

About 300 People at County School Convention Here

The spring convention of the Washington County School Board held in the Kewaskum High school Monday night was attended by approximately 300 persons. The gathering included teachers from throughout the county, members of the school boards and other interested persons.

The meeting opened with a program of musical selections by the Kewaskum High school music department. Highlight of the convention was the honoring of two veteran Wisconsin school teachers, Miss May Rosen, director of the elementary department at the state college at Stevens Point, and Miss Mary Meyer, supervising teacher of Washington county. Both have long records of service as teachers.

The two teachers were very much surprised with the honor bestowed upon them by county educators. Miss Rosen spoke on "This Job of Yours and Mine."

The use of strip films in the classroom was discussed by C. J. Krumm of Encyclopedia Britannica Films, Inc. Miss Mary Cook, county nurse, discussed school health problems and Ray Bast president of the Washington County School Board association, briefly addressed the group.

A panel discussion of school problems, including the pupils attitude toward school attendance and behavior were discussed. It was the opinion of those present that school problems today are no greater than they were years ago.

PARISHES TOP CHARITIES DRIVE QUOTA FIRST DAY

The annual Milwaukee Archdiocesan Catholic Charities drive got off to the best start it has ever had as \$104,500 in contributions was reported on the first day Sunday. The goal of the two week drive is \$100,000.

Holy Trinity parish of Kewaskum was among those that exceeded their quotas on the opening day. Other parishes in this area over their quotas the first day included St. Peter's, Slinger; Holy Angels, West Bend; Sacred Heart, Allenton; St. Mary's, Random Lake; St. Kilian's, St. Kilian.

Frank M. Surges, Wauwatosa, general chairman, said the strong showing was due to 41 parishes that exceeded their quotas on the opening day. The fund finances charities in the archdiocese's 267 parishes in Milwaukee, Racine, Kenosha, Waukesha, Ozaukee, Washington, Walworth, Dodge, Fond du Lac and Sheboygan counties.

POLICE CHIEF'S DAUGHTER CRACKS BONE IN HER ANKLE

Geraldine, daughter of Police Chief and Mrs. Gerry Guttman, Kewaskum, suffered a cracked bone in her ankle in a fall at the Kudek farm west of Kewaskum Saturday. Geraldine and her friends had gone to the farm to play. She fell in the barn and suffered the injury. She is now at home after being confined to St. Joseph's hospital, West Bend, over the week end.

SCHLEIF'S HAVE TWIN DAUGHTERS BAPTIZED

The twin daughters of Mr. and Mrs. Roger Schleif, town of Auburn, were baptized Sunday afternoon by the Rev. Gerhard Kanies in St. Lucas Ev. Lutheran church. They were named Susan Jane and Sandy Jean. Sponsors were Mr. and Mrs. Willard Bartelt, Mrs. Otto Weddig and Ivan Buss. A number of guests were entertained for the occasion.

SKAT TOURNAMENT

A skat tournament will be held at Heisler's tavern, Kewaskum, Thursday, April 5. Entry fee \$2.15. Lunch served.

Prize winners at the last tourney were: 1. Leo Flasch, 22-7-15 games, 257 points; 2. M. Schaub, 494 points; 3. W. Frost, club solo vs. 4-6; 4. M. Schmidt, 16-2-14 games 452 points.

Kewaskum, Ixonia Play Off for Title Sunday

The Kewaskum Land o' Rivers basketball team will open the grand championship series against Ixonia Sunday night in a preliminary to the West Bend Benders-University of Wisconsin seniors game at McLane school gym, West Bend, starting at 7 p. m.

Kewaskum won the second half title in the Rivers circuit by sweeping to seven straight victories without defeat, Ixonia, which tied Horicon for the first half championship, earned the right to meet Kewaskum by noing out Horicon, 30-78, Saturday night at Port Washington in a first half playoff.

The Ixonia-Horicon contest was very close and the winners overcame a Horicon lead with a closing rally which resulted in victory. No more than four points separated the teams throughout the tilt.

Kewaskum's main problem will be to stop the speedy attack of the fast-breaking Ixonia team. With giant George Hanahan, Ken Pierce and Don Meisenheimer in the line-up Kewaskum will have a decided height advantage. Lloyd and Leltoy Keller, Bob and Floyd Dreher and Syl Hawig are also expected to see their share of action against Ixonia.

The loser of Sunday's tilt will host the second game in the three-game series. The third if necessary will be played on the floor of the winner of Sunday's contest.

Nurses of Area Meet to Discuss Disaster Nursing, Polio Vaccine

Registered nurses of the West Bend chapter of the American Red Cross met at the St. Joseph hospital nurse's lounge, Thursday afternoon, March 25, for timely discussions on disaster nursing and polio vaccine.

Miss Marion Batdorf, director of nursing services, Milwaukee county chapter of the American Red Cross told about her experiences in nursing disaster while on tornado disaster at Flint, Michigan, last summer. She related that during the first three days about 200 nurses from Flint and nearby towns reported to the hospital and volunteered their services. Following that emergency period nursing care was given to 469 individuals, and from June 10 to August 1st when the disaster operation closed, Red Cross had hired 125 registered nurses who worked 857 days; 15 practical nurses who worked 172 days. The national nursing staff sent to Flint consisted of 8 nurses and one chapter nurse.

Injuries resulting from the tornado included fractures of all types, legs, arms, shoulders, pelvis, skull, jaws, spine; head injuries including brain damage with mental depressions. The case resulted in blindness, and two mothers were double amputees.

Dr. Alvin T. Grundahl in speaking about polio disaster nursing, told the nurses that they were an ever-present resource in the community in keeping their friends and neighbors correctly informed in the field of health. He stated that the polio vaccine validity test will be getting under way in early April. This is a bit later than was previously planned, but it has taken longer than was anticipated to check and recheck the many steps involved in converting the results of Dr. Jonas E. Salk's laboratory research into large-scale commercial production.

He further pointed out that the polio vaccine tests in most states in selected areas will be given to second grade school children with the first and third grades acting as statistical controls.

In welcoming the nurses, Chapter Chairman, F. W. Bucklin, also gave due recognition to Jane Juliano whose birthday is observed March 12, for her outstanding service in the field of nursing. She conceived the idea of a reserve of nurses on call for service in time of war or peace and to help the sick and to pass their knowledge on to others. Mr. Bucklin stated that the chapter is very fortunate to have 61 registered nurses available.

Committee assisting Mrs. Harold Fischer, nursing services chairman, were Sr. Mary Lelia, Mrs. Edna Walters, Mrs. J. W. Pick, reception; Mrs. R. J. Lake, Mrs.

Miss Olson Wed to Atty. Lyle Bartelt

Zion Evangelical Lutheran church at Rhinelander was the scene of the Saturday wedding, March 20, of Miss Evelyn Lorain Olson and Lyle William Bartelt, son of Mr. and Mrs. August C. Bartelt, Kewaskum. The Rev. Erwin Schart performed the two-thirty o'clock ceremony.

The daughter of Mr. and Mrs. Axel E. Olson, Rhinelander, wore a bridal gown fashioned of white satin and chantly lace. The gown was styled with a lace bodice and peter pan collar with tiny satin buttons down the front. The bouffant satin skirt had two panels of lace in front and back and lengthened to a court train. The fingertip veil of imported silk illusion was caught to a jeweled crown. She carried staphanotis and white orchids in a bouquet.

Miss Ruth L. Olson, Milwaukee, sister of the bride, was maid of honor. The bride's cousin, Miss Margaret Kriesel, Milwaukee, and the bride's sister-in-law, Mrs. David Bartelt, Kewaskum, and Miss Mary Belle Hancock, Milwaukee, were the bridesmaids.

The maid of honor and the bridesmaids wore floor length court dresses of Dior blue silk taffeta styled with scoop necklines and three quarter length sleeves. The peg top skirts were draped in fullness in back to form a sweep train on the dresses. They wore matching pearl and lace crowns and white gloves. The maid of honor carried bouquets of roses in a tapered bouquet. Matching bouquets of happiness roses were carried by the bridesmaids.

David C. Bartelt, brother of the groom, served as best man. Alfred E. Olson, brother of the bride, Rhinelander, Arthur Moss, Beloit, and Dr. F. E. Nolting, Kewaskum, were the ushers.

The bride's mother wore a dusty rose silk crepe suit dress and matching hat, with navy accessories; the groom's mother wore a pink lace dress with navy accessories. Lavender orchid corsages were their flowers.

Immediately following the ceremony, the reception was held at Timber Lodge, Rhinelander, where they received all their many friends and relatives.

After a honeymoon in Mexico, the couple will make their home in Kewaskum.

MEETING OF KEWASKUM SOFTBALL TEAM APR. 8

An organization meeting of the Kewaskum team of the Cross Country Softball league will be held at the Kewaskum Opera House on Thursday evening, April 8, at 8 p. m. All those interested in playing on the team should attend this meeting.

