

Chevs Hand Bells 1st Loss in Upset

The Kewaskum Chevrolets pulled the major upset of the season in the Land o' Lakes league by defeating the previously unbeaten, league leading Campbellsport Bells here Sunday night by a 17-point margin, 84 to 67. A large crowd of fans was present and witnessed a fine contest.

This first setback for the Bells, who had won five straight, dropped them out of the loop lead for the present. They are now tied for second place with Kewaskum, a half game behind West Bend. However, the Lithias have completed their first half schedule while the Bells and Kewaskum both have a make-up tilt to be played with Horicon there. If both win their games, which they should, the first nail will end up in a three-way tie for first and a playoff will be necessary to decide the winner. West Bend can thank Kewaskum for surprising Campbellsport, otherwise they would practically be out of the first half running. Had the Bells won they would still be undefeated in the top spot and would have clinched at least a tie for the title regardless of the outcome in the Horicon game. The Lithias lost one tilt to the Bells.

Highlighting Kewaskum's upset over Campbellsport was George Hanrahan, center, with a stellar performance. He copied scoring honors with 33 points. Guard Arnie Bilgo was second best scorer with 17 points and he played a fine all-around game. Matt Serwe was the pace setter for the Bells with 14 points and Forward Bleck flipped in 12.

The contest was a torrid one all the way and was close until the final quarter when Kewaskum pulled away. The halftime count was 39-32 in favor of the Chevs. Kewaskum dropped in 28 free throws compared to the Bells' 17. But Campbellsport had 30 personals called on them and Kewaskum only 18. The Chevrolets had a height advantage over their opponents but the Bells made up for it with speed and a fast break.

Not including Sunday's games, Hanrahan was fifth highest in the league with 73 points. Don Meisenheimer was ninth with 60 and Bilgo 12th with 55.

Although the first half has not been settled as yet, Kewaskum will start second half play this Sunday night at Cedarburg. The make-up affair at Horicon is scheduled for next Thursday night.

LAND O' LAKES STANDINGS
Won Lost
West Bend 5 0
Kewaskum 4 1
Campbellsport 4 1
Horicon 2 2
Rosendale 2 4
Cedarburg 1 5
Mayville 1 5

Scores last week end—Kewaskum 84, Campbellsport 67; West Bend 55, Cedarburg 48; Horicon defeated Mayville, score not reported.

Games Sunday—Kewaskum at Cedarburg, Rosendale at West Bend, Mayville at Campbellsport, Horicon bye.

KEWASKUM RIVERS TEAM TROUNCED BY HARTFORD

The Kewaskum Rivers cagers did not have the success of the Lakes five Sunday. In the first contest of the evening they were trounced by the second place Hartford team by a margin of 28 points, 64 to 36. The setback dropped Kewaskum to sixth place in the loop. Details on the game were not turned in.

This Sunday night the rivers aggregation travels to Cedarburg to play the team that is tie with them. It will precede the Kewaskum-Cedarburg Lakes tilt.

LAND O' RIVERS STANDINGS
Won Lost
Slinger 7 0
Hartford 3 2
Horicon 3 2
Fillmore 3 4
Hustisford 2 3
Kewaskum 2 4
Cedarburg 2 4
Thiensville 2 5

Results last week end—Hartford 64, Kewaskum 36; Slinger 57, Cedarburg 38; Fillmore 75, Thiensville 54.

Game Sunday—Kewaskum at Cedarburg, Hartford at Hustisford, Thiensville at Horicon.

New Kiwanis Club Officers Installed

The Kewaskum Kiwanis club celebrated the 40th anniversary of the beginning of Kiwanis. The main speaker of the evening was Lt. Governor Bud Johnson, who informed the group that presently there are 3932 clubs with 236,000 members, and, with normal growth, the clubs would exceed 4,000 with membership of 250,000 by the end of the year.

New officers were installed, namely Ralph Marx as treasurer, Walt Bade, secretary, Lem Rosenheimer, vice president, and "Pat" Miller, president.

President "Pat" presented Village President Charles Miller with a pledge of reedication to be placed in the village hall. Kiwanians are once again dedicating themselves to the betterment of the community.

SIX KEWASKUM GRADUATES ENROLL AT STATE COLLEGES

Kewaskum High school has sent six of its graduates to Wisconsin State colleges as freshmen in the last four years, according to a study released at a meeting of the regents January 7 at Madison.

Washington county is the home of 19 state college freshmen this year, a decrease of five from 1951. In the last four years Washington county has contributed 72 freshman students to higher education in the state colleges where freshman classes have grown 41 per cent in size in the same period.

The state college study lists 449 high schools in Wisconsin sending graduates on to one of the nine colleges. An increase in the number of freshman enrollees came in 59 counties of the state last fall. Washington county sent one person for every 471 of its total population to a state college during the past four years, according to the board of regents study.

The number of students enrolling as freshmen from Wisconsin high schools has jumped 42.5 per cent since 1951. There were 2,419 state students enrolled as freshmen four years ago, as compared to 3,446 last fall. Total free man enrollment from all states and foreign countries was 3,845.

THIRTY-FIFTH WEDDING OF BEECHWOOD COUPLE

Mr. and Mrs. Elmer Garbisch of Beechwood observed their 35th wedding anniversary on Saturday evening, Jan. 8, at the Legion club rooms at Cranberry Marsh. About 60 guests helped celebrate the occasion with card playing and dancing. A luncheon was served.

Mrs. Garbisch, the former Martha Becker, and her husband were married Jan. 10, 1920. They have one daughter, Mrs. Edward Engelman, R. 1, Kewaskum, and one son, Kenneth, of Kewaskum, along with six grandchildren. Another son, Ralph, was killed in Korea while serving with the army.

The honorees received many gifts, cards and money and Mrs. Garbisch was presented with a corsage.

SHEEPSHEAD TOURNAMENT AT HEISLER'S BAR MONDAY

A sheephead tournament will be held at Heisler's tavern Monday evening, Jan. 24. Entry fee \$2.00. All are invited.

Prize winners at the last sheephead tourney were as follows: 1. Ray Kudek, 50-0-50; 2. Louis Heisler, 44-6-38; 3. Alex Kudek, 38-4-34; 4. Ray Klein, 34-4-30; 5. Walter Schmidt, 26-0-26; 6. John Hawig, 35-10-24.

IN THE SERVICE PVT. JAKE BRUESSEL ARRIVES IN KOREA

Jake K. Bruessel, US 55479736, 1119th Engr. Util. Co. A. V., APO 971, Postmaster, San Francisco, Calif.

MOVES INTO JESKE HOME

Mr. and Mrs. Tom J. Fisher of West Bend recently moved into the upper apartment of the Erich Jeske home on Park st., formerly occupied by Mrs. Merle Schiffert and son.

Engage Architects for New High School Building Here

Appleton Firm Selected; Sites for Building to Be Narrowed Down to Three Before Meet

As of a recent date the building committee and school board of Joint District No. 2, or the Kewaskum and Community High School District, has engaged the firm of Raymond N. Le Vee & Associates of Appleton as architects for the proposed new high school building. The firm of Le Vee & Associates was organized in Appleton in 1930. Mr. Le Vee is a graduate of the University of Illinois and received all of his preliminary architectural training in Chicago. The personnel of the firm consists of architectural designers, structural, heating, sanitary and air conditioning engineers and also two field engineers for the supervision of construction. The firm has specialized in the design and construction of modern school buildings, both primary and secondary, and has developed a considerable amount of time and study in a conscientious effort to improve school building design especially in relationship of the school plant to the community.

Some of the school buildings that the firm has been called upon to design and superintend in the field are as follows:

Decorah Lawns and Fair Park Schools, West Bend; Lincoln Grade School, Hartford; Addition to High School, Hartford; New High School, Mukwonago; Community School, Winnebago; Lincoln Elementary School, Appleton; Addition to High and Grade Schools, Kaukauna; Addition to High School, Kimberly; New High School, Neillsville; New High School, Hortonville; Addition to High School, Wild Rose; Addition to High School, Thorp; Addition to High School, Owen.

MISS JUDY NIGH IS BRIDE OF PVT. ROSE

Nuptial vows were exchanged on Thursday, Dec. 20, at St. John's Baptist church, Plymouth, by Miss Judy B. Nigh and Pvt. John T. Rose, Camp Chaffee, Ark. The Rev. Father A. J. July presided at the 10:30 a. m. nuptial high mass. Miss Nigh is a daughter of Mr. and Mrs. Walter Nigh, 234 1/2 East st., Waltham, former residents of the town of Auburn. The bride's father is a brother of E. M. Nigh of that township. Pvt. Rose is a son of Mr. and Mrs. Joseph Rose, Milwaukee.

Dinner was served to 70 guests in St. John's auditorium. The bride is a graduate of Plymouth High school and attended the University of Wisconsin Extension Division at Sheboygan. She was employed as an abstractor for the Title Guaranty Co., Milwaukee. Her husband attended the Milwaukee School of Engineering and is now serving with the army. The couple left for Camp Chaffee, where the bridegroom is stationed.

Local relatives were among those in attendance at the wedding.

KELLER INFANT BAPTIZED AT HOLY TRINITY CHURCH

The little daughter of Mr. and Mrs. Ray Keller, Kewaskum, was baptized Sunday afternoon in Holy Trinity church by the Rev. F. C. La Bowl. She was given the name Dawn Marie. Sponsors were Mrs. Tommy Kluever of Wayne and Allen Dreher.

Guests entertained for the occasion included Mr. and Mrs. Tommy Kluever, Wayne; Mr. and Mrs. Leo Lichtensteiger, Mr. and Mrs. Donald Lichtensteiger, Campbellsport; Mr. and Mrs. Allen Dreher and daughter Pamela, Mr. and Mrs. Roman Keller and son Lloyd.

BIRTH

LEHNERZ—A son to Mr. and Mrs. Albin Lehnerz, R. 2, Kewaskum, Tuesday, Jan. 18.

Indians Tip Fondy, Lose to Loop Leading Brandon

Kewaskum High school's cagers romped over North Fond du Lac on the Oriole floor last Friday night, 75-53, but muffed the opportunity to gain a first place tie with unbeaten, league leading Brandon here Tuesday when the Indians were defeated again by the big red men, 62-47.

The win over Kewaskum here Tuesday before a jam-packed house, a large proportion of the fans from Brandon, was Brandon's 12th straight of the season and 7th in succession in conference play. They are ranked among the top ten "small school" teams in the state. The victory was another step toward the Tri-County championship for Brandon, which they practically have in the bag now. Instead of a first place tie, the setback dropped the Indians two full games behind the leaders and just about eliminated their chances for the title. They are now tied for second with Rosendale.

