice began immediately. The name most frequently heard in the discussions in Washington was that of Sen. Robert Wagner of New York, one of the President's chief lieutenants in the field of social legislation. Other New Yorkers mentioned are Ferdinand Pecora and Samuel Rosenman, state Supreme court justices, and Solicitor General Robert H. Jackson. The Far West is not now represented on the court.

After three days in California the President boarded the Houston at San Diego and went to the Galapagos islands for some fishing. Thence he was to pass through the Panama canal and come back home by way of the southeastern states.

By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

WASHINGTON.—President Roosevelt addressed a letter to Chairman Stuart Rice of the central statistical board the other day, in which he asked in effect why there is need for so many "official reports" from individuals and corporations engaged in business. The President's letter indicated a feeling that, if there are so many reports as complaints have disclosed, something ought to be done about it.

It is now Mr. Rice's job to find out when and where, and why concerning these floods of reports which government demands. But how about me finding out, too, I thought! I started on the job like a bird dog through the bush. It did not take long for me to realize that I had set myself to a task that is likely to occupy Mr. Rice and his staff of several hundred perhaps a year to assemble an answer. I learned a lot of things, however, and that is the reason I am writing about "official reports" at this time.

Speaking generally, at first, I can say that never in all history has there existed a condition such as business men and women now face, and of course, within the last few years farmers have had to make out reports, too. The reason for the statement that the condition is worse now is that the situation represents a growth. Year after year, generation after generation, succeeding Presidents and succeeding congresses have added to the functions of the national government.

Government has gone into new fields, taken on new obligations, new commitments, increased its scope of regulation of this and that and the other. As these functions have increased, more and more reports have been ordered and required; more facts have been needed, and, in addition, bureaucrats have relegated to themselves additional and unanticipated powers. Now, what we have is a tangled mess, a slimy octopus whose tentacles reach into every corner and nook and cranny of the nation.

Before considering some of the horrible details (which are horrible only because they are so general in application), it seems to me we can well consider who is responsible. I mentioned above how succeeding Presidents and congresses have expanded the functions of government. Those Presidents and members of the congresses were elected by the voters. The campaigns, in nearly every instance, included a rearranging for establishment of some new agency, passage of some law to drive money changers out of the temple; to prevent grinding the little fellow, the poor, into the earth; to regulate monopolistic business; to care for the aged after a new law of useful work had been spent; to collect new taxes here and there to assure the agricultural community a parity price for its products; a thousand and one things were campaigned for or against. So the people voted and elected a President or a senator or a representative. They also elected a governor and the various officials of their state wherein a legislature operated as does congress for the country.

It has not mattered, therefore, whether there has been a Democrat or a Republican in the White House, except in the matter of degree to which the new laws have been enacted. The growth has gone on just the same. Every time a politician conceived an idea to get votes, he campaigned on it—and a new law resulted. With the new law came another deluge of "official reports."

In a general way, therefore, the voters must accept some responsibility. But the chief responsibility must rest with members of the house and senate and the various Presidents who have served in their turn. Why? Because no one can be expected to understand fully this gigantic machine called government unless that person has had an opportunity to study the machine. The layman has not had that chance. Presidents and congresses have had the chance.

To get down to the details; that is, to relate some of the incidents which had become known to the President and which resulted in his letter to Mr. Rice, we might begin with taxes. The head of a dairy company which operates in three states reported to his stockholders lately that in one year his firm had been compelled to make and file a total of 11,119 separate tax reports. That company maintained a staff for the sole purpose of handling the various reports that had to go to the federal government, the governments of the states in which the company operated and the cities where milk and dairy products were sold. Having such a staff, the company knew exactly what it cost—\$265,000 a year. It should be added that the cost of these reports necessarily became a part of the company's overhead and the overhead ex-

pendence enters directly into the cost of the dairy products for which the consumer pays. It could easily result in an increase of one cent per bottle for the milk served to its customers.

It takes no stretch of the imagination to conceive what the cost is for a large corporation to handle its official reports to various agencies of the national, state and local governments if that corporation operates say, over half of the United States. The expense runs into millions upon millions of dollars annually. Who pays? You and I, the consumers.

