#### BRANDON TRAMPLES HIGHS

In the first home game Thursday afternoon of this week Kewaskum was trounced by a surprisingly strong Brandon squad, 45 to 18. Kev santin fought hard but couldn't get rolling. The game was closer than the score indicates. Several long runs accounted for the score being run up. Lineups and statistics will be published next week. In one other game Thursday Campbellsport won its second game. defeating Lomira, 58-18. The N. Fondy-Oakfield tussle is being played today. This week's games were scheduled for Friday but some players and pupils are attending the annual stock judging show in Madison. Kewaskum's next game will be at Lomira Oct 11.

squad in their initial battle. Coach Humphrey used 23 players against the locals. Kewaskum lost most of its regular stars of the touch game last year through graduation.

North Fondy ran up 22 points in the opening quarter while Kewaskum was held scoreless. The Rails ran their score up with apparent ease in the remaining three quarters while Kewaskum was making a single touchdown in each of the second, third and fourth quarters. In other games Campbellsport beat Brandon, 34 to 27, after trailing 19 to 0 at the half and Oakfield had no trouble defeating a weak Lomira squad, 19 to 0.

Corner Whatnot Made of Spools

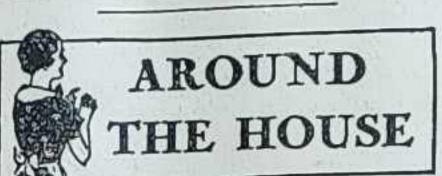

By RUTH WYETH SPEARS A HOME Demonstration Agent wrote me the other day to say that many of the women in her group had made the spool shelves described in SEWING BOOK 3 and the end tables of spools in Book 5. "One member has an interesting collection of pitchers and would like to make a corner whatnot for

them," the letter continued. Well, here it is ladies! With the collection of pitchers all in place. The sketch gives all dimensions and instructions. The triangle shelves are cut from one board as shown at the left. The second shelf from the bottom needs six holes. All the others have three holes each. The design may be varied by using larger spools at the bottom for the first spool above and below each shelf. Use extension curtain rods to fit the holes in the spools. A little glue between spools makes the whatnot rigid. When finished, it may be stained or painted.

NOTE: These homemaking booklets are all directions fully illustrated. They are 10c each to cover cost and mailing. Send

pos Alfredo, wealthy, Spanish owner of a Sierra Indians. One day after he the pearby mission for his wife and famand are carried away to the hills routhful Henry Bowle, a Texas adwith his friends, Ben Pardalor momile, an Indian scout, sight the party ance of a friendly Spanish family at L Ranche Guadalupe.

#### CHAPTER VI-Continued

"You must have dry clothing." and let me be your servant. My say, as he was best able, that he dothes are not big enough. But mr uncle, he is a big one, like you.

An Indian boy was dispatched with message to Don Ramon. He was eren back, bringing a coat, two chirts, trousers, stockings and boots for Bowie.

In vain the Texan protested. Don prancisco had a persuasive way-he bughed away one objection after snother with so much good-natured hanter that Bowie found himself clad h Californian accouterments of the head of the house, walking into the his living room where he met the Estradas.

Don Francisco introduced his new acquaintance to his uncle and to his aunt, Dona Maria.

But the uncle, Don Ramon, and the Dona, his wife, called for particplar attention at the hands of their guest. Except for the youthful nephew. Don Ramon Estrada was the ist real Spanish gentleman that the Jexan had met.

While there was nothing of haughtiness in Don Ramon, there was something that called for consideration and respect. His mere presence made itself felt, presenting as t did a certain graciousness of manper tempered by dignity and reserve that put his guest at ease with a mute assurance of welcome.

when

When Bowie had met his host and hostess he felt already at ease, so exquisite was the kindly welcome expressed in their manner. But not until he was presented by Don Francisco, with due formality, to a young lady who now entered the room was the gaunt Texan conscious of a feeling of his own awkwardness and illfitting apparel. She was Senorita Cermen, of the rancho, cousin to Don Francisco.

The young Spaniard did the interpreting and much of the talking. Host and hostess extended repeated Spanish greetings to Bowie which Don Francisco translated. The that when spoken to by her cousin the responded clearly and compos-

# NAIWERSARY

The manufacturers of the amazing Barton Controla Speed Washers, want more people to know about them. They said to us, "Give this handy, wire frame clothes pin bag to every adult person who will call at your store and witness a 3 minute demonstration. FREE; nothing to buy - just tell them to see the demonstration and tell their friends". It's a real good bag, too, and it's yours absolutely free. Just come and get it.