Brandon and Kewaskum fought tooth and nail for three periods before the visitors caught fire for 26 points in the final quarter to win pulling away from Coach Mitchell's boys. Up to that time the contest was close with either team having a chance to win. Brandon's big team, led by the giant Mollien brothers, held a 26-15 advantage at halftime but Kewaskum cut it to 36-34 by the end of the third period. The Indians tied the count before petering out as Brandon hit a hot streak in the last stanza. Kewaskum's poor shooting from the free throw line kept the score from being very close in the first half. They had numerous throws but couldn't sink them. But even so the Indians forced the leaders to the limit and gave them a real battle.

Center Fred Mollien, Brandon's high scoring pivotman and the conference's leading point maker, swished in 32 points for his best effort of the season and top honors for the evening. Forward John Mollien chipped in 11 tallies. These two big guys made the difference between the teams. Harry Klein and Mark Rosenheimer were tops for Kewaskum with 15 and 19 points respectively. Brandon made 20 free throws and the Indians 13.

At North Fondy Friday the Indians went on a rampage as they downed the Orioles by 25 points on their own floor. Fondy got off to a fast start and led 17-10 at the quarter but the Mitchellmen soon passed them up, tallying 25 points in the second period to Fondy's 9. The Indians outscored the Orioles by far in both of the last two quarters to increase their margin. Guard Don Bradtke was the game's high scorer for Kewaskum with 22 points. Tom Tessar scored 15 and Tom Peterson 13. Hintz with 11 points and Andrews with 10 paced North Fondy.

On Friday night of this week the Indians played at Rosendale in a game that settled the second place tie between the two.

TRI-COUNTY STANDINGS

Team	Won	Lost
Brandon	7	0
Kewaskum	5	2
Rosendale	5	2
Campbellsport	4	3
Oakfield	2	6
North Fondy	1	5
Lomira	0	7

Scores Friday—Kewaskum 78, Lomira 23; Rosendale 57, Campbellsport 42.

Scores Tuesday—Brandon 62, Kewaskum 47; Campbellsport 72, Oakfield 58; Rosendale 49, Lomira 42.

Games Friday—Kewaskum at Rosendale, Lomira at Oakfield, North Fondy at Brandon.

HOSPITAL NEWS

Mrs. Johnson, who makes her home with Mr. and Mrs. Wm. F. "Billy" Schaefer, Kewaskum, was removed to St. Joseph's hospital, West Bend, in the firemen's ambulance Friday morning, Jan. 21, for X-rays following a recent fall.

MARRIAGE LICENSE

Jan. 15—Donald J. Herriges and Joyce E. Britt, both of R. 2, Kewaskum; wedding Jan. 22.

MWA Resumes Meetings, Elects

The first meeting in years of the Modern Woodmen of America Camp 2233 of Kewaskum was held in the Woodman hall on Wednesday, Jan. 12. The business of election of new officers was held and the following men were put into office:

Council, E. M. Gnacinski; advisor, Otto Weddig; banker, Wilmer Prost; escort, Miles Mueckeheide; watchman, Walter Wesenberg, and sentry, William Forester.

Trustees were also elected and are as follows: Three years, Louis J. Heisler; two years, William Schmidt, and one year, Otto Weddig.

The camp is planning to hold monthly meetings on the first Tuesday of each month. All members of Camp 2233 are asked to take part.

The camp has been dormant since 1947 and now that the fire has been kindled all are urged to keep on feeding the flame. The next meeting will be on Feb. 1, 1955.

Governor Names Jackson Doctor County Coroner

Notice was received from Gov. Walter Kohler of the appointment of Dr. James H. Albrecht, M. D. of Jackson as Washington county coroner. The appointment was confirmed this week by County Clerk Anton P. Staral.

The appointment of a coroner was necessitated when Ewald Schwalst, formerly of Richfield, who was elected to the office in the November election, announced that he would be unable to take the post. Schwalst purchased a business in Fond du Lac county and will reside there. His residence outside the county automatically makes him ineligible for the coroner's position.

Dr. Albrecht is a county coroner. He was elected in 1952 and was not a candidate for reelection in the fall election. The appointment is for a period of two years, his term of office to expire on the first Monday in January of 1957.

DONORS SOUGHT FOR BLOOD CLINIC FEB. 3

Washington county residents are asked to donate a pint of blood to their local blood bank on Thursday, Feb. 3. That date is the first blood donor clinic of 1955 and will be held from 1:30 to 7:30 p. m. in the gymnasium of the West Bend High school. The goal has been set at 200 donors.

Mrs. S. M. Hetland, drive chairman for the Community Blood Donor club, said that a county-wide campaign to register donors for the Feb. 3 clinic was to start Monday. The club is seeking more first-time donors, more donors from county towns outside of West Bend, Barton and Kewaskum, and more women volunteers.

Donors are requested to sign up as quickly as possible. In the Kewaskum area they may contact the following chairmen: Wallace Rodenkirch, Boltonville; Mrs. Walter Mollan, town of Kewaskum; Henry Rosenheimer, village of Kewaskum.

WOMAN'S CLUB BANQUET JAN. 22; REV. BEERS WILL SPEAK

The annual Woman's Club banquet will be held on Saturday, January 22, at Bauer's Hotel in Campbellsport. Mrs. R. G. Edwards, Mrs. K. W. Koepke, and Mrs. K. W. Haebig are in charge of arrangements and have announced that a family style chicken dinner will be served promptly at 7:15 p. m. The price will be \$2.25 per person. All members are requested to return the card they received in the mail to Mrs. Haebig, no later than January 17, indicating whether they will or will not attend.

The speaker at the banquet will be the Rev. Samuel Beers, chaplain at the Wisconsin State Prison at Waupun.

HIG MURRAY ADDRESSES ADULT FARMER CLASSES

A large crowd turned out to hear Hig Murray, superintendent of traffic at the Milwaukee stockyards and a well known radio and TV personality, who spoke to the adult farmer class at Kewaskum High school last Tuesday evening. O. E. Behnke, vocational agriculture instructor, announced that other outstanding speakers have been lined up for the program at the high school.

Mothers March to Climax Polio Drive on Thursday

Plans for the 1955 Mothers March on Polio moved forward this week with the selection of women volunteers to serve as ward chairmen.

Mrs. Robert Haebig, West Bend, chairman of the Mothers' March in that city, announced the appointment of local volunteers and reported that plans for the event were made at a meeting last Wednesday night.

Scheduled as the climaxing event in the 1955 March of Dimes, the Mothers March in West Bend will be held on Thursday night, Jan. 27 from 6:30 to 7:30 p. m.

During that hour, marching mothers will call at every home in the city. As an aid and welcome to the

WOMAN'S CLUB HOUSE TO HOUSE MARCH THURSDAY EVENING IN KEWASKUM

Wayland Tessar, March of Dimes chairman for Kewaskum, informed the Statesman Thursday that members of the Kewaskum Woman's club will make a house to house March on Polio in the village next Thursday evening starting at 6:30 p. m. At that time, as an aid to the volunteers, residents are asked to light their porches and be ready with their donations to the March of Dimes. Tessar also stated that more help can still be used and volunteers are asked to contact either Mrs. Ralph Marx or Mrs. Carroll Haug.

volunteers, residents are asked to turn on their porchlights during the marching period to "light the way" for the volunteers.

Mrs. Haebig explained that the entire city has been mapped out into districts, which roughly approximate election precincts. All districts, Mrs. Haebig said, are being further divided into sections or blocks.

The chairman asked that women wishing to take part in the hour-long Mothers' March contact the captains in their districts. More volunteers are needed in several areas of the city to assure a successful March. Mrs. Haebig announced, "The Mothers' March lasts only one hour, so mothers who volunteer will not have to spend much time away from their families," she said. "However, only by getting more block volunteers will we be able to make sure that every single home in the community is visited."

The chairmen of the various districts are:

Mrs. Joseph Schnyder, first ward; Mrs. John Shaw, second ward; Mrs. Gary Otten, third ward; Mrs. Joseph Weiss, fourth ward; Mrs. J. R. Reilly, fifth ward; Mrs. Lee Gonring, sixth ward; Mrs. Leonard Walters, Decorah Heights; Mrs. Myron Schmidt, Decorah Lawns; Mrs. John Manning, west and north of the City park; Mrs. Roy Ensenbach, western area of third ward, and Mrs. Leo Gonring, Silver Spring rd. area.

While plans for the Mothers' March were announced in West Bend, an appeal for additional volunteers to help solicit funds in the southern half of the county was voiced by Ray Jeffords, chairman of the March of Dimes in that area. Jeffords asked that anyone wishing to help in the drive contact him or the following chairmen:

Walter Zastrow, town of Erin; Cyril Bresson, town of Richfield; Philip Frey, town of Hartford; George Nehrbass, Peter Merton, town of Polk; Ray Baer, town of Germantown; Mrs. Kurt Westerberger, village of Germantown and Richard Friess, village of Slinger.

HIG MURRAY ADDRESSES ADULT FARMER CLASSES

A large crowd turned out to hear Hig Murray, superintendent of traffic at the Milwaukee stockyards and a well known radio and TV personality, who spoke to the adult farmer class at Kewaskum High school last Tuesday evening. O. E. Behnke, vocational agriculture instructor, announced that other outstanding speakers have been lined up for the program at the high school.

IRENE KANIES GRADUATES FROM SCHOOL OF NURSING

Among the graduates of the Milwaukee Hospital School of Nursing, Milwaukee, is Irene Kanies, daughter of Rev. and Mrs. Gerard Kanies, Kewaskum. The young nurse will receive her diploma, after thirty-six months of intensive training, at ceremonies marking the 54th commencement exercises of the hospital's nursing school, on Saturday evening, January 22, in the hospital chapel.

John Thull, 86, Dies Wednesday

John M. Thull, 86, retired farmer residing on R. 2, Kewaskum, near St. Michaels, passed away on Wednesday, Jan. 19, following an illness of several months due to complications of advanced age. One of the older residents of the community, he was the last of a family of ten.

A son of the late Jacob and Mary Thull, he was born March 9, 1868 near St. Michaels. He lived on a farm near St. Michaels all of his life except for 11 years which he spent in retirement in the village of Kewaskum, returning to the farm in his last years. Mr. Thull was married to Minnie Mueckeheide on Nov. 25, 1915 and she predeceased him on Jan. 19, 1948, just seven years ago.