I have not had access to all of the records required by the department of agriculture because many of them are confidential, but I believe it is safe to say that some fifty-odd reports have to be made respecting every farmer who has signed up in compliance with the crop control laws and the land conservation program. I think the farmer directly involved has from eight to ten of these reports and official documents; the county committee which inspects and reports on him has others; the county agent has still more reports to make—all still involving this one farmer but including others as well—and these are followed by regional and national reports until all totals are entered here in Washington.

Or, at the risk of being too personal in dealing with a national problem, I might cite my own experience. Mine is what is called a one-man office. That is to say, with the aid of a secretary, I must run my own little business. But even as inconsequential as that office is, consider this situation: I must file an income tax return annually. That return must include an extra statement which covers a general outline of my meager income and the expenses of my office. I must pay ten dollars a year for a "license" which gives me the privilege of writing to earn my living, but I must file a report before I get that license in the District of Columbia. Twice a year, I must file a report of my gross return from my work in the District of Columbia—and pay a tax on that income. Each month, I have to file a report to the District of Columbia employment board, showing how much I pay my secretary, how many hours a week she works and pay a tax which theoretically is saved up and paid to her in case she is unemployed. Each month, also, I am required to file a report with the United States social security board, giving the same information—and pay another unemployment tax. And each three months, I am required to file another report with the social security board which seems to be a report showing that the monthly reports are correct.

What's The Use?

It has been my good fortune to have gained a legal education by the virtue of four long years of night school, so I have not had to hire a lawyer to help me with my reports. They have been comparatively simple, generally. But that is not the case with a larger business.

Lawyers, however, would be no help in the circumstance that I am now about to relate. A young lady who had served as my secretary several years left my service. When I filed the last monthly report for her name and paid the tax, I attached a letter explaining that she was leaving and that there would be no further reports in her name as I was concerned. The letter was written in the hope that the file would be complete.

This incident happened last October. In March, 1938, I received a notice from the board, advising me that I had not paid the tax on the salary of the lady in question for the month of February, 1938. Not a word about the other months from October to February. And if I didn't pay, said the notice, there were penalties, court proceedings, etc. Yes, you guessed it! I threw that notice into the waste basket. Two months later, I had the honor to be visited by an inspector. He was courteous and gentlemanly, but firm. I must pay the tax—not for February, but for December. You can let your own imagination run high, wide and handsome about the results of that visit.

Well, I merely bring out those facts because they show the need for the voters of the country to take some action on their own and quit following blindly the demagoguery of the politicians.

Previously in this column I have written about several corporations which, after filing several thousand reports, have had inspectors visit them to see whether they were complying with the law. Since that time, one of the business men about whom I wrote originally has told me that other inspectors have come to see whether the first crew had complied with the law in making investigations.

Provisions for CCC Boys
Cost 45 Millions a Year
WASHINGTON.—Contracts for the purchase of approximately 45 million dollars worth of foodstuffs for the Civilian Conservation corps, will be awarded in the fiscal year which began July 1, Robert Fehner, director of the Civilian Conservation corps, has announced.

At its present authorized strength of 300,000 men, the CCC consumes more than one and one-half million pounds of food each day in accordance with the 5.12 pounds of food for each man each day prescribed by the United States Army garrison.

The quartermaster corps estimates 11,406 freight cars, each containing approximately 48,000 pounds of foodstuffs, will be needed during the year to supply the 1,500 CCC kitchens with meats, groceries, fresh vegetables and other supplies to satisfy the appetites of members of the CCC.

FARM TOPICS
CAN NOW MAKE HAY IN RAINY WEATHER
Modern Methods Are Used In Making Green Silage.

By Clarence H. Parsons, Superintendent Massachusetts State College Farm, WNU Service.

How to make hay in rainy weather is a trick that has been solved on many dairy farms during the past few years. Modern methods of making green grass silage have done away with the need for long curing in the field, and the resulting product is high in valuable food elements and appetizing to the cows.

Dairymen have been experimenting with this new method of making grass and clover silage for several years and the state college has also given it extensive trials. Up to the present time, corn has been the standard silage crop of the Northeast, but on many farms grass silage is easier to grow, the yields are as high as those of silage corn, and protein content of the resulting silage is higher than that of corn silage.

Grasses and clover are low in sugar content and for this reason it was difficult to bring about desirable fermentation in the silo until investigators found that the addition of cheap molasses brought about this result. The molasses is added to the grass and clover as it is fed into the cutter. On the college farm 40 to 60 pounds of molasses are added to each ton of grass. Where alfalfa is put up about 75 pounds of molasses to the ton is used. Silage put up in this manner last year came out of the silo sweet and in excellent condition, and the herd responded favorably to it.

