

Attend Your Annual School District Meeting July 12

All electors of school districts within the county are urged by the Washington County Schoolboard Association to attend their respective annual district meetings.

Too many people today do not interest themselves in public education at the proper time. Many of them cuss the tax bills when they get them, and charge the administrators of public service agencies as scattering public funds imprudently. However, these same people neglect to help their schoolboards by attending the meetings and in voicing their opinions on services which are to be rendered during the school term.

If certain situations exist which need to be remedied or other services need to be added, the proper place at which to discuss them is at the annual meeting on Monday, July 12. Most meetings are scheduled for 8:00 p. m.

More people should be willing to take their turn and serve as schoolboard members. Often, this responsibility is loaded onto the same individuals year after year. All citizens should be willing to take their turn and serve as public officials, if called upon to do so by the electors of their district.

Everybody should plan to make this the best attended annual school district meeting in many years.

HARRY MAASKES OBSERVE THEIR SILVER WEDDING

Mr. and Mrs. Harry Maaske, Kewaskum, celebrated their silver wedding anniversary on July 4th at their summer home at Silver Lake near West Bend. The party was attended by about 40 friends, sisters and brothers, from Germantown, Milwaukee and Chicago. Two sisters from near Prentice, Wis., and a niece of California were here a week before. All meals were served outdoors cafeteria style, and the party lasted until Monday afternoon. All had a very good time.

DON KOERBLE ATTENDS AFL INSTITUTE AT UW

Donald Koerble, Kewaskum, was among 28 Wisconsin State Federation of Labor officers and members who attended the 1954 University of Wisconsin Extension Division School for Workers State AFL Institute June 26 to 28.

The institute offered labor an opportunity to learn new skills for better union service. Delegates attended classes, workshops, and participated in informal discussions with leaders in labor and government.

NOTICE OF MEETING OF BOARD OF REVIEW

The Board of Review of the Town of Auburn will meet at the Town Hall on Monday, July 12, from 10 a. m. until 4 p. m. to examine the 1954 assessment roll, take all sworn statements, correct all errors in real and personal property, and transact such other business as may come before the meeting.

Dated July 6, 1954.

Reuben Backhaus, Town Clerk

KOHNS, DE TEMPLES MOVE

Mr. and Mrs. Mike Kohn have moved near Port Washington where they have purchased a business. Mr. and Mrs. Ray de Temple moved into the Kohn home on East Water from the upper flat in the August Buss home on Midland ave.

Mr. Kohn will also continue in business at Kohn Bros. Farm Service, Inc. here.

ED. LUDWIG TAKES OVER TAVERN AT ST. MICHAELS

Edward Ludwig, Kewaskum, on July 1 took over the tavern business in the Math. Herriego building at St. Michaels. The tavern had been operated for the past year by Harold T. Kalb and wife.

Advertise it in the Statesman.

Kewaskum Farmer Aids Police in Nabbing Pair

The alertness of Ed. Dorn, farmer residing on R. 2, Kewaskum, helped Washington county police in capturing two Illinois youths Saturday following the theft of a West Allis resident's auto.

Dorn called the sheriff's department and reported seeing the youths loitering around his farm and "acting suspiciously." The young men, Ronald Young and Sam Jines of Elgin, Ill., were apprehended by Undersheriff Al Schmidt who trailed them by following their footprints in the dust of a county trunk road.

The youths were driving a light car and Dorn gave police the number of the vehicle. Undersheriff Schmidt found the car abandoned along the road. He followed the footprints about a mile down the road and came upon the youths.

Investigation revealed that Young and Jines left their homes in Elgin, made their way to West Allis and took a car belonging to John W. Podgorski of that city. The youths were later picked up by West Allis police and the car was returned to its owner.

Milwaukee Men Hurt in Mishap Near Here

Two Milwaukee men were injured Saturday night when one of them, Hoyer E. Robinson, driver of the late model car in which they were traveling on County Trunk G about 1 1/2 miles northeast of Kewaskum, fell asleep. The car left the highway and rolled over hitting a telephone pole.

Robinson received broken ribs and a punctured lung in the accident which occurred at 10:30 p. m. Saturday and his passenger, Arthur Stannard, Milwaukee, also received broken ribs and cuts about the face. Both men were taken to St. Joseph's hospital, West Bend. The Kewaskum firemen's ambulance was put into service.

NOTICE OF MEETING OF BOARD OF REVIEW

PUBLIC NOTICE IS HEREBY GIVEN That the Board of Review for the said Village of Kewaskum, Washington County, Wisconsin, will meet at the Municipal Building on the 12th day of July 1954, at 10:00 o'clock in the forenoon, for the purpose of reviewing and examining the assessment roll of real and personal property in said Village, and all sworn statements and valuations of real and personal property therein, and bank stock, and of correcting all errors in said roll, whether in description of property or otherwise, and to perform such other duties imposed by law.

Dated this 5th day of July 1954.

William S. Martin, Village Commissioner

ANNUAL SCHOOL MEETING

NOTICE IS HEREBY GIVEN THAT THE ANNUAL MEETING OF ELEMENTARY JOINT SCHOOL DISTRICT NO. 1 OF THE TOWNS OF ASHFORD, AUBURN, FOND DU LAC COUNTY, KEWASKUM VILLAGE TOWNS OF KEWASKUM, PARTON AND WAYNE, WASHINGTON COUNTY, Wisconsin, will be held at the KEWASKUM HIGH SCHOOL AUDITORIUM on Monday, the 12th day of July, 1954 at 8:00 o'clock p. m.

Deane Bascom, Chairman
Washington County School Committee

BETROTHAL ANNOUNCED

Mr. and Mrs. Kilian Ruptinger of St. Kilian, R. 3, Campbellsport, announce the engagement and forthcoming marriage of their daughter, Mary Ann to Don Lichtensteiger, son of Mr. and Mrs. Leo Lichtensteiger of Campbellsport. The wedding will take place on Oct. 2.

BIRTHS

REIGLE—A daughter to Mr. and Mrs. James D. Reigle, Kewaskum, Tuesday, July 6.

BINGEN—A son to Mr. and Mrs. Donald Bingen, R. 2, Kewaskum, Monday, July 5.

Miss Wallenfels, Miss Ruth Brides

Miss Mildred Wallenfels, daughter of Mr. and Mrs. Lawrence Wallenfels, Kewaskum, and A/1C John C. Ode Kirk, son of Mr. and Mrs. Harry Ode Kirk, Campbellsport, were married at 9:30 o'clock Saturday morning, July 3, during a solemn nuptial high mass celebrated by the Rev. F. C. La Buwi, assisted by the Rev. Francis Eschweiler of St. Michaels as deacon and the Rev. John Reichel of St. Kilian as sub-deacon.

The adult choir of Holy Trinity parish, of which the bride was a member sang the mass.

The bride was attended by her sister, Mrs. George Wallner, as matron of honor, Eleanor Ode Kirk, sister of the bridegroom, and Joanne Metz, cousin of the bride, were the bridesmaids. The bridegroom's sister, Joyce Ode Kirk, was flower girl. The bride wore a white chapel length gown of chantilly lace and nylon tulle over satin. The fitted bodice was of lace over satin with a scalloped edge, scooped neckline trimmed with seed pearls and translucent sequins and long, fitted sleeves of lace. Her bouffant skirt was of nylon tulle over satin with wide insets of lace in a panel effect at either side. She wore a lace scalloped edge tiara trimmed with seed pearls and translucent sequins. From it extended her full fingertip veil of finest imported English illusion with a scalloped edge. She carried a cascade bouquet of Starlite roses and carnations.

The matron of honor's gown was of ice blue nylon net over taffeta. The fitted strapless bodice was of embroidered net over taffeta with a little jacket of embroidered net. Her bouffant skirt was of net over taffeta with a side drape of embroidered net over a tiered net inset. With it she wore an ice blue half hat of lilies of the valley. She carried a cascade bouquet of golden rapture roses and carnations. The bridesmaids were dressed the same as the matron of honor. The little flower girl wore ruffles of nylon net and lace insets over a yellow taffeta skirt, tied with a sash of yellow satin trimmed with miniature flowers. Her headpiece consisted of a wreath of yellow lilies of the valley and she carried a cascade bouquet of Starlite roses and blue carnations.

George Wallner, brother-in-law of the bride, served as best man for the bridegroom, while Martin Haack, friend of the groom, and Robert Wallenfels, cousin of the bride, acted as groomsmen. Guests were placed by George Metz and John Hammes. David Wallenfels, cousin of the bride, served as ring bearer.

Dinner was served to 89 guests in the church hall and a reception was held for 275 guests at Forest Lake resort, where a wedding dance was also held.

The newlyweds left on a honeymoon enroute to Victorville, Calif., where the bridegroom is stationed at George Air Force Base. The bridegroom is a graduate of Campbellsport High school, his bride, a graduate of St. Mary's Springs academy, Fond du Lac, had been employed in the office of the West Bend Aluminum Co. before her marriage.

MARKS-RUTH

During a nuptial high mass read by the Rev. F. C. La Buwi in Holy Trinity church, Kewaskum, at 9:30 a. m. Saturday, June 26, Miss Florence M. Ruth, R. 2, Campbellsport (town of Auburn), became the bride of Earl A. Marks of Hubertus, son of Mr. and Mrs. Leonard Marks.

The bride wore a gown of embroidered net featuring a portrait neckline. The short sleeved bodice was fitted and the full skirt ended in a large train. The hand rolled, edged, imported illusion veil cascaded from a half hat of lace with seed pearls and sequin trim. Her bouquet consisted of white roses, carnations and lilies of the valley bordered by a white satin and lace fan.

Miss Carolyn Ruth was her sister's maid of honor and yellow net and lace formed her gown. The lace bodice was enhanced with a stand-up collar. She carried a yellow stand-up basket with pastel carnations. The bridesmaids, Miss Beverly

Annual Picnic in Kewaskum This Week End

The stage is all set for Kewaskum's annual picnic this week end, sponsored by the fire department and Robert G. Romaine American Legion post. It will be held in the village park on Saturday evening and all day Sunday, July 10 and 11.

