

Death of Mrs. Henry Terlinden

Mrs. Henry Terlinden, 63, nee Amelia Schmidt, town of Wayne farm resident, died Sunday evening, Nov. 15, at St. Joseph's hospital, West Bend, after having been in ailing health for the past seven years. She had been seriously ill for four days prior to her demise.

Born Feb. 22, 1890, in the town of Wayne, she was a resident of that township throughout her life. She was married to Henry Terlinden on Nov. 22, 1919, in the E and R church at Fillmore by the Rev. Erber. He preceded her in death on Jan. 11, 1932.

Mrs. Terlinden, a daughter of the late Christ and Louisa Schmidt, was the mother of three children, all of whom survive. They are John of the town of Wayne, Lillian (Mrs. Roland Groth) of West Bend and Henry of Wauwatosa. She is further survived by three grandsons, one brother, John Schmitt of Kewaskum, and many other relatives. Another brother, Arthur, predeceased her.

Her body was in state at Miller's Funeral home here from 2 p. m. Tuesday to 1 p. m. Wednesday when services were held at 1:15 p. m. from the funeral home to Salem Reformed church, Wayne, at 2 o'clock. The Rev. Donald Koehn officiated and burial was in the parish cemetery.

Pallbearers were Ray Jonas, Calvin Schaub, John Werner, George Krieser, Rudolph Schultz and Reinhold Bogenschneider.

MRS. AUGUST BRUESEWITZ

Mrs. August Bruesewitz, nee Hannah Maria Otto, 71, passed away Monday, Nov. 16, at St. Joseph's hospital, West Bend, after a three weeks illness.

Born March 22, 1882, in Warsaw, Ill., she married Mr. Bruesewitz on Aug. 9, 1903, in the town of Scott, Sheboygan county. He predeceased her on Feb. 2, 1950.

Survivors include two daughters, Sylvia (Mrs. Edwin Fickler) of Kewaskum and Dorothy (Mrs. Carl Welk) of Rhineland; two sons, Arno, Rudolph and Arthur Bruesewitz of Milwaukee, Elmer of Random Lake, Edwin of Kiel and Norbert of Tomahawk; 32 grand-children; four sisters and three brothers.

Funeral rites were held Thursday at 2 p. m. at St. Stephen's Lutheran church, Batavia, the Rev. Edwin Suelhoff officiating. Burial was in the church cemetery.

COUNTY BEEKEEPERS MEET

The Washington County Beekeepers' association held its annual meeting at the library building in West Bend, Friday evening, Nov. 20, at 7:30 p. m. All persons interested in beekeeping were invited to attend.

What Do You Think of Your Kewaskum?

In the past we stated that your opinions would influence our actions. This committee has asked for further comments. As we understand your wishes and have plenty support of same we will be able to discuss them with the village board, school board or other proper authorities. We must have the opinions equal to 10% of the population. If this response is not received on any specific issue, the issue will be considered dead, and no further action will be taken.

Results of any issue placed before the public on which this committee has rendered its service, will be made as soon as available.

The committee reserves the right to judge whether the issue would be of public interest or not, or conform with the aims and purposes of this organization.

Accordingly we ask you

ARE YOU IN FAVOR OF A SKATING RINK?

YES.... NO....

Please cut out the ballot and mail to Kewaskum Community Service, 26 General Delivery, or drop in boxes at the bank or Statesman office BEFORE NOV. 25.

What do you think of your Kewaskum?

West Bend Defeats Indians in Opener

Kewaskum High school's Indians, last season's Tri-County champions, who were hit hard by graduation last spring, opened the 1953-54 basketball season at West Bend Thursday night, Nov. 19, and were downed by the Badgers of the Little Ten conference, by 10 points, 63-53. It was a non-conference tilt.

West Bend with a veteran team composed entirely of lettermen except for one starter, was expected to defeat the Indians by a greater margin. Kewaskum has only one regular letterman back from last year's squad. He is Russ Rodenkirch. However, a couple of newcomers and several boys up from last year's reserves and B team, give Coach Ernie Mitchell a young but promising aggregation, which should improve with experience.

In a preliminary contest Thursday night the Kewaskum and West Bend B teams mixed it up.

In another non-conference game next Tuesday night, the Indians will meet Cedar Grove on the home floor before opening Tri-County play in the near future.

Plan County-Wide Chest X-Ray Survey in January

During January, 1954, the State Board of Health will sponsor a Mobile X-ray Survey in Washington county. The Washington County Medical society approves this service. Free chest clinics will be conducted at bus centers throughout the total county area.

This will be an adult health service. All individuals over 18 years of age may be x-rayed. Special plans will be made for all industries of the county.

A meeting to formulate total county plans was held on Monday evening, Nov. 16, at the county house in West Bend. Eleven township areas were represented at this meeting. The Washington County Homemakers groups, Kewaskum Women's club and West Bend W. A. T. A. chapter will be doing the special job of promoting this service throughout the total county.

A central committee was formed at the Nov. 16 meeting to promote total county-wide plans for this health project. This committee consists of two homemakers, a member of Kewaskum Women's club, county home agent and county nurse.

Special organization meetings will be held in each township during the coming months to set up individual plans for the promotion of this chest survey and to provide volunteer service at each bus center.

The Kewaskum Woman's club will be contacting other organizations within the village and township to assist with this adult health project.

Members of the West Bend W. A. T. A. chapter who will promote this chest survey within the city of West Bend attended a local planning meeting Tuesday evening, Nov. 17. Means of publicizing this event and the site for the open center were discussed. A committee of over-all chairman, publicity and volunteer leaders was selected.

KOBERS CELEBRATE 25TH ANNIVERSARY

Mr. and Mrs. Christ Kober, Jr., Kewaskum, celebrated their 25th wedding anniversary Sunday, Nov. 15. A turkey dinner was served. The following were present for the occasion:

Mr. and Mrs. John Wehrenberg of Oshkosh, Mr. and Mrs. Marvig Auehling and children, Ronald, Deborah, Mark and Marlin of Van Dyne, Mr. and Mrs. Bernard Nate and daughter Gail of Manitowish, Mr. and Mrs. Leo Rosenbaum, Erma, Rosena, and Rudy Rosenbaum of Campbellsport, Mr. and Mrs. Norman Krueger and children, Norman, Jr., Linda and Carl of Lomira, Mr. and Mrs. Christ Kober, Sr. and daughter Louise of Kewaskum.

BUNKELMANS BUILD HOME

Work is well along on a new home being erected by Louis Bunkelman & Son at the south end of Roseland Heights.

Thanksgiving... 1953

For this we give thanks.

For husbands and sons safely home.

For the end of days racked with loneliness and fear. For the silence of the guns in the Korean hills. But let us remember that just to be thankful for peace has never been enough to keep peace. It can only be preserved by a country that is strong and secure.

Local Donors Give Blood at West Bend

A total of 185 persons donated a pint of blood each at the last clinic of 1953 held in the West Bend High school gym last Thursday. Although the clinic was just short of its goal of 210 contributors, it was most successful. The blood will provide a reserve in the bank for the County-West Bend Community Blood Donor club.

Among the Kewaskum persons who donated blood at the clinic were the following: First time—Nelson Rodenkirch; second time—Alfred Holzmann; third time—Betty Koerble; fourth time—Bernard Hafemann and Wallace Rodenkirch; seventh time—Henry Rosenheimer.

Because of the success and fine work done at the blood clinic held here some time ago, Kewaskum residents were not called upon to donate blood at the West Bend clinic.

THIRTY-FOUR CARS OF SUGAR BEETS SHIPPED FROM HERE

The Menomonie Sugar Beet company, which again operated its hoist alongside the railroad tracks in Kewaskum the past few weeks, completed the loading of beets last week. The beets were hauled here from surrounding farms, were weighed, loaded on railroad cars and shipped to Menomonie.

According to John Muckerheide, who was in charge of the shipping, a total of 34 carloads of beets were shipped out this year. This total well exceeds that in recent years. The beets were not of a real good quality this year.

A small car holds about 46 tons of beets while a large car will hold about 60 tons.

LAKES TEAM PLAYS FOND DU LAC IN OPENER NOV. 29

Opening basketball games in the Land o' Lakes and Rivers leagues will be played on Sunday, Nov. 29. According to the schedule released this week, the Kewaskum Chevrolts will be at home against Fond du Lac in the lid lifter. Fond du Lac is a replacement for Juneau in the circuit. The local Rivers team will also open the campaign the same night. Their schedule is not yet completed and it has not been announced whom Kewaskum will meet in the first game.

ROMAN SMITHS SURPRISED ON FORTIETH ANNIVERSARY

Mr. and Mrs. Roman Smith, West Bend, former Kewaskum residents were surprised in honor of their 40th wedding anniversary Thursday, Nov. 19. The occasion was celebrated at the Barton Opera House with numerous relatives and friends present. Music was furnished by John Kliska's orchestra. A number of Kewaskum folks attended.

UNIONS SPONSOR SALVATION ARMY PROGRAM OVER WBKV

The UAW-AFL labor unions will sponsor a Salvation Army program this Sunday Nov. 22, at 1:00 p. m. over WBKV, West Bend. On the following Sunday, Nov. 29, they will have a forum of the radio committee of the UAW-AFL of Washington county.

Heavy turkeys cost less per pound than small fryer-roaster types. When heavier holiday birds come into greater supply, they will be a better buy than the smaller ones.

Postpone Opening of Deer Season

The 1953 Wisconsin deer hunting season has been postponed one week due to the dangerous forest fire conditions in northern Wisconsin. It was announced Wednesday morning by Governor Kohler. The opening date of the season will now be Saturday, Nov. 29, instead of Saturday, Nov. 21. There will still be a 7-day rifle season for bucks, nevertheless.

Although the postponement will inconvenience many hunters, Gov. Kohler emphasized that there have been between 12 and 20 forest fires daily in the timber dry woods in northern Wisconsin. A rainfall on Friday, the first in many, many weeks, may ease the situation.