Six children were born to the couple, one of whom, a daughter, Rose, died in November of 1941. Surviving are three daughters and two sons, Marie (Mrs. Garfield Durocher) of Van Nuys, Calif., John J. Thull, with the U. S. Air Force stationed in Germany, Agnes (Mrs. Herbert Wallner) of Port Washington, Leo and Cecelia Thull of R. 2, Kewaskum. He is survived further by four grandchildren and many relatives and friends.

Mr. Thull was a member of the St. Michael's parish choir at St. Michael's many years and of the parish Aid society.

The body is in state at Miller's Funeral home since 2 p. m. Friday. Funeral services will be held at 9:30 a. m. Saturday in St. Michael's church, the Rev. M. Urban officiating. Burial will take place in the parish cemetery.

MRS. WILLIAM DECKLIVER

Mrs. William Deckliver, 83, died Monday Jan. 17, at the home of her daughter, Mrs. Albert Krueger, in the town of Auburn.

The former Henrietta Vetter, she was born Jan. 17, 1872 in the town of Scott, a daughter of the late Mr. and Mrs. Henry Vetter.

She was married to Mr. Deckliver in Immanuel Lutheran Church, Scott, Oct. 12, 1892. The couple had farmed in Scott until Mr. Deckliver's death in December, 1918.

Surviving are two sons, John of Beechwood and Paul of Batavia; three daughters, Mrs. Krueger (Adela), Mrs. Levi (Ella) Melius of Scott and Mrs. Arthur (Lorena) Haber of New Pines; five grandchildren and one great-grandchild, and one brother, Frank Vetter of Kewaskum.

She was preceded in death by three sisters, two brothers and one granddaughter.

Services were held at 2 p. m. Thursday at Immanuel Lutheran Church, Scott, with the Rev. E. R. Engelsing, pastor, officiating. Burial was in the parish cemetery.

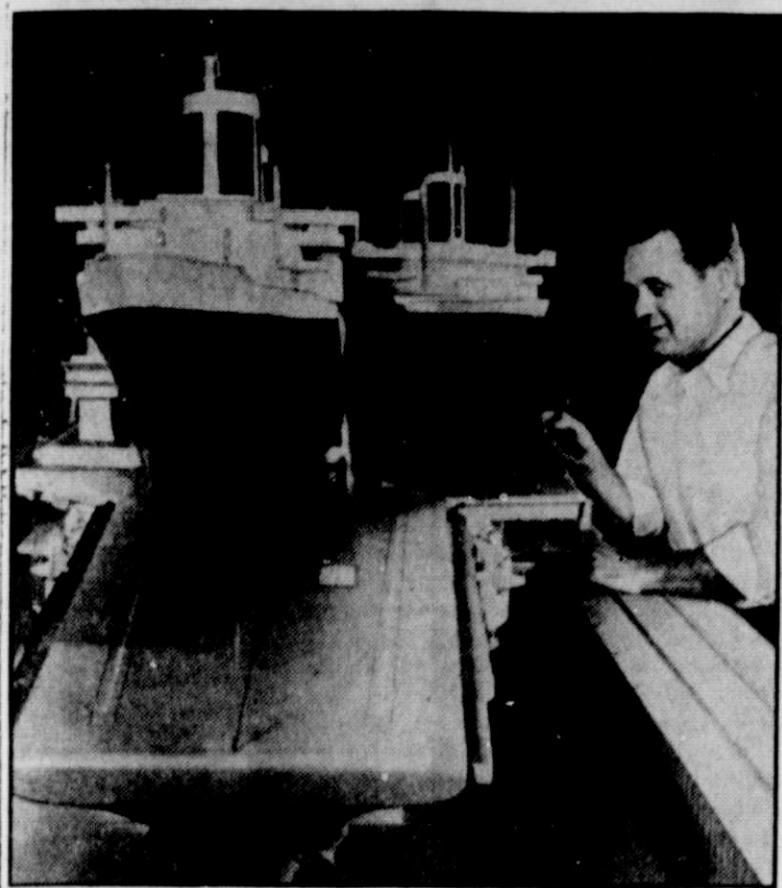

MRS. CARRIE MILLER

Mrs. Carrie Miller, 67, nee Baer, of 328 N. 10th ave., West Bend, mother of Ben Miller of R. 2, Kewaskum, died suddenly at her home on Monday, Jan. 17.

She was born in West Bend Oct. 23, 1887. Her marriage to Ben Miller took place on Dec. 26, 1902. He preceded her in death in 1951.

Surviving along with the above named son are another son, Henry Miller, and a daughter, Margaret (Mrs. Milton Borst), both of West Bend; eight grandchildren, a great-grandchild, and a brother, Alvert Baer of Menomonee Falls.

Funeral rites were held at Trinity English Lutheran church, West Bend, Thursday afternoon at 2 o'clock, the Rev. R. W. Groth officiating. Burial was in Union cemetery, West Bend. The body was in state at the Kapfer-Gehl Funeral home prior to the services.

WITH ROOM TO SPARE—All three built to the same scale, models of the luxury liners SS United States (left) and SS America fit comfortably on the flight deck of the USS Forrestal, the world's mightiest warship, recently launched at Newport News, Va. The America is 723 feet long, 93 feet wide, the United States, 996 feet long, 101 feet wide, and the Forrestal a whopping 1036 feet long and 252 feet wide.

LOOK TO LISTEN—Powered by a tiny battery to right of dime, shown for comparison, a new-type hearing aid which masquerades as an eyeglass frame is now in production. Clear plastic tube, shown on lower ear frame, conducts amplified sound to the wearer's ear. The battery, which screws into ear frame, has a life-in-use of about 180 hours. Frames may be fitted with clear glass for those with good eyesight who yet want to dispense with paraphernalia of more conventional hearing devices, according to the Dobbs Ferry, N. Y., manufacturer.

DOUBLY PERMANENT—Twins Mary Jo and Suzanne Mulholland get their first permanents at Grandmother Verna Bent's beauty shop in Cincinnati, Ohio. A confused Santa took no chances, gave the 29-month-old pair identical dolls.

The Law And You

CHILD SUPPORT AFTER DIVORCE & REMARRIAGE

Children are our greatest natural resource. The law treats them as such and does much to make sure they have a chance to grow up into healthy, educated adults.

Under the law, a father has a duty to support his minor children, even though the parents are divorced and either or both may have married again.

For example, when John and Susan were divorced the court ordered John to pay Susan \$100 each month to support their two children.

John paid each month for a year. Then he heard that Susan had married again, so he quit paying. A few months later he was served with a warrant ordering his appearance in court for contempt of court. He protested bitterly that he wasn't re-

quired to pay any more since his former wife had remarried. In this, he was completely mistaken. When John appeared in court, the judge explained to him that, although Susan had remarried, he was still the father of the children and as responsible for their welfare as he had ever been.

This would continue to be so until the children became of age, unless the stepfather or someone else should adopt them. But so long as Susan's 2nd husband had not adopted the children, John had to pay to support them. The court could punish him, even by imprisonment if necessary, for his refusal to comply with the court order.

If the circumstances warranted it, John could also be tried on the criminal charge of non-support and be sent to state prison if found guilty.

(The Wisconsin Bar Association offers this column to inform, not to advise. Facts may change the application of the law.)

Except for a few small openings to the brain, an elephant's head is protected by about 8 inches of bone.—Sports Afield

177 Years Ago Since Washington Set Up Camp at Valley Forge

Though most Americans do not give it much thought, in 1777, General Geo. Washington set up camp for a winter which was to be one of the hardest which American soldiers have ever endured. It was on December 19th that Washington marched his 11,000 men to Valley Forge, Pa.

This was after the battles of Brandywine and Germantown, after which the British had occupied Philadelphia. Therefore, the encampment at Valley Forge was not among the most optimistic prospects, nor after a session of complete success in the military field.

Washington selected Valley Forge because he thought he could protect Congress, then sitting at York, Pennsylvania, from this location and because it was a highly defensible site. One side was protected by the Schuylkill

and another side protected by a steep precipice. While being quartered at this site and amid many hardships caused by deficiencies in the commissary and quartermaster departments, the Continentals were, nevertheless, formed into a disciplined army by the rigid instruction and training methods of Baron Steuben.

Many of us give little thought to this momentous action and winter, a hundred and seventy-seven years ago. But it was to have a considerable bearing on the future history of the world and a direct bearing on every inhabitant in what was to become the United States. It is well that we remember Valley Forge and that hard winter, and those heroes of 1777. We should keep in mind that, should this generation be called upon to undergo a similar ordeal, it is the history and tradition of our people to exhibit their finest qualities in such critical tests.

LOT OF BULL—This 19-foot, seven-inch plastic- and steel bull is on his way to pasture atop a 90-foot-high pylon in Kansas City, Mo., provided for him by the American Hereford Association.

"Mister Fixum's Handy Hints"

Protect Your Water Pipes

If you have exposed water pipes under a house which does not have a basement, these pipes should be protected against freezing. This reader states his problem.

Query: Last winter, the water pipes froze under my house, which does not have a basement. I understand there is a way to wrap with straw to prevent freezing. Please tell me how. —L.C.

There are many ways to insulate pipe against freezing. Likewise, many different materials are used. But as to the amount of material used, and how it is used, the best I can do is to tell you to use enough that the margin of safety will protect you in the coldest weather you are apt to have in this climate.

Your house has no basement. But does it rest on a masonry wall, or is it set on post or masonry blocks? If it is set on a masonry wall it is quite well protected. But if it is set on posts, you should insulate the space under the house by nailing tar paper or building paper between the floor and the earth. In rural communities, the house is often banked with straw.

It is possible to use straw for pipe insulation. Build a box, as illustrated, and pack the straw tightly around the pipe. A reasonable margin of safety is 8". But use more if desired. It is better to have too much than too little.

Newspapers make good pipe insulation. Wrap the newspapers around the pipe until you have a layer about 4" thick. Tie with string to hold it in place.

After you have the pipe wrapped with paper, cover this with about two layers of cheese cloth, and wrap with fine wire to hold it in place. Then paint the cloth to make it more fire resistant.

One argument against using either paper or straw is that they are highly inflammable. If you do use them, make sure that they are tightly packed and covered. It is the loose material that burns so readily.

Sawdust may be used instead of straw or paper. Build a box the same as for straw. It does not need to be packed, and the space need not be filled all the way to the floor.