Grass silage is best when the crop is cut in a young and tender stage. If it becomes mature and woody, it makes poor silage.

Feed Hoppers Are Urged For the Young Pullets

Healthy growing pullets require large quantities of feed, and the best growth can be made only when the birds have free and continued access to the feed. For this reason, advises a writer in the Montreal Herald, we recommend at least three 5-foot mash hoppers 4 to 5 inches deep, feeding from both sides, for each 100 birds during the early part of the summer. These hoppers should be filled daily with fresh mash, and should never stand empty. On the other hand, if they are filled too full there may be a waste of mash. To overcome this difficulty a strip of lath may be nailed along the top of the outer edge, so as to form a lip and prevent spilling.

To prevent soiling the feed, a revolving pole or reel of laths is fastened just above the level of the feed and secured to the raised ends of the hopper. For outdoor feeding, much labor can be saved by using large weatherproof, self-feeding hoppers. These are built with a solid roof or lid covered with tarpaper, which extends out beyond the feed trough on each side of the reservoir, and thus protects it from rain. These feeders may hold 100 to 200 pounds of mash, and thus require little attention in filling. A pullet will eat about 20 to 25 pounds of feed from the age of six weeks up to maturity.

Gasoline, Kerosene Dangers
Gasoline and kerosene fires cause a loss of approximately \$6,000,000 a year on the farms of the United States, according to the bureau of chemistry and soils of the United States Department of Agriculture. They are sixth among the causes of farm fires and are responsible for 5 to 7 per cent of the total loss each year. Ignorance and disregard of the explosion hazard of gasoline and kerosene are responsible for most of these fires, says a bulletin.

Vapor of gasoline is so highly explosive that it has been called "liquid dynamite." It is dangerous to use gasoline for dry cleaning in the home. It may explode from even a tiny spark of static electricity produced by rubbing the clothing being cleaned. Although not so inflammable as gasoline, kerosene also gives off vapors which may be easily ignited. Neither should be used to start a fire in the house.

Farm and Feed Lot
Matured sugar cane contains 13 per cent sugar.

In hot weather the hens need plenty of water, often renewed.

Soils become acid because the lime is used by crops and carried away in drainage water.

Legume hay and legume pasture are fine for growing colts. These nutritious roughages make it unnecessary to feed grain to colts.

Legume hay as part of the roughage helps to keep horses in good health and flesh, says E. T. Robbins, live stock extension specialist, College of Agriculture, University of Illinois.

Although 140 varieties of 48 breeds of chickens are recognized as standard varieties by the American Poultry association, less than 10 varieties are of commercial importance in producing eggs and meat.

Poultrymen at the government station, Beltsville, Md., are attempting to develop an ideal turkey. The bird will be white, have a short compact body, short legs, a long keel bone, plenty of meat, especially on the breast, and will mature in 24 weeks or less.

NEW YORK.—Several years ago Romain

AMAZING CASEIN

By JOSEPH W. LaBINE

you pick up that fountain pen to write a letter tonight, probably touch casein. If you're a billiards enthusiast, the ball you play with is probably casein. Moreover, casein is responsible for the sick finish of the paper in your favorite magazine.

Amazing casein really isn't an amazing thing. To the average American it's simply milk curd, a by-product of the milk which men have often discarded as valueless. But a few years ago smart scientists began seeking commercial uses for it; their experiments to date make casein a material of great importance.

Look up casein in the dictionary and you will probably find it's an organic compound of albumin, found in all kinds of animal products. It's 3 per cent and it separates from the milk as curd, which is usually used for cheese. And cheese is made from skimmed milk, which is nearly pure casein.

Believe that man who says casein and fountain pens are made of the same material. It's only part of the story. Making wool cloth out of casein is a conquest in the chemical industry. The production of artificial wool from cow's milk has been the experimental work of the rayon plant at Milan, Italy, for the production of artificial fabric on a commercial scale.

Man Copies Nature. The production of artificial wool is a process which has been made from milk. But it is not a reflection of the natural process that depends for its sustenance upon its mother ewe, steadily producing the wool which she sheds from its mother's body.

Scientists who perfected the process have only been attempting to imitate a process which nature has been carrying on for millions of years. They've found that goat's milk, sheep's milk and no doubt other milks, are equally good for making wool fabric. The process has been perfected to such an extent that the final product gives a result very similar to the actual natural wool, and to the touch.

