

## Over 200 Dairy Farmers Attend Annual District Meeting at Plymouth

More than 200 dairy farmers of Dodge, Fond du Lac, Ozaukee, Sheboygan and Washington counties met in the Plymouth city hall Dec. 15 for the District 5 annual meeting of the American Dairy Association of Wisconsin.

Two directors were re-elected for three-year terms, Wilbur Bohnhoff, Plymouth, producer, and George Gould, Waupun, industry representative.

An encouraging picture of progress in advertising and movement of dairy product sales throughout the country was given the dairymen by M. J. Framberger, state ADA manager. "But there still is a great deal of work to be done in this constant battle for a larger share of the consumer's food dollar," he said.

Framberger illustrated with slides the intensive sales campaign ideas being furnished the entire dairy industry by ADA, explaining that today dairy farmers are telling eight people the story of their products at the extremely low cost of but 1 cent. "We believe we are on the right track with our promotional plans and are giving the dairy farmer the greatest return possible for his investment in ADA. In 1955 there will be the largest dairy promotion ever seen in this country."

A review of the brucellosis control program in the state, given added impetus by federal action, was presented by Art Kurtz, Madison, administrative assistant in the Wisconsin Department of Agriculture.

"We must never lose sight of the fact that to increase our dairy food markets we have to produce a high quality and acceptable product," he declared.

Per capita increases in the nation's consumption of butter, cheese and fluid milk were described by Sheldon Wilcox, ADA merchandising director, as evidence of the value of money invested in ADA. For the first time in many years, he said, butter sales are on an upward trend, the estimated increase being 5 per cent for 1954, after reaching a low of 8.6 pounds per person in 1952 and holding at the figure during 1953.

"While we naturally cannot say that ADA should receive all the credit for this picture, we are proud to have furnished ideas to the entire dairy industry and taking the lead in greater advertising and promotional programs that have affected favorably consumption of all dairy products," Wilcox stated.

The financial statement was explained by Bud Phillipsen, membership director, who pointed to the extremely low administrative cost of the ADA program, showing that dairy farmers are using their investment in ADA wisely.

Other officers of the district are Sam Stanchfield, Fond du Lac, president; Elmer Berg, Brownsville, vice president; Herman Schreiber, Sheboygan, secretary; Robert Eird, Oakfield, and Paul Bucher, Allenton.

## BRUCELLOSIS ELIMINATION PROGRAM IN COUNTY STARTS

The job of eliminating brucellosis from the dairy herds on a county-wide basis is being started in a number of Wisconsin counties. Washington county is one of these counties. The names of all herd owners are now being listed for use by those who will circulate the petitions.

Under the present set-up no fluid milk will be accepted by the Milwaukee & Chicago markets after July 1, 1955, unless it is produced by an approved brucellosis free herd. To encourage farmers to eliminate the disease from their herds the federal government has raised its indemnity payments to match those of the state.

More information will be carried on the brucellosis program in Washington county at a later date.

## HIGHWAY SAFETY TO BE TOPIC ON WBKV SUNDAY

This Sunday's radio program at 12:45 p. m. over WBKV, West Bend, sponsored by the UAW-AFL unions, will feature the Washington County Sheriff's Department on highway safety.

## Peter P. Siegel Dies Suddenly

Peter P. Siegel, 65, farm resident of the town of Auburn, residing three miles northeast of Kewaskum, died suddenly of a heart attack at his home on Wednesday, Dec. 22. He had not been ill and was found dead in bed Wednesday morning. Mr. Siegel would have reached the age of 66 years on New Year's day.

The deceased was born Jan. 4, 1889, in the town of Barton, a son of the late Christian and Magdalene Siegel. With the exception of a few years, he was a resident of the town of Auburn all of his life. Mr. Siegel was married to Alma Faber on Feb. 16, 1919, in Kewaskum.

Surviving are the widow, one son, Frederick John Siegel, who resides with his parents; three sisters, Mary (Mrs. Michael Blum) of New Berlin, Wis., Mrs. Margaret Kleck of Richfield, and Mrs. Catherine Marks of Milwaukee, and two brothers, Philip Schmidt of Tomahawk, Wis., and Bernard Schmidt of Kewaskum. A daughter, Esther, died in infancy.

The body will be in state at Miller's Funeral home, Kewaskum from 2 p. m. Sunday until 11 a. m. Monday and at the Peace E and R church from 12 noon until 2 p. m. Monday when services will be held. The Rev. F. L. Rodenbeck will preside.

## MRS. LEO HEISLER

Mrs. Leo Heisler, 64, of 119 So. Main st., West Bend, a native of St. Killian, and sister-in-law of Louis J. Heisler of Kewaskum, passed away Monday morning, Dec. 20, at Wisconsin General hospital, Madison, following an extended illness.

Born at St. Killian, town of Ashford, on Jan. 12, 1890, Mrs. Heisler was the daughter of the late John and Clara Pasch.

She is survived by her husband, three daughters, Mrs. Werner Hug, Miss Virginia Heisler and Miss Laura Heisler; three sons, John, James and Leo F., and two grandchildren.

The body was in state at the Kapfer-Gehl Funeral home at West Bend after 7 p. m. Tuesday. Funeral services were held at 9:30 a. m. Thursday at Holy Angels church, West Bend, with the Rt. Rev. Msgr. Edward Stehling officiating. Burial was in the church cemetery.

## HONOR ROLL STUDENTS AT HIGH SCHOOL ANNOUNCED

Kewaskum High school honor roll students for the second six weeks period, which ended Dec. 3, have been announced as follows:

**FRESHMEN**—Gwendolyn Edwards, Helen Felton, Mingyon Gayan, John Heisdorf, Carol Miller, Geraldine Nischke, Richard Pierce.

**SOPHOMORES**—Audrey Amerling, Norman Foerster, Patricia Glissen, Mary Ellen Jaeger, Russell Kempf, Audrey Kral, Florence Krauss, Kenneth Meilahn, David Opgenorth, Russell Pillar, Paul Schaub, Robert Sparks, Sue Weddig, Harvey Weigand.

**JUNIORS**—Don Bradke, Dan Panzer, Tom Peterson, Judy Weddig.

**SENIORS**—Gladys Becker, Mary Bingen, Katherine Braun, Joanne Ferber, Jerome Nigh, Lyn Peterson, Norbert Rosbeck, Mark Rosenheimer, Shirley Staehler, Rosemary Struebing, Richard Wensberg.

## BAPTISM OF EDWARDS AND BACKHAUS BABIES SUNDAY

Two babies were baptized by the Rev. Gerhard Kanless in St. Lucas Ev. Lutheran church on Sunday morning. They were the daughter of Mr. and Mrs. Richard Edwards, who received the name Mary Alma, and the son of Mr. and Mrs. David Backhaus, who was given the name Steven Dale.

## POST OFFICE CLOSED ON CHRISTMAS AND NEW YEAR'S

The post office will be closed on Christmas and New Year's. Only one mail will be received and that is on Train 217 due here at 5:00 a. m. No mail will be dispatched. The lobby will remain open until 6:00 p. m. for the benefit of lock box patrons.

Frank Heppie,  
Postmaster

## Lakes, Rivers Games at Horicon are Cancelled

The Kewaskum Land o' Lakes and Rivers basketball teams were scheduled to play at Horicon Sunday night but the Horicon management called up last Thursday and cancelled the games, giving no reason for the postponements. The tilts will be made up at a later date.

To date the local teams have played only one game in three weeks of the season. The Lakes cagers defeated Cedarburg in the opener and the Rivers five was defeated by a Cedarburg team. A week ago Sunday the teams drew a bye and then came last Sunday's cancellation.

Both teams will resume action this Sunday night on the home court. The Lakes quint will be host to Rosendale and the Rivers squad takes on Fillmore in the first contest starting at 7:30 p. m.

In Lakes games played last Sunday Campbellsport defeated West Bend, 86-68, and Rosendale beat Mayville, 90-82. This was Campbellsport's third straight win and gave them first place in the league.

## LAND O' LAKES STANDINGS

Team	Won	Lost
Campbellsport	3	0
Kewaskum	1	0
West Bend	2	1
Cedarburg	1	1
Rosendale	1	2
Horicon	0	1
Mayville	0	3

## KEWASKUM DARTBALL TEAM WINS FIRST HALF TITLE

The first half of the 1954-55 Lutheran Dartball season has ended with the St. Lucas Ev. Lutheran parish team of Kewaskum winning first place in the Western Division. The local team won 23 games and lost only four. The standings follow:

Eastern Division—Batavia, 1-6; Scott II, 20-7; New Fane I, 19-8; Scott I, 15-12; Campbellsport 18-14; Adell, 10-14; Dundee, 7-17; Newburg 7-20; Sherman, 6-21; Western Division—Kewaskum, 23-5; Slinger, 21-6; Woodland, 17-10; West Bend I, 13-14; Theresa I, 12-15; Kohlsville, 12-15; Lomira 12-15; Hulsburg, 6-21; Theresa II 2-24.
---

The first half was climaxed with an all-star game played at Kewaskum. The Western All-Stars beat the Eastern stars in three straight games.

Kewaskum, winner of the Western Division, played Batavia, the Eastern winner, in an exhibition series of three games. Kewaskum won two out of three games.

The second half started on Wednesday, Dec. 15.

## Kiwanis Christmas Party Attended by 421 Children

Although the event was not publicized a great deal by the Kiwanis club, a total of 421 children 14 years of age and under attended the Christmas party sponsored by the Kiwanians at the Kewaskum theatre Saturday afternoon. The annual party, held for the kiddies of this community, got under way at 1:30 p. m.