Scores of Kewaskum and Washington county hunters who were planning to travel north this week had to revise their plans. It is hoped that plenty of rain or snow falls in the north woods sometime between now and Nov. 25 to aid in the hunting. There hasn't been a sign of snow yet in this area which has had unseasonably warm weather in recent weeks. The temperature ranged in the high sixties the past week.

NEW FANE CHURCH TO HAVE CHRISTMAS SALE, LUNCHEON

The annual Christmas sale and luncheon sponsored by the Ladies' Aid of St. John's Lutheran church at New Fane will be held Sunday, Dec. 6, in the parish hall of their church at New Fane.

Sale and luncheon will start at 11:30 a. m.

Quilts, rugs, afghans, a large variety of fancy work, Christmas cards and candles, home-made bakery goods are among the items included in the sale.

The luncheon menu features chili, pie and coffee—or ham sandwiches, cake and coffee at 50c per plate.

SURPRISE JOHN TRAPPS ON 41ST ANNIVERSARY

Mr. and Mrs. John Trapp, Kewaskum, were surprised by their children in celebration of their 41st wedding anniversary on Sunday, Nov. 15.

Present for the occasion were Mr. and Mrs. Lloyd Iron, Mr. and Mrs. August Bartelt, Mr. and Mrs. George Gilboy, Mr. and Mrs. Joseph Prankunas, Mr. and Mrs. Louis Trapp, Mr. and Mrs. Francis Gilboy and Mrs. Miles Rahn and son.

Cards were played and a delicious lunch was served the guests. Prizes went to Louis Trapp and Florence Iron.

NO THANKSGIVING DAY SERVICE AT POST OFFICE

There will be no window service at the post office on Thursday, Nov. 26, Thanksgiving day. Only one mail will be received and that is on Train 217 due here at 5:00 a. m. No mail will be dispatched and no rural delivery. The lobby will remain open until 6:00 p. m. for the benefit of lock box patrons.

INFANT IS BAPTIZED

The infant son of Mr. and Mrs. Raymond Gremminger, Kewaskum, was baptized by the Rev. F. C. LaBowl on Sunday, receiving the name Gerald Joseph. Sponsors were Mrs. Ruben Sparger of LeRoy and Roderick Gremminger of Mayville.

Board, Industries Discuss Financing of Sewage Plant

Regular Meeting
October 5, 1953
The Village Board of Kewaskum, Washington County, Wisconsin, met in regular monthly meeting with President C. Miller presiding and all board members present.

The minutes of the previous meeting were approved as presented.

Motion by M. Schaefer, seconded by J. Eberle and carried that the car allowance and salary, as recommended by the Police and Fire Dept. committee, for the newly appointed police officer be established as follows: Car allowance, \$100.00 per month; salary for the first six months, \$255.00 per month; salary for the next six months, \$300.00 per month; salary after twelve months of service, \$320.00 per month. A one week vacation with pay will be allowed each year for service of less than five years. After five years of service, a two week vacation with pay will be allowed. No car allowance during the vacation period.

Motion by J. Stelplung, seconded by C. Sparks, and carried that the village provide a Beacon Ray warning light to be mounted on the roof of the police officer's car.

Motion by J. Eberle, seconded by C. Sparks and carried that the village raise the rate of rent on the village owned house to twenty-five dollars (\$25.00) for each apartment effective as of the first of November, 1953.

Motion by J. Eberle, seconded by C. Sparks and carried that the weapons and firearms confiscated by the Police Dept. be dismantled and destroyed.

Motion by L. Kohn, seconded by A. Martin and carried that all bills and wages, as recommended and approved by the Finance committee, be allowed and paid.

on bonds	\$ 60.00

Earl Herriges, Six Others Are Inducted

Seven Washington county men were inducted into the armed forces this month, representing the November draft quota. This was revealed by the selective service office at Hartford. The group included:

Harry Barwin, 25, West Bend; Herman Berndt, 24, West Bend; Ralph Boos, 25, R. I. Hartford; Richard Klumb, 22, West Bend; Henry Krell, 25, West Bend; Earl Herriges, 29, Kewaskum, and Gerald Koehler, 29, West Bend.

Seven men are also scheduled to leave on Dec. 4 as the induction quota for that month.

MISSIONARY FROM AFRICA TO TALK AT PEACE CHURCH

Rev. Eugene Grau, furloughed missionary from British Togoland, Gold Coast, West Africa, will be guest speaker at the Sunday morning service at Peace church, Nov. 22, at 10:00 a. m. announced the Rev. F. L. Rodenbeck Tuesday.

Mr. Grau and his family have been in Africa since December, 1946, working as missionaries for the Evangelical and Reformed church with the Ewe Presbyterian church of Togoland, Gold Coast. Mr. Grau has been teaching at the seminary of the Ewe church as well as at two colleges and a secondary school. He has been in charge of retreats held for the pastors, teachers and elders of the Ewe church.

Rev. Grau will speak at the morning service telling about his work in Africa and will meet with the Missionary Guild and others at seven o'clock for an informal discussion and question period. All are welcome. An offering for missions will be received.

VILLAGE FAMILIES CHANGE RESIDENCES

The "Bud" Schommer family has moved from the home on Second st. owned by Regal Ware, Inc. into an apartment above the former Elsie's Flower Shop on Main st.

Mr. and Mrs. William Sanders and child have moved from one of the apartments in the Mrs. G. Leonard building on South Fond du Lac ave. to the South. Mrs. Lawrence Ketter and family moved from their apartment in the Leonard building into the adjoining one vacated by the Sanders family. The apartment vacated by the Kettlers has been rented by Eldon Rauch.

MRS. KOCH SEAL SALE CHAIRMAN

Mrs. Harry E. Koch will be chairman of the 1953 Christmas seal sale in Kewaskum, the Wisconsin Anti-Tuberculosis association reported this week.

The seal sale will be conducted by mail from Nov. 16 through December.

Funds from the seal sale are the sole support for the tuberculosis prevention and control activities and services carried on by the Wisconsin Anti-Tuberculosis association. These funds are used exclusively to fight tuberculosis, which today kills more people in the United States than all other infectious diseases combined.

The WATA carries on a year

round TB control program, including case-finding clinics, medical consultation, medical and social research, rehabilitation, medical social service and health education.

This year's Christmas seal features the joyful face of a singing child who is clad in red mittens, an old-fashioned green stocking-cap and muffler and who holds an open book of carols. The seal continues a 1500-year-old tradition of singing associated with the Christmas season.

The 1953 Christmas seal was designed by the noted Chicago artist, Elmer Jacobs, who has won over 40 awards for illustration and typographic design.

Beagle Club Trial Held at Kewaskum

The Milwaukee Beagle club held a field trial Sunday at Kewaskum, designed to attract new beaglers, and club members who are hesitant about pitting their "rabbit chasers" against seasoned field trial dogs.

There was a junior stake for dogs with handlers under 18 years of age and a senior stake for dogs that have not placed in any field trial. In addition, for club members there were tests for dogs that have placed in a club championship stake.

Club membership was not necessary to enter the junior or senior stakes and experienced judges advised contestants about their dogs' good and bad points.

Kewaskum also is host each year to the regular field trial of the Milwaukee club as well as that of the Wisconsin Beagle club. These events are held earlier in the fall.

Sixth Deer Killed by Car in County

Washington county is getting to be quite a county for deer. The 6th deer in recent months was killed the past week when struck by a car along the new Hwy. 41. The large doe was found dead along the road Monday morning south of the intersection with Hwy. 167 southeast of Richfield.

Last week another big doe ran into the side of a car driven by Ervin Martin of Allenton just east of that village. A total of five deer have been killed in accidents the past two or three months and another was shot by two Milwaukee hunters near Slinger recently and the two were later fined to the limit of the law. One of the deer killed in accidents was struck by a train a short distance south of Kewaskum.

John Heisdorf, Sr. of the town of Kewaskum reported this week that he came very close to hitting a deer with his car last week on a town road near his farm. The animal darted into the road and leaped across the hood of his auto. He almost was fatality number seven.

Reports come in regularly of deer being seen in this area.

HOSPITAL NEWS

Miss Edna Schmidt, Kewaskum, is a patient at St. Joseph's hospital West Bend, where she is undergoing treatment.

Clayton, Jr., son of Mr. and Mrs. Clayton Kohn, Kewaskum, returned home Monday from St. Joseph's hospital, West Bend, where he was confined a week for surgical treatment.

Diekie, son of Mr. and Mrs. Cyril Wiator, Kewaskum, had his tonsils and adenoids removed Tuesday at St. Joseph's hospital.

Mrs. Alice Dognitz, Fillmore, was removed to St. Joseph's hospital in the Kewaskum firemen's ambulance Thursday morning, Nov. 19, after suffering a stroke.

Mrs. William Marinas, St. Killian, is a patient at the Summit hospital, Oconomowoc.

Mrs. Leander Welland, St. Killian, is a patient at St. Agnes hospital, Fond du Lac.

BEVERLY STAHL, LOUIS LUETKE ARE MARRIED

Miss Beverly Stahl of Beechwood exchanged wedding vows with Louis Luetke of Campau in a 7 o'clock ceremony at St. John's Evangelical Reformed church at Beechwood on Saturday, Nov. 7.

The bride was employed at the West Bend Aluminum company before her marriage while her husband is employed at Port Washington. Upon returning from their honeymoon the young couple will reside at Beechwood.

BIRTHS

SCHOOPS—A son to Mr. and Mrs. Ralph Schoops, R. 2, Kewaskum, Friday, Nov. 13.

HALEMANN—A son to Mr. and Mrs. Paul Halemann, Campbellsport, Friday, Nov. 13, at St. Agnes hospital, Fond du Lac. Mrs. Halemann is the former tielen Schlosser, daughter of Mrs. Jennie Schlosser, Kewaskum.