Development is remarkably rapid, but it need not cause alarm among sheep raisers to quake in their boots. Although science has found a way to speed up the wool production process, the method will be complicated. Yet its success is equal to that of rayon, another synthetic fabric which has assumed a prominent position during the past few years.

Wool cloth made from casein comes in all colors and in different weights, and is just as expensive as ordinary wool. It has an advantage over wool in that it does not shrink. For this reason Italy is producing it into soldier's uniforms, and for other uses.

Modern models in Italy show the latest styles in this new cloth. A shop window filled with these gay outing sweaters and suits, all made from cow's milk, will convince against any previous convictions that such a thing is possible.

His views on the last drop. Modern dairyman wastes little from each gallon of milk delivered to the door. At the wool plant, for example, the butter is separated from the milk, and one of the by-products of wool manufacture is a neutralized by-product; its value is about 10 cents per gallon. Each 20 gallons of milk yields about 10 pounds of butter and 10 pounds of casein. In manufacture, dry casein product weighs approximately its own weight.

A few days ago the above frock looked very much like 63 quarts of cow's milk; in fact, it was just that. Today it's a complete knitted wool dress in plain brown color. Very chic, what?

The skimmed milk then passes into a curdling boiler where it is treated by special chemical products so that there is a coagulation of the casein which is found in suspension in the milk. The casein thus collected is sent into the press filter where the whey is eliminated.

The masses of casein are sent to the curdling boiler to be washed. The product is then dried and ground. In the mixer the casein undergoes a dissolving process with chemical reagents and is sent on to the maturing and filtering tanks. Through the spinning machine the casein now takes on the consistency of filaments which are first cut, then washed, then dried. The raw material is then finished and ready for that first transformation which is common to all fibers.

Several years ago, Leo Rolland, a Swiss scientist, was the first to produce artificial wool. He was a pioneer in the field, and his work laid the foundation for the modern industry. His experiments were conducted in Switzerland, and he was the first to produce a material that could be used as a substitute for natural wool.

Each year, the industry produces millions of pounds of artificial wool. This material is used in a wide variety of applications, from clothing to home textiles. Its properties are very similar to those of natural wool, making it a valuable alternative.

Today, the industry is growing rapidly. New technologies are being developed to improve the quality and variety of artificial wool. This will ensure its continued success in the future.

of finished artificial wool in the Snia-Viscosa plant, uncannily resembling natural sheep's wool.

FINNEY OF THE FORCE

By Ted O'Loughlin

AN INTERLOPER

"Drat Jack Spider, here he's gone and put his home right in my doorway."

Other Viewpoint
"I know I'm a little irritable, John, but if I had to live my life over again I'd marry you just the same."
John—"H'm, I have my doubts about that!"

So What's the Use?
"I say, waiter, the flowers on this table are artificial, aren't they?"
"Yes, sir. That's the worst of running a vegetarian restaurant—if we use real flowers, the customers eat them."

Gave It Up

Revivalist—My son, when that great day comes, where will we find you, with the sheep or the goats?
Small Boy—Jiggered if I know. Ma, says I'm her "little lamb" and pa calls me "the kid," so I guess I'll have to give it up.

Tit for Tat
Mother—Jack, if you don't stop running around the house you'll get hurt.
Jack—If I stop I'll get hurt anyway. Dad's after me with a shingle.

Everybody's Heard It
Into the office the other day shuffled an aspiring author. "Sorry," said the editor, "but I only take fiction from people with well known names."
"That's swell!" exclaimed the tyro. "Mine's Jones."

First Aid
Mr. Newlywed—This meat tastes funny.
Mrs. Newlywed—Well, you see, dear, it got burnt, so I put a little ointment on it.

PLENTY MISSING

"There goes a fellow who has more money than brains."
"Why I heard he was nearly bankrupt."

A Monolog
"Oh, Mummy," said wee Annie, "look at that funny man across the street."
"What is he doing?"
"He's sitting on the sidewalk talking to a banana skin."

Special Treatment
Tramp—I say, sir, could you give me a job?
Barber—Well, sure. Here, paint this barber pole.
Tramp—O. K., boss, where do I get the striped paint?