The event will get rolling Saturday night with all of the rides, concessions and amusements in operation. As a special attraction that evening the well known Blatz Quartette of Milwaukee will render a number of vocal selections on the stage beginning at 8:30 p. m.

The Sunday festivities will start with a big parade at 12:30 p. m. A number of local businessmen and organizations will enter colorful floats and the parade will feature musical organizations, visiting firemen and Legionnaires, floats and novelties from neighboring towns, children's specialties and many other units. This year's parade should be a very good one. Prizes will be awarded to the best children's bike, trike and regular floats and winning commercial floats. The line of march will form at the Legion clubhouse and participants are invited.

Along with the regular picnic attractions, special entertainment will be provided Sunday afternoon and evening. Mel's Circus Clown band will make a hit and will circulate through the crowds. There will also be three big acts of roller skating, magic and acrobats.

There will be entertainment all day and a variety of games and concessions. Be sure to include Kewaskum on your list of places to go this week end. Admission is free.

Recreation Program

MONDAY
Puddles practice, all boys, 9-11; girls softball, 10:45-12.

TUESDAY
Softball and volleyball, girls 9-12; Volleyball, badminton, other games, boys.

WEDNESDAY
9-11, Puddles practice; 10:30-12, volleyball, badminton, girls.

THURSDAY
9-12, games and handicraft.

FRIDAY
9-12, organized games and handicraft.

PEACE CHURCH SUMMER SCHEDULE OF SERVICES

Beginning with Sunday, July 11, services at Peace church will begin at 9:30 a. m. and continue on this time schedule until September 5 Sunday school will be discontinued for these Sundays.

BROTHER PASSES AWAY

Misses Caroline and Clara Oeder received word Sunday of the death of their brother, Otto Oeder of Sheldon, North Dakota.

IN THE SERVICE

SHIRLEY KELLER HAS LEAVE
Pfc. Shirley Keller of Norfolk, Va. is spending a two-week leave with her parents, Mr. and Mrs. LeRoy Keller, Kewaskum.

PFC. EDDIE DREHER HOME

Pfc. Edward Dreher, Jr. of Fort Riley, Kans. spent the week end at the home of his parents, Mr. and Mrs. Edward Dreher, Sr., Kewaskum.

MARRIAGE LICENSES

Alvin Wiesner, Jr. and Frances Sippel, both of Campbellsport, R. 2; wedding July 10; John E. Ode Kirk, R. 2, Campbellsport, and Mildred H. Wallenfels, R. 2, Kewaskum; wedding July 3.

Kellers Open New Sinclair Station

Kellers' Sinclair Service, new service station located at the corner of Fond du Lac Ave. and Clinton St. in Kewaskum, is now open for business. Proprietors of the station are Lloyd Keller and LeRoy Keller, Jr.

The new station was erected by Dr. K. E. Lloyd of West Bend, owner of the property, who also owns a home adjoining it. Dr. Lloyd leased the building to the Sinclair Refining Company, which engaged the Kellers to operate the business. The service station was just recently built and work on it still is not entirely completed.

Kellers' Sinclair Service is open from 8 a. m. to 11 p. m. daily and features Sinclair Power X gasoline, Sinclair extra duty oil and other Sinclair products, Goodyear tires and batteries, car washing and greasing.

An opening announcement appears on another page of this issue.

Sailor Seeks Relatives Here of Berres Family

The following letter was received from A/2C F. R. Barr, AF12412458, 1929 A. C. S. Sq., Navy No. 230, Postmaster, Seattle, Washington, who is looking for relatives of the Berres family in this vicinity:

Dear Sir:
Would you publish this letter in your paper where people are most likely to see it?

I am looking for some relatives I believe are still living in Wisconsin. I am tracing my family history and would very much like to contact them.

My great-grandmother was Anna Maria Berres, born March 25, 1816, in Barton, Wis. Her father was John Berres. He came to Wisconsin in 1845 or 1846. He brought his wife, Christina Berres, and six children, Thomas, Peter, Mathias, John, Margaret and Kasper. Kasper Berres was the last child born in Germany before his parents came to America. He was born May 3, 1814. Then my great-grandmother was the first American born. She had a younger sister, Susan Berres, also born in Wisconsin. Their mother died and when their father remarried, many of the older children moved to different parts of Wisconsin and Minnesota. I have reason to believe some moved to Kewaskum.

If anyone reading this letter is a Berres, related to the Berres family or knows any Berres in Minnesota or Kewaskum, would you please write me?

Hoping God will answer my search with some replies, I am,
Gratefully yours,
Francis R. Barr

HOSPITAL NEWS

Mrs. Charles Backhaus, R. 3, Kewaskum, was taken to St. Joseph's hospital, West Bend, Saturday in the firemen's ambulance. She suffered a fractured hip in a fall recently.

Wallie Engelman, Kewaskum, returned home Friday from St. Joseph's hospital where he had been confined since Monday for treatment.

Jac. Bruesel, Jr., Kewaskum, is a patient at St. Joseph's hospital.

SHIRLEY KELLER HAS LEAVE

Pfc. Shirley Keller of Norfolk, Va. is spending a two-week leave with her parents, Mr. and Mrs. LeRoy Keller, Kewaskum.

Board Establishes Rates For Industrial Sewage

Adjourned Meeting
June 14, 1954

The Village Board of Kewaskum, Washington County, Wisconsin met in an adjourned meeting with President C. Miller presiding and all board members present. No action was taken on the minutes of the previous meeting.

This meeting was called for the purpose of establishing the sewage rates to be charged for treating the industrial wastes of the various village industries.

Mr. Kroncke of the Rosenheimer Malt & Grain Co. requested that he be granted an extra day to make a decision since some of the data presented was entirely new to him. Request granted.

Motion by J. Reigle, seconded by C. Schaefer and carried that the Recreation Program presented by the Recreation Committee, with Ernest Mitchell as director at a salary of seventy-five (\$75.00) dollars per week, be approved.

Motion by C. Schaefer, seconded by J. Reigle and carried that parking be prohibited for a distance of ninety (90) feet at the west approach and for a distance of one hundred ten (110) feet at the east approach of the Main Street, Milwaukee River bridge.

Upon motion made, seconded and carried, the board adjourned until 7:00 p. m., June 15, 1954.

William S. Martin, Village Commissioner

Adjourned Meeting
June 15, 1954

The Village Board of Kewaskum, Washington County, Wisconsin met in an adjourned meeting with President C. Miller presiding and all board members present. The minutes of the previous meeting were not read.

At this meeting the rates for the treatment of industrial and sanitary wastes were established. The engineering firm was requested to prepare the necessary ordinance. The Village Attorney was instructed to prepare the necessary contract forms.

The following resolution was introduced by Trustee Carl F. Schaefer:

RESOLUTION NO. 2-54
WHEREAS the Chicago and Northwestern Railway Company is the owner of certain lands in the Village of Kewaskum and;

WHEREAS the Village of Kewaskum is desirous to maintain a sewer along said land as shown in Exhibit A on a map dated February 2, 1954 and;

WHEREAS the Chicago and Northwestern Railway Company has agreed to license the use of said land for a sewer as marked on said Exhibit A;

NOW THEREFORE be it resolved that the Village of Kewaskum enter into an agreement with the Chicago and Northwestern Railway Company for the license of said land on condition that the Railway Company shall have the right at any time to make such connections to said sewer as required for its services at no charge or fee for such connections and use and further that the Village of Kewaskum will indemnify and save harmless the Railway Company from any special tax or assessment in connection with or on account of the construction, maintenance or replacement of the public improvement.

Motion by C. Sparks and seconded by J. Stellpflug that this resolution be adopted. Upon roll call, all members present voting "aye," the resolution was so adopted.

Upon motion made, seconded and carried, the board adjourned until 7:30 p. m. June 22, 1954.

William S. Martin, Village Commissioner

Adjourned Meeting
June 22, 1954

The Village Board of Kewaskum, Washington County, Wisconsin met in an adjourned meeting with President C. Miller presiding and all board members present except Trustee Carl F. Schaefer. The minutes of the previous meetings were not read.

Mr. Heign of the Mullancy, Wells and Company and Mr. Clinton of the McMahon Engineering Co. presented a schedule for the issuing of

148 Attend First Meeting, Election of New School Dist.

The first annual meeting of the newly organized Kewaskum Community High School was held in the high school auditorium on Tuesday evening, July 6, at 8:00 p. m.

The meeting was called to order by Deane Bascom, chairman of the Washington County School committee. After outlining the business that was to come before the meeting, Bascom asked for the election of a temporary chairman. Elwyn Romaine, chairman of the Washington County Board, was elected to preside as chairman of the meeting.

One hundred forty-eight electors from the towns of Auburn in Fond du Lac county; Barton, Farmington, Kewaskum, and Wayne, and the village of Kewaskum in Washington county elected Leo Bingen, Paul Landmann, Henry Rosenheimer, Melvin Riley and Clifford Stautz to the Board of Education. Landmann and Rosenheimer were elected for three years, Riley and Stautz for two years, and Bingen for one year.

After establishing the salaries for board members for the ensuing year and discussing the method to be employed for electing members to the board in the future, the meeting was adjourned to Wednesday, July 21, at 8:00 p. m.

The newly elected Board of Education will hold its organization meeting on Wednesday, July 14. At this meeting they will adopt a budget for the 1954-55 year to be proposed at the adjourned meeting.

Lakes Team in Semi-Pro Tournament at Plymouth

Manager Killy Honeck's Land o' Lakes Kewaskum team opened play in the Northeastern Wisconsin Semi-Pro district tournament at Plymouth on Thursday evening. They faced Log Tavern of Fond du Lac in the 7 p. m. game and Plymouth and Eden opposed each other in the 9 o'clock contest that night.

Ten teams are competing for the district crown at Plymouth including Kief's 1952 champs. Entered also are West Bend, St. Cloud, Fond du Lac, Eden, Kewaskum, Port Washington, Sheboygan's Kingsbury Breds and Plymouth. The winner will represent the district in the state meet at Milwaukee County Stadium beginning July 20.

According to the results reported, neither the Kewaskum Lakes nor Rivers teams saw league action last Sunday. In the only Lakes game Grafton tipped Port Washington, 3-1 in the playoff for the first half title. In the only Rivers tilt Barton topped Slinger, 3-2. The only Lakes contest scheduled for this Sunday is Cedarburg at West Bend.