Merlin Dreher, Manager

Norman Justl, and Mrs. Fred Gatz, refreshments.

Other registered nurses in the chapter are: Mrs. Charles Bash, Mrs. H. C. Bennalack, Mrs. Jerome Berned, Mrs. Robert Berger, Mrs. Herald Berkholtz, Miss Mary Cook, Mrs. R. H. Driessel, Mrs. Wm. Elmermann, Mrs. Dennis Ewing, Mrs. R. O. Frankow, Mrs. John E. Gerner, Mrs. Clarence Gumm, Jr., Mrs. A. H. Heisner, Mrs. George Hess, Mrs. Donald Huhn, Miss Mary Kileayne, Mrs. Jack Killeen, Mrs. Marvin Koenig, Miss Margaret Krejci, Mrs. Catherine Kueper, Mrs. Art. La Roux, Mrs. J. Lauer-mann, Mrs. W. B. Linnemeyer, Mrs. Franklin Lord, Mrs. K. G. Marsden, Mrs. E. Maxon, Mrs. Irene Mc Bride, Mrs. Don Merten, Miss Mary oran, Mrs. Wm. Nick-olson, Mrs. W. A. Nielsen, Mrs. Louis Ottmer, Mrs. Gerhard Pelke, Mrs. Maurice Rosenheimer, Mrs. Al Runte, Mrs. L. J. Salter, Mrs. Marvin Schaefer, Mrs. Donovan Schallert, Mrs. Walter Schneider, Mrs. Joseph Scholler, Mrs. Wm. Shane, Mrs. George Strodthoff, Mrs. Douglas Weymier, Mrs. George Winkler, Jr., Mrs. Elsie Thorson, Sr. M. Delores, Sr. M. Euphemis, Sr. M. Generose, Sr. M. Nicoletta, Sr. M. Michaline, Sr. M. Odila, Dr. M. Odila, Sr. M. Rehabil-da, Sr. M. Thea.

Mmes. Mc Bride, Rosenheimer, Runte, Schaefer and Schneider are from Kewaskum.

Board Contracts for Test Borings at New Disposal Plant Site

Regular Meeting March 1, 1954

The Village Board of Kewaskum, Washington County, Wisconsin, met in regular monthly meeting with President C. Miller presiding and board members present.

The minutes of the previous meetings were approved as presented.

The McMahon Engineering Co. was instructed to replat the location of East Water Street so as not to disturb any of the property owners trees.

The proposals of Harry Brabender and the McMahon Engineering Co. for the preparation of an assessor's plat map were tabled.

Motion by M. Schaefer, seconded by J. Stelplflug and carried that the sewer and water facilities be extended westward on South Street.

Motion by L. Kohn, seconded by C. Sparks and carried that the President and Commissioner be authorized to enter into a contract with the Raymond Concrete Pipe Co. of Chicago to perform the ground test borings at the new disposal plant site.

Motion by A. Martin, seconded by M. Schaefer and carried that all bills and wages as recommended and approved by the finance committee be allowed and paid.

Nab Local Youths in Theft Attempt

Two Kewaskum and one West Bend youths were taken into custody by West Bend city police after attempting to take a car from the West Bend Motor company Saturday evening.

West Bend officers answered a complaint about 8:30 p. m. Saturday from a West Bend resident who saw three young men in a 1950 Ford, trying to back out of a parking stall on the south side of the West Bend Motor company.

The officers picked up two of the three youths a few minutes later in front of the garage. The third youth was apprehended in a West Bend restaurant a short time later. Involved were two Kewaskum boys, both 18 years old, and a 16 year old West Bend youth.

While being questioned later at the police station, the boys admitted that they intended to take the car but had trouble backing out of the stall. Apparently being afraid of being caught, the boys soon gave up trying to move the car.

They said they planned to drive over to a restaurant in Allenton for some beer. One of the boys, from Kewaskum, was on probation and will be turned over to his parole officer. The boys were to appear at the police station with their fathers Monday night with the possibility of a scheduled juvenile court appearance.

NINETIETH BIRTHDAY OF PAUL KOHLER CELEBRATED

The following helped Paul Kohler celebrate his 90th birthday Sunday at the home of Mr. and Mrs. Alvin Volm:

Mr. and Mrs. Arthur Kohler, Sr. and daughter, Mr. and Mrs. Arthur Kohler, Jr., Mr. and Mrs. Ralph Kruger, Mr. and Mrs. Oscar Kohler and family, all of Milwaukee; Jerry Green of Detroit, Michigan, Mr. and Mrs. Richard Weiss and daughter of West Bend, Mr. and Mrs. Norman Arlborgh and family of Allenton, Mr. and Mrs. Peter Kohler and family, Mr. and Mrs. Alan Dreher, Mr. and Mrs. Wm. Volm and family all of Kewaskum; Mr. and Mrs. Philip Volm, Mr. and Mrs. Elroy Schrauth, Mr. and Mrs. Raymond Boegel, all of Campbellsport; Miss Arlene Helneke of Allenton.

FIREMEN ANSWER CALL TO SPRING SCHOOL ON FRIDAY

The Kewaskum fire department was called to the Spring school in the town of Wayne at 11 a. m. last Friday. They were summoned when the school building became filled with smoke. No fire was found in the building and it is believed that the smoke might have been caused by the igniting of dust or paper in the air vent of the oil burner. No damage resulted.

REGISTER OF DEEDS PICK LISTS VITAL STATISTICS

Washington County Register of Deeds, Edwin Pick, reports that in the department of vital statistics the following instruments have been filed since January, 1954: Births-January 28, February 28, March 25, Deaths-January 20, February 25, March 25, Marriages-January 11, February 14, March 26.

CARDS AT ST. KILIAN

St. Mary's sodality of St. Kilian's parish, St. Kilian, will sponsor a pillow case card party in the school hall on Sunday evening, April 4, at 8 o'clock. All popular games will be played. Lunch will be served. The public is cordially invited.

BOY SCOUTS TO HOLD BAKE SALE APRIL 10

The Boy Scouts will have a bake sale on Saturday, April 10, at Koeh's store. The scout committee, the sponsoring Kiwanis club and the Cub Scout, Boy Scout and Senior Scout parents are all co-operating to make this possible. The money raised will be used to help defray camp expenses for the week the scouts will spend at Camp Shaginappi this summer.

The more children's fingerprints in a home, the fewer on police blotters.—New Oarug Post.

William S. Martin Village Commissioner

Kiwanis Club Hears Talk On Vocational Guidance

A very informative talk was given on Monday, March 29, by Mr. Eggert of the West Bend High school, who is the vocational guidance director. He explained at this meeting of the Kewaskum Kiwanis club the work presently being done by the high school in preparing our youth for the future.

Vocational guidance is a very complex process, having many ramifications, but Mr. Eggert condensed this procedure as follows: He stated that the first step was to give the student an aptitude test and determine what type of vocation or job he was suited for; secondly, after determining the variety of vocations that the student was suitable for, class discussions are held explaining the details of this particular vocation; thirdly, each student is interviewed singly and given full details along the line he has chosen; fourthly, class room discussions are held, giving all students a chance to ask questions about the particular vocations up for discussion; the fifth step is then to place the student upon graduation, or even prior to graduation, in either full or part-time employment; and lastly vocational guidance department takes an interest in the student after he has taken a job and follows up to see whether or not the individual is happy in his vocation and if not tries to determine whether or not he can be placed in some other type of vocation for which he is also suited.

The Kiwanians wish to thank Mr. Eggert for bringing this important message to them. We were all made to realize the immense importance of the guidance program, since the well-being of our youth, both present and future, certainly is the foundation of our country.

TED SCHOOF'S BUYS SAUTER HOME; FAMILIES MOVING

Ted J. Schoofs, Kewaskum, has purchased the new home of the late Mrs. Alvina Sauter on Third St. The Schoofs family plans on moving in the home about May 1 from the home of Mr. and Mrs. Fred Spoerl on Fond du Lac ave, which they now occupy. Mr. and Mrs. Wayland Becker and daughter of Red Granite will move into the home to be vacated by the Schoofs family. Mr. Becker is employed at Schaefer Trucking.

Mr. and Mrs. Andy Polzean have moved from the upper apartment in the Charles Jandre home on East Water st. to the former home of Mrs. Emma Lubitz on R. 1, Kewaskum, recently purchased by Otto Ramthun. Miss Adeline Ketter is making her home with her brother-in-law and sister, Mr. and Mrs. Polzean.

IN THE SERVICE

PVT. HENRY DILLINGER HOME; TRANSFERRED

Pvt. Henry Dillinger, Jr., Kewaskum, son of the Henry Dillingers, who has been transferred to Fort Leonard Wood, Mo., now is spending a 14-day furlough at home. Pvt. Dillinger's new address will be Pvt. Henry Dillinger US 55452050, 9th Aft 6th Armd. Div., Ft. Leonard Wood, Mo.