Santa Claus was on hand to pass out presents of goodies to all the children present. Old Santa was brought into town on the fire engine with sirens screaming and made a tour of the streets before going to the theatre. Following the distribution of gifts, a free movie was shown from 1:30 to 3:00 p. m., consisting of four cartoons and a one hour feature.

All of the kiddies completely enjoyed the party and were well behaved. It is hoped to have even more of the little ones at next year's annual party put on by the Kiwanians.

At their regular weekly meeting Monday evening, the Kiwanis club members enjoyed their annual Christmas party. An exchange of gifts was held by the members. The Rev. F. C. La Buwi, pastor of Holy Trinity congregation, gave a splendid talk on the Christmas Story. His talk was very much appreciated by all those in attendance.

## SCHOOLS CLOSED, STUDENTS HOME TO SPEND HOLIDAYS

The Kewaskum Public schools closed last Friday for the better than two weeks Christmas holiday vacation. A Christmas program was held at the school auditorium Thursday evening and Christmas parties for the pupils were held Friday afternoon. Classes will be resumed on Monday, Jan. 2.

Holy Trinity Catholic school closed on Wednesday of this week. A Christmas play and party for the children was held Tuesday afternoon. The vacation will also extend to Monday, Jan. 3.

Students also arrived home this week from the various colleges and universities to spend the holidays. A list of these students was published when they enrolled in the fall.

## HOSPITAL NEWS

Mrs. Mary "Lena" Barry of Milwaukee was removed from a hospital in that city in the Kewaskum firemen's ambulance Sunday to the home of her brother-in-law and sister, Mr. and Mrs. Arnold Martin in this village, where she is now staying.

## Indians Beat Oakfield; Take Over Second Place

The Kewaskum High school Indians moved from a tie for second place into undisputed second with a 52-41 victory at Oakfield last Friday night. The win was the team's third in four games and was achieved on the difficult Oak floor.

Coach Ernie Mitchell's Indians had their hands full with Oakfield. The Oaks held a slim 26-25 lead at halftime but fell behind in the final period, when Kewaskum went ahead to win by a margin of eight points.

Forward Harold Klein was the top point maker for the winners with 19 to his credit, followed by Tom Tessar and Peterson with 12 each. But Guard Roger Blohm of the Oaks was the top man for the evening with 21 points on eight baskets and five free throws.

What kept Oakfield within scoring distance of the Indians was their accuracy from the free throw line. Although the Oaks committed more personal fouls, 15, than Kewaskum, 14, they made twice as many free throws. The Mitchelmen were weak on charity tosses, sinking only eight while the losers swished in 16.

This was Kewaskum's last game until after the holidays. They will return to action next year, on Jan. 7, when the Lomira Lions invade the local court.

## TRI-COUNTY STANDINGS

Team	Won	Lost
Brandon	3	0
Kewaskum	3	1
Campbellsport	2	1
Rosendale	2	2
Oakfield	2	2
North Fond du Lac	0	3
Lomira	0	3

Scores last Friday—Kewaskum 52, Oakfield 41; Rosendale 43, North Fondy 33; Campbellsport 49, Lomira 38.

## BIRTHS

**BEJGER**—A son to Mr. and Mrs. Myron Bejger, R. 2, Kewaskum, Wednesday, Dec. 15.

**WAGNER**—A daughter to Mr. and Mrs. Albert Wagner, R. 2, Kewaskum, Thursday, Dec. 16.

**REIMER**—A daughter to Mr. and Mrs. George Reimer, R. 1, Campbellsport, Wednesday, Dec. 22.

**BOHN**—A son to Mr. and Mrs. Francis Bohn, R. 2, Kewaskum, Monday, Dec. 20.

**BERNARD**—A daughter to Mr. and Mrs. Ian Bernard, R. 2, Kewaskum, Saturday, Dec. 18.

## County Officials Take Oath of Office

Washington county officials, elected at the Nov. 2 fall election, were sworn in at the courthouse in West Bend last Thursday by Judge Milton L. Meister. The county officers will begin their new terms of office on Jan. 3, 1955.

The officers who took the oath of office are Anton P. Staral, county clerk; Paul L. Justman, county treasurer; Sheriff George Brugger, Edwin Pick, register of deeds; District Attorney Leroy J. Gonnering, Lawrence P. Berend, clerk of circuit court, and Ethan D. Maxon, county surveyor.

The coroner, Ewald W. Schwulst, recently turned in his resignation as he will not be eligible to hold office in Washington county as he is moving to Fond du Lac county to take over a tavern at Elmore. A successor for Schwulst will be appointed by the governor. Until that time, the present coroner, Dr. James E. Albrecht, will continue to serve as county coroner.

All county officers were re-elected except the surveyor, Maxon, and the coroner-elect Schwulst. Both Maxon and Schwulst are newcomers to the political picture in the county.

Assemblyman Elmer Schowalter, who was elected at the Nov. 2 fall election, also took the oath of office along with the county officers at the ceremony Thursday. Schowalter, town of Jackson, was elected to succeed K. William Haebig of Kewaskum, who was not a candidate for re-election.

## In The Service

### PVT. KENNETH ENRIGHT SERVING IN GERMANY

2D ARMORED DIV., GERMANY  
Pvt. Kenneth J. Enright, son of Mr. and Mrs. William L. Enright, R. 2, Kewaskum, is now serving with the 2d Armored Division in Germany.

Now undergoing rigorous training as part of the U. S. Seventh Army, the 2d Armored is maintaining the peak efficiency in trust and mobility that earned its reputation of "Hell on Wheels" in World War II.

Enright, a carpenter in Headquarters Company of the 124th Armored Ordnance Battalion, entered the army in June 1954 and completed basic training at Fort Leonard Wood, Mo.

### A/3C ALICE HOFFMAN HOME; TRANSFERRED

A/3C Alice Hoffman arrived home last Thursday from Lackland Air Force Base, San Antonio, Tex. to spend a furlough with her parents, Mr. and Mrs. Paul Hoffman. She will leave again on Dec. 27 for Francis E. Warren Air Force Base, Cheyenne, Wyo., where she has been transferred.

### SHIRLEY KELLER HOME

Pfc. Shirley Keller of the U. S. Marine Corps, stationed at Norfolk Va., arrived Saturday night, Dec. 18, to spend a leave with her parents, Mr. and Mrs. Leroy Keller, Kewaskum. She will leave for Norfolk again on Sunday, Dec. 26.

### A/3C ST. MARY HOME

A/3C James St. Mary, son of Mr. and Mrs. Ray St. Mary, Kewaskum, arrived Sunday from the Walters Air Force Base, Mineral Wells, Tex. to spend a 15-day furlough with his folks.

### PVT. HULSE HERE

Pvt. Bob Hulse of Rantoul, Ill. arrived home to spend over Christmas with his parents, Mr. and Mrs. Robert Hulse, Sr., Kewaskum.

### COLLECT TON OF CLOTHING IN CO. CHILDREN'S CRUSADE

The 13th annual "Children's Clothing Crusade" was a most successful one. This was the first county-wide drive carried on in the county.

Carl Eisemann, general chairman of the crusade, reported that more than a ton of clothing was collected. All of the clothing was shipped to the Milwaukee station by the local transfer company.

Let Statesman ads sell it for you.

## Chicago Paper Makes Settlement in Local Officials' Libel Action

On December 15, 1953, the Chicago Tribune caused to be published under their "Voice of Traffic" column a letter from a tourist from Chicago who made false and flagrant statements concerning the law enforcement and the local justice department of the Village of Kewaskum.

Subsequently thereto, a libel action was commenced against the Chicago Tribune on behalf of Lyle W. Bartel, justice of the peace, and Gerhard Gutman, chief of police of Kewaskum, seeking damages for the libelous article that was printed, which action was commenced in the U. S. District Court in Chicago.

A settlement was made with the plaintiffs on behalf of the Chicago Tribune and in addition thereto the Chicago Tribune, in their edition of Sunday, December 19, 1954, retracted the article.

The article apparently slipped through the censor department and did not reflect the views of the Tribune but only the opinion of the party that wrote the letter.

The Chicago Tribune investigated the traffic system in Kewaskum and stated in their retraction article that both parties are acting in accord with pertinent Wisconsin Statutes and the "Tribune's investigation further reveals that local residents regard both men highly and believe that they are properly discharging their duties."

## CENSUS OF AGRICULTURE COMPLETED; OFFICE CLOSED

Thomas P. Miller on Friday, Dec. 17, performed his final act as field supervisor for the 1954 Census of Agriculture by closing down the temporary office which was established at Appleton for taking censuses.

Farm census questionnaires collected locally are being shipped to census headquarters for editing and tabulating. The results, when published, will present figures for counties, states, regions and the United States. The first of the preliminary reports covering each of the nation's 3,068 counties expected to be published early next year.

In a final statement, the supervisor expressed his appreciation for the "splendid cooperation" he and his enumerators received from farmers in the 25 counties in which he conducted the census. "This cooperation," he added, "enabled us to complete this important inventory of our agricultural resources quickly and efficiently."

Approximately 55,000 farms were enumerated in the 25 counties under the supervision of the local office.

## LISTS CLOSING DATES FOR CONSERVATION PAYMENTS

A. John Cleary, office manager of the Washington-Ozaukee County ASC office announces that the following closing dates were established for the 1953 and 1954 Agricultural Conservation programs. Therefore, if you are going to claim your share of cost-sharing assistance for work performed under the Agricultural Conservation program, your claim must be filed by the date indicated.