NOTICE OF MEETING OF BOARD OF REVIEW

Public notice is hereby given that the Board of Review for the Town of Kewaskum will meet at the office of the Town Clerk on the 12th day of July, 1954, at 10:00 a. m. for the purpose of reviewing and examining the assessment roll of real and personal property in said Town, and all sworn statements and valuations of real and personal property therein, and of correcting all errors in said roll, whether in description of property or otherwise, and to perform such other duties imposed by law.

Dated July 1, 1954.

A. H. Seefeldt, Town Clerk

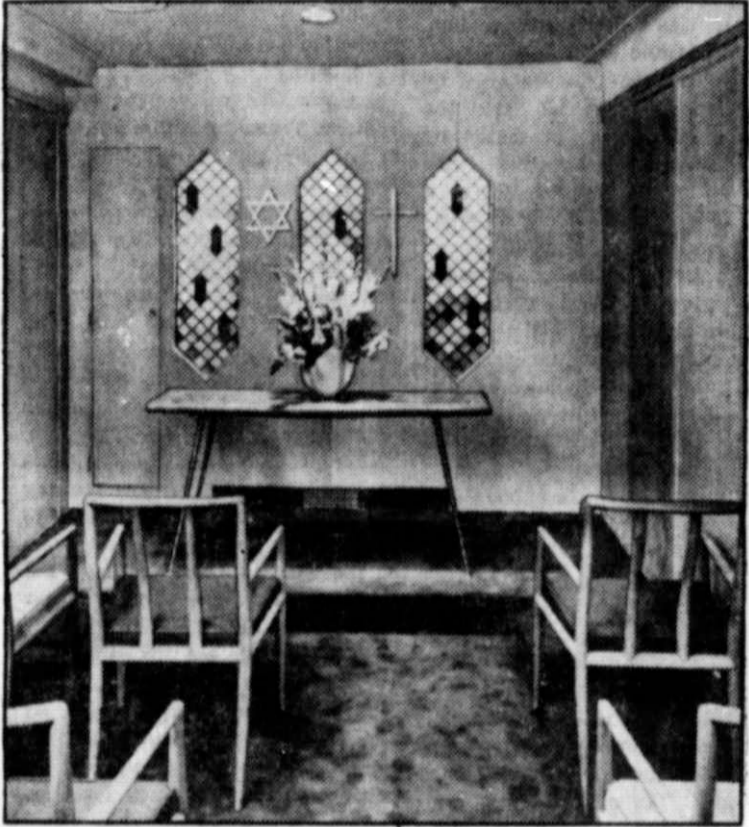

bonds to finance the construction of the sewage disposal plant. Mr. Heign advised the board that his company could have all the necessary ordinances and documents ready for a meeting of approval on July 15th.

Upon motion made, seconded and carried, the board adjourned until its next regular meeting night, July 6, 1954.

William S. Martin, Village Commissioner

IN THE HIGHEST DEGREE — Most-treasured "degree" she could receive is accepted by Mrs. Davis Bailey, of San Francisco, Calif., from Dr. William C. Fleming, dean of the College of Dentistry of the University of California. It's a "Ph.D."—putting hubby through (school). Blinded eight years ago by an eye disorder, for 2½ years she has helped support her husband, by working as a typist, while he finished his studies. Some 26 other wives received honors for aiding their husbands obtain college degrees.

ROOM FOR THE SPIRIT—An island of quiet in the sea of New York's hustle-bustle is this "Meditation Chapel," recently completed in the Hotel New Yorker. Designed to make available to the traveler a quiet spot for a few moments of prayer or meditation, it is nondenominational in character. Only religious symbols in the room are the Star of David and the Christian Cross, which hang between the illuminated stained-glass windows.

HANDY—Margaret Thring, of the Women's Royal Naval Service, stationed at Portsmouth, England, is not a land-going octopus. The pretty petty officer is the leader of a precision-drill team and she and her "arms" of the service will appear at a royal tournament during June.

Strokes More Frequent In U. S.

Deaths resulting from strokes have steadily been increasing in the United States and the latest surprising figures show that strokes, or apoplexy, now kill more Americans than any other disease except heart disease and cancer. The death toll from strokes has thus jumped from seventh to third place in the USA. Strokes today kill ten out of every hundred who pass away and some four times that number suffer some physical damage because of a stroke. Your chances of having a stroke increase sharply after you pass the age of forty. But you can do much to prevent a stroke, later in life, even if you are not yet forty. If you are that old or older, it is even more important to do what you can to help ward off a cerebrovascular accident—that's what doctors call strokes.

What can you do? The best simple advice is as follows: 1. Have a thorough physical examination regularly, which includes a check of your blood vessels, your blood pressure and your heart. High blood pressure is the most common warning sign of an impending stroke.

2. To avoid high blood pressure, keep your weight down and avoid strain. 3. Watch out for the following symptoms: aches in the back of the head and neck, dizziness and fainting, nerve trouble, nosebleed and hemorrhages in the retina of the eye. These symptoms, and high blood pressure, are extremely serious.

If a neighbor or loved one suffers a stroke, the best thing you can do for him, or her, is to summon medical attention, if quickly available, and you may raise the head of the victim slightly to prevent pressure on the brain. A stroke, after all, is nothing but one of three things. It is either a blood clot in the brain, a stoppage of blood for various reasons in a brain artery or blood vessel, or a rupture of a blood vessel or artery in the brain.

All are serious, and since they are becoming increasingly frequent, it would be wise to have a physical examination as described above, regularly, and look out for the usual warning symptoms.

Many attempts have been made to measure the average value of a tree says the National Arborist Association, but the monetary range has been so wide that such efforts have not been too successful. A tree like the Charter Oak, for example, for sentimental and historical reasons might be priceless. One man may value a tree that provides him with shade, fruit and comfort at thousands of dollars; another, who planted a tree for each child, some of whom have grown up and been killed in the wars, considers each tree priceless.

STRICTLY FRESH

STUDENT at the University of Oklahoma took one look at his exam paper and fainted. Shocked that he knew the answers, maybe.

Sign in Denver, Colo., reads: "Drive carefully—cats at play." They're to make "pussyfooters" out of the local motorists.

Police and firemen in Sacramento, Calif., who chased an old jalopy with its brakes afire,

really had a "hot rod" on their hands.

When the approved national law against interstate shipment of fireworks goes into effect, dangerous celebrations will turn out to be a complete fizzle.

London, England, city officials are pondering abandonment of the city's last gas street lights. They shouldn't worry—politicians the world over are sending up clouds of "ill-omenated gas."

The Crucial Polio Test

In the last few weeks American newspapers have told the story of thousands of youngsters being inoculated with the new Salk polio vaccine. School children by the thousands have lined up in a number of states to receive the injections and, in a few months, the world will probably know

whether this vaccine will fulfill the promise expected from it.

Those who have made great claims for the Salk serum refuse to predict the outcome of the test, and, rather, say the test will prove or disprove the value of the serum. In spite of this official comment, there is guarded optimism in the medical profession over respective results in these

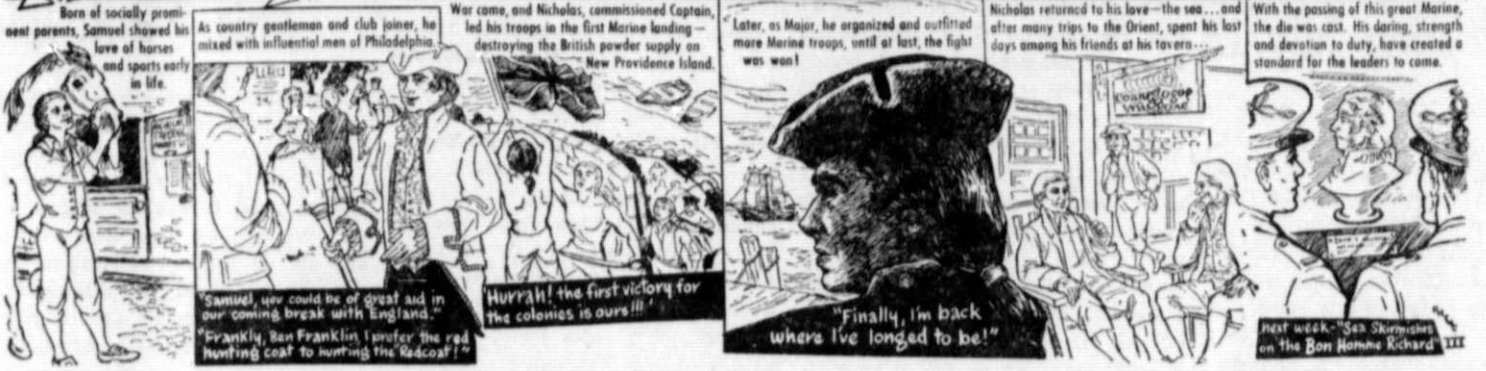

tests, and the results will naturally be watched with great interest all over the country.

If the results are what is hoped for, then 1954 might be the last year polio gets in its heavy licks against an unarmed youth in the United States. The Salk vaccine is relatively inexpensive, is capable of being produced in quantity,

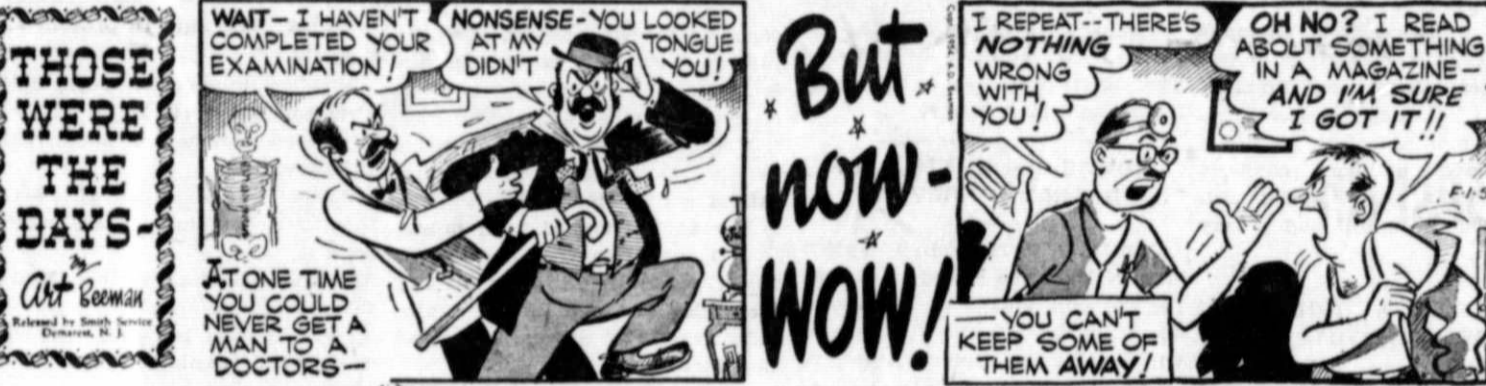

and if it proves effective in inoculation against polio, it will be generally used by 1955.