Pvt. Dillinger and his cousin, Pvt. Walter Albrocht, who came to this country from Germany, both enlisted in the army on Jan. 11, Pvt. Albrocht also expects to be here in about two weeks. His address is Pvt. Walter D. Albrocht US 55452047, Co A, 128th Armd. Ord. Maint. Bn, C. C. R. 1st Pht, 6th Armd. Div., Ft. Leonard Wood, Mo.

RURAL WRITERS TO MEET

The Rural Writers club will meet on April 5 at 7:30 p. m. at the West Bend Public Library. Our assignment is to write on "What we expect to get out of the Rural Writers club."

Anyone interested in joining the group is invited to attend. Thistles are easiest to kill with 2, 4-D in the early bud stage. Don't mow them for two weeks after spraying to give the chemical time to work down into the roots.

Send them the Statesman.

Trustee Race to Raise Interest in Election Tuesday

Interest in the April 6 election here next Tuesday will be centered on the race for the three village trustee offices to be elected.

There are five candidates for the three offices and this opposition is expected to swell the vote. Two of the candidates are incumbents Lester Kohn and Marvin Schaefer who will seek re-election. New candidates in the race are James D. Reisle, Carl F. Schaefer (former village clerk), and Henry Weddig, Sr. The third incumbent, Arnold Martin, is not running for office.

Voters throughout the county will also vote for a county court judge and a supreme court justice. Judge Milton L. Meister is unopposed for the county court post, as a result of Atty. Lester Buckley of Hartford dropping out of the race. In the supreme court race, Atty. William J. Dieterich of Hartford will oppose Justice Roland Steine of Milwaukee.

Polls in Kewaskum will open at 9 a. m. and close at 5:30 p. m. Voting, as usual, will be done in the Kewaskum Municipal building.

BIRTHS

HANRAHAN—A son to Mr. and Mrs. Jerome Hanrahan, West Bend, Thursday, April 1. Mr. Hanrahan and wife, the former Myrtle Schmidt, formerly resided on R. 3, Kewaskum. He is a son of the David Hanrahan, R. 3.

RAUBUNAS—A daughter to Mr. and Mrs. Leonard Raubunas, R. 2, Campbellsport, (Forest Lake), Friday, March 26.

ENGELHARDT—A son to Mr. and Mrs. Roland Engelhardt, R. 2, Kewaskum, Friday, March 26.

BIES—A son to Mr. and Mrs. Peter Bies, R. 2, Campbellsport, Wednesday, March 24.

SCHULTZ—A daughter to Mr. and Mrs. Marvin Schultz, Kewaskum, Sunday, March 28.

TROEDEL—A son to Mr. and Mrs. Kenneth Troedel, R. 3, West Bend, Sunday, March 28. Mrs. Troedel is the former Joan McLaughlin of Kewaskum.

WOMAN'S CLUB TO FEATURE ESTHER HOLTON OF WTMJ

"Fun Behind the Mike" will be the theme of the talk at the Woman's club meeting on Saturday, April 10, at three o'clock in the municipal building. Esther Holton, who presents "What's New," an exceedingly popular radio program on station WTMJ, will be the guest speaker.

The West Bend Town and Country club, West Bend and Campbellsport Women's clubs will be guests. A vitally important business meeting for club members only will begin at 7:30 o'clock. Election of new officers is scheduled for that time.

Hostesses for the afternoon will be Mmes. M. W. Iosenheimer, C. T. Smith, O. E. Lay, J. L. Beadle, and E. M. Gnacinski.

NOTICE TO CONTRACTORS

Notice is hereby given that the Village of Kewaskum, Washington County, Wisconsin is accepting bids on the construction of concrete sidewalk, curb and gutter. Specifications are on file at the office of the Village Commissioner. All bids must be submitted on or before 8:00 P. M. Monday, April 5, 1954. The Board reserves the right to reject any or all bids.

William S. Martin Village Commissioner

YOU CAN BET YOUR LIFE—OR A CHILD'S LIFE

Just telling children not to touch harmful objects often isn't enough. They're inquisitive. And they forget. So play it safe—lock up guns, hide matches, keep poisons out of reach—before it's too late.

SAFETY PAYS!

BE CAREFUL—the life you save may be your own!

OFF SIDES—It all goes to prove that it doesn't pay to kick a football into a neighbor's yard. These kids of San Diego, Calif., did that once too often and are now picketing the home of Mrs. Paul Avery in an effort to regain their football. Shown from left to right are: Larry Gore, Betty Stone and Dennis Bolger.

SAFETY CHECK—As one Navy instructor at the Pacific Submarine Base, Pearl Harbor, checks the escape lock of a Momsen lung, another offers some last minute advice in the use of the lung to a Marine about to pass up the 100-foot water-filled escape tube. Looking on are other Marines of the 1st Provisional Marine Amphibious Reconnaissance Group who are undergoing a three day training program in submarine escape techniques. Official U.S. Marine Corps Photograph—119279

BEAUTY AND HER BEASTS—Hollywood mask-maker Mill-cent Patrick stands before a mirror with one of her creations on her head, another to her right. The one at right, called the "Gill Man," will soon be seen in a science-fiction thriller.

A Goose Silly? Not So. The Farmer Says

How silly is a goose? Not silly at all, say farmers and sportsmen, who should know. At least two farmers, living at widely separated places in the United States, have geanders they claim tend sheep, says the National Geographic Society. In each case, the big bird leads the flock to water, then returns it to pasture.

The talents of geese as sentries are well known. Excited gabbling of Rome's sacred geese from their home in the Temple of Juno atop Capitoline Hill roused the Eternal City's defenders in time to rout the barbarian Gauls who invaded Italy in 390 B.C.

Used In Kenya "Watchdog" geese were sent last summer from Suffolk, England, to Nairobi, capitol of British Kenya in East Africa. They were bought by a settler to give the alarm in case of Mau Mau attack.

Across the world in Malaya, the British high command early in 1953 announced that goose sentries were being stationed in pens around villages threatened by Communist guerrilla raiders.

Like their domesticated brothers, the free, high-flying wild geese that go honking down the sky at season's turn rate high in intelligence. Canada geese, snow geese, blue geese, brants all carefully inspect the ground for possible danger before landing, and while feeding, post sentinels.

Most American barnyard geese are descendants of the European and Asiatic grayleg. The best for watchdog duty is the big and powerful Chinese goose, suspicious of strangers and possessed of a voice rivaling a Parisian taxicab horn in penetrating resonance.

Weed Crops Because they are finicky and selective about their food, geese are excellent at weeding crops. Hundreds of thousands of them tend cotton fields, nurseries and blueberry and strawberry patches from Texas to New Jersey.

Their employer's claim they eat crab grass, Bermuda grass and even saw-edged Johnson grass without ever touching the cotton plants, berries or young trees. For lawns, however, they are not recommended. A farm goose is still a valuable bird when prowlers do not threaten and the harvest season is over. Feathers and down are marketable, and roast goose for Thanksgiving or Christmas rivals the turkey as an American table tradition.

Full length coats of wool or heavy silks are worn over print dresses, giving the effect of an ensemble.

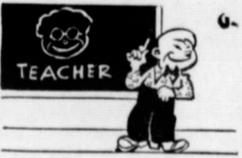

Texas, Montana and Kansas lead the nation in number of acres farmed, says the National Geographic Society. Texas also ranks first in number of individual farms, followed by North Carolina and Mississippi.

STRICTLY FRESH

A MERRY-GO-ROUND manufacturer says his business is booming. It should be, what with all the politicians talking in circles these days.

George Washington brought fame to the hatchet, and Congress has been trying to bury it ever since.

Accusations that two TV personalities are ridiculing real-life teachers have been scoffed at by

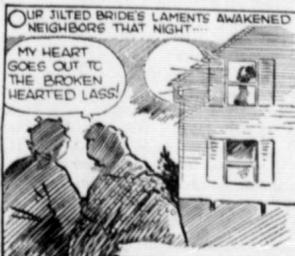

many Cleveland, Ohio, teachers. They know that the real ridiculers are in their classrooms.

A dollar doesn't go very far these days, but it always manages to stay away from our pockets.

On display at the recent fashion show in Los Angeles, Calif., was a belt equipped with an alarm clock. To let us know when it's time to diet, no doubt

FLASHING A CHIMNEY

Chimneys should be flashed with metal to give proper protection against leaks. Frequent expansion and contraction caused by furnace heat during winter weather, soon opens cracks where roofing cement alone is used.

Sheet copper, bronze or aluminum are the best metals to use, although they are scarce and expensive. Heavy galvanized iron, 26 gauge, will last a long time if kept painted.

Start the flashing job on the low side of the chimney. Chip out the mortar about 7/8" deep, between the second and third row of bricks above the roof.