Rural Colonization in El Salvador

Rural development has become a reality in El Salvador. Through its Institute of Rural Colonization the Salvadorean Government has already begun to move families into 250 specially-designed brick homes at its Sitio del Niño project. Under the direction of a planning group made up of government representatives and U.N. experts steps are being taken to improve the economy of the region and the living conditions of its people. Here, the Quijano family who lived in a thatched hut, receives official notification that they have been allocated a new house by the Rural Colonization Commission of that country.

HOMAGE IN THE RAIN—Thousands of pilgrims gathered in the rain at the famed Marian Shrine of Fatima in Lisbon, Portugal. The pilgrimage is held on the 12th and 13th of each month to pay homage to Our Lady of Fatima.

SHAKE THAT AWAKES—Drowsy drivers could disappear from the nation's highways when and if the "carriage" becomes widely used. The device, shown above being tested by New York news-writer Ed Wallace, is powered by a small electric motor attached to the cigaret-lighter outlet on the dashboard. The porous plastic material massages the motorist's back when the current is on, keeping him awake.

HAPPY HALFBACK—New York Giant halfback Randy Clay of Pampa, Tex., hugs his bride, Clemence Halvorsen of San Antonio, Tex., following their marriage in New York City.

MILESTONE IN PHOTOSYNTHESIS

Dr. Wolfe Cishnaie recently successfully separated chlorophyll fats and a combination of chemical substances from green leaves, added green chlorophyll and illuminated the mixture with various wave lengths of light. Under this lighting, the mixture carried out chemical reactions known as reductions and which consume hydrogen.

This amounted to duplication in a laboratory of one of the basic steps in photosynthesis which is the process upon which all life depends. In brief, it is the process by which hydrogen and carbon, taken from water and air, are converted into carbohydrate. The process is stimulated and activated by the energy of sunlight and absorbed by chlorophyll which is found in vegetation.

Vishniac, a Yale University microbiologist, became the first man to accomplish a photosynthetic reaction with a laboratory solution and, therefore, his work may be of major importance in this field. The end result, which may take scores of years, is seen as a process in which man will use artificial methods of photosynthesis to grow food. Food could be grown without the necessity of plant cultivation under such a system.

We have no doubt that this development is a major scientific advance although we wonder whether the world's microbiologists will be able to produce a tomato which tastes as good as those we raise in our own gardens. It is hard to believe that such a result can eventually be attained by chemicals and synthetic laboratory processes, but no doubt that day will eventually arrive. Gardening, at that stage, might become quite obsolete, and that will be a heavy price to pay, even for advanced civilization.

THE U.S. ARMY provided millions of items of clothing for South Korean refugees.

A NOTE ON FLIES

Modern civilization has been having its difficulties in trying to end the existence of the very annoying house-fly. Only a few years ago the Department of Agriculture developed sprays which were thought to be the answer to these pests.

However, in a few years it developed that the sprays only had a temporary effect, and that the flies developed an immunity to the sprays. Moreover, the flies developed into a harder strain and became as much of a pest as before.

In Australia civilization has gone down to another defeat at the hands of the ordinary house-fly. The city of Canberra was so troubled with flies recently that Government officials thought they had the answer to the problem. They imported a large number of cannibalistic flies from an-

other area. Instead of eating the Canberra variety, the cannibalistic flies became friendly and the combination of the two produced a species which was even more of a problem and more hardy than the original Canberra species. As a result, the problem in Canberra is worse today than it ever has been.

The reluctant conclusion we reach is that, when it comes to flies against civilization, it appears that flies have a slight edge.

Made It Worse

The guest at the dinner party, arriving late, found a seat reserved for him near the head of the table where a goose was being carved.

"Ah," he exclaimed, "so I'm to sit by the goose."

Then, observing the lady on his left, he made haste to amend an awkward phrase. "I mean the roasted one, of course."

1 Word Can Change Your Life—ESCAPE

When you say goodbye to places and persons, do so without wishing to escape the essential qualities of those relationships.

In his review of the latest of the late George Santayana's books, Gouverneur Paulding concluded with this statement: "It's a wonderful thing to achieve serenity, but it's terrifying to achieve it in emptiness of heart." Mr. Paulding drew this conclusion after pointing out that Santayana shelved his friends after saying goodbye to them and died a frustrated and unhappy man.

A wholesale escape from the past simply doesn't work. God endowed us with hindsight for good reason. You can "achieve serenity" with a full heart if you remember your experiences after saying goodbye. Evaluate them. Plow under the worst and cultivate the best, but don't plot an escape, the word that can change your life.

CHIVALRY'S REWARD

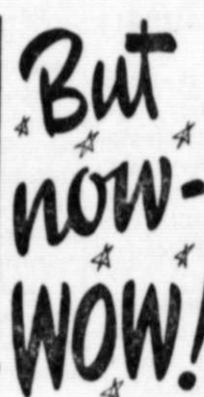

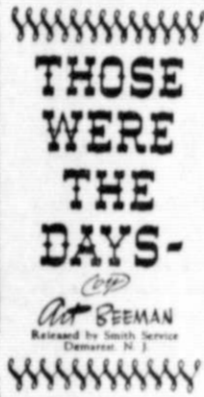

Gilbert Taylor, an English painter, recently saw a girl's raincoat blown from the parapet of a suspension bridge on which he was working. The coat had landed in some of the stone structure of the bridge and, as Taylor reached for it, he lost balance and fell 100 feet to the ground.

Taylor landed on his feet, although he barely missed several trees and sharp rocks in falling. Despite his fall, chivalry survived, and the painter suffered only two broken ribs and shock. His escape is miraculous, in view of the fact that he fell from a height comparable to that of a ten-story building.

The moral of this story is that a gentleman can go to almost any extreme in pursuing the almost, discontinued custom of chivalry, seldom suffering serious adverse effects.

THOSE WERE THE DAYS

By ART BEEMAN

STRICTLY FRESH

AN Ohio Democrat recently predicted a clean sweep for his party in Ohio's 1954 elections. In or out?

Nowadays, when a man gives his seat to a woman on a bus it usually just means he's getting off.

From the annual Canadian shoe and leather fair held recently in Montreal comes the report that women's feet are

getting bigger, increasing from an average size 4½B to a present-day average of 7A. Of course! They have bigger shoes to fill now that they've entered public life.

What's the use worrying about life? You'll never come out of it alive anyway.

When a New York policeman caught up with a hit-and-run driver, he discovered that the driver was an old friend he hadn't seen in years. That must have been an "arresting" reunion!

TIPS ON PAINTING METAL

GALVANIZED IRON
Leave new galvanized iron exposed to the weather until dull in color—OR—wash and clean with turpentine—then apply RED LEAD, ZINC DUST or CHROMATE PRIMER.

ALUMINUM
1- Remove bright finish with steel wool.
2- Wash with turpentine.
3- Paint with metal primer.
4- Use OUTSIDE PAINT, of desired color, over primer.

ORNAMENTAL IRON OR STEEL
1- Remove rust.
2- Smooth with steel wool.
3- Clean with turpentine.
4- Paint with RUST INHIBITIVE PAINT.

NOTE—Sometimes VARNISH is used instead of paint.

TIPS ON PAINTING OUTSIDE METAL

Metals which are exposed to the weather are subject to rusting or oxidizing. As in case of most forms of iron or steel, this means destruction of the metal in a few years. Painting or varnishing is the most effective means of preventing this damage.

New galvanized iron should not be painted when installed without special treatment. It is covered with an oily film, and usually a trace of acid from soldering. This will cause the best paint to peel.

An old stand-by remedy is to allow the metal to weather until the zinc coating turns a dull gray color. By this time the oil and acid will have weathered away, and the paint will hold.

A quicker remedy is to clean the surface with turpentine and steel wool. This will remove the shine and oil at the same time, and the surface will be ready for painting.

Use two coats of metal primer. Red lead, sometimes called tinner's red, is good. Zinc dust, or

chromate primers are good. Aluminum paint designed especially for metal and masonry is also recommended.

Apply the color house paint desired over the metal primer.

Paint applied to aluminum is apt to peel unless special precautions are taken.

Wash the surface with turpentine and steel wool to remove the gloss and oily film. Wipe dry with a clean cloth.

Then apply two coats of any good metal primer. Aluminum paint, made especially for metal and masonry is recommended.

The main difficulty in painting ornamental iron or steel is rust prevention.

Be sure to clean the metal so that it is free of rust before painting. This may be done by scraping, or polishing with emery cloth or steel wool. Kerosene, or patented rust removers will help.

Wash the surface with turpentine to remove any traces of oil or rust remover before painting.

Use a rust inhibitive paint, or buy rust inhibitor and add it to metal primer you intend to use. Follow directions on the can.

Some manufacturers claim that rust inhibitive paint can be used successfully over rust without cleaning.

Use your favorite color paint over two coats of rust inhibitive paint.

Copper and bronze are usually varnished or lacquered to preserve their natural color. Sometimes linseed oil is used. In either case, be sure to clean the surface with turpentine to remove oil or soldering acid.

So Goes The Mind

By Orin R. Yost, M. D.
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

Almost one-third of all beds in mental hospitals are occupied by patients suffering from schizophrenia. That explains, perhaps, why readers send me so many questions concerning schizophrenia.

1. Why is schizophrenia known also as dementia praecox? "Praecox" means early in life; our word "precocious" comes from it. This disease usually makes its appearance early in life, in the late teens or early adulthood. Children as young as five or six can be schizophrenic.
2. What are the early symptoms?

Usually there is markedly strange, bizarre or extravagant behavior. There may be total apathy, with the patient acting as if he were unaware of everything going on about him. Sometimes there is great excitement that has no apparent cause and seems directed at nothing particular. The most revealing symptom is withdrawal from ordinary interests. In children there may be a display of tremendous anxiety, amounting at times to terror.