It is extremely important that this home gathered insulation be dry when installed, and that it be kept dry. If it becomes wet, it loses its value as an insulator. For that matter, all types of insulating material should be kept dry.

Besides the materials mentioned above, commercial insulating materials may be used. Pipes may be packed with mineral wool or vermiculite. They may be wrapped with insulating blankets made under various trade names. Probably the best insulator is a prefabricated asbestos air-cell insulation.

Air-cell pipe insulation comes in convenient lengths that are cemented in place with asbestos cement. Elbows and joints are plastered with asbestos cement and wrapped with cloth.

This type of insulation is more expensive than the home gathered types, but is more efficient, and is not inflammable.

Naturally

A stranger in the West asked a native, "Is this a healthy place?" The Westerner replied, "It sure is. Why, when I came here I was bald, couldn't walk, and had to be lifted from my bed."

"Wonderful!" said the visitor. "How long have you been here?" "Oh," was the reply, "I was born here!"

An Army School of Musketry was organized at the Presidio of Monterey, Calif., in April, 1907.

PILES SHRUNK without surgery!

IN CASE AFTER CASE PAIN STOPPED!

NEW STAINLESS FORM now ALSO AVAILABLE!

In 90% of cases of simple piles—tested by doctors—amazing Pazo Ointment stopped bleeding, reduced swelling, healed cracking... WITHOUT SURGERY! Pain was stopped or materially reduced. Pazo acts to soothe, relieve itching instantly. In tubes, also modern Suppositories. Get Pazo at drug-gists for wonderful fast relief.

Fainting Is Rarely Caused by Heart Ailments Say Medics

Everybody has been told that people who faint should be allowed to lie flat where they are. Yet nearly everybody who is suddenly confronted with someone who is fainting instinctively tries to lift him up, prop him up, drag or propel him rapidly from where he is to where he is not, which is the best way to interfere with natural recovery, according to a bulletin issued recently.

Fainting is emphasized in this bulletin because there are many misconceptions about it, in the first place, and because there is a simple and certain way to insure prompt recovery in almost every case.

Heart disease is what people fear most when fainting occurs, the bulletin says, but heart ailments rarely, if ever, cause fainting. Instead, fainting is the result of dilated blood vessels which in turn slow down the motion of the blood and permit it to collect temporarily in deep-lying vessels throughout the body and particularly the legs. That deprives the brain and heart of their normal supply of blood and oxygen and causes the faint. It happens as a result of complex nerve impulses that may be started in the first place, by fright or shame, by temperature sensitivity, pain or drug reactions or, of course, by sudden loss of blood. The victim collapses to the floor, which is just where he should be to help equalize his circulation and get his blood moving normally back to his heart and brain.

To force a fainting person to sit up, to hold him up or drag him to his feet, simply prolongs the unconscious state. It may even do more than that. It may start the way toward real trouble and even to irreversible damage, because the longer the brain is deprived of circulation the more danger there is of permanent damage. Of course, sudden loss of consciousness is not always simple fainting. But there is no such episode that requires propping or dragging, the doctors say. The best policy is to let the patient lie quietly where he is until expert help arrives.

One Minute Quiz

1. What was the score of the recent SMU-Notre Dame game?
2. What pro football teams are leading their leagues?
3. With what sport do you connect a team known as the Jolters?
4. How did the recent Rosewall-Seixas tennis battle come out?
5. Who won the recent LaStarza-Norkus fight?

THE ANSWERS:

1. 26-14, in favor of the Irish.
2. The Detroit Lions and the Cleveland Browns.
3. Roller skating.
4. Rosewall defeated Seixas in the Victorian finals.
5. Charlie Norkus.

Enlistment of Negroes in the U.S. Army was authorized by President Lincoln Aug. 25, 1862.

Sarah Anne's COOKING CLASS

RICE AND TOMATO ASPIC

Here is a tomato aspic salad that is hearty enough for a well-balanced meal for a whole family when supplemented by soup, rolls, and dessert. And it's pretty enough for company, too.

- 2 cups canned tomato sauce
- 1 cup water
- 1 teaspoon salt
- 1/2 teaspoon pepper
- 2 tablespoons unflavored gelatin
- 3 tablespoons lemon juice
- 2 cups cold cooked rice
- 1 cup minced celery
- 1/2 cup sliced stuffed olives
- 2 tablespoons minced pimiento
- 1/2 cup minced green pepper

2 tablespoons minced onions
1/2 cup grated sharp cheese

Combine tomato sauce, 1/2 cup of water, salt, and pepper in saucepan and bring to the boiling point.

Soften gelatin in remaining water. Add to hot tomato mixture and stir until gelatin is dissolved. Chill until partially set.

Combine remaining ingredients and toss lightly. Fold into tomato mixture. Pour into 8 1/2 x 4 1/2-inch loaf pan. Chill until firm.

Unmold onto platter. Garnish with green pepper rings and additional stuffed olives. Serve with mayonnaise. Yield: Six servings.

Oysters may be served the year around, the fresh ones are taboo during the summer months because of their poor flavor, but frozen or canned oysters which are wholesome, may be eaten at any time.

In preparing oysters, run the oysters through the fingers so that every bit of shell is removed. Then rinse in cold water.

Oyster Cocktail in Tomato Cups

Select small tomatoes of uniform size, chill, peel, and hollow out deeply. Allow 4 small oysters for each cup. For the sauce, mix together:

- 2 cups tomato pulp, chopped fine
- 1 teaspoon grated horse-radish
- 2 drops tabasco sauce
- 1 teaspoon lemon juice
- 1 tablespoon vinegar
- 1 teaspoon Worcestershire sauce
- Salt and pepper

Pour the sauce over the oysters and stir well. Fill tomato cups and serve.

Fried Oysters

- 2 dozen large oysters
- 2 eggs
- Fine bread crumbs
- Seasoning

Wipe each oyster dry and sprinkle with salt. Beat the eggs just enough to mix. Dip oysters in egg, then drop each oyster in the bread crumbs, which should be spread on a plate. When coated with crumbs, fry a golden brown in deep fat heated to 375 degrees. Drain on absorbent paper. Serve with the following sauce:

Tyrolienne Sauce

- 2 cups mayonnaise
- 1/2 tablespoon chopped parsley
- 1/2 tablespoon chopped capers
- 1/2 tablespoon chopped gherkins
- 1/2 tablespoon chili sauce

Oysters Louisiana

- 1 quart oysters
 - 3 tablespoons butter
 - 2 tablespoons chopped red pepper
 - 1/2 tablespoon chopped shallot
 - 4 tablespoons flour
 - 1/2 teaspoon salt
 - 1/8 teaspoon paprika
 - Few grains cayenne
 - 1/2 cup grated Parmesan cheese
- Heat and cook oysters in a sauce pan with water and liquid drained from the oysters. Heat and cook until oysters are plump and edges begin to curl. Drain and add to liquid enough H2O to make 1 1/2 cups, cook butter 5 minutes with red pepper and shallot. Add flour and stir until well blended. Pour on oyster liquid gradually, stirring constantly. Bring to boiling point and season with salt, paprika, and cayenne. Arrange oysters in individual baking dishes. Cover with sauce and sprinkle with cheese. Bake at 400 degrees until thoroughly heated.

Escalloped Oysters

- 1 pint oysters
 - 1 cup cracker crumbs
 - 1/2 cup bread crumbs
 - 1/2 cup melted butter
 - 2 tablespoons top milk
 - 2 tablespoons oyster liquor
 - 2 tablespoons cooking sherry
- Mix bread and cracker crumbs,

Seafood Appetizer

- Oysters
- Lobster meat
- Crab meat
- Diced celery
- Shrimp cooked and cleaned
- Cocktail sauce
- Quartered lemon
- Parsley
- Horse-radish

For each person open 3 fresh oysters and place on the flat shell. Fill rounding shell with pieces of lobster meat, fresh, canned or frozen, the second with crabmeat mixed with diced celery, the third with shrimp. Put crushed ice in a plate, with a glass of cocktail sauce in the center. Surround with the filled shells. Garnish with quartered lemons, sprigs of parsley and horse-radish on a lettuce leaf.

Oyster Pie

- 1 quart oysters
- 1 cup milk
- Butter
- Saltine crackers
- Salt and pepper

Into a buttered baking dish put a layer of oysters. Dot with butter and sprinkle with salt and pepper. Then a layer of saltines. Cover with a layer of oysters, dot with butter, sprinkle with salt and pepper. Cover with saltines. Pour milk over all and dot with butter. Bake in an oven (375 degrees) for about 30 minutes. Serve at once.

AIR DIVER—Gravity doesn't bother Army Sgt. Dawson Merchant, as he apparently walks across harbor waters at Pusan, Korea. Actually, Sergeant Dawson was caught by the camera a split-second before his leaded boots plummeted him to the harbor bottom, where maintenance of underwater port facilities is underway.

WHAT'S COOKIN'?—A short order of big-city rivalry is simmering on this giant range built originally for the Chicago World's Fair of 1893, by a Detroit, Mich., stove manufacturer. City fathers heard of the 19-foot, seven-inch plastic-and-steel bull recently placed atop a 90-foot pylon in Kansas City, Mo., by the American Hereford Association. They want everyone to know that their gigantic reproduction, 30x20x25 feet, is big enough to roast a critter of such Bunyanesque proportions, with plenty of room left over to cook huge potsful of Michigan farm products. Acting Mayor Louis C. Mirana and Councilwoman Blanche Parent Wise are atop the ash pit. Council members Eugene Van Antwerp and Mary V. Beck are on the ground.

HE HAS "SMOOTH" TECHNIQUE—Artist Rudolf Urmersbach, 52, of Mount Pleasant, Mich., has truly a soft touch with the brush. Using a technique all his own, he paints on black velvet.

Make Everyone Happy

The gift for the home makes everyone happy. Shown is a roomful of home gifts that will enable you to get the most out of life. There is a return to home entertaining, and this room setting provides all the ingredients. The stacking tables for snacks, the arm chair and the ottoman with zip-on upholstery covers for foam rubber cushions, the television set, the spinet organ, the leather upholstered occasional chair, the radio, the lounge chair, the new curved sectional sofa, and the glass topped coffee table are all designed to make your home a more enjoyable place for many years to come. The sofa, too, has zip-on upholstery covers. Just send them out to be cleaned when they become soiled. Note how the organ in this room becomes the focal point. There is an ever-increasing interest in music in the home. It's fun; it's healthy—and you can select furniture that is beautiful, yet requires the minimum amount of care.