Cut a strip of metal as long as the chimney is wide, and about 12" in width. Bend a 7/8" flange along one side, to a 90 degree angle. Bend at the base of the chimney to fit the slope of the roof. Do not fasten in place until the end pieces have been installed.

The narrow sides or ends of the chimney may be flashed with several small pieces as illustrated. Install the two lower corner pieces first.

Pack the groove full of roofing cement and insert flange of the

flashing metal. Apply roofing cement liberally under flashing, and fit flashing to side of chimney with a wood mallet or hammer. Be sure to fit around the corner. Shingles should fit under shingles on the sides.

Finish installing flashing on the lower side. Nail this piece on top of the shingles.

Be sure to seal all joints with roofing cement.

Install the other end pieces in the same manner as the first, making sure that all joints are sealed, and that the bottom is under the shingles. A liberal amount of roofing cement should be used at this point.

There are several ways of flashing the top part of the chimney. The best way is to build a cricket as illustrated. This prevents snow from piling up between the chimney and the roof, and gives better drainage.

Galvanized iron flashing should be painted. But new metal should be allowed to weather first. If you do not wish to wait for it to weather, clean the surface with turpentine and steel wool. Use tinner's red first, then house paint.

IN BOOKLET FORM

Selected articles from this column may be purchased in booklet form. Send 35c to Ernie Gardner, 14189 Faust Ave., Detroit 23, Michigan, for each copy. All 3 for \$1.00.

HIDDEN BEAUTY — Lovely Eliane Gribaudot, recently elected "Miss Cotton" of France, hides behind a ritual veil worn by Moslem women in Egypt. Eliane was shown this bizarre number while touring the Al-Mouski bazaar district of Cairo, Egypt.

(Author of: What You Should Know About Mental Illness.)

PHYSICAL THERAPY FOR PSYCHIATRIC AND NON-PSYCHIATRIC PATIENT

Ormond Beach, Fla.—During the present scientific age it is not unexpected to encounter numerous unfamiliar terms edging their way continually into the field of medical language. Of comparatively recent date have such terms as psychoanalysis, narcosis, electro-mathopathy, psychotherapy and a wealth of others impressed themselves upon the public mind.

One of the greatest boons to medical science is a phase of physical medicine known simply as physiotherapy or physical therapy. Although a program of such a therapy should be instituted in every hospital, investigations reveal that at present an adequate, properly-functioning physical therapy program exists in only fifty per cent of the hospitals in America.

What is meant by physical therapy? By the term therapy is meant "treatment for disease," and when treatment of injuries or diseases is administered thru massage, exercise or devices utilizing electricity, water, cold, heat and light, it is commonly known as physical therapy.

The incidence of serious accidents within this country during the past year reached hitherto-unprecedented heights. The incidence of cerebral palsy within the United States is also in excess of 200,000 cases as present. Were physical therapy essential to these two disabilities alone, its great importance could hardly be estimated.

The fact is, however, that physical therapy is daily proving also an aid to the rehabilitation of many patients inside and outside hospital walls. Its use among institutionalized patients quickens convalescence and often shortens hospitalization. Especially among those undergoing major amputations, of which there are more than 40,000 Americans annually, physical therapy proves highly beneficial.

The potentialities of physical therapy among psychiatric patients are immeasurable. Many psychoneurotics, particularly those suffering from various hysterical reactions during the Second World War, as well as many nervously-inclined individuals who frequently become incapacitated temporarily or permanently through accidents, profit markedly through physiotherapy. Often the morale of such individuals is greatly improved, also a quick return to more nearly normal living is effected economically and socially.

Especially during recent years, with the advance of electro-coma therapy, physical therapy has been widely used to alleviate stiffness and muscular soreness. Arthritis, paralyzes, sprains and many other psychosomatic complaints typical of the mentally disturbed patient react favorably to physical therapy.

What with the current advancement in electronics in a highly-mechanized age, it is essential that a physical therapist complete an intensive training period before he can become licensed to practice his profession in which such meticulous care is required. Even after graduation such a therapist must work only in conjunction with a physician and always according to the prescription of the latter.

Grand Coulee Dam in Washington is the largest concrete structure in the world, says the National Geographic Society. It is 4,173 feet long and 550 feet high from the granite bedrock on which it rests to the 30-foot-wide highway that crosses its top. It contains 10,230,776 cubic yards of concrete and weighs about 22 million tons.

Parah Anne's COOKING CLASS

Extra Good Tuna Loaf

When is tuna a good buy? Right now! Not only is it a good penny-stretcher, but its delicate party-flavor makes it a many purpose food. You've probably made dainty tuna sandwiches for parties, and sizeable hearty ones for the lunch box, or for a soup and sandwich home meal. Tuna salad is a favorite the year 'round. Add a can of shrimp or crabmeat for a seafood salad. Hot casseroles of many kinds are made better with tuna. With noodles or rice as a base, it teams well with cheese, vegetables or other seafood.

Tempting Tuna Loaf is extra tasty, easy to make and to serve. It is especially attractive with a self-garnish of mushroom slices.

- 1 2-oz. can sliced mushrooms
- 2 slices bread
- 1 6 1/2-oz. can grated tuna
- 1 can condensed cream of mushroom soup
- 1 small onion, diced
- 1 tablespoon chopped pimiento
- 1 tablespoon parsley flakes
- 1/2 teaspoon salt
- 2 eggs

Arrange two rows of mushroom slices on the bottom of a greased loaf pan. Cut bread into tiny cubes and mix with remaining drained mushrooms, and other ingredients. Put in pan on top of mushroom slices. Bake in a moderate oven (375° F.) about 45 minutes, or until firm. Turn out on serving platter. Six servings.

- Salmon Loaf:** Use an 8-oz. can salmon instead of tuna.
- Easy Oven Meal**
- Tempting Tuna Loaf**
- Scalloped Tomatoes**
- Baked Potatoes**
- Crisp Relishes**
- Deep Dish Apple Pie**

Have you ever thought what an excellent food oysters are? They are a good source of proteins, minerals and vitamins. Follow these recipes and you will have delicious oyster dishes.

- Oyster Cocktail**
6 oysters for each serving
- Sauce**
2 tablespoons tomato catchup
1/2 teaspoon lemon juice
1/4 teaspoon salt
3 to 4 drops Tabasco sauce
1 teaspoon horse-radish
1/4 teaspoon Worcestershire sauce
1/2 teaspoon chopped parsley
1/2 teaspoon chopped chives

- Arrange oysters on lettuce or watercress. Combine remaining ingredients and let stand 2 hours. Place sauce in a small glass in center of plate with a lemon wedge. Serves one.
- Broiled Oysters**
1 pint large oysters cleaned and dried
1/4 cup melted butter
2/3 cup cracker crumbs
1/2 teaspoon salt
1/8 teaspoon pepper

- Dip oysters in butter, then in crumbs, mixed with salt and pepper. Broil in greased rack, 2 inches from heat. Turn once while cooking. Serve on toast. Sprinkle with sherry.

- Fried Oyster**
24 large oysters
2 eggs
1/2 teaspoon salt
1/8 teaspoon pepper
2 tablespoons cold water
1 cup bread crumbs

- Clean and dry oysters. Beat the eggs, add seasonings, add water and mix. Dip oysters into egg mixture, then into crumbs. Let stand 5 minutes before frying. Fry in hot, deep fat until brown. Drain on paper towel. Serve at once with Philadelphia relish.
- Philadelphia Relish**
2 cups cabbage, firmly shredded
2 green peppers, finely chopped
1 teaspoon celery seed
1/4 teaspoon mustard seed
1/2 teaspoon salt
2 tablespoons brown sugar
1/4 cup vinegar

- Mix in order given
- Oyster Loaf**
Slice off top of small loaf of bread. Cut out center leaving hollow box. Brush inside and out with melted butter. Fill with creamed oysters. Put on top and bake at 375 degrees for 15 to 20 minutes, or until lightly browned.