3. Is schizophrenia a brain disease or is it due to some poisonous condition?

It is a functional psychosis. That is, a disturbance of brain functioning. Though in the advanced stage the entire personality is involved and there may be severe deterioration, no changes in brain structure can be discovered.

Sometimes it develops so gradually that the sufferer is able to maintain himself for many years before the symptoms become so marked that hospitalization is essential. Once the disease has reached this advanced stage, there is such severe deterioration that very little can be done.

5. What has proved most effective in treatment?

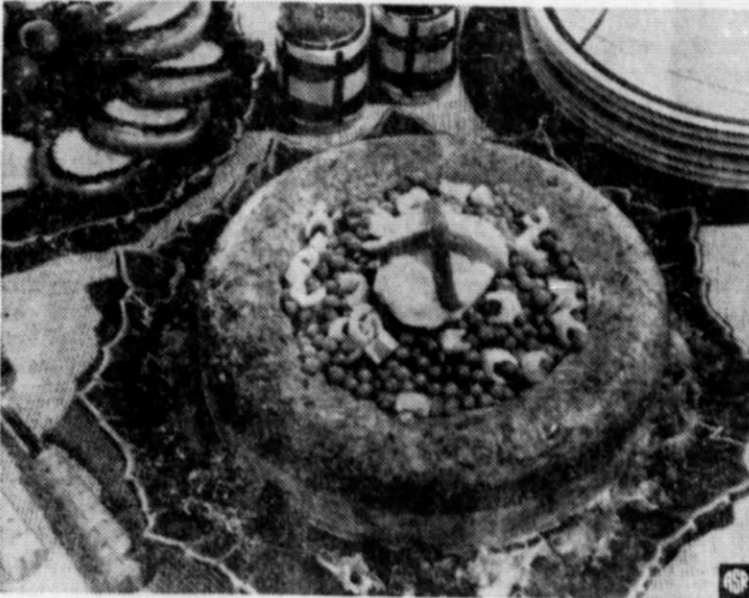

Shock treatment, insulin and electric, followed by psychiatric care.

6. What are the prospects of cure?

Prospects are good only if the disease is recognized early, and the patient is given treatment in a modern hospital. There are not many recoveries once the disease has run its course for a year and a half. Through shock treatment and psychotherapy, more than 50 per cent of those treated early, have been able to recover and take up once more their place in society. This is a most encouraging record in the treatment of a disease formerly considered hopeless. We can expect that with further advances in research and techniques, the percentage of recoveries can be further raised.

Sarah Anne's COOKING CLASS

Meat and Potatoes in Harvest Gelatine

Unflavored gelatine, basis of delicate aspics and fruit salads, here presents a main dish of diced, cooked potatoes and meat. The potatoes and canned luncheon meat plus seasonings are harmoniously blended by the gelatine yet retain their own flavor identity.

Canned peas, French dressing and celery may be a salad filling for the gelatine mold, or the peas may be heated with onion rings and served as a side vegetable course.

Meat and Potato Gel-Salad

Layer I

- 1 12-ounce can luncheon meat
- 2 tablespoons minced onion
- 1/2 cup mayonnaise or salad dressing
- 1/2 cup chili sauce
- 1 teaspoon horseradish
- 2 teaspoons prepared mustard
- 1/4 teaspoon Tabasco
- 1 envelope unflavored gelatine
- 1/2 cup cold water

Finely chop luncheon meat; combine with onion, mayonnaise, chili sauce, horseradish, mustard and Tabasco. Soften gelatine in cold water; dissolve thoroughly over hot water. Blend into meat mixture. Turn into 6-cup ring mold; chill until almost firm.

Layer II

- 2 cups diced cooked potato
- 1 cup diced celery
- 1 small onion, minced
- 2 tablespoons finely chopped green pepper
- 1/2 cup mayonnaise or salad dressing
- 1 tablespoon vinegar
- 1 1/4 teaspoons salt
- 1/2 teaspoon pepper
- 1 envelope unflavored gelatine
- 1/2 cup cold water

Combine diced cooked potato, celery, onion, green pepper, mayonnaise, vinegar, salt and pepper. Blend in gelatine in cold water; dissolve thoroughly over hot water. Blend into potato mixture. Turn onto meat layer; chill until firm. Unmold on saucers and serve with canned peas.

YIELD: 8 servings.

Next time you plan to serve potatoes, try one of these delicious and unusual variations of this important food.

Sausage Potato Pie

- 1 lb. link sausage
- 1 cup celery, cut in 1/2 inch pieces
- 1/2 cup chopped onion
- 2 tablespoons flour
- 1 1/2 cups tomatoes
- 1 1/2 cups carrot sticks
- 1/2 cup water
- 1/2 teaspoon sugar
- 1 teaspoon salt
- 2 cups seasoned mashed potatoes

Place sausages in skillet. Add small amount of water. Cover. Simmer until plump, about 5 minutes. Uncover. Brown. Remove sausages. Cook celery and onion until golden, add flour, and blend. Stir in tomatoes, add remaining ingredients, except potatoes. Cover and simmer 15 minutes, stirring occasionally. Pour into 1 quart casserole. Top with mashed potatoes. Arrange sausage on potatoes and bake in an oven 400 degrees for 15 minutes or until brown.

Mashed Potatoes

- Firm white potatoes
- 1/3 to 1/2 cup hot milk
- 2 to 3 tablespoons butter
- Salt and pepper to taste

Peel potatoes and place in boiling salted water to cover. Cook covered until soft. Mash with a potato masher or press through a potato ricer. To 3 cups of mashed potatoes add hot milk, butter, salt and pepper. Beat with a fork or wire whisk until light and fluffy. If not served at once place over pan hot water. Serve very hot.

This Week's Pattern

9142 12-20, 30-42
by Marian Martin

Pattern 9142: Misses' Sizes 12, 14, 16, 18, 20; 30, 32, 34, 36, 38, 40, 42. Size 16 jumper takes 3 yards 39-inch fabric, blouse 1 1/2 yards. Send Thirty-five cents in coins for this pattern—add 5 cents for each pattern if you wish 1st-class mailing. Send to 170 Newspaper Pattern Dept., 232 West 18th St., New York 11, N. Y. Print plainly NAME, ADDRESS with ZONE, SIZE and STYLE NUMBER.

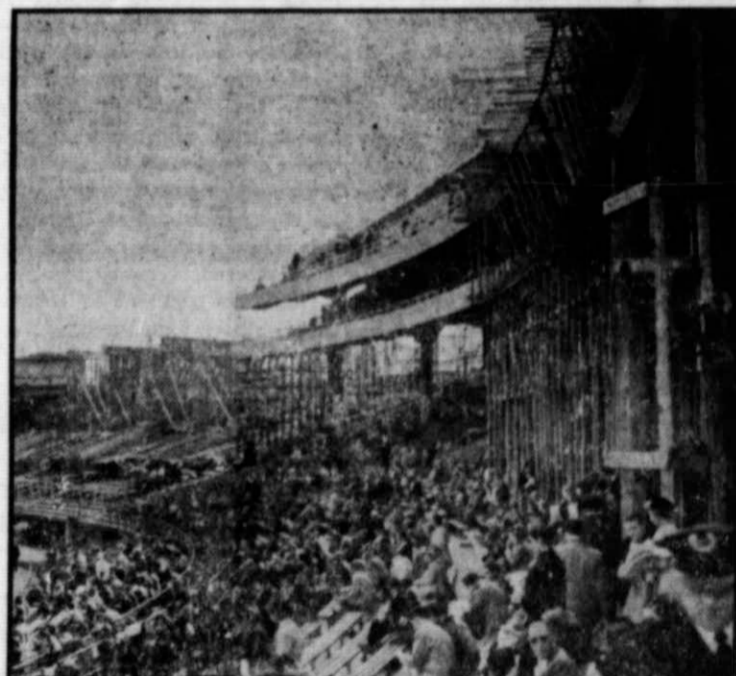

Hammering Out New Skills

Each ring of the mallet on the copper means greater skill for this student at a remarkable school at Rio de Janeiro. The school, operated jointly by the Brazilian government and the International Labor Organization, trains skilled workers for the expanding industries of Latin America. The student shown here was one of 99 from 18 Latin American countries, who left his job for a nine-month training course.

EARNs LIVING KNITTING—Jim Dunbar, ex-G.I. of Beverly Hills, Calif., took up knitting as therapy after World War II and now earns his living knitting at home. With the use of mathematics and designs on graph paper, Dunbar was taught to knit by Beverly Hills dress designer, Miss Diane, who employs some 400 other handicapped persons to knit her fashions.

ORIOLES ARE COMING—Construction work begins to enlarge Memorial Stadium in Baltimore, Md., future home of the Baltimore Orioles. The St. Louis Browns franchise was recently transferred to Baltimore ownership following Bill Veck's decision to sell his stock in the club. Crowd pictured above gathered in the stadium to watch Navy's eleven trounce Cornell, 26-6.

HALTED BY FARM "BLOCK"—An American soldier waits patiently for the lifting of a road barricade constructed in Poitiers, France, by farmers protesting the government's agricultural policies. Poster, lower left, proclaims that the low prices of farm products are a "national scandal."

REMINDER—New York's Nancy Woodruff, recently named "Miss Antifreeze," doesn't look too well prepared for the cold days ahead, but she's reminding everyone anyway that it's time to get the family car in shape for winter driving.

"Monthly Pains" stopped or amazingly relieved

In 3 out of 4 cases in doctors' tests!

• Chances are you're putting up — or — necessarily — with the functionally caused pains, cramps and weak, "no good" feelings of menstruation!

For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!

Lydia Pinkham's is modern in its action!

So get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron. See if — taken through the month—it doesn't give relief from those backaches, jitters—help you feel better before and during your period!

Or—if you suffer from functional "hot flashes" or "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

QUICK!