1. If you have not received your payment for practices completed under the 1953 Agricultural Conservation program, the final date for claiming such payment is December 31, 1954.

2. If you have not returned your form ACP-245 indicating the performance of approved practices under the 1954 ACP, that form must be filed on or before December 31, 1954.

3. If you have been approved for a practice which you have started, but have not been able to complete, you should contact your county office at 213 N. Main street, West Bend, Wisconsin immediately, and advise them of what you have done and when you intend to complete the practice.

All 48 states have now signed up to participate in the Special School Milk Program announced by the U. S. Department of Agriculture two months ago.

**"C" ISN'T FOR "CHERRY"**—It's for vitamin C, and juice of the cherry-like Acerola berries which fill these tubs on a plantation at Sabana Seca, Puerto Rico, is said to yield as much as 80 times more Vitamin C than an equal quantity of orange juice. The once-wild shrubs which produce the berries are now being cultivated for their health-rich harvest.

**"Yellow Money"**  
There's a new rush for gold underway in the town where it was first discovered in 1828. But the prospectors are not the rugged, hard bitten variety of that other day. Nor is this place way out West, which we usually think of as "gold country."

The current crop of gold diggers—or rather, panners—is made up of average visitors bent on a different kind of vacation experience. And the town is Dahlonega, a friendly community of 2,150 population located in the north Georgia foothills of the Blue Ridge Mountains.

The town named is derived from the Indian, meaning "yellow money." This is exactly what tourists find these days, panning in creeks and streams of the region. Nobody expects to strike it rich—and nobody does—considering the low legal selling price, but everyone can find enough to fashion an ornament for a belt buckle or a clip-pin, or at least to sparkle as a souvenir in a glass vial.

The picture of Dahlonega gold panning was looked over recently by a travel expert of the American Automobile Association. He was lucky to arrive in town on October 16, which was being celebrated as "Gold Rush Day."

Dahlonega was trimmed for the big event. Its cafes and drug-stores were made to look more like frontier taverns, complete with costumed characters like Gold Nugget Lil.

Gold Rush Day began with a horseback rider bursting into the town square announcing the discovery of gold. Later, after some festivities and fun, a modern counterpart of Dr. M. F. Stephenson, who was assayer of the U. S. Mint in Dahlonega, made the famous speech from the courthouse balcony which included the lines, "There's gold in them thar hills" and "There's millions in it!" This was his plea to the Georgia gold miners not to join the rush to California with the Forty-Niners.

But leave they did, and the mint, which had turned more than \$6,000,000 worth of gold into coin, passed out of the national picture.

After the activities in the square, visitors—and there were

throng of them—climbed aboard covered wagons to ride down to pan for gold in the town's new gold-mining museum—one of several places around town where visitors can try their luck with a pan.

At nearby Auraria, first boom town in the Georgia gold field, Mr. and Mrs. Bill Trammell offer all-day panning for one dollar. The Dahlonega American Legion has property on which anybody can pan free. A favorite, and scenic spot, is Clay Creek Falls, located in the hills.

Actually, there is gold to be found in many corners. One local resident showed her visitors a vial of gold she had panned out of the ditch between her front yard and the street.

But at the museum it isn't necessary to take off your shoes to go wading, or even to stoop over. Bill Fry, one of the town's leading citizens, who is developing the museum, has built a waist-high trough, or sluice box, pipes in water and lets visitors go to

The elaborate iron grillwork seen on many homes in Savannah, Ga., is about a century old, says the National Geographic Society. The decorations were introduced by French royalists who fled to this southern city when revolution flared on the island of Hispaniola in the West Indies.

It takes nearly ten quarts of milk on an average to make a pound of butter.

town on goldbearing ore brought in from the hills.

In addition, the museum shows an interesting assortment of gold mining devices, including an old-fashioned mechanical panner and a stamp mill, used to crush gold-bearing rock and catch the gold or copper sheets with quicksilver.

Dahlonega has something besides its gold—friendliness and color of a Southern highland town. And like its gold mining, visitors are likely to find these features not only on a special day, but any time of the year.

**"SOUND" WEAPONS OF ELECTRONIC AGE**—Resembling jeweled daggers, swords and clubs, these tiny weapons, most of them less than an inch long, are being wielded by scientists in a war to reduce the bulk and increase the efficiency of radio and television equipment. Worth their weight in gold, they're fragments of pure silicon as found in the earth. Officials of DuPont, one of the processors of the crystallized mineral, foresee widespread usage of it in the manufacture of tiny transistors, which replace some types of bulky vacuum tubes.

**MONEY TO BURN**—Calm down—it's not good United States currency that Treasury Secretary George Humphrey is burning. It's an "eight dollar" piece of stage money, the "price" of admission to a Circus Saints and Sinners Club luncheon in New York City at which Humphrey was the guest of honor and "fall guy" for the jokes of the day.

**WORLD ON A STICK**—Charles E. Riddiford, Washington, D. C., cartographer, has developed this world on a stick. It collapses much like an umbrella for easy storage, and Riddiford says it is designed to sell for a dollar or less. The National Geographic Society employee thinks it will fill a demand for an up-to-date globe at low cost, one which may be discarded as changes in national boundaries outdate older, more conventional globes.

**Food Sense — Not Nonsense**

*What Makes It Tick?*

Discovering one's four-year old son busily engaged in taking the family clock apart to discover what makes it "tick" is not apt to lead to an appreciation for the youngster's curiosity. Unlike the 20th century scientists, who have made gigantic strides in taking practically everything apart for study—chemically and physically—father's "pride and joy" doesn't know how to get the clock ticking again.

In the food realm, as in other scientific worlds, research workers have not only taken foods apart, they have learned what makes them "tick" nutritionally. They have discovered many necessary nutrients and have learned much about their value to man. This know-how has led to the nutritionally and economically successful development of iodized salt, vitamin D milk, enriched cereals, enriched bread with its added B vitamins—niacin, riboflavin and thiamine—and iron, and fortified margarine which carries its share of vitamin A. The distribution of these nutrients has widened with the fortification of these foods, thereby simplifying the planning and serving of adequate meals.

Now that the inside facts on foods are being learned by scientists, they know how to put "the works" together. Correct diets have been designed to give mankind complete diets of several types: diets on which children can grow; diets on which adults can maintain health; diets which meet the demands of expectant and nursing mothers and diets which take care of the special needs of the aged.

Scientists give a simple rule to assure an adequate diet for round-the-clock living—select a diet which includes meat, eggs, enriched bread and cereals, milk, butter or margarine, vegetables and fruits. With this guide, there is no need to spend money for so-called "complete dietary supplements" or for "complete foods."

**STRICTLY FRESH**

**STATISTICAL** Services office at Grenier, N. H., Air Force Base, which handles some 500 reports a month, has just issued one titled, "A Report on the Number of Man Hours Expended on a Report on the Necessity and Value of Reports Made to the Air Force." You can't handle a report like that. You need a derick.

Student poll at the University of Toronto indicates that the average coed drinks 12 pints of beer a week, the average male student seven. Just another instance disproving the adage that it's always the woman who pays.

Teacher in Bay Village, Ohio, cautioned her charges against too much attention to comic books. At least one sprout's non-interest has been converted into

a full-time comic-reading project. She should use a new approach—fob him to read his history book.

Prisoner-waiter in Chicago, Ill., escaped from a second-floor room while serving lunch to a jury by sliding down a large tablecloth. Didn't even wait for a tip.

Fellow tried to smuggle a \$22 case of foreign whisky into San Francisco. Caught. Cost him a total of \$501.16, or just about by-the-glass price in a Stateside bar.

**KERRY DRAKE**

**MARY WORTH'S FAMILY**

**HAIR-BREADTH HARRY**

# "Mister Fixum's Handy Hints"

**Spatter Shield For Kitchen Stove**  
If you can keep the wall back of the kitchen stove clean you will lengthen the time between repainting and save money. I suggest you install a spatter shield on the wall.

The shield should be at least 18 inches high, and the length of the stove. There are several excellent materials from which to choose.

Plate glass is probably the most satisfactory material because it will stand an endless amount of washing without discoloring. It also lends itself well to decorating schemes, such as decals or pictures on the wall under the glass.

There is one objection, and that is the difficulty of fastening the glass on the wall without a heavy molding.

But if you wish a narrow strip of molding, either wood or metal, on the bottom, and small metal clips at the top, they will not detract seriously from the appearance. The bottom should be set just below the top of the stove.

Stainless steel or aluminum is very durable, and will also stand an endless amount of scrubbing. It may be fastened to the wall by drilling holes through each of the four corners, and using wood screws or toggle bolts.

Several types of plastic material have been advertised as withstanding the effects of heat and grease. They are commonly used as kitchen counter tops. One of these is known as formica.

The plastic materials are made in many colors and designs. They may be cut in much the same manner as wood, and may be drilled for fastening, the same as metal. They may also be cemented to the wall permanently.

Another method of solving the grease problem is to have the wall tiled. But I suggest that you be very cautious in selecting anything other than ceramic tile. Be sure that it is guaranteed not to discolor under the conditions in which you intend to use it.

Send 35c today to Ernie Gardner, 14189 Faust Ave., Detroit 23, Michigan, for your copy of **MISTER-FIXUM'S HANDY HINTS**. This is a booklet made up of selected jobs from this column. Booklets No. 1, 2 and 3 available. 3 for \$1.

## Check Diet For Sunshine Vitamin

With the shorter days and less sunshine that accompanies the coming of winter here in the northwest, it's time we gave some thought to vitamin D, the sunshine vitamin. Since most of the sunlight which reaches our bodies, especially in winter, is filtered through smoke, clouds, dust and window glass we must find some other source for this vitamin.