Na Cost . Na Obligation

Because of the generous nature of this free offer, it must necessarily be limited to adults.

#### THE WAR: New Fronts

A united front of Germany, Italy and Japan became a reality as these three nations signed a pact in Berlin in which they proclaimed to the world a new political, economic and military treaty providing for an interchange of assistance in case any other nation enters the European

war. Military experts were quick to say that this pact was aimed at the United States for it is believed by many that this country's policy of aid to Great Britain has disturbed the axis powers and Japan is none too pleased with the friendly American attitude toward China.

as the powers of the "new order" in Europe and Japan is to be the leader of a "new order" in "Greater Asia."

Japan.

#### French Trouble

Battle broke out in two new sectors and France was engaged in both. Technically it is not war. But to the soldiers and sailors killed it made little difference.

Gen. Charles de Gaulle, leader of the "Free French Committee" which, from offices in London, is opposing the Petain cabinet, led an expedition against Dakar, Senegal in French West Africa. Many African states controlled by France already had pledged allegiance to De Gaulle. In Senegal, De Gaulle said, there had been infiltration of Germans and Italians who sought to seize the air station. The air station is important. It is the hopping off place for Brazil, 1,700 miles across the south Atlantic-much closer to Latin America than New | CAMPAIGN: York.

De Gaulle expected quick victory. French warships under his command, however, were beaten off by Petain warships already in the port. try, which was expected to set the But British naval forces backed up | pace for the Republican campaign. the French and a first class battle Everywhere he spoke to great vacation from Saturday noon to ensued. #### DEFENSE:

#### Conscription

Two volumes of rules and regulations which have been compiled during years of study by the army were signed by President Roosevelt to govern the draft of manpower. The regulations cover everything from the physical requirements of enrollees to the amount and type of furniture needed in draft board offices. Whereas the regular army rejects applicants under 64 inches, the draft will accept men of 60 inches. The draftee must have three upper and lower biting teeth that meet and three upper and three lower chewing teeth. Conscripts needing minor dental care will receive it in camp.

#### The Willkie Swing

New Leader

Here is Rep. John W. McCormack of Boston, Mass., just elected to the position of Democratic floor leader of the house of representatives. An ardent New Dealer, he succeeds Rep. Sam Rayburn, recently elevated to speaker of the house, following the death of William B. Bankhead.

#### CENSUS:

#### Smallest Gain

Besides you there are 131,409,880 of us in the United States, as of April 1. You have the word of the United States census bureau for it, and they counted noses. But the rise in population during the last 10

Decline in the birth rate and a Austin, director of the census, viewed the situation with concern, as did students of population trends. Some have figured that by 1970 there will be 150,000,000 in the United States and after that, unless something unforseen occurs, the drift will be downward.

#### RADIO: New Numbers

The Federal Communications commission announced that 777 out of 862 radio stations in the U.S. will change frequencies on or about December 1. The rearrangement The British admitted loss of their | comes through agreement entered seventeenth submarine and on the into by the United States, Cuba, shocking of all, however, was loss Radio receivers of the push button other. areas, FCC officials claim.

In the new setup, United States stations now operating between 740 and 780 kilocycles will move up 10 kilocycles; stations between 790 and 870 will move up 20; stations between 880 and 1,450 will move up 30; clear-channel stations will shift from 1,460-1,490 to 1,500-1,530; local stations now on 1,500 will move down to 1,490. Stations now between 550

and 720 will remain unchanged.

#### PIE IN THE SKY:

But No Automobiles Two years ago, Dr. Robert Ley, head of the German labor front, promised to put an automobile in every worker's garage. Some 200,-000 workers began contributing \$2 weekly toward the \$396 purchase price, which later was raised to \$467. But there will be no automobiles. Both unfinished factories and contributions have been turned over

Ley now is offering a new plan. After the war, he told German workers, wages for 10 years will be divided into "free" and "tied" parts. The "tied" parts will revert to the government and workers will get not only automobiles, but homes and other things the government thinks is good for them. He also said there will be no more forced labor and everyone will have a weekly

#### By CARTER FIELD

(Released by Western Newspaper Union.) WASHINGTON .- The original idea of the Hatch act was magnificent. There can be no doubt about it. All the arguments against it at the time of its passage were lame-obviously so. For example, the plea of Sen. Alben W. Barkley of Kentucky that if federal employees could not be used by federal candidates, whereas state employees were not restrained, it would be tough on the federal candidates!