Looking for something new for the cookie jar? Make up your favorite brownie recipe, but substitute three-fourths cup finely toasted shredded coconut for each one-half cup of nuts.

OUR DEMOCRACY — by Mat

DOWN BY THE OLD MILL STREAM

MANY SONGS, MANY BOOKS, MANY PICTURES CELEBRATE OUR RIVERS. WE DRINK FROM THEM, FISH AND SWIM IN THEM, ROW ON THEM. THEY BEAR OUR COMMERCE AND ACCOMMODATE OUR INDUSTRIES.

TOO OFTEN WE ABUSE OUR STREAMS, LITTERING THEIR BANKS AND POLLUTING THEIR WATERS, SO THAT MANY OF THEM ARE FIT NEITHER FOR MAN NOR FISH. FORTUNATELY, WE ARE TAKING STEPS TO CONSERVE THEIR VALUE, BOTH TO THE LOCAL COMMUNITY AND THE NATION, BY RESTORING THEM TO SOMETHING LIKE THEIR ORIGINAL CLEANLINESS AND BEAUTY.

Ornamental trees should regularly be cared for, including spraying, examination for insects and diseases, and otherwise properly cared for, in order to realize their full values in shade, beauty and comfort, according to the National Arborist Association.

Trees moderate the climate by providing shade and by helping to reduce cold winds according to the National Arborist Association.

Evidence has accumulated to show that business centers of communities having cooler streets lined with well-cared-for trees do more business in the hot summer than those without trees, according to the National Arborist Association.

BLACK CRAPPIE

BLACK CRAPPIE © 1953 National Wildlife Federation

In the Spring a young man's fancy strongly turns to thoughts of fishing and it is quite probable that in many cases his interest in fishing extends over a greater portion of his lifetime than do light thoughts of love so ably publicized by Locksley Hall half a century ago.

Fishermen may not only be divided on the basis of their veracity but on the goals they seek. Some wish to get freedom from confining influences while others really want to fish. Of those who want to fish there are those who seek unusually large, aggressive or coy animals, and those who just want the fun of fighting something on the end of a line.

It is this last group who only want something that tastes, smells and acts like a fish that our crappies seem to have been created to please. They are common. They are vigorous fighters. They are good eating. They can be found where superior fishes could not survive. They reproduce abundantly, permitting a generous surplus harvest and they are not too choosy as to bait, tackle or skill. They seem to be willing to match their wits with anything that comes along even remotely resembling a fisherman. All this adds to their popularity with those who seek food, fun and freedom through fishing.

The Black Crappie *Pomoxis nigromaculatus* is darker than the White Crappie *P. annularis*. Either may reach a length of about 1 foot. The Black Crappie normally has 7 or 8 spines in the front fin on the back while the White Crappie has 5 or 6 such spines. The Black Crappie also usually has a deeper body than its lighter colored relative. The Black Crappie is often spoken of as the Calico Bass or Speckled Crappie. It is silvery olive with many dark green to blackish vertical bars on the sides. The belly may be bright silver to white but the forehead of the belly is dusky or slate gray. The mouth of the Black Crappie is set at a more oblique angle than is that of the White Crappie.

Crappies feed almost exclusively on insects, crustaceans, fishes and other animals found in the water. The nests are saucer-shaped and shallow. They are built by the males, usually over a cleared spot on the bottom in water from 3 to 8 feet deep. A female weighing one-half pound may lay to 60,000 eggs. Care of nest, eggs and young is probably mostly by the male. In suitable waters incubation lasts for a few days to 2 weeks or even more. The young may reach a length of 2 to 3 inches the first year and in northern waters may mature at a length of 7 or 8 inches in the third year. Crappies have been caught that weighed as much as 4 pounds. Crappie eggs are likely to be injured if the water reaches as low a temperature as 58 degree F. and may be destroyed if it goes down to 55 degree F.

Black Crappies are found in shallow ponds and slow streams through most of Southern Canada from Manitoba to Quebec and south to Texas and northern Florida. The White Crappie is more likely to be abundant in silty waters than is the Black Crappie.

The National Federation salutes the Black Crappie as an animal capable of bringing many thousands of persons into the outdoors for the enjoyment of a wholesome recreation.

—E. Laurence Palmer

Marah Anne's COOKING CLASS

It Pays To Eat A Good Breakfast

PRETTY as a picture with its gay and colorful provincial ware, here is the quickest, easiest, and one of the least expensive of all good breakfasts—a menu enjoyed by young people and oldsters alike. To whet the appetite, there's cool tangy orange juice. Crisp, crunchy corn flakes and milk make up a main course that is rich in body-building protein, minerals and vitamins. What with the more than twenty varieties of breakfast cereals to be found on your grocer's shelves—hot, ready-to-eat, pre-sweetened, with variations in flavor and form such as rolled, flaked, puffed, biscuit shapes, kernels and shreds—there's never a problem in planning with this basic breakfast pattern as a guide. Add two slices of bread and butter, and you have a breakfast that

pleasantly provides a good morning for everyone.

Nutrition authorities say "Breakfast should give one-fourth to one-third of all the nutrients you should have in a day." One-third is right for growing boys and girls and one-fourth for most adults.

Doctors discovered in a series of scientific tests on college girls and boys at a big midwestern medical school that after a good cereal breakfast you're able to work better, you're more alert and keen, and your muscles don't get so tired, especially during the late morning hours.

Without the basic cereal breakfast of fruit, cereal, milk, bread and butter, work output goes down; reactions are slower; fatigue increases. Yes, indeed, it pays to eat a good breakfast!

Peanuts are important because they are high in protein and niacin content. They are an important source of B vitamins and their high fat content provides food energy.

Peanut Stuffing
3-4 cup cracker crumbs
1-2 cup shelled peanuts finely chopped
1-2 cup heavy cream
2 tablespoons butter
Few drops onion juice
Salt and pepper
Cayenne

Mix crumbs and peanuts. Add cream, butter, onion juice, salt, pepper, and cayenne. Bake.
Cottage Cheese and Peanut Loaf
1-2 cup peanuts
1 cup cottage cheese
1 cup cold, cooked, rolled oats
1 cup milk
1 egg, slightly beaten
1 tablespoon fat
1-2 teaspoon salt
Pepper
Few drops Worcestershire sauce
1 tablespoon chopped onion
Chop peanuts and add other ingredients in order given. When well blended, place in a greased loaf pan. Bake in an oven 350 degrees until brown. Serve hot with tomato sauce.

Peanut and Carrot Loaf
1 cup chopped carrots
1 cup coarse ground peanuts
1 cup strained tomatoes
1 cup crumbs
1-2 tablespoons fat
4 eggs slightly beaten
1 teaspoon chopped parsley
Salt

Chop separately the carrots and peanuts, or put them through a food chopper using the coarse knife. Add other ingredients. Place in a greased loaf pan and bake 1 1/4 hours in an oven 350 degrees.

Peanut Souffle
1 tablespoon fat
6 tablespoons flour
3-4 cup peanut butter
1 1/2 teaspoon salt
Few drops lemon juice
1 1/2 cups scalded milk
4 eggs

Melt the fat and add the flour, peanut butter, and seasonings. Cook for 3 minutes, stirring constantly. Add scalded milk, and continue cooking until the mixture reaches the boiling point. Remove from the fire, pour the hot mixture over the well beaten egg yolks, mixing thoroughly. Cool, and fold in the egg whites that have been beaten until stiff and dry. Place in a greased ring mold, set in a pan of water and bake 30 minutes. Serve immediately.

Peanut Butter, Fig, and Raisin Sandwiches
1-4 cup figs
1-4 cup raisins
2 tablespoons light corn syrup
1-2 teaspoon salt
1-2 cup peanut butter
2 tablespoons lemon juice
Wash figs and raisins and put through a food chopper. Add salt, peanut butter, lemon juice and corn syrup. Mix well. Spread between thin slices of buttered bread.

Peanut Butter and Pickle Sandwiches
1-2 cup peanut butter
1-2 cup chopped pickle
1-4 cup cream or hot water
Thin buttered slices of bread
Cream peanut butter and cream together. Add chopped pickle. Spread between buttered slices of thin bread.

Baked Apples with Peanut Topping
6 medium sized apples, cored
1-2 cup raisins
3 tablespoons flour
1-3 cup sugar
1-2 teaspoon cinnamon
2 tablespoons butter
1 teaspoon grated orange rind
1-8 teaspoon salt
2 tablespoons peanut butter
1-4 cup chopped peanuts
2-3 cup water
2-3 cup orange juice
Arrange apples in baking dish. Fill centers with raisins. Combine remaining ingredients, except peanuts, water and orange juice. Mix until crumbly, add peanuts and sprinkle over apples. Pour water and orange juice around apples. Bake in an oven 375 degrees, about 1 hour, basting every 15 minutes. Peanuts may be toasted by placing apples under the broiler the last 3 to 5 minutes of baking. Serve with cream if desired.

Peanut Butter Cup Cakes
2 cups sifted cake flour
2 1/2 teaspoons baking power
1-2 teaspoon salt
1-3 cup shortening
1 1/2 cups brown sugar
1 teaspoon vanilla
1-2 cup peanut butter
2 eggs well beaten
3-4 cup milk
Sift flour, salt, and baking powder together. Cream shortening with 1 cup brown sugar and vanilla. Beat eggs until light and add rest of sugar. Add to creamed mixture and blend well. Add dry ingredients alternately with the milk in small amounts, beating thoroughly after each addition. Pour into greased cup cake pans and bake in an oven 350 degrees for 25 minutes.