Vitamin D is important for adults, but even more important for children. Their bones are growing and require an abundance of calcium and phosphorus, neither of which can be properly used without vitamin D. A shortage of this vitamin in young children prevents bones from hardening or causes them to remain soft. Such bones often grow out of shape. The teeth may not form properly and the muscles become flabby. This condition—or disease—has been known for centuries as rickets.

It is recommended that growing children receive 400 units of vitamin D each day. Many dairies now fortify their milk to a total of 400 units of this vitamin to the quart. If your dairy distributes such milk, and if your children are drinking a quart of it each day, they are probably receiving a sufficient amount of this vitamin and no supplementary supply is necessary.

However, we can't depend on any of the other common foods to furnish enough vitamin D—especially for children. Eggs, fish roe, and a few other foods contain some of this vitamin, but usually not enough to meet the needs of growing children. Certain fish liver oils such as cod, tuna, shark, and halibut are very rich in this vitamin, and parents would be wise to supplement their children's diets with one of these throughout their child's entire growth period, particularly if they are not getting a quart of fortified milk daily.

An adequate amount of vitamin D is also important for pregnant women and nursing mothers. Every child deserves to start life with a well-developed bony structure. Mothers can help bring this about for their children, before birth and after, by following their doctor's advice about taking vitamin D themselves and giving it to their youngsters.

# Sarah Anne's COOKING CLASS

## Cranberries Baked with Ham

Cranberries are noted for their pretty red color and tart flavor. Dishes made from them may be served the year round.

**Steamed Cranberry Pudding**  
1 cup sifted flour  
1 1/2 teaspoons baking powder  
1/2 teaspoon salt  
1/2 cup shortening  
1/2 cup dry bread crumbs  
3/4 cup sugar  
1 egg beaten  
2/3 cup milk  
1 1/2 cups cranberries cut into halves

Sift flour, baking powder and salt together. Cut in shortening, add bread crumbs and sugar. Add egg and milk. Mix well. Fold in cranberries. Pour into a greased pudding mold, cover and steam 2 hours. Serve with any sweet pudding sauce.

**Baked Apple with Cranberries**  
4 apples  
1 1/2 cups whole cranberry sauce  
4 tablespoons sugar  
Wash apples, core and place in baking dish. Fill apples with cranberry sauce. Sprinkle sugar over top of apples. Bake in an oven 350 degrees about 40 minutes. Baste apples frequently with the cranberry sauce.

**Cranberry Ring Salad**  
2 cups cranberries  
1 1/2 cups cold water  
1 cup sugar  
2 tablespoons unflavored gelatin  
1/2 cup nuts chopped  
3/4 cup diced celery  
Shrimp  
Chicory  
Mayonnaise

Wash cranberries, add 1 cup cold water. Cook until tender. Add sugar and cook for 5 minutes. Soften gelatin in 1/2 cup cold water, dissolve in hot cranberries and add salt. Chill until mixture begins to thicken. Add nuts and celery. Mix thoroughly. Pour into individual oiled ring molds. Chill until firm. Unmold on a bed of chicory. Arrange shrimp in the center. Garnish with mayonnaise.

**Cranberries with Ice Cream**  
1 1-lb. can cranberry sauce  
2 tablespoons butter  
1/4 teaspoon cinnamon  
1/4 teaspoon nutmeg  
1/2 teaspoon grated orange rind  
1 teaspoon lemon juice  
3/4 cup water  
Vanilla ice cream

Mash cranberry sauce. Add butter, cinnamon, nutmeg, orange rind, lemon juice and water. Cook over low heat until it boils. Beat with rotary beater until smooth. Cool slightly. Spoon over vanilla ice cream.

**Cranberry Punch**  
1 quart cranberry juice  
2 cups water  
Simple syrup  
1 cup orange juice  
1 1/2 tablespoons lemon juice  
1 quart ginger ale

Sweeten cranberry juice with simple syrup to taste. Chill. Add orange juice and lemon juice. Just before serving add ginger ale.

**Cranberry Juice**  
Cook 1 pound of cranberries in 4 cups of water until soft. Crush. Drain through cheesecloth to make clear.

**Cranberry Sherbert**  
1 1/2 cups cranberry jelly  
Grated rind and juice of 1 lemon  
Juice of 1 orange  
2 egg whites beaten stiff  
Beat jelly well with fruit juices and rind. Freeze to a mush. Fold in egg whites and finish freezing.

**Cranberry Pinwheels**  
2 cups canned whole cranberry sauce  
1 cup water  
2 teaspoons lemon juice  
2 tablespoons flour  
1/4 cup sugar  
1 1/2 cups sifted flour  
2 1/4 teaspoons baking powder  
3/4 teaspoon salt  
3 tablespoons sugar  
1/2 cup shortening  
1/2 cup milk  
Melted butter  
2 tablespoons sugar  
1/2 teaspoon cinnamon

To 2/3 of cranberries add 1 cup water and lemon juice. Bring to a boil. Combine 1/4 cup sugar and 2 tablespoons flour. Cook until thickened, stirring constantly—then pour into a baking pan 6" x 10". Sift 1 1/2 cups flour with baking powder, salt and sugar. Cut in shortening. Add milk. Mix well, turn out on floured board and roll in rectangular shape 1/2" thick. Brush top of pastry with melted butter, sprinkle with sugar and cinnamon mixture. Spread with remaining berries. Roll up from narrow end and cut crosswise into 8 pieces. Place cut side down over berries in baking dish. Bake in an oven 425 degrees about 30 minutes. Serve hot with cream.

**MEMORY ARTIST**—Finishing touches to a multicolored canvas are provided by Salvatore Massimino, New York City apartment house superintendent, whose eyesight has been deteriorating for the past 20 years. The 48-year-old artist, who now has only 20/400 vision in one eye and can distinguish only out-of-focus, colorless forms, mixes his colors from memory for his canvases.

## A New Idea in Mashed Potatoes

For mashed potatoes that are tops in flavor and nutrition, whip them with nonfat dry milk solids.

The secret is in saving the flavorful, mineral-laden water in which potatoes are cooked, and beating this together with nonfat dry milk into the whipped potatoes. Once you have tried this method, you'll never want to prepare mashed potatoes any other way.

Nonfat dry milk is simply milk from which only the water and fat have been removed. All the protein, vitamins, calcium and other minerals of nature's most nearly perfect food are retained in nonfat dry milk solids.

Available at your grocers in several package sizes, nonfat dry milk solids are inexpensive and easy to store on your cupboard shelf along with other staple items.

6 medium sized potatoes  
3 tablespoons butter  
1/4 cup nonfat dry milk solids  
1 teaspoon salt

Pare and cook potatoes until well done. Drain, reserving the water. Mash. Add the butter, nonfat dry milk solids and salt. Beat well, adding water (saved from cooking potatoes) to give the right consistency. If there is not enough water, fresh liquid milk may be added to obtain the desired consistency.

## "Monthly Pains" stopped or amazingly relieved

In 3 out of 4 cases in doctors' tests!

• Chances are you're putting up — unnecessarily — with the functionally caused pains, cramps and "weak, no good" feelings of menstruation! For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!

Lydia Pinkham's is modern in its action!

So get Lydia E. Pinkham's Vegetable Compound — or new, improved Tablets with added iron. See if — taken through the month — it doesn't give relief from those backaches, jitters — help you feel better before and during your period!

Or — if you suffer from functional "hot flashes" of "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

## PILES SHRUNK without surgery!

IN CASE AFTER CASE PAIN STOPPED!

**NEW STAINLESS FORM** now ALSO AVAILABLE!  
In 90% of cases of simple piles — tested by doctors — amazing Pazo ointment stopped bleeding, reduced swelling, healed cracking — WITHOUT SURGERY! Pain was stopped or materially reduced. Pazo acts to soothe, relieve itching instantly. In tubes, also modern Suppositories. Get Pazo at drug-gists for wonderful fast relief.

Handy, thrifty... and oh, so good!

## CROCHETED POT HOLDERS

A cute green head of lettuce and a saucy red tomato make a charming pair of panholders for your kitchen, a last minute gift or that bazaar you are planning. Complete directions and yardage requirements are given on the sheet. C3349, 20c.

Send orders to Handcraft Service (The Colonial Co.) Journal Pub. Co., Inc., 1243 Swift, Kansas City 16, Mo.

Snakes can travel fast but only in spurts and not for long, says the National Geographic Society. The fastest snake in the United States, the western whip snake, crawls at scarcely more than three miles an hour and when hunting prowls at a quarter of a mile per hour.

Wash a synthetic sweater in warm water—in the machine if you like. Sew it or tie it up in a pillowcase before putting it in the machine and do check the water again.

## Tasty Tip for Quick Meals!

Tender, delicious **MACARONI-AND-CHEESE** home cooked in 7 minutes

with **KRAFT GRATED** cheese flavor for that through-and-through cheese flavor  
Kraft Dinner is a timesaver and a menu-maker! Stock up today—it costs only pennies. So handy for school lunches, emergency meals. And good eatin' always!

## SPARKY SAYS

Keep Matches Away from Children!

Don't give fire a place to start!

## Pattern of the Week

12-20 30-42 9019 by Marianne Martin

Pattern 9019: Misses' Sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42. Size 16 takes 4 1/2 yards 35-inch. Send Thirty-five cents in coins for this pattern—add 5 cents for each pattern if you wish 1st-class mailing. Send to 170 Newspaper Pattern Dept., 232 West 18th St., New York 11, N. Y. Print plainly NAME, ADDRESS with ZONE, SIZE and STYLE NUMBER.