Barkley was the target of cartoonists and editorial writers all over the country regardless of party. What was bothering the Kentucky senator, of course, was that he was in a tough fight for renomination at | Willkie's Bad Throat the time in the Democratic senatorial primary. His opponent was the then governor of Kentucky, "Happy" A. B. Chandler.

Barkley was renominated and reelected, and Chandler later got into the senate also, following the death of Senator Logan, so that particular

#### 'Necessary Expenditures' Raise Many Questions

For instance, the limitation on the national committee of each party is \$3,000,000 of expenditures. That kie's magic. It is not the big forsounds like a lot of money. It is. But | mal speeches that are broadcast then bobs up the old notion of the politicians that certain expenditures simply must be made.

Literature, for example-pamphlets and leaflets, streamers, windshield stickers and buttons. Does the distribution of any one of these, or all of them, change any votes? Nobody really knows, but the aver- cause of throat trouble, it will be age politician thinks it would be the little rear end of the train simply murder to stop furnishing | speeches that must be sacrificed.

Then there is the question of ad- development, except that for some vertising, not only in regular news- reason none of his friends thought papers, but in magazines, special | Willkie's throat could not stand any programs of groups which think they merit recognition, billboards, street car ads, etc. One of the big committees has not the presidency, and he attempted a years ago.

Incidentally every senator who voted | in a convention hall.

#### HATCH ACT

Carter Field believes that al though the purpose of the Hatch act is "magnificent," the actual legislation is defeating its own purpose. It encourages large expenditures outside provisions of the act which cannot be controlled by the national committees, Field explains. Many persons may joke about Willkie's voice, but Field emphasizes that it may easily prove a great factor in his campaign.

tor James J. McEntee reports.

Care of Idle Heater. UESTION: How can rust be prevented from forming on a fur-

nace during the summer? Answer: Rusting is only one of the troubles that can come to a heater during the idle months; as a matter of fact, one idle season may do more damage to a heater than many seasons of operation. There are several steps in protecting a heater against damage. As soon as the fire goes out, any kind of a heater should be cleaned inside; ashes removed, and dust scraped and brushed from the flues and other inside parts. The inside should then be given a coat of oil. Lubricating oil can be used, but nothing

spread on all inside surfaces. Rusting is due to condensation. To avoid this trouble, it is best to take down the smoke-pipe, to clean it and to store it in a dry place. All doors and openings of the heater should be left standing wide open through the summer. If the smokepipe cannot be taken down, the turndamper should be left in the wideopen position. Edges and hinges of

doors should be oiled. If it is necessary to change the water in a steam or hot water boiler, this should be done in the fall, and at the beginning of the heating sea-When a steam boiler is put out of commission in the spring, the water should be left in, and more added until it is completely filled; this can be done by holding the safety valve open. Radiators and pipes remain empty. A hot water outfit is left filled as it was during the winter. When starting up in the fall, water should be changed only if it Culture wasn't the motive be Hack of a horse! Must be one is noticeably dirty. Otherwise only enough is drawn off from a steam boiler to bring it to the correct level. Outside rust should be taken off with steel wool, and the metal fin-

> phaltum or aluminum paint. Finish for Walls. Question: I have two upstairs bedrooms with smooth plaster walls that were whitewashed several times. I want to put something else on the walls, but how can I get them clean? What can I use for a finish? How can I fill cracks in

ished with high temperature as-

the plaster? Answer: You can take off the whitewash with liberal sponging with warm water. Go over the wall two or three times, squeeze out the sponge, and go over the wall again to pick up the softened whitewash. After cleaning and drying it may be necessary to smooth the wall with fine sandpaper. Cracks should be filled with patching plaster, to be had at a hardware or paint store. Directions for use are on the label. In refinishing the walls you can use a cold water paint which is washable when dry. It comes in the form of a paste, to be thinned with water.

Radiator Finish. Question: My radiators are now finished with bronze and silver paint. Before I refinish them with oil paint, must this bronze paint be removed? What should I use for repainting?