TASTES JUST LIKE HAY—Which it is, but it's the fanciest fodder Floeste was ever fed on the farm near Uniontown, Kan., owned by Lawrence Johnson, at left. This is just one nibble of some 42,800 pounds of California hay flown to Johnson relative to tide the drought-hit Kansas farmer over the winter.

KIDNEY DISEASE AFFECTS GENERAL HEALTH

The kidneys act very much like a filtration plant which filters out waste products of all types. When the kidneys do not function properly, waste products accumulate and resistance is lower throughout the entire body. Nature also uses the skin as another means of elimination. In some cases of kidney retention there are characteristic odors to the perspiration. Backache in the area of the kidney leads some to believe that they have kidney trouble. This may or may not be the case. The backache is a warning sign, however, that nerves are interfered with. The kidneys could be involved as well as other organs in that area. The kidneys are very richly supplied with nerves which control their functions. These nerves also coordinate the functions of the kidneys with the rest of the body. That is why Chiropractic adjustments do help many forms of kidney conditions.

GROWING BETTER CROPS

Making the Most of Fertilizers

American fertilizer practices have come a long way since the Indians taught the Massachusetts Bay colonists how to better corn yields by fertilizing hills with alewives, in 1621.

Today, a more profitable use of fertilizers is not only an inseparable part of overall good farm management but also essential to the high yields which help lower production costs and improve the spread between those costs and net profits.

For most commercial growers of vegetables and fruits, more profitable fertilizer practices fall into four main categories: knowing what the soil lacks for the specific crop; applying the right fertilizer at the right time; proper placement, and, through experience and consultation with county agent, cannery fieldman and other specialists, knowing how much additional fertilizer would give maximum profitable yield—not necessarily highest yield obtainable.

Adequate Supplies
This year growers will find fertilizer supplies adequate. Overall nitrogen, phosphate and potash stocks are expected to be sufficient in most sections, according to Dr. Willard H. Garman, agronomist of the American Plant Food Council, though he notes that shortages of specific materials have already occurred and may again in certain areas. Biggest single problem of the fertilizer industry, seasonal distribution, would be solved, Garman says, by more farmers taking delivery in the fall and winter.
A 10-15 per cent increase in fertilizer supplies over 1953 is forecast by R. L. Cook of Michigan State College department of soil science. However, if present trend of increased use continues, Cook feels that supply will barely meet demand.
Indicative of greater usage is the record of the Ohio Top Ten Tomato Club as summarized by E. C. Wittmeyer, Extension horticulturist, Ohio State University. Among the combination of practices which have boosted average yields of these growers to 16.62 tons per acre in 1953—about 30 per cent above state average—he cites an increase in average fer-

(U.S.D.A. Photo) Good fertilizer practice begins with soil testing.

fertilizer application per grower from about 600 pounds in 1948 to slightly over 800 pounds an acre in 1953 of equivalent analysis.
On crops contracted to canners, growers have stabilized prices into which to figure fertilizer costs, as well as a sure market. Though the gamble is thus lessened, high yields—which generally mean higher quality—are vital to the grower's net profit.

Placement Extremely Important
Fertilizer placement is extremely important for best yields of canning crops, Dr. K. C. Berger of the University of Wisconsin points out. "With usual rates of fertilization only small amounts of fertilizer are used. These amounts are generally insufficient for maximum profit yields, and it is estimated that in Wisconsin farmers should use five to six times as much fertilizer as they now do for most profitable yields under current price levels."

"WATCH YOUR WIRING"

In today's modern well-applianced homes, you have more electric servants than you have ever had before. . . BUT chances are four to one that circuits in your home are overloaded. Make this six-way test to spot inadequate wiring in your home:

	Yes	No		Yes	No
1 Do fuses blow frequently?	<input type="checkbox"/>	<input type="checkbox"/>	4 Do lights dim noticeably when appliances are being used?	<input type="checkbox"/>	<input type="checkbox"/>
2 Do appliances such as irons, toasters and waffle irons heat slowly?	<input type="checkbox"/>	<input type="checkbox"/>	5 Must one appliance be disconnected in order to plug in another?	<input type="checkbox"/>	<input type="checkbox"/>
3 Does the picture on your television set expand and contract when other electric appliances are being used?	<input type="checkbox"/>	<input type="checkbox"/>	6 Do you have "octopus" outlets around the house?	<input type="checkbox"/>	<input type="checkbox"/>

If you answered "Yes" on any count, you'd better take a long look at your wiring. For information on how you can make your home wiring safe, convenient and efficient, we suggest you call us, or your electrical contractor.

Wire on Time—
a single outlet or complete wiring modernization
• No down payment • 36 months to pay — on your electric service bill
• Minimum payment of \$1 a month • No appliance purchase necessary
• Regular carrying charge
This offer is available to our residential customers living in 1, 2, 3, or 4 family homes and to our farm customers.

—Mrs. Bertha Casper of Marshall spent Sunday and Monday with the Ray Casper and Marvin Schaefer families.
—Roy Hafenstein and Francis Delfeld of Milwaukee called on Mr. and Mrs. Louis Heister, Sr. Sunday afternoon.
—WANTED — FARMS FOR SALE. INQUIRE H. MAASKE, PHONE 24, KEWASKUM. 5-28-15
—Preston Pierce and friend Don Iverson of the Wisconsin Institute of Technology at Platteville, spent the week end at the Pierce home. Russ Rodenkirch, also attending school at Platteville, spent the week end at his home in Boltonville.
—Mrs. Allen Stutzman and daughter of Milwaukee spent the week end with her parents, Mr. and Mrs. John Gruber.
—Misses Ramona Coulter and Betty Krautkramer of the Deaconess School of Nursing, Milwaukee, spent the week end with their folks.
—Miss Sandra Ramthun spent the week end at the Reuben Vetter home in Beechwood.
—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.
—A. C. Ebenreiter spent a few days in Chicago the past week on business.
—Bob Rose of the University of Wisconsin, Madison, spent the week end with his parents.

Spot Shows

ALL I SEEM TO SEE ARE SPOTS BEFORE MY EYES!
SPEAKING OF SPOTS:
The best spot to buy reliable jewelry is at the ENDLICH Store.

—Mrs. Joseph Schoofs has just returned from a trip to Atlanta, Georgia, where she visited with her son Dick and family. She also made the acquaintance of their new son, Joseph Theodore, born Dec. 14, 1953.
—Mr. and Mrs. Clarence Riordan and family of Waukesha visited Sunday with Mrs. Clara Schmidt and in the afternoon they called on the Riordans' son Michael, who is a student at Mt. Calvary.
—Mr. and Mrs. Marvin Martin had as their guests Dr. and Mrs. George Parish of Mayville, Mr and Mrs. Wm. Rahjes and family and Hubert Bartelt of Theresa and Rev. and Mrs. Gerhard Kanjess.
—SEE FIELD'S FURNITURE MART AT WEST BEND BEFORE YOU BUY YOUR FURNITURE, RUGS AND HOUSEHOLD APPLIANCES. YOU CAN BUY FOR LESS AT FIELD'S, WHY PAY MORE? FIELD'S FURNITURE

MART, WEST BEND, WIS., TEL. 983. OPEN FRIDAY EVENINGS. OTHER EVENINGS BY APPOINTMENT. FREE DELIVERY.
—NEW PROSPECT
Maxine Roucks of Oakfield, Dolores Ludwig and Edith Meyer called on Kolleen Klostermann Sunday afternoon.
Mr. and Mrs. George Stern visited relatives at West Bend Wednesday.
Mrs. Arthur Timm of Portage is spending this week with her sister, Mrs. Frank Klostermann.
Mr. and Mrs. David Tennessee and family of Fond du Lac visited Mr. and Mrs. George H. Meyer Sunday afternoon.
Mr. and Mrs. Poruban of Waukesha visited Mr. and Mrs. Stan Poruban this week end.
Mr. and Mrs. Paul Glese and grandson Dale Matthies called on

Mr. and Mrs. Erwin Matthies Thursday evening.
Sunday afternoon Mr. and Mrs. Jerome Bowen and family of Dundee, Mr. and Mrs. Leo Bowen and daughter of Plymouth called on Mr. and Mrs. Frank Bowen.
Mr. and Mrs. Frank Klostermann, Sr. of Milwaukee were guests of Mr. and Mrs. Frank Klostermann Sunday.
Mr. and Mrs. Erwin Matthies called on Mr. and Mrs. Ray Matthies at Beechwood Sunday afternoon. Mrs. Jake Hammen who had been visiting there the past week returned to her home with them.
Mr. and Mrs. Frank Klostermann are attending the Personnel Institute at the University of Wisconsin several days this week.
Mr. and Mrs. Arno Meyer of Waldo, Mr. and Mrs. George H. Meyer and Edith visited Mr. and Mrs. John P. Meyer at Campbellsport Sunday evening.

MILK FOR TEEN-AGE GLOW!

TEEN-AGERS are now making "MILK flavored to taste" favorite refreshment. Look at these favorites . . . MILK and grape juice mixed half and half . . . or a ripe banana crushed and whipped into a cool glass of MILK (banana flip, it's called). Chocolate MILK plus a big scoop of chocolate ice cream makes a double chocolate hit . . . and for a drink as smooth as music mix MILK and pineapple juice, half and half.
Try any of these favorites . . . dream up your own special . . . strawberry, cherry, mint . . . and top it with whipped cream or ice cream for extra glamor. Plain or flavored, MILK is always refreshing, always satisfying, always good. Drink MILK . . . it's a smart habit.

TEACUP TOPICS

By BETTY ANN

The uses of cotton for pretty at home clothes are many. Fashions for festive wear combine high style with brilliant color and a truly practical warmth.

Favorite fabrics for these at home and party clothes are velvet, cotton lace and quilted cotton, says Betty Ann. Bright floral prints are sometimes combined with black velvet for sharp contrast.

The young homemaker who does a lot of entertaining (and all of her own housework) will have more fun as a hostess if she dresses to the occasion. For at home hours she might choose floral top in cotton worn with slim black velvet pants.

Most households have a certain number of visitors who just drop in during the holidays. The one costume that will get you by gracefully, yet permit you to be comfortable, too, is the little robe that's cut to look like a dress. It might be a floral printed cotton, quilted for warmth.

A collection of cashmeres reveals an elegant simplicity making each sweater an exclusive gift this season. Beautiful necklines, underscored by handmade braid trim, jeweled edging to soft collars, appear in styles that show to the greatest advantage the fine cashmere.