## Seeing is Believing

**THE CAREER OF EYESIGHT SPECIALIST OFFERS ATTRACTIONS TO BOYS AND GIRLS—EXACTING EDUCATION AND WORK, BUT INDEPENDENCE, FAIR INCOME, AND THE OPPORTUNITY TO SERVE PEOPLE IN A FIELD NOT GENERALLY OVERCROWDED.**

**THIS ENGLISHMAN (1859-1930) UNSUCCESSFULLY ATTEMPTED THE EXACTING CAREER OF AN EYESIGHT SPECIALIST BEFORE WINNING FAME AS AN AUTHOR OF DETECTIVE STORIES, SAYS THE BETTER VISION INSTITUTE.**

**HORSES HAVE A CONSIDERABLE DEGREE OF COLOR VISION. THEIR EYES ARE MOST SENSITIVE TO GREEN AND YELLOW—LEAST SENSITIVE TO RED.**

**"CONGRATULATIONS, POP, YOU'RE A 'MOM'"**—Tommy Retig, juvenile TV star, congratulates Lassie, perhaps the most famous female impersonator in the entertainment world, on becoming a "mother." The male colt played mother to this litter of puppies, borrowed for the occasion, during a recent sequence of his present television show.

**TOUCHDOWN IN ART**—Dick MacDonell, 230-pound art major at the Duluth, Minn., branch of the University of Minnesota makes touchdowns on canvas as well as on the football field. The former G.I. is shown with his prize-winning entry in a recent exhibit at the Duluth Art Institute.

**JAWS OF FREEDOM**—French sailors help refugees drag their sampan through the gaping jaws of a navy landing craft off Van Ly, in northern Red-held Viet Nam, as thousands of Buddhist and Catholic refugees flee oppressive rule of their Red conquerors in a mass attempt to reach sanctuary in southern Indo-China.

#### MERRY CHRISTMAS

At this stage in the journey along life's busy highway, it is pleasant to pause and express sincere appreciation for the cordial relations in the year just closing.

Most cherished among the gifts bestowed by the closing year are the memories of loyal friendships maintained and cordial relations enjoyed with those it is a privilege to serve.

It is a genuine pleasure at this Holiday Season to depart from the usual routine of daily living and to wish you and yours

#### A Merry Christmas!

May the New Year bring you much happiness, abundant health, and a full measure of prosperity.

—Mrs. Lydia Andrae returned home Sunday after spending several weeks in Milwaukee with her daughter.

**KNOW HOW TO RELAX IN THESE TRYING TIMES**

The majority in this rushed and complex world must learn to relax just as they would learn any other art—by practice. The small muscles of the body as well as the large ones must be limp. Don't work at relaxing. If you lie down for a short rest period and are unable to relax then begin learning. First try to find out in what spots your body muscles are still tensed. If you are untrained in exercise and unaccustomed to conscious use of your muscles this may be difficult at first. If so, begin at the toes and contract the muscles and then relax them all the way up the body. Go at your work in an easy, un-rushed way and then take short rest periods during which you un-tense entirely.

If nervous, jittery, tense and you are not able to relax under any circumstances, then Chiropractic adjustments may be needed to remedy your condition.

ROBERT G. ROBERTS, D. C.

**BULK HANDLING OF MILK COMING TO COUNTY FARMS**

The bulk handling of milk is fast coming to Washington county dairy farms. Such bulk handling of milk will not necessarily bring over costs to dairy farms. It, however, can lower dairy plant or factory costs. For that reason many plants find it profitable to change from the present method of can handling to bulk handling according to a study recently carried on by agricultural economists of the Wisconsin College of Agriculture.

This study shows that bulk handling may be cheaper than can handling where more than 500 lbs. are produced daily on each farm. For smaller herds an every second day pick up of milk may be necessary to keep costs down. Dairy plant operators are generally agreed that the quality of the milk will be raised with bulk deliveries even if such deliveries are made on an every second day basis. In many areas dairy plants are giving assistance to the farmer in helping to finance the cost of installing bulk equipment.

Tuberculosis is not inherited. It is a contagious disease caused by a germ, the tubercle bacillus. TB can be prevented, cured and conquered. Christmas Seals support the voluntary movement to eradicate tuberculosis.

All of us at

# TEACUP TOPICS

By BETTY ANN  
Editor The Milwaukee Journal Women's Page

Primer advice on velvet is offered by the Velvet Institute of America, says Betty Ann. For centuries a fabric available only to royalty, it is seen this season at all occasions.

Velvet garments should have an easy fit, should never be tight at the seams. Splurge on color, even shades you have never worn before, for deep velvet reflects lights to highlight skin tones. To keep the fabric like new, send the garment to a reputable cleaner.

In the care of velvet, remove dust or lint with a soft brush after each wearing. Padded hangers are recommended. Never fold a velvet garment across a hanger. Hang a strapless dress from loops inside the waistband, and hang it wrong side out. Clips or metal clips will mar the fabric.

Enliven pile with steam. Hang the garment securely over a tub filled with hot water. Seal steam inside the bathroom by shutting doors and windows. Leave for one hour. Brush from hem up after one-half hour of the steaming session is over. Allow to dry thoroughly before touching. Protecting velvet with dress shields is another point to remember. When traveling, put velvet item in last so it is on the top of the suitcase. Tissue papers on folds, cardboard underneath and inside will add to the protection.

Hindsight has a lot of meanings. One of them: That you don't look too well to the person behind you. This is particularly true of hair, and it's particularly apparent in the theater or in church where so many heads, perfectly coiffed from the front, look so neglected in back. Always view your hair from front, back and sides. That's the only way to do justice to both your hair and your good looks.

The brunet who, at 40, is just starting to turn gray manages to look even more attractive with a few silver streaks in her hair.

But, if your hair is an in-between shade of brown, gray streaks only seem to add dullness. And it is better to have your hair either brown or gray, but not streaked with dull, uneven color.

This doesn't mean you must go to the expense and trouble of a professional dye job. Another drawback of dyeing your hair is the fact that once your hair is dyed, the color is permanent for a time, even if you aren't satisfied with the results.

Some women solve this problem by giving themselves a temporary rinse after each shampoo. They may choose a shade slightly lighter or darker than their own hair color. Or, they may use their own shade to conceal yellowish gray streaks.

They can try different shades of rinses with confidence when a manufacturer claims it is safe, temporary vegetable coloring that washes in quickly and washes out easily.

### Cauliflower With Buttered Crumbs

One medium head cauliflower; 1/3 cup butter, melted; 1 cup fresh bread crumbs; 1 hard cooked egg; 2 teaspoons chopped parsley.

Divide cauliflower into six sections. Cook in boiling, slightly salted water until tender, about 20 minutes. To make sauce; melt butter in skillet and brown bread crumbs slowly. When brown add chopped egg and parsley, season to taste and serve hot over cauliflower. Serves six.

### Olive Cheese Salad Dressing

1/2 cup ripe olives; one 3-ounce package cream cheese; 1/2 cup tomato juice; 1 tablespoon lemon juice; 1/2 teaspoon prepared horseradish.

Cut olives in small pieces. Soften cheese with a fork and gradually blend in tomato juice. Stir in remaining ingredients. It makes about one and one-third cups dressing.

Next time you grill hamburgers, mix one-fourth cup softened butter with two pounds of ground beef and your preferred seasonings. Patties need no extra fat when cooking and are extra juicy and butter rich.

Give new flavor to chocolate brownies. Frost them with confectioners' sugar icing flavored with peppermint extract.

You can't always accept an invitation. But when you have to refuse one, you can do it so graciously that the hostess who has invited you feels that you really do hate to have to miss her party.

## Non-Interference Urged For Noses

You can't do much to help your nose carry on its complicated function of air-conditioning and reconditioning the air you breathe, but you can do it a great deal of harm.

That is the gist of a bulletin in support of a universal program of non-interference with nasal functions, issued recently.

If you turn up the heat and pour in nose drops indiscriminately, you actually upset one of the best air-conditioning and air-cleansing systems known to science, the doctors declare. And, incidentally, you put yourself in the way of more, instead of fewer, infections of the upper respiratory tract, more nasal irritation and more likelihood of permanent damage to ears, sinuses and bronchial passages.

That is not to say that nose drops of a special type may not sometimes be useful for a very limited period. But they should be prescribed only by somebody who has some knowledge of the structure and functions of the organ he is treating, the bulletin says.

Actually, the inside of the nose is equipped with a sweeping system to trap dirt, a cleansing fluid to wash the interior of the air passages and an air-moistening system; which is the marvel of air-conditioning engineers.

Tampering with it is just asking for trouble, the doctors say. In fact, tampering is one of the reasons why many people have chronic inflammation and repeated colds. Add over-heated air to a damaged nasal air-conditioner and you have the ground-work for a lifetime of sinus complaints. Normal nasal secretions are slightly acid, the doctors point out, further. They become temporarily alkaline when you have a cold. Pouring in the usual alkaline nose drops simply prolongs the trouble.

On the other hand, rest is one of the best ways to restore normal acidity and that is one of the principal reasons why doctors advise rest instead of medications as the best home treatment for the common cold.

## Famous Lady

The most famous lady in all the world—Miss Liberty in New York Harbor—was 68 years old this October, and in excellent health and spirits. President Grover Cleveland dedicated the statue Oct. 28, 1886.