IN MEMORIAM
In loving memory of Pvt. Hilary W. Justman, who was killed while on guard duty in Korea one year ago, on Nov. 7, 1952:
More and more each day we miss you,
Friends may think the wound is healed,
But they little know the sorrow,
That is in our heart concealed.
There's many a lonely heartache,
There's many a silent tear,
God only knows how we miss you,
At the end of this sad year.
Sadly missed by his wife Mildred, his parents, Mr. and Mrs. Herbert Justman, brothers and sisters.

CARD OF THANKS
To those who expressed their sympathy in so many beautiful and practical ways during our recent bereavement, the death of our dear mother, mother-in-law and grandmother, Mrs. Amelia Terlinden, we extend our heartfelt thanks. Special thanks to Rev. Koehn, organist, singers, ushers, drivers, pallbearers, Ladies Guild members, donors of floral pieces and memorial tributes, traffic officer, Miller's, grave diggers, and all who showed respect.
John and Henry Terlinden
Mr. and Mrs. Ronald G.oth and Family

Over 600 Attend Annual Meeting of Juneau PCA

Guido Schroeder, president of the Juneau Production Credit association, reports over 600 people attended the 29th anniversary annual meeting held in Fond du Lac on October 27 and Juneau October 29. Hazen T. Canniff, assistant secretary-treasurer, presented a 29 year association history, which revealed over fifteen and one-half million dollars were loaned since 1933, and the members have accumulated reserves and stock totaling over \$183,000.00.

Guido Schroeder of West Bend and Fred F. Berg of Markesan were re-elected as directors for three year terms. President Guido Schroeder praised the members on their 29 year record of progress and added, "You have taken the lead in providing yourselves credit through your completely farmer-owned and controlled association and have placed it on a sound basis to meet the future needs of agriculture."

M. J. Fromberger spoke at Fond du Lac on the state and national A. D. A. programs. At the Juneau meeting Miss Ursula Herwig, a foreign exchange student from Hesse, Germany, spoke about farming in her homeland as compared to that in the United States.

New Fane
Mr. and Mrs. Wm. Starck and family and Mrs. Hammer of Milwaukee and Mr. and Mrs. Willard Manthei visited Sunday with Mr. and Mrs. Alex Laubach and family. Mr. and Mrs. Milton Ehnert and Mrs. John Kempf and daughters were Sheboygan callers Sunday. Mr. and Mrs. Ervin Hoepner of Theresa visited Wednesday with Mr. and Mrs. Frank Kadinger and family.

Miss Elvira Ramthun, Mrs. Ervin Seifert and Mrs. Roland Heberer were business callers at Milwaukee Tuesday.

Mr. and Mrs. Alex Laubach were business callers at Milwaukee Monday.

Mrs. Frank Kadinger and Mrs. Theo. Dworschack visited Monday afternoon with Mrs. Ronald Schultz and daughter at Barton.

Mrs. Lester Ehnert and daughters visited Monday evening with Mrs. Theo. Dworschack.

Around The Town

—Mr. and Mrs. Marvin Martin and son made a business call at Appleton Friday.

—Mr. and Mrs. Wilson Boeder and family visited at the Marvin Martin home Sunday.

—Mr. and Mrs. Harold Bunkelman and son Wilmette, Ill. spent the week end with their parents here.

—MODERN PAINLESS CHIRO-
PRACTIC. ROBERT G. ROBERTS,
D. C. 702 ELM ST., WEST BEND,
WIS.

—Mr. and Mrs. Marvin Martin attended the silver wedding anniversary of Mr. and Mrs. August Krueger at Horicon Saturday.

—Mr. and Mrs. Willard Bartel and son Tommy and Mrs. Mable Koch plan to leave Saturday for Florida to spend a two week vacation.

—It was a quiet week for Kewaskum's fire fighters. After being called out five times the previous week end, not a call was received the past week.

—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.

—Mr. and Mrs. William F. Schaefer entertained at a dinner party at their home in honor of the birthday of Mrs. Kate Johnson, of Orchard Grove, mother of Mrs. Schaefer.

—Many of our residents were seen perched atop the roofs of their homes the past week turning their television antennas. Since WBAY-TV, Green Bay, increased its power to 100-thousand watts last Friday, local sets have been getting a good clear picture and sound from that station.

—"The Greatest Faith Ever Known," a reverent retelling of the Bible's dramatic story of the men who spread the word of Jesus in the first years of Christianity, will appear in the daily and Sunday Milwaukee Sentinel beginning Thanksgiving Day. The author is Fulton Oursler, who also wrote "The Greatest Story Ever Told."

—It sure was swell—all the unseasonably warm weather of the past week when the temperatures hung around the high sixties. It seemed good to run around in shirt sleeves in November. Folks sprinkled lawns, went fishing and took drives at the time when oftentimes the ground is covered with snow.

—Watch that waistline next Thursday, Nov. 26—Thanksgiving day.

—Mrs. Tille Zelmet is spending two weeks with Mrs. Rose Smith at Menasha.

—With this week's issue the Statesman begins its 59th year of continuous publication.

In the Service

DARK 24 HOURS A DAY IN GREENLAND, HAACK WRITES

A 3/4 Howard A. Haack, son of Mrs. Ella Haack, Kewaskum, who is now stationed at Thule Air Base in Greenland, the northernmost base in the world, reports to us that at this time he is living in complete darkness 24 hours a day. It will be some time in February before the sun shines again there. The temperature gets as low as 20 degrees below zero at this time of year, and it is expected to go as low as 45 degrees below zero in the future. Haack is scheduled to be reassigned to the states in June of 1954.

ROETHKE HAS FURLOUGH

Charles Roethke, who is in the U. S. Army, and had been stationed at a camp in Kansas, arrived in Dundee last week to spend a furlough at the home of Mr. and Mrs. Charles Baetz. Later he will report for overseas duty.

COUNTY RECEIVED 74 PACKAGE LOANS FROM U. W. LIBRARY

Washington county residents were recipients of 74 package library loans—various kinds of printed information for cultural uses—from the University of Wisconsin extension bureau of information and program services during the past year.

The figures are revealed in the annual report of the bureau's director, Robert H. Schacht. This year's figures totaled 8,477 package library loans to Wisconsin citizens. Every Wisconsin county was a liberal user of this one of the state university's many public services for Wisconsin citizens. The service was started in 1938 when a dozen package library loans were sent out.

Loan packages contain latest authoritative information—pamphlet, reprint, newspaper or magazine excerpt, typewritten statement, or book, to satisfy the spirit of inquiry, aid in group studies, or meet other specific needs. Clubs are among the largest users. The service is free except for return postage on shipments.

Forty-five per cent of the year's shipments went to communities without public libraries.

Nearly 3,600 shipments were made to educational institutions, 2,500 to organizations, and 973 direct to individuals. Public libraries

were served with 1,112 loan packages for use of group, individual or institutional patrons. In subject matter the greatest volume was recorded in the fields of drama (plays), art, agriculture, history, biography, geography and travel, recreation, education, home economics, citizens, seminars, United Nations, world government, world affairs outlines, and reading courses. Requests for printed information are filled from files of more than a million published items.

Wisconsin ranks tenth in the nation in the number of farms which have electricity. Only 1.4 per cent of Wisconsin's 163 thousand farms are without electricity.

Teacup Topics

By Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGES

Most of us give plenty of attention to the selection of a hat to go with our "Sunday best," says Betty Ann. We study color and line for their effect on face and figure as well as the outfit. But, alas, what happens to a few during the week?

Monday through Saturday finds us dashing to the office or supermarket in appropriate suits or dresses. But in place of hats we are wearing scarves knotted under our chins! Not only do the scarves fail to flatter the face but they definitely detract from any outfit, even the most casual.

A well chosen hat, on the other hand, serves to keynote a woman's style sense. And to do the job the hat need not be expensive. Most department stores have hat bars that feature everything from tailored suit hats to evening concoctions for well under \$10.

What about the wind and the rain in your hair? Best to forsake the smart hat while the elements rage? Perhaps, if there were no hats to cover the situation. But a glance around a hat bar will prove there are clever rain hats for stormy days. No need to choose between droopy looking hair and a scarf swathed head. With the right hat you can avoid both.

Leather—and particularly aniline leather—is playing a strong role in the changing look of fashion this fall. And of course, when we think of leather, we think of shoes, gloves, handbags and belts for the finished costume look.

In recent months, we've been hearing a lot about aniline leather. We've been wearing shoes and other accessories salemen have told us look so pretty because they are made of aniline leathers.

Aniline is a special clear finish that brings out all the depth and luster of fine, smooth leathers. The aniline finish is transparent, achieved by using a dye with very little pigment, followed by waxing and polishing.

Because of its translucency, the natural markings, vein etchings and the natural grain of the leathers show through clearly and distinctly. Only top quality skins can be used in the production of anilines, making each shoe or accessory made of these leathers distinctive, individual and uncopyable.

Bags of both fake and real fur appear as deep pouches, satchels, giant market bags. Rabbit fur is dyed to take on the look of leopard, zebra or ermine. Silvery mouton is one of the real furs that's getting ahead in handbag fashion, since it's reasonably priced.

A few do's and don'ts about the dinner napkin. When you take it from the table, don't shake it out. Simply open it lengthwise as you lay the double across your knees. Another thing, don't try to fold it carefully at the end of the meal. Just lay it without any fuss and bother to the left of your plate. Your hostess, of course, will hope it isn't smeared with lipstick.

Correct use of your dinner napkin is as important as your handling of silverware.

Barbecued Round Steak
4 individual servings round steak; salt, pepper, flour; 3 tablespoons lard; 1/2 cup chopped onion; 1/2 cup chopped celery; 1/2 clove garlic, minced; 3 tablespoons brown sugar; 2 teaspoons prepared mustard; 2 tablespoons worcestershire sauce; 1 tablespoon vinegar; 1 can tomato soup.