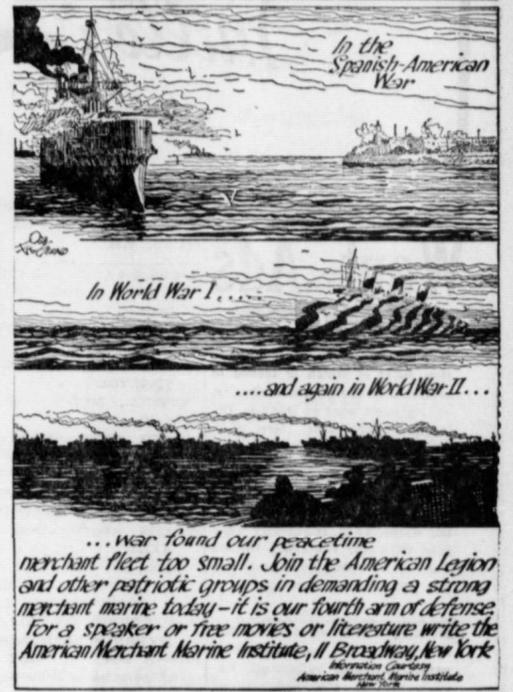

- Creamed Oysters**
1/2 lb. mushrooms
8 tablespoons butter
6 tablespoons flour
1 teaspoon salt
1 teaspoon paprika
1/8 teaspoon pepper
1 cup boiling water
2 cups top milk
1/2 onion sliced
1 pint oysters
3 hard-boiled eggs sliced

- Wash and separate the mushroom stems from caps. Saute the caps in 2 tablespoons of butter until golden brown. Simmer the stems and milk in cup of boiling water, until about 1/4 cup of liquid remains. Drain. Reserve the liquid. Cook oysters in same liquor until edges curl, drain and reserve liquor.
- Melt rest of the butter in double boiler. Remove from heat and add flour, salt, paprika and pepper. Stir until smooth. Blend oyster and mushroom liquor and enough top milk to make 1 cup. Add to the 2 cups of top milk. Add to the flour mixture. Cook over hot water until smooth and thick. Add mushrooms, oysters, and eggs. Heat well.

- Oyster Pie**
Oysters
Butter
Salt & pepper
Pastry

Line shallow pie plate with pastry. Put in 2 layers of oysters. Sprinkle with salt and pepper. Dot with butter. Cover with pastry and prick. Bake in an oven 400 degrees about 20 minutes. Serve with sliced ham.

YOUR MERCHANT MARINE

... war found our peacetime merchant fleet too small. Join the American Legion and other patriotic groups in demanding a strong merchant marine today — it is our fourth arm of defense. For a speaker or free movies or literature write the American Merchant Marine Institute, 11 Broadway, New York.

PRESSURE TEST—Marines of the 1st Provisional Marine Amphibious Reconnaissance Group are required to submit to pressure tests to determine whether they can stand the weight of some hundred feet of water crushing against their bodies. Here they sit in a compression chamber at the Navy Submarine Base at Pearl Harbor, T. H. The pressure test is part of the training the Marines are undergoing to enable them to escape from a sinking submarine. Official U.S. Marine Corps Photograph—119286

HOME AT LAST—The contraption above is an ancient fire engine originally presented to Alexandria, Va., by George Washington in 1764. A museum piece for more than 100 years, it was recently returned to its home at the Friendship Veterans Fire Company in Alexandria.

FROM A CONCERNED WORLD—A deluge of get-well wishes for Pope Plus XII are sorted by a priest and a lay employe at the Vatican Secretariat of State. The messages came from every part of the world.

NOTICE OF VILLAGE ELECTION

NOTICE IS HEREBY GIVEN That the Annual Charter election for the Village of Kewaskum, Washington County, Wisconsin at which are to be elected the following officers, to-wit:

Three Trustees for two years, will be held at the Municipal Building in said Village on Tuesday, close at 5:30 o'clock p. m. on that the 6th day of April, 1954, and that the polls of said election will be open at 9:00 o'clock a. m., and

ing in said Village on Tuesday, close at 5:30 o'clock p. m. on that the 6th day of April, 1954, and that the polls of said election will be open at 9:00 o'clock a. m., and

Dated March 24, 1954.
Village Commissioner

FACSIMILE BALLOT

NOTICE OF JUDICIAL ELECTION

TO THE ELECTORS OF WASHINGTON COUNTY:
Notice is hereby given that a judicial election is to be held in the several towns, wards, villages and election precincts in the county of Washington, on the 6th day of April, 1954 at which the officers named below are to be chosen. The names of the candidates for each

INFORMATION TO VOTERS
The following instructions are given for the information and guidance of voters:

(a) A voter upon entering the polling place and giving his name and residence, will receive a ballot from the ballot clerk which must have indorsed thereon the names or initials of both ballot clerks, and no other ballot can be used. Upon receiving his ballot, the voter must retire alone to a booth or compartment and prepare the same for voting. A ballot clerk may inform the voter as to the proper manner of marking a ballot, but he must not advise or indicate in any manner whom to vote for.

(b) If the ballot be spoiled, it must be returned to the ballot clerk, who must issue another in its stead, but not more than three in all shall be issued to any one voter. Five minutes time is allowed in the booth to mark ballot. Unofficial ballots or memorandum to assist the voter in marking his ballot can be taken into the booth, and may be used to copy from. The ballot must not be shown so that any per-

office to be voted for, whose nominations have been certified to or filed in this office, are given under the title of the office and under the appropriate party or other designation, each in its proper column in the sample ballot below.

son can see how it has been marked by the voter.

(c) After it is marked it should be folded so that the inside cannot be seen, but so that the printed indorsements and signatures of the ballot clerks on the outside may be seen. Then the voter should pass out of the booth or compartment, give his name to the inspector in charge of the ballot box, hand him his ballot to be placed in the box, and pass out of the voting place.

(d) A voter who declares to the presiding officer that he is unable to read, or that by reason of physical disability he is unable to mark his ballot, can have assistance of two election officers in marking same, to be chosen by the voter; and if he declares that he is totally blind he may be assisted by any person chosen by him from among the legal voters of the county. The presiding officer may administer an oath in his direction, as to such person's disability.

(e) The following is a facsimile of the official ballot:

Teacup Topics

By Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGES

Cosmetics and clothes have advanced so in recent years that a girl just has no excuse for careless grooming at any time, says Betty Ann. Come rain or sleet, she ought to be able to venture forth well protected and well groomed.

Selection of a raincoat is of prime importance for beauty in the rain. Most practical would be one in a neutral color cut loosely to permit wearing a heavy suit for warmth in blustery weather.

While a brightly colored coat does add a needed note of cheer to a dismal day, it also invites trouble in color co-ordination.

Few of us can expose our hair to dampness without courting disaster. But that doesn't excuse the wearing of a kerchief tied under the chin. Not when there are so many delightful, head hugging hats around.

And it's no longer a problem to keep one's feet dry and gracefully shod on a stormy day. Perfect for unpredictable weather are the plastic or rubber boots that fold into a matching case when the sun shines.

For all-day wear, lightweight nylon rain boots sparked by contrasting cuffs would be a good choice. The latest stadium boots, too, are lightweight and becoming.

Cosmetics are a valuable aid for the stormy beauty. Not only can one find waterproof mascara, but there is also a cream make-up available that is said to be completely undisturbed by the elements.

A combination of foundation and powder, this make-up protects the skin from wind, rain, sun and dirt. Some are enriched with oils that are supposed to keep the skin soft and smooth.

Roughened heels are a menace to sheer stockings. Keep your smooth right through winter by rubbing them with hand cream nightly.

If the elbow of a dress or blouse sleeve is badly worn, the sleeve may be cut off above the elbow and the lower edge finished with a hem, band or cuff. On knit dresses or sweaters, the wristlet may be moved up to finish the short sleeve. Stretch the edges as the wristlet is sewed in place so that the stitching will not break when the garment is put on.

There's an art to slicing a ham or roast, carving a turkey, chicken or duck, snipping off a rose, spearing a hot dog. And why "saw through" your grapefruit (with a too small knife) when one "swoops" of a utility knife will cut it smooth and clean as the firm, juicy fruit deserves?

Don't hack that roast—carve it scientifically, skillfully, with a carver which is sharp, keen edged, easy to hold by a handle precision made to fit your hand; perfectly balanced to make carving a pleasure.

Are you making sandwiches with clean cut, thinly sliced cold cuts? Reach for the long, thin slicer—that's what it's made for.

Want to cut a "bundle" of celery, a heap of green beans, or mince or dice green pepper, parsley or pimiento? A French or chef knife is the knife with the blade and the balance for it.

Lemon Angel Dessert

One cup sugar; 5 tablespoons cornstarch; 1/8 teaspoon salt; 1 1/2 cups boiling water; 3 egg yolks, beaten; 1/3 cup lemon juice; 1 tablespoon grated lemon peel; 1 angel or sponge cake.

Mix together sugar, cornstarch, salt and water, and cook until thick and smooth (6 to 10 minutes) stirring constantly. Remove from heat; stir in egg yolks, then return to heat and cook for six minutes. Remove from stove and add lemon juice and lemon peel. Cool. Cut cake into wedge shaped pieces; cut each piece in half to make two layers. Put filling between layers and on top of each piece. Garnish with lemon slices. Whipped cream topping makes it company fare.

If you make pies often, it will save time to draw a circle slightly larger than the pie tin on your bread board. Then you can roll the dough to fit. To preserve the drawn circle, coat it with thinned fresh white shellac. When dry give it another coat for added protection.

When buying fish fillets or steaks, remember to allow about one-third pound for each person you plan to serve.