It was the inspiration of the Alsatian sculptor Bartholdi who, after visiting the United States in 1871, returned to France to begin work on its design. His mother served as model; contributions amounting to \$250,000

## Safety and Beauty Care Go Hand in Glove in the Home

BY EDNA MILES

THE woman who possesses beautiful hands doesn't come by them accidentally. She consistently gives her hands care and attention, keeps them out of very hot water, wears rubber gloves for household tasks and is faithful about creams or lotions.

Any housewife must dip her hands into water frequently during the day. She should keep her favorite hand cream or lotion handy on a kitchen shelf so that she can apply it when she takes her hands out of water. But she should also be consistent in her wearing of rubber gloves.

For women who haven't tried rubber gloves, there are water-tight neoprene gloves on the market that are lined with an interlocking knitted fabric to absorb perspiration. They have a special nonslip grip and can be tossed in with the family wash when they're ready for cleaning.

The reasons for wearing household gloves are sound ones: To protect your hands from long soaking in water, to prevent cuts and bruises, to keep fingernails from chipping and to preserve a manicure, to allow you to use much hotter water in washing dishes and to cut garlic or onions without having the odor cling to your hands.

Her fabric-lined rubber gloves protect her from extra-hot water, give her a nonslip grip and preserve her hands' appearance.

### Bible Comment:

## St. Paul Never Sanctioned Slavery

THE days are long since past when anyone tried to justify the institution of slavery by reference or proof from the Bible.

Yet there was a time when religion and the Bible had a very active part in the controversies regarding slavery. The spirit of the Bible, with its strong emphasis upon freedom, was invoked by antislavery advocates, while proof texts and references were cited by the impassioned defenders of slavery.

And strongest on the part of slavery's defenders was the claim that Paul had impliedly sanctioned the institution, or, at least, had not condemned it, though he had urged considerate and humane treatment of slaves.

The issue, of course, is emphasized in the one-chapter New Testament book of Philemon. It was a definite, practical issue that could not be avoided.

Onesimus, a slave whose master was Philemon, a Christian in the church at Colossae, a city in the Roman province of Asia, had run away from his master and had made his way to Rome.

Here, in the great city, a haven for runaways and criminals, he had apparently made good his escape, but he came under the influence of St. Paul and became a Christian.

Should Paul have protected Onesimus? Was he sanctioning slavery in sending him back to Philemon, even though the slave apparently was quite willing to go?

(It must be considered that here was a situation in which master, slave and teacher all were Christian.)

On the contrary. In Paul's very attitude he laid the ground for the abolition of slavery insofar as Christianity is concerned.

Paul had deeper and more underlying purposes to fulfill risk all on this issue before mission was finished.

An Englishman is a person who does things because they have been done before. An American is one who does things because they haven't been done before.

—Mark Twain.

If the tip of your nose is especially shiny, don't try powdering or wiping it off. Instead wash the oily area with soap and water as many times as you can each day.

The average individual just takes it for granted that he knows a good deal.

"H." NOT "WAIST" LINE—Modeled recently in New York City, this slenderizing silhouette in men's wear is designed to complement Dior's "H-line" flat-look in women's fashions. Suit features a raised waistline, high gorge, straight, natural shoulder line (only lightly padded); double-breasted matching vest and tapered trousers.

In small sums came from French men, women and children. The statue was shipped to New York in sections and reassembled.

It is 305 feet from the base of the statue to the torch Liberty holds aloft, and she herself is 111 feet tall from toe to crown, weighing 450,000 pounds.

## Ambulance Siren On The Way Out

In New York an experiment, eliminating sirens from the equipment of ambulances, will begin on the first of next month. Commissioner of Hospitals Dr. Basil C. MacLean said the order would affect many New York City hospital ambulances, although private ambulance operators are not included in the order.

Dr. MacLean says the use of sirens on ambulances is unwise, and that it creates unnecessary dangers. Although occasionally the use of the siren saves a minute or two, that minute or two does not compensate for the increased number of accidents caused by the use of the siren. In other words, the use of sirens cause more casualties than the good they are capable of doing.

The new step was not taken without study and a pilot project was the first experiment of its kind a few months ago. For some ten months, ending August 1st, 1954, all sirens were removed and ambulance drivers at Kings County Hospital were told to obey normal traffic regulations. After the ten month test-period was over, it was found that the accident rate had been cut by sixty per cent—or by more than half. There also had been no serious complaint of effects on patients by the minute or two delay in the arrival of ambulances.

In large cities, the use of sirens on ambulances may be steadily discarded in coming years. The siren on the police car and the fire truck will probably be continued for some time, however, since duties performed by police and firemen are quite different from those of the ambulance driver. Policemen must often speed through streets of necessity, and firemen have very unwieldy vehicles to weave in and out of traffic.

In place of the sirens, in New York City, ambulances are using revolving red lights. The result will be much less confusion, more quiet and fewer accidents. It is a step forward for everyone.

## Hearts and Hands

On the porch of a humble home beside the railroad tracks, in a small Georgia town, a little girl sat every day to watch the train rush by. But she never waved, as most children do.

The engineer, Henry R. Lee, often wondered at this. So, one day, he slowed down, leaned from his cab and dropped a note addressed to the child's mother, asking why.

The mother wrote him a letter: "Grace was born with her arms off below the elbows." Mr. Lee passed the word among his fellow trainmen. It spread. Contributions came in, operations were performed, and the child, whose father works in a garage, today has artificial arms, and hands she can wave.

—John Van Guild

## The SNAPSHOT GUILD

This picture won a prize in last year's National High School Photographic Awards.

### Prizes for Teen-Photographers

Today we've got some very important news for high school students. It's about a photographic contest, just for them—the National High School Photographic Awards—and it opens January 1, 1955.

A good way for teen-age photographers to start the New Year right is to send in an entry on that very first day. Rules folders are available now. Some schools have them. If yours doesn't, you can get some by writing to the National High School Photographic Awards, 343 State Street, Rochester, N. Y.

There's a class in this contest for any picture taken during the summer and fall. There's one for the snapshots of school activities, including athletic events. Another

covers the pictures you take of family and friends engaged in activities that have no connection with school. A third class is for the pictures you take because they are pretty, dramatic or picturesque . . . the scenic views, the flower garden . . . anything in which people or pets aren't the important subject. The fourth class is for animal and pet pictures.

BRUSH WITH ROYALTY—How to acquire the polished look that's fit for a queen is demonstrated by Queen Elizabeth's husband, the Duke of Edinburgh, as he visits a display in London of products made by ex-servicemen. Note boot-and-shoe scraper on side of shoebrush handle.

## In Fashion Now

Perhaps the most extravagant waste of money a woman can indulge in is a cheap fur coat. Not only will it look sorry for its first wearing but it will very soon look much worse and fail to provide sufficient warmth.

It is possible to purchase a good cloth coat for the price of a cheap fur coat. Don't make the mistake of trying to get more for your money than it is possible to do.

If you have a moderate amount of money to invest in a fur coat, choose a coat made of a fine quality of a moderately priced fur. The best buy in fur seems to be muskrat. It is warm, long-wearing and quite beautiful.

The workmanship of any fur coat accounts for the variation in prices found in the same quality of furs. A let-out muskrat coat will cost about one-hundred dollars more than a sealed coat. The added beauty may or may not be worth the extra money to you.

The most admired fur, excluding a few such as chinchilla, sable and ermine, which are out of reach to most of us, is mink. Here again the best advice is—if you can afford only a cheap mink—buy a good muskrat.

The best policy when buying a fur coat is to purchase it from a reliable dealer. The furs should be pliable and have a high-natural-looking luster. The guard hairs (these are the long, silky hairs lying on the surface) should be numerous and healthy looking.

Take your time deciding on your fur coat. You are spending more money for it than any other single piece of clothing you own and you will probably wear it for a long time.

### Answers to Who Knows

1. Henry A. Wallace, W. Averell Harriman and Charles Sawyer.
2. The Yellowhammer State.
3. Arizona—in 1912.
4. From 1930 to 1941.
5. 9,117 feet long—the longest tunnel underwater and the second longest vehicular tunnel in the world.
6. The Mersey at Liverpool, 11,254 feet.
7. 24,902.39 miles.
8. Africa, 11,500,000 sq. miles.
9. The Marianas Trench, discovered by H. M. S. Challenger, June 14, 1951, where a sounding of 35,640 feet was obtained.
10. 30,246 feet, just north of Puerto Rico.

## Factual News About The Eyes

### NEW DEVICE DETECTS OBSTACLES THROUGH FOG

Before long, a new device will be available to help truck drivers find their way safely through dense fog, according to the Better Vision Institute. Later on, airplane pilots may also be able to take advantage of the new invention.

This device, called a "Fog-o-Scope," consists of an electronic tube housed in a square metal box. It will enable a truck driver to see the shapes of obstacles that loom ahead glowing from a round screen on his dashboard, even when they are obscured by the thickest of fogs. Because it is sensitive to the invisible infrared rays which warm objects emit, it picks up radiation from a person or a moving car—whether illuminated or not—as far as half a mile away and shows it up on the screen. The Fog-o-Scope also detects cold objects, such as road signs or stalled cars, by virtue of the infrared rays which they reflect when the truck's headlights strike them.

Many fatal accidents will probably be prevented by this device, the Institute predicts. An even better preventive would be regular professional eye-care for all drivers, so that their vision might be kept at top performance level under all conditions.

"You forgot your change, Sir!"