Sprinkle steak with salt and pepper and coat with flour; pound thoroughly. Melt lard in a Dutch oven or large, heavy skillet. Lightly brown onion, celery and garlic; push to one side and brown steak. Combine remaining ingredients and add. Cover and cook over low heat or in a 325 degree oven for two hours or until tender. Yield: four servings.

A curtain that tends to slip off the nails at the corners of a stretcher can be kept in place by pressing small corks over the nails after you have put the curtain over them. A cork on each corner nail usually will serve the purpose.

Next time you make a sauce of canned sour red pitted cherries and their sirup, flavor it with a few grains of nutmeg and some whole cloves. This sauce is delicious on rice, tapioca, or cottage pudding.

About Your Home

By FRANCES DELL

Horticulturists are using a great deal of plastic film in their work. Wrapped in a bit of sphagnum moss inside a plastic film, cuttings can be started on a window sill with very little effort. There is a polyvinyl plastic film on the market already treated with hormones, fungicide and fertilizer.

To bundle a cutting correctly, take a square of polyvinyl plastic film and place it on a flat surface. On the plastic place a wad of sphagnum moss. Stick the cutting into the moss. Pull the film around the cutting and moss and tie the bundle.

The cutting bagged in plastic may be placed anywhere it gets enough light. You may place a dozen or so cuttings in a window. It is not necessary to give the cutting any attention at all until it is time to unwrap it for planting. If you want a number of cuttings, cut a long strip of plastic. Lay it flat and place moss on the upper half. Put the cuttings on the moss with tops projecting above the plastic. The lower half is folded up to make a bottom.

If cuttings are wrapped in untreated film, the moss and plants will rot quickly. So be sure, if you are going to do this, to buy the treated polyvinyl plastic film.

WIRE ECONOMY

Seoul — Army Signal Corps units in Korea recently saved American taxpayers more than \$381,000 by reclaiming approximately 14,000 miles of used communication wire and 398 miles of rubber-covered, long distance telephone cable. The previously abandoned wire and cable was recovered during a six-month period.

Strange Sight

The underprivileged child from the city slums was in the country for the first time for a vacation. Everything he beheld on the farm was new and wondrous to his pinched little face.

Toward sunset of the first day he stood intently watching the farmer's wife plucking a chicken.

After a bit his curiosity grew too great and he asked gravely, "Do you take off their clothes every night, lady?"

PRESSING ENGAGEMENT—Obviously pressed for time during his recent visit to the U. S. S. Iowa at Spithhead, England, Petty Officer Ernest Chiverell of the Royal Navy waits in the ship's tailor shop while his trousers get a "lend-lease crease." Applying the steam is ship's serviceman Edwin Rottinghaus.

SWITCH TO WITCH—It takes an hour to transform blonde Claramae Turner into a witch—much longer than the average American youngster will take to do the trick come Halloween. Claramae must make the switch for every performance of the New York City Opera production of "Hansel and Gretel."

Meat-Stuffed Potatoes Make a Lusty Dish

BY DOROTHY MADDOX

NO matter what the season, meat and potatoes are still the basis of most good meals. With potatoes now so plentiful and a wide variety of canned meats available, meal planning is much easier.

We've tried the following recipes at our home. Everyone, including the two boys with lusty appetites, voted them "big time."

Meat-Stuffed Potatoes (4 servings)

Four large baked potatoes, 2 tablespoons butter or margarine, 1 to 2 cans deviled ham or potted meat, 1/4 cup milk, 2 tablespoons chopped parsley.

As soon as potatoes are baked, cut slice from top of each. Scoop out potato; do not break skin. Mash potatoes with butter; stir in deviled ham or potted meat and milk; beat until light and fluffy. Stir in parsley. Add salt to taste. Pile into shells. Bake in a hot oven (450 degrees F.) until lightly browned.

Vienna Sausage Dinner (4 servings)

Four and one half tablespoons dry skim milk, 1 1/2 cups water, 3 tablespoons butter or margarine, 4 tablespoons flour, 1/2 teaspoon salt, 1/2 teaspoon pepper, 1 1/2 pounds small white onions, cooked, 2 cans Vienna sausage.

Sprinkle dry skim milk on top of water. Beat slowly with rotary beater until dissolved; reserve. Melt butter. Add flour, salt and pepper; stir to a smooth paste. Add reserved liquid and cook, stirring constantly, until mixture thickens and comes to a boil. Add onions; heat. Heat Vienna sausage in own liquid. Turn creamed onions into serving dish; top with Vienna sausage.

Luncheon Meat—Sweet Potato Puff (4 servings)

Two pounds sweet potatoes, 2 tablespoons butter or margarine, 2 tablespoons unsulphured molasses, 1/4 teaspoon salt, 1/4 cup raisins, 1 can luncheon meat, 1 orange (peeled and sliced), 1 tablespoon brown sugar.

Cook potatoes in boiling water until tender. Drain and peel. Mash potatoes. Add butter, molasses and salt; beat until light and

Meat-stuffed potatoes, top plate, served with broiled, sliced corned beef hash, are "big-time" eating any time of the year.

fluffy. Stir in raisins. Place potatoes in a shallow casserole. Cut luncheon meat into 6 slices; arrange meat on top of potatoes with halved orange slices. Sprinkle meat with brown sugar. Bake in a moderate oven, 375 degrees F., 20 minutes.

Lamb Potato Hot Pot

4 lamb neck slices, 1/2 inch thick
2 tablespoons melted fat or salad oil

1 No. 2 can tomatoes
2 cups sliced onions
1 minced clove garlic
2 teaspoons salt
2 cups sliced, peeled potatoes
2 tablespoons flour
2 tablespoons water

Brown lamb in fat in Dutch oven or a deep skillet. Add tomatoes, onion, garlic, and salt. Simmer, covered, for 1 hour. Add potatoes and simmer, covered for 30 minutes until meat and potatoes are tender. Arrange lamb slices on a hot platter with potatoes over them. Blend flour and water, and stir it into gravy. Bring to a boil. Pour around and over potatoes.

New Cheese To Open Another Outlet For Bigger Milk Market

Here's the latest information on that new type of natural cheese developed at the U. of Wis.

The new cheese, released this summer, has some of the characteristics of cheddar and some of the characteristics of processed cheese, but really is neither.

Dairy Researchers D. M. Irvine and W. V. Price, who developed the cheese, feel that the new product promises to open up another avenue for sale of milk.

The new cheese has a mild, creamy flavor and smooth soft body. It is similar to process cheese in body characteristics. But unlike process cheese, the new type is ripened by bacteria. It slices very well and its flavor should appeal to people who eat process cheese & cheese spreads. But this new, natural cheese has a flavor all its own, the researchers add.

Irvine and Price expect the new cheese to cost about the same or a little less than process cheese. As yet, the new product is unnamed. Cheese makers will welcome the new cheese because curdiness disappears in less than two weeks and the cheese ripens in one or two months—as fast as any cheese on the market. The making process can be completely mechanized. The cheese has normal keeping qualities in storage, but doesn't gain enough in flavor to warrant long holding periods. It can be shaped for merchandising in many different styles.

The normal making process for cheddar cheese is followed until the cheese is ready to be dipped. At that time, the drained curd is covered with warm brine until the proper acidity develops. Then the curd-brine mixture is heated, drained, and hooped.

The moisture content can be varied from 42 to 50 per cent. With high moisture the cheese can be spread easily. With lower moisture, it is a good slicing cheese.

No Sleep

Insomnia had been troubling the tailor for several nights and the poor man finally decided to try the old remedy of counting sheep. But the following morning he turned up for business looking more tired than ever.

"What a night!" he told his partner. "I counted 3,000 sheep. Then I happened to figure that they made 8,000 yards of wool. Then I figured that would make 2,500 suits. How can a man sleep, worrying where he could get all that lining?"

Crossed Eyes Need Competent Attention

Crossed eyes do permanent damage to a child's personality as well as cause partial blindness, if they are ignored in the hope that he will "outgrow" them. Early attention by a competent eye specialist results, in most cases, in straightening the eyes through exercise or a combination of exercise and surgery. That is what happened to little six-year-old Brian Beattie, whose mother, Carol, tells in Redbook Magazine the heartwarming story of how he finally saw straight after four long years.

"Brian's eyes crossed when he was two and a half, and with such dramatic suddenness that Bob and I could neither believe nor bring ourselves to accept the catastrophe. One parent after another has told us that his child had perfectly straight eyes until an illness or a fright made them cross, and each parent hoped it was temporary.

"So, like many other parents, we ignored the situation—until the night when one of the less tactful boys in the prep school of which my husband was the chaplain leaned across the table in the dining room and asked bluntly: 'Mrs. Beattie, do you know Brian's as cross-eyed as heck?'

"The next day the eyes looked fine, but we took our son to a doctor just the same. We were in a hurry, so we consulted the small-town practitioner, who said he would outgrow them and doubled his daily dose of cod-liver oil.

"That was tragically wrong advice, for less than one per cent of all cross-eyed children ever outgrow the defect. We continued to worry and finally took Brian to an out-of-town pediatrician, who also prescribed extra cod-liver oil. It wasn't until we moved to Atlantic City, New Jersey, that we heard of a famous family of eye physicians—a father who diagnoses and treats all kinds of eye diseases, his son, who is a gifted eye surgeon, and his daughter, who is a technician, guiding young patients through special exercises.

"Doctor H. L., the father, put Brian through a series of exhaustive tests, at the end of which he said: 'The eyes can be straightened. I can't tell you how long it will take or which method will work best with him. Every pair of crossed eyes is a unique case, and his have had time to form very bad habits. He'll need prescription glasses, a course of exercises to teach those eyes to work as a pair, and possibly surgery to put the eyes in the proper position so that they can work together.'

"Two weeks later, after getting the glasses, we went to visit Miss Sally, the doctor's daughter to arrange for the exercises. 'He'll have to wear an occluder,' she told me. 'An occluder is an eye patch which blocks out one eye at a time in order to make the other one work.'