One Clue
"Now, boys," asked the teacher, "can any of you tell me how iron was first discovered?"
Little Adolphus put up his hand.
"Good," said the teacher. "Stand up and tell the class."
"I understood my father to say they smelt it, ma'am," replied Adolphus.

MISS IS A HIT—Three-year-old Frederique Lanchet, youngest mannequin in Paris, France, is a big hit in this pint-size creation by Virginia. Her Easter coat and matching hat, both completely reversible, are done in red and white, checked nylon, backed by white corduroy.

About Your Home

The high cost of building today has made us become realists about the use of space. We want our houses to be lived in, every inch of them. For most of us the formal drawing room is a thing of the past. Gone too, in many small houses, is the dining room. In its place is a more spacious living-dining room. The study-guest room is often found replacing the guest bedroom.

The furniture of today is comfortable and sturdy. The pieces are usually related but not matching. Lighter colored woods are replacing the dark-toned woods of the past because they are less prone to show marks and dust.

People are learning to make the best use of what they have. Combinations of furniture are interesting and individual and can be tied together with color.

The room without a mantel is a decorating problem. It need not be so, however. The point is to make a center of interest if you have not the ready-made note of a fireplace. There are various ways to do this. One of the best is a sofa grouping, either in connection with a group of windows or with an upright wall decoration.

There must be "uprights" in decorating. The mantel-piece is an upright. This makes the horizontal lines of a sofa or chairs form a pleasant composition. Place a picture or group of pictures above a sofa to give the upright line.

Often a large, tall piece of furniture, flanked by pictures can be made into the center of interest of a room. A secretary, or a large table with a hanging mirror or group of prints, are examples.

All-Purpose Glassware Is Popular

BY EDNA MILES

IF yours is to be a June wedding, it's none too soon to start thinking about what you want in tableware and glassware. It may be that your ideas will be changed completely when you start to look around.

Perhaps you still entertain the notion that you should have one set of tableware and glassware for "best," another for practical, everyday use. This is an idea that's becoming outmoded.

Living today is less formal than it used to be, and this means that brides frequently pick one pattern in tableware, one in glassware and one in silver or stainless steel to serve for all occasions.

According to industrial designer Freda Diamond, the new shorter-stemmed, well-balanced glasses have been designed especially so they will not topple easily nor break readily. It's this designer's opinion that lovely glassware should require a minimum of care.

Almost all of today's glassware serves more than one purpose. A sherbet glass may also be used for fruit cup, shrimp or oyster cocktail or even for champagne. The low-stemmed wine glass will double for breakfast juice, and

In keeping with today's trend toward informal but gracious living, this bride has chosen simple, silver-banded glassware and combined it with silver-rimmed china plates.

the tall pilsener glasses are often used to hold parfait. In short, if a glass suits the purpose for which you need it, then it's the correct glass. One of the newest designs created especially for the bride by Freda Diamond is a low-stemmed, platinum-banded pattern called "saturn." It's classically simple and medium priced. And there's a complete line of stemware as well as tumblers in various heights.

Bible Comment

Heritage of Liberty Given to World By Jewish People

THE story is well known how Jacob and his great company went down to Egypt and flourished under the power and patronage of his illustrious brother, Joseph.

But it is a story that cannot be too well known.

Trouble began for these people in that foreign land when there arose "a pharaoh, who knew not Joseph." Racial and religious prejudice, still rife in our own supposedly enlightened environment, soon wreaked its havoc on the Jews.

Great works of ancient time soon became symbols of injustice and oppression. Forced to make bricks without straw, the remnants of those who had come to Egypt seeking food were cast into bondage, suffering cruelly.

Later, a man, foster son of the palace, renounced his foster mother and his prospect of ease and power to share the affliction of his people. He led them out of bondage toward freedom.

But it was, as we know, by no means as simple as that. Hardships, discouragements, rebellious spirits and yearning to turn back marked the way until the freedom of Canaan was won.

Out of that unpleasant march came what shines with especial glory—the conception of liberty enshrined in the ancient Jewish Scriptures.

In a world marked with slavery, it is remarkable how the Jews designed laws and regulations to protect the community against slavery and the individual in his rights.

One cannot go into this fully here, but one can point to the land's laws designed to prevent serfdom. There was the law which protected debtors from becoming permanent slaves to their creditor. There were the Cities of Refuge where one who had inadvertently injured another could go for safety.

The heritage of liberty that the world owes to the Jews is immense. Unfortunately, the world has never fully appreciated it.

Wrong Page

A clever lady, asked to a brilliant public function was assigned a place between a noted bishop and an equally famous rabbi. It was her chance to break into high company, and she meant to make use of it.

"I feel as if I were a leaf between the Old and the New Testament," she said during a lull in the conversation.

"That page, Madam," replied the rabbi, "is usually a blank."

The SNAPSHOT GUILD

It's hard to predict which way baby will lean. But if you use fast flash bulbs, you can stop the motion without a blur.

It's So Hard to Sit Still

EVEN when our children are trying hard to be on their very best behavior and to please the adults of the household—they really find it very difficult to sit still. At least, for very long at one time.

It has been said that children have 1,500 muscles with which to wiggle and only one for sitting still—and that gets tired very quickly.

That's why snapshotting that requires the subject to be very still poses a bit of a problem when you are aiming your camera at the small fry. Or, rather, I should say it used to be a problem—in the days before flash photography was available to all of us.

Now that even the simplest box cameras have their own synchronized flash attachments, picturing even the wiggliest of children indoors is a practically foolproof process. The secret of this is in the speed of the flash bulbs available for use with the comparatively slower cameras. Some of the bulbs have a speed of 1/200th second. That means your picture is taken at that speed, even though you may be using a camera that's pre-set at about 1/40th second. And with that kind of speed, the wiggling will just add interest to the picture. It will be "stopped" in mid-air and not blur the picture.

Thus, if baby chooses to coo and reach for the camera, it's wonderful! You'll have a much better picture than if he were motionless. The speed of the flash will prevent the blurring and the outstretched arms will add life and appeal to the picture.

—John Van Guilder

METAL MIXTURE ENRICHES AUSTRALIAN WASTELANDS

Washington—Metals commonly are combined with other metals to produce useful alloys, but in Australia minute quantities of metallic minerals are mixed with soil to turn a 6,000,000-acre wasteland into productive farm and pasture land.

The wasteland is the "Ninety-Mile-Desert" in the southeastern part of the continent, straddling the boundary between the states of South Australia and Victoria, says the National Geographic Society.

The metals that are building soil fertility in the area chiefly copper and zinc. Manganese and molybdenum are used to a smaller extent. All are applied in minute quantities, mixed with a much larger amount of superphosphate fertilizer.

Land being transformed has long been open to settlers, but the pioneers who have tried it have found it so unproductive that few remained. Although well watered, the land showed its poverty through the scrub timber, bush and coarse grass that grew untended.

Discovery that this "desert" could be made productive through addition of such minute quantities of minerals that they are termed "trace" elements was made by the Commonwealth Scientific and Industrial Research Organization. Small scale experiments produced not only good forage for sheep, but grain and seed crops.

The process of turning the desert into good land was expensive, and considerably beyond the means of the average homesteader. An organization with plentiful funds was needed, and it was found in the Australian Mutual Provident Society, largest mutual life insurance organization on the continent.

Farm Every Two Weeks
The company took over the development of some 750,000 acres, 500,000 in South Australia and 250,000 in Victoria, in a project aimed at providing "a farm every two weeks" when it gets into full operation.

The farms will be of 800 to 1,000 acres each, and will be turned over to applicants at the rate of 20 to 30 a year. Each will be complete with buildings, established pasture, fencing and stock.

The land is first cleared of such scrub growth in a "logging" operation that levels as many as 30 to 50 acres an hour. Two 50-foot logs are coupled together and chained behind heavy tractors. Dragged through the brush at top tractor speed, the logs clear swaths 100 feet wide as fast as they can be towed.

Trace Element Added
Once the ground is cleared it is plowed by immense eight-tandem disc plows, and allowed to lie fallow for several months. Then the land is cultivated again and the all-important mineral elements are added, along with fertilizer. Standard practice is to mix seven pounds of copper sulphate and seven pounds of zinc sulphate to 187 pounds of superphosphate for each acre.

The enriched soil is planted with seed and cover crops in preparation for final distribution to new farmers. Efficiency of the metal-enriched soil has been proved by several pioneer farm families. These settlers are now successfully raising sheep and grain.

MYSTERY OF MISSING MISSIVE

Who sent the card February 6, 1912, and who got it in mid-January, 1954, pose no problem. But its long, devious, and delayed route in the interim is mystifying. A Northwest Bedding salesman named Pearson apparently sent the card, which nearly 42 years later was found in a street at Redwood Falls, Minn., and sent along to the addressee, Herman Koch, who was still in Bird Island, Minn., to get it!

Timely Tips

It's a wise homemaker who knows the tricks of her trade. Here are a few to add to your collection and help make your chores easier for you.