# SPORTS AFIELD

By Ted Kesting

The barren ground caribou is to a vast part of Canada what the buffalo once was to the United States, and it seems as surely on its way to near-extinction as the buffalo. But unlike the buffalo, the caribou has no substitute. It is the only large animal capable of surviving in its habitat in great numbers. No domestic animal such as cattle can replace it. If the caribou go, the non-agricultural natives will starve to death or become a heavier burden on the government.

Last year Bill Wolf traveled through Canada to study the situation for Sports Afield magazine. He feels one of the first steps toward conservation of the caribou is to discourage using caribou meat for dog food. Control of wolves as the chief predators is secondary, and a systematic use of poison pellets or cyanide guns would accomplish this.

A scientific survey indicates the caribou population has dropped 62 percent in the last 50 years. The herds simply can't stand such a drain. Canada's chief problem in saving the caribou lies in educating the inland Eskimos, Indians and northern whites to avoid waste—to live on the interest and let the capital remain.

The Indians down in the tree belt could be taught to plant and use vegetables, and to utilize more fish. But this means changing their entire habits. They always have been hunters and not-

ing else—except for gathering a few wild crops. And even the thought of trying to convince them they should plant potatoes is appalling.

As for sport hunting, it could become a plague through overuse of the airplane. Right now, it is not a contributing factor to the decline of caribou. Provincial and dominion experts frown upon sport hunting and they'll probably end it. After all, how can you convince whites and natives of the North to conserve caribou if sportsmen fly up and kill them just for fun?

The caribou is easy to kill with modern firearms. No great credit goes to the hunter who shoots one. The caribou is a curious, rather stupid animal. The only thrill that caribou hunting holds is in reaching its domain. White trappers, winter commercial fishermen and others who must kill caribou for food simply laugh at sport shooting.

## Handy Jim's FIX-UP TIPS For the Home

### Laundry Tub Table

TABLE top space is at a premium in every home. This is particularly true of the basement or utility room, yet a table foundation is ready for a top in practically every home.

The stationary laundry tubs may be given a removable top which will serve as a laundry sorting center,

work or recreation space or temporary storage for just-ironed garments.

Simply take a piece of Masonite Tempered Presdwood cut to fit over the tubs — and there's the table. It may be removed instantly. Tempered Presdwood is available at lumber yards. It is smooth and splinter-free — ideal for work, recreation or storage.

This versatile material may be cut readily with a cross-cut saw. Before putting it into service as a top over the tubs, round the corners slightly and bevel the edges lightly with a file. Then give it a coat of penetrating sealer. Prime and paint it instead, for a touch of color in the room.

**FOR SNAKES ONLY** — No train on earth could travel roller coaster-like tracks above, and yet dozens every day pass over these apparently wiggly rails in the Kansas City, Kan., freight classification yards. The wiggly isn't in the rails, it's in the "eye" of the camera which took this picture; a telephoto lens which brings distant objects close-up, but gives a foreshortened perspective to foreground of area covered.

### MACKEREL SHARK

© 1954 National Wildlife Federation

The term mackerel shark is used to designate a group of sharks, any one of which might appropriately be called a mackerel shark. All of them, however, have a few things in common. Their teeth are conspicuous. Their tail fins resemble a crescent moon with more or less equal lobes and a concave rear margin. On either side of the base of the tail there is a keel. Their noses are pointed.

Many of these sharks are considered as game fishes. These include the man-eater or white shark, the mako shark and the porbeagle shark and the differences are chiefly though not wholly based on the teeth.

The shark here pictured belongs to the genus *Isurus* in which the teeth are narrow triangles without cusps at the base. These include the mako shark with one species in the Pacific and one in the Atlantic that are of importance though there are a number of closely related species in each area. The Atlantic form ranges from Norway and Cape Cod to Brazil and the Cape of Good Hope. The Pacific form ranges around Australia and New Zealand where it is sought and found by sports fishermen.

The man-eater or white shark has huge, broad triangular teeth with saw edges. It ranges from Nova Scotia to Brazil and from Spain to the Cape of Good Hope. While the mako shark rarely reaches a weight of 1,000 pounds and a length of 12 feet, the man eater may reach a length of 40 feet and a weight of over 1 ton. The porbeagle sharks have teeth which may have small cusps at the base and on either side. The record shark of this type measures just over 11 feet with a weight of about 260 pounds.

The pointed heads of these sharks adds to their appearance of being vicious. For the most part these sharks feed on schools of smaller fishes such as mackerel and herring which they capture near the surface of the sea where on warm days they apparently enjoy basking. The mako is a swift swimmer and can pursue and capture the smaller fishes in great numbers. Sometimes it takes on fish as large as swordfish and real battle is the result.

The flesh of these sharks has a small value as food but few who seek them do so for any other reason than the sport of catching them. While the porbeagle shark is rather sluggish and rarely leaps from the water, the mako shark may make frequent and high leaps when hooked thus adding to the excitement of the moment. Heavy tackle is usually necessary for the capture of any of these sharks.

There are authentic records of man-eater sharks attacking men but this is probably less common than might be assumed and is not likely unless the man is wounded and bleeding, if we can believe many of the authorities. When an attack is made however the damage may be most severe. Since some of these sharks may come close to shore they are sometimes captured from piers or even from the shore. In such cases a variety of animal matter living or dead may be used as bait.

The National Wildlife Federation encourages interest in these sharks as it does in all interesting forms of wildlife.—E. Laurence Palmer.

### New Cure For Typhoid

Michigan State Health Commissioner Albert E. Heustis recently announced his state's health laboratories have developed the first known cure for typhoid fever. Heustis says the drug has already been tested on human beings in Mexico, and that it has produced complete cures in numerous cases.

He also described the drug as the "first known specific for typhoid fever" yet found. He called it the most efficient yet developed to combat typhoid fever.

The announcement comes after five years of research and laboratory work, and after there had been some disappointment in the slow rate of progress after optimistic signs. The announcement is, of course, a milestone in medical progress and our only regret is that such a drug was not in use some years ago.

All older residents who remember how citizens of this country formerly died of typhoid fever will realize what a ravage this once-dreaded disease used to be. In backward countries, typhoid is still a terror, and the announcement of the new drug will bring hope and sustained life to millions in coming years.

## About Your Home

By FRANCES DELL

Every home should have one room that is rough and tough, warm and cozy where the entire family can relax and play together. It can be a room for your children to entertain their friends in and where your friends will feel instantly at home.

The room need not be large. The main requirements are that it be comfortable and decorated so that you need not worry about damage to rugs, floors or furniture.

It is a good idea for the whole family to have a hand in choosing the colors and furnishings of the room. They can really indulge their taste for strong colors and unusual touches. Teenagers will be delighted with a juke box and, if there is room, include a soft drink bar with gay bar stools.

These rooms usually carry out a particular theme. It may be tropical, western or oriental. A basement or attic can be converted into a charming family room.

If you still have the problem of what to do with the television set, this room will solve it. Instead of dominating the living room, put it in the family room where the small fry can gallop accompanying the cowboys, to accompany the content without damaging your best furniture.

The attractiveness and coziness of a family room is enhanced by a fireplace. Be sure to include an extra wide one for indoor cooking.

Gloxinias are not hard to grow. What is more they are sure to bloom and will bloom anytime of the year you desire and stay in bloom for six to eight weeks. The plants often have six to eight blooms open at once.

The color combinations are lovely and varied. The flowers are four to six inches across and the leaves are thick and velvety.

Gloxinias do their best in pots about five inches across. However, as the tubers grow from year to year, you will have to increase the size of the pot. The tubers live ten to twenty years and will reach a four or five-inch diameter. The larger the tuber, the more blooms you get.

Gloxinias need direct sunlight, except during midsummer. An uncurtained south window is a perfect spot for an indoor plant. The temperature should not be below sixty degrees. Air circulation is important so do not crowd your plants. Allow at least fifteen inches between each plant.

Not enough sunshine results in spindly plants. Too much sunshine fades the flowers and scorches the leaves. Dry soil will keep the flowers and leaves small. Over-watering will cause the buds to fall off.

Use a fibrous soil made by mixing one part peat with two parts good garden soil. If you buy started plants always set them a little deeper than they were growing.

After blooming, stop watering your gloxinias. The leaves will wilt and shrivel. Move the pots to a store room where the temperature will not fall below sixty degrees. Water the pots lightly once a month.

The tubers will usually start growing again in about three months. When this happens, repot at once and bring them into the light. Gradually increase water as the leaves pop out.

## Health & Beauty

Recently a group of research scientists from across the nation gathered at the Clinical Center of the National Institute of Arthritis and Metabolic Diseases located at Bethesda, Md.

These scientists turned the spotlight on research laboratory workers who are seeking to find the cause and a cure for Arthritis and Rheumatism. These two diseases are similar in that when the connective tissue is affected the condition exists in the joints and is known as Arthritis. When the inflammation is located elsewhere in the body it is known as Rheumatism and sometimes Rheumatic fever.

Two new drugs, both three times more potent than any now in use in the treatment of rheumatoid arthritis and which do not have the undesirable side-effects usually associated with hormone therapy, were revealed at the meeting.

The two new drugs are known as metacortandralone and metacortandrosin. Both drugs are steroids, chemical compounds derived from such sources as bile acids. They are four times more potent than cortisone and three times more potent than hydrocortisone. The drugs are so new that it is not yet known whether prolonged use will develop a tolerance to them.

Neither of the new drugs are a cure for arthritis. They have been used on short-term trials and on a limited number of patients only.