Add Radiant Beauty to Your Bedroom

There's grace and beauty in every detail of this cross-stitch motif which you will enjoy embroidering on a bedspread—it's quickly done and so decorative when finished. The bluebirds are in ten-to-the-inch crosses, the greater part of the rest of the design is in five-to-the-inch crosses. Motifs to match make a lovely bolster or scarf. In pattern 5940 you will find a transfer pattern of a motif 15 1/2 by 20 inches, one reverse motif 5 1/2 by 5 1/2 inches and one motif 4 1/2 by 5 1/2 inches; a color chart and key; material requirements; illustrations of all stitches used. To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. Fourteenth St., New York City. Please write your name, address and pattern number plainly.

AROUND THE HOUSE

Tickless Time.—Does the ticking of the clock annoy you? Cover the clock with a glass bowl. You can still read the time but you won't hear the buzzing or ticking.

Wrap Meats to Store.—Research shows that cooked meat stored in a refrigerator loses the least weight when wrapped in paraffin paper or stored in a covered container.

Help Children Help Selves.—Buttons on small children's clothing should be from 3/4 to 1 1/4 inches in diameter so that the child can easily button his own clothes.

Dull-Bottomed Pans.—Save heat and money by using pots and pans with black or satin-finished bottoms, which absorb heat more evenly and rapidly than those with shiny bottoms.

"Pre-Shrunk" Goods.—The label "pre-shrunk" does not necessarily guarantee that the garment will not shrink any further; it merely states that some shrinking has taken place.

Flush-Type Molding.—By using flush-type steel or wood moldings dust-catching corners may be eliminated and the housework made easier and more thorough.

Handy Stool.—A folding camp stool makes an excellent luggage rack for tourist homes and saves bedspreads and upholstered chairs from dusty bags.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 38 to 42), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizzy spells, upset nerves and moody spells. Get more fresh air, sleep deep and if you need a good general system tonic take Lydia E. Pinkett's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist eating, jittery nerves and disturbing symptoms that often accompany change of life. WELL WORTH TRYING!

KILL ALL FLIES DAISY FLY KILLER

WNU-S 29-38

HELP KIDNEYS To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress. Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feet weak, nervous; all played out. In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multitude of grateful people recommend Doan's. Ask your neighbor!

**State Ranger Locates
At Mauthe Lake Park**

A. E. Rief, state forest superintendent, has established temporary office headquarters at the Kettle Moraine state forest ranger post at Mauthe lake, located several miles northeast of Kewaskum in the town of Auburn.

Mr. Rief, who is making his home at West Bend, and who will stay at Mauthe lake for an undetermined period, has charge of several state forests in the southern half of the state.

With recreation fields, camp stoves, a barn for shelter for overnight campers and other facilities completed, park officials report that the popularity of the Kettle Moraine forest section is growing each week.

Fishing in the lake is prohibited because the waters constitute a state refuge, but a sandy beach provides excellent bathing and vacationers may fish in nearby lakes.

Clearing underbrush, improving roads and other improvements at the park are going forward under a WPA project which was sponsored by the state conservation department. Many of those employed on the project are residents of Fond du Lac and are taken to the lake each day.

**DEATH OF CHAS. THORNTON
TAKES PLACE AT HOSPITAL**

Charles M. Thornton, 52, a resident of the vicinity of Campbellsport and Fond du Lac county since early manhood, died at 4:30 p. m. Wednesday, July 13, at St. Agnes hospital, Fond du Lac, where he was removed for treatment three months ago. Prior to entering the hospital, he had resided at the home of his nephew, Ernest Odekirk, Route 1, Campbellsport.

He was born Jan. 17, 1856 in Ionia county, Mich. Surviving are a sister, Mrs. Sarah Kuter of Wisconsin Rapids and a brother, George Thornton of St. Ren, Wis.

Funeral services were held at 2 p. m. Saturday, July 16, from the George M. Dugan funeral home, Fond du Lac, where the body lay in state. L. P. Peeke officiated. Burial was in the New Prospect cemetery. Pallbearers were Louis Buslaff, Herman Bartell, Frank Burnett, John Burns, D. F. Smith and Ervin Prindle.

**RITE FOR DOCTOR HENRY
SALTER OF CASCADE HELD**

Funeral services for the late Dr. Henry G. Salter, well known Cascade resident, who passed away suddenly at his home in that village at 6:30 p. m. Friday, July 15, were conducted Monday afternoon, July 18, at 1:30 o'clock at Plymouth. Burial was in Woodlawn cemetery, Cascade.