Collared cashmeres are different from white accents on pretty pull-overs, to a mock turtle neck for a short sleeved cardigan. Some have two toned ribbing on the collars, other cashmeres have square necklines with dutch collar effects or new little tab treatments.

The cashmere collector has a fashionable wardrobe and loves the classic long and short sleeve pullovers as well as the cardigan that can be worn as a blouse or a casual topper for fine costumes on cold evenings. There are wonderful colors in holiday lines, shocking pink, amethyst, aquamarine deep tones of smoke, sable and the vivid hunt red.

This season many lambswool sweaters are shown. Classic pull-overs and cardigan styles will be seen in gay holiday spots and resorts. They pack beautifully, are easy to care for.

Pullovers are excellent wardrobe extenders, because they go with so many different suits and skirts.

Change their moods with accessories, such as little furs, daytime or evening jewelry, collars and even your own individual embroidery, if needlework is your hobby.

Do you own a dress you feel you can't go wrong in? Most women do. For a teen ager it's likely to be a plaid wool, maybe black watch, with a high neck and three quarter sleeves. Conservative and pretty for school or job. A good investment.

A knitted wool suit is doomed if it gets even the smallest moth-hole, for it's practically impossible to mend. For this reason, the minute it gets a spot, especially food, get it cleaned. Nothing attracts the wool munchers faster than a food spot in wool.

Raspberry Delight

Two 10-ounce packages frozen raspberries; 2 packages lemon gelatin; 2 cups boiling water; Ginger ale; raspberry juice; 1 1/2 cups seeded red grapes; leaf lettuce; red grapes; mayonnaise.

Thaw raspberries. Drain. Save juice. Dissolve gelatin in boiling water. Add enough ginger ale to raspberry juice to make two cups liquid. Add to gelatin. Chill until almost congealed. Add raspberries and grapes. Pour into oiled six cup mold. Chill until set. Unmold on lettuce. Garnish with small bunches of red grapes. Serve with mayonnaise. Makes 8 to 12 servings.

Serve avocado halves filled with shrimp for lunch. To serve 12, you'll need six avocados and three pounds of shrimp. Marinate the cooked and cleaned shrimp in a tangy french dressing; just before serving drain lightly and arrange shrimp in the cavities of the avocado halves. Top with a little mayonnaise and garnish as desired. Slice hard cooked egg and capers may be a pretty garnish; so do small radish roses.

Children like packaged fig bar cookies cut into small pieces and folded into vanilla pudding.

Change the side you carry your shoulder bag over often. Otherwise the shoulder of your coat and the pocket will wear thin.

On May 15, 1915, the United States Army and Post Office Department cooperated in the first air-mail flight from Washington to New York.

New Hams Keep You From Being a 'Ham' in the Kitchen

BY DOROTHY MADDOX

THE new skinless and shankless hams make festive entertaining easier. The meat is no effort to prepare and carving is a joy. For a dinner with a holiday air, start by serving glasses of chilled fruit juice in the living room, with crackers and a choice of cheese or Braunschweiger sausage spreads.

Keep the ham platter simple, with only a garnish of green parsley that makes carving easy. Have a side serving dish of pears tinted red or green. Fill with cream cheese, or apples poached in red cinnamon-candy syrup, until they're a brilliant hue. Ham and sweet potatoes are a natural twosome. Follow tradition and serve the sweet potatoes mashed, in a fluffy, golden mound, topped with melted butter. A green vegetable such as broccoli or Brussels sprouts is a fine-flavored accompaniment. For salad, serve individual jellied fruit molds in red or green hue. Top with a wreath of creamy salad dressing. Hot rolls and butter complete this easily prepared main course.

Dessert probably is traditional at your house. If the family does not demand hearty pumpkin or mince pie or plum pudding, make dessert a handsome fruit-and-cheese tray, with thin slices of fruit-cake for those who still have room for nibbling. Pass salted nuts and coffee.

Lime Celery-Apple Molds

Dissolve 1 package lime-flavored gelatin in 1 cup boiling water. Add 1 cup cold water. Cool until partially set. Add 1 cup chopped, pared apple; 1 cup chopped celery and 1/2 cup chopped walnuts. Pour into 6 molds. Chill until firm.

Cranberry-and-Orange Relish Molds

Dissolve 1 package raspberry-flavored gelatin in 1 cup boiling water. Add 1 cup cold water. Cool until partially set. Grind to-

Squeals of delight from the guests and no grunts of effort on your part will greet meals with the new hams served as the main course.

gether 2 cups cranberries and the pulp and peel of 1 large orange with the white membrane and seeds removed. Mix in 1/4 cup sugar. Add the sweetened cranberry-orange relish to the gelatin. Pour into 6 molds. Chill until firm.

Health & Beauty

Sleep is the best beauty treatment of all. Lack of sleep over a long period can drag a person down to poor health both mentally and physically. Doctors are even using long periods of artificially induced sleep to cure some types of mental disorders.

There is no cream you can buy that will erase the lines put into your face by constantly not getting enough rest. This is often a problem to young mothers. The best advice in the world is to let some housework go undone and take a nap during the day with your baby.

Don't fool yourself into thinking that you will be able to cover those circles with makeup. At first this will be possible. However, after a while you will look like a hag, even under a ton of makeup.

One of the quickest ways to lose your mental poise and outward appearance is to couple late hours with over indulgence in alcohol and cigarettes. Alcohol has a tendency to dry the skin and thus make a perfect breeding place for wrinkles. Smoking is bad for the circulation and health in general. Anything that has a detrimental effect on health will help to destroy your good looks.

The best rule to live by is moderation. Get enough rest, enough nourishing food and exercise. You will be rewarded by a long and vigorous life.

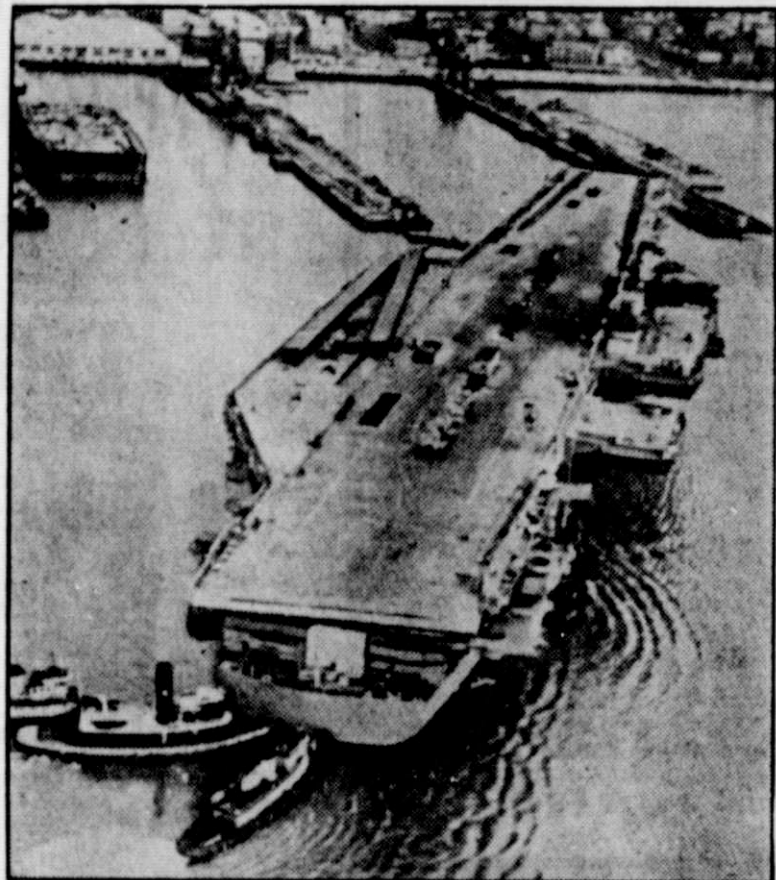

Life Insurance Soars To All-Time High

Many Americans do not realize the tremendous increase in the life insurance business which has occurred since the end of World War II. Recent figures show that life insurance in force climbed from \$122,000,000,000 in 1941 to \$304,000,000,000 at the beginning of 1954.

Moreover, the number of life insurance companies has increased by more than 300, and some 24,000,000 new policy-holders have been added to company lists.

It is now estimated that 79 percent of all families in this country own some type of life insurance.

The rise in insurance reflects the rise in prosperity in the United States in the last 13 years, and is a healthy condition for both the national economy and the insurance companies earning profits on this business. The most encouraging thing is the establishment of 300 new insurance companies, many of them in sections where insurance companies were a rarity only a few decades ago.

OPERATION NUJGE—The USS Forrestal, world's mightiest warship and largest ship ever constructed in the United States, is nudged by tugs into an outfitting dock at Newport News, Va., following her christening. Vital statistics: Overall length, 1036 feet; extreme breadth at flight deck, 252 feet; over 200,000 horsepower; a rated speed which tops 30 knots; nearly four acres of flight deck; height from keel to top of mast equals height of a 25-story building; crew of 3500 needed to man her.

WARM RECEPTION—Storekeeper on the Rue Tronchet, in Paris, France, installs infrared heaters over his display window in hopes that window shoppers will pause long enough to thaw out both themselves and their pocketbooks before going on to some other store.

In Fashion Now

American women, as a group, are the best dressed women in the world. Of course, this is mainly due to the prosperity found in this country, but the good sense and good taste of American women have had a hand in making this true.

Woman in this country, on the whole, want their dollar's worth. Because of this, there are good looking, well-made clothes available in almost all price groups. Coats, dresses, shoes, lingerie and accessories that are sound fashion and sound investments are seen in stores all over the country.

We are less prone to wear a design that is a fad or "in style" at the moment than the women of other countries. Right after the second World War, we went overboard for the new look. The exaggerated length of skirts was accepted. Looking back, the reason for this seems to be that women were so tired of the unattractive short skirts made necessary by the shortage of material, they were happy for a complete change. They got it!

However, since that time women have stayed on an even keel. They seem to have completely disregarded the "fad look." After trying it once, during the twenties, they have learned a lesson.

Fashion magazines are a big help. They inform women living in small, rural towns of the latest thing to be found in the large metropolitan cities. If not followed too closely, a good fashion magazine makes a fine guide.

Sports Quiz

1. Who won the Andrews-Martinez fight?
2. Who was recently named college football coach of the year?
3. What two teams were rated best in the collegiate football picture in 1954?
4. Who won the Most Valuable Player title in the American League (baseball) recently?
5. Who is Denny Pails?