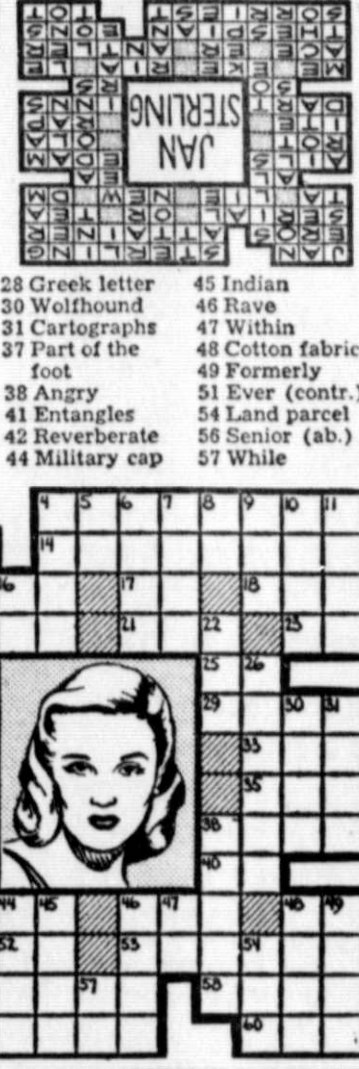

A new, fast-acting drug that

### Here's the Answer

## Dentists Call Six Year Molars Keystone Of The Dental Arch

If a child's teeth are properly cared for up to age 15, a strong foundation has been laid for minimizing dental troubles in later years, says the Wisconsin State Dental Society.

No dental care is needed, of course, until the child's first teeth begin to erupt, somewhere around the age of 6 months.

At this time, the four central incisors—two upper and two lower—begin to peek out. By age 7 to 11 months, four more teeth, upper and lower, start to come in. These are the lateral incisors at either side of the central teeth.

Then Mother Nature wisely skips a few spaces in order properly to shape the jaw. In 12 to 16 months, the back teeth or molars, come in. Then the cuspids show to fill in the space between. At about age 24 months, the second molars come in, the State Dental Society declares.

While all this has been going on, the permanent teeth are slowly developing in the jaw bone so they can come forth at the proper time.

The first of the permanent teeth are sometimes called the "six-year molars" because they emerge at about age 6. Because they do not replace the first teeth but rather come in just behind them, these molars tend to confuse parents who think they are also first teeth.

This error can lead to tragic consequences. Since the six-year molar is a permanent tooth, it will not be replaced if lost.

Dentist strongly emphasize the importance of watching for the "six-year" molars. They are important in the structure of the mouth. The manner in which they interlock with their opposite teeth will determine the eventual shape of the jaw, facial contour and regularity of alignment of other teeth.

Because of their importance, the first permanent molars are often referred to as the "keystone of the dental arch."

### TULIP IN A VASE QUILT

The pattern for this delightful quilt calls for 10½ inch blocks to be set diagonally and alternated with plain blocks. Twenty pieced blocks with 6 inch border is required for a 72x87" quilt. Patterns for cutting guides, yardage requirements and full directions are given. Pattern 3332 for only 20c.

### One Minute Quiz

1. What was the score of the Army-Penn game?
2. What was the score of the SMU-Arkansas game?
3. Who won the Michigan-Michigan State game?
4. Can UCLA go to the Rose Bowl this next New Year's Day?
5. Can Oklahoma play in the Orange Bowl game next year?

- The Answers:**
1. 35-0, Army.
  2. SMU 21, Arkansas 14.
  3. Michigan.
  4. No, UCLA is barred by conference rules.
  5. No, the Sooners are likewise barred from two bowl appearances in two years.

gives considerable relief from the irritant of gout was also reported. The drug, phenylbutazone, comes in tablet form.

One of the dangers of looking ahead is that we see things that never happen.

A drunken fool with wheel in hand rates worse than gunmen in our land.

## HERE'S HOW . . .

### . . . MAKE A HOME FILE CABINET

A handsome filing cabinet for home use also serves as an attractive end table.

The cabinet may be made of ¾ inch lumber throughout, or the drawer sides, bottoms and backs may be of ½ inch lumber. Panels for the sides, top and back are made by gluing boards selected for their appearance.

To assemble the cabinet, cut a ¾ inch dado in the side panels to receive the drawer dividers, which are fastened with glue and 4-penny finishing nails. Then, add the drawer runners, using 1½ inch, No. 4 wood screws. Add

the back, top brace and bottom, using glue and finishing nails. Place glue blocks in the upper rear corners.

Invert the cabinet and center it on the top panel, then fasten the cabinet to the panel with screws through the glue blocks and front brace.

Drawers are made as shown in the drawings. Drawer runners should be given a light rubbing with beeswax to facilitate sliding. The leg base is 3-inches wide, and is fastened through the glue blocks with screws to the bottom of the cabinet.

## Behind The Scenes in American Business

By Reynolds Knight

NEW YORK — America's economic pace-maker — the automobile industry already has shipped into super-matic gear for 1955, carrying the equally important steel and coal industries along with it.

Several important steel producers announced last week that they were rationing purchasers of cold-rolled sheets, principal form in which steel moves to the motor car makers. This is the result of a wave of demand not only from automobiles but also from household appliance makers who use quantities of such sheets.

Coal mining, which had fallen below eight million tons a week, moved up almost to nine million. This rise, partly seasonal insofar as electricity is used for heating, also reflected more utility demand for power to form metal. In addition the steel mills called for more coal to make iron coke.

Railroads perked up with this new stirring of activity. More steel and more coal moving checked the long slump in carloadings. In the first nine months of 1954 profits of the highly industrialized Eastern District were down some \$140 million from the like period of last year, but the last quarter isn't likely to be so far off.

**RANGES BEST A-BOMB** — More than 11,000 persons who theoretically might otherwise have starved were fed substantial meals of beef stew, ham, beef, cake and coffee recently in a Chicago suburb, in the first mass-feeding test conducted in conjunction with a simulated atomic air raid.

The test used banks of huge commercial gas ranges, counterparts of those on which are cooked 95 percent of the 65 million restaurant and hotel meals served throughout the nation daily. They were fueled by liquefied petroleum gas, the bottled gas that provides the cook, water-heating and comfort-heating needs of some 7 million rural and suburban homes.

Civil Defense officials said the test far surpassed expectations as to the speed with which the gas ranges could be trucked to the test site, unloaded and uncared and connected to the fuel supply. They staged the mass feeding to assure themselves no insupportable hardship would be suffered by residents of the nation's second largest city if its public utilities were knocked out by an air raid.

**THINGS TO COME**—A home knitting machine will turn out a sweater in two hours, or a dress in seven . . . A sun-operated gadget rolls up store awnings when the sun isn't bright, rolls them down again when it shines . . . Do-it-yourself has reached the home heating plant. A kit with everything but the furnace is offered . . . Used car lots and farm markets are offered winter heating from fused quartz lamps which throw heat instead of light.

**A LITTLE SWEETENING** — The Agriculture Department has just announced addition of 50,000 tons to the year's sugar quota, bringing it to \$2,250,000 tons for 1954. This time last year, or a little later, sugar use for this year was fixed at 8 million tons, and 200,000 tons was added in March.

Thus ends a guessing game between sugar importers and refiners and the Department, which has been going on for more than a month. When the domestic beet crop turned out better than expected, the price of sugar went down. The Department threatened to lower the quota unless the beet growers got more for their sugar.

Finally wholesale consumers of sugar decided Uncle meant it, began to bid up the price. After a 7 percent advance, the Department reversed itself, found that holiday baking needed the extra 50,000 tons.

Not too important in itself, this maneuvering foreshadows a real struggle in Congress next year when the Sugar Act of 1948, which fixes an elaborate system of quotas and commands the Secretary of Agriculture to manipulate them for the greatest good of the greatest number, must be renewed or supplanted.

**BITS O' BUSINESS** — Aluminum production set a quarterly record of 743.5 million pounds in third-quarter 1954 . . . Construction activity in October, at \$3.5 billion put in place, was an all-time high for the month . . . Television set production in September was the greatest in any month in history—947,796 . . . Corporate dividend payments in October amounted to \$54.2 million, up \$40.9 million from the year-earlier month.

**THEY'RE WALKING ON DIMES**—Mary Kosloski, 5, March of Dimes Poster Girl for 1955, and Randy Kerr, 8, who was the first of 651,000 children to receive the Salk polio vaccine in field trials which took place last spring, meet in New York City. Mary, who lives in Collierville, Tenn., was stricken with polio at the age of five months. She is able to walk with March-of-Dimes-supplied crutches and braces only because of excellent medical-and-home care. Randy, who proudly wears the badge of "No. 1 Polio Pioneer," hails from Falls Church, Va. He may prove to be the leader of a parade of youth into a polio-free childhood, if the National Foundation for Infantile Paralysis-sponsored Salk vaccine tests prove successful.

# SHARE YOUR HOLIDAY THRU CARE For One Dollar!!

## Here Is The Miracle CARE PACKAGE 29 LBS. OF U. S. Surplus FOOD

as a Christmas Gift from you to a needy family selected by CARE overseas

...with your name on each package!

Note: CARE cannot find specific addresses for you. This is an undesignated gift.

Great need still exists around the world despite improved conditions in many areas. There are still 247,000 DP's and refugees within the small boundaries of Austria; 8,000,000 refugees in Germany; and many thousands in Hong Kong. Ten to eleven million people still need help in Korea; in Vietnam there are nearly 500,000 refugees; 4,000 a day are coming into Saigon from the North. These are just a few of the people around the world who need our help. This surplus package program gives individual Americans an opportunity to help in a direct, person-to-person way. Won't you share through CARE?

SEND A DOLLAR FOR EACH PACKAGE TO

—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.