Dr. Salter was born April 10, 1882 in Hayton, Wis. He graduated from what is now Marquette university in 1909 and shortly after settled in Cascade, where he had since resided. His marriage to Miss Gladys Peterson took place Aug. 17, 1912.

He is survived by his wife; two daughters, Mrs. Bernard Butler of Crystal Lake and Miss Mae Salter at home; three sisters and three brothers.

ELMORE

Miss Inez Kleinhaus of West Bend is visiting relatives here.

Mrs. Othilia Weis, who has been visiting here, has returned to Chicago.

Mr. and Mrs. Gregor Weis and family spent Sunday at the Barthol Thill home at Ashford.

Mr. and Mrs. Tony Schaefer of Milwaukee spent Sunday evening with Mr. and Mrs. Al Struebing.

Mr. and Mrs. Harvey Schaefer and children spent Sunday at the Gertrude White home at Dundee.

Mr. and Mrs. Robert Nelson and daughter Roberta of Oostburg spent the week end at the Al. Schmitt home.

Mr. and Mrs. Justin De Voy and sons, Charles and Donald of Reseville were week end guests of Mr. and Mrs. Wm. Mathieu.

Mrs. Burr Knickel spent Sunday at Camp Byron. She was accompanied home by her daughter, Madge, who spent the past week there.

ANNOUNCEMENT

To the voters of Washington county, I respectfully announce that I will be a candidate on the Democratic ticket for re-election as your Assen. hlyman.
7-15-2 Attorney Henry O. Schowalter

FARM AND HOME LINES

The Wisconsin Cooperative Wool Growers' Association expects to handle about three quarters of a million pounds of wool this year. On July 1 their wool receipts were running 10 per cent ahead of last year and the tonnage received had already exceeded the total of 1937 by more than 50,000 pounds.

There continues to be a definite movement of persons from farms to villages, towns, and cities, but apparently this is more than offset by the surplus of births over deaths in the farm population.

Prospects for fruit crops indicate a somewhat lower production than the large output of last year. Supplies of vegetables vary considerably, but the production is expected to be about equal to that of a year ago.

NOW IS THE TIME TO SUBSCRIBE FOR THE KEWASKUM STATESMAN.

**SOUTH ELMORE
Twenty-five Years Ago**

Harold Faber is visiting relatives at Milwaukee. Ed. Scheid was a business caller at Milwaukee Friday. Mr. and Mrs. John Jung and daughter Stella spent Sunday at Milwaukee. Mr. and Mrs. Chris. Gently attended the Gently family reunion at West Bend Sunday.

Heads G.O.P. Publicity

WASHINGTON, July 15.—Franklyn Waltham Jr., former political columnist, was appointed Director of Publicity for the Republican National Committee. In his new job, Waltham has as his opponent, Chas. Michelson, the Democratic Publicity mentor.

WASHINGTON

Unusually favorable growing conditions have existed this spring both in Wisconsin and the United States. Crop prospects in general are probably the best since 1929.

The House of Hazards By Mac Arthur

MR. HAZARD SAYS HE'S VERY SORRY BUT YOU'LL HAVE TO WAIT TO SEE HIM... WOULD YOU CARE TO READ WHILE YOU'RE WAITING?

HO HUM ... I GUESS I'VE KEPT HIM SITTING OUT THERE LONG ENOUGH TO CREATE QUITE AN IMPRESSION.

WELL, WELL, MR. SLY, I'M SO SORRY TO HAVE KEPT YOU WAITING—HEH HEH! I SEE YOU'VE BEGUN READING THAT POPULAR BOOK TOO...

IT'S A GREAT STORY, BUT SUCH A LONG ONE FOR BUSY MEN LIKE OURSELVES, IF YOU KNOW WHAT I MEAN.

YES... IT'S OVER 1000 PAGES...

BUT—I MANAGED TO FINISH IT WHILE I WAITED FOR YOU MR. HAZARD... IF YOU KNOW WHAT I MEAN?

LAKE FIFTEEN

Mr. and Mrs. Walter Gatzke entertained company from West Bend Sunday.

Miss Jeanne Molkenhine of Milwaukee is spending her summer vacation with Mr. and Mrs. William Wunder.

Mr. and Mrs. Wm. Witzel of Plymouth, Mr. and Mrs. Joe Wunder, son Edward and