The Answers:
1. Vince Martinez.
2. Red Sanders of UCLA.
3. Ohio State and UCLA.
4. Yogi Berra, of the New York Yankees.
5. Famous tennis stylist from Australia.

About Your Home

By FRANCES DELL

Anyone would like to get the most of furnace consumption. The best way to do this is to reduce the demand for heat put upon your furnace. This is very easy to accomplish with good insulation, weather-stripping, storm sash and fireplace dampers.

Much heat is lost through the roof in an uninsulated house. Insulating the floor of unused attic space results in considerable fuel savings. There are a large number of good insulating materials on the market that are easily installed and very inexpensive.

Doors and windows are also areas where great losses of heat sometimes occur. In warm sections of the country a good weather-stripping job, easily done by the man of the house will be sufficient. However, in the northern sections of the U.S.A., it is best to double up with storm sash. Remember too that every fireplace should be fitted with a fireplace damper.

Picture windows should be built with double-walled glass or heavy drapes should be drawn over the large glass areas during the winter months except at those times of the day when the sun is shining directly on the window.

Almost every community has its own climate peculiarities and it is very necessary for people of the community to understand these peculiarities. This knowledge should govern the type of heating equipment they purchase for their homes.

Since heating equipment for a home is expensive and because it is easy for inexperienced persons to waste money and cause themselves untold discomfort by choosing unsuitable equipment for their needs, it is wise to consult more than one heating authority before purchasing the heating system for your home.

"Home on the Range"

At least two, probably many more, active and retired Oliver Iron employees, have developed exceptionally attractive homes on the range. Jalmer Bergman, Burnside, is famed for his rock garden, 30x50 feet, with rocks from 28 different states, including trinitite from an atomic blast, a huge boulder clearly displaying what looks exactly like an x-ray of a man's chest, and two perfect imprints of a Bunyan-size shoe.

Haakon Anderson's teeming tree farm south of Ely is noted for hundreds of feet of smooth concrete walks and many home-made "gadgets" like a radio-controlled garage door.

Bible Comments

Jesus Still Is the Ideal Leader

WHEN Jesus invited others to follow Him, He asserted His place as a leader of men. Teaching humility both by precept and example, even to washing the Disciples' feet, He nonetheless made clear His spiritual supremacy and the prerogatives of His divine mission.

Others who have been ready to profess their leadership have had no such warrant in nature or in grace, but assumed a place for which they were not qualified, or betrayed a trust that calls for high standards of character and achievement.

No call is more urgent in our time than the call for leaders and leadership. The insistence and persistence of the call seems to suggest that there are more who are ready to respond than there are who meet the demand.

Jesus challenged the religious leadership of His day. He did not challenge the fact and authority, He said, sat in Moses' seat. What He criticized so vigorously, charging them with hypocrisy, was their failure to exercise their authority for righteousness and truth.

Leaders of religion and the religious community in general have not adequately met their obligations today, or conditions would not be what they are. The fault does not lie in any lack of honor and integrity on the part of religious leaders or of religious people in general.

And the great mass of church members are, beyond doubt, honest and sincere. The trouble is that many good people fail to face evil for what it is.

The failure is chiefly in the lack of capacity for indignation and action. We need to take seriously the Jesus told by Matthew, as well as the gentle Christ who took the children into His arms and blessed them.

LIGHT BULBS

During the past fifty-odd years, since the invention of the incandescent light, United States light-bulb manufacturers estimate that they have made forty billion bulbs. However, they also estimate that they will make that many in the next fifteen years.

SHAPED SIGNAL LIGHTS

Mount Dora, Fla.—Mayor L. L. Heaton has approved the idea of fitting masks over traffic lights to make green lights square, orange caution lights diamond shaped and red lights circles. The mayor says that even the color blind can tell what the traffic lights are signaling. He ought to know—he's color blind himself.

World At Large Is Prospering

Reports from London, Paris, the Netherlands, Bonn and other capitals, indicate that the world is now prospering as it has not done since the end of World War II. In fact, most of the countries of the world found 1954 a very prosperous year, even more so than 1953.

This was not true in the United States, however, where the Korean War boom was still in progress in 1953. As a result of this and the transition which followed the end of the war in Korea, the United States suffered somewhat of a let-down this year, which was mainly because of the change-over from a wartime to a peacetime economy.

The most recent news from London is optimistic and Bonn, West Germany also expects a record boom in 1955. Since the economies of all countries are interconnected and since what happens in one of them affects the economic condition in others, the fact that nearly all of our major allies expect to experience a very prosperous year in 1955 is highly encouraging.

This, taken with recent indications that the U. S. economy is definitely picking up steam, leads to an optimistic conclusion, when one considers prospects for the United States in 1955. For one thing, the steel market is picking up, and it is reported that the expectation in that industry is now brighter than it has been in some months. For another, the building boom is continuing, and expected to maintain its booming pace throughout 1955.

These factors, and many others, in addition to the fact that the trend toward increased unemployment has apparently been arrested, make for a bright outlook for 1955.

SUGAR PINE ©1954 National Wildlife Federation

Pinus lambertiana
This pine is commonly called California sugar pine. Appropriately, it may be spoken of in superlatives. It is certainly one of the tallest pines, reaching a height of 220 feet. Its cones may be to 21 inches long, exceeding most if not all other pine cones in that respect. When it comes to length of needles, however, its 4-inch needles cannot compete successfully with those of many other pines. Its trunk may on occasion reach a diameter of 12 feet and the crown may be 70 feet across. Surely such a tree is worthy of knowing.

The natural range of sugar pine is confined almost wholly to northern and central California and to west central and south western Oregon. It reaches its greatest size along the western slopes of the Sierra Nevada at elevations of between 3000 and 7000 feet. Its forests cover a broken area approximately 1000 miles long. It does best where it may be reached by the sun and where the soil is well drained. Occasionally it has been planted as far outside its range as western Europe. However, when grown under cultivation outside its natural range it shows little of the vigor to be found in the native areas.

Sugar pine needles are borne in groups of five, identifying the tree in part with the white pines. The needles are shed during the second or third year. They are rather stout and rigid. The cones reach their full growth in August and open, freeing the seeds, in October. The seeds are chestnut brown to black, about 1/2-inch long, with firm, brown, blunt wings. Cones mature the second season.

The staminate flowers that produce the pollen are a light yellow while those that produce the seeds are a pale green when they are young.

The bark of young trees is thin, smooth and dark green. On old trees it may be to three inches thick and composed of blocks of plate-like ridges covered with purple brown to reddish scales.

The major importance of the tree commercially, of course, is the wood. This is light, soft, pale reddish brown and straight grained. It is used in the making of shingles and for interior finishing purposes. Wounds made in the heartwood may exude a sweet sugary substance which undoubtedly gave the pine its name.

Young sugar pines may provide some browse for deer but it cannot be considered of major importance in this connection. Porcupines, chipmunks, gray foxes and squirrels are known to feed on the seeds. These seeds are gathered for planting in nurseries.

SPORTS AFIELD

By Ted Kesting

Fish scientists, or ichthyologists if you insist on being technical, have turned up many interesting facts about marine life, so lets look at some of their findings.

Take, for instance, the line running along each side of a fish from its gill opening to the base of the tail. It seems to be a mark that divides the upper and lower halves. Upon a closer examination we find this is an organ consisting of a continuous canal connecting each scale along the complete length of the fish. It is called "the lateral line."

The lateral line, or mucous canal system, is the seat of a sense peculiar to fish. Along this line there are little tubes that communicate with the exterior through pores either in the scales or between them. The elaborate system of the lateral line is akin to our sense of feeling.

Underwater vibrations of low frequency stimulate the lateral line organs and enable a fish to detect the movements of other creatures and to signal that rocks and other objects are near—it's the radar principle.

Some authorities doubt that fish really hear, at least in the same sense that higher animals do. It is probable, writes Robert D. Hall in an article in Sports Afield, that fish do hear through the structures of the inner ear, which is supposed to have evolved as a hearing and equilibrium organ, from one of the sense organs of the lateral line.

Ichthyologists tell us that the air bladder in many fish is closely related to a lunglike organ that served as an accessory breathing air chamber in a very ancient group of fish. Some fish still use the bladder in breathing.

This bladder is a hydrostatic organ, or float, that helps the fish hold its position in the water. As a fish rises to a higher level water pressure lessens, and the bladder and gas in it expands. The power of changing the volume of gas is believed to be limited and is by no means rapid. So a sudden rise or fall may be very dangerous to a fish. This explains why a fish taken from very deep water seems fairly ready to burst when brought to the surface.

WRONG PROTECTION—Prudent owners of this house in West London, England, have kept their portable air-raid warden pump (circled) ready for use all these years, but they never dreamed a freak wind-storm would slice off the side of their dwelling. No one was injured by the strange "twister" of fate.

Handy Jim's
FIX-UP TIPS
For the Home

To Lubricate a Lock

IF A LOCK becomes stiff and hard to operate, a temporary cure is available in any home in the form of a soft lead pencil. Simply rub the key until it is heavily coated with the graphite, and then turn it in the lock a few times. This treatment should make the lock work like new. Of course, you can use powdered graphite, which is available in most hardware stores. This lubricant is blown into the lock through the keyhole by squeezing the tube. The illustration appeared in *The Home Craftsman*.

Ten Word INTELLIGRAM

Check the correct word:

- Joseph M. (Dodge) (Chrysler) heads the new Council on Foreign Economic Policy.
- UN delegate Anthony Nutting is from (Britain) (Australia).
- (Dublin) (Glasgow) recently suffered a disastrous flood.
- (Higher) (lower) postal rates will be considered by the upcoming Congress.
- Defense Secretary Wilson says defense appropriations must be upped (\$5 billion) (\$10 billion) in the next fiscal year.
- The UN will mark its (9th) (10th) anniversary next June.
- President Eisenhower's farm is near (Gettysburg) (Altoona), Pa.
- Sen. Richard B. Russell (D., Ga.) says he (will) (will not) again be a candidate for Democratic presidential nomination in 1956.
- (Sugar) (salt) is the 6th wedding anniversary gift.
- A carbanule (is) (is not) a gem.

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

HERE'S HOW . . .

MAKE A TELEVISION TURN-TABLE

A television table with rotating top allows the set to be turned to best advantage. All lumber used is 1-inch stock. The legs are shaped from 1 by 4-inch boards, as are the leg supports. A slot is cut in the center of each support and the pieces are glued into a right-angle cross. The dowel holes are 1/4-inch in diameter.