Separating egg whites from yolks can be done in a jiffy. Just break the egg in a small funnel. The whites will go through... the yolks won't.

Before scalding milk, wipe the bottom and sides of the pan with butter. The milk won't scorch and the pan will be easier to clean.

A folded damp cloth placed under a mixing bowl keeps it from slipping and speeds mixing.

To soften butter quickly, heat an earthenware bowl by filling it with boiling water, then empty it and place it upside down over the butter.

To banish that horrid onion aroma from your hands, rub them with vinegar.

The average temperature of the sun is estimated at 10,000 degrees Fahrenheit.

A single quart of sea water may contain as many as 100,000 plankton, microscopic ocean organisms on which fish feed.

COUNTRY PLATTERS

LES CARROLL

WITH Gospel music proving increasingly popular on artists' personal-appearance tours, many sacred recordings are being made.

Some excellent releases are George Beverly Shea's "Prayer" (Victor); Martha Carson's "Lazarus" (Capitol), and Mac Wiseman's "Reveille in Heaven" (Dot).

Good sacred quartet numbers include the Sunshine Boys' "I Believe"; Revelaires' "In That Hour" (Both Bibletone), and Southern Harmony Boys' "Honey in the Rock" (Dixiana).

Love ballads are always popular, and especially pleasing are "The Curtain Never Falls" (Freddie Hart, Capitol); "Slowly" (Webb Pierce, Decca), and "My Heart Keeps On Beatin'" (Harry Rodacy, Imperial).

In the novelty vein are "Oh My Pappy" (Homer & Jethro, Victor); "My Guitar's Out of Tune" (Chuck Reed, Mercury), and "Left-Over Kisses" (Ernie Lee, MGM).

Although Hank Williams passed on over a year ago his records are still being released from MGM's backlog. His latest is "Low-Down Blues."

Other good releases are "I'm in Heaven" (Ginny Wright and Tom Beardon, Faber); "Honky-Tonk Heart" (Ernest Tubbs, Decca); "Empty Feeling in My Heart" (Fred Crawford, Starday); "Lord's Last Supper" (Bobby Dick, Hickory); "I Need a Little Help" (Carlisles, Mercury); "Waitin' for My Baby" (Hawshaw Hawkins, Victor).

Also good are "Somewhere" (Rex Allen, Decca); "Too Proud to Wear My Name" (Tibby Edwards, Mercury); "Knew I Had Lost" (Sheb Wooley, MGM); "Turn Around, Boy" (Roy Sneed, Valley); "Lovely Little Darling" (Boots Woodall, Capitol); "I'll Do the Dishes" (Joe Carson, Mercury); "A Man on the Loose" (Carolyn Bradshaw, Abbott); "Idaho Red" (Wade Ray, Victor); "Wild Fire" (Rex Prophet, Decca); "Huggin' My Pillow" (PeeWee King, Victor).

THESE WOMEN!

By d'Alessio

"What a horrible nightmare! I dreamt you and James Mason were fighting a duel over me—and you won!"

ADDED DUTY—This snowplow had some extracurricular duties recently when a passenger car and a truck loaded with lumber collided on a highway near Manton, Mich. The sight of a snowplow clearing lumber from the road adds a curious touch to a disaster which took two lives.

SPORTS AFIELD

By Ted Kesting

How often has this happened to you: Your day on the lake has perked up your spirits. Or the game birds have been practically falling into your bag. With renewed confidence in yourself, calm with the world and happy

to be a part of mankind, you ease your way along a back country road. Swinging out onto a main highway, you step on the gas. But you're not alone on the highway. The traffic gets slower. Finally it piles into a bumper to bumper jam. Most of the pleasure from your outing has been spoiled.

American sportsmen are among our most consistent auto travelers and road users. A Sports Afield survey shows that they average 14,940 miles of road travel a year as compared to a national average of 9,557.

Last year more than 31 million hunting and fishing licenses were sold. More than 41 million visited the national parks and monuments. Over 30 million visited the national forests last year. And uncounted millions drove to lakes and streams, went to state parks, and drove to the outdoor scene surrounding their communities.

The sesame to these outdoor treasures is roads. But our national highway system is woefully outmoded. It will take money to do something about it. According to Washington correspondent Michael Hudoba, the federal government now spends for highways and road work only about 25 per cent of the \$2 billion it collects annually through federal gasoline and excise taxes on vehicles. The balance goes into the general treasury fund for non-highway projects.

More of the money collected from various gasoline and auto use taxes must go for the purposes for which they were imposed—for better roads.

We can get America out of the traffic jam—if you will speak up for and urge a "better roads" campaign, and if you locally drive for the elimination of traffic bottlenecks. A nation that travels on wheels as much as ours does, deserves more and better roads.

SURFS HER RIGHT—Publicity men at St. Petersburg, Fla., are wondering why Impish Ann Hart prefers a mooring stanchion to a swim. But they aren't complaining as long as she offers such a lovely portrait.

HERE'S HOW . . .

MAKE A WORK BENCH

A work bench, sturdy enough to stand hard usage, and providing ample working space, is a must for all home craftsmen. After the basic bench is made, the craftsman begins to add the "extras" to accommodate his specialized tools and equipment.

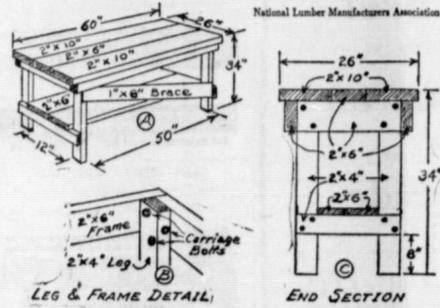

The completed bench (A) is shown from the rear, so that the diagonal brace can be seen. The front has no brace to impede the workman.

The basic structure is a frame (B) of 2 x 6 lumber; two pieces 58 inches long and two pieces 24 inches long. The 2 x 4 legs, each 32 inches long,

are fastened into the frame with carriage bolts, one 6-inch bolt and two 4-inch bolts to each corner. Holes 3/8-inch in diameter are bored to accommodate the bolts.

A 2 x 4 crossrail bolted to the legs at each end of the bench adds stability and a base for the two 2 x 6 pieces that serve as a shelf for tools or wood.

The top is made of 2-inch plank, two pieces of 2 x 10, and one of 2 x 6, each 60 inches long. The top is fastened to the frame members with 3-inch wood screws, countersunk.

National Lumber Manufacturers Association

JUNCO

SLATE-COLORED JUNCO
© 1953 National Wildlife Federation

With the possible exception of the Chickadees and Tree Sparrows probably few birds have put more grins on the faces of those who must stay indoors in winter than have the Juncos. Even husky hikers enjoy the birds as they come into a wind and snow-swept clearing and see the birds gaily gathering a breakfast of weed seeds when all other animals seem to elsewhere.

During the spring and fall migrations north and south, the birds seem to be most abundant. Then their flocks are easily identified not only by their slaty color but by the flashing, white outer-tail feather. The combination of grayness and white outer-tail feathers is completed by a light-colored bill that contrasts with the darkness of the head. In the male the head is more conspicuously dark than in the female.

Juncos measure about 6 1/2 inches and have a wingspread of 10 inches. They weigh about 7/10 of an ounce, may fly as fast as 17 miles an hour and have a body temperature of over 108 degrees F. Their light weight permits them to land on fluffy snow without sinking in as would larger birds like pheasants and crows. As a result, when deep snows come the Juncos continue their merry existence while the larger birds become bogged down. Hunger means little to a bird that can get a shower of breakfast food by merely pecking almost any dead weed-top that thrusts its head above the snow.

There are eight species of Juncos to be found in North America with the total rising to twice that number if we recognize both species and subspecies. Collectively they practically cover the continent except for the extreme northern barrens and the lowlands of Mexico. They are also to be found in Siberia.

The common Slate-colored Junco nests in the northern part of the United States and into Canada. The nest is usually on the ground under some sort of cover and is made of grass with a finer lining. The 4 to 6 eggs are bluish, greenish or grayish, thickly spotted with fine purple, brown or lilac marks. The eggs are about 4/5 of an inch long and are incubated for 11 or 12 days. There may be one or two broods a year.

A third of the winter food is probably the seeds and fruits of such noxious weeds as ragweed and smartweed. The remainder is probably the fruits and seeds of such other common weeds as amaranth, lamb's quarters, Russian thistle and sunflower. While it may seem that the great flocks of Juncos feeding on enormous quantities of the fruits and seeds of these noxious plants might be helping in weed control it is doubtful if this service is appreciable. As in many other kinds of wildlife, whether plants or animals, there is usually a harvestable surplus of weed seeds. It might be better to recognize that the weeds that feed these birds render us a service since without them the snowy season might be bleak indeed whether we go outdoors or remain within, seeking our nature experiences from the

MAKE A WORK BENCH

There are no standards for work benches, and probably there should be none. For the home craftsman will want his work bench to display his own ingenuity in design, placement of drawers and tool panels. And if he has specialized tools, the bench will be constructed for their placement and his convenience. However, as a starter, a simple bench, providing ample working space and sturdy enough to stand considerable hard use, is needed. This is a simple bench, upon which the bench "masterpiece" of the workman's own design may later be created.