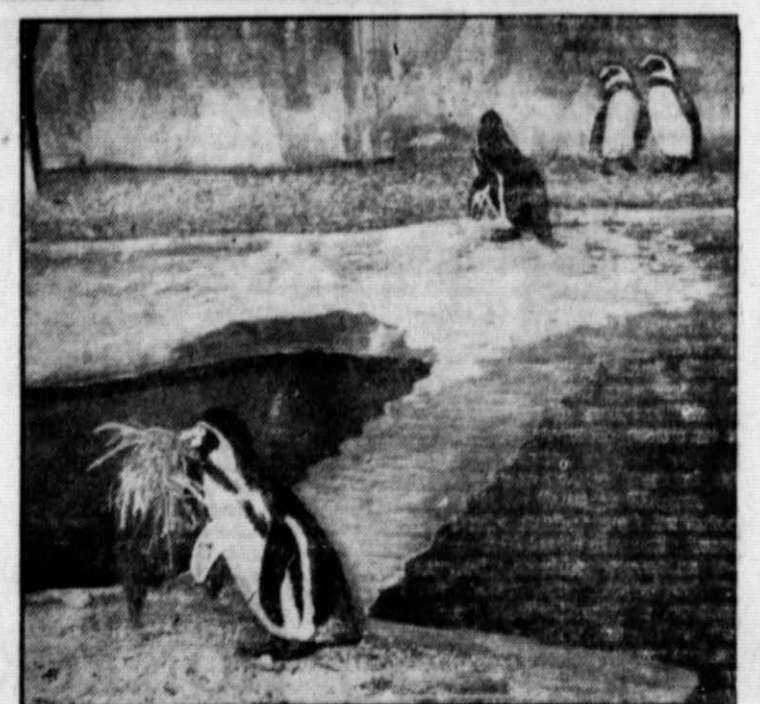

TURNABOUT'S FAIR PLAY—Big girls who want that "little girl" look can find it in creations like the design at left, by Miami's Margaret Newman. The large swag bow and square neckline, fashioned into a dress of pink-and-blue checked gingham with pellow-lined skirt, makes a fashionable late-in-the-day costume. Gail Hanline, at right, shows what eight-year-olds in Chicago, Ill., can wear if their big sisters take up little-girl styles. Vest is imported suede and slacks are in the sophisticated "Toreador" style.

WHO Honors Pioneer Nurses

Simple, isn't it? Once you know how. Teaching the know-how of child care is the job of this smiling nurse from the U.N. World Health Organization, who shows a young El Salvadorean mother how to bathe her baby. In her daily visits to rural districts, Nurse Marta Marroquin also watches over the health of expectant mothers and trains local midwives in hygienic methods. She is one of a pioneer group of WHO nurses whose work in 21 countries of the world helps promote international understanding. The international agency has dedicated this year's World Health Day, April 7, to the public health nurse—counselor, guide and healer.

In No Position to Make Threats

WHO CARES?—"Pierre" doesn't. It's sufficient that he's been brave enough to cross this thin bridge at Vincennes Zoo, in Paris, France. The deep-freeze put on by the penguins on 'other side makes no-never-mind. Pierre has a bouquet for the lady of the air-conditioned Arctic evening—so who cares? (Says Pierre.)

New easy way to pay for wiring on your Electric Bill

Here's why AS LITTLE AS \$1.00 A MONTH

Like so many families you may be denied full enjoyment of the conveniences of modern electrical living because of old-fashioned wiring. Larger wires and more circuits are needed to enable you to be modern and live electrically. Even in brand new homes additional wiring often is necessary to equip them for electrical living.

Here's how TO GET IT—
See your dealer, electrical contractor or The Electric Company. Just say: "I want to take advantage of the new easy pay-as-you-go plan for electric wiring."
THIS IS A SPECIAL LIMITED-TIME PLAN FOR:
• wiring for electric ranges — electric clothes dryers — room air-conditioners.
• wiring and plumbing for electric water heaters.

No down payment, 36 months to pay, and the minimum payment is \$1.00 a month on your electric service bill. Pay for needed wiring as you go Electric.
In many homes only a small amount of additional wiring is needed to provide for major electric appliances.

Don't miss out on this special offer! Today, see your electrical contractor, electric appliance dealer or

2L 125 F 2

Washable Wall Finishes Rate High For Home

Individual preferences vary in home interiors, just as they do in food, clothing, and entertainment, for example. Yet one design characteristic has become increasingly standard in today's homes. It's the use of wall finishes which are readily washable.

High degree of washability has caused painted walls to gain popularity. But colorfully-papered walls, preferred by many because of wallpaper's multiple pattern variations, now can be just as washable as painted walls.

For wallpaper now is available in washable styles which hold their finish for several cleanings. Hence, once redecorating is accomplished, either with paint or washable wallpaper, refinishing expense is eliminated for some time.

A bit more care is required in washing wallpaper than in scrubbing painted walls, however. Cleaning painted walls is a simple matter of preparing a galvanized steel pail of soapy water, and going over the dirty surfaces with sudsy sponge and clean wet cloth.

Washing wallpaper ordinarily requires care not to oversock the paper. Wallpaper experts recommend a process which actually is accomplished most rapidly with three pails of water—two filled with clear, cold water, the other with cool soapsuds.

To wash the paper, wet a workable section with clear water, sponge the area with cool soapsuds, then raise immediately by wiping the wall with a sponge wrung from the other pail of clear water. In using the soapsuds, stroke evenly in one direction only. By using two pails of clear water, you avoid getting the water in either pail too dirty to be usable.

Shade Trees Need Feeding

Shade trees growing under conditions where leaves, grass clippings and other natural litter are removed require artificial feeding if they are to be kept in healthy, vigorous condition, says the National Arborist Association. Neglected trees usually reach a state of semi or complete starvation even though they may appear normal to the casual observer.

Use a fertilizer containing nitrogen, phosphorus and potash. A good fertilizer should contain from 6 to 10 per cent soluble nitrogen. Three to five pounds for each inch of trunk diameter at breast height should be applied to the whole root area, reducing this amount by the proportion of the root system under buildings or pavements where this situation occurs.

Application is best when a series of holes are bored into the soil to a depth of about 18 inches. Distance between the holes should be 18 inches to 2 feet, and they should be bored uniformly over the root system. Soil augurs are the most efficient tools for the purpose. Trained arborists or tree experts generally use air or electric powered tools for the purpose. The advantage of compressed air equipment is that it loosens, aerates and fertilizes all in one operation. Completely soluble fertilizer is advantageous in some cases, being applied with a power sprayer and special soil nozzle.

SPECIAL DELIVERY—There's something about a United States package box that impels you to drop other things than mail. The slot, Carl K. Marshall, Port Worth, Tex., post office claims chief, exhibits a portion of a day's take: One cat, two bottles, wallets, wadded paper and cigaret butts.

Exercises Train Eyes To Work As A Team

It takes a combination of people, and sometimes a combination of methods, to bring faulty vision up to par, the Better Vision Institute points out. Of course the eyesight specialist has to do the major job, but he cannot be successful without his patient's active will to see better. And, in the case of youngsters, parents and teachers often are the first ones to notice signs of trouble. Once the specialist has made his diagnosis, there may be need for glasses, visual training, medical treatment, surgery, or a combination of two or more of these.

Perhaps visual training is the least understood method of improving eyesight. It consists of scientifically planned ocular exercises carried out under the direction of an eyesight specialist for the purpose of teaching the patient how to see effectively in the different activities of his life. It trains his two eyes to focus as one, not only for fast, efficient reading but for safety and comfort in every kind of task, from driving and bicycling to movie-viewing and baseball-playing.

Many studies have shown up the good results which can be accomplished by properly supervised visual training, as well as by similar work with hearing, feeling, smelling, and tasting. A number of scientists believe that improvement of any of the senses expands the brain's associational potential and thus facilitates development of the other senses.

Visual training may be a source of help under a wide variety of conditions. It has been particularly successful in correcting crossed eyes, so that the patient is relieved of the suffering caused by unattractive appearance and by inability to focus with both eyes. Even when an operation is performed on crossed eyes, it is often desirable to have visual training before and afterward, in order to assure permanence of the correction.

After the surface of the ground, trees are the most permanent ornamental element of any landscape, according to the National Arborist Association, and they should be treasured for that reason.

For flourishing growth, trees require a balanced diet, according to the National Arborist Association. By observation your local arborist can tell what food a tree may lack.

Don't Roast While You're Baking

BY EDNA MILES

THE kitchen is no place to spend these hot summer days. But even so, the family must be fed and must have at least one hot meal a day.

One solution lies in cutting down on the use of your oven during summer months and substituting an infrared rotisserie broiler that actually bakes. With this broiler you can bake at table height, working with a stainless steel appliance that's easy to keep clean and that offers visual cooking.

But that's not all. Your family can have foods that are barbecued, roasted, broiled, toasted, boiled, fried or grilled from this same broiler. Actually, in a very tiny kitchen, it's an ideal substitute for a stove.

The baking secret of this broiler lies in the tray, which slides into the unit and thus is automatically and thermostatically controlled. It turns itself off when baking is completed. And it can be used as a hot tray to be kept on the table, as a serving tray when used without heat and as a hot plate or grill.

Further, the broiler's timing mechanism can be used to turn off other electrical appliances.

Keep cool when performing those hot-weather cooking chores. An infrared rotisserie broiler takes care of nearly all cooking functions while adding a minimum quantity of heat to the atmosphere.

No Sudden Change In School Habits Seen In Some States

Despite widespread speculation about the Supreme Court's decision that separation in the public schools is unconstitutional, the fact is that few changes will occur in many of the seventeen affected states soon.

There is every evidence that the court tried carefully to avoid forcing a program that could well cause friction, even though it found that mandatory separation of the races in the public schools is unconstitutional. By announcing that the states' Attorneys General would be called to discuss how the situation could best be worked out, the court insured that no drastic action would take place immediately.