Answer: Go over the radiators with a wire brush to take off all sugar, salt, butter, cherries, and loose particles. Silver and bronze cherry juice; let stand about 15 minpaint that resists can remain; the utes. Line a 9-inch pie plate with new paint can go on over it. After half of pastry rolled 1/8 inch thick, brushing, radiators should be wiped allowing pastry to extend 1 inch bewith turpentine or benzine to re- yound edge of plate. Fold edge back move all traces of grease. (Be care- to form rim. Fill with cherry mixful of fire!) At a paint store you may ture. Moisten edge of pastry with be able to get a special kind of cold water; arrange lattice of pastry paint intended for radiators, or you strips across top. Flute rim with can use top quality flat wall paint fingers. Bake in a hot oven (450 thinned with 1/8 as much turpentine | degrees) 15 minutes, then decrease and put on in two or three thin heat to moderate (350 degrees) and coats. Radiators should be cold bake 30 minutes longer. when they are painted, and should remain so until the paint has dried.

Slow Drainage. Question: Water in a second floor sink runs out very slowly. This is not due to a sluggish drain, for the pipes have been cleaned out several times without benefit. Could air

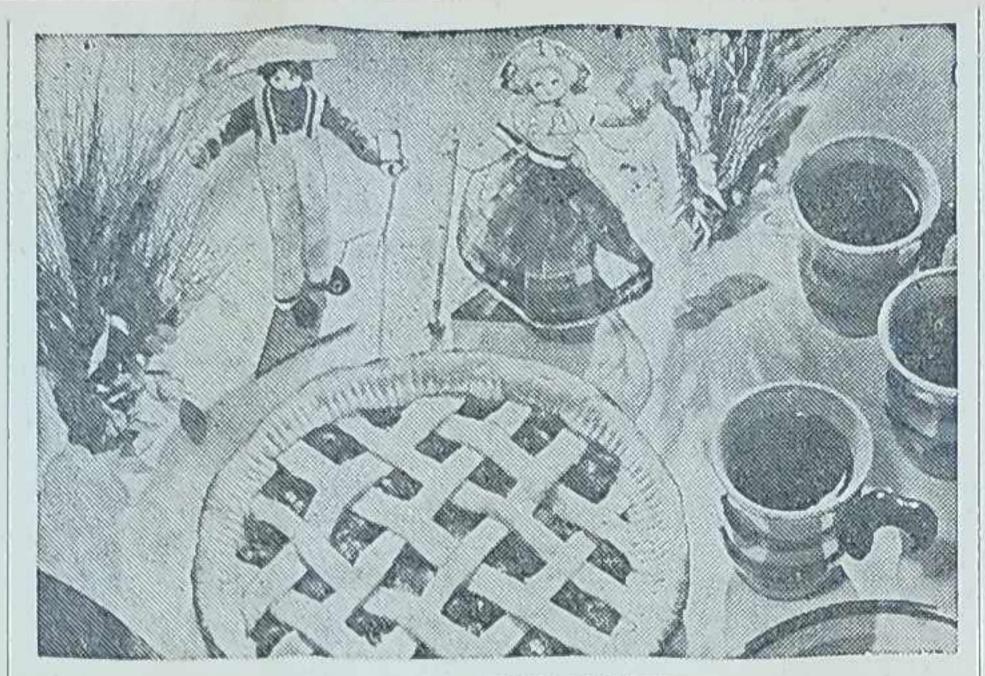

be holding up the drainage? Answer: Slow drainage would not be from air, but from an obstruction in the pipe. As ordinary methods of cleaning have not helped matters, you must look for some other obstruction; possibly a faulty connection.

Kitchen Sewage. Question: A correspondent asks about filling a pit 5 feet long, 4 feet wide and 3 feet deep with small and medium sized stones. Into this pit he intends to empty the kitchen waste. Answer: The pit would quickly clog up with grease and refuse. He will do much better by building a cesspool. Complete instructions on building cesspools are contained in a government bulletin, No. 1227, on "Sewage and Sewerage of Farm Homes." Send five cents in coin to

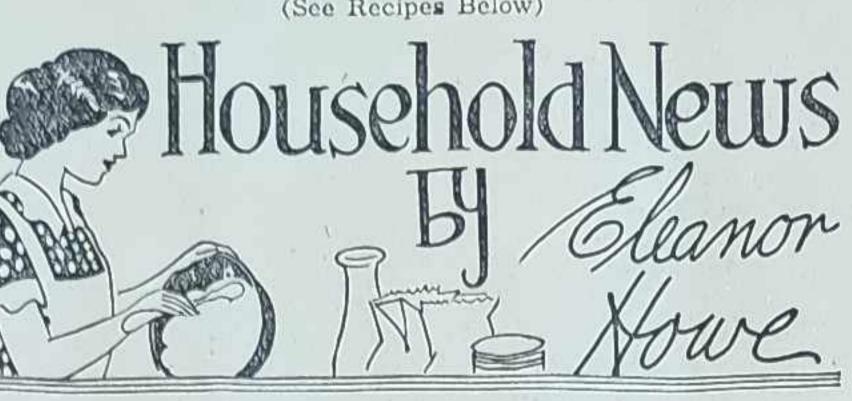

the Superintendent of Documents, Washington, D. C. Dog Deterrent. Question: What liquid will prevent dogs from getting too close to plants? Would it be effective on corners of walls and basement window