The completed bench (A) is shown from the rear in the picture below, so that the diagonal cross brace may be seen. The front of the bench has no brace to impede the workman.

The basic structure is the frame, a corner detail of which is shown in (B). The 2 by 4-inch legs, each 32 inches long, are fastened with carriage bolts to the 2 by 6-inch framing material. The frame members consist of two pieces of 2 x 6, each 58 inches long, and two pieces 24 inches long. The shorter bolts are 4-inch; the longer ones, 6-inch, with washers on each end. Holes 3/8-inch in diameter are bored to accommodate the bolts. A 2 by 4 cross rail is bolted to the legs, 8 inches from the floor, at each end. This provides added stability and a base on which to place the two 2 by 6's that serve as a shelf for tools or wood. This shelf may be nailed in place.

The top is made of 2-inch plank, two pieces of 2 by 10 and one piece of 2 by 6, each 60 inches long. These dimensions provide for a 1-inch overhang all around. The top plank is fastened to the frame members with 3-inch wood screws, countersunk, so that the top is free of obstructions.

This bench is sturdy enough to accommodate the heaviest work that the home craftsman will undertake. Equipment such as power tools and heavy vises can be added, and the open space beneath is large enough to house electric motors.

Even if the craftsman develops a "fancy" bench with compartments, special tool boards, etc., the rough bench will remain a handy piece of workshop furniture as an auxiliary to the shop.

1 Word Can Change Your Life—GOOD

Do you know why you feel so good when you do something that turns out right? It's because you are co-creating with God.

When God created us he put something of the creator in us. At our best, functioning on all fours, our faculties well integrated and working harmoniously toward some definite goal, we are actually cooperating with God. Together we bring order out of chaos. Together we create something good, beautiful and true like "the poet who spins an ode of love out of a jumble of words, or like an artist who brushes a lovely landscape out of blobs of paint, or like a cabinetmaker who nails together a beautiful piece of furniture from formless slabs of wood."

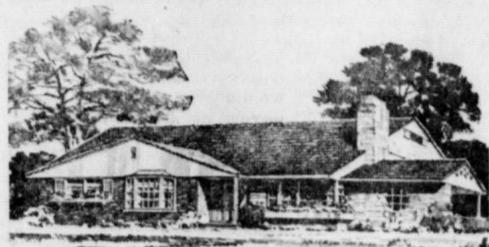

No wonder we know the feeling God had when he completed the creation of the world, surveyed all that he had made, and said: "It is good," the word that can change your life!

window-feeding station.

The National Wildlife Federation through distribution of its stamps is encouraging an understanding of all matters of nature, including the plight of Juncos and of weeds.

—E. Laurence Palmer

Plan for Split-Level House from Small Homes Guide

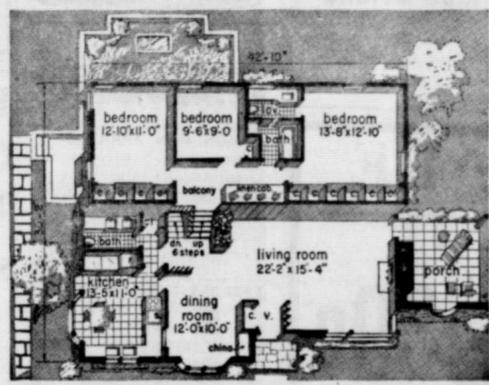

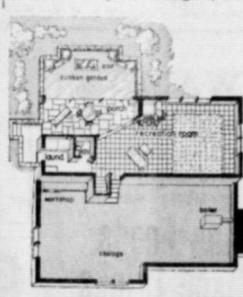

The "three-dimension" style of the floor plans below makes this home designed by Architect Rudolph A. Matern easy to visualize. The house is featured in the current edition of Small Homes Guide, along with several other designs incorporating the popular split-level feature.

Four levels are shown here, with the "split" approximately in the center. The architect has provided full bathrooms on both main levels to limit up-and-down stair travel. Living and dining rooms and kitchen are at ground level and the recreation area is slightly below grade. The sunken garden at the rear of the house is made a part of the decorative scheme of the recreation room by use of a glass wall between the two.

The magazine points out that the split-level type of house combines the chief advantages of the traditional two-story house and the modern, rambling ranch house. It provides as much space for the same money as the two-story types and yet, like the one-

story house, it requires a minimum of traveling up and down stairs.

This house has 1,415 sq. ft. of floor space on the first and second levels and 548 sq. ft. on the recreation level. For information on blueprints and their cost, write to Small Homes Guide, Dept. 1304, 82 W. Washington, Chicago 2, Ill.

Little Known Facts about your navy

Behind The Scenes In American Business

By Reynolds Knight

New York—Though business indices show that industrial production continues to lag, and that inventories generally are still high at both the manufacturing and retail levels, scattered signs of a spring pick-up in business are definitely in the wind. The new optimism may only be a sign of spring itself, yet some new and favorable factors have come into the picture.

Market prices of high-grade, long-term corporate as well as government bonds are on the upgrade, and there are indications that an abundance of cash savings is seeking new investment. Too, long-range financing plans that would improve facilities and produce new and improved products certainly reflect faith in the future. In fact, all of the recent surveys show that the nation's revitalized sales effort is backed by products and merchandise aimed at upping the standard of living, generally.

BOOSTING HOME VALUES—Most if not all homes built in the U.S. five years from today will be equipped with year-round air conditioning, according to a survey conducted by the gas industry (American Gas Association).

Interviewing families who'd had gas air conditioning equipment for a minimum of five years, the gas people found that the all-year air conditioned home has a substantially greater resale value than a comparable house without such equipment. In fact, 82 per cent of those queried reported that air conditioning had "substantially" increased the value of their homes, while an additional 17 per cent said that a gas system had made their homes "somewhat more valuable."

The survey also revealed that year-round gas air conditioning makes for lower operating costs generally. Seventy-one per cent reported that walls and woodwork needed less cleaning; 90 per cent, that less time was needed for dusting; 70 per cent, that drapes, curtains, upholstery and rugs needed less frequent cleaning, and 31 per cent, that less re-decoration work was needed.

THINGS TO COME—A new electrical gadget, attached to your TV antenna, diverts lightning from the lead-in wire and hence your home. . . The man "who couldn't punch his way out of a paper bag" has at last the chance of trying. The world's largest paper bag, recently developed for the textile, garden tool, rug and rubber hose trades, is really big enough for the battle: 18 by 19 by 167 inches. . . Watch for the marketing of a super-concentrated (5 to 1) orange juice, in which the flavor is fortified by the addition of peel oil.

'UPKEEP' PLAN—Western European cooperation in building stronger defenses has just been demonstrated by the signing of an agreement to facilitate the maintenance of large numbers of U.S.-built airplanes serving in allied air forces.

The contract, providing for the repair and overhaul of Republic Thunderjet fighter-bombers flown by the Royal Netherlands Air Force, was negotiated between Republic Aviation International, S.A. (overseas subsidiary of the Long Island jet maker) and Industriemaatschappij Avio-Diepen N.V., a leading Dutch air company. The terms call for Republic's technicians to help the Dutch obtain special tools and equipment and to lend American technical "know-how" in maintaining their Thunderjets and the new Thunderstreaks scheduled for delivery later this year. The Dutch are to reimburse Republic.

Mundy I. Peale, president of Republic and board chairman of RAI, says that he hopes the agreement will lead to similar contracts in other areas, so that the NATO nations might undertake maintenance of the many Thunderjets which have been supplied to them during the past two and a half years.

ATOMS FOR IRON HORSE—A leading nuclear scientist has presented railroad men with their first complete blueprint for an atomic locomotive. In the wake of the atomic-submarine development, the atom-eating "Iron horse" is viewed generally with both interest and optimism, although it would cost about twice as much to build as an equivalent diesel. Fuel savings, it is pointed out, would be its chief advantage.

The locomotive (160 feet long and with the power of 7,000 horses) would contain an atomic reactor fueled by enriched uranium. Heat from the reactor would generate steam, which would, in turn, generate electricity for operating power.

Dundee

Mr. and Mrs. John Waranus and daughters Joan and Rosalie were entertained Sunday at the home of Mr. and Mrs. Lloyd Etta near Kewaskum.

Mrs. William Hackbart and infant son Robert William returned home from the St. Agnes hospital Saturday.

The Trinity Ladies Aid society met Thursday afternoon at the church basement. Mrs. Werner Koepke was hostess.