"There were moments during that year of exercises when my courage flagged because I seemed unable to grasp what the exercises were intended to do and why the eyes did not miraculously straighten. The best advice I can think of for the parents of any disabled child is to put your child in the hands of the best specialist you can find, let him carry on, and do exactly what he tells you to.

"Finally, it was time for surgery. Young Doctor R. D. told me: 'Of course crossed eyes won't kill him as a diseased appendix might, but if the eyes aren't corrected, there will be a steady loss of vision. And his personality will suffer, too. Any disfigurement is

bound to have a psychological effect. Afterward, he will need glasses and exercises—for a while at least.'

"Five days after the operation, we brought Brian home from the hospital, still bandaged, but ours to cuddle and care for. On Saturday the bandages came off, and two blue eyes blinked at the light—blinked and looked straight into ours. But the biggest dividend of all came on the first day after Brian's bandages came off when he took my hand and said, 'Look, Mommie, I think we had better go over to church and tell God thank you for my straight eyes.'

Tell Him

The sergeant was trying to train an awkward squad of recruits. "Shun! About turn!" he roared. Then, as he viewed the hopeless mix-up, he went on: "As you were!"

Most of the men shuffled into the last position, but Private Jones stood still, looking vacantly ahead.

"You!" snapped the sergeant. "I said as you were!"

"I 'card sarge," replied Jones, unhappily, "but 'ow were I?"

THE U. S. ARMY supplied high quality hatching eggs to improve the breed of South Korean poultry.

Sports Afield

By Ted Kesting

Col. Townsend Whelan, well known arms expert and author of many outdoor articles, has a few words of advice for those of you planning your first deer hunt this fall.

Never forget that "safety first" is the primary rule, and next to that marksmanship that insures killing game with a single, instantly fatal shot. The hunter who has trained himself in marksmanship so that on the range at 100 yards he places all his shots in a 4-inch bull's eye doesn't get buck fever—he gets the buck.

If you are using a new or strange rifle, the most important preparation is sighting it in. Remember the rule of sight adjustment: Move the rear sight in the direction in which you wish to move your point of impact, or move the front sight in the opposite direction.

Whenever you can do it, aim so as to have your bullet drive into the lower part of the chest at the shoulder, but not behind the shoulder. This is where the heart lies, and around that is the largest vital area.

When a deer has been killed it does no good to cut its throat. The animal should be gutted at once. For butchering you need a 4 or 5 inch blade and a small carborundum stone (in your pocket, not back at camp).

Turn the animal so its head and chest are uphill. Split the skin and abdominal wall from between the

legs to the brisket, being careful not to cut any of the intestines. Reach inside and cut the diaphragm free all around. This is the membrane that separates the chest from the abdominal cavity.

Reach way up inside the chest and cut the windpipe and other vessels leading up into the neck; take hold of them and pull the heart, lungs, and finally all the abdominal contents out of the animal, cutting loose the adhesions to the backbone when necessary, and finally cutting free at the anus.

There will be about a bucket of blood left in the animal. Dump this out, wipe the cavity dry with bunches of grass, and drag the carcass to a clean piece of ground. Save the heart, liver and kidneys.

Prop the abdominal cavity wide open with a stick so it can cool off and air can circulate. If necessary cover over thickly with spruce or pine brush to keep flies and birds away. After you have packed the animal back to camp, use four or five yards of cheesecloth to keep flies off the carcass. Then you'll be able to bring your trophy home in good condition with no wasted meat.

THE U.S. ARMY dusted millions of South Koreans with louse-killing DDT.

BORED BEAR—After a hard day of lying around and being stared at by his visitors, Mischa, the polar bear, lets out a mighty yawn and prepares to retire for the night. Mischa can be seen daily at his home, the London, England, Zoo.

Sportsmen Should Heed Courtesy Rule

In a letter to Wisconsin sportsmen's clubs, Conservation Director Ernest Swift points out that field reports indicate a great hunting season and he adds that hunters will have responsibilities as well as opportunities.

Swift commends farmers, landowners in general, and the many active sportsmen's groups for their cooperation in carrying out the last year's program and declares that everybody has a stake in all phases of conservation.

"As sportsmen," Mr. Swift said, "we should extend help to the farmer wherever we can. Much would be accomplished if all of us recognized the fact that farm land is private property to which we can have access only by permission of the land-owner. Failure in this direction is the primary cause of farmer-sportsman difficulties. This department appreciates the help we have had from the many sportsmen's organizations toward the solution of this problem. Sportsmen's groups have been a big help in furthering general conservation by their voluntary efforts in setting up habitat improvement programs and individually pitching in to help plant game foods and shrubs for wildlife on lands useless for other production. This work has done much to bring about a consolidation of interests. Farmers and sportsmen meeting on common ground have much to offer for the general welfare."

Swift emphasized that the rules of society apply outdoors as well as indoors and that "we use no one's property without invitation or permission."

TURTLEHEAD

Turtlehead
C1952 National Wildlife Federation

Here is one of our wild flowers that field naturalists like to find. It is rarely abundant and within its range it is common enough so that in one form or another it may be found now and then on almost any field trip at any time of the year. Of course, the plant in winter looks like the attractive plant of late summer and fall.

The Turtlehead is well named probably from the remote resemblance of the flower to a turtle's head. It also goes under such names as Balmony, Snakehead, Galena or Tete de Tortue. The fact that it has been given so many common names might indicate that it has been sufficiently attractive to be given a name by persons other than botanists. Since the flower is not edible, has no recognized medicinal flavoring, poisonous or other practical values it must rely on its beauty for whatever place it may have in Nature's Hall of Fame.

Its beauty, if it has any, is not blatant. It has no spectacular fragrance. It never occurs in sufficient numbers to add masses of color to a part of the landscape even if it were brilliantly colored. It must be that it is just because of its modest beauty and relative rareness that we like the thing.

Turtlehead grows in wet spots such as the banks of swamps and marshes and it is not uncommon in the little eddies along the edge of a brook. It grows to a height of up to 3 feet, which is tall enough to get the flowers high enough to be seen among the usual associated plants. The stems are angled and smooth. The leaves are smooth, bright green, to 6 inches long, with well-toothed margins and short stems if any stems are present. The leaves are opposite and more or less uniform in size from the lower to the upper portions of the stem.

The flower looks something like a bottle gentian but is for the most part white, delicately tinged with pink, crimson or sometimes a bluish color. Sometimes it is more greenish white and white than as suggested above. The upper lip of the flower overlaps the under lip for a short distance but the whole flower is rarely over 1 1/2 inches long. The stems remain erect through the winter, holding the capsules that bear the seeds.

When the flower is in bloom it may be visited by the Baltimore Checkerspot Butterfly, whose caterpillars are reported to be dependent wholly upon this plant as a source of food.

Turtlehead ranges from Newfoundland to Florida and west to Manitoba, Iowa and Texas. There is a closely related Red Turtlehead which has the flowers definitely reddish to purplish. The Red Turtlehead is generally smaller than the regular Turtlehead and is found in wet places from Virginia to Iowa and south to Arkansas and Florida and to some extent into Mississippi. Another form, which is a variety of the Red Turtlehead, is found from Minnesota to Arkansas and east to Indiana.

Those who know the simple beauty of this plant will understand why the National Wildlife Federation saw fit to include it in its stamp series. Possibly you have some suggestions as to what forms of nature should be given this recognition in the future.

E. Laurence Palmer

Stroke of Pen Creates Army "Millionaires"

Sendai, Japan — Millionaires may not be commonplace in the Army, but "millionaires" are.

The quotation marks make a big difference. They mean that while the Army "millionaires" don't necessarily have big bank accounts, they do have big responsibilities.

There are many men in the Army who must keep watch over equipment worth millions—hence Army "millionaires."

At Camp Haugen near here, for example, First Lieutenant Allen W. Feldman of 132 North Robinson Street, Philadelphia, Pa., is a "multi-millionaire."

He is signed out with, or personally accountable for, equipment and plants of the post engineers property in the Haugen area valued at \$13,048,000 (M). In addition, he is responsible for other equipment valued at \$2,000,000 (M), placing his total "holdings" at more than \$15,000,000 (M).

Other "millionaires" at Camp Haugen are Captain Ralph O. Berryhill of 602 North Troadway, Hugo, Okla., and First Lieutenant Walter D. Hall of 910 Tyson St., Knoxville, Tenn.

Berryhill, as special services officer, is accountable for the Haugen Service Club, library, gymnasium, theater, hobby shop, golf course, and dependent school, plus all equipment connected with their use.

These holdings have a value of slightly more than \$1,000,000 (M). Hall is commanding officer of a tank company, and is signed out with property valued at more than \$3,000,000 (M).

Government Helps Livestock Farmer

The country's drought this year, especially in the Southwest, has brought thousands of livestock farmers and ranchers close to disaster. Many pastures have burned up—stockmen have had to buy large quantities of feed—and many farmers can no longer borrow the money from regular credit sources to foot the bill. In some parts of the Southwest area of the country the drought is in its fourth year.

To help meet the emergency and guarantee the consumer a steady meat supply, President Eisenhower, Secretary of Agriculture Benson, and Congress rushed through a new kind of credit known as "Special Livestock Loans."

Qualified applicants may borrow the funds to buy or produce feed and to pay other operating expenses necessary to stay in business. These Special Livestock loans are available in all States to livestock operators who cannot get the credit they need from banks or other private credit sources to carry on their livestock operations.

As of September 1, this new nation-wide program which has been in operation for about one month, has already approved over \$3,500,000 to livestock producers. Applications have been received in 26 states and are being considered as rapidly as possible by state and local livestock committees appointed by Secretary Benson.

In Wisconsin, County Supervisors of the Farmers Home Administration are in a position to answer inquiries about loans and to receive applications. Richard B. Walsh is the FHA County Supervisor for Washburn and Burnett counties, and his office is located at Old City Hall Bldg., Spooner. Mr. Walsh also has an office day in Siren at the Agricultural Hall on Mondays only.