It appears that the next school year will already be under way before Attorneys General of the various states present their plans.

While there may be some changes, the situation will certainly not be clarified until further hearings are held.

Perhaps the most surprising thing about the decision will be

the lack of sudden, or overnight change, it brings. Custom dies slowly, and where schools, especially in areas where population is about equally divided, there will be a general reticence on the part of parents and students to attempt to force entrance of a few students into a particular school.

The unanimous decision of the Supreme Court Justices caught most observers by surprise. There is speculation that several Justices went along in making the decision unanimous only on the basis that no overnight change would be ordered by the highest court. The May 17th court decision seems to allow ample time for individuals, school authorities, and states to act in accordance with the decision.

Pail Method Easy Way to Creosote Porch, Fence Posts

Here's an easy way to apply creosote solution or other wood preservative to fence and porch posts before they are placed in the ground.

Fill a galvanized steel pail about half full of the liquid preservative. Place the lower end of the post in the pail, so it can absorb some of the preservative. Then use a paint brush to spread the solution as high as you wish on the portion of the post projecting above the liquid's level in the pail.

Place the wet post on a thick, absorbent pad of old newspapers to confine drippings to a safe area. Wood preservatives can damage lawns and also are difficult to remove from floors.

OWL SPREADS FIRE

Beloit, Kan. — Burning woods on the Emery Watson farm set a tree afire. An owl, nesting in the tree, flew nearly half a mile with its wings aflame and dropped on the Delmont Jones farm, starting a new fire, which spread to five other farms.

HE ALSO PLOWS GROUND—Special Council Ray Jenkins, who has been digging into the evidence in the Army-McCarthy dispute for the Senate Investigating Subcommittee, really gets down to earth on his 520-acre farm in Loudon County, Tenn. He drives this spanking-new tractor, a present for the farm from his wife, to really "dig up the dirt."

Are The Oceans Rising?

William J. Baxter, author of a new book on the weather, says flood damage on the Atlantic Coast and Gulf of Mexico this year will be the greatest ever witnessed by this generation. He says that damage on the Pacific Coast will also be great, although not as severe as on other U. S. shores.

Baxter believes abnormally high temperature during the recent winter thawed much ice in Arctic areas which will result in higher water, particularly in the Atlantic Ocean. He contends that glaciers are melting very rapidly and that the problem has now become a very serious one.

The situation is pictured as one of a battle to preserve land masses from all-powerful oceans which are steadily "stealing" land. Already according to Baxter, seventy-one per cent of the entire globe is composed of oceans or frozen areas. The weather expert's belief is that the percentage of oceans and frozen areas is now beginning to rise appreciably.

He points to serious floods in the British Isles last year, serious ravages from rising water in Scotland and the worst flood damage Holland has experienced since the Fifteenth Century, which left practically ten per cent of Holland's land covered by the North Sea. He also points out this spring's storms in Germany which caused the worst floods in seventy years on Germany's Arctic coast.

All over the world, from Russia to the Scandinavian countries, the same trend of high water is being observed, according to Baxter. The greatest danger in this country is the threat to coastal cities, it is said.

There is indeed much evidence to support the conclusions arrived at by Baxter. Even though he may prove right, it is certain to be exceedingly difficult to arouse officials in coastal cities about the probability of rising ocean waters. Even in this age of the hydrogen bomb, there is still much dispute and a lack of scientific data on the ways and peculiarities of oceans. It is one secret nature has kept pretty well and which the scientists have not yet been able to solve.

About Your Home

By FRANCES DELL

Flower show judges rate arrangements according to certain established rules. This makes both the judging and the arranging much easier. In either case, all one has to do is study the established rules.

There are two sorts of rules. The first concerns the technique and control of material used in an arrangement. The second has to do with imagination and beauty of design.

The first is important because it would be of no use to have good taste and imagination, if you could not control the plants and materials to be used.

When studying the various rules of flower arranging, there are always a few people who, in their effort to create something dramatic or different, go in for technical facility so strongly that their results are always stylized and too studied. This is a fault that is all too common.

The first rule for good arrangement is to be sure that holders and such do not show. This does not apply to decorative holders or rocks.

When entering an arrangement in a show, there is a rule which prohibits artificial coloring unless the schedule states that it may be used. Also, avoid the use of any material on the state conservation list.

For flower shows the arrangement must not touch the background or hide walls of the niche. For home use this would mean that the arrangement should be the proper size for the space it is to decorate.

Bible Comment:

We Can Move Mountains In Jesus' Name

PERHAPS the most distinctive, and at the same time the most puzzling, thing that Jesus said about faith is in the words recorded in Matthew: "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, remove hence to yonder place; and nothing shall be impossible unto you."

These words offer no puzzlement for us today, when we see such things actually being accomplished.

Hills that have stood for centuries are daily leveled by huge power equipment of puny man's devising.

This is an interpretation of the words of Jesus that we could easily make today of the greater works that were yet to be accomplished. Perhaps it is the interpretation that Jesus intended.

What did the words mean to the disciples to whom they were spoken, and what did Jesus intend them to mean?

Jesus was about to give to these disciples a seemingly impossible task. He was sending them out to preach the Gospel to every creature, to make disciples of all nations.

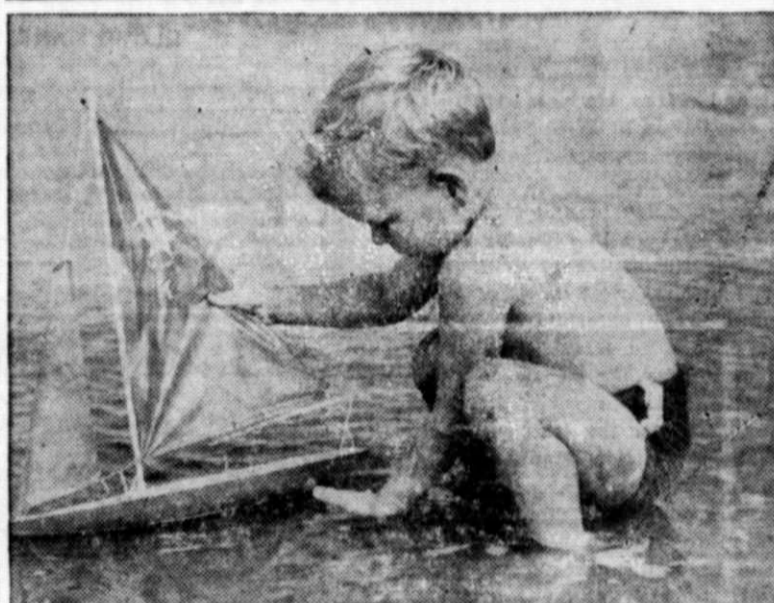

What a vast, mountainous task that must have seemed to those few unknown men as they faced the immense Roman Empire, with its materialism, its power and its paganism.

Perhaps it was those very words of Jesus that they must have recalled as they faced that mountain-moving task.

And with what amazing results the power of faith was vindicated, both the Roman Empire and the whole world have known.

It is that sort of faith that we need today.

The SNAPSHOT GUILD

Ordinary snapshot film in a box camera will give you a good picture in a situation like this. The bright sun, reflected from the water, is excellent lighting.

Facts About Black and White Film

At this time of year, with outdoor picture taking in full swing, many people begin to wonder about the various types of film they see on the shelves when they stop to pick up a roll. A friend of ours complained the other day that he was always bewildered when the clerk asked him which kind of film he wanted. Beyond that, he didn't actually know what he wanted.

So, for the benefit of any of my readers who may be faced with the same problem, here are a few simple facts about film. Discussions of various types of film can easily become very technical, but we'll do this as simply as we can, and suggest that for further information you consult a reliable photo dealer.

The most widely used film is known as a chrome type. We won't

attempt to go into a definition at this time—but will identify it as the type of film we mean when we refer to "ordinary snapshot film." It's ideally suited for the average amateur for use outdoors and with flash indoors.

The other two films most widely used are known as panchromatic films. Each has a special type use. One of them is excellent for use when you may wish to have really big enlargements made from your negatives. The other is what is called a fast panchromatic film, designed for use under difficult lighting conditions where fast shutter speed is necessary to stop fast action.

In other words, there are various types of film for taking pictures under varying conditions. Which is best for you to use depends entirely on what you want to do with it.

SPORTS AFIELD

By Ted Kesting

Dogs, particularly those in kennels, need a little extra care during hot summer months. Parasites of all kinds thrive then and precautions should be taken to keep your dog and his quarters free of such pests.

Henry P. Davis, sporting dog editor of Sports Afield magazine, suggests a thorough powdering at frequent intervals with a flea powder containing 5 to 10 per cent DDT. Effective sprays and dips are also available. The dog's bedding, if any is used in the summer, should be changed often and should be dusted with flea powder.

Ticks are not only irritating to dogs, but can bring about a weakened condition that is dangerous to their life. Dogs in tick-infested areas should be sprayed regularly. Never remove the ticks by hand. Pick them off with a tweezers and drop them in a can of kerosene.

Kennel quarters should be thoroughly disinfected regularly, and all refuse cleaned from the kennel daily. Sanitation makes for good health as well as comfort. A dog's quarters should be well ventilated in summer. The yard should have ample shade to provide a cool place for him to lie. And be sure to provide plenty of clean, fresh water. Keep the water as cool as possible.

Never, under any circumstances, leave a dog in an automobile parked in the hot sun. Many a fine dog has died of prostration or suffocation because of this sort of carelessness on the part of his owner.

Keep your dog away from violent exercise during the hot summer months. A run in the

cool hours of early morning or evening is OK, but make it short and be sure not to overdo it. If you take him afield during such cool periods, be sure he has ready access to water. And you can cut down on his food during a hot spell.

According to competent veterinarians, summertime clipping is advisable for long-haired dogs for hygienic reasons, as well as for comfort. The mere mention of clipping is heresy to many fanciers who keep their dogs for bench-show purposes. They prefer to pluck or strip the coat. But if you are not interested in showing your dog, clipping is faster, easier and cheaper. Your vet or pet store has the proper equipment and can do the job for a small fee.

Georgia has voted the Democratic ticket in every national election since the party was founded.

More than 550 cars are stolen in the U. S. every day. About 70 per cent of these thefts result from keys carelessly left in parked vehicles.