Answer: The liquid is a solution of nicotine sulphate in water, as is used for an insecticide on plants. A strong solution would be effective for stone, brick and woodwork. (Harmless to dogs.) Seed stores have ready prepared products for the same purpose. Clothes Closet.

Question: I should like to make a clothes storage closet in my unfin-With more than 11,000 miles of ished attic; using a rigid insulating hazard, but I should use more than a single thickness of insulation board. Cover the door of the closet with insulation, as well as making it air-

Rest in Bed Important in Influenza Cure

By DR. JAMES W. BARTON (Released by Western Newspaper Union.) URING the 1918 and 1919

'flu epidemic I happened to be senior medical officer of a large military hospital and was in a position to watch the effect | TODAY'S of different types

of treatment—the use of fever-re- COLUMN

ducing drugs, the use of various heart stimulants, the effect of getting patients to bed the first day of the attack (and also three or four days after the attack first occurred), the effect of removing blood from patients who had recovered and injecting it into others, particularly those with a high temperature or where there was a complication of bronchopneumonia or pneumonia.

Our records showed that our death rate was much lower than the aver age for the general

population and this was believed to be due to the fact that every soldier was checked over daily and those with influenza were placed in hospital a day or two sooner. It was this getting the patient into hospital "a day or two sooner" that

brought about early Dr. Barton recovery and prevented the dangerous complications -broncho-pneumonia and pneumonia. These two ailments, not influenza, were responsible for most deaths

The 'Rest Theory' Proved. That early rest in bed is more important in preventing complications than the form of treatment is shown by a report by Dr. Alfred M. Glazer, Cincinnati, in the Ohio State Medical Journal. There were four groups of patients.

Group 1 was given aspirin compound, phenobarbital, bed rest, forced fluids and light diet. Group 2 was given the same treat-

ment as group 1 plus 15 grains of soda bicarbonate-baking soda-every four hours. Group 3 was given same treat-

ment as group 1, but quinine was used instead of aspirin. Group 4-no medicine of any kind,

### Prevention of Dementia Precox

THERE is a mental ailment that should receive the most earnest consideration of parents, teachers and serve hot in small glasses. Add and physicians, which, if treated in its early stage, may result in a cure in the majority of cases. Undiscovered or neglected, this men- life I have tried with all my heart tal ailment sends more patients to to do well. Whatever I have demental hospitals than any other sin- voted myself to, I have devoted gle ailment. I am referring to de- myself to completely: in the great mentia precox, the ailment where the individual lives really two lives, been thoroughly in earnest .one life amid those about him and the other life "in a world of his own."

> 'No Favorites' at Home. What must parents, teachers and physicians do to prevent the de-

velopment of dementia precox in children and young adults? The clinic of Drs. Edward A. Strecker and Francis J. Braceland,

Institute of the Pennsylvania Hospital, in the Philadelphia number of Clinics of North America, says: Prevention must be intensively cultivated during childhood, and ev-

ery child who presents dementia precox symptoms-"good," "queer," "shy," "reserved," "difficult," "unsociable," "seclusive," etc.—should be suspected. In the home "parents must play

no favorites," either in rewards or punishments. The extra ability or sociability of brothers or sisters should not be pointed out.

Personally I believe the biggest factor in preventing dementia precox is group games, where the youngster has to "give and take." There is no "royal" road for him to tread when he is playing or mixing with others.

QUESTION BOX

Q.-What causes ringworm on the head or face? A .- It is due to a vegetable parasite. The treatment is to use preparations to kill this parasite.

Q.—Can arthritis be caused by

food? A .- Lack of vitamin B1 in food is now considered a cause or partial cause of arthritis. Foods rich in vitamin B-1 are liver, bacon, leafy

vegetables, buttermilk, yeast tablets and peanuts. Q.-What is the treatment for

chronic appendicitis? A .- The present treatment is the use of paraffin to lubricate the wastes. Sometimes operation is

necessary.

Q. At what age should a child be inoculated against diphtheria? A .- Child is inoculated after the age of eight months and before one