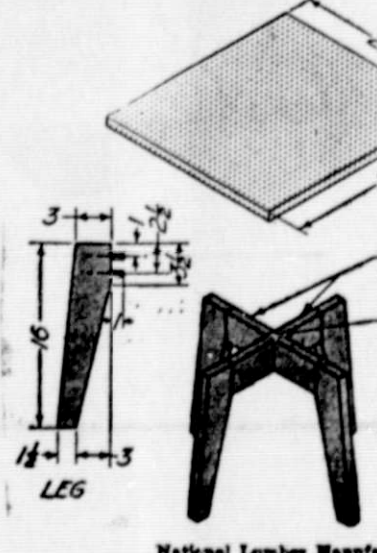

Complete the leg assembly by inserting and gluing the dowels and clamping it until the glue sets. Then bore a 1/4-inch hole down through the center of the leg support.

The turn-table plates are 18 inches in diameter, with a 1/4-inch center hole. Edge glue narrower stock to produce a surface from which the plates may be cut. Sand the plates smooth on both faces.

Insert a 5-inch carriage bolt in the center of one plate. Bore a hole in the center of the other side of the table for the bolt head. Fasten the plate beneath the table top with glue and 1 1/4-inch screws, countersunk.

Mount the other plate on the leg assembly with glue and screws.

The table-top assembly is placed on the leg assembly with the bolt serving as a pivot. Lubricate the plates with soap.

National Lumber Manufacturers Association

Cinderella Metal

A generation ago vermiculite was only a geological curiosity. Now it rivals lumber or wool in the comfort it offers humankind. A Montana lad, playing in the late 20's with this mica-like stuff he found everywhere, noticed that heat made the little particles expand and take on fancy shapes. Ten years later two tons of vermiculite valued at \$68 were shipped from Libby, Montana. Now the vermiculite volume is around \$20,000,000 a year. Scientific methods expand this odd mineral to 15 times its normal size, so that a cubic foot of its "crystals" weigh only about five pounds. We now know it by its trade name after the expansion process, Zonolite, sold most everywhere as a light, durable, and highly efficacious insulating material. It also plays an important role in making lightweight concrete products and fireproof plaster.

Our Ads Convince You

OUCH!—The boxing glove at left is regulation size, but the one at right is no manufacturer's display model. It's owner Ewart Potgieter, now working out in Johannesburg, South Africa, really packs a wallop—be's 7 feet, two inches tall.

Behind The Scenes in American Business

By Reynolds Knight

NEW YORK—Late in February some 300 to 400 businessmen, about equally divided as to representation between the U. S. and Latin America, will sit down in New Orleans to see what private capital can do to help develop nations south of the border.

This inter-American conference fits in with President Eisenhower's program for substituting private investments for government assistance in furthering the economic advancement of friendly nations. The idea came from the International Advisory Board, a group of 13 prominent business, farm and labor leaders appointed by the President to provide counsel on international development.

What will make the conference unique is the method of getting the businessmen together. Latin Americans have asked to discuss details of specific enterprises in which they would like Americans to invest. There will be special meetings for Americans interested, for example, in investing in Brazil, or for those seeking to put money into heavy industry, such as steel mills.

The theory behind the conference is simple; bringing together American investors and businessmen and Latin American businessmen will lead to new private U. S. investments. Such investments in Latin America now total \$6 billion—more than for the rest of the world except Canada.

OMEN FOR FUTURE — Economic expansion isn't being neglected by private U. S. capital in other parts of the globe, however. In Europe one of our leading wax companies recently enlarged its French operations with an ultra-modern plant in Paris.

The new plant is visualized by M. Edgar Faure, French minister of finance and economic affairs, as a forerunner of more foreign investment in his country. In a dedicatory statement, he said:

"We welcome the French wax company . . . We hope that other industries will find in France a favorable climate and that the modern and vigorous outlook of this dynamic firm will inspire all French industry."

The wax company manufacturer of household, automotive and industrial wax products, has operated in France for 25 years.

THINGS TO COME—For the do-it-yourself addict, a pre-cut 6-foot workbench of choice woods which can be assembled with blueprint help, with just a hammer and screwdriver . . . Luggage of magnesium. It's said to be cheaper, lighter, stronger and more durable than leather . . . Hearing aid completely camouflaged inside a pair of horn-rimmed eyeglasses . . . Sash runners that replace old, worn-out or broken sash cords with the aid of a screwdriver, eliminating weights, cords and chains.

TUBELESS SURGE—Business forecasters in Akron, O., are predicting that tubeless tires will capture half the nation's passenger car replacement tire market in 1955. Result: tubeless tires are coming off production lines faster than ever before.

One leading company for example, has assigned three-fourths of its passenger car tire facilities to tubeless production. During the next five years the company will invest a substantial portion of a \$100 million expansion program in increasing production and distribution of tubeless tires.

The vice president of the company's tire sales attributes the tubeless tire's newest and strongest surge of popularity to the fact that it's been adopted as standard equipment on most 1955 automobiles. It's no Johnny-come-lately, though; the tubeless idea has been gaining steadily, he says, through the seven years since it was first put on the market by them. The company, which holds six basic patents on it, has already produced and sold more than 3 1/2 million tubeless tires.

BITS O' BUSINESS — There are now 89 million telephones throughout the world, up 5 million over 1953. The U. S. has more than half . . . December steel output is expected to equal or exceed November production of 8,074,000 net tons, best month in a year . . . Corporate outlays for new plant and equipment in the first quarter of 1955 are estimated by the government at \$6.1 billion, lowest for any similar period since 1951.

FITTING

In a Massachusetts cemetery there is a gravestone with the following inscription: "Here lies Dentist Smith, filling his last cavity."

A 1787 resolution authorized an Army of 700 men.

Brucellosis Meetings Next Week in County

More than 50 per cent of the counties in Wisconsin are either on a Plan A Brucellosis control program or working on such a program.

Meetings on this subject will be held for all townships during the last week in January. The time and place of meetings will be as follows:

Trenton-Buettner's hall, Myra, Monday, Jan. 24, 1:30 p. m.
West Bend and Barton-West Bend High school (rear entrance), Monday, Jan. 24, 8:00 p. m.
Farmington-Turn Hall, Fillmore, Tuesday, Jan. 25, 1:30 p. m.
Richfield-Richfield Firemen's hall, Tuesday, Jan. 25, 8:00 p. m.
Hartford and Erin-Hartford City hall (lower gym), Wednesday, Jan. 26, 1:30 p. m.
Kewaskum-Kewaskum High school, Wednesday, Jan. 26, 8:00 p. m.

Jackson and Polk-Jackson Village hall, Thursday, Jan. 27, 1:30 p. m.
Germantown-Rockfield Inn, Rockfield, Thursday, Jan. 27, 8:00 p. m.
Wayne-Barney Strobel hall, Wayne, Friday, Jan. 28, 1:30 p. m.
Addison-Hess' Hall, Allenton, Friday, Jan. 28, 8:00 p. m.

Arthur Kurtz and Dr. G. Blake, both of the State Department of Agriculture, Madison, will be present to explain the Plan A program. Other assistance in answering your questions will be given by Dr. J. T. Kennelly, Hartford, and other county veterinarians.

July 1, 1955 is the date set for all Grade A producers of milk to have their herds free from Brucellosis if the milk is to qualify for movement within Wisconsin or to most points, like Chicago, outside of the state. These new dates were established following a series of public hearings held to amend the Wisconsin Grade A milk regulation. These new regulations also apply to all Grade A milk products except butter, in addition to fluid milk.

Washington county farmers who plan to qualify by the July 1st date for shipping Grade A milk and milk

products must have their herds certified with the Department of Agriculture as being Brucellosis free. Herds operating under Plan A will qualify.

The change in the Wisconsin regulation establishing a uniform qualifying date for Wisconsin Grade A milk and milk products which is the same as the deadline date set up by the Illinois Legislature.

The purpose of these meetings is to give dairymen a chance to learn about the Plan A requirements for dairy herds. The State Department of Agriculture has ruled that all herds producing Grade A milk must be certified as free from Brucellosis by July 1, 1955. This meeting is your opportunity to set up a Plan A program for Washington county.

Attend your township meeting. If this is not convenient, attend your nearest meeting.

FREE PROGRAM FOR FARM FAMILIES ON JOHN DEERE DAY
Five Color Films to Be Shown

"Miss Hattie," a full-color, feature length movie, will be part of the entertainment offered farmers who attend the John Deere Day program to be given by L. Rosenheimer.
Farmers of the area and their families will be guests of L. Rosenheimer at a John Deere Day program to be held at the Kewaskum Theatre on Feb. 3rd.
The program which will begin at 1:00 p. m. and 7:30 p. m., will feature the full-length, full-color movie, "Miss Hattie," a film story based on the life of the music teacher in a small town. According to Rosenheimers, the picture features a cast of leading Hollywood players and was filmed especially for John Deere by the Wilding Picture Productions of Chicago and Hollywood.
Besides the feature, the program includes the film, "Freedom for Eric," the story of a displaced person from Central Europe and the amazing discoveries he makes of modern farm life in America. Additional films to be shown farmer guests that day are "Oddities in Farming," a newsreel type of picture depicting the unusual in farming practices; "What's New for 1955," a preview of new farm equipment that will be available during the coming year, and several short subjects.
"There will be no admission charge," Rosenheimers said in their announcement. "The show is absolutely free to all farmers, their families, and their friends. However, admission will be by ticket only." Mr. Rosenheimer added that tickets are now being sent to all farmers in the area and that extra tickets will be available at the L. Rosenheimer Store for the asking. Free prizes will be given.

Styling that's stealing the thunder from the high-priced cars!

The styling spotlight blazes down on a low-cost car this year—for the Motoramic Chevrolet is stealing the show from the high-priced cars with its subtle sweep of line, the brilliant sophistication of its European-type grille, the bold rake of its deep-curved windshield.

And there's even more excitement in the way it drives—the velvety comfort of Glide-Ride front suspension and outrigger rear springs, the handling ease of Ball-Race steering, the flashing performance of the new 162-h.p. "Turbo-Fire V8" engine or the two new "Blue-Flame" 6's. All this—plus the extra-cost options of Powerglide or Overdrive and a full range of power assists. Try a 1955 Chevrolet—now—and you'll know why it is stealing the thunder from the high-priced cars.

MORE THAN A NEW CAR... A NEW CONCEPT OF LOW-COST MOTORING

And it's powered to run rings around the rest!

Everything's new in the motoramic CHEVROLET