Accident statistics indicate that light-colored cars are involved in fewer accidents than dark ones. Light-colored cars can be seen more easily at night and look larger.

The life expectancy for men in India is about 32½ years, compared to 66 for U. S. men.

The U. S. has shipped 5600 mules to Turkey to help haul military items up and down the Caucasus Mountains.

SNACKTIME—This modest (?) display of chicken, lamb, rice, and uncounted side dishes recently was served in the home of the Emir of Hofuf, in Arabia. The mammoth table of delicacies was set in honor of visiting Saudi Arabian newsmen, who journeyed to Hofuf with Finance Minister Sheikh Abdulla Sulaiman, and the meal was considered in no way extravagant by princely standards.

HAILE SELASSIE ON TOUR TO OBSERVE U. S. METHODS

Emperor Haile Selassie of Ethiopia, who won the free world's admiration in 1935 by his valiant fight against foreign aggression, has made a tour of the United States.

Now, more than 18 years after he resisted the onslaught of Mussolini's legions in his homeland and nine years after Mussolini himself has passed from the world scene, the emperor comes to America as a man of peace. In the first visit here of an Ethiopian sovereign, he took a good look at American agriculture and industry.

Like the United States, Ethiopia today is one of the few nations that enjoys a food surplus, says the National Geographic Society. Its finances are sound. Trade is expanding.

In World War II the 61-year-old hereditary monarch threw off the foreign yoke. Since then he has led his country through a period of economic growth often compared, on a smaller scale, to the development of the American West a century ago.

Road Program Under Way
Expansion depends largely on an ambitious highway program begun in 1951. Over 5,000 miles of new or improved roads will open vast farm and mineral resources for the country's 15 million people.

A land of extensive tablelands interlaced with rugged but not rocky mountains, Ethiopia has been termed a farming paradise. It ranks with the American Middle West and the Russian Ukraine

Backbone of the country's military strength is an imperial guard of 5,000 men from which Ethiopia's Korean contingent was drawn. The nation's regular army numbers 18,500 men.

Emperor Selassie is a strong advocate of education. Today more than 60,000 children attend state schools. Hundreds receive advanced training abroad, many in the United States. The monarch is also an enthusiastic member of Washington's National Geographic Society. His monthly copy of the National Geographic Magazine is regularly flown in to him.

As ornamental subjects for homes, communities and industrial properties, trees are more permanent, easier to cultivate than herbaceous plants and are in the long run less expensive, according to the National Arborist Association.

as one of the earth's most fertile regions. Farm experts say Ethiopia could become the granary of the Middle East.

Until recently, however, the nation remained isolated, accessible by air and by a single railway from French-Somaliiland. In 1952, the United Nations sponsored federation of Ethiopia and neighboring Eritrea. Long an Italian colony, Eritrea had been under temporary British administration since 1941. Its Red Sea ports now serve land-locked Ethiopia.

Ethiopia is an empire of 400,000 square miles and boasts Africa's longest tradition of independence. Excepting the five years of Italian occupation, it has been a sovereign country for centuries.

Superimposed on a map of the United States, Ethiopia would stretch from Maine to South Carolina and from New York City to Iowa. Its people are a mixture of the Hamitic, Semitic and Negroid races. Amharic and Galla are the principal languages, but more than 70 languages and 200 dialects are spoken.

Centralized Capital
Addis Ababa, the capital, means "new flower." Sprawled over a lofty, forested plateau near the center of the country, it is one of the most racially variegated cities in Africa. With a population of 340,000, the capital is a hodgepodge of old and new. Flashy automobiles honk at flocks of sheep herded through the streets.

Backbone of the country's military strength is an imperial guard of 5,000 men from which Ethiopia's Korean contingent was drawn. The nation's regular army numbers 18,500 men.

Emperor Selassie is a strong advocate of education. Today more than 60,000 children attend state schools. Hundreds receive advanced training abroad, many in the United States. As ornamental subjects for homes, communities and industrial properties, trees are more permanent, easier to cultivate than herbaceous plants and are in the long run less expensive, according to the National Arborist Association.

Story About Casey Jones

On the very spot where in 1900 his train ramed into the rear end of a long freight, Casey Jones was honored. The occasion took place near Vaughan, Mississippi, where fifty-three years ago the Illinois Central Cannonball Express piled up into that long freight train.

At the occasion, the fireman who jumped from the engine Jones operated, his 81-year-old widow, and many other close associates were present. The fireman, Sim T. Webb, told reporters Casey's last words were: "Jump, Sim, jump!"

Webb also recalled the last hours of the famous railroader, who now has become a part of the country's railroad legend. It seems that Casey and Webb had pulled into Memphis, Tenn., April 28th, 1900, expecting to get off duty. However, another of the line's engineers was ill and Casey Jones was substituted. Webb went along as fireman.

The fireman also recalls that Casey was an hour and a half late when he started out and very tired. Nevertheless, the Cannonball made up time steadily under the driving hand of the famed engineer. As the Cannonball approached Vaughan, Miss., it had made up the lost time. It was about 3:30 a. m. in the Mississippi city, 200 miles south of Memphis.

Jones saw the long freight ahead of him on the track and knew he had no chance to stop his engine in time to prevent a disastrous collision. He turned to his engineer, Webb, and yelled: "Jump, Sim, jump!" The fireman jumped and saved his life. Casey Jones and the Cannonball ploughed into the long freight and Casey died at the throttle in the shattering wreck which ensued.

To commemorate that famous wreck, and the life of a hero of American folklore, a marker was dedicated near Vaughan to the memory of Casey Jones. The engineer most certainly never dreamed he would be so well known in these United States, and yet there is hardly a boy in the country who has not sung the words to "Casey Jones" or heard the tale of the brave engineer, who is now one of the major characters in American folklore.

New Twist In Strikes

The latest in strikes was demonstrated in Jerusalem, where all salaried physicians in Israel began a three-day strike for higher wages. Government officials protested any salary hike would bring on an inflationary spiral, but this argument fell on deaf ears as far as the Israeli Medical Association was concerned.

In fact, the association announced that if the three-day day strike didn't work, then a strike of unlimited duration would begin in June.

Cooperating with the salaried physicians, self-employed physicians called a sympathy strike of two hours. It is reported from Israel that all municipal clinics were without physicians during the strike, and that 63 per cent of all the people of the country were affected. It is estimated that at least 2,000 physicians stayed away from work during the strike.

We have never been threatened with such a strike in the United States because of the fact that the medical profession is a professional group, composed of tens of thousands of independent physicians. However, were this country to reach the stage where government-paid physicians were caring for a majority of the people, then such a strike could be quite possible in the United States.

"Our kitchen—the best room in the house."

Most farm folks think the kitchen is the best room in the house. It is the meeting place, where healthy appetites are satisfied. The modern kitchen is essential to the health and happiness of every farm family.

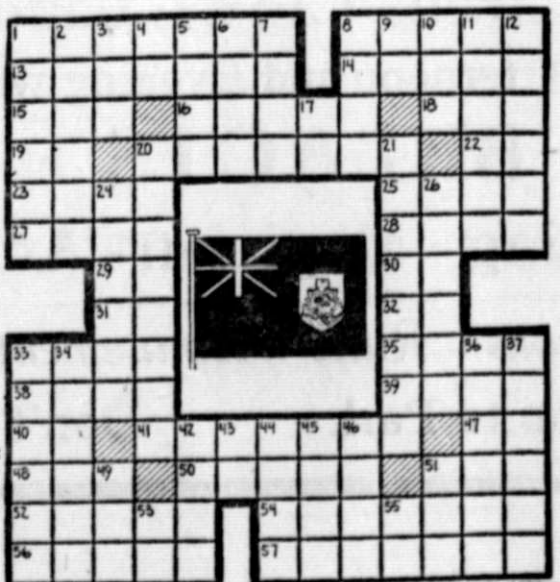

Many farm families are modernizing old type kitchens with funds set aside in U. S. Savings Bonds. The Savings Bond makes an ideal investment for folks who have home improvement in mind.

Here's the Answer

Brighten the Laundry

ANY laundry room can look as modern as the kitchen, even though it's tucked away in a basement. Covering the stationary tubs is a good start toward improving the home laundry.

For convenience, a table-and-cabinet on wheels can be built to cover the tubs when they are not in use. On wash day, the table

simply is moved away and used for a sorting table. Easily constructed of lumber and covered with long-wearing Masonite Tempered Presdwood, this combination in itself will make a great improvement in the laundry's appearance.

An exposed water heater can be covered in a similar manner. As illustrated, it is located in the corner, next to the tubs. For ventilation, use a small Masonite "Peg-Board" panel. A door in one side of the heater cabinet hides a fold-down ironing board, and there's a shelf, too, for laundry supplies.

The entire cabinet may be moved out readily if heater repairs are required.

The wheel-out table may be seen at the right in the illustration. To brighten the drab walls, fur them with lumber and apply panels of an all-wood, easily painted and long-wearing material, Masonite Tempered Presdwood.

THESE WOMEN!

By d'Alessio

HERE'S HOW...

MAKE A MODERN BED

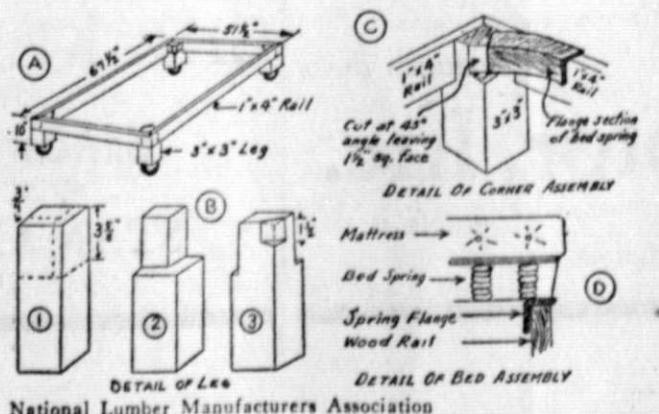

The modern bed in which all structural members are hidden is easy for the home craftsman to make.

The bed is simply a frame mounted on short legs (A). Frame members are of 1 by 4-inch lumber—two pieces 67½ inches long, and two pieces 51½ inches long, fastened to four legs made of 3 by 3's.