With Strings Attached

The partners called their plant manager in and said: "We find that last year's business was the best since we opened the place. We know how much hard work you put in for us, and as a special mark of our appreciation, we are making out a check for one thousand dollars for you."

The manager stammered his thanks.

"Yes," went on the other partner, "and if next year's business is as good as this, we'll sign it."

Turn About

Smith — Before I married, my wife made me promise to quit smoking.

Jones — And you kept your word?

Smith — Yes. Now, I'm doing my best to get her to promise.

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK — Fall hunting seasons, now under way in most states, bring up the reflection that many good-sized economic activities are underrated because they are not carried on with the help of assembly lines or tall buildings.

Hunters and fishermen, every year, spend \$10 billion. That's more than the sales of all the retail drug stores in the country. It's twice the take of retail liquor stores, and even surpasses the annual revenues of the numerous gasoline filling stations.

The huge sum spent is divided this way: 11.2 per cent for guns and their accessories; 10.4 per cent for fishing rods, lines, nets and such gear; 19.6 per cent for such miscellaneous purchases as knives, cameras, tents and camp cooking outfits; 10.4 per cent for meals and lodging on trips; 6.9 per cent for special clothing; 6.2 per cent for dogs, and 16.6 per cent for transportation.

As the country fills up with people, and the beasts and fish retreat before them, special vehicles for transporting sportsmen to remote areas becomes increasingly important. Sportsmen are now the buyers of one out of every four of the vehicles best fitted to take the gunner where the birds are. The go-anywhere Jeep, and other four-wheel-drive Willys vehicles are the most popular of these.

BUSINESS TROUBLES — One of the most interesting series of data on the business picture in Dun and Bradstreet's business failures compilation. For August, last month to be examined, it shows these trends:

Failures as a total are well above 1952, but only a shade above 1951. For what the sociologist can make of it, business casualties are down considerably among food stores, but sharply higher among eating and drinking places catering to those who dine out.

Building materials dealers also showed a division, with vendors of lumber and building materials in general finding it easier to keep out of bankruptcy, while failures were increasing among sellers of plumbing and heating supplies.

THINGS TO COME — A line-at-a-time reading glass, extruded from transparent plastic, can be ordered in whatever multiple of three inches fits your needs. . . . Circular TV antennae which look like weather vanes are said to give better reception than conventional kinds. . . . Duck hunters can get a rubber-fingered attachment, for an electric drill, to pluck this season's kill. . . . New fast-drying aluminum paint does not begin to oxidize until the temperature passes 1200 Fahrenheit. . . . Small sports enthusiasts can get ready-inflated plastic footballs for 20 cents.

CLASSIFIED PROPHETS — Business forecasters are divided into three groups—optimists who are always too hopeful, pessimists who are always too doleful, and whoever is speaking, who places himself in a one-man category he calls realist. That was how J. W. Keener, vice president of the B. F. Goodrich Company, introduced his picture of 1954 to the recent management conference of the University of California. He went on to say:

"Nineteen-fifty-four will not be the best year in our economic history. It may not be the second best. But it will rank along with the second and third best years of our history. It will be better than business was in 1950 or in any year before."

Keener explained that his forecast was based on the principal props of the economy: government spending, buying of durable goods, and spending for perishable consumer goods and for services. He said he doubted that the first would decline; he felt the second would not fall far; and he recalled that except for a 2 per cent decline from 1937 to 1938 spending for perishables and for services had risen in every year since 1933.

DROWNING IN OIL—The Independent Petroleum Association of America convened in Fort Worth, Texas, last week. Gen. Ernest O. Thompson, who turns on and off all Texas crude oil production as chairman of the Texas Railroad Commission, told the delegates that imports of oil were robbing American producers of \$93,400 in sales every day.

The administration would like to keep a certain surplus of producing capacity in this country, against the day when foreign oil might be shut off in wartime. The big oil companies, with wells in this country and out, feel the same way. But the IPAA, consisting of producers with wells in this country alone, will make a big drive in the coming Congress to reduce imports and use this country's oil faster.

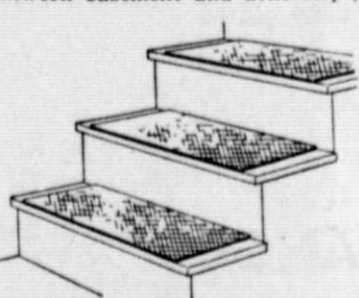

SEEKING PEACE—England's aging Prime Minister Sir Winston Churchill flashes his familiar smile as he leaves Downing Street for the annual Conservative Party conference. Since his return to activity Churchill has been urging a top-level big-four meeting and a nonaggression pact with Russia. He also has announced his intentions of seeing Malenkov alone if necessary.

How to Skid-Proof Stairs

FALLS on stairs are a common cause of home accidents. There are several ways to prevent such mishaps. One is ample lighting. Another is keeping the steps clear of toys, bottle cartons, rubbers, umbrellas and other items.

A slippery surface is another cause of falls on steps. For smooth, unworn basement and attic steps,

cover the slippery surface with some Masonite Tempered Presdwood one-quarter inch thick. Nail it down with the rough, screen side up, thus successfully skid-proofing the stairs.

Other places for using this non-skid covering include the steps in a barn or other farm building, stairways to commercial or industrial lofts, steps to a child's slide, treads of a step-ladder, top of a stool used to stand on, floor in the home or farm workshop.

When the screen surface of the hardwood wears thin, after years of use, it's an easy matter to replace the material.

Ticklers

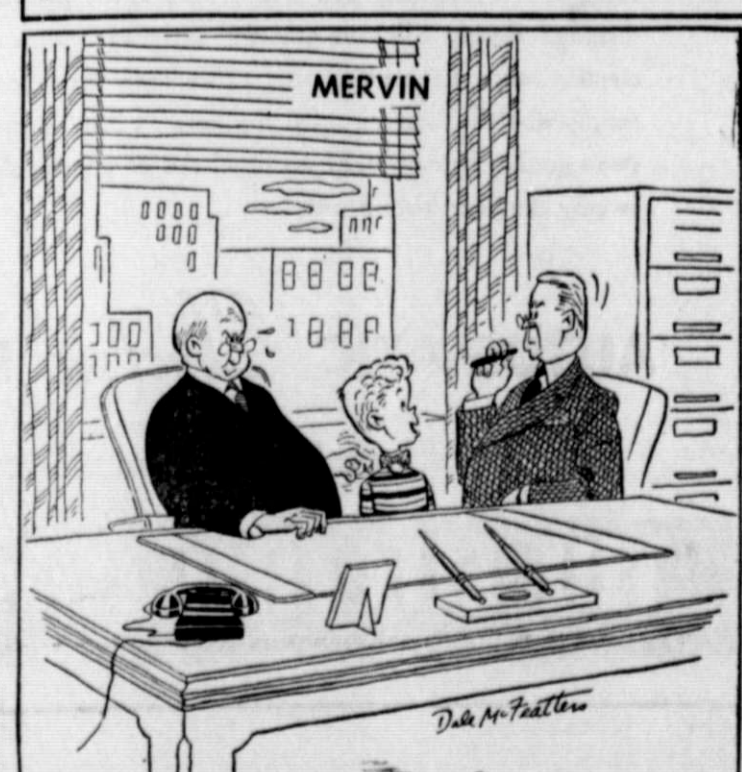

By George

"Oh, oh! The judge always does that when he's bored with a case! He used to be a juggler!"

STRICTLY BUSINESS

by McFeeters

"I thought you were an engineer—Mr. Pottleby says you're always riding the gravy train!"

Way Ahead of Him

A high school girl, seated next to a famous astronomer at a dinner party, asked, "What do you do in life?"

"I study astronomy," he replied.

"Really?" exclaimed the girl. "I finished astronomy last year."

THESE WOMEN!

By d'Alessio

"Darn it, Martha, can't we even sit around in the park without you feeling you have to rearrange the furniture?"

Adjourned Meeting
October 13, 1953
The Village Board of Kewaskum, Washington County, Wisconsin met in adjourned meeting with President C. Miller presiding and all board members present except Trustee Sparks.

The minutes of the previous meeting were not read.
The purpose of this meeting was to discuss with the various industries of Kewaskum the proposed plan for the financing of the construction and maintenance of a new sewage treatment plant.

Mr. Clinton represented the McMahon Engineering Co., Mr. Peterson represented Regal Ware, Inc., and Mr. N. W. Rosenheimer represented the Rosenheimer Malt & Grain Co. Heinemann Creameries were not represented.

In order to give industry a chance to further analyze the engineer's proposal, the board adjourned to Oct. 29, 1953 at 7:30 p. m.

William S. Martin,
Village Commissioner
Adjourned Meeting
October 20, 1953
The Village Board of Kewaskum, Washington County, Wisconsin met in adjourned meeting with President C. Miller presiding and all board members present except Trustee Sparks.

The minutes of the previous meetings were not read.
The purpose of this meeting was to discuss further the proposed plan for the financing of the construction and maintenance of a new sewage treatment plant.
Mr. Clinton represented the McMahon Engineering Co., Mr. James Reigle represented Regal Ware, Inc., Mr. Kronke represented the

Rosenheimer Malt & Grain Co. and Mr. Geiger represented Heinemann Creameries.
After hearing all comments and suggestions from the various representatives, the board decided to schedule another meeting for November 17, 1953 at 7:30 p. m. at which time a definite plan of procedure is to be formulated.
William S. Martin
Village Commissioner

LET'S TALK TURKEY!

Let's talk about the most important holiday job of all... roasting the turkey! Remember the "good-old-days" when the job started early in the morning and hours were spent pecking, basting and turning? Reddy Kilowatt and the automatic controls of a modern electric range have taken that chore away from today's cook... simply dial the heat... dial the time... and Mr. Turkey will be done golden brown, right on time! All of your cooking can be just as easy the year 'round with an...