The leg shaping looks complicated, but if the steps in (B) are followed, it is easy. Saw out on the dotted lines (B-1) to produce the block

(B-2). Drawing (B-3) shows the leg turned around for cutting the 45-degree notch, 1½-inch square. The reason for the notch and ledge are shown in (C).

The rails are fastened to the legs with Number 8 (round-head) wood screws. Spring and mattress are just set in place, with the flange on the bottom of spring, extending along the rails and corners as shown in (C) and (D).

JUST LOAFIN' ALONG—But not for long. According to the Navy, this Viking 10 rocket has traveled nearly 4000 miles per hour, and reached a height of 136 miles. Largest of American-built single-stage rockets, it is undergoing tests at White Sands, New Mexico.

Behind The Scenes In American Business

By Reynolds Knight

Buyers and manufacturers in this center of financing and manufacture of semi-durable goods are having a quiet wrestling match over the immediate future of business. Retailers have had a disappointing half-year. However, they are full of enthusiasm for the fall season, and feel a bit let down because makers of apparel, pocketbooks, and the like don't seem to share this hopefulness.

The manufacturers reply that the volume they have attained so far in 1954 has been profitless. So they intend to produce hand-to-mouth, with nothing going into inventory. This policy, naturally, means that they hope to raise prices. Lower volume without price rises means simply that losses will be larger, because overhead can't be cut along with sales.

Moreover, say the sellers, the buyers are really asking for larger assortments from which they will buy fewer pieces of each article, with no actual increase in their purchases. The sellers' complaint is a little unfair. Despite the licking retailers took on inventory last fall, they increased their inventories by \$200,000,000 in March and April, while manufacturers and wholesalers were still retrenching.

The retailer's more flexible set-up makes him nearly always more hopeful than the manufacturer. That's a good thing; if the retailer insists on buying, the manufacturer will soon recall his hands and raise output.

ENGINEERS NEEDED—America's great need for engineers is nowhere more pressing than in the field of air defense. This is pointed up by some fighters from Mundy I. Peale, president of Republic Aviation Corporation.

It takes 27 times as much engineering talent to build today's superfast, complex jet planes as it did to turn out World War II fighters. Mr. Peale gives the figures as 41,000 engineering man-hours for a World War II fighter, 1,132,000 for one of the newest Air Force planes.

Building Republic's 650-mile-an-hour Thunderstreak, the Air Force's first swept-wing fighter-bomber requires the skills of 38 different kinds of engineers. This complexity stems from the increasingly varied and difficult tasks military planes must perform. The Thunderstreak, for example, is not only an atomic bomb carrier; it is designed also for speed enough to fly high-altitude interceptor missions, and for long-range escort duty.

THINGS TO COME—A new punch-card payroll preparing machine turns out 27,000 paychecks an hour. . . . A new transparent plastic portable cabinet for repairman or salesman has 24 shallow drawers into which its carrier can see. . . . A dog food company has a booklet which lists all the hotels and motor courts in every state which allow the tourist's dog to accompany him. . . . A personality flashlight comes with a strip of gold foil along the side. Write your name on the foil with a ball-point, peel it off, and the name remains.

PRICE CURRENTS—The wholesale price index continues to show the same apparent stability made up of an unusual number of price movements in opposite directions.

Pork cuts have begun to follow live hog prices downward as federally inspected hog slaughters move upward. Lumber prices, after standing still during the usual spring upturn, have advanced on continuing high housing starts. Bread flour goes up; watermelons, under the impact of new varieties which can get started in comparatively low night temperatures, have started to fall in price at a date when there were none for sale just a few years back.

BITS O' BUSINESS—Lead and zinc buying for the government stockpile was stepped up July 1. . . . Steel production last week climbed back up to the rate of last February. . . . Unemployment declined and employment rose as farmers and building contractors put on workers. . . . The Commerce Department forecast expenditures on plant and equipment at a \$26.8 billion annual rate in the July-September quarter just ahead.

The oldest living trees attain an estimated age of 6,000 years, according to the National Arborist Association. The platanus, or plane-tree may reach 4,000 years, the sequoias or redwoods, around the same.

Steel costs are down even where list prices are holding firm. Little defects that no one noticed in the shortage days now make a piece of steel "second," so it sells,

Dundee

Ernest Bartelt, age 72, of Town Mitchell passed away early Wednesday morning, June 29, at the home of his sister-in-law, Mrs. Otilie Bartelt, two miles east of Dundee, after a lingering illness. He was born Oct. 22, 1881 in the town of Mitchell, the son of the late Mr. and Mrs. Carl Bartelt. He lived in the town of Mitchell all of his life. He was a member of the Dundee Trinity Lutheran church. Mr. Bartelt is survived by one sister (Mrs. Paul Falk) of Plymouth, one sister-in-law, Mrs. Otilie Bartelt with whom he resided and many nieces and nephews. Three sisters, one brother and his parents preceded him in death. Funeral services were held Saturday at 2 p. m. at the Trinity Lutheran church. The Rev. Harvey H. Kahrs officiated and burial was in the Trinity Lutheran cemetery.

Mr. and Mrs. Francis Gilboy left Monday for Ogden, Utah, to visit the former's sister and brother-in-law, Mr. and Mrs. Paul Becker. Carol Feilenz of West Bend visited the past week with her grandparents, Mr. and Mrs. John Waranus.

Sharon Lavey returned to her home in Sheboygan after a week's visit with her aunt and uncle, Mr. and Mrs. John Lavey.

Mr. and Mrs. Bernard Gartland are vacationing this week in the northern part of the state.

Mr. and Mrs. Frank Backhaus, accompanied by Mr. and Mrs. Edwin Kempf of West Bend, spent several days in the northern part of the state.

Mr. and Mrs. Clarence Reigle and children spent the past week at Canton, Ohio, where they visited the former's parents.

Mrs. George Gilboy, Mrs. Cyril Gilboy and Mrs. Sylvester Majesky and son Monte spent Wednesday with relatives in Milwaukee.

The Ladies' Aid held their monthly meeting at the church basement of the Lutheran church Thursday afternoon. Mrs. Howard Narges was hostess.

Mr. and Mrs. Lou's Ramthun returned home Friday after a two weeks' vacation in the western states.

Mr. and Mrs. Anton Langenkamp visited with friends at Wabeno this week.

Mrs. Emma Gritzmacher and her daughter and son-in-law, Mr. and Mrs. William Mielke of Madison visited Saturday with Mrs. Lena Mielke and also attended the funeral of Ernest Bartelt.

Mr. and Mrs. Arno Triebensee of Cascade visited Sunday afternoon with Mr. and Mrs. C. W. Baetz. Mr. and Mrs. Herman Heller and Mr. and Mrs. Oscar Backhaus of Horicon visited Saturday with their sister, Mrs. Otilie Bartelt, and also attended the funeral of Ernest Bartelt.

Mr. and Mrs. Clarence Bucholz and children of Milwaukee, accompanied by the latter's mother, Mrs. William Wothe, spent the past week on a tour through the west.

Mr. and Mrs. Shubert Arndt of Milwaukee spent the week end with the former's sister, Mrs. Mae Lemke.

Mr. and Mrs. Clarence Bohn attended the funeral of the former's aunt at Beaver Dam Monday.

Mrs. William Wothe, accompanied by her daughter and son-in-law Mr. and Mrs. Merlin Dettman and children of Boltonville, visited Saturday with relatives in Fond du Lac.

Mr. and Mrs. Walter Mohr entertained Sunday, July 4, at their home for dinner and supper. Mr. and Mrs. Ed. Droeger of Milwaukee, Mr. and Mrs. Al. Damrow of Elkhart Lake and Alfred and B. Mohr of Mt. Calvary.

Mrs. Harry Crumbley of Canton, Ohio, is visiting this week with her son and daughter-in-law, Mr. and Mrs. Clarence Reigle.

Rev. and Mrs. H. A. Kahrs and family attended the wedding of the former's nephew in Fond du Lac Saturday.

Mr. and Mrs. Vilas Ludwig and daughter Delores, accompanied by Mr. and Mrs. John Ludwig of Milwaukee, spent a week's vacation in the northern part of the state.

Johnnie Arndt of Sheboygan is

visiting this week with his cousin Michael Lavey.

Mr. and Mrs. Richard Mielke and son James and the former's sister, Mrs. Camilla Murten visited Sunday with Mr. and Mrs. C. W. Baetz.

Mr. and Mrs. John Waranus and family and Mr. and Mrs. Burno Feilenz of West Bend left early Sunday morning for White Cloud, Michigan to attend the funeral of Mrs. Waranus' brother, G. Joannites there.

Mr. and Mrs. Norman Kutz of West Bend visited Sunday and Monday with Mr. and Mrs. Louis Ramthun and on Monday left for the northern part of the state for a week's vacation.

Mr. and Mrs. John Lavey entertained Sunday, July 4th, at their home Mr. and Mrs. John Harbrecht, Mrs. Eugene Harbrecht and children, Mrs. Lawrence Arndt and children, Mr. and Mrs. George Lavey and family of Sheboygan and Mr. and Mrs. Ed. Tarmen and family of Milwaukee.

Mr. and Mrs. Herbert Heider, daughter Joan and son Allan spent the week vacationing in the northern part of the state.

Mr. and Mrs. George Thayer and daughters Eunice and Betty visited relatives in Milwaukee Sunday and Monday.

Mr. and Mrs. Charles Sparks and Mr. and Mrs. Chas. Reigle of Kewaskum visited Monday with Mr. and Mrs. Clarence Reigle and family.

AUCTION

July 17, 2:30 p. m.
The Frank Gitter Property
at Boltonville, Wis.

About 3 miles north of West Bend, on Highway 14; watch for signs. A beautiful 3 bedroom home with bath, living room and kitchen, full basement, hot air furnace, electric hot water heater. Rug in living room to go with home. 1-car garage, about 1/2 acre of land.

Reason for selling, bought farm near St. Kilian; will sacrifice this home. Now vacant will give possession at once.

Terms of sale, 1/4 down, balance on date of closing. Can be financed for G. I. and other buyers to suit both buyer and seller.

Can be seen by appointment only, most anytime.
